"Let's Hear It For Ohio"

Translated, that phrase means simply that we Ohioans are proud of our state.

Known traditionally as the "Gateway to the West," Ohio is a major crossroad in the nation's transportation network. We point proudly to the fact that our state has contributed greatly to the growth and development and economic well being of the country.

The key to our own impressive growth and development has been Ohio's outstanding transportation facilities—the finest anywhere.

Our modern highways lead motorists to businesses, recreational areas, modern airports and thriving lake and river ports. It is my hope that this 1973 transportation map will open up vast areas of our state for your business and personal enjoyment.

Best wishes for safe and pleasant traveling in Ohio.

John J. Gilligan, Governor
