Turn back the time of the most delicate skin around the eyes

The skin around the eyes is the thinnest and most sensitive skin on the body and is one of the most vulnerable to photoaging and darkening.

The skin around the eyes that shines brightly like moonlight

iLLUMA Luna
is a dark spot control product
with PN as the main ingredient.

Using pharmaceutical-grade raw materials, it works more safely on the sensitive skin around the eyes.

Hyaluronic Acid + PN

iLLUMA Luna is a product in which hyaluronic acid is added to PN(Polynucleotide), increasing cell permeability.

HA gel is hydrolyzed is slowly released, increasing the active time of PN and consequently extending the duration of product efficacy.
