How to install the driver on Mac?

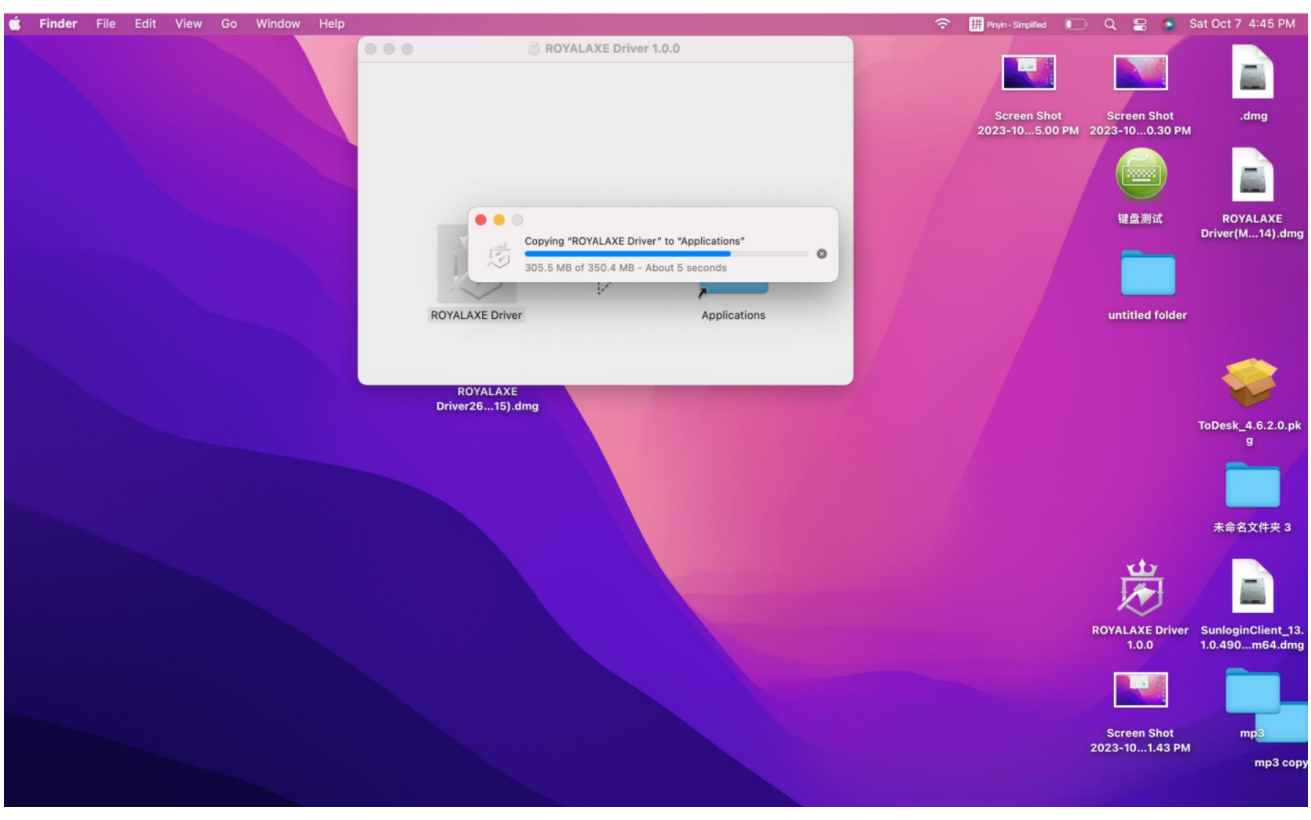

01 Double-click to open the "DMG" format installation package.

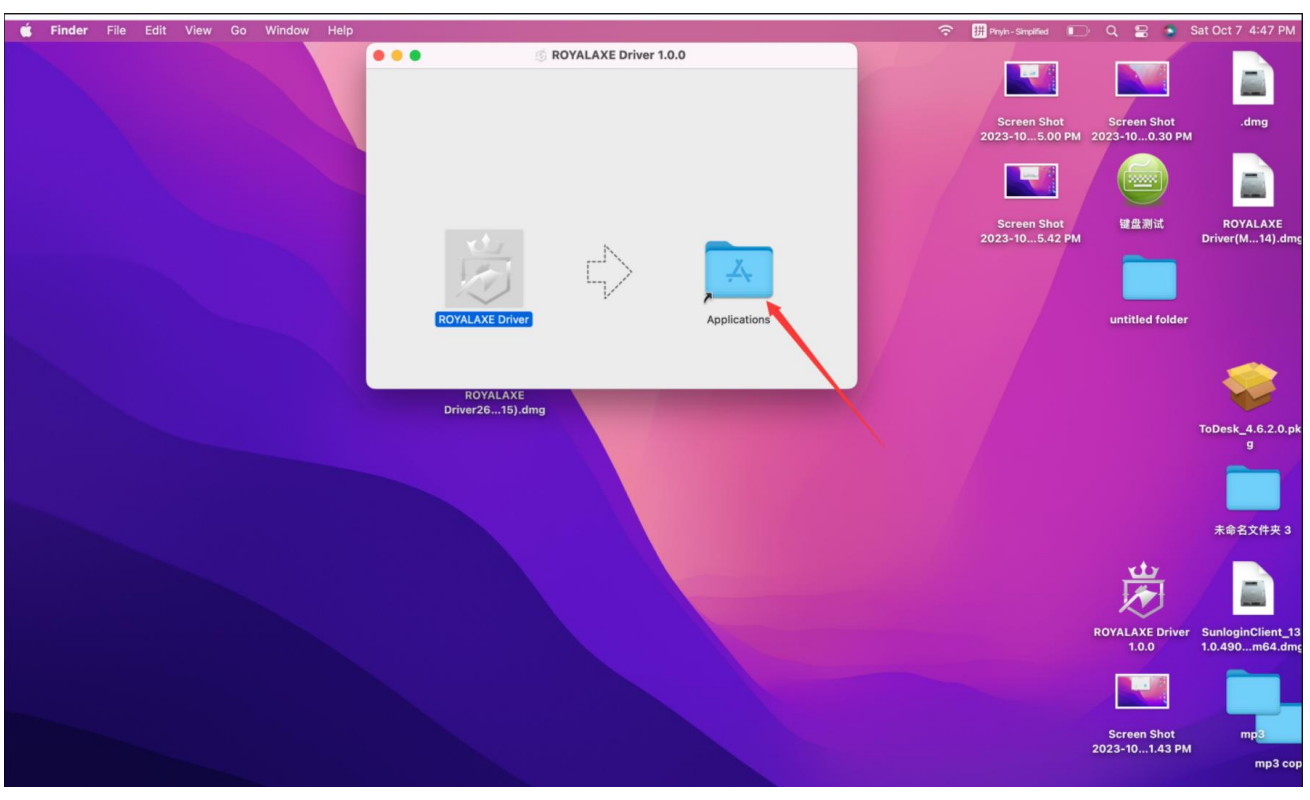

02 Click and drag the "ROYALAXE Driver" to the "Applications" folder in the system.

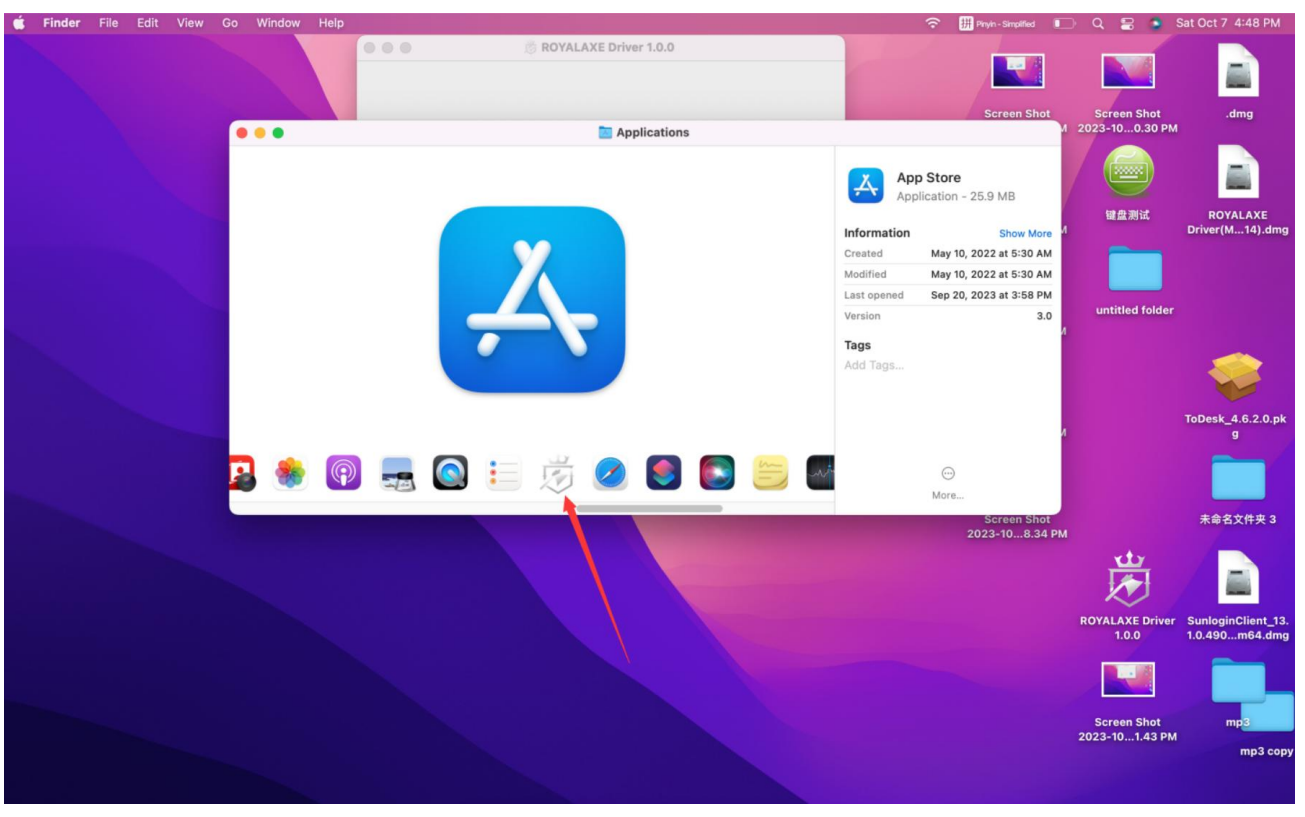

03 After the installation progress bar completes, the driver is installed on your computer, and the next step is driver authentication.

04 Double-click to open 'Applications'.

05 Drag the slider left or right to locate the "ROYALAXE" driver icon, then double-click to open the icon.

06 At this point, the computer will authenticate the software. Once the progress bar is finished, the entire installation is complete, and the software can now be used normally.
