ABOUT US

The new era of ParkoPlay

In 2024, Parkotechniki evolved into ParkoPlay, marking a new era of creativity and innovation. This rebranding came as the natural next step in a 25-year journey defined by dedication, growth, and a passion for play. Staying true to our core values of quality, safety, sustainability, and care for children, we continue to create spaces that inspire joy, imagination, and social connection.

ParkoPlay now represents the future of play: a company that looks beyond construction and creates experiences that build communities and lasting memories.

“ For more than 25 years, the way children play, identity, we continue to creation of experiences

Vasileios Lialios
Founder & CEO

our mission has been to redefine interact, and grow. With our new invest in innovation, safety, and the that strengthen connection and joy.”

About ParkoPlay

We started in 1998 with a simple but meaningful vision: to bring the joy of play closer to every child. From a small group of visionaries to our present-day presence across Greece and abroad, ParkoPlay has evolved into a leader in the design and construction of playgrounds, amusement parks, and sports facilities.

With modern production facilities in Nea Santa, Kilkis, offices in Athens and Thessaloniki, and exports to more than 25 countries, we continue to enrich play with new ideas and technologies.

Our goal is to create spaces that bring people together, inspire creativity, and provide a safe environment for expression for children of all ages and abilities.

Our Team

At ParkoPlay, behind every project stands a team of people driven by passion, expertise and a shared vision. Architects, engineers, designers and technicians work in harmony, combining technical know-how with creative spirit.

From the initial idea to the final installation, each project goes through a careful process of study, design and attention to detail, ensuring it meets the highest standards of safety and aesthetics.

Our commitment to the continuous training and development of our team ensures that we remain at the forefront of trends and the evolving needs of modern play. For us, play is a way of life and it deserves to evolve alongside society.

“Growing up not simply child of free to fulfill that where child flourish, and

Apostolos Lialios
Next Generation of Management

The Value of Quality

At ParkoPlay, our values guide the way we work, collaborate, and create. Quality is always at the core. Each of our projects is designed with attention to detail, carefully studied, and built using materials that truly stand the test of time and use.

At the same time, safety is an uncompromising priority. Our products strictly comply with European EN and ISO standards, ensuring that every child can play, explore, and develop in a fully protected environment.

Innovation drives us to explore new technologies, new forms of play, and new construction methods. Our goal is to stay up to date with developments and bring them into the world of play.

Finally, inclusion is a fundamental commitment. We create spaces for all children, regardless of abilities or needs, highlighting the value of cooperation, acceptance, and community.

in this company taught me that play is construction, but a promise to every dom, safety and joy. Today, we work promise by shaping environments ren can dream, relationships can communities can deepen their roots.”

The Essence of Timeless Construction

At the heart of every creation lie quality, care and respect for natural beauty. Each detail is designed with a focus on stability, timelessness and harmony, so that it preserves its character and warmth over time.

Our structures stand out for their durability and refined elegance, offering a balanced combination of functionality and aesthetic harmony.

The result is work defined by simplicity, natural textures and high quality that meets the needs of today and remains relevant in the future.

Environmental Responsibility

ParkoPlay actively supports sustainability. Most of our materials are recyclable or sourced from responsibly managed origins. We work with FSC and ISO 14001 certified suppliers and apply production processes that reduce environmental impact, respecting nature at every stage.

Safety Certifications

Our equipment fully complies with the highest European safety standards. By adhering to the requirements and specifications of EN standards, we prioritize the safety and well being of users, providing confidence and trust in every installation.

EN 1176 — Playground equipment

EN 1177 — Impact absorbing surfaces

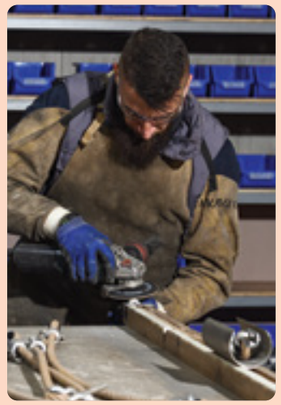

EN 71-3 — Safety of materials and chemical substances

REACH — Chemical safety compliance

EN 16630 — Outdoor fitness equipment

Chain of Custody — Responsible wood sourcing

ISO 9001 • 14001 • 22301 • 26000 • 27001 • 45001 • 50001 37001 • 39001

ParkoPlay Warranties

Quality does not end at delivery. With knowledge, responsibility, and respect for the environment, we create projects that combine durability with beauty, and spaces designed to last.

Each of our products comes with warranties of up to 15 years, ensuring long term value and trust.

CUSTOMIZED SOLUTIONS

Playground Customization Capabilities

We provide flexible customization solutions so that each play structure fits seamlessly into its environment and meets the specific needs of our partners.

Available options include color choices, modular components, and minor layout adaptations to ensure the best possible balance between functionality and design. Every adjustment is developed with a strong focus on safety and environmental harmony.

S134

Change in theme, colors, panels, as well as addition of an enclosed slide.

Original

Customized

S294

Removal of one slide to adapt the play structure to the available space in the park.

Original

Customized

S500

Change in color combinations. A palette of pastel shades was selected from the supplier's special range.

Redesign of the bridges connecting the towers.

Original

Customized

OUR MATERIALS

Decorative panels & Protective barriers

The panels are manufactured from **HPL** (High Pressure Laminate) in thicknesses of 8, 12 and 18 mm, available in a wide variety of colors. The material consists of multiple layers of paper impregnated with resin, which are compressed under high pressure and temperature. It is distinguished by its excellent resistance to ultraviolet (UV) radiation, impacts, scratches, and wear. It is also used as flooring in structures thanks to its textured anti-slip surface.

The panels are also available in **HDPE** (High Density Polyethylene) in thicknesses of 10, 15 and 19 mm. This is a highly durable thermoplastic polymer with strong resistance to UV radiation and weather conditions. HDPE is 100% recyclable, and recycled HDPE versions are also used, derived from processed plastic waste.

Wood

Our constructions, including playground systems, urban equipment, and swings, are mainly made from **Scandinavian Pine**.

The material carries FSC certification, guaranteeing responsible forest sourcing. Protective treatments and paints are water based, combining outdoor durability with environmental care.

Ropes

The ropes are made of polypropylene with **a steel core, with a diameter of 16 mm**. The connectors are made of high strength durable plastic or aluminum alloy, ensuring durability and safety during use.

Slides

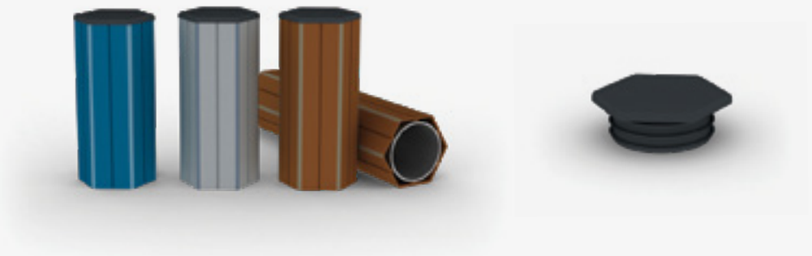

The slide chutes are made of **GFRP** (Glass Fiber Reinforced Polyester),a fiberglass reinforced composite material based on thermosetting resin.

It is lightweight yet highly durable, providing strong mechanical performance and outstanding corrosion resistance.

OUR MATERIALS

Hive Posts

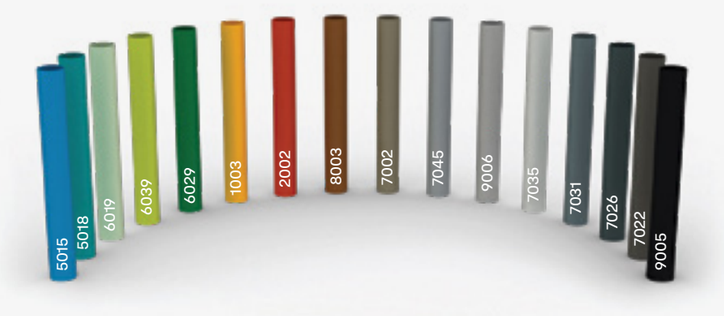

The Hive type posts feature an external **PVC casing with a hexagonal profile**, selected for aesthetic and safety reasons. Inside, there is a steel tube that contributes to structural strength, lower maintenance requirements, and overall stability of the structure.

Painted Metal Elements

The metal components are made of **S235JR structural steel** with a high percentage of recycled materials. For protection against corrosion and outdoor conditions, the following processes are applied:

- Hot-dip galvanizing followed by double electrostatic powder coating, or
- Shot blasting followed by double electrostatic powder coating.

These processes ensure high durability and a long service life.

Stainless Steel Elements

304 STAINLESS STEEL

316 STAINLESS STEEL

The stainless steel components are manufactured from **AISI 304 and AISI 316 grade stainless steel**, offering excellent corrosion resistance and reliable performance even in demanding weather conditions or coastal environments.

Tube Slides

The enclosed tube slides are made of durable **LDPE** (Low Density Polyethylene), offering high structural strength, safety, and long service life.

EQUIPMENT

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

ZOOMIE TOWER

Every great journey begins with a spark of imagination!

With bold scale, dynamic design, and vibrant energy, the Zoomie Tower was built to turn imagination into real experience and play into adventure.

Its themed sensory and balance panels create endless moments of exploration, creativity, and heroic play.

Fasten your seatbelts, we're ready for take off!

The Story of Zoomie Tower

A journey from idea to the playground of the future

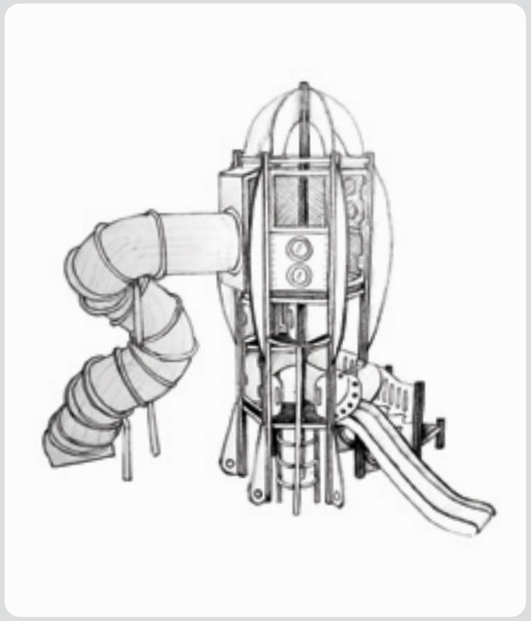

The Idea

Once upon a time, in a place full of imagination and design, an idea was born. An idea for a tower that would make children look up to the sky and dream that one day they could reach the stars.

It all started with a sketch.

A few lines, a touch of imagination, and a team that, on paper, saw something more than just a playground: they saw smiles.

Every day, designers, engineers, and craftsmen added another piece to it: a slide, a window, a bolt... all the elements that brought the dream closer to reality.

The Creation

The days passed and the dream began to take shape. The colors were chosen, the first column was cut, and every detail was carefully and respectfully assembled.

Each step was an act of collaboration and a promise that nothing great is ever created alone. It requires teamwork, purpose, and belief in the outcome. That is how we worked, transforming drawings into a living structure full of energy and light.

The First Flight

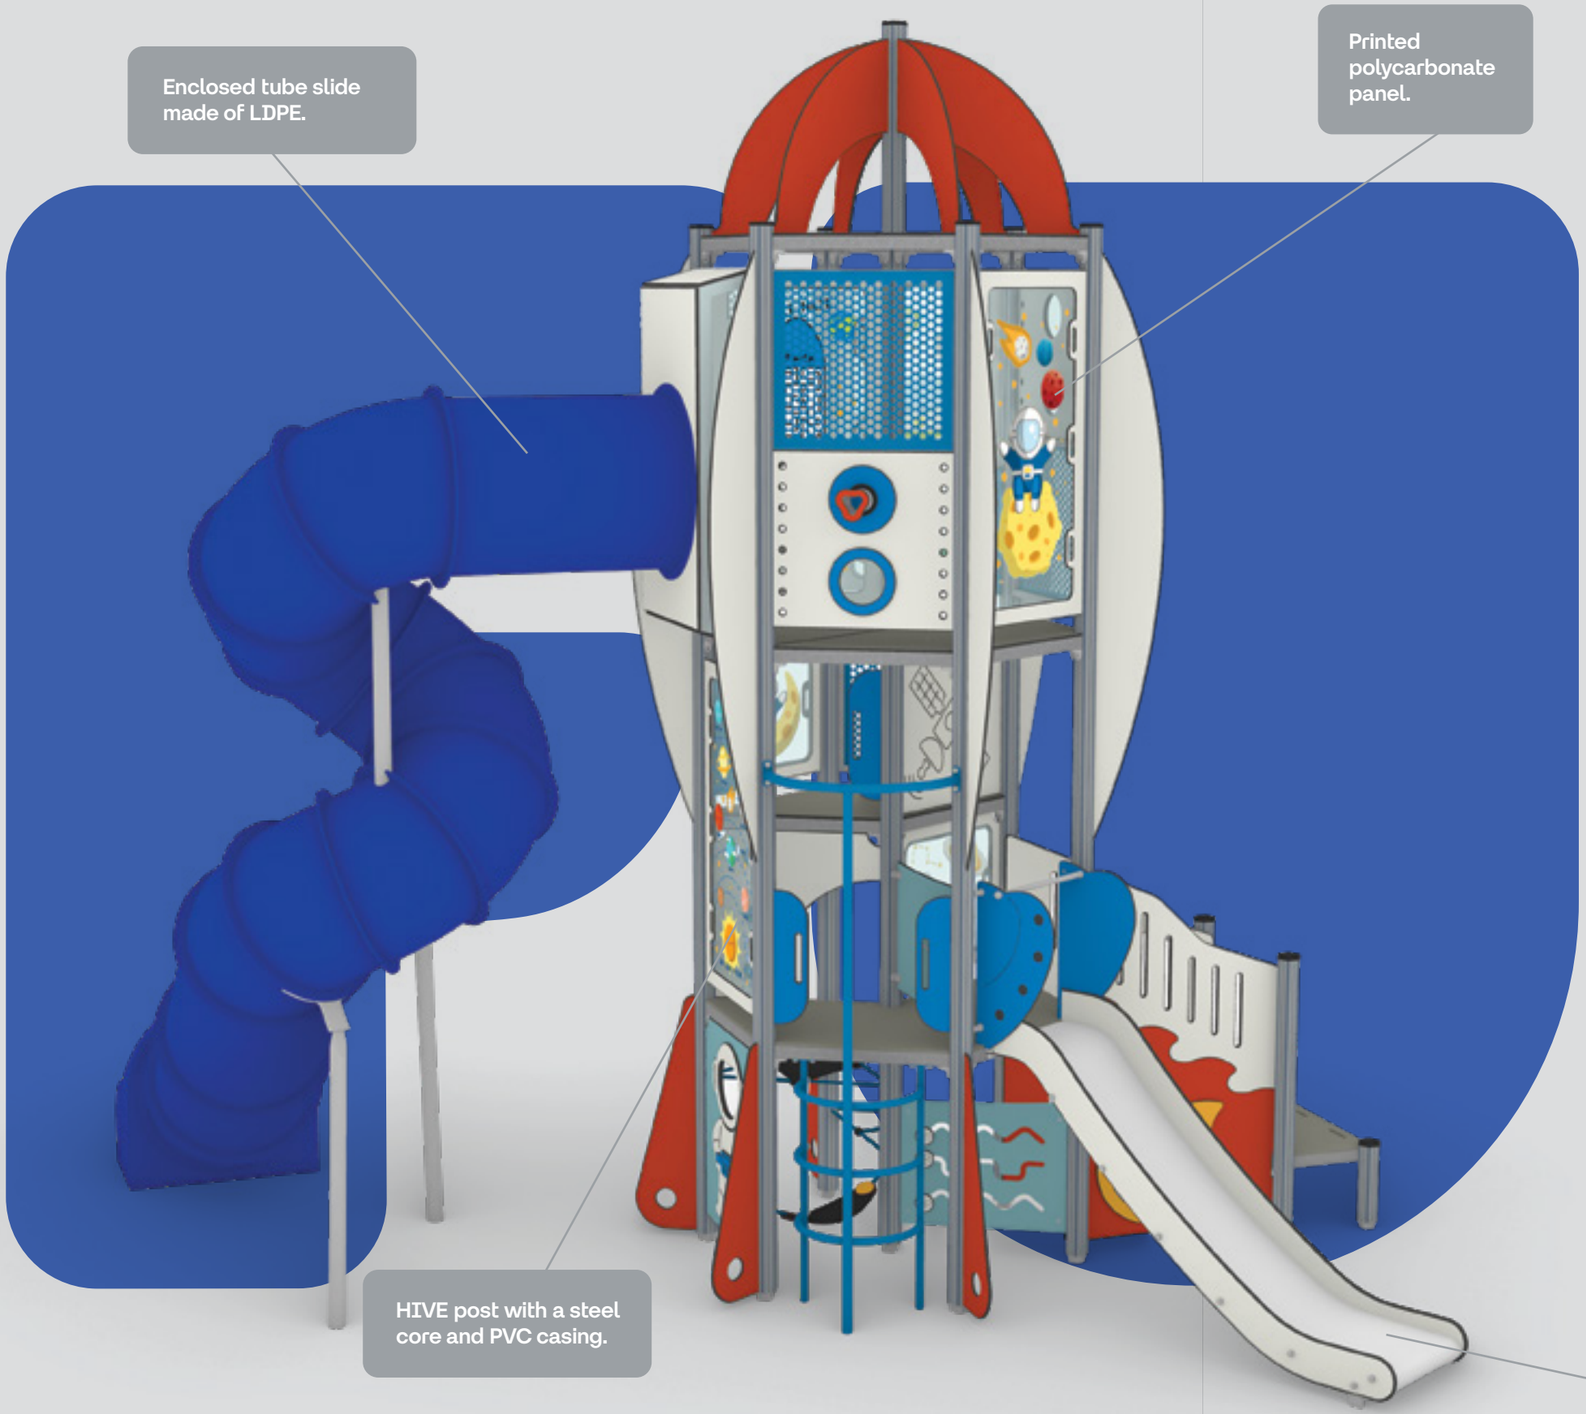

And then came the big moment. Zoomie was carefully assembled and filled the space with positive energy. Its first appearance at the Build Expo 2025 felt like a celebration.

Industry professionals, parents, and children gathered around it to explore it, take photos, and play, recognizing something familiar: the child within themselves that continues to dream.

There, among the lights and the attention, we felt something even stronger than pride: **the joy of working together to give children reasons to look up.**

And so, Zoomie became a symbol of the new era of ParkoPlay, an era where play goes beyond imagination and meets vision.

And they all lived happily ever after...
We simply keep doing what we love. Are you with us?

Every element of the play structure is designed to support children's development and encourage their confidence.

Product Number	S525	Impact (m²)	49,8
Dimensions L × W × H (cm)	580 × 550 × 580	Amount of users	25
Minimum Space L × W × H (cm)	880 × 935 × 580	Age range	1,5+/6+
Free Fall Height	125	Accessibility	—

Strength and Durability in Play

The new generation of metal design is here. Robust structures, modern aesthetics, and smart details create playgrounds that stand the test of time and action.

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

The construction features modern, high-spec material processing to deliver maximum reliability.

SPACE

Γαλαξιακές Περιπέτειες

Φουτουριστικά σχήματα, αστρικά μοτίβα και δυναμικά χρώματα μεταφέρουν τα παιδιά σε έναν κόσμο γεμάτο πλανήτες, διαστημικές βάσεις και ατελείωτες αποστολές εξερεύνησης.

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

Tower height: 3.70m.

Vertical climbing with ropes and HPL connectors.

Multiple climbing activity options.

Featuring intricate shapes and resilient materials, the design ensures stability, safe operation, and exceptional longevity.

05. MEDIEVAL

The Age of Knights Adventure

The Medieval series brings a dreamlike setting to life with imposing castles, wooden bridges, and imaginative play activities.

With themed sensory and balance panels, it offers countless opportunities for exploration, imagination, and heroic adventures.

The time has come for children to conquer their own kingdom.

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

Wood from responsibly and sustainably managed forests.

HPL panels with effects.

The structure is based on high quality wooden and metal elements, offering safety, stability, and long lasting performance in every play system.

JUNGLE

Time for Jungle Adventure

The Jungle series brings the magic of nature into play, offering an unforgettable experience full of discovery and adventure.

With designs inspired by wildlife, every element of the collection is created with attention to safety, creativity, and durability. Climbing features, pathways, and challenges invite you to explore!

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

Every path is thoughtfully designed to inspire exploration and active play, guaranteeing stability and safety with every single step.

HPL panels featuring perforated designs.

Product Number	S500	Impact (m^2)	170,2
Dimensions L × W × H (cm)	1295 × 1820 × 670	Amount of users	100
Minimum Space L × W × H (cm)	1630 × 2170 × 670	Age range	1,5+/6+
Free Fall Height	185	Accessibility	√

Perforated metal panel.

Stainless steel mesh with a metal support frame.

A Sunken Kingdom

Dive into an underwater world of play. With colors inspired by waves and designs drawn from life beneath the sea, the series creates a unique exploration experience.

10.

OCEAN

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

Colors inspired by the sea and seabed designs create a unique experience of discovery.

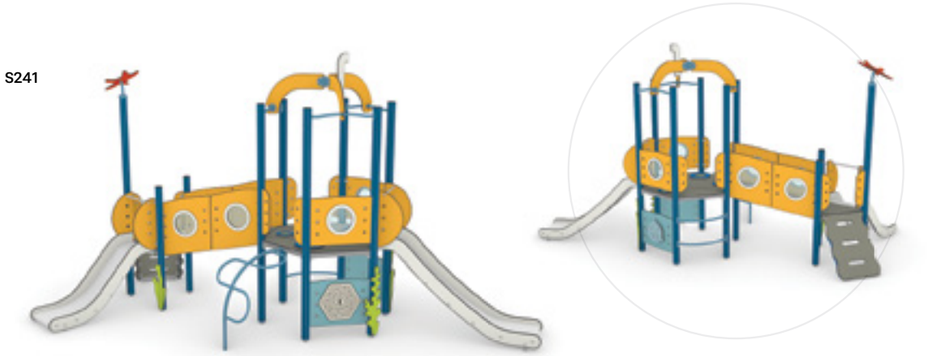

Anti-slip steps.

Passage through rubber elements.

Bridge with HPL and poly-carbonate barriers with printed designs.

FITNESS

ParkoPlay reserves the right to modify the design and technical specifications of its products without prior notice.

Energy and Strength

Modern outdoor training. Training and calisthenics equipment that enhances physical fitness for all ages.

Electrostatic powder coated metal elements.

Training equipment designed for strength, flexibility, and durability in outdoor spaces. For those who love to push their limits.

Product Number	CL023
Dimensions L × W × H (cm)	575 × 670 × 355
Minimum Space L × W × H (cm)	885 × 1085
Free Fall Height	250
Impact (m^2)	61,25
Amount of users	11
Age range	14+
Accessibility	—

Surfaces made of non-slip HPL panel.
