DEDICATION AND ACKNOWLEDGMENTS

This book is dedicated to Otto Carque, Chef Akasha, and Wayne Dawson.

Part of the enjoyment of writing a book lies in meeting people from around the world who share a common interest, and in learning from them what is often the knowledge or skills acquired during a lifetime of devoted research or practice. We wish to give deepest thanks...

Of the many libraries and librarians who have been of great help to our research over the years, several stand out:

University of California at Berkeley: John Creaser, Lois Farrell, Norma Kobzina, Ingrid Radkey.

Northern Regional Library Facility (NRLF), Richmond, California: Martha Lucero, Jutta Wiemhoff, Scott Miller, Virginia Moon, Kay Loughman.

National Agricultural Library: Susan Chapman, Kay Derr, Carol Ditzler, John Forbes, Winnifred Gelenter, Henry Gilbert, Kim Hicks, Ellen Knollman, Patricia Krug, Sarah Lee, Veronica Lefebvre, Julie Mangin, Ellen Mann, Josephine McDowell, Wayne Olson, Mike Thompson, Tanner Wray.

Library of Congress: Ronald Jackson, Ronald Roache.

Lane Medical Library at Stanford University.

Contra Costa County Central Library and Lafayette Library: Carole Barksdale, Kristen Wick, Barbara Furgason, Sherry Cartmill, Linda Barbero.

French translation: Martine Liguori of Lafayette, California, for ongoing, generous, and outstanding help since the early 1980s. Dutch translation: Sjon Welters. French translation Elise Kruidenier. German translation Philip Isenberg,

Japanese translation and maps: Akiko Aoyagi Shurtleff.

Loma Linda University, Del E. Webb Memorial Library (Seventh-day Adventist): Janice Little, Trish Chapman.

We would also like to thank our co-workers and friends at Soyinfo Center who, since 1984, have played a major role in collecting the documents, building the library, and producing the SoyaScan database from which this book is printed:

Irene Yen, Tony Jenkins, Sarah Chang, Laurie Wilmore, Alice Whealey, Simon Beaven, Elinor McCoy, Patricia McKelvey, Claire Wickens, Ron Perry, Walter Lin, Dana Scott, Jeremy Longinotti, John Edelen, Alex Lerman, Lydia Lam, Gretchen Muller, Joyce Mao, Luna Oxenberg, Joelle Bouchard, Justine Lam, Joey Shurtleff, Justin Hildebrandt, Michelle Chun, Olga Kochan, Loren Clive, Marina Li, Rowyn McDonald, Casey Brodsky, Hannah Woodman, Elizabeth Hawkins, Molly Howland, Jacqueline Tao, Lynn Hsu, Brooke Vittimberga, Tanya Kochan, Aanchal Singh.

Special thanks to: Tom and Linda Wolfe of Berwyn Park, Maryland; to Lorenz K. Schaller of Ojai, California; and to Wayne Dawson (genealogist) of Tucson, Arizona.

■ For outstanding help on this Health Food book we thank: Chef Akasha, Wayne Dawson, Vic Boff, Rose Boggs, Lisa Camps, Greg Caton, Sidney J. Cole, George Conquergood, Eloise T. Dilling, Jodie Ditch, Eric C. Fehlberg, Sharon Freeland, Adelle S. Gomory, Howard Grundland, Charlotte Van Gundy Holmes, Alice Marks Irvine, Richard F. James, Denis Peter Johnson, Alan Kahan, Ben Kahan, Colleen Kohnen, Gordon Kennedy, Robert J. Kennedy, David Laboyrie, Don Lazarro, C.H. Lee, Janice Little, Bruce Macdonald, Philip Marshall, David Mason, Nuno Matello, Jane McClenahan, John Menzies, Diana Mitchel, Frank Murray, Anthony A. Palermo, Danny Paolucci, Leo Perlstein, John Reiser, Helen Reiser, Jack Schwartz, Hillel Shapira (Seemo), Neil Rabheru, Katie Shepherd, Jimmy Silver, Patricia Smith, Paul Smith, J. Spaelstra (Kairava), Terry Todd, Helen Vaughn, Howard Wainer, Marcea Newman Weber, John F. Welty, Mel Williamson.

■ Finally our deepest thanks to Tony Cooper of San Ramon, California, who has kept our computers up and running since Sept. 1983. Without Tony, this series of books on the Web would not have been possible.

This book, no doubt and alas, has its share of errors. These, of course, are solely the responsibility of William Shurtleff.

■ This bibliography and sourcebook was written with the hope that someone will write a detailed and well-documented history of this subject.

INTRODUCTION

This is a brief biography of Otto Carque, a sample of one of the health food pioneers, most of whom lived and worked in California. The source of each piece of information is in this book.

1866 July 11 – Otto Heinrich Carque is born in Wiesloch, Mannheim, Baden [Germany], the first child and Eldest son of Louis Carque (born 6 July 1836). Anna Zentner Carque (born about 1839), both born in France, perhaps in Alsace-Lorraine. Otto's first language was French.

Note: Alsace-Lorraine was part of Germany from 1871 to 1918, after which it was returned to France by the Treaty of Versailles.

1870 June 11 – When Otto was about age 4, his mother, Anna dies at age 31 in Wiesloch, Baden, leaving her husband with 3 young children: Otto, Anna and Elise. Otto later claimed his mother died 'because of the doctors,' causing him to reflect upon health, disease and death,..."

1873 – Otto's father, Louis/Ludwig, remarries to Elise Bopp; and they have two more children, Hermine (born 26 Dec. 1874; died 6 Dec. 1885) and Ludwig Eduard (born 20 April 1877). Thus Otto was the eldest of 5 brothers and sisters.

Clarke Irvine (Otto's long-time close friend and admirer) recalled in Jan. 1935: "Handicapped with a weak physique, he early took up physical culture. It restored him, along with right living and natural foods, which he found remedied his acute constipation.

1887 – He arrives in New York City from Mannheim. There, recalls Benedict Lust, he was associated with Dr. Henry Lane, father of iridiagnosis in this country. Carque worked hard, and overcame many struggles.

1889 April 13 – Otto arrives in the USA at Ellis Island, Port of New York. Later in 1889 he traveled to California for the first time. For the next seven years he stayed mostly in the United States, on a path to citizenship. But he returned to Germany once, we don't know for how long.

1892 Nov. 19 – Otto returns to the USA for the third time, traveling with his youngest brother Louis/Ludwig. On the passenger list, Otto gives his age as 26 and Louis gives his age as 24. Both say they are wine merchants. They had come to see the Chicago World's Fair (1 May 1893 to 30 Oct. 1893; officially named World's Columbian Exposition) in Chicago, Illinois. After that Otto lived in New York for some years.

1895 – By age 28 he had become a vegetarian. "He lived 15 years on raw foods, then fresh fruits and vegetables, varied occasionally with eggs, cheese and nut butters, unroasted..."

1896 July 27 – Otto is naturalized (becomes a citizen of the U.S.) in New York City. At the time he lived at 65 2nd Ave. He gave his occupation as "confectioner." The witness to his naturalization was William Ulrich, a barber by profession.

1889 April 21 – Louis Eduard Carque, Otto's youngest brother, becomes a U.S. citizen, with Otto as his witness.

1904 – Otto's first two books are published by Kosmos Publishing Co. in Chicago: (1) *The Foundation of All Reform: A Guide to Health, Wealth and Freedom* (66 + vi p.). (2) *An Appeal to Common Sense* (15 + iv p.). Each is outstanding, advocating vegetarianism and natural foods. In the 2nd book Otto becomes the first American to use the term "natural foods" (plural).

Otto Carque continued to use the terms "natural foods" and "natural food" throughout his life, even though his colleagues preferred the terms "health foods" and "health food." Starting in 1922, in advertisements in the *Los Angeles Times*, he referred to his line of products (mostly dried fruits and nuts) as "Natural Foods of California." In 1925 he wrote and published a 359-page book titled *Natural Foods: The Safe Way to Health*. By 1931 he had renamed his company "Carque Natural Foods" and by 1935 a huge sign across the top of his food factory spelled out the company name.

1905 – Carque arrives in California from the East and settles in Los Angeles. In the fall, he begins his work with food or beverages by putting up 25,000 gallons of unfermented grape juice using a new method he invented (*Los Angeles Times*. 1906. Aug. 19, p. VI15).

1906 – Carque now has a little store in Los Angeles which, it is later said, "sowed the seed of Natural Foods in Los Angeles" (*Los Angeles Times*. 1926. Oct. 31).

1912 Jan. 18 – Carque runs his first ad in a California newspaper (*Los Angeles Times*): "Wanted – Boy with wheel to assist in manufacturing of health foods. Vegetarian

Copyright © 2021 by Soyinfo Center

preferred." Clearly, he wants to start a business.

1912 Aug. 15 – Announcement that "Carque Pure Food Company" has been incorporated. "Incorporators: Otto Carque, Edward Zeller, Harold D. Smith, Madeline Ronstand, Albert Maas; capital stock, $25,000; subscribed, $50."

1912 Nov. 13 – An ad announces that Carque is now selling his unsulphured Mission Figs at a Los Angeles grocery store (Walter E. Smith Co.). By March 1913 he is advertising his Black Mission Figs in a New York magazine.

1917 – Carque's Pure Food Co. first appears at 1605-1607 South Magnolia Ave., Los Angeles, California. They specialize in sun-dried black mission figs, and have a complete line of selected California dried fruits, nuts, nut butters, etc. He advertises that he sells "pure natural food products."

1920 June – An ad by Carque mentions that he now grinds flour using his own mill, and that he has a line of products, described in a circular with price list.

1921 May 1 – He now has a store at 2618 West Seventh Street in Los Angeles.

1922 March – *Natural Foods of California*, by Otto Carqué is published by Carqué Pure Food Co. in Los Angeles (21 p. 22 cm tall).

1922 June 11 – First mention of "The Carque Shop" and of "Natural Foods of California," a Carque registered trademark.

1925 Sept. – *Natural Foods: The Safe Way to Health*, by Otto Carqué, is published by Carqué Pure Food Co., Inc., Los Angeles, California (359 pages, 20 cm tall).

1925 Oct. 1 – Carque is now located in The Natural Foods Building, 729 Seward St., Los Angeles.

1925 Nov. 22 – Carque's California fruits and nuts, are now sold in metal holiday gift canisters at the Ville de Paris in Los Angeles. They are "packed in Los Angeles at the unique Carque factory..."

1926 July 4 – Carque now has a food shop at 831 South Flower St. in downtown Los Angeles.

1926 Oct. 31 – Carque now has a shop at 6411½ Hollywood Blvd. in downtown Los Angeles. He now has three shops. Hollywood Boulevard, which includes the famous Hollywood theater district, is a fashionable address.

1927 Nov. 6 – While on a lecture tour in New York City, Otto Carque (age 59 and still a bachelor) meets his bride to be, Lillian Reicher. She moves to California, where he employs her to assists him in the reorganization of his business, Carque Pure Food Company. They are married on Nov. 6, 1927 in Los Angeles. She becomes ever more actively involved with his work and business.

1928 March – *Mrs. Carqué's Recipe Book*, by Lillian R. Carque, is published in Los Angeles by Otto Carque (32 pages, 15 cm tall). It advocates a "fruitarian as well as a vegetarian dietary." The recipes call for many Carque brand products by name – such as: Carque's Almond Butter, Carque's Black Mission Figs, Carque's California Dates, Carque's California Honey, Carque's California Olive Oil, Carque's Celery Salt, Carque's Cracked Wheat, Carque's Deglet Noor Dates, Carque's Dried Apricots, Carque's Fig Paste, Carque's French Dressing, Carque's Gem Peanut Butter, Carque's Granulated Agar, Carque's Lentil Flour, Carque's Natural Whole Rice [brown rice], Carque's Nut Cream Butter, Carque's Nut Fruto, Carque's Nuts, Carque's Onion Salt, Carque's Orange Blossom Honey, Carque's Peanut Butter Dressing, Carque's Peanut Meal, Carque's Pecan Meal, Carque's Pitted Dates, Carque Powdered C-Leaves, Carque's Prunola Dressing, Carque's Raw Hawaiian Sugar, Carque's Ripe Olives, Carque's Savory Nut Loaf, Carque's Seeded Muscat Raisins, Carque's Seedless Raisins, Carque's Shredded Cocoanut, Carque's Soya Bean Flour, Carque's Thompson Seedless Raisins, Carque's Unsulphured Dried Peaches, Carque's Unsulphured Dried Pears, Carque's Whole Wheat Macaroni.

Lillian R. Carqué was born in 1899.

1929 Oct 29 – Stock market crash heralds the Great Depression.

1930 – *The Key to Rational Dietetics: Fundamental Facts about the Prevention of Disease, the Preservation of Health, the Prolongation of Life*. New, revised and enlarged ed., by Otto Carqué is published by the author in Los Angeles (151 p., 24 cm. tall).

1933 May 30 – Carque announces that he is closing his retail shop on Hill Street and moving to 1315 South Maple Ave., in Glendale, where he will do **wholesale** business only. This small announcement marks the first appearance of Carque in *California Health News*, published in Hollywood by his friend and admirer, Clarke Irvine.

1933 – *Vital Facts about Foods: A Guide to Health and Longevity with 200 Wholesome Recipes and Menus and 250 Complete Analyses of Foods*, by Otto Carqué is published by the author in Los Angeles (208 pages; 24 cm tall) . Several

Copyright © 2021 by Soyinfo Center

subsequent editions were published.

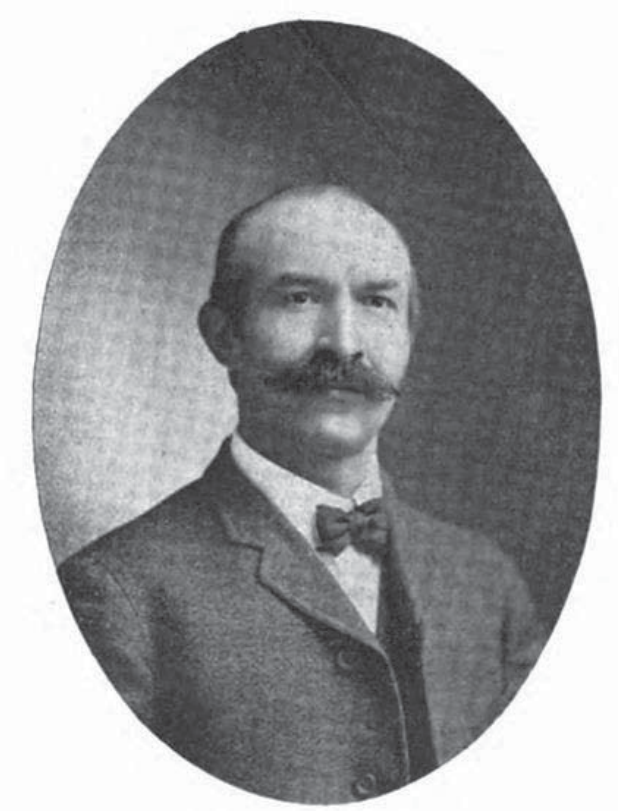
1935 Jan. 9 - Carque dies at age 69 of traffic accident injuries. He was walking across a street in a so-called "safety zone" when he was struck by distracted woman motorist. Final rites are conducted on Jan. 12 at the Hollywood Cemetery chapel. He leaves his widow at the family residence, 1315 Maple avenue.

There is a huge outpouring of love for Otto Carque both here and in the pages of *California Health News* and in an obituary by Philip M. Lovell in the *Los Angeles Times* (Feb. 10) who called him the "the first pioneer in the California pure food movement" and "great scientist, a thinker, an idealist, a lover of mankind.

"Otto Carque's name on food was virtually a warranty of its purity. He was the first to storm against the chemical pollution of foods – their adulteration with various vicious preservatives.

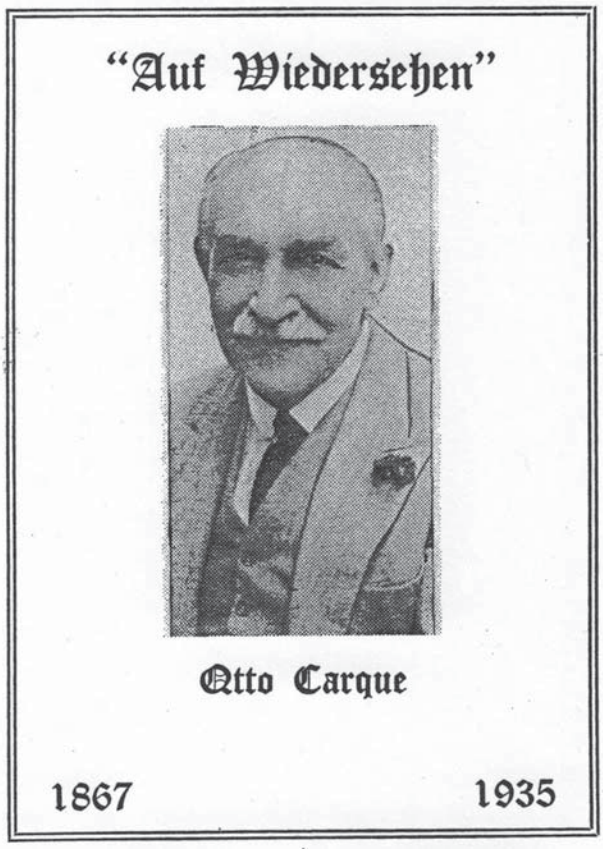
"He was a co-worker with great men, carrying on an active correspondence and joint endeavor with men of the stamp of the late the head [Harvey W. Wiley] of the Bureau of Chemistry of the nation [1901-1912], a man who has done perhaps as much as anyone in the world to better the food conditions of America.

"He had a keener knowledge of soils, of foods and their values, of ways and methods of maintaining good health through diet, than perhaps any other man in this country.



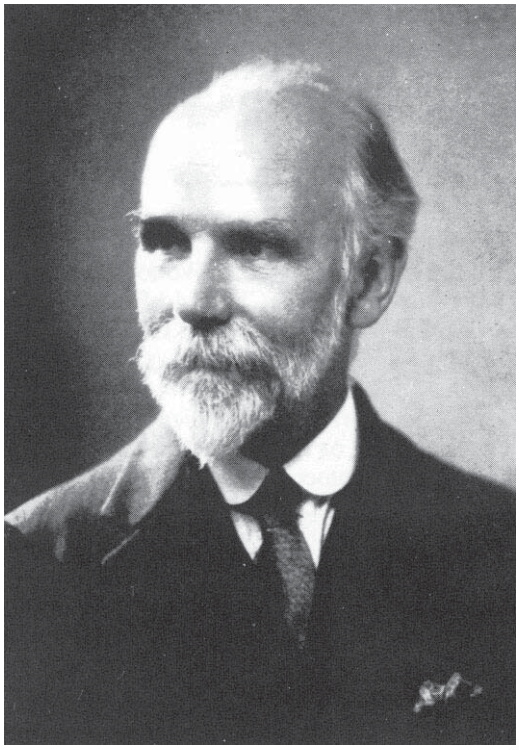
"In spite of his being nearly 70 years of age, one could find him doing his fourteen to sixteen hours' work each day, supervising, directing, and doing the manual labor incident to distribution of his foods which have reached nationwide circulation.

"He was the author of several extraordinarily fine books which have been read by scores of thousands..."



Clark Irvine invites anyone who has recollections of Otto Carque to send them to *California Health News*. He will publish them, and they will gradually constitute a biography.

1935 Jan. – Mrs. Carque carries on the work of her late husband, which is extremely complex and demanding. Often working late into the night, and very early in the mornings, he "did research work, financial matters, was main buyer, and supervised the production, while she attended to the business end."



1937 July – After trying for more than two years to do the work of two people, Carque's food manufacturing company, for some time poised near bankruptcy, is sold by his wife to the Confection Co. of California. Mrs. Lillian Carque will act as publicity director.

OTTO CARQUE.

ABOUT THIS BOOK

This is the most comprehensive book ever published about the history of the health foods movement. It has been compiled, one record at a time over a period of 42 years, in an attempt to document the history of this interesting subject. It is also the single most current and useful source of information on this subject.

This is one of more than 100 books compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyinfo Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features detailed information on:

- 68 different document types, both published and unpublished.
- 2302 published documents - extensively annotated bibliography. Every known publication on the subject in every language.
- 266 unpublished archival documents.
- 155 original Soyinfo Center interviews and overviews never before published, except perhaps in our books.
- 206 commercial soy products.

Thus, it is a powerful tool for understanding the development of this subject from its earliest beginnings to the present.

Each bibliographic record in this book contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English language publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given). For most books, we state if it is illustrated, whether or not it has an index, and the height in centimeters.

All of the graphics (labels, ads, leaflets, etc) displayed in this book are on file, organized by subject, chronologically, in the Soyinfo Center's Graphics Collection.

For commercial soy products (CSP), each record includes (if possible) the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as advertisements, articles, patents, etc.) are also given.

A complete subject/geographical index is also included.

HOW TO MAKE THE BEST USE OF THIS DIGITAL BOOK - THREE KEYS

1. Read the Introduction and Chronology/Timeline located near the beginning of the book; it contains highlights and a summary of the book.

2. Search the book. The **KEY** to using this digital book, which is in PDF format, is to **SEARCH IT** using Adobe Acrobat Reader: For those few who do not have it, Google: **Acrobat Reader** - then select the **free** download for your type of computer.

Click on the link to this book and wait for the book to load completely and the hourglass by the cursor to disappear (4-6 minutes).

Type [Ctrl+F] to "Find." A white search box will appear near the top right of your screen.
Type in your search term, such as Irvine or Clark Irvine.
You will be told how many times this term appears, then the first one will be highlighted.
To go to the next occurrence, click the down arrow, etc.

3. Use the indexes, located at the end of the book. Suppose you are looking for all records about tofu. These can appear in the text under a variety of different names: bean curd, tahu, doufu, to-fu, etc. Yet all of these will appear (by record number) under the word "Tofu" in the index. See "**How to Use the Index**," below. Also:

Chronological Order: The publications and products in this book are listed with the earliest first and the most recent last. Within each year, references are sorted alphabetically by author. If you are interested in only current information, start reading at the back, just before the indexes.

A Reference Book: Like an encyclopedia or any other reference book, this work is meant to be searched first - to find exactly the information you are looking for - and then to be read.

How to Use the Index: A subject and country index is located at the back of this book. It will help you to go directly to the specific information that interests you. Browse through it briefly to familiarize yourself with its contents and format.

Each record in the book has been assigned a sequential number, starting with 1 for the first/earliest reference. It is this number, not the page number, to which the indexes refer. A publication will typically be listed in each index in more than one place, and major documents may have 30-40 subject index entries. Thus a publication about the nutritional value of tofu and soymilk in India would be indexed under at least four headings in the subject and country index: Nutrition, Tofu, Soymilk, and Asia, South: India.

Note the extensive use of cross references to help you: e.g. "Bean curd. See Tofu."

Countries and States/Provinces: Every record contains a country keyword. Most USA and Canadian records also contain a state or province keyword, indexed at "U.S. States" or "Canadian Provinces and Territories" respectively. All countries are indexed under their region or continent. Thus for Egypt, look under Africa: Egypt, and not under Egypt. For Brazil, see the entry at Latin America, South America: Brazil. For India, see Asia, South: India. For Australia see Oceania: Australia.

Most Important Documents: Look in the Index under "Important Documents -."

Organizations: Many of the larger, more innovative, or pioneering soy-related companies appear in the subject index – companies like ADM / Archer Daniels Midland Co., AGP, Cargill, DuPont, Kikkoman, Monsanto, Tofutti, etc. Worldwide, we index many major soybean crushers, tofu makers, soymilk and soymilk equipment manufacturers, soyfoods companies with various products, Seventh-day Adventist food companies, soy protein makers (including pioneers), soy sauce manufacturers, soy ice cream, tempeh, soynut, soy flour companies, etc.

Other key organizations include Society for Acclimatization (from 1855 in France), American Soybean Association, National Oilseed/Soybean Processors Association, Research & Development Centers (Peoria, Cornell), Meals for Millions Foundation, and International Soybean Programs (INTSOY, AVRDC, IITA, International Inst. of Agriculture, and United Nations). Pioneer soy protein companies include Borden, Drackett, Glidden, Griffith Labs., Gunther, Laucks, Protein Technologies International, and Rich Products.

Soyfoods: Look under the most common name: Tofu, Miso, Soymilk, Soy Ice Cream, Soy Cheese, Soy Yogurt, Soy Flour, Green Vegetable Soybeans, or Whole Dry Soybeans. But note: Soy Proteins: Isolates, Soy Proteins: Textured Products, etc.

Industrial (Non-Food) Uses of Soybeans: Look under "Industrial Uses ..." for more than 17 subject headings.

Copyright © 2021 by Soyinfo Center

Pioneers - Individuals: Laszlo Berczeller, Henry Ford, Friedrich Haberlandt, Artemy A. Horvath, Englebert Kaempfer, Mildred Lager, William J. Morse, etc. Soy-Related Movements: Soyfoods Movement, Vegetarianism, Health and Dietary Reform Movements (esp. 1830-1930s), Health Foods Movement (1920s-1960s), Animal Welfare/ Rights. These are indexed under the person's last name or movement name.

Nutrition: All subjects related to soybean nutrition (protein quality, minerals, antinutritional factors, etc.) are indexed under Nutrition, in one of more than 70 subcategories.

Soybean Production: All subjects related to growing, marketing, and trading soybeans are indexed under Soybean Production, e.g., Soybean Production: Nitrogen Fixation, or Soybean Production: Plant Protection, or Soybean Production: Variety Development.

Other Special Index Headings: Browsing through the subject index will show you many more interesting subject headings, such as Industry and Market Statistics, Information (incl. computers, databases, libraries), Standards, Bibliographies (works containing more than 50 references), and History (soy-related).

Commercial Soy Products (CSP): See "About This Book."

SoyaScan Notes: This is a term we have created exclusively for use with this database. A SoyaScan Notes Interview contains all the important material in short interviews conducted and transcribed by William Shurtleff. This material has not been published in any other source. Longer interviews are designated as such, and listed as unpublished manuscripts. A transcript of each can be ordered from Soyinfo Center Library. A SoyaScan Notes Summary is a summary by William Shurtleff of existing information on one subject.

"**Note**:" When this term is used in a record's summary, it indicates that the information which follows it has been added by the producer of this database.

Asterisks at End of Individual References:

1. An asterisk (*) at the end of a record means that Soyinfo Center does not own that document. Lack of an asterisk means that Soyinfo Center owns all or part of the document.

2. An asterisk after eng (eng*) means that Soyinfo Center has done a partial or complete translation into English of that document.

3. An asterisk in a listing of the number of references [23* ref] means that most of these references are **not** about soybeans or soyfoods.

Documents Owned by Soyinfo Center: Lack of an * (asterisk) at the end of a reference indicates that the Soyinfo Center Library owns all or part of that document. We own roughly three fourths of the documents listed. Photocopies of hard-to-find documents or those without copyright protection can be ordered for a fee. Please contact us for details.

Document Types: The SoyaScan database contains 135+ different types of documents, both published (books, journal articles, patents, annual reports, theses, catalogs, news releases, videos, etc.) and unpublished (interviews, unpublished manuscripts, letters, summaries, etc.).

Customized Database Searches: This book was printed from SoyaScan, a large computerized database produced by the Soyinfo Center. Customized/personalized reports are "The Perfect Book," containing exactly the information you need on any subject you can define, and they are now just a phone call away. For example: Current statistics on tofu and soymilk production and sales in England, France, and Germany. Or soybean varietal development and genetic research in Third World countries before 1970. Or details on all tofu cheesecakes and dressings ever made. You name it, we've got it. For fast results, call us now!

BIBLIO: The software program used to produce this book and the SoyaScan database, and to computerize the Soyinfo Center Library is named BIBLIO. Based on Advanced Revelation, it was developed by Soyinfo Center, Tony Cooper and John Ladd.

History of Soybeans and Soyfoods: Many of our digital books have a corresponding chapter in our forthcoming scholarly work titled History of Soybeans and Soyfoods (4 volumes). Manuscript chapters from that book are now available, free of charge, on our website, www.soyinfocenter.com and many finished chapters are available free of charge in PDF format on our website and on Google Books.

About the Soyinfo Center: An overview of our publications, computerized databases, services, and history is given on our website.

SOYINFO CENTER

World's Most Complete Collection of Soy Information

Founded 1976 SoyaScan Databases Publishing Consulting Research Library

INTRODUCING SOYINFO CENTER

Mission: To be the world's leading source of information about soyfoods and utilization of soybeans in both printed and electronic formats. Much of our information is **free**!

Founding: In October 1972 William Shurtleff and Akiko Aoyagi began full-time research on soyfoods in Japan while writing *The Book of Tofu*. In August 1976 they founded Soyinfo Center (named Soyfoods Center until 2006) in California.

Books in Print: 100+ books on soyfoods and soybeans by Shurtleff and Aoyagi are presently in print. These include three popular books, market studies, and 70 comprehensive histories & bibliographies.

Book Sales: These books have presently sold more than 830,000 copies. Our best-selling book is *The Book of Tofu*.

SoyaScan Database: SoyaScan is the world's most comprehensive computerized database on soybeans and soyfoods. It presently contains 110,500+ records from 1100 B.C. to the present. These include four basic types of records providing detailed information on: 94,600+ published documents, 16,700+ commercial soy products, 6,300+ original interviews and overviews, and 8,400+ unpublished archival documents. These records are unique, and have been added one at a time over many years; none have been downloaded from other databases. A *Thesaurus* of our database is available.

Free Books on Google Books: At least 80+ of our history books and biographies are available free in digital PDF format on Google Books. The same books are also available on our website (see dropdown upper right).

Focus of SoyaScan Database: In descending order of importance: Soybean utilization (for both food and industrial uses), history, market statistics, processing, nutrition, technology, marketing, and soybean production (agriculture).

How to Use the SoyaScan Database: This database is very easy to use. You do not need a computer or any special skills. Simply call the Soyinfo Center and discuss the information you need with our specialists.

Website: At www.soyinfocenter.com you will find basic information about us, entire free online reference books, a photo gallery, 1,500 pages of our manuscript history of soybeans and soyfoods (free), a thesaurus to subject headings in our database, information on ordering of all our popular printed books, etc.

Research Library: The Soyinfo Center Library owns about 99,500 documents, almost all of which have a record in the SoyaScan database. Available for use by researchers with an appointment.

Consulting Services: William Shurtleff has been serving as a consultant to the soyfoods industry for more than 27 years. He probably has more personal contacts in this field, worldwide, than anyone else in the world. He has helped to start more than 450 new companies.

HISTORY OF THE HEALTH FOODS MOVEMENT WORLDWIDE (1875-2021)

1. Death and burial record for Anna Zentner, mother of Otto Carque of California health food fame. 1870. Germany
• ***Summary:*** "Name: Anna Zentner
"Sex: Female
"Age 31
"Death or Burial Place: Wiesloch, Baden, Deutschland
"Death or Burial Place (Original): Sankt Laurentius Wiesloch, Baden, Deutschland
"Death Date: 11 Jun 1870
"Birth Year (Estimated) 1839
"Spouse's Name: Ludwig Carque
"Certificate Number: 2." Source: Familysearch.org.
Note: Deepest thanks to Wayne Dawson, genealogist, Tucson, Arizona, for finding this record on Ancestry.com and sending it to Soyinfo Center. Address: Germany.

2. Birth record for Hermine Louise Carque. 1874. Mannheim, Germany. 1 p. [Ger]
• ***Summary:*** "Name: Hermine Louise Carqué.
Gender: Female.
"Birth date: 26 Dec. 1874.
"Birth place: Mannheim, Baden, Germany.
Name of mother: Elise Carqué, maiden name Bopp. Mother's place of residence: Mannheim
Given names: Hermine Louise
"Certificate number: 1989.
Source: Ancestry.com: Mannheim, Germany, Births, 1870-1900. Sent by Wayne Dawson, Genealogist, Tucson, Arizona.

3. Birth record for Ludwig Eduard Carque. 1877. Mannheim, Germany. 1 p. [Ger]
• ***Summary:*** "Name: Ludwig Eduard Carque.
Gender: Male.
"Birth date: 20 April 1877.
"Birth place: Mannheim, Germany.
Name of mother: Elise Carqué, maiden name Bopp. Mother's place of residence: Mannheim
Given names: Ludwig Eduard
"Father: Louis Carqué.
"Certificate number: 604.
Source: Ancestry.com: Mannheim, Germany, Births, 1870-1900. Sent by Wayne Dawson, Genealogist, Tucson, Arizona.
Note 1. This is the Louis Carqué who traveled by ship to the USA in 1892 with Otto Carque. He was Otto Carque's younger brother. Sorry this sorted out of chron. order.
Note 2. The LDS transcriber of this record said Ludwig's birthday was 13 April 1877, one week earlier than the birth certificate states.

4. Warshaw, Isadore. 1874. Warshaw collection of business Americana: Food category (Archival collection). Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC 20560. *
• ***Summary:*** Talk with David Haberstick at this Archives Center. 2006. May 22. This archives center has a large collection of food company catalogs, which are easy for any researcher to locate. They are part of the Isadore Warshaw Collection, in the "Food" category. They occupy 20 document boxes and are filed in alphabetical order by company name. Unfortunately, this archival collection has not yet been processed so there is no finding aid or index. Researchers there will check for up to 10 companies free of charge. Soyfoods Center asks for: (1) Balanced Foods, Inc. (New York and New Jersey). (2) Bragg, Paul (California). (3) Hauser, Gayelord (California). (4) Health Foods, Inc. (Des Plaines, Illinois). (5) Kahan & Lessin (Southern California). (6) Landstrom Co. (San Francisco). (7) Sherman Foods Inc. (Bronx, New York).
Letter from Marcia Rodwin, Volunteer Reference Asst., Archives Center, MRC 601. She found no mention of any of the 7 companies listed above in the Warshaw Collection of Business Americana or the Ayers Advertising Collection. Address: Washington, DC.

5. Health Food Company. 1875. Display ad: Granulated Wheat Biscuit. *New-York Tribune.* Sept. 22. p. 10.
• ***Summary:*** "Granulated Wheat Biscuit–Machine made from choice pounded grain; baked in soapstone ovens. Declared by *Hall's Journal of Health* 'the best food in the market.'
Note 1. This is the earliest English-language document seen (July 2021) that contains the term "Health Food" (or "Health Foods" or "Health-Food," regardless of capitalization or hyphenation).
Note 2. This is the earliest English-language document seen (July 2021) that contains the term "Health Food Company" (or "Health Food Co." or "Health-Food Company" or "Health Food Companies, regardless of capitalization or hyphenation).
Note 3. This is the earliest English-language document seen (July. 2021) that mentions the "Health Food Company" of New York, which would soon be best known as "The Health Foods Company of New York."

© Copyright Soyinfo Center 2021

Note 4. This is the earliest document seen (July 2021) that mentions a company that manufactures foods specifically designated as "health foods." This company is the earliest known manufacturer of health foods in the United States or the world.

Note 5. This is the earliest document seen (July 2021) that mentions a company with the words "Health Food" (or "Health Foods" or "Health-Food") in its name, or that mentions one or more "health food" products–whole-wheat biscuits. As of July 2021, this type of product is still widely sold in natural / health food stores. Address: 137 Eighth-st., near Broadway [New York City].

6. Health Food Company. 1875. Classified ad: Granulated Wheat Biscuit. Pomarius. *New York Times.* Oct. 31. p. 7.
• ***Summary:*** In the section of ads titled "Special notices:" "Granulated Wheat Biscuit–Machine made from choice pounded grain; baked in soapstone ovens. Declared by *Hall's Journal of Health* 'the best food in the market.'

"Pomarius–A rich jelly formed by the concentration of fruit juice. Contains no sugar or gelatine. Very grateful to delicate stomachs and delicious to all."

Note 1. Fruit juice concentrates with no cane sugar added are still widely sold in natural / health food stores.

Note 2. In her book *Health in the Household* (1886), Susanna W. Dodds, M.D., has a section titled "Pomarius" which states (p. 224): "'This is a very delicate jelly, formed from the expressed juice of tart apples, sound and ripe, with no admixture of sugar or gelatine. The fresh juice is filtered through a thick flannel cloth, and quickly evaporated, by gently heating it in porcelain pans to the consistency of a heavy jelly. From ten gallons of juice, one gallon of Pomarius is produced... This recipe is taken from Dr. Trall's 'Hygeian Home Cook-Book.'" Address: No. 137 8th St. [New York City].

7. Health Food Company (The). 1876. Choice new foods! (Ad). *New York Medical Eclectic* 3(2):Inside front cover. March 15.
• ***Summary:*** "Desire to call the attention of Physicians and the public to several New and Perfect Foods, they have prepared for invalids as well as for those who are in good health and desire to remain in that condition.

Cold-Blast Whole-Wheat Flour. Granulated Wheat. White Wheat Gluten. Attrition Pearled Wheat. Granulated Wheat Biscuit. Pomarius. Attrition Wafers.

"Besides the above we have nearly ready Granulated Oats, prepared, as all our cereals, without the use of Mill-Stones.

"Cereal Coffee, designed to supersede coffee and tea, for the use of those with whom these substances disagree, and who yet require a warm beverage. This Cereal Coffee contains all the nutritive matter of the grain, with an additional percentage of *Diastase*, which is developed by the processes of manufacture."

Note 1. This is the earliest English-language document seen (Feb. 2020) that contains the term "Cereal Coffee" (regardless of hyphenation or capitalization), which it uses to refer to a caffeine-free alternative to coffee. This cereal coffee is not yet sold commercially.

Note 2. This is the earliest article seen (July 2021) in an American periodical that mentions "Whole-Wheat Flour" (or "Whole Wheat Flour") regardless of capitalization.

Note 3. It is also the earliest advertisement seen (July 2021) by a store stating that it sells whole-wheat flour. Address: 137 East Eighth St. (between Broadway and Fourth Ave.), New York City.

8. *Hartford Daily Courant* (*Connecticut*). 1877. Agricultural matters: The farm–The garden–The household. Nov. 2. p. 1.
• ***Summary:*** "We must touch our hats to the Health Food Company of New York. It makes as many elegant cuts out of the carcass of a kernel of wheat, rye, or barley, as a fancy butcher can out of a carcass of beef, pork or mutton. Do send for their pamphlet circular, if for nothing more than to increase confidence in the nice cereals that you grow and cook at home. For my own part I do not like to accustom myself to tender-loin or sweet bread altogether..."

9. Schlickeysen, Gustav. 1877. Fruit and bread: A scientific diet. Translated from the German by M.L. Holbrook, M.D. Dansville, New York: Austin, Jackson & Co. vi + 227 p. Illust. Index. 19 cm. [16 ref]
• ***Summary:*** A very influential book about vegetarian [actually vegan] diets. The bibliography shows that the views of the author have been strongly influenced by the theory of evolution, and writers such as Charles Darwin, Thomas Huxley, Ernst Häckel, Carl Vogt, Leonhard Baltzer, Theodor Hahn, etc.

Translated from the German *Obst und Brod.* The translator, Martin Luther Holbrook, lived 1831-1902. In 1877 Holbrook lived in New York.

Contents: 1. The anthropological argument: The first principle: "The proper food of every individual is indicated by his physical organization." The two chief divisions are plant-eaters and flesh-eaters. Teeth and jaws, digestive tract, man's place in nature, man's past history on the globe, placental forms, dietetic conclusions (man's natural diet is that of the anthropoid apes), stages of embryonic life, man's highest culture, man's nature has not changed, scientific principles of diet, origin of flesh-eating by man, origin of agriculture, man is by nature frugivorous, personal experience.

2. The physiological argument: The saliva, the gastric juice, excretory products, nature's provision for man, order of maturity of fruits, necessity of variety in food, origin of cookery, value of foods, bulk [dietary fiber] necessary in food, the electrical vitality of food, essential qualities of

© Copyright Soyinfo Center 2021

food, injurious effects of cooking, salt and other condiments, milk, butter, cheese and eggs, honey and sugar, pastry, tea and coffee, intoxicating drinks, flesh foods, diseases caused by flesh-eating, quantity of food, the real nature of disease [elimination], good foods, nature's true beverage (water), fresh air at night, how to breathe, summary of dietetic laws.

3. The dietetic argument: Best season for change to a natural diet (warm season), advantages of fruit and bread diet, cost of this diet, emancipation of women, hints concerning eating, position in eating, sleep, adaptation to the fruit and bread diet, quantity of food, change of diet, unripe fruit, mastication (chewing well), hints on drinking, changes must be gradual, the excrement, evidence from photography, complete reform.

German and English works quoted by the author (bibliography). Appendixes. 1. A letter from Dr. James C. Jackson (of Dansville, New York; tells the story of his life and conversion to a natural diet). 2. A cure for intemperance: A paper read by Mr. Charles O. Groom Napier (F.G.S., Member of the Anthropological Institute) before the section on Physiology of the British Association in Bristol, England.

The section titled "Right culture of wheat" states in a footnote (p. 165): "A process of removing the outside cuticle from wheat without removing the gluten is now coming into use in this country, apparently improving the flour. The Health Food Company, of New York, has given especial attention to this subject.–Translator."

Words and terms used frequently in this book: flesh diet, frugivorous, natural diet, vegetable diet, vegetarian, vegetarians.

Illustrations: Teeth of the horse, gorilla, hare, wolf, shrew-mouse, swine, and man (front and side views). Eye-teeth (canine teeth of the upper jaw, natural size) of an old gorilla, young gorilla, man, and tiger. Stomach of a hyena, lion, sheep, and man. Ideal section of the following: non-deciduate placenta of the herbivora, zonary deciduate placenta of the carnivora, deciduate placenta of the frugivora.

Note: Schickleysen advocated a raw-food, diet that contained no animal products. As of 2008 this would be called a raw food vegan diet.

10. *Hartford Daily Courant* (*Connecticut*). 1878. Agricultural matters: The farm–The garden–The household. Jan. 4. p. 1.

• ***Summary:*** "We lack taste in the preparation of grains, as of other food. The Health Food Co. of New York, is run at present by fellows with a keen taste in cereal goods. Five dollars invested in samples of their merchandise would educate the family palate and judgement [judgment] at a very cheap rate. They do by the wholesale what the neatest and cleanest old farm stamp-mortar that ever was could only do by the retail. Our grocers and millers ought to see what that Health Food Company is doing to the end of bringing a knowledge of it home... I should like to pack my whole family down to New York to learn their art."

11. Trow's New York City directory. 1878. New York, NY. See p. 607. Vol. XCI. May 1.

• ***Summary:*** This is the 1877/1878 city directory for New York City, "For the year ending May 1, 1878." On page 607 we read: "Health Food Co., 74 Fourth av. sole manufacturers of white wheat glutens; provide foods for all disease; explanatory circulars mailed free to all."

Note: This is the earliest city directory seen (April 2007) that mentions the Health Food Co.–America's earliest known maker of foods specifically designated as "health foods." Address: New York, New York.

12. Hay, Mary Cecil. 1878. The Arundel motto. New York, NY: George Munro, Publisher. 383 p.

• ***Summary:*** An ad on an unnumbered page near the rear of the book (just after p. 383) states: "Abandon physic! Gluten Suppositories, cure constipation and piles. 50 cents by mail. Circulars free. Health Food Co., 4th Avenue and 10th St., N.Y."

Note: These were advertised as early as 1877 in the book *The Prince of Argolis*, by J. Moyr Smith (p. 139). "The use of Gluten Suppositories, made by the Health Food Co., 74 Fourth Avenue, New York, has relieved the constipated habit,..." Address: Author.

13. *Good Health* (*Battle Creek, Michigan*). 1879-1953. Serial/periodical. Battle Creek, Michigan. John Harvey Kellogg, editor and publisher.

• ***Summary:*** Continues: Health Reformer: 1(1867)-13(1878). Dr. Kellogg, a Seventh-day Adventist and head of the Battle Creek Sanitarium, was one of America's most prominent and respected doctors. This was his most important serial publication. On the title page of the Jan. 1879 edition is written: "Pure air, water, food. Health is wealth. A sound mind in a sound body. Proper clothing, ample exercise, adequate rest. A journal of hygiene devoted to physical, mental and moral culture. Cleanliness next to godliness. Temperance in all things." The magazine at this time is strongly opposes to the use of alcoholic beverages and tobacco. It supports vegetarianism, temperance, bread made from unbolted flour, and a healthful lifestyle. In 1879 there are many more articles about the dangers of alcohol and tobacco than about the benefits of a vegetarian diet, but by 1904 vegetarian articles predominated. In 1904 pneumonia was the most deadly disease in America. By the 1900s the cover of many issues stated that *Good Health* was established in 1866.

Richard Schwarz in his excellent book *John Harvey Kellogg, M.D.* writes of *Good Health:* By 1916 Dr. Kellogg estimated that more than 5 million copies of the magazine had been printed (p. 87). "Several years after he assumed the editorship of the *Health Reformer,* Dr. Kellogg decided that

© Copyright Soyinfo Center 2021

it needed a new name if the magazine and its teachings were to gain wider acceptance. He reasoned that public reaction to the word *reform* had changed. No longer did it call up visions of progress, advancement, and the substitution of truth for error. Rather, Kellogg felt, the average person associated reform with revolution, controversy, discord, and radicalism. A more positive name was essential. He decided to rechristen the periodical *Good Health* and make it into a journal which would tell its readers how to find and maintain their health. A year after the name change [it changed in Jan. 1879], the Battle Creek Sanitarium officially acquired *Good Health* from the Seventh-day Adventist Publishing Association. Thus what had begun as a Seventh-day Adventist publication remained under Dr. Kellogg's control even after his separation from the church. Within a few months after he began his program of rejuvenating *Good Health*, he had succeeded in increasing its circulation to 20,000 copies a month... apparently the subscription list never grew much beyond 25,000, and it probably stayed considerably below that number most of the time" (p. 90-92). *Good Health* was always plagued by chronic deficits. Eventually the American Medical Missionary Board contributed more than $100,000 to keep the Kellogg journal alive (p. 220). After Dr. Kellogg's death, the Race Betterment Foundation published *Good Health.*

Excellent sets of this periodical are owned by both the National Library of Medicine and the Loma Linda Univ. Library Heritage Room (Loma Linda, California). The magazine ceased publication in Aug. 1953.

Note: This is the earliest periodical seen (July 2021) that is part of the health foods movement or industry in the United States (after about 1890).

14. Fox & Co. 1879. We are agents for the Health Food Company of New York... (Ad). *Hartford Daily Courant* (*Connecticut*). March 21. p. 2.
• ***Summary:*** "... The sale of whose goods has rapidly increased since we first took hold of them, owing to their undoubted merit. To any one troubled with dyspepsia or weak stomach they are indispensable... Circulars furnished upon application."

Note: Fox & Co. is an early store that carries health food products. Address: 17 Central Row.

15. Williams (J.A.) & Co. 1879. Wholesale and retail grocers are selling;... (Ad). *Detroit Free Press.* Oct. 5. p. 1.
• ***Summary:*** "Tomato catsup, Per bottle, 10¢.

"We are agents for the Health Food Co.'s goods of New York.

"We sell all goods at wholesale... We deliver goods promptly."

Note: This is the earliest document seen (July 2021) that mentions a health food distributor. Address: 369 Woodward Ave. [Detroit, Michigan].

16. Flint, Austin. 1879. Clinical medicine: A systematic treatise on the diagnosis and treatment of diseases... Philadelphia: Henry C. Lea. xix + 17-795 p. See p. 462.
• ***Summary:*** The section on "Diabetes mellitus" states (p. 452): "A gluten flour is prepared especially for the use of diabetic patients by the New York Health Food Company, containing only a very small quantity of starch, and making a very palatable bread. It has been used in a number of cases under the author's observation, and has proved extremely satisfactory. This article seems to meet the great desideratum, namely, a bread allowable, and satisfying that craving which often becomes imperative under the use of bran flour prepared after Camplin's method. It is more nutritious than the latter, and differs from the French flour in the retention of the cellulose. Bread made of it is eaten with relish by persons in health."

Note: This is the earliest English-language document seen (July 2021) that contains the term "gluten flour." Address: M.D., Prof. of the Principles and Practice of Medicine in the Bellevue Hospital Medical College; Fellow of the New York Academy of Medicine;... New York.

17. Fox & Co. 1880. Fresh arrival of goods from the Deerfoot farm (Ad). *Hartford Daily Courant* (*Connecticut*). Jan. 14. p. 2.
• ***Summary:*** "We are sole agents in this city for the above, also for the goods produced by the Health Food Co. of New York, the sale of which is rapidly increasing. For dyspeptics these goods are without an equal. Information furnished and circulars given upon application."

Note: This ad also appeared in the Jan. 15, 16, 17, 19, 20, 21, 22, 23, 24, 26, 28, 30, 31, and Feb. 4 issues of this newspaper. Address: 17 Central Row.

18. Health Food Company. 1880. Gluten bread for the aged (Ad). *New York Times.* Feb. 4. p. 5.
• ***Summary:*** "For the Nervous, Universal Food." Address: 74 4th-av [New York City].

19. Health Food Company. 1880. Best breads for the best bred (Ad). *New York Times.* March 10. p. 5.
• ***Summary:*** "Try them. Circulars free."

Note: This ad also appeared in the March 12 (p. 5) and March 13 (p. 5) issues of this newspaper. Address: 74 4th-av [New York City].

20. Clark. 1880. Imports brain food, cereal coffee, &c... (Ad). *Scotsman* (*Edinburgh*). July 10. p. 5.
• ***Summary:*** "... from Health Food Co., New York." Address: 30 Greenside St. [Edinburgh].

21. *Scotsman* (*Edinburgh*). 1880. Specific articles for sale: Cereal coffee, brain food, granulated barley and rye (Ad).

© Copyright Soyinfo Center 2021

Aug. 11. p. 4.
• ***Summary:*** "To hand from Health Food Co., New York." Address: 30 Greenside St. [Edinburgh].

22. Fox & Co. 1881. Fox & Co. are agents for the Health Food Co. of New York... (Ad). *Hartford Daily Courant* (*Connecticut*). April 23. p. 2.
• ***Summary:*** "... and offer a full list of their preparations for invalids."

Note: This ad also appeared in the April 23, 26, 27, and 28 issues of this newspaper. Address: [17 Central Row].

23. *Good Health* (*Battle Creek, Michigan*). 1881. Publisher's page: The Sanitarium foods are meeting with much favor everywhere... 16(7):224. July.
• ***Summary:*** "... Those who have employed the various kinds of invalid food, are highly pleased with them. The praise which they have received from those who have given them a fair trial, is unstinted. We have no hesitation in recommending them to be exactly what they claim to be, which cannot be said of the various foods prepared by some firms, which make a business of supplying so-called 'health foods.' An examination of the article sold as gluten by a firm in New York, was recently made by an eminent Boston [Massachusetts] gentleman, with the result of showing that it was composed almost wholly of starch, and actually contains less gluten than some brands of wheat flour. The Sanitarium foods were first prepared for use at the sanitarium, in the treatment of the sick. The present great demand for them, has been occasioned by the success which has attended their use as invalid foods at the Sanitarium. The manufacturers guarantee their goods to be exactly as represented, and to give satisfaction." Address: Battle Creek, Michigan.

24. *Good Health* (*Battle Creek, Michigan*). 1881. Publisher's page: Invalids who have tried the "Sanitarium Foods" find they are indispensible... everywhere... 16(8):256. Aug.
• ***Summary:*** "... We have been sending out a large number of packages, and notice that when a sample package goes away we receive in a short time an order for a large supply. Our food products are unexcelled in quality, being prepared with the greatest nicety from a formula obtained by many pains-taking experiments. The Wheatena, Maizena, Avena, and Granula, are foods which will be universally used when their qualities have become sufficiently well known to give them a fair introduction. We would also call special attention to our 'Infant Food' as an article which is especially opportune at this season of the year."

Note: This is the earliest document seen (Sept. 2012) in the Seventh-day Adventist archives (www.adventistarchives.org) that contains the word "Granula." Address: Battle Creek, Michigan.

25. Health Food Company. 1881. Perfect bread and milk (Ad). *New York Times.* Sept. 1. p. 5.
• ***Summary:*** "Delivered daily at residences." Address: No. 74 4th-av., corner 10th-st [New York City].

26. *Canada Medical Record* (*The*) (*Montreal*). 1881. Treatment of diabetes mellitus (Letter to the editor). 9(12):297-98. Sept.
• ***Summary:*** Letter from an "American Practitioner." "Prof. [Austin] Flint, in a recent clinical lecture on this subject, said: 'The treatment is emphatically dietetic... For the past two years the patients that I have seen have been in the habit of using a bread which so far seems to be very satisfactory, but it is not entirely divested of starch. It is what is called gluten bread, prepared by the Health Food Company, corner of Tenth Street and Fourth Avenue, of this city [New York]. Analysis shows that it is not entirely divested of starch, but it is so prepared that it is not deprived of the agreeable qualities of ordinary bread. Last winter I brought a loaf of that bread before the class and distributed it. I like it to eat myself, finding it by no means disagreeable; and patients take this bread and it meets their wants, thus removing a great obstacle to the successful dietetic treatment of this disease.'"

Note: This may be a letter by The Health Food Company promoting its own product. However the statement attributed to Prof. Flint is probably what he said. See Flint (1979, p. 452).

27. *Good Health* (*Battle Creek, Michigan*). 1881. Publisher's page: The "Sanitarium Foods" are meeting with great sales... 16(8):256. Aug.
• ***Summary:*** "... The food department is a busy place now-a-days. To a visitor the many novel processes by which all kinds of grain products are converted into palatable, wholesome foods, and when necessary into dietetic remedies for disease, are an interesting study. The 'Infant Food,' prepared from the formula devised by Dr. Kellogg, is one of the most serviceable of all the numerous excellent preparations. Most of the various 'foods' for infants sold at the stores are really of little or no value, consisting as they do almost wholly of sugar or dextrine, a substance almost identical with sugar. These patent foods will not sustain life if eaten alone."

"Persons residing in Canada can obtain the Sanitarium Foods of Geo. Detweiler, Berlin, Ontario." Address: Battle Creek, Michigan.

28. Fox & Co. 1881. Classified ad: Farinaceous goods. *Hartford Daily Courant* (*Connecticut*). Dec. 13. p. 3.
• ***Summary:*** Includes: "Wheaten grits, Hecker's. Pearl wheat, Health Food Company. Pearl oats, Health Food Company... Wholesale and retail." Address: 17 Central Row.

29. De Puy, Henry Walter. 1881. History of Napoleon Bonaparte: Including lives of Napoleon the Great, of Louis

© Copyright Soyinfo Center 2021

Napoleon, and of the Prince Imperial. New York, NY: Hurst & Co. [v]-xii + [13]-459 p. See p. 461. 20 cm. *
• ***Summary:*** An ad (p. 461) states: "Send for all our Health Food Literature. Health Food Company. 4th Ave. & 10th St., adjoining Stewart's, New York."

30. Tyson, James. 1881. A treatise on Bright's disease and diabetes with especial reference to pathology and therapeutics. Philadelphia: Lindsay & Blakiston. xvi + 17-312 p. See p. 461. Illust.
• ***Summary:*** The section on "Diabetes mellitus" states (p. 281): "Perhaps the best substitute for ordinary wheat-flour is the gluten-flour. It was suggested in 1841 by Bouchardat, and is made by washing the ordinary wheat-flour to free it from starch."

Footnote: "The Health Food Company, of 74 Fourth Avenue, New York, make a gluten of this kind by first removing the five bran coats, pulverizing the cleaned berry by the 'cold-blast process,' stirring the powder into ice water, precipitating the gluten, cellulose, and mineral matters, siphoning off the water, holding in suspension the starch, and drying out the precipitate." Address: A.M., M.D., Prof. of General Pathology and Morbid Anatomy in the Univ. of Pennsylvania... Philadelphia.

31. Health Food Company. 1882. Food which nourishes (Ad). *New York Times.* Oct. 16. p. 9.
• ***Summary:*** In the section titled "Special notices: We claim to prepare the most nourishing bread-making flours in the market, and chemical analysis sustains our claim. Our pearled and granulated cereals are deemed perfect. We deliver The Best Bread daily from our wagons, comprising loaves from gluten flour, white wheat flour, whole wheat flour, barley flour, oat flour, and rye flour. We have supplied Pure Alderney Milk in bottles for the past seven years [i.e., since about 1875]. We ask attention to our descriptive pamphlets, which are mailed free." Address: No. 74 4th-av., corner 10th-st [New York City].

32. Sanitarium, Food Department. 1882. Sanitarium Foods (Ad). *Good Health* (*Battle Creek, Michigan*) 17(12):Unpaginated at end of volume.
• ***Summary:*** Describes products made by this company, directed by John Harvey Kellogg, including: Graham Crackers (No. 1 [with the best with granulated sugar plus butter], and No. 2 [unsweetened]). Plain Graham or dyspeptic crackers. Fruit crackers. Gluten wafers. Wheatena. Maizena [made from corn/maize]. Avena [made from oats]. Granola [combines all the qualities of Avena. "It is greatly superior to 'steam-cooked' preparations which are offered at a much higher price..."]. Beef and bread combination biscuit (Based on a "recent remarkable discovery by an eminent German professor..." Contains easily digested lean beef). Beef and bread granola. Diabetic food (probably made of wheat gluten). Gluten food (A "perfect substitute for animal food in cases in which the latter is thought to be indicated"). Infant's food.

Concerning Gluten wafers: "A person who suffers from acid or flatulent dyspepsia, or who is in a condition of nervous exhaustion, needing a restoration of nerve power as speedily as possible, will accept this article of food as a real godsend. Those who are obliged to live on a meat diet on account of their inability to digest vegetable food will find in these wafers a grateful substitute. We say this after using them in hundreds of cases successfully."

Products sell for 12 to 25 cents/pound. Note 1. Dr. Kellogg sold non-vegetarian products at this time. Note 2. This is the earliest original publication seen (Dec. 2013) for wheat gluten in the United States and the earliest document seen that mentions Seventh-day Adventist work with wheat gluten.

Note 3. This is the earliest document seen (Dec. 2013) that contains the word "Sanitarium" (spelled in that way), or mentions the Sanitarium (Battle Creek) as a maker and seller of foods. A related word, "Sanatorium," first used in 1839, refers to a "an establishment that provides therapy combined with a regimen (as of diet and exercise) for treatment or rehabilitation." This word was often used in connection with treatment of tuberculosis.

Note 4. This is the earliest document seen (June 2002) concerning vegetarian foods and diabetes.

Note 5. This is the earliest document seen (Aug. 2010) that mentions "Granola." Address: Battle Creek, Michigan.

33. Health Food Company. 1883. Dr. Newell, Des Moines, Iowa, writes:... (Ad). *New York Times.* Feb. 10. p. 5.
• ***Summary:*** "...'Health Food Company's Cereal Coffee is splendid, being palatable, nourishing, soothing.'"

34. Fox & Co. 1883. Classified ad: Food for invalids. *Hartford Daily Courant* (*Connecticut*). Aug. 21. p. 3.
• ***Summary:*** "Pomarius, Oat flour, Pea flour, Bean flour, Brain Food, Cereal Coffee, Crushed barley, Pearl oats, Pearl wheat, Pearl corn meal, Gluten wafers, Cold Blast Wafers, Attrition Wafers, Brain Food Wafers, Universal Food (cooked); Extract gluten and barley; Cold-Blast whole wheat flour.

"These foods are manufactured by the Health Food Co. of New York, by new processes, freed from all objectionable admixtures, and containing all those essential food constituents demanded for the relief of disorders of the Digestive, Nervous, Biliary, Urinary, and Circulatory Systems which are now so prevalent and fatal in this country, the natural results of excessive mental and physical labor, accompanied by an unpardonable ignorance or carelessness in reference to all Hygienic principles.

"Wholesale and retail grocers. Geo R. Clark. Jas. H. Parker."

© Copyright Soyinfo Center 2021

Note: This is the earliest document seen (March 2007) concerning a health food department in a major retail store. Address: 17 Central Row.

35. Lincoln, Mary Johnson. 1884. Mrs. Lincoln's Boston cook book: What to do and what not to do in cooking. Boston, Massachusetts: Roberts Brothers. xiv + 536 p. Illust. Index. 20 cm.

• ***Summary:*** Worcestershire sauce is used as an ingredient (often optional) in 8 recipes in this book: Mock turtle soup (p. 137-38). Fish chowder (p. 155-56). Remnants of cooked fish (p. 169-70). Scalloped oysters (p. 177). Devilled lobster (p. 183). Tartar sauce (Hot for broiled fish, p. 194). Veal cutlets (p. 240-41). Salamis of game (p. 270).

In the section titled "Explanation of terms used in cookery" is the earliest definition of soy [sauce] found in a U.S. cookbook (p. 506): "Soy. A Japanese sauce prepared from the seeds of *Dolichos Soja.* It has an agreeable flavor and a clear brown color. Used to color soups and sauces."

In the section on "Bread and bread making" we read (p. 42): "*Health-Food Flour.*–A still better method of converting wheat into flour, and one which is indorsed by leading scientists and physicians, has been recently introduced by the Health Food Company of New York. Only the choicest kinds of wheat are used. The outer husk is first removed by moistening the grain, and subjecting it to a gentle rubbing by what is termed the 'attrition process.' This softens the woody fibre of the outer bran, which is easily removed by sifting, but does not affect the hard gluten coats. The grains are dried, then pulverized into various grades by a compressed cold-air blast, which dashes the grains into atoms with tremendous force. This is called *whole-wheat flour,* the name indicating that the whole of the gluten, or nutritive part of the flour, is retained. It is not sifted like other flours, but pulverized into all the varieties of *crushed wheat, coarse granulated and fine granulated wheat;* each variety, even the finest flour, containing all that is valuable as food. Bread made with this flour has been found, after repeated trial, to be sweet and agreeable to the taste, light and spongy in texture, with none of the objectionable features of Graham bread, and answering fully all the demands of perfect nutrition.

"Cheap inferior Graham flour, made of poor flour mixed with bran, is worse than no food at all." "The Arlington, the Franklin, and some other brands of whole-wheat flour, are highly indorsed by those familiar with them."

Note: Perhaps the most influential cookbook published in America before 1900, and "one of the most innovative, original cookbooks of all time, and precursor and predecessor of the most-enduring American cookbook, Fannie Farmer's *Boston Cooking School Cook Book* (1896)." "One reviewer at the time wrote: 'It is the trimmest, best arranged, best illustrated, most intelligible, manual of cookery as a high art, and as an economic art, that has appeared.'" "Lincoln's methods, often referred to as 'scientific cookery,' required cooks to understand systematic measurements, nutrition, digestion, and the chemistry of cooking, as well as the basics of keeping an orderly kitchen and serving as a gracious hostess."

Mary Johnson Lincoln lived 1844-1921. In the late 1870s, when her husband suffered from failing health, she "worked as a domestic to maintain an income... It was at this time that the Woman's Education Association (WEA) of Boston decided to establish a cooking school–the Boston Cooking School–which would become the most famous of the first American cooking schools." Lincoln wrote that the determining influence in its organization "'was the return of Mrs. Sarah T. Hooper... who had seen the work at the South Kensington School on her way through London, and came home filled with enthusiasm to have similar work in Boston, especially for the benefit of the poor and those who would work out as cooks.' Hooper, an active member of the WEA, became the first president, and hired Joanna Sweeney and Maria Parloa to teach classes." Lincoln soon became a teacher as well (MSU biography). Address: Boston Cooking School, Boston, Massachusetts.

36. Death record for Hermine Luise Carque. 1885. Mannheim, Germany. 1 p. [Ger; eng]

• ***Summary:*** "Name: Hermine Luise Carque.
"Birth date: 1875 [sic, 26 Sept. 1874].
"Age: 10. Death date: 6 Dec. 1885.
"Death place: Mannheim, Mannheim, Germany.
"Certificate number: 1292." Source: Ancestry.com: Mannheim, Germany, Death Records, 1870-1950.

37. Henderson, Mary Foote (Mrs.). 1885. Diet for the sick: A treatise on the values of foods, their application to special conditions of health and disease, and on the best methods of their preparation. New York, NY: Harper & Brothers. ix + 234 p. See p. 25-30. Illust.

• ***Summary:*** In the section on tea (p. 4): "Several substitutes for coffee have been tried, such as chicory, roasted beans, pease, etc. Probably the best substitute is the cereal coffee prepared by the Health Food Company [of New York]. It is made of the entire barley grain and the gluten of wheat. It is of nutritive value, and has a pleasant flavor resembling coffee. One tires of it, however, after a short time."

The chapter titled "The new health-foods and other grain preparations" begins (p. 26-30): "The new methods of preparing cereals by the Health Food Company of New York have produced the most gratifying results. These foods are of inestimable value to the invalid. Indeed, they constitute a pleasant and wholesome diet for any one. Their use tends to preserve health, and preservation is far pleasanter than restoration." The author then lists the various products made by the Health Food Company, with a brief description of each: (1) The cold-blast whole wheat flour. Pearled wheat. Granulated wheat (coarse). Granulated wheat (fine)–"takes

© Copyright Soyinfo Center 2021

the place of Graham flour." White wheat gluten. Granulated barley (dissolves easily). Pearled oats. Granulated oats. "'Cereal coffee'–made of barley and wheat gluten parched. Crackers made of cold-blast flour, gluten, oats, granulated wheat, etc.

"The concentrated foods so industriously advertised are not recommended by the authorities. A certain amount of bulk is necessary, and the less nutritive portions of food perform a very necessary function in the process of digestion." Note the early emphasis on the importance of dietary fiber. Address: Author, St. Louis, Missouri.

38. Health Food Co. 1886. Dr. Jackson's Granula,... (Ad). *New York Times.* Sept. 25. p. 5.
• ***Summary:*** "... an admirable cooked food. Health Food Co., Agts. [Agents],"

Note: This ad also appeared in the Sept. 26 and Oct. 16 issues of this newspaper. Address: No. 74 4th-av., corner 10th-st [New York City].

39. Parloa, Maria. 1887. Miss Parloa's kitchen companion: A guide for all who would be good housekeepers. Boston, Massachusetts: Published by Estes and Lauriat, for The Clover Publishing Co. 966 + [10] p. Illust. 22 cm. 19th ed.
• ***Summary:*** The section on "Relishes" states (p. 91): "Soy is a sauce made in China and Japan, it is a thick reddish-brown liquid, and is used in many fish sauces."

In the section on "Cereals." the subsection titled "Graham" (p. 93-94) says: "Graham is one of the most uncertain of the bread materials with which we have to deal. A large part of it is made by mixing a poor quality of flour with coarse bran. In buying graham, select that containing a rather fine bran, which does not separate readily from the flour when shaken in the hand. The Health Food Company [of Battle Creek, Michigan] makes an excellent graham; and when there is any doubt as to the quality of the ordinary graham, it would be wise to purchase that sold by this company."

Note: This company was founded and run by Dr. John Harvey Kellogg. This is the earliest document seen (July 2021) concerning the pioneering work of Dr. J.H. Kellogg with health foods.

Under "Olive Oil" (p. 96): "Unless you have a good cool cellar, it will be best to buy oil in small quantities... oil loses its fine flavor if the bottle be opened often. Rae's Lucca oil is very reliable;..."

The chapter on "Soups" states (p. 109): Maigre soups are those made without meat, and are especially appropriate for fast days. Some of them are good enough for any season, and make a pleasant change from meat soups.

Under the recipe for "Pearled wheat mush" (p. 581): "The Health Food Company sells a nice quality of pearled wheat."

Under the recipe for "Granulated-wheat muffins" (p. 809): "Mix together in a sieve, and rub through it, three cupfuls of fine-granulated wheat meal, such as is made by the Health Food Company, four table-spoonfuls of sugar,..."

The recipe for "Green tomato soy," which is a type of homemade ketchup, does not call for "soy" [sauce] as an ingredient. It is followed by two recipes for "Tomato ketchup"–which also use no soy. Address: Founder of the original cooking-school in Boston; Principal of the School of Cookery in New York; and author.

40. Harrington, Charles. 1888. The value of so-called diabetic foods. *Boston Medical and Surgical Journal* 118:286-88. March 22. [1 ref]
• ***Summary:*** A paper presented before the Boston Society for Medical Improvement, Feb. 27, 1888. "It is, I believe, undisputed, that a most important point in the treatment of this disease, is the more or less complete elimination of sugar and starch from the diet, and it is a natural corollary that the ingestion of these substance, except in very small amounts, is often equivalent to the administration of a poison."

4. Gluten Flour (New York Health Food Co.) contains 66.18 % of starch (=73.53% sugar.) Its bread contains about 35% starch (= 38.5% sugar.)

5. Gluten wafers, plain, (same company) contains 66.96% of starch (=74.4% sugar.)

6. Gluten wafers, butter, (same company) contains 51.14% starch (= 56.82% sugar.)

7. Dr. Johnson's Educators contain 71.43% starch (=79.37% sugar.)

8. Boston Health Food Company's Diabetic Flour No. 1, contains 62.94% starch (=69.93% sugar.) Its bread would contain 30% starch (=33.33% sugar.)

9. Diabetic Flour, No. 2, (same company) contains 54.88% starch (= 60.98% sugar.) Its bread would contain about 23% starch (= 25.55% sugar.)

Note 1. This is the earliest document seen (July 2021) that mentions the Boston Health Food Company. It is not clear whether they are an independent manufacturer of health foods or (as the text above suggests) a branch of the New York Health Food Company, which did have a branch in Boston at this time.

Note 2. This periodical was continued by the *New England Journal of Medicine.* Address: M.D., Instructor in Hygiene and Asst. in Chemistry, Harvard Medical School.

41. *Brisbane Courier* (*Queensland, Australia*). 1888. Classified ad: Miscellaneous. April 27. p. 8.
• ***Summary:*** "Drink Caramel-Cereal! Elegant, fragrant, harmless, and perfect substitute for coffee. Sanitarium Health Food and Supply Agency, Matthewson's Photographic Lobby, Queen-street."

"Eat Nut Butter, delicious, germ-free, non-bilious preparation, a necessity where meat is prohibited. Sanitarium Health Food and Supply Agency, Matthewson's

© Copyright Soyinfo Center 2021

Photographic Lobby, Queen-street."

Note 1. These foods and beverages are probably made in Battle Creek, Michigan, USA, by a company associated with the Battle Creek Sanitarium, then imported to Australia by the Sanitarium Health Food and Supply Agency.

Note 2. This is the earliest document seen (Aug. 2019) that mentions a "Sanitarium Health Food" company in Australia. They do not yet manufacture health foods.

Note 3. This is the earliest document seen (Feb. 2020) that mentions "Caramel-Cereal" (regardless of hyphenation or capitalization) an early caffeine-free alternative to coffee.

Note 4. This is the earliest document seen that mentions "Nut Butter" (regardless of capitalization or hyphenation); however it is not clear what kind of nuts this "Nut Butter" is made from.

Note 5. This is the earliest document seen (July 2021) that mentions work with health foods in Australia or New Zealand.

42. *St. Louis Courier of Medicine.* 1888. Reports on progress: The value of so-called diabetic foods. 20(2):137-38. Aug. [1 ref]

• ***Summary:*** From Boston Medical and Surgical Journal, March 22, 1888, p. 286. "Dr. C. Harrington, of Boston, presents the results of his quantitative analysis of all the varieties of diabetic food that he could obtain, all of which claim to be substantially free from starch."

"4. Gluten Flour (New York Health Food Co.) contains 66.1 8 % of starch (=73.53% sugar.) Its bread contains about 35% starch (= 38.5% sugar.)

"5. Gluten wafers, plain, (same company) contains 66.96% of starch (=74.4% sugar.)

"6. Gluten wafers, butter, (same company) contains 51.14% starch (= 56.82% sugar.)

"7. Dr. Johnson's Educators contain 71.43% starch (=79.37% sugar.)

"8. Boston Health Food Company's Diabetic Flour No. 1, contains 62.94% starch (=69.93% sugar.) Its bread would contain 30% starch (=33.33% sugar.)

"9. Diabetic Flour, No. 2, (same company) contains 54.88% starch (= 60.98% sugar.) Its bread would contain about 23% starch (= 25.55% sugar.)"

43. Shaftesbury (Edmund). 1888. Display ad: "Personal Magnetism." *Washington Post.* Nov. 16. p. 5.

• ***Summary:*** "Edmund Shaftesbury's great work. Just published in book form. 'Every person should live for 200 years.' Circular mailed free. Address P.O. Box 291, Washington, DC."

Note: This is the earliest document seen (June 2021) that mentions Edmund Shaftesbury.

44. Clymer, J.F. 1888. Food and morals: A sermon... 6th ed., 110th thousand. New York, NY: Fowler & Wells. 34 + [19] p. See Appendix.

• ***Summary:*** This sermon was preached 8 years ago in Auburn on Sunday, June 20th, 1880. The Appendix (p. 30-34) is basically an "advertorial" for The Health Food Company of New York, and its products, by Rev. Clymer. He concludes (p. 33-34): "The Company's great work for the multitude, however, is in the preparation of wheat, oats, barley, rye, corn, peas beans, and other seeds. These are perfectly cleansed from all impurities, the outer bran-coats, husks, and pellicles are removed, and the interior, soluble, digestible food-portion is admirably prepared for ready cooking. Persons who have a distaste for Graham and crushed wheat, and oat-meal and other cereals, find in the Fine Granulated Wheat, the Coarse Granulated Wheat, the Pearled Wheat, Pearled Oats, Granulated Oats, Granulated Barley, Rye, Corn, etc., manufactured by this Company, delicious foods, which, once adopted, are continued from choice.

"I leave this important subject with my readers, again urging them to seek to learn more concerning it. To be placed in possession of information which I do not assume to be competent to impart, it is only necessary that you address a postal card to the Health Food Company, No. 74 Fourth Ave., cor. [corner] 10th street [next door to Stewart's], New York, N.Y., asking for all its Health Food literature, and appending your address, and you will be quite certain to receive the entertaining pamphlets by due course of mail. The agents of the company, also, cordially respond to calls for circulars and orders for the Health Foods."

There follow three unnumbered pages of advertisements by The Health Foods company, as follows: (1) A list (table) of the addresses of the company's agents in Brooklyn, New York (2 agents); Boston, Massachusetts; Philadelphia, Pennsylvania; St. Louis, Missouri; Germantown, Pennsylvania; New Haven, Connecticut; Hartford, Ct.; Utica, New York; Chicago, Illinois; Washington, DC; Elizabeth, New Jersey; Rochester, New York; San Francisco, California (2); Oakland, California; Baltimore, Maryland; Minneapolis, Minnesota; St. Paul, Minn.; and Edinburgh, Scotland.

(2) "An unsolicited letter from a prominent physician of New York," J. Montfort Schley, M.D., Prof. of Physical Diagnosis, Women's Medical College; Attending Physician at Hahnemann Hospital, &c.

(3) A two-page statement by the company (now in its 12th year of existence), praising its products and criticizing those of its competitors.

Note: It seems likely that the company paid all or part of the costs of publishing and disseminating this sermon in exchange for the publicity.

After that are 4 pages of advertisements of "Health Books" (works on hygiene, etc.) published by Fowler & Wells, including a full page of "Works on hygiene by R.T. Trall, M.D." Address: Rev., The First Methodist Episcopal Church at Auburn, New York.

45. Holbrook, Martin L. 1888. Eating for strength: or, Food and diet in their relation to health and work, together with several hundred recipes for wholesome foods and drinks. New York: M.L. Holbrook & Co. 236 p. No index. 20 cm.
• ***Summary:*** The author, a health reformer, advocates a vegetarian diet. Chapter 9, titled "Alimentary products of the vegetable kingdom," has a section on "Peas, beans and lentils" which states (p. 117): "The special characteristic of the bean, as compared with cereals, is a less amount of starch and a larger amount of nitrogenous matter. This renders it an excellent substitute for flesh meat. All experience goes to show that it is a more satisfying vegetable product for hard-working men than almost any other. In Catholic countries, especially France, where flesh food is less used, and where during Lent and on Fridays it is proscribed, leguminous products are more extensively used than elsewhere. They are much used by the vegetarians of India and China..."

"In Japan the bean is made into a curd [tofu], a most nutritious article of diet, and the nearest approach in its chemical constituents to animal food of any of the vegetable foods. A very full account of the mode of preparing and using it was published by the United States Government in the consular reports for 1886. This curd is used in soup, croquetts [croquettes] and a hundred other ways, and is said to be well liked. It might to our advantage be introduced into our country, and so might the soy bean generally used in Japan and China, which is richer in fat than our own beans are." A table (p. 118, based on Kinch 1880) gives the composition of the soy bean.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term "substitute for flesh" or the term "substitute for flesh meat" used to refer to a meat alternative.

Note 2. This is also earliest document seen (March 2001) concerning the etymology of meat alternatives.

The chapter on "Food in various diseases" recommends remedies for constipation (brown bread, fruit, and fresh vegetables), chronic rheumatism (a vegetarian diet), diabetes (gluten bread, "made now by many health food companies"), food for orphan asylums, prisons, etc. ("a rightly constituted vegetable diet," 'non-flesh' diet, or 'Vegetarian' dietary).

Note 3. This is the earliest English-language document seen (Sept. 2006) that contains the term "health food" (or "health-food" or "health foods"). Address: M.D., Prof. of Hygiene in the New York Medical College and Hospital for Women, Editor of the *Herald of Health*, etc.

46. White, Sallie Joy. 1888. Housekeepers and home-makers. Boston: Jordan, Marsh & Co. vii + 260 p. No index.
• ***Summary:*** The Preface states: The 26 chapters in this book have all appeared previously in *The Boston Herald.* The author gives special thanks "to my devoted teacher and friend, Mrs. Mary A. Lincoln, under whose training I learned so much that has been of inestimable value to me in my housekeeping experience."

In the chapter "About breads" (p. 10-22) we read (p. 19-20): "For those who like hygienic food, I will give here the rule for 'Dr. Trall's Perfect Bread.' Some of you may not know that Dr. Trall was, for a long time, the apostle of 'plain living;' and that although he did carry his notions to the extreme, as any early advocates of a movement are pretty sure to do, yet he did have a very good influence on the American people in regard to better and more careful preparation of food. This 'perfect bread' is nothing more nor less than the hard Graham rolls which are used by hygienists. It is perfectly healthful, and is highly relished by those who have become accustomed to it, whose appetites are healthful and natural, and who require or crave 'no spice but hunger.' It is made by simply mixing cold water, the colder the better, with good Graham or whole-wheat flour,..." Another recipe for a "fine Graham Bread follows (p. 20-21).

Chapter 4, titled "Cereals and health foods" (p. 28-45) indicates that many of America's early health food products and recipes were based on cereal grains, and special ways of processing them. "Health foods" are mentioned on pages 28, 31-32, 34-36. Products made by "The Health Food Company" of New York are highly praised and mentioned on pages 30 ("The best grain preparations are without much question those prepared by the Health Food Company"), 31 ("The Health Foods, as they have come to be understood, are the new methods of preparing cereals used by the Health Food Company of New York, and introduced by them"), 69 ("The whole wheat that is prepared by the Health Food Company of New York makes very nice gems..."), and 208 ("These [whole wheat crisps] are made from the fine granulated wheat flour that is prepared by the Health Food Company, and are at once healthful and palatable").

Whole-wheat flour is mentioned on pages 20, 31-32, 34, 41, 69, and 208.

In chapter 10, "Made-over dishes" [how to use leftovers] (p. 94-106) the author states that seasoning is the key to success. Worcestershire sauce is mentioned on pages 96-98, 101, and 103. Chapter 19 is titled "Pickles and catsups" (p. 179-99). Catsup is mentioned on pages 100 (walnut catsup), 103, 190, 194 (tomato catsup; "Lemon, oyster, and mushroom catsups are delicious:..."), 195 (mushroom catsup), 196 (grape catsup), and 197.

On pages 191-92 is a recipe for "Tomato soy" which (despite the name) uses no soy sauce or other soy ingredients, and which "is not unlike piccalilli" ("Green-tomato sauce").

47. Naturalization petition #2: Otto Carque. 1889. New York City, New York. 1 p.

51. Tyson, James. 1889. Diabetes mellitus. *Annual of the Universal Medical Sciences* 1:L1-L22.

• ***Summary:*** Page L-22 states: The New York Health Food Company makes gluten flour and gluten wafers; their composition is given.

"The Boston Health Food Company's diabetic flour No. 1, sold as absolutely non-starchy, contained 62.94 per cent. of starch, yielding of sugar 69.92 per cent.; moisture, 8.13 per cent. Bread made of it would contain of starch 30 per cent., equivalent to 33.30 per cent. of sugar. Diabetic flour No. 2 contained of starch 54.88 per cent., furnishing of sugar 68.98 per cent., moisture, 7.66 per cent. Bread made of it would contain about 23 per cent. of starch, equivalent to 25.55 per cent. of sugar. Flour of bran, sold as pure bran, devoid of starch, was found to contain a mere-trace of starch, and seemed to be finely washed bran." Address: M.D., Philadelphia [Pennsylvania].

52. *Boston Daily Globe.* 1890. Little city within doors: What one sees in the big Mechanics' Fair Building. Nov. 14. p. 4.

• ***Summary:*** In this bustling miniature city, there are many factories and machines under one roof. "There are soda fountains, lunch counters, a restaurant, free soup counters, a mince pie booth and health food counters."

53. Purdy, Charles W. 1890. Diabetes: its causes, symptoms,

© Copyright Soyinfo Center 2021

and treatment. Philadelphia and London: F.A. Davis. viii + 184 p. See p. 87. Index. Physicians' and students' ready reference series, No. 8. [2 soy ref]

• ***Summary:*** In Section VI, "Treatment of diabetes mellitus," the soya bean is mentioned (p. 87): *Soja*, or Japanese bean, owing to its high nutritive properties and its low percentage of starch, is likely to enter largely into the diabetic diet of the future. It has recently been much cultivated in some parts of Europe, especially in Hungary. Its composition is as follows: Nitrogen, 36.6 per cent.; fatty matter, 17 per cent.; starchy matter, 6.4 per cent.

"A sauce is made from *soja* which bears the name of *miso* and *soju* [shoyu]. A kind of cheese [tofu] is made from it, and very much prized in Japan as a table-luxury. (Footnote: See Egasse 1888, p. 433-38).

"In Europe the soja has already been utilized for food of men and animals, and recently the attempt has been made to make bread of it. This is very difficult because of the large proportion of oil which it contains. This oil is very purgative [sic], and hence it becomes necessary to rid the meal of it in order to render it fit for domestic usages. Lecerf in Paris and Bourdin in Rheims have succeeded in rendering the bread made from this meal very well supported by the stomach.

"This bean, which, as the analysis shows, is more nutritive than meat, serves for nourishment to a great country like Japan, under the forms of sauce, of cheese, of farina, and even of *real* artificial milk" (Footnote: Therapeutic Gazette, March 15, 1890, p. 150).

Note: This is the earliest English-language document seen (Aug. 2013) that uses the term "artificial milk" or "real artificial milk" to refer to soymilk.

Gluten is also mentioned several times (p. 84-85): "First in importance ranks the question of bread in the construction of any diabetic diet-list. The withdrawal of this article from the list is usually the most serious deprivation the patient has to encounter. In consequence of this fact, an almost endless number of breads have been placed upon the market, which are *claimed* to be free, or nearly free, from starch, and are hence named diabetic breads. Now, I do not hesitate to say that most breads which have been put upon the market with such claims are 'a snare and a delusion,' and have unquestionably shortened the lives of hundreds of diabetic patients. Most samples of so-called 'diabetic flour,' from which the starch is claimed to have been eliminated, 'or nearly so,' contain from 30 to 70 per cent. of that article... But Dr. Chas. Harrington, of Boston, has rendered us under perpetual obligations to him for fearlessly exposing the most of these deceptions, by publishing a careful analysis of most of them in detail. It may first be noted that his analysis of home-made bread gives the proportion of contained starch as 44.99 per cent. The Graham wafer, made of Graham flour, contains 58.45 per cent. of starch. The gluten flour, of Farwell & Rhines, of Watertown, N.Y., contains 67.17 per cent. of starch... The gluten flour of the New York Health Food Company contains 66.18 per cent. of starch. Bread made of this flour would contain 35 per cent. of starch... The Boston Health Food Company's diabetic flour, No. 1, sold as absolutely non-starchy, contains 62.94 per cent. of starch. Bread made of this flour would contain 30 per cent. of starch." Address: M.D., Queen's Univ. [Kingston, Ontario, Canada].

54. Bentley Historical Library, University of Michigan. 1891. Index to John Harvey Kellogg speeches and lectures (1891-1943) (Archival collection). Ann Arbor, Michigan. 10 p. Undated. 28 cm. [409 ref]

• ***Summary:*** This typewritten list gives the titles of the 409 speeches and lectures Dr. Kellogg (lived 1852-1943) presented from 1891 to 1943. They are listed alphabetically under each year. On average, he presented 8.2 per year, but in 1898 he presented 33, in 1901 he presented 22. His most oratorically productive decade was from 1900 to 1909, when he presented 148. Amazingly in 1940, at age 88, he presented 12 (including one titled "Soy Acidophilus"), in 1942 (at age 90) he presented 8, and in 1943 he presented 3.

Some interesting lecture titles: 1891–Nature's method of defending the body against disease. A twentieth century doctor.

1893–Relations of the muscles to religion. What is the medical profession?

1896–Religion of the body.

1897–Common errors in diet. Twenty years experience in the non-alcoholic treatment of diseases.

1898–How to get well quick. God's design in establishing Sanitariums. St. Helena Sanitarium [California].

1900–Dress reform talk. How nature fights diseases. What is the natural food of man? 1901–Exercise. Health food fakirs.

1903–Flesh food. 1905–How Christians should eat.

1906–How incurable are cured. The natural diet of man. 1907–The anti-toxic diet. How to live well one hundred years. Oatmeal. The scientific basis of vegetarianism.

1908–Constipation. 1909–Evils of civilization. The magical curative power of water. Sugar.

1910–The Battle Creek Idea. Is the human race degenerating? The physiological necessity of hard work. The possibilities of preventative medicine. Why flesh eating is wrong.

1911–Tendencies toward race degeneration. The beginning of the Battle Creek idea. Tobacco. Yogurt ferments in the treatment of intestinal disorders. 1913–Meat germs. 1914–Why laughing is an aid to digestion. 1916–The case against sugar.

1930–Soybeans as human food. 1932–The Eskimos not exclusive meat eaters. 1933–Orange juice versus flu. 1935–The aristocracy of health. Improved apparatus for irrigating and flushing the colon. 1937–Soy acidophilus milk. Special health value of the soybean. 1938–The case against meat

© Copyright Soyinfo Center 2021

eating. 1940–Soy acidophilus. 1942–Nature a false god. The new sugar. My search for health. 1943–Drink more water. Address: Michigan Historical Collections, Bentley Historical Library, Univ. of Michigan, Ann Arbor, Michigan 48109-2113. Phone: 313-764-3482.

55. Ralston, Everett [pseudonym of Webster Edgerly]. 1891. The Ralston brain regime: Presenting a course of conduct, exercises and study, designed to develop perfect health in the physical brain, strengthen the mind, and increase the power of thought. A book of practice more than theory. Washington, DC: The Martyn College Press. 137 p.

• ***Summary:*** Chapter 8, titled "The Best Brain Foods," states (p. 40-42) that cold fat (such as thoroughly heated butter or the fat of cold meats) is the finest brain food. "Fresh salmon stands among the very first of the brain foods. Lean meat, and meat not well cooked is an injury rather than a benefit to the health of the brain. No child under ten years of age should be permitted to taste lean meat. The feeding of meat to children in their infancy, often results in convulsions and death, and a tendency to fits."

"There are certain vices, including intemperance and morbid appetites, that are a curse upon the name of man, that have been completely cured by a resort to an entirely vegetable diet. We have in mind several persons who have been slaves to desires, over which they seem to have no control, and habits that are beastly, who struggled in vain, to throw off the fetters, and who never succeeded until they discarded the use of meat. Probably the noblest animal that treads the earth is the horse, being the strongest and swiftest, having the finest brain; and yet meat forms no part of his diet. We do not make these remarks for the purpose of advising people to discard the use of meat, but we simply say that when used it should be thoroughly cooked, should never be given to a person under ten years, and if possible not until the age of twenty. The best brain food is oxygen."

Page 122: "No one person to day has so many followers as Everett Ralston. He advocated, a few years ago, the perfect health of the body, and demonstrated that it was possible to live for two hundred years. His whole theory was fully explained in a book, entitled 'The Two Hundred Year Club;' which, though its title seemed extravagant, contained the method whereby the body could be made perfect in health; diseases could be cured by natural treatment; and a sound body could be maintained for a long term of years beyond the ordinary duration of human life; and all this without cost, or medicine."

"We invite your attention to the Ralston Health Club, (sometimes called the Two Hundred Year Club), as a book containing the secret of natural restoration of health by natural treatment. Although this book costs a dollar (and is worth many thousands), we propose to give you an opportunity of procuring it free, and at the same time, proving your interest in a general reform movement, by aiding in extending the influence of the Ralston doctrines of perfect health." Address: Author of "The Ralston Health Club".

56. Ralston, Everett [pseudonym of Webster Edgerly]. 1891. The Ralston health club. 3rd ed. Washington, DC: Martyn College Press. 96 p. 24 cm. *

57. Battle Creek Bakery Co. 1892. Health foods (Ad). *Food, Home and Garden* (*Philadelphia*) 4(37):Inside front cover. Jan.

• ***Summary:*** A half page ad. "Pure crackers and biscuits manufactured." This bakery company was "Established in 1881. "We manufacture a choice line of these goods, entirely free from lard and all adulterations at the following prices:..." Products include: Fruit biscuits (white flour or whole wheat flour). Graham biscuits (sweetened). Graham crackers (sweetened or unsweetened). Whole wheat crackers, Gluten crackers, Carbon crackers (leavened or unleavened). Cereola, a prepared grain food in bulk. Pure gluten, or Wheat gluten (in packages). Cereal coffee, prepared from grains only, a very choice and healthful drink. Many of these products are also sold in 13 lb or 30 lb boxes.

At the end of the ad, we read: "References. To whom it may concern. We the undersigned residents of Battle Creek, Michigan, take pleasure in stating that Mr. Joseph Smith, manager of the Health Food Department of the Battle Creek Bakery Co., has resided in Battle Creek for nearly 20 years, and is a competent and responsible man, and of long experience in this line of business, and one whose goods we can heartily recommend to the public." There follow 11 names, each with a title. The latter include two ex-mayors, three physicians (M.D.s), the postmaster, the vice-president of the city bank, and the editor of the *Review and Herald* magazine.

Note 1. This is the earliest English-language document seen (Sept. 2006) with the term "health foods" (or "health-foods" or "health food") in the title.

Note 2. This is the earliest document seen (Sept. 2006) that mentions "Cereal Coffee," the earliest known commercial alternative to coffee, made in Battle Creek. Address: Battle Creek, Michigan.

58. Mannheim, Germany, family register: Otto Carque. 1892. April 8.

• ***Summary:*** "Name: Otto Carque

"Relation to head of household: Head.

"Birth date: 11 July 1866

"Birth place: Wiesloch

"Residence date [date this information was gathered]: 8 April 1892

"Residence: Mannheim, Baden-Wuerttemberg [Germany]

59. *Chicago Daily Tribune.* 1892. Third Congressional District: List of delegates to the district convention chosen. April 29. p. 2.
• ***Summary:*** "Thirteenth Ward–First District, Otto Carqueville, Andrew Parks,..."

Note: Otto Carque, the health food pioneer in Los Angeles [California], lived in Chicago at about this time. His native language was German. In later life he said that in 1893 he returned to America from Germany to see the World's Fair (Chicago Columbia Exposition / World Columbian Exposition) in Chicago, Illinois. After that he lived in New York for a few years. In 1904 he wrote two important books, *The Foundation of All Reform,* and *The Regeneration of Man,* both of which were published that year in Chicago by Kosmos Publishing Co. It is not clear whether or not the Carque who was chosen to be a delegate to the district political convention (cited above) and the Los Angeles health food pioneer are one and the same person.

60. *Chicago Daily Tribune.* 1892. Calm after riot... Speeches conservative, incendiarism being condemned. For a socialist party. Leaders plead for determined action at the polls. Aug. 28. p. 1.
• ***Summary:*** "Otto Carque made a speech in German and M. Britzrus followed in a harangue in English."

61. Passengers arriving at the Ellis Island, Port of New York. 1892. 1 p.
• ***Summary:*** This ship, carrying Otto Carque, arrived on 19 Nov. 1892 at Ellis Island The name of the ship is the S.S. Belgenland. There are two classes: Saloon and 2nd Cabin.

In 2nd Cabin, passengers #15 is Mr. Otto Carqué. Age 24. Sex: Male. Calling or occupation: Wine Merchant. The country of which they are citizens: U.S.A. Native country: Germany. Last residence: Mannheim. Intended destination, state or territory: Chicago, Illinois. Transient, in transit or intending protracted sojurn: ?. No. of pieces of baggage: 4.

Right below Otto Carqué, passenger #16 is Mr. Louis Carqué. Age 24. He may well be the younger brother of Otto since his answer to every question is exactly the same as Otto's. He is a Wine Merchant. Citizen of USA [probably not true]. Native country: Germany. Last residence: Mannheim. Chicago, Illinois, etc. However he has no baggage.

Note 1. This is Otto Carque's 2nd arrival in the USA. His first was on 13 April 1889, also in New York Harbor. He is not yet a citizen of the USA; in fact he didn't apply for citizenship until 10 July 1896.

62. Shaftesbury, Edmund [pseudonym of Webster Edgerly]. 1892. Lessons in the art of extemporaneous speaking, in book form: Containing full instruction and practical lessons... Washington, DC: Martyn College Press. 170 p. 22 cm. *
• ***Summary:*** Note: His full name may have been Albert Webster Edgerly. Apparently no biography of him has never been written. This is the same man who wrote books on "The cultivation of personal magnetism" [charisma] and who founded The Ralston Health Club.

As a young lawyer he seems to have lived in Lynn, Massachusetts. In 1881 he was apparently embroiled in a rather famous infidelity suit against his first wife, which was the subject of articles in the Boston Globe–and of much gossip. This may have prompted him to publish most of his subsequent books under pseudonyms–Edmund Shaftesbury or Everett Ralston. Edmund Shaftesbury lived 1852-1926. In 1891 or 1892 he married again–to a former student. He seems to have been a teacher of elocution at Martyn College of Elocution and Oratory in Washington, DC. Martyn College Press published many of his books.

63. Battle Creek Sanitarium. 1893. Sanitarium health foods. Battle Creek, Michigan. 32 p. Illust. 21 cm.
• ***Summary:*** The foods in this catalog are manufactured by the Sanitarium Health Food Co., Battle Creek, Michigan. An illustration on the front cover shows two views of a large building, probably the one housing that company. Contents: Introduction: Wheat flour, the modern miller, the ancient miller. The question of food. Granola. Wheat Granola. Avenola. Gluten. Water biscuit. Whole wheat wafers. Rye wafers. Zwieback. Gofio. Wheat-germ grits. Whole-wheat flour. No. 1 Graham crackers. No. 2. Graham crackers. Plain Graham crackers or dyspeptic crackers. Oatmeal biscuit. Medium oatmeal crackers. Plain oatmeal crackers. White crackers. Fruit crackers. Carbon wafers. Infant food: What an infant needs, twenty per cent of gluten, for nursing mothers. Wheat charcoal. Recipes: Granola, Wheat Granola, pure Gluten Meal, nos. 2 and 3 Gluten Meal. Testimonials.

"The growing demands of the great army of dyspeptics in this and other civilized countries, and the remarkable advances recently made in the science of dietetics, have given rise to the term 'Health Foods.' There is a general recognition of the fact that some foods are less wholesome than others."

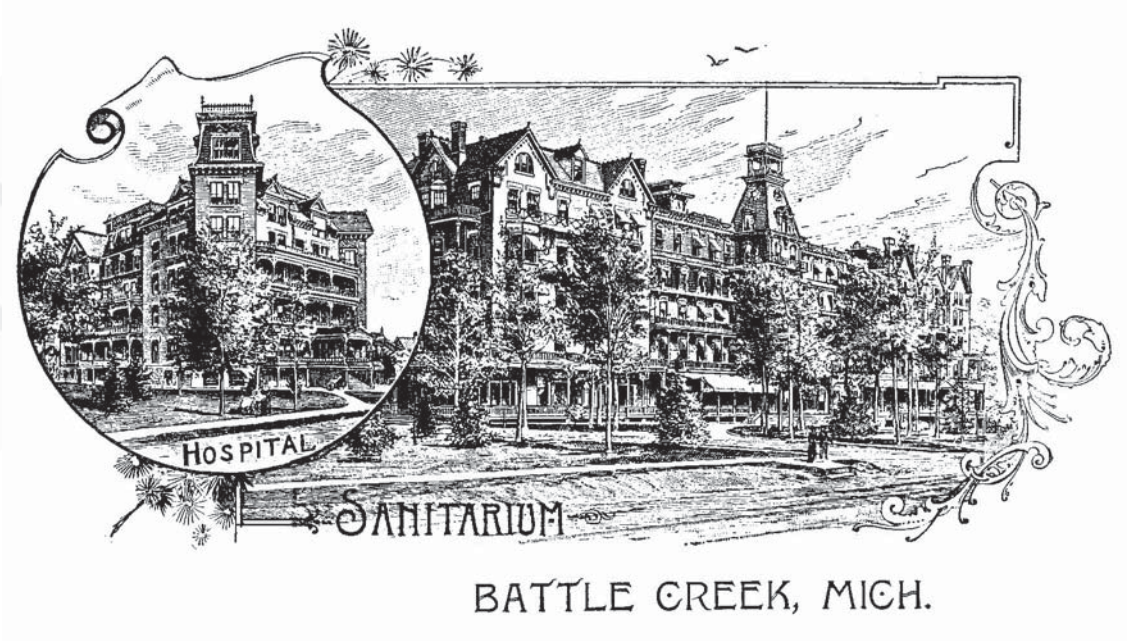
The testimonials (p. 28-31), written from Jan. 1890 to March 1893, to the Sanitarium Foods Co. (Battle Creek, Michigan), by both merchants and individuals, praise foods made by the company. The first and earliest, dated 18 Jan. 1890 and written from Williamsport, Pennsylvania, is of interest because it mentions the term "Health Foods." It reads: "Gentlemen:–Eighteen months ago I was a complete wreck from nervous dyspepsia. My case was considered beyond the reach of the remedies usually prescribed by

© Copyright Soyinfo Center 2021

physicians for this malady. I was induced to throw medicine to the dogs, and try diet and exercise. I inquired into the merits of the various 'Health Foods.' Among others I tried your Granola, and it affords me much pleasure to say that I regard it as a valuable, nutritious, and palatable food. I use it twice every day, and would not be without it. I have lived principally on the foods prepared by your company for many months, and have made great gain in health and strength, but more especially in weight; as one year ago I weighed 130 pounds, now I tip the beam at 172 pounds.

"Wishing you continued success in your grand work, I am, Very respectfully, W.H. Miller, Principal Washington Building School." Address: Battle Creek, Michigan.

64. Fairbank (N.K.) & Co. 1893. Display ad: A new health food... *San Francisco Chronicle.* June 22. p. 7.
• ***Summary:*** "... has made its appearance. It is not only a health food but a healthy foods–a health food that makes other food healthy. Its name is Cottolene.



"It takes the place of hog's Lard which is a notoriously unhealthy food. A purely vegetable product–delicate, digestible, and economical–one trial gives Cottolene a permanent home in every kitchen, where it increases the health and enjoyment of every member of the family. Try it for yourself. At all grocers.

"Refuse all substitutes."

Note: This ad also appeared in the 3 March 1894 (p. 6) and 3 May 1894 (p. 6) issues of this newspaper. Address: St. Louis [Missouri] and Chicago, New York, Boston.

65. Ghirardelli Chocolate Co. 1893. Display ad: Beauty food–Health food. *San Francisco Chronicle.* Oct. 30. p. 10.
• ***Summary:*** "Health is the basis of all beauty... Chocolate is health food. It is liquid nourishment. It makes flesh and blood and health and beauty–if it is pure and fresh. Ghirardelli's Ground Chocolate is absolutely pure and free from drugs and must be fresher than any other for it is made right here, not thousands of miles away."

Note: This ad also appeared in Nov. 6 (p. 10) issue of this newspaper. Address: [San Francisco, California].

66. Kellogg, Ella Ervilla Eaton. 1893. Science in the kitchen: A scientific treatise on food substances and their dietetic properties, together with a practical explanation of the principles of healthful cookery, and a large number of original, palatable, and wholesome recipes. Chicago, Illinois: Modern Medicine Publishing Co. 581 p. Plus 36 leaves of plates. Illust. Index. 23 cm.
• ***Summary:*** This 1893 edition is very similar to the 1892 edition. All the pages up to about p. 440 are identical, but somewhere after that 8 pages have been added. Pages 551-58 are blank except for "New recipes" and the page number printed at the top of each page. There are also 14 blank pages after the last numbered page.

Facing the title page is an illustration of the hospital and sanitarium at Battle Creek.

Note: An ad in the Sanitarium health foods booklet (1893, inside back cover) states: "The new hygienic cook book. Thoroughly scientific; entirely practical. Over 800 carefully tested recipes. Bright and entertaining in style, concise, the result of Ten Years of patient research and experimentation in the Experimental Kitchen connected with the Sanitarium at Battle Creek, Michigan. Ought to be in every family." Address: A.M., Superintendent of the Sanitarium School of Cookery and the Bay View Assembly School of Cookery, Battle Creek, Michigan, and of the Bay View Assembly School of Cookery, and Chairman of the World's Fair Committee on Food Supplies, for Michigan.

67. *Washington Post.* 1894. Last days of the food show. Nov. 28. p. 8.
• ***Summary:*** Miss Johnson's lecture on children's food drew a large audience. She mentioned "whole wheat bread" twice,

© Copyright Soyinfo Center 2021

used it to make date sandwiches, and provided a recipe for making it at home.

Note: This is the earliest article seen (April 2004) in a major American newspaper that mentions "whole wheat bread" (or "whole-wheat bread").

68. Sanitarium Health Food Co. 1894. Health foods (Ad). *Good Health* (*Battle Creek, Michigan*) 29(11):Inside back cover. Nov.
• ***Summary:*** The words "Health Foods" are written in huge bold letters across the top of this half-page ad. "In the efforts to meet the needs of a large Sanitarium, with a large variety of patients, we have produced a number of food preparations adapted to the different diseased conditions, the merits of which are such as to secure for them a very large and increasing sale, not only to persons belonging to the invalid class, but to those who wish by 'good living' to avoid disease. The following are the leading preparations:

"Oatmeal biscuit, Medium Oatmeal Crackers, Plain Oatmeal Crackers, No. 1 Graham Crackers, No. 2 Graham Crackers, Plain Graham Crackers, Dyspeptic, Water Cracker, White Crackers, Whole-Wheat Wafers, Gluten Wafers, Rye Wafers, Fruit Crackers, Carbon Crackers, Wheat Granola (bulk 10), Avenola (bulk 10), Gluten Food No. 1, Gluten Food No. 2, Gluten Food No. 3, Infant's Food." Address: Battle Creek, Michigan.

69. Hale, Edwin M. 1894. The practice of medicine. 2nd ed. Chicago: Gross and Delbridge. xv + 1033 p. 25 cm.
• ***Summary:*** This is a book about the practice of homeopathy. The section on "Diabetes mellitus" (p. 174+), under "Dietetic treatment" states (p. 182): According to the analyses of Dr. Ch. Harrington, the percentages of starch is as follows: "; the gluten flour of the New York Health Food Company, 66.18; bread made from this flour would contain 85; the gluten wafers of this company 66.96; the Boston Health Food Company's gluten flour, about the same per cent."

Page 420: All cereal grains and leguminous seeds can be prepared, divested of their indigestible envelope [hulls, but not their bran layer], and are much more palatable and nutritious. The various 'Health-Food Companies' are doing good work in introducing" such foods for those suffering from constipation.

For cerebral-spinal meningitis, the diet during convalescence should be very nourishing, including "the farinaceous and glutenous foods prepared by the Health Food Company of New York."

Note: Edwin Moses Hale lived 1829-1899. Address: M.D., author.

71. Newton, Robertson & Co. 1895. Classified ad: Colonial Health Food. *Hartford Courant* (*Connecticut*). Jan. 18. p. 12, col. 4-5.
• ***Summary:*** Classified under "Family supplies." "The new cereal made from celebrated Australian white wheat, unsurpassed for a breakfast dish, and excellent for gems, muffins, griddle cakes and for frying.

"Colonial Food is Purely Hygienic, and is endorsed by leading physicians. For children and persons of sedentary habits it is invaluable.

"A great nerve, brain and muscle food. Have a package included in your order this morning."

72. Certificate of birth for Paul Chappius Bragg. 1895. Ripley County, Indiana. 1 p. Feb. 6.
• ***Summary:*** Name: Paul Chappius Bragg. No. child of this mother: 2. Sex: Male. Color: White. Date of birth: Feb. 6, 1895. Place of birth: Ripley county. Born alive: Yes. Legitimate: Yes. Natural labor: Yes. Difficult labor: No. Mother's maiden name: Carrie J. Chappius. Mother's age: 29. Father's name: Robert E. Bragg. Father's age: 29. Father's occupation: Printer. Father's place of birth: US. By whom return is made: J.R. Davies. Post office address: Batesville.

Note 1. Paul C. Bragg repeatedly reported on government forms that he was born in Batesville, Indiana–which is in Ripley County.

Note 2. The birth was announced in the *Batesville Tribune*, Feb. 14, 1895, p. 1, under the local news heading which reads, "R.E. Bragg and wife on Wednesday night, February 6th, a boy." Although Indiana didn't issue birth certificates until 1907, a librarian at the Batesville Public Library got interested in the question of Paul Bragg's birth date and found a microfilm tape (its existence unknown to her previously) of an old handwritten ledger of babies born in Ripley County, Indiana, in 1894 and 1895, showing Paul Bragg's birth on 6 Feb. 1895.

Concerning Paul C. Bragg's grandparents, the Wikipedia webpage for Paul Bragg states (17 Aug. 2007, without citing any sources): "Paul Bragg's paternal grandparents, James H. & Amanda Bragg, can be traced back into Indiana history at least through 1840, while his maternal grandparents, John and Margaret Chappius, were later arrivals to Indiana, having been born in Switzerland & Ohio, respectively. James H. Bragg's occupation was a 'miller', while John Chappius was a 'stonecutter.'" It also states Paul's youngest brother, John H. Bragg, was born in Washington, DC, on 8 April 1899. Apparently, Paul Bragg's mother, Caroline ("Carrie"), had a previous marriage; Paul and his two brothers may have had an older half-sibling from that marriage, though perhaps not living with the family during their Washington, DC years.

Note: This is the earliest document seen (July 2021) concerning Paul Chappius Bragg of health fame. Address: Ripley County, Indiana.

© Copyright Soyinfo Center 2021

73. *Batesville Tribune* (*Indiana*). 1895. Born–R.E. Bragg and wife on Wednesday night, February 6th, a boy. Feb. 14. p. 1, col. 2.
• ***Summary:*** Announces the birth of Paul Chappius Bragg in Feb. 1895 in Indiana. Note 1. His father was Robert E. Bragg and his mother was Carrie Chappius.

Note 2. This is the 2nd earliest document seen (July 2021) that clearly gives Paul Bragg's birthday–and thereby removes any controversy concerning that date–or that mentions Paul C. Bragg or his parents. In his middle and later life, Paul Bragg always claimed that he had been born in 1881; this made seem that he was about 14 years older than he really was.

Note 2. According to the Batesville librarian, Paul's father was a printer at that newspaper (Batesville Tribune), probably immediately prior to his federal job as a printer in Washington, DC. So he may have used his position as printer to announce the birth of his son–on the front page!

74. Newberry's. 1895. Newberry's. Watch this space. Time will prove which house is "headquarters" for groceries (Ad). *Los Angeles Times.* April 6. p. 7.
• ***Summary:*** "Flour: Easter gluten flour, per pound–10 cents. Whole wheat flour, per 10-pound sack–30 cents [3 cents/lb]. Advent flour, per 10-pound sack–30 cents [3 cents/lb].

Note: This is the earliest document seen (March 2007) concerning a health food department in a major retail store in Los Angeles or California. Address: 216 and 218 South Spring Street [Los Angeles, California].

75. Postum Cereal Company, Ltd. 1895. The new wave: Physical culture, health foods and drinks mark a new era (Advertorial). *Chicago Daily Tribune.* May 5. p. 12.
• ***Summary:*** Note: This is an advertorial for Postum Cereal, a substitute for coffee.

"A great popular health-drink and health-food wave is just now passing over the country, and it seems to have come to stay. More attention is being given to articles of food and drink than heretofore, and people are slowly learning that good health cannot be preserved under the present civilization unless the habits are of a more natural character. The apparently harmless coffee habit now numbers its victims by the thousands, producing obstinate stomach and bowel troubles that will not abate except by leaving off the habit. It is not always an easy task to drop a lifelong habit.

"One of the latest discoveries in new health drinks is a substitute for coffee, made entirely of grains and possessing great fattening and nourishing properties, while it brews the exact deep seal brown color of Mocha, and when cream is added it takes the rich golden of Java."

"It bears the name of 'Postum Cereal.'" "It claims to be a direct and quick producer of new blood corpuscles by the natural method of good nourishing food taken in liquid form. It is quite a bit less expensive than coffee and altogether its use appeals to one's common sense." A list of places in the area of Chicago, Illinois, where Postum Cereal can be purchased is given. "Fifty-cup package postpaid for 25 cents." Address: Battle Creek, Michigan.

76. *Los Angeles Times.* 1895. Ralston Health Club. May 9. p. 8.
• ***Summary:*** "The local Ralston Health Club held another meeting last night, at which the merits of distilled water and 'glame' were freely discussed. The membership of the club is steadily increasing and each meeting is becoming more interesting. Physical culture will soon be made one of the prominent features of the club, the object being to bring under discussion and under practice all questions bearing on perfect health or on the improvement of health that may be imperfect."

77. Newberry's. 1895. Just in: Ralston / Health Foods (Ad). *Los Angeles Times.* May 18. p. 7.
• ***Summary:*** Caramel Coffee, Gluten Biscuits, Whole Wheat Wafers, Gofio Wheat Maize, Ralston Graham Flour, Zwieback, Carbon Crackers, Wheat Granola, Ralston Bran."

Note: This ad is confusing, but one of 25 July 1895 will help to clarify it a little. Are all these foods made by Ralston? Several of them (Gluten Biscuits, Zwieback) have names similar to products made by Dr. John Harvey Kellogg's Sanitarium Food Company in Battle Creek, Michigan. Moreover, according to *The Ralston Chronicle: 1894-1994*, a centennial history of the Ralston Purina Co., William H. Danforth (of the Robinson-Danforth Commission Company, St. Louis, Missouri) "enters the human foods market in 1898 with *Purina Wheat* and a line of whole-wheat breakfast cereals. Danforth's fascination with fitness and health inspires the endorsement of 'Dr. Ralston,' a health guru with 800,000 followers. An undated poster (probably from about 1902) titled "Ralston Purina Foods: Absolutely pure" (with a red and black checkerboard square background) shows that the company now makes: Ralston Breakfast Food, Ralston Cereal Coffee, Purina Whole Wheat Flour for Bran Bread, Purina Pancake Flour, Ralston Hominy Grits [made from corn], Ralston Kornkins (corn meal), Ralston Oats, and Ralston Barley Food. Address: 216-218 S. Spring Street [Los Angeles, California].

78. Kellogg, John Harvey. 1895. Milk as a food unsuited for the diet of adults: Editorial. *Modern Medicine and Bacteriological Review* (*Battle Creek, Michigan*) 4(5):121-22. May.
• ***Summary:*** "The popular idea that milk is one of the most wholesome and nutritious articles of food for use at all periods of life, is by many facts shown to be an error. Cow's milk is admirably adapted for digestion in the stomach of a calf."

© Copyright Soyinfo Center 2021

"Kumyzoon is a scientific preparation of milk in which the lactose is replaced by lactic acid... Kumyzoon is manufactured by the Sanitarium Health Food Co., Battle Creek, Michigan, and 28 College Place, Chicago, Illinois. This company is manufacturing kumyzoon according to the formula furnished by the writer, and has it made under the writer's care at the Battle Creek Sanitarium."

Note: This is the earliest document seen (July 2013) that discusses problems with cow's milk as a food for adult humans. Address: M.D., Battle Creek, Michigan.

79. *Good Health* (*Battle Creek, Michigan*). 1895. Publisher's department: Chicago, Illinois, April 23, 1895 (Letter to the editor). 30(6):Unnumbered page near end of issue. June.
• ***Summary:*** This letter is addressed to "Sanitarium Health Food Co., Battle Creek, Michigan."

"Accept our thanks for the package of your new food preparation known as 'Granose.'"

Note: This is the earliest document seen (July 2021) that mentions a food named "Granose"; it is made by the Sanitarium Health Food Co., Battle Creek, Michigan.

"The Caramel Coffee manufactured by the Sanitarium Health Food Company has constantly grown in popularity as a substitute for those baneful drugs, tea and coffee, which, under the deceptive guise of 'cups which cheer but do not inebriate,' have made nervous wrecks of thousands upon thousands of our American women. Recent improvements which have been made in Caramel Coffee, by which its palatableness and convenience for use are increased, will still further add to its popularity as a tea and coffee substitute. It is agreeable to the taste, aromatic, and at the same time entirely wholesome."

"Digestive Coffee is another beverage which the Sanitarium Health Food Co. are preparing to place upon the market. It is in some respects allied to Caramel Coffee. It has the added virtue that it not only does not interfere with digestion but actually aids the digestive process by assisting in the conversion of starch to sugar, which should take place in the stomach under the influence of saliva acting upon the starch."

"... Sanitarium Health Food Co. is not a money-making concern, but simply one branch of the great missionary project represented by the Battle Creek Sanitarium, which has for more than a quarter of a century, stood as a champion for the most advanced principles in relation to dietetic and temperance reform, as well as other reforms relating to human welfare. No person receives individual benefit from the labors of this institution, all the dividends being devoted to the advancement of the institution itself, one important feature of which is the care of the sick poor."

80. Newberry (J.R.) & Co. 1895. Newberry's. Ralstonites (Ad). *Los Angeles Times.* July 25. p. 7.
• ***Summary:*** "Just in, another large shipment of Ralston Foods from Battle Creek Sanitarium [Michigan], consisting of the following: Granose Flakes, Granola, Gluten Meal, Wheat Gofio, Graham Flour, Bran, Graham Crackers, Fruit Crackers, Zwieback, Gluten Wafers, Gluten Biscuits, Carbon Wafers, Whole Wheat Wafers, and Caramel Coffee."

Note 1. Why are Ralston Foods being shipped by and from Dr. Kellogg's Battle Creek Sanitarium? Where are these foods made and by which company? Did Dr. Kellogg have an agreement with "Dr. Ralston" of "Ralston Health Club" fame to use the Ralston name in marketing Dr. Kellogg's foods?

Note 2. This is the 2nd earliest document seen (Dec. 2013) worldwide that mentions "Granose" and the earliest that mentions "Granose Flakes." The flakes appear to be made in Battle Creek, Michigan, and sold in Los Angeles.

81. Newberry's. 1895. Health is wealth (Ad). *Los Angeles Times.* Sept. 14. p. 7.
• ***Summary:*** "Another large shipment of Ralston Foods from The Battle Creek Sanitarium [Michigan]. These goods are prepared strictly on scientific principles, and all dyspeptically inclined, in fact, all general sufferers, are cordially invited to call and examine these goods. Granose Flakes is one of their latest and finest preparations. Zwieback and Caramel Coffee are having an immense run. Call for samples." Address: 216–218 S. Spring St.

88. Kellogg, John H. 1896. Progress in dietetics–Two new cereal foods (Continued). *Good Health* (*Battle Creek, Michigan*) 31(1):4-6. Jan. [1 ref]
• ***Summary:*** Contents: Introduction (starchy foods, cereal foods). Granose grits. Brown bread. Granose (and Granose flakes). Granose with liquid foods. Granose shortcake.

"Brown Bread.–Take four cupfuls of strong caramel-cereal, and add to this one-half cup of nut meal or two tablespoonfuls of nut butter, one-half cup of sugar, and a pinch of salt."

"Granose.–Granose differs from granose grits in that, after having been subject to the same preliminary process, it is crushed into thin flakes instead of being cut into the form of cereal crystals. These flakes, or as some admirers of the food have termed them, wheat chips, are so extremely thin that when dropped into water they are instantly macerated, and fall at once to the bottom completely softened."

"Any one who will obtain a sample of either of the foods mentioned, from the Sanitarium Health Food Company, and test their merits, will certainly give us credit for having spoken very moderately in our statements concerning the virtues of these new foods, and will be ready to give them a much more enthusiastic commendation than we have done. Samples may be obtained by addressing the Sanitarium Health Food Company, Battle Creek, Michigan."

Note: This is the earliest document seen (July 2021) that mentions "nut butter," which may well refer to peanut butter. Address: M.D., editor.

89. Siegel, Cooper & Co. 1896. The world's greatest food mart (Ad). *Chicago Daily Tribune.* Feb. 2. p. 44.

[barrel]. Bars of Procter & Gamble's Ivory Soap. Address: State, Van Buren & Congress streets [Chicago].

90. Fitch, D.A. (Mrs.). 1896. What shall we put on bread? *Advent Review and Sabbath Herald* 73(5):71. Feb. 4. Whole No. 2153.
• ***Summary:*** "When we consider *Eccl.* 7:29, we usually apply the "many inventions" to evil things; but may not the expression mean some good thing, sometimes? The Health Food Company of Battle Creek, Michigan, is now manufacturing nut butter. The company began on a small scale, but the demand is so great that the facilities for its manufacture are being greatly enlarged from time to time. Its price, as it comes from the factory, is thirty cents a pound. When prepared in the home, according to directions, its expense is only half that. This is what hundreds are now using on their bread, and the pleasure derived therefrom is great, compared with that found in the use of the dairy product, to say nothing of the fact that it is thoroughly hygienic, while the dangers of the latter are manifold."

Note 1. The full name of this company was probably "Sanitarium Health Food Co." (used by the company as early as Sept. 1888) or "Battle Creek Sanitarium Health Food Co."

Note 2. This is the 2nd earliest document seen (Feb. 2015) that mentions "nut butter," which may well refer to peanut butter. Address: Sanitarium Cooking-School, Battle Creek, Michigan.

91. **Product Name:** Nut Butter.
Manufacturer's Name: Sanitarium Health Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1896 February.
Ingredients: Peanuts.
How Stored: Shelf stable.
New Product–Documentation: Fitch, D.A. (Mrs.). 1896. "What shall we put on bread?" *Advent Review and Sabbath Herald.* 73(5):71. Feb. 4. "When we consider *Eccl.* 7:29, we usually apply the "many inventions" to evil things; but may not the expression mean some good thing, sometimes?

© Copyright Soyinfo Center 2021

The Health Food Company of Battle Creek, Michigan, is now manufacturing nut butter. The company began on a small scale, but the demand is so great that the facilities for its manufacture are being greatly enlarged from time to time. Its price, as it comes from the factory, is thirty cents a pound. When prepared in the home, according to directions, its expense is only half that. This is what hundreds are now using on their bread, and the pleasure derived therefrom is great, compared with that found in the use of the dairy product, to say nothing of the fact that it is thoroughly hygienic, while the dangers of the latter are manifold."

Note 1. The full name of this company was probably "Sanitarium Health Food Co." (used by the company as early as Sept. 1888) or "Battle Creek Sanitarium Health Food Co."

Note 2. Prior to 1897, Seventh-day Adventists generally referred to all nut butters (including peanut butter) as "nut-butter" (or "nut butter"). In Aug. 1897, "peanut butter" was first mentioned by a Seventh-day Adventist person or publication in *Good Health* magazine.

Note 3. Mrs. Fitch was a Sanitarium Cooking-School teacher and writer.

Note 4. It is reasonable to ask why Joseph Lambert of Battle Creek, Michigan, who had all the necessary patented equipment and company to make peanut butter (and sold peanuts in bulk), did not do so. Here is the answer. He did not want to go into competition with his mentor and fellow Seventh-day Adventist, Dr. John Harvey Kellogg.

92. **Product Name:** Bromose (Dry Milklike Product Made from Malted Nuts–No Soy).
Manufacturer's Name: Sanitas Food Co. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1896 February.
Ingredients: Mainly peanuts.
New Product–Documentation: Kellogg, John H. 1896. "Nut butter and nut meal." *Good Health* (Battle Creek, Michigan) 31(2):56-57. Feb. "Bromose is a combination of nuts with digested starch. It is the vegetable analogue of malted milk and constitutes a perfect food." "Nut butter, nut meal, and bromose are manufactured and sold at reasonable rates by the Sanitas Food Company, Battle Creek, Michigan."

Sanitas Food Co. 1896. "New nut products" (Ad). *Chicago Vegetarian* 1(3):8. Nov. Four products are advertised: 2. Bromose. "Makes fat and blood. This is a product made by malting nuts, and is especially adapted to persons who cannot digest starch."

Ellen Goodell Smith. 1896. *The Fat of the Land and How to Live on it.* Page 195 contains a full-page ad for products made and sold by the Sanitas Food Company (Battle Creek, Michigan) titled "Pure Products of Nuts." These include Bromose.

Schwarz, Richard W. 1970. *John Harvey Kellogg, M.D.* Nashville, Tennessee: Southern Publishing Assoc. "During the decade following the appearance of peanut butter, Dr. Kellogg developed several other food products with a nut base. In 1896 he patented a product labeled 'Bromose,' which he claimed to be a vegetable equivalent of malted milk" (p. 120-21).

93. Swan, Kate. 1896. "Ralston Health Club." Do you yearn for perpetual life! Then read this digest of the secrets of the wonderful club. Otherwise you must pay to learn of "Glame." *Los Angeles Times.* March 5. p. 10.
• ***Summary:*** From New York World: "The Sunday World has discovered the most remarkable secret organization in existence. It is called the 'Ralston Health Club,' and to each and every member it promises at least 200 years of life. More than eleven million persons are, in some degree, members of this club. At the head of the enormous organization is a man only less remarkable than the club itself. He is Webster Edgerly, P.O. Box 291, Washington, D.C. It was to him that the 11,000,000 members paid their initiation fees. A woman reporter of the Sunday World joined this very secret club, and for the sake of the poor persons who cannot afford to pay $200 for 200 years of life she herewith betrays all the secrets of the organization."

"Webster Edgerly... is the possessor of the grandest secret ever vouchsafed to humanity... Indeed there is a branch of the Ralston Health Club which is called the Two Hundred Year Club.

"The 11,000,000 persons who belong to the Ralston Health Club have paid in something like $35,000,000 and more are sending their money in every day."

This long article then discusses the Club in detail.

94. Woodward & Lothrop. 1896. We place on sale this day... (Ad). *Washington Post.* April 14. p. 7.
• ***Summary:*** The section titled "Health food exhibit" states: "We are now demonstrating the famous products of the Battle Creek Sanitarium Health Food Co., of Battle Creek, Michigan, and call special attention to the following perfect health foods: Granose, wheat flakes, per pkg.–15¢. Granola, cereal food, per pkg.–12¢. Caramel Cereal, wheat coffee, per pkg.–20¢. Whole wheat wafers, per pkg.–12¢. Graham crackers, sweetened or plain, per pkg.–12¢. Best fruit crackers, per pkg.–18¢. Whole wheat zwieback, per pkg.–12¢.

"Free samples served daily. Fifth floor, 11th st. building."

Note: This is the earliest document seen (Sept. 2006) that mentions "Caramel Cereal," an alternative to coffee made from roasted wheat. Address: 10th, 11th, and F Sts. N.W. Phone: 628.

foods (Ad). *Modern Medicine and Bacteriological Review* (*Battle Creek, Michigan*) 5(5):Unnumbered at front. May.
• ***Summary:*** Three products are advertised: 1. Granola. 2. Granose. 3. Caramel-Cereal. "Established 1876. Food cure for constipation."

Note 1. This is the 2nd earliest know U.S. company with the term "Health Food" (or "Health-Food") in the company name.

Note 2. This is the earliest document seen (Sept. 2006) that mentions the Battle Creek Sanitarium Health Food Co.

Note 3. This is the earliest document seen (June 2013) that mentions a food cure for constipation in connection with Battle Creek Sanitarium or Battle Creek Sanitarium Health Food Co. Address: Battle Creek, Michigan.

96. Newberry's. 1896. Just received: A large assortment of Health Foods from the Battle Creek Sanitarium (Ad). *Los Angeles Times*. July 21. p. 7.
• ***Summary:*** "Granose Flakes–25¢ package. Whole wheat biscuits–15¢ package. Granola–15¢ package. Aranola–15¢ package. Caromel coffee–15¢ package. And many others including Bromose." Address: 216 and 218 South Spring Street [Los Angeles, California].

97. Naturalization approval: Otto Carque. 1896. New York City, New York. 1 p.
• ***Summary:*** This is a form that has been filled out in ink by hand by a New York clerk.

"Family name: Carque. Given name or names: Otto

"Title and location of court: Supreme Court, New York County.

"Date of naturalization: July 27, 1896. Bundle No. 44. Copy of Record No. 72

"Address of naturalized person: 65–2nd Ave.

"Occupation: Confectioner. Birth date or age: 30 years. Former nationality: Emperor of Germany.

"Port of arrival in the United States: NYC [New York City]. Date of Arrival: April 13, 1889.

"Names, addresses and occupations of witnesses to naturalization

"William Ulrich, [occupation] Barber

"215–5th St."

Note: Deepest thanks to Wayne Dawson, genealogist, Tucson, Arizona, for finding this record on Ancestry.com and sending it to Soyinfo Center.

98. **Product Name:** Nuttose (Meatlike or Cheeselike Product Made from Nuts–Mostly Peanuts, No Soy).
Manufacturer's Name: Battle Creek Sanitarium Bakery. Then Sanitas Food Co. from Feb. 1896. Renamed Sanitas Nut Food Co in May 1898. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1896 July.
Ingredients: Mainly peanuts.
New Product–Documentation: Dr. John Harvey Kellogg. 1896. *Good Health* (Battle Creek, Michigan) 31(7):195-96. July. "Nuttose: A new food for brain and muscle building." "It is so perfect a substitute for flesh food that in eating it one could readily imagine himself to be partaking of roast beef, dried beef, broiled chicken, or other meats, according to the mode of preparation..."

Note: Nuttose appears to be Dr. Kellogg's first commercial meatlike or cheeselike product, and the first commercial meatlike or cheeselike product introduced by any Caucasian in the Western world. It is also the earliest commercial meat alternative seen which is described as an alternative to chicken or poultry. Made solely from nuts, Nuttose contains no soy.

Ellen Goodell Smith. 1896. *The Fat of the Land and How to Live on it.* Page 195 contains a full-page ad for products made and sold by the Sanitas Food Company (Battle Creek, Michigan) titled "Pure Products of Nuts." These include Bromose and Nuttose.

Kellogg, John H. 1898. *Good Health.* Jan. p. 46. Nuttose is "a thoroughly cooked and sterilized product of nuts, chiefly peanuts. Nuttose is made in the form of a cheesy mass which readily dissolves in the digestive fluids, the nuts having been first completely disintegrated and then thoroughly cooked. It contains about the same amount of proteids as beefsteak, and, in addition, between twenty-five and thirty per cent of easily digestible nut fat in a state of natural emulsion."

Concerning the establishment and name of this company: Richard Schwarz in his excellent book *John Harvey Kellogg, M.D.* states: "Shortly after the production of Granola for patients at the sanitarium began in 1877, Dr. Kellogg organized the Sanitarium Food Company as a subsidiary of the Battle Creek Sanitarium. Operated as an adjunct to the sanitarium bakery, for more than a decade it marketed a variety of oatmeal, graham, and fruit crackers and whole-grain cooked cereals–all originally devised to provide

© Copyright Soyinfo Center 2021

variety in the menu of sanitarium patients." All products were made from whole grains without artificial additives, and all underwent prolonged high-temperature baking designed to dextrinize their starch. "By 1889 the Sanitarium Foods had become popular enough to warrant the establishment of a separate factory; Granola alone sold at the rate of two tons a week." But when Dr. Kellogg wanted to expand the business, other sanitarium doctors refused to vote the funds. So Dr. Kellogg launched the private Sanitas Food Company, relying heavily on his younger brother, Will Keith, who had served as his personal accountant and business manager since 1880. John Harvey's new flaked cereals and vegetable meats became the property of the Sanitas Company. In mid-1906 Dr. Kellogg decided to change Sanitas' corporate name to the Kellogg Food Company.

The Loma Linda University Library Heritage Room (Loma Linda, California) has a copy of a stock certificate for this company (White document file #497-h). On the certificate two company names appear: Sanitas Nut Food Co. and Sanitas Food Co.

Talk with Duff Stoltz of Battle Creek, Michigan. 2001. April 26. Duff believes that Nuttose probably contained peanuts as the main ingredient. Dr. Kellogg was making peanut butter by this time and his first U.S. patent (No. 567,901), issued on 15 Sept. 1896, describes the production of both peanut butter and peanut meal. He could well have used the latter to make Nuttose.

99. *Evening Star* (*Toronto, Ontario, Canada*). 1896. Lactated Food is the ideal health food (Advertorial). Aug. 25. p. 3.
• ***Summary:*** "Lactated Food is the physician's ideal health food, and the only infant nutriment that they can heartily indorse [endorse].

"Lactated food should be in every home where there is a baby; it saves babies' lives."

Note: This is the earliest document seen (Aug. 2009) in the *Evening Star* (Canada) that contains the term "health food" (or "health foods").

100. New York Health Food Co. 1896. Notice (Ad). *Indicator* (*New York Tract Society, Rome, New York; Seventh-day Adventist*) 6(18):4. Sept. 29.
• ***Summary:*** "As an accommodation to certain ones we hereby again offer Eureka Health Flour at $4.50 per bbl. F.O.B., at Lockport, N.Y. Many have ordered, you can till May 1.

"With Health Foods we can ship Lemons, 14 cts. doz., Oranges, 20 cts. doz., Prunes, 9 cts. lb., Cleaned Currants, 8 and 10 cts. pkg., Sultana Raisins, 12 cts. pkg., Seeded Raisins, 5 and 12 cts. pkg., Cal. Muscatels, 4 and 6 cts., Dates, 5 cts. lb., Figs, 10 cts. lb., Bromose, 60 cts. lb., Nut Butter, 30 cts. lb. Send for new price list."

Note: This company is the earliest known seller of nut butter; so far as we know, they are not a manufacturer. They are advertising in a Seventh-day Adventist periodical. Address: Oxford, New York.

101. Newton, Robertson & Co. 1896. Battle Creek Sanitarium Health Foods (Ad). *Hartford Daily Courant* (*Connecticut*). Oct. 13. p. 12.
• ***Summary:*** "The great American disorder is Indigestion and its allied troubles. If you are troubled with dyspepsia in any form, ask about these Health Foods. Eat Granola, Granose. Drink Caramel Cereal. These goods are being used daily by thousands upon thousands of invalids with great success. The most delicate stomach can take these Cereals with relish and without distress. Ask about Health Food Goods..."

102. Newberry's. 1896. Caramel Cereal (Ad). *Los Angeles Times.* Nov. 11. p. 7.
• ***Summary:*** "Is a perfect substitute for Coffee. If you are nervous, stop drinking Tea and Coffee, and use Caramel Cereal: It is the greatest health drink of the age. Don't be misled to take something else. There is only one Caramel Cereal, and that is made by the Battle Creek Sanitarium Health Food Co., of Battle Creek, Michigan. Sold at 15¢. package." Address: 216 and 218 S. Spring Street.

103. Battle Creek Sanitarium Health Food Co. 1896. Foods for health (Ad). *Chicago Vegetarian* 1(3):8. Nov.
• ***Summary:*** Three products are advertised: 1. Granola. 2. Granose (a flaked cereal food). 3. Caramel-Cereal. Address: 65 Washington St., Battle Creek, Michigan.

104. **Product Name:** Nut Butter.
Manufacturer's Name: Sanitas Food Co. Soon renamed Sanitas Nut Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1896 November.
Ingredients: Peanuts (probably).
How Stored: Shelf stable.
New Product–Documentation: Ad (half-page) by Sanitas Food Co. in the *Chicago Vegetarian.* Nov. 1896.

Smith, Ellen Goodell. 1896. *The Fat of the Land and How to Live on It.* A full-page ad (p. 255) describing products made and sold by the Sanitas Food Company (Battle Creek, Michigan) is titled "Pure Products of Nuts." These include Bromose, Nuttose, Nut-Butter [probably peanut butter], and Nut-Meal.

Ad by Sanitas Nut Food Co., Ltd. in *Gospel of Health* (Battle Creek, Michigan; Seventh-day Adventist). 1898. "Twentieth century foods." 2(5):106. May. One of the products advertised is "Nut Butter."

Note 1. This product was first made in 1896 by Sanitarium Health Food Co. Only the company name has changed–apparently.

105. Sanitas Food Co. 1896. New nut products (Ad).

© Copyright Soyinfo Center 2021

Chicago Vegetarian 1(3):8. Nov.
• ***Summary:*** A half-page ad. Four products are advertised: 1. "Nuttose. A pure product of nuts, of the consistency of cheese, having somewhat the appearance and flavor of cold roast mutton." May be prepared like meats.

2. "Bromose. Makes fat and blood. This is a product made by malting nuts, and is especially adapted to persons who cannot digest starch."

3. "Nut Butter. A substitute for ordinary butter, presenting fat in the form of a perfect emulsion; combined with water, forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter."

Note 1. This may well be peanut butter.

4. "Nut Cream. A delicate, delicious nut preparation, which, properly diluted, furnishes a delicately-flavored cream or milk. It resembles milk in appearance."

Note 2. This is probably made from peanuts and/or almonds.

"Send 25 cents in stamps for samples. Circulars free on application."

Note 3. This is the earliest English-language document seen (Feb. 2015) that contains the term "Nut Cream."

Note 4. This is the earliest document seen (Jan. 2015) showing that Sanitas Food Co. is making "Nut Butter." The company will soon be renamed "Sanitas Nut Food Co." Address: 65 Washington St., Battle Creek, Michigan.

106. Newberry's. 1896. Just arrived: Another shipment of Health Foods in today from Battle Creek (Ad). *Los Angeles Times.* Dec. 3. p. 7.
• ***Summary:*** "Bromose, Nuttose, Almond Meal, Granose, Caramel Cereal, Granose Flakes and Avanola." Address: 216 and 218 South Spring Street [Los Angeles, California].

107. Jaffa, M.E. 1896. Investigation of food materials. *Report of Work of the Agricultural Experiment Stations of the University of California* p. 140-63. For the year 1894-95. See p. 161.
• ***Summary:*** The section titled "Gluten flour" (p. 161) states: "A sample of gluten flour was received from the Ralston Health Food Company. The analysis is as follows: Moisture 12.81%. Albuminoids 14.96%. Carbohydrates (starch chiefly, with a little sugar and gums) 68.99%. Fat 2.00%. Fiber (cellulose) 0.60%. Ash (mineral matter) 0.64%. Total 100.00%

"The percentage of albuminoids, 14.96, in this flour, is about twice that found in the best California white flour; and higher than the corresponding figure for whole-wheat flour."

Note: This is the earliest document seen (July 2021) that mentions "Ralston Health Food Company," a pioneer manufacturer of health foods.

Note 2. Eugene W. Hilgard [1833-1916], Ph.D., LL.D. (Professor of Agriculture) is Director of the Station and a Chemist. Born in Germany, he is considered the father of modern soil science in the USA. From 1875 to 1904 he was Professor of Agricultural Chemistry at the University of California, Berkeley and Director of the State Agricultural Experiment Station there. Address: Ph.B. (Instructor), First Asst. Chemist in Agricultural Lab., Univ. of California, College of Agriculture, Agric. Exp. Station, Berkeley, Alameda Co., California.

108. Kellogg, Ella Ervilla Eaton. 1896. Every-day dishes and every-day work. Battle Creek, Michigan: Modern Medicine Publishing Co. 184 p. Index. 24 cm. Reprinted in 1897.
• ***Summary:*** The wife of the famous Dr. John Harvey Kellogg discusses her system of meatless cookery–though the term "vegetarian" is not used. She lived 1852-1920. Contents: Eight pages of ads (for books, foods, and medical instruments/devices). Title page. Cereals (incl. Graham grits, Graham apple mush). Preface. Introduction. Cereals (incl. Graham grits, Graham meal). Macaroni. Fermented or yeast bread (incl. whole-wheat bread, Graham or wheat-meal bread). Unfermented or aerated bread (incl. Graham puffs, Granola gems). Fruit (cooking, canning). The leguminous seeds (incl. peas, beans, lima beans, lentils, cooked peanuts). Vegetables. Soups (incl. without milk, with milk and cream; Bran stock). Eggs (incl. cream). Desserts. Pastry. Cake. Toasts. The Battle Creek Sanitarium Health Food Company's products (discusses and contains recipes using Granola, Granose, Crystal Wheat, gluten {13 recipes}, nut butter and nut meal {which "have been prepared as substitutes for butter and cream," p. 147}, Nuttose, zwieback, and caramel cereal, p. 139-52). Hints about every-day work. Every-day bills of fare.

The eight ads on unnumbered pages in the front of the book are for: (1) "Caramel-Cereal. A most delicious substitute for the Coffee Bean, and contains none of its harmful properties... Caramel-Cereal has been used for over twenty years at the Battle Creek Sanitarium, and the demand has increased daily... Try it, and you will always use it... Manufactured by Battle Creek Sanitarium Health Food Co." (2) Battle Creek (Mich.) Sanitarium Health Foods. "Eat Granola, Granose. Drink Caramel-Cereal." (3) Charcoal Tablets: Antiseptic... Absorbent. Sanitas Food Company, Battle Creek. (4) Almond Meal, from Sanitas Food Co. (5) Lac Vegetal or Nut Cream: Prepared from the choicest nuts. A perfect substitute for cow's milk. Sanitas Food Co. (6) Bromose: Makes fat and blood. "Consists of cereals and nuts in which the starch is completely digested... Unequalled as a tissue builder... Gain in flesh." Sanitas Food Co. (7) The natural abdominal supporter. Modern Medicine Co., Battle Creek. (8) *The Stomach: Its Disorders and How to Cure Them*, by J.H. Kellogg, M.D. Modern Medicine Publishing Co.

A table (p. 7) shows the "nutritive value of some common food substances," including sweet almonds,

© Copyright Soyinfo Center 2021

peanuts, five legumes, milk, and six types of meat and poultry, and eggs. Values/columns are given for: Water, albuminous elements, starch, grape sugar, free fat, salts, cellulose, proportion of carbonaceous to nitrogenous material, total nutritive value.

The chapters on cereals and breads include Graham Grits, Wheat-Meal or Graham Mush, whole-wheat breads, Graham breads, Graham Puffs, etc.–but most breads are made with white flour and milk–and fermented. The chapter on leguminous seeds contains two recipes for blanched and boiled peanuts (p. 76); soy beans are not mentioned. Milk, cream, eggs, and sugar are used in moderation throughout the book. There is an entire chapter titled "Eggs." Desserts are generally sweetened with sugar. Up to 1 cup of sugar is used in some recipes (p. 117), but fruits are often used instead; milk or cream are also widely used in desserts. The chapter on "Pastries" (mostly pies) begins by discussing the dietetic evils of pastries; recipes calls for less fat than typical recipes.

The section on "Nut Butter and Nut Meal" (p. 147-49) notes that these two foods "have been prepared as substitutes for butter and cream," which cause many persons to "suffer from biliousness, nervous and sick-headache, and various forms of indigestion." Ten recipes are given. For example (p. 149): "Nut Butter Sandwiches.–Spread slices of thinly cut graham bread with nut butter, and then with chopped dates or figs..." Note 1. Although "peanut butter" is not mentioned, this is almost certainly a peanut butter sandwich. Yet this book contains no recipe for making peanut butter at home.

The section titled "Nuttose" (p. 149-50) states: "This is a pure product of nuts. It is intended as a substitute for meat, which it completely replaces dietetically, having nearly twice the nutritive value, while it furnishes the same elements and in a form much more digestible, and wholly free from the objectionable features of meat. Nuttose may be prepared and served in the same manner as the various forms of flesh food. It so perfectly resembles meat in appearance and flavor, as well as nutritive properties, that many persons find it difficult to distinguish the difference. 7 recipes are given.

The 1¼ page discussion of Zwieback (p. 151) states: "Any one who has ever made a visit to Carlsbad [Karlsbad or Karlovy Vary in today's Czech Republic] will remember the delicious zwieback which occupies so conspicuous a place in the bill of fare... At Carlsbad, zwieback is made by exposing the sour 'schwartz brodt' to moderate heat for several hours until the starch becomes to dextrin and dextrose. For years the Sanitarium Health Food Company has manufactured for the use of the numerous patrons of the Medical and Surgical Sanitarium, Battle Creek, Mich., a superior quality of zwieback, which is not only more palatable but much more wholesome than the original article of Carlsbad manufacture... With milk or cream it is a real delicacy, as toothsome as it is nourishing and easy of digestion. Zwieback is supplied in three grades as follows:–No. 1. Made of graham flour (Sanitarium brand), containing fifteen per cent. of gluten... For recipes, see pages 145 to 138."

Note 2. This is the earliest document seen (July 2004) that contains the word "zwieback" (pronounced SWEE-bak in English). The word is also spelled like this in German, but with a capital "Z" and pronounced TSVEE-bak. The earliest occurrence of the word seen by *Merriam-Webster's Collegiate Dictionary* is 14 March 1894, *New York Weekly Tribune* (p. 5, col. 4). "These Zwieback will keep for a long time if put in a dry place." Note spelling and capitalization!

The eight ads on unnumbered pages in the back of the book are for: (1) Health Foods–Granola, a health food, an invalid food. From Battle Creek Sanitarium Health Food Co. Established 1876. "One pound more than equals three pounds of best beef." (2) Health Foods–Granose, Granola, Caramel-Cereal, Battle Creek Sanitarium Breakfast Food, Germless Oats, Germless Wheat Grits, Germless Corn Grits, Crystal Wheat, gluten preparations, diabetic foods. Send for a catalogue and price list to Battle Creek Sanitarium Health Food Co. (3) "Almond Butter–A substitute for ordinary butter. Presenting fat in the form of a perfect emulsion. Combined with water it forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter. Send five cents for sample. From: Sanitas Food Co., Battle Creek. (4) "Nuttose–Pure product of nuts. Perfect substitute for all flesh foods. Makes fat and blood. In their natural state nuts are difficult to digest, and cannot be eaten by many persons... Nuttose has the consistency of cheese, and much the consistency of cold roast mutton, and may be eaten cold, stewed, cooked with vegetables or other foods, made into gravies and other preparations in the same manner as meat..." "Send ten cents for a sample can... Ready to eat at once. Keeps indefinitely." From: Sanitas Food Co., Battle Creek.

(5) *Science in the Kitchen*, by Mrs. E.E. Kellogg. Published by Modern Medicine Publishing Co., 65 Washington St., Battle Creek, Michigan. (6) Universal Mercurial Dynamometer, developed by Dr. Kellogg for testing the strength of individual groups of muscles in the human body. From: Sanitary and Electrical Supply Co., Battle Creek. (7) *Home Hand-Book*, by Dr. J.H. Kellogg. Published by Modern Medicine Publishing Co. Over 1,700 pages and 500+ engravings. Describes the best means of preserving and regaining health. (8) Perfection vaporizer, from Modern Medicine Co. Address: A.M., author of "Science in the Kitchen," etc., Battle Creek, Michigan.

109. Smith, Ellen Goodell. 1896. The fat of the land and how to live on it. Special chapters on nuts and vegetable oils, and how to use them in cooking; milk; bakeries; feeding infants and various other subjects relating to the problem. Amherst, Massachusetts: Press of Carpenter & Morehouse. 251 + [12] p. Portrait. Illust. Index. 20 cm. At top of title page: "A practical cook and text book for general use."

© Copyright Soyinfo Center 2021

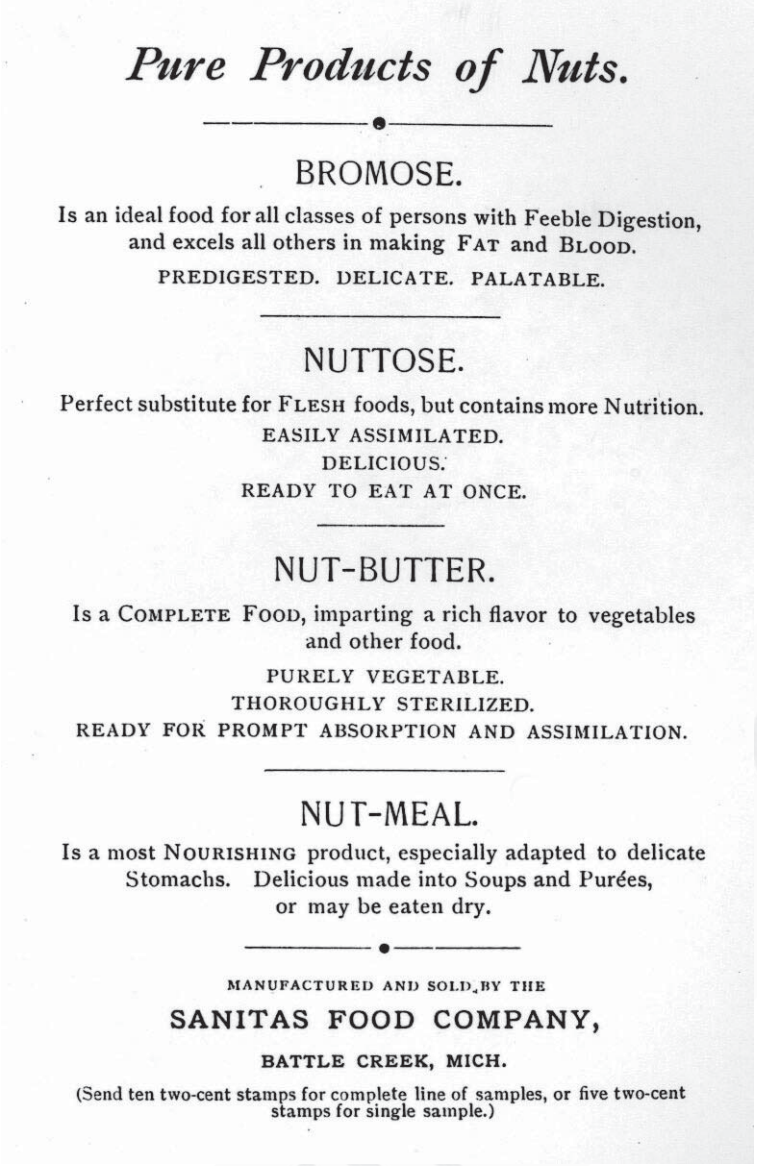
• ***Summary:*** A remarkable and wholistic vegetarian (actually vegan) cookbook by a medical doctor (M.D.). A photo (frontispiece), facing the title page, shows a portrait of Dr. Ellen Smith. Dedication: "To the millions of thinkers who think in new directions, and to other millions who do not stop to think whether they should 'live to eat' or eat to live' this book is dedicated." Facing the table of contents are three quotations from Buddhist and Christian scriptures on the importance of not killing.

The Preface begins: "This book *is* because of the agitation and discussion upon the various phases of the food question. The title indicates its character to be vegetarian; this word however is a misnomer, but as none better has yet been coined, we will simply state that we are vegetarians because we think nature designed us to subsist on the 'fat of the land,' and not on the flesh and blood of beasts, or of any living, sentient creature."

"To be a health and dietetic reformer in the early days of this movement meant much sacrifice and often personal abuse" (p. 10).

"With no desire to set aside the work of the scientists, we accord 'honor to whom honor is due,' and may success attend their gigantic efforts, that seem to be heroically directed toward healing, protecting, and preparing the animal world and their products for human consumption" (p. 11).

This chapter, after listing many of America's major problems, concludes: "From a vegetarian standpoint, these unhealthful conditions of mind and body are largely propagated, nourished and developed and developed from the never ending supply of slaughtered flesh and its stimulating–not nourishing–accompaniments. The moral and physical health of millions is thus undermined, and from such material is created generation after generation of imperfect human beings;..." (p. 11).



Chapter 5, titled "Milk, cream, butter, etc." begins: "Milk, cream, butter, salt and sugar are admissible in hygienic and vegetarian dietary, but in most of the recipes here given are not included... [but] in all cases salt can be added if desired, or milk substituted for water."

Chapter 6, titled "Vegetable oils," notes: "Those at present extensively used for culinary purposes are obtained from the olive, cocoanut and cotton seed." It is almost impossible to obtain olive oil unadulterated. "The *American Analyst* tells us that 'Two-thirds of the olive oil sold in the markets of the world is born in the cotton fields of the southern states" (p. 57). "At Manheim, Germany, cocoanuts have for many years been made into butter for general culinary use... [It] keeps indefinitely and even when exposed to the air *will not become rancid* like animal fat. This butter is also manufactured in England... It is now manufactured in America by the Pure Food Co., Chicago, Illinois" (p. 58). Note 1. This is the earliest document seen (July 2021) that contains the term "Pure Food" in connection with the growing "pure food movement" in the USA.

Chapter 6 concludes prophetically: "One need not be a vegetarian or even a hygienist to use these vegetable oils, for these are thousands of families using them, who also use animal food, finding economy in health and purse by so doing."

Chapter 10, titled "Nuts, their culture and use in cooking," (p. 141-56) discusses almonds (now largely

Pure Products of Nuts.

BROMOSE.

Is an ideal food for all classes of persons with Feeble Digestion, and excels all others in making FAT and BLOOD.

PREDIGESTED. DELICATE. PALATABLE.

NUTTOSE.

Perfect substitute for FLESH foods, but contains more Nutrition.

EASILY ASSIMILATED.
DELICIOUS.
READY TO EAT AT ONCE.

NUT-BUTTER.

Is a COMPLETE FOOD, imparting a rich flavor to vegetables and other food.

PURELY VEGETABLE.
THOROUGHLY STERILIZED.
READY FOR PROMPT ABSORPTION AND ASSIMILATION.

NUT-MEAL.

Is a most NOURISHING product, especially adapted to delicate Stomachs. Delicious made into Soups and Purées, or may be eaten dry.

MANUFACTURED AND SOLD BY THE

SANITAS FOOD COMPANY,

BATTLE CREEK, MICH.

(Send ten two-cent stamps for complete line of samples, or five two-cent stamps for single sample.)

grown in California), walnuts, pecans, Brazil nuts, and peanuts. Peanut oil is largely exported to foreign countries and doubtless returns, with olive oil, under the name of "Pure Olive Oil." "It is said that America uses 4,000,000 bushels of peanuts yearly at a cost to the consumers of $10,000,000. Very rarely do we find these nuts on the table as an article of food, but they are consumed between meals by everybody, from the shoeless and hatless street waif to the gray-haired millionaire." "Unbelievers tell us that a vegetable diet lacks proteids or tissue building elements, and hence that vegetarians are not properly nourished. Science has demonstrated that proteids are abundant in the grains," nuts, and other foods (p. 148-49). The section titled "Nuts as food" (p. 149-53) begins: "Nuts are not only superior to flesh as an article of diet, but may be used in many forms of cookery, either whole, chopped, grated, crushed or ground into a paste or meal." "The pine nut, sold under the name of pegnolia [pignolia], is an excellent nut for cooking." Two sub-sections are titled "Nut substitute for milk" (using cocoanuts, pecans, peanuts, Brazil nuts, etc.) and "Nut butter" (one of the latest novelties). There are recipes for sandwiches with "almond nut butter," and "Peanut sandwiches" spread with a "form of nut butter which flavors so strongly of peanuts that it will make an excellent substitute for dairy butter to spread the bread and hold the crushed nuts in place."

Note 2. This book contains no recipe for making peanut butter at home.

Chapter 11, "Salads," contains a long section titled "Japan Soja" (p. 164) which clearly refers to Japanese soy sauce: "A jar of the extract of Japan soja was received too late for careful testing or experiment. But coming from a German vegetarian laboratory [Dr. Lahmann's] and said to be free from injurious substances, it may prove to be a useful addition to the table. Following is a description of the Soy-bean from which it is made.

'Japan Soja, a substitute for flesh meat extracts such as Bovinine, etc. etc. The soy-bean or pea is a small erect herb, ("Glycine soja," or "soja hispida") of the bean family, "Papilionacees" of India and China, cultivated for its seeds; composed of 38% proteids, 17 to 20% fat, 5% cellulose [fiber] and 4% ashes. The hygienist loses nothing by declining flesh meat extracts of any sort, but substantially gains by adopting Japan Soja, a safe and far more palatable flavoring for various dishes. It may not only be so employed in the preparation of dishes, prior to serving, but subsequently and similarly to Worcestershire sauce, etc.'

The odor and flavor of this preparation is very delicate and may readily supply a need in the dietary of those who are making a change from an animal to a vegetable diet."

The next (and last) paragraph of Chapter 11 (p. 165) notes that commercial samples of "Bromose and nut butter... manufactured in vegetarian laboratories and guaranteed free from animal fat" were "received at 'the eleventh hour,' too late for critical experiment... Crushed nuts, nut butter and nut meal of home make were used in all preceding recipes containing nuts."

Chapter 12, titled "Condiments and seasonings" (p. 167-71) argues against the use of salt, spices (including pepper, mustard, ginger, etc.), and commercial condiments. "Salt destroys natural flavor and gives its own flavor to all food... Salt also induces unnatural thirst,..." Instead, why not grow and use "sweet herbs" and "aromatic seeds." "Why may not sweet marjoram, sweet basil, rosemary and lavender, lemon verbena, rose and geranium leaves lend their exquisite flavors to our food? Thyme, parsley, sage and mints of various kinds..." Note 3. This general attitude may explain

© Copyright Soyinfo Center 2021

why Japanese soy sauce, a commercial condiment, was not considered a condiment and included in this chapter.

A "Directory" (p. 246) lists 13 sources of "pure food products" including: "Health foods: Dr. J.H. Kellogg, Battle Creek, Michigan. Nut preparations: Sanitas Food Co., Battle Creek, Michigan... Vegetable milk, etc.: Hygienic Supply Co., 203-05 Park avenue, Baltimore, Maryland... Readshaw's Forest Mills Graham Flour (Original) and cereals, Dansville, New York."

A full-page ad (p. 255) describing products made and sold by the Sanitas Food Company (Battle Creek, Michigan) is titled "Pure Products of Nuts." These include Bromose, Nuttose, Nut-Butter [probably peanut butter], and Nut-Meal.

A full-page ad (p. 258) is titled "Pure. Vegetable. Nutritive," by The Hygienic Supply Co. (F. Witte), 203-205 Park Ave., Baltimore, Maryland. They are "Importers of German health goods and books" including Dr. Lahmann's Japan Soja, which "Is a pure vegetable extract, which is far superior to Meat Extract. It can be used for making soups, or may be added to other foods in order to make them more appetizing. Price per jar, $1.00." (Note 4. According to *Vegetarisches Kochbuch mit Gesundheit Regeln*, by Carlotto Schultz {1886}, Dr. H. Lahmann of Stuttgart is an authority on the feeding of infants and problems related to indigestion.) Other products imported from Germany by this company include Dr. Lahmann's Vegetable Milk (for infants), Dr. Lahmann's Vegetable Extract, and Dr. Lahmann's Nutritive Cocoa.

Note 5. This is the second earliest English-language document seen (Aug. 2013) that contains the term "Vegetable Milk." This non-soy product is an emulsion made from almonds and nuts.

Page 259 contains an ad for *Health-Culture: A Journal of Practical Hygiene* by The Health-Culture Co., 341 Fifth Ave., New York.

Page 260 contains an ad for *Food, Home and Garden,* a periodical edited by Rev. Henry S. Clubb of the Vegetarian Society of America, 310 Chestnut St., Philadelphia, Pennsylvania.

Note 6. Notice that this book contains no chapter on main dishes or entrees; unleavened Graham bread (made with "entire wheat flour") was considered the best main dish. Very few the many recipes call for the use of dairy products, eggs, animal fats, or honey, and in each case they are optional.

Chapter 13, "Pudding, pastries and cakes," convincingly questions the need for this entire category of foods, but those who *must* have such sweets are encouraged (p. 176-77) to use water instead of milk, vegetable fats instead of animal fats and dairy products, reduce the number of eggs and the amount of sugar used by one-half or more, and gradually eliminate spices and salt.

Chapter 14, "Milk and the cow" makes a strong case for not using these animal products.

A woman cited several times (p. 68, 177) as an authority on foods is Mrs. Emma P. Ewing. Address: M.D., Pansy Park, Dwight, Massachusetts.

• ***Summary:*** "There is an amount of pleasure in winning

© Copyright Soyinfo Center 2021

commendation as a recognition of merit. The same satisfaction on has in finally winning a customer who has been prejudiced in the start. In New York a certain wholesale grocer and manufacturer has gained a national reputation as a connoisseur of foods and drinks. We might as well give his name... Mr. Hazard, he of Shrewsbury Katsup fame and the maker of a list of the choicest specialties in the food line in the world.

"Mr. Hazard was requested to make a test of Postum Cereal Food Coffee at his private table, but demurred on the grounds that he had tried all three kinds of coffee 'substitutes' and he had all of that kind of experience he wanted. Learning that Postum was not offered as a 'substitute' but stood on its own basis as a pure health food drink, claiming to have the color of Mocha and a delicious pungent piquant taste, all its very own but very much like the milder grades of Java, and that it was made of the gluten and phosphates of cereals, he concluded to make a trial of it." Of course he and his wife loved it, and he recommended it to all his friends.

Note: This caffeine-free beverage mix was created and launched in 1895 by C.W. Post, founder of the Postum Cereal Co. Post was first a patient, then a student, and finally a business competitor of Dr. John Harvey Kellogg (head of the Battle Creek Sanitarium, Battle Creek, Michigan) who believed caffeine to be unhealthy. Postum was made from wheat bran, wheat, molasses, and maltodextrin from corn. Address: Battle Creek, Michigan.

115. Slosson, E.E. 1897. The composition of prepared cereal foods. *Wyoming Agricultural Experiment Station, Bulletin* No. 33. 84 p. June. See p. 76, 77, 80.
• ***Summary:*** In table 1, "Composition of prepared cereal foods as purchased" (p. 76), in the first group, showing those based on wheat, is a detailed analysis of 13 breakfast foods, including No. 16 "Ralston Breakfast Food," which contains 15.10% protein, the highest the group of 13. Table 2 (p. 77) is the same except the composition is "calculated as water-free." Again Ralston Breakfast Food is tops, with 16.73% protein.

There follows a brief description of each of the foods tested. On page 80 we read: "No. 16 Ralston Health Club Breakfast Food. Purina Mills, St. Louis, Missouri. 'The Ralston Health Club in analyzing the various breakfast foods on the market found one that proved to be the only perfect and by far the most healthful breakfast food in the country.' 'Cooks in five minutes.' Package 5 x 2¼ x 7 inches. 20 cents. Weight of contents, 31.6 ounces."

Note 1. This document proves that Purina Mills was selling a breakfast cereal with the brand name "Ralston" by June 1897, earlier than the 1898 date widely given in the literature.

Note 2. This is the earliest document seen (July 2021) that mentions "Purina Mills" (St. Louis), which was later named Ralston Purina Co. Address: Chemist, Laramie, Wyoming.

116. Battle Creek Sanitarium Health Food Co. 1897. The autocrat of the breakfast table... (Ad). *Chicago Daily Tribune.* July 20. p. 12.
• ***Summary:*** "... From a liquid point of view, was long considered to be a steaming cup of coffee. This berry from the tropics shared with the leaf of the tea-plant the honor of refreshing all civilization. Both were found by experience, however, to be workers of mischief to the nerves, stomachs and brains of their admirers. In one direction or another they were simply poisons. When science was aroused to this fact, some thirty years ago, it was at the famous Battle Creek Sanitarium, the headquarters of the Pure Food movement in America, that steps were taken to make a beverage worthy of replacing coffee and tea. There, by study and experiment, was evolved the original 'Health Coffee,' Caramel Cereal, which at once became a comfort to thinkers and toilers alike. It has been used on the Sanitarium tables for over 30 years... In flavor and fragrance it is fully equal to Mocha or Java... Progressive people all use it!... In short, Caramel Cereal is the Autocrat of the Breakfast Table." An illustration shows the main building of the Battle Creek Sanitarium. Address: Battle Creek, Michigan.

117. Battle Creek Sanitarium Health Food Co. 1897. "The perfumes of Araby's shore..." (Ad). *Chicago Daily Tribune.* July 22. p. 7.
• ***Summary:*** "... May sound very nice in poetry, but they are not always safe." An ad for the original Caramel Cereal coffee substitute. Address: Battle Creek, Michigan.

118. *San Francisco Chronicle.* 1897. Oakland's busy fair has last night: The closing a gay one. Diploma's awarded to many exhibitors. Aug. 1. p. 24.
• ***Summary:*** Oakland, July 31. During the past month a busy exposition has thrived in Oakland at the Mills' Tabernacle. At the closing ceremony, "Regular diplomas" were given to many exhibitors including: "Mrs. M.C. Allen and Mrs. T.M. Abbott: health food cereals."

119. Battle Creek Sanitarium Health Food Co. 1897. Immensesensation: Chicago is stirred up by the grand free distribution of "Caramel Cereal." The original health coffee is now shedding fragrance in thousands of city homes (Ad). *Chicago Daily Tribune.* Aug. 4. p. 8.
• ***Summary:*** An advertorial for the original Caramel Cereal coffee substitute. Address: Battle Creek, Michigan.

120. Rorer, S.T. (Mrs.). 1897. The flour that makes the best bread. *Washington Post.* Aug. 29. p. 20.
• ***Summary:*** "The soft, fine white flour will not give as large an amount of muscle, bone, and nerve-making food and the

© Copyright Soyinfo Center 2021

whole wheat flour, which constitutes in itself a complete life sustainer. In selecting flour choose that which is dark in color and free from bran."

Note 1. This article also appeared in the Sept. 1897 issue of *Ladies' Home Journal.*

Note 2. This is the 3rd earliest article seen (April 2004) in a major American newspaper that mentions "whole wheat flour" (or "whole-wheat flour").

121. Battle Creek Sanitarium Health Food Co. 1897. A drink, not a dose (Ad). *Chicago Daily Tribune.* Sept. 14. p. 3.
• ***Summary:*** An ad for the original Caramel Cereal coffee substitute. "A true health beverage." Address: Battle Creek, Michigan.

122. New York Food Co. Named New York Health Food Co. in April 1896. 1897. Notice (Ad). *Indicator* (*New York Tract Society, Rome, New York; Seventh-day Adventist*) 7(37):4. Sept. 29.
• ***Summary:*** "Do you want
"Sanitarium Health Foods?
"Sanitas Nut Foods?
"Eureka Health Flour?
"Snow Flake Hominy?
"Roasted Wheat Flakes?
"Lentils? Split Peas?
"Choicest Cereals and Flours?
"Nut Butter?
Nuttose?
"Malted Caramels?
"Syrup of Malt?
"Nuts of Every Kind?
"Then send your orders to us. We make it our business. We keep posted. We have a stock on hand. Circulars and price lists free." Address: Oxford, New York.

123. Battle Creek Sanitarium Health Food Co. 1897. Housewives, beware!!! (Ad). *Chicago Daily Tribune.* Nov. 3. p. 7.
• ***Summary:*** "Caramel Cereal is a 'Health coffee, not a medicine. At all grocers. A print of the Sanitarium is on every package of Caramel Cereal. Any Cereal Coffee offered you without it is an imitation." Address: Battle Creek, Michigan.

124. *Denver Evening Post.* 1897. Queer restaurant: All sorts of diseases treated by a course of foods. Nov. 12. p. 2, col. C. [1 ref]
• ***Summary:*** From Kansas City Star: "On Regent street in London a great dietary grocery and restaurant has just been opened." Note: It is named the 'Birmingham Vegetarian Hotels and Restaurants, Limited.'

The "maidens who stand about ready to serve you... are wondrously intelligent looking women whose mission any one of them will assure you is to dispense scientific foods to suffering humanity." "We sell foods to correct nearly every disease you can name, from low spirits to galloping consumption;..." The store does not sell a drop of medicine in any form. Down in the big kitchen, every cook is an expert chemist.

"Soy flour, which comes all the way from China and is valuable, because it contains so small a modicum of starch, was in hot demand, and yet was run close by almond flour, another preparation of ground and powdered almonds from which almost all the starch had been eliminated."

"Down in our kitchen, were you permitted to visit there, you would find the bakers taking out loaves of delicious bread made of almost any possible material [other] than wheaten flour. Our best breads are made from nuts chiefly, and from soy, that is, a meal of beans ground up and then thoroughly digested in salt and water before it is ever cooked."

Note 1. This is the earliest English-language document seen (Jan. 2019) that contains the term "soy flour."

Note 2. This is the earliest document seen (July 2021) concerning the health food movement in the UK.

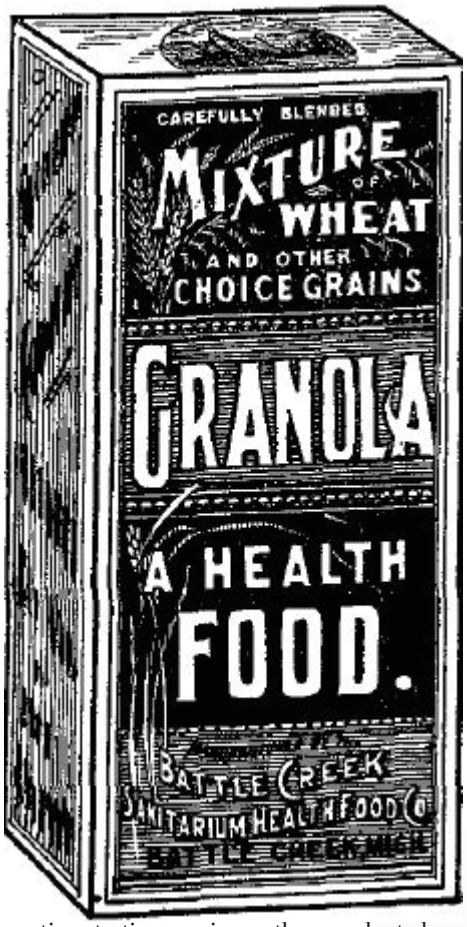
Note 3. This is the earliest document seen (July 2021) concerning a health food restaurant worldwide.

125. Battle Creek Sanitarium Health Food Co. 1897. Granola (Ad). *Gospel of Health* (*Battle Creek, Michigan; Seventh-day Adventist*) 1(11):2. Dec.
• ***Summary:*** See next page. A ¼-page ad. "Granola is a thoroughly cooked and partially predigested cereal food prepared from the choicest grains.

"Granola has a delicate, appetizing flavor.

"Granola is ready to serve.

"Granola is an excellent food for teething babies and for older children. It is a fine food for every member of the household.



"Granola is far better than beefsteak.

"A sample package free to those mentioning *Good Health.*

An illustration shows a large box of Granola. On the front panel we read: "Granola: A Health Food. Carefully blended mixture of wheat and other choice grains." Address: Battle Creek. Michigan.

126. International Medical Missionary and Benevolent Association. 1897. Year book. Battle Creek, Michigan. 176 p.
• ***Summary:*** The chapter titled "The Battle Creek Sanitarium Health Food Company" begins (p. 137): "Early in 1877, the managers of the Battle Creek Sanitarium began the manufacture of health foods. The first product introduced was that now commonly known as 'granola.' This new food soon established itself in the confidence of the public, and has steadily grown in favor, until at the present time it is manufactured and sold by the car-load.

© Copyright Soyinfo Center 2021

"From time to time various other products have been added, until forty-two different kinds of foods, including numerous varieties of crackers, biscuits, and packaged foods, are now made and offered for sale in the leading cities of the United States. The facilities, which at first consisted of nothing more than a common brick oven, have been gradually increased, until at the present time three factories are required to supply the growing demand. One of these is devoted exclusively to the manufacture of a cereal substitute for coffee; another is wholly devoted to the manufacture of breads; while the third, a large, new structure, equipped with the most modern machinery of every description useful in this line, is devoted to the manufacture of granola, crackers, biscuits, gluten, and other special preparations.

"The latest addition to this department is a complete milling establishment with a new and improved system, by which is manufactured flour greatly superior in quality to anything which has heretofore been made. The various cereal products of this department are, at present, made almost wholly from this flour.

"The Battle Creek Sanitarium Health Food Company is not conducted as an ordinary commercial business, but is carried on as a practical means of diffusing health principles in relation to diet, thus acting as an auxilliary to the Sanitarium in a double sense, not only furnishing the best foods for its family of more than one thousand persons, but annually sending out into all parts of the United States and to foreign countries, millions of packages of health foods, each of which acts as a practical missionary of health principles.

"During the past year this department has employed twenty agents, or food demonstrators, who have visited various points in the United States, not simply to make sales for a salable product, but to present the value of pure foods and the superiority of a well-chosen, well-prepared vegetarian dietary over one consisting of flesh foods, condiments, tea and coffee, and other unwholesome articles. These demonstrators, having received training in the Sanitarium School of Cookery and in the research laboratories of the institution, are well prepared to give the reasons for their recommendation of wholesome foods in the place of unwholesome ones, and prove themselves most efficient agents in the diffusion of health principles. During the year 1896, exhibitions were given in many of the principal cities of Michigan, Indiana, Ohio, Illinois, Wisconsin, Minnesota, Iowa, New York, Connecticut, and Massachusetts, and before many medical associations, and at numerous Pure Food Exhibits. Demonstrators are permanently located in New York City; Boston, Massachusetts; Philadelphia, Pennsylvania; Minneapolis, Minnesota; and Chicago, Illinois. Foods are shipped to many foreign countries, including Great Britain, Germany, Scandinavia, Africa, India, China, Australia, and the South Sea Islands.

"The demand for health foods is rapidly increasing. At the present time, two of the three factories of the company are obliged to run night and day to keep up with orders. The orders received and filled during the first ten days of 1897 amounted to more than forty tons. The sales of this department during 1896 aggregated more than $150,000.

"The earnings of this department, while not large, owing to the low price at which the foods are sold, compared with the cost of their manufacture, are still considerable, usually amounting to several thousand dollars annually. The total earnings of this as well as of other departments of the Sanitarium, are devoted to the charitable and philanthropic work of the institution, and to making necessary improvements."

A full page photo on the page just before this chapter shows a ground-level view of the "Manufactory of the Battle Creek Sanitarium Health Food Co." In front are four carts pulled by horses. A tall smokestack rises above the top. On the roof is a large sign that reads "Health Food Department."

The chapter titled "Missionary Nurses" states (p. 153-54): "Sister Anne Tabor has spent the last three years in the field, giving talks on healthful dress, diet, etc., holding classes in physical culture, and caring for the sick at times as occasion has required. For some time past her regular occupation has been that of demonstrating health foods in the large cities of the South and East, under the direction of

Brother Barton Huff manager of the Battle Creek Sanitarium Health Food Company, who conducts his work on missionary principles, and as a genuine missionary effort."

Note: This annual began publication in 1895. Address: Battle Creek, Michigan.

127. Johnsons' Directory of Kokomo, Indiana, for 1897-1898. 1897. Wilmington, Delaware: Johnson Publishing Co. See p. 75, 141.

• ***Summary:*** On page 76: Lane Bros. Health Food Co., cereal mfrs, 11 McCann, Kokomo. Lane, George B. (wife: Lillie) [Owner: Lane Bros. Health Food Co]. Their home is at 273 South Palmer.

In the business directory section under "Cereal manufacturers" (p. 141) we read: Lane Bros. Health Food Co., 11 McCann.

Note 1. The B.F. Jones' Kokomo Directory of 1889 (p. 56) lists the following people residing at 138 Lincoln, in Kokomo: George Lane, carpenter. Ira Lane, stone-mason. James Lane, huckster [one who sells goods along the street, or from door to door; peddler, hawker]. In the Directory of Kokomo (1894, p. 26), James Lane, George B. Lane, Miss Dora Lane, and Miss Hattie Lane all reside at 212 west Lincoln; no occupations are given. Ira Lane, works plate glass, resides on south Ohio ave.

Note 2. Kokomo is fairly widely known as "The city of firsts." America's first commercially built automobile was made in Kokomo in 1894 by Elwood Haynes; it is on display at the Smithsonian Institution in Washington, DC.

128. Kellogg, Ella Ervilla (Eaton) (Mrs.). 1897. Every-day dishes and every-day work. Battle Creek, Michigan: Modern Medicine Publishing Co. 184 p. Index. 22 cm. [2 ref]

• ***Summary:*** The text of this book is identical to that of the 1896 edition, and on the same pages. However the order and location of the ads are different.

The eight ads on unnumbered pages in the front of the book are for: (1) *Science in the Kitchen*, by Mrs. E.E. Kellogg. Published by Modern Medicine Publishing Co., 65 Washington St., Battle Creek, Michigan. (2) Universal Mercurial Dynamometer, developed by Dr. Kellogg for testing the strength of individual groups of muscles in the human body. From: Sanitary and Electrical Supply Co., Battle Creek. (3) *Home Hand-Book*, by Dr. J.H. Kellogg. Published by Modern Medicine Publishing Co. Over 1,700 pages and 500+ engravings. Describes the best means of preserving and regaining health. (4) Perfection vaporizer, from Modern Medicine Co. (5) Health Foods–Granola–a health food, an invalid food. From Battle Creek Sanitarium Health Food Co. (6) Health Foods–Granose, Granola, Caramel-Cereal, Battle Creek Sanitarium Breakfast Food, Germless Oats, Germless Wheat Grits, Germless Corn Grits, Crystal Wheat, gluten preparations, diabetic foods. Send for a catalogue and price list to Battle Creek Sanitarium Health Food Co. (7) "Almond Butter–A substitute for ordinary butter. Presenting fat in the form of a perfect emulsion. Combined with water it forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter. Send five cents for sample. From: Sanitas Food Co., Battle Creek. (8) "Nuttose–Pure product of nuts. Perfect substitute for all flesh foods. Makes fat and blood. In their natural state nuts are difficult to digest, and cannot be eaten by many persons... Nuttose has the consistency of cheese, and much the consistency of cold roast mutton, and may be eaten cold, stewed, cooked with vegetables or other foods, made into gravies and other preparations in the same manner as meat..." "Send ten cents for a sample can... Ready to eat at once. Keeps indefinitely." From: Sanitas Food Co., Battle Creek.

The last 8 unnumbered pages of the book contain more ads. Foods from Sanitas Food Co. in Battle Creek include: Almond Meal, Lac Vegetal or Nut Cream ("Prepared from the choicest nuts. A perfect substitute for cow's milk. Added to cow's milk, it increases its digestibility. Especially valuable for invalids and infants"), and Bromose ("Consists of nuts and cereals, in which the starch is perfectly digested... It is the most easily digested and most fattening of all foods.").

Other terms *not* seen in this book: Bran, roughage, dietary fiber, or fiber (but cellulose is mentioned in a table on p. 7).

A slightly enlarged edition (186 p.) of this book was published in 1898, and another in 1900 (copyright 1896). Address: Battle Creek, Michigan.

129. Newberry's. 1898. 'Lead in quality and quantity.' Battle Creek Health Foods are the best pure foods in the world (Ad). *Los Angeles Times.* Feb. 2. p. 7.

• ***Summary:*** "Granose Flakes–1-lb package 20¢. Granose Biscuits–1-lb package 20¢. Avanola–2 packages 15¢. Wheat Gluten–15¢ a package. Wheat Granola–2 packages 25¢. Zwieback–2 packages 25¢. Ralston Breakfast Food–2 packages 25¢. Selected Bran–4-lb package 10¢. Malted Nuts–1-lb package 65¢. Maltol–1-lb package 55¢. Bromose–1-lb package 50¢. Gluten Farina–3 packages 25¢. Caramel Cereal a fragrant and palatable drink, as a substitute for coffee–2 packages 25¢.

"The Hotel Green of Pasadena and San Gabriel Pulmonary Sanatarium are supplying their patrons with the famous Glen Rock Water." Note: An early record of selling bottled water. Address: 216 and 218 South Spring Street [Los Angeles, California]. Phone: Main 26.

131. *Lancet.* 1898. Health foods (The Sanitas Food Co., Battle Creek, Michigan. Agency: The London Food Co., 451, Holloway-Road, N.). ii:1061. April 16.
• ***Summary:*** "There are some novel and interesting dietetic preparations in the list of this company. They consist chiefly of foods prepared from cereals and from nuts. 'Granose flakes,' for example, consist of light brown flakes resembling potato chips, which on analysis present the composition of wheaten flour of superior quality–that is, flour in which all the essential food constituents are retained. The nitrogen amounted to 2.14 per cent., which is equivalent to a total of 13.37 per cent. albuminoids. The moisture amounted to 12.02 per cent, and the mineral matter to 2.09 per cent. The microscope showed the presence of starch granules highly distorted by cooking, probably by steam. The preparation is undoubtedly nutritious, not merely on account of its composition, but also because the constituents are partially prepared for the digestive process. 'Nuttose' is an oily looking compound prepared from nuts. The fat is in a finely divided state amounting to an emulsified condition, while the carbohydrates and nitrogenous matters are previously treated so as also to render them easy of digestion. 'Bromose' exhibits a composition balanced in accordance with physiological requirements. It is prepared in the form of tablets resembling caramels. It possesses a pleasant nutty taste, and here, again, the constituents are in a state favourable for assimilation. Lastly, the preparations submitted to us included 'Caramel Cereal,' which is offered as a substitute for tea or coffee. It consists of carefully roasted wheat and resembles coffee in colour and appearance and in the size of the grain. It yields on steeping in boiling water a rich infusion with aromatic coffee-like taste, which contains the nutritious constituents of the wheat berry.

"The preparations are of interest as indicating the steps which are taken to produce on a commercial scale foods in which the nutritive value is increased by the processes adopted."

Note 1. This is an early, scientific description of these popular foods made by Dr. Kellogg in Battle Creek, Michigan, but sold in England. Note 2. This is the earliest document seen (July 2021) that mentions "health foods" in England. Address: England.

132. *Vegetarian* (*The*) (*London*). 1898. When a vegetarian food manufactory starts up in the neighborhood of Smithfield Cattle Market,... April 23. p. 256.
• ***Summary:*** "... food reformers may take heart. Messrs. Marshall & Co., of 8, Carthusian Street, have sent us a tin of Malt Coffee, which is an extremely palatable beverage, and bids fair to rival the more popular caramel cereal."

133. *Brisbane Courier* (*Queensland, Australia*). 1898. Classified ad: Miscellaneous. April 27. p. 8.
• ***Summary:*** "Drink Caramel-Cereal! Elegant, fragrant, harmless, and perfect substitute for coffee. Sanitarium Health Food and Supply Agency, Matthewson's Photographic Lobby, Queen-street."

"Eat Nut Butter, delicious, germ-free, non-bilious preparation, a necessity where meat is prohibited. Sanitarium Health Food and Supply Agency, Matthewson's Photographic Lobby, Queen-street."

Note: By May of this year, the address is given more specifically as "123 Queen-street."

134. *Brisbane Courier* (*Queensland, Australia*). 1898. Classified ad: Miscellaneous. April 28. p. 8, cols. 6-7.
• ***Summary:*** "Drink Caramel-Cereal! Elegant, fragrant, harmless, and perfect: substitute for coffee. Sanitarium Health, Food, and Supply Agency. Matthewson's Photographic Lobby, Queen-street."

"Eat Nut Butter, delicious, germ-free, non-bilious preparation, a necessity where meat is prohibited. Sanitarium Health, Food, and Supply Agency. Matthewson's Photographic Lobby, Queen-street."

"Choice Health Foods.–Invalid Supplies and Perfection Vapourisers. Sanitarium Health, Food, and Supply Agency. 123 Queen-street, next [to] Royal Bank."

135. *Vegetarian Messenger* (*Manchester, England*). 1898. Home: Birmingham. April. p. 188.
• ***Summary:*** "A company named the 'Birmingham Vegetarian Hotels and Restaurants, Limited,' has been formed for the purpose of establishing and carrying on a vegetarian hotel and restaurant in Birmingham. The company has acquired commodious premises in the centre of Birmingham, and the hotel is to be known as the Pitman Hotel, which will be conducted on strictly on strictly Vegetarian and Temperance lines. The whole of the basement, with an area of 1,500 square feet, and providing accommodations for 150 persons, will be made into one large dining room and restaurant. Sixpenny dinners (three courses) will be a special feature, and it is also proposed to establish a fruit store."

Note: This is the earliest document seen (July 2021) that mentions a vegetarian hotel or fruit store to be established in Birmingham, England in connection with the name "Pitman" or the Pitman Hotel. Later articles in this magazine strongly suggest that all three opened for business (with a banquet and speeches) on the same date, 20 Oct. 1898.

136. Kellogg, John H. 1898. Process of producing alimentary products. *U.S. Patent* 0,604,493. May 24. 2 p. Application filed 16 Feb. 1897.
• ***Summary:*** "My new and improved product is made from edible nuts, preferably peanuts... and is a semisolid, having about the same consistence as hard butter or soft cheese."

The process consists in "blanching and thoroughly cooking nut-kernels, and reducing them to a pulp, then

© Copyright Soyinfo Center 2021

adding water, and sealing the pasty mass in cans, and subjecting such cans to the action of steam at a temperature ranging between 213º and 240º Fahrenheit, for a considerable period, that is to say until the mass becomes changed or modified, as specified."

"The product may be cut up in thin or thick slices like cheese and served as desired." Address: M.D., Battle Creek, Calhoun County, Michigan.

137. **Product Name:** Nuttolene (Meatlike or Cheeselike Product Made from Nuts–Mostly Peanuts, No Soy).
Manufacturer's Name: Sanitas Nut Food Co. from 1899. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1898 May.
Ingredients: Mainly peanuts.
New Product–Documentation: *Food, Home and Garden* (Philadelphia, Pennsylvania). 1898. "Nuttolene." May. p. 74. "This is a new product of the Sanitas Food Co., Battle Creek and is a solid substance that can be sliced like cheese which it somewhat resembles in flavor. It is also good for sauces having a rich flavor."

Stewart, Charles E. 1900. "Chronic constipation, a symptom resulting from a disordered state of the sympathetic nervous system. Its causes and cure." *J. of the American Medical Association* 34:1306-10. May 26. "Nuts, in order to be of service, should go through a special process of preparation. At the present time such specially prepared nut foods as protose, nuttolene, malted nuts, granuts, bromose, and a number of others can be found on the market."

138. *Advent Review and Sabbath Herald.* 1898. Ontario [Canada]. 75(25):399. June 21.
• ***Summary:*** "Brother T. Robinson is also present with a fine line of health foods manufactured by the London Health Food Company.

Note: This is the earliest document seen (July 2021) that mentions the London Health Food Company (in London, Ontario, Canada, run by Seventh-day Adventists). When did it start? What foods did they manufacture? Did they import any of the health foods made in Battle Creek, Michigan?

139. *Advent Review and Sabbath Herald.* 1898. Ontario camp-meeting [Canada]. 75(26):414. June 28.
• ***Summary:*** "The Ontario camp-meeting was held June 9-19 at St. Thomas, a city of about twelve thousand inhabitants."

"The Ontario Tract Society and the London Health Food Company had a tent for the display of books and health foods. The sales were good. The vegetarian dining tent was well patronized."

140. *Good Health* (*Battle Creek, Michigan*). 1898. A new bread for diabetics. 33(6):391. June.
• ***Summary:*** "There is probably no single dietetic need which has received more attention, with fewer satisfactory results, than the preparation for diabetics. Bran bread is unpalatable and irritating, and has about the same nutritive value as sawdust. Pure gluten is tasteless, unpalatable, tough, and almost inedible. The so-called gluten breads are almost without exception unmitigated frauds... Some attempts have been made in France to manufacture a bread from the vegetable casein or legumin of peas or beans, but the results have been by no means satisfactory.

"The Sanitarium Health Food Co. has at last solved this difficult problem by producing a bread made by combining pure gluten and nuts. One of the most characteristic properties of nuts is the absence of starch. Nuts, in fact, consist almost exclusively of proteids and fats. They are, in this respect, a vegetable analogue of fat meat."

"Nut Gluten Biscuit are especially adapted, not only to persons suffering from diabetes, but to those who need a rapid gain in fat and blood."

"The Battle Creek Sanitarium Health Food Co. will be glad to send free samples to any physician or trained nurse who may desire to test this new food. Others may receive a small sample by sending to the address of the company a two-cent postage stamp."

141. Kellogg, John Harvey. 1898. Re: Medical missionary work, use of the tongue in diagnosis, and work with nuts. Letter to Ellen G. White, "Sunnyside," Cooranbong, N.S.W., Australia, July 29. 5 p. Typed, with signature.
• ***Summary:*** The letter, written on ornate Battle Creek Sanitarium letterhead (illustrations show two views of the "San") and addressed to "Dear Sister White," begins with a discussion of Dr. Kellogg's views of the importance of medical missionary work by the General Conference and its president Eld. [Elder] Irwin who is "a thorough-going health reformer. At the college View Conference last year he showed me his tongue. It was thickly coated, about the worst looking tongue I ever saw. He complained of constant pressure and headache, and was laboring under great difficulties. I called his attention to the fact that he was using milk and cream. I advised that he discontinue them and take a diet of fruits, grains, and nuts as a source of fat and albumen, and take once in a while a meal of fruit only. He adopted this plan with most excellent results.

"We have continued our experiments with nuts until now we are able to dispense with butter, milk, and cream altogether. In our Health Food department, we no longer use any animal fat of any kind but shorten our crackers, rolls, etc. with nuts and with such excellent success every one pronounces them more palatable and excellent in every way. I feel more thankful than I can say that we are at last delivered from the Beast entirely in diet at any rate."

Note 1. The preceding paragraph suggests that Dr. Kellogg was developing peanut butter, peanut milk, and

© Copyright Soyinfo Center 2021

peanut cream. If so, this is the earliest 2nd document seen (Jan. 2020) that refers to peanut milk.

Note 2. The letterhead states that the medical staff at the Sanitarium and hospital includes: J.H. Kellogg, M.D.; Kate Lindsay, M.D.; Lou C. Cleveland, M.D.; David Paulson, M.D.; Ruth O. Bryant, M.D.; D.H. Kress, M.D.; G.H. Heald, M.D.; Lauretta Kress, M.D. Abbie M. Winegar, M.D.; Howard F. Rand, M.D.; C.E. Stewart, M.D.

Note 3. The original letter is in the Ellen G. White Papers, Incoming papers, Ellen G. White Estate, Inc., General Conference of Seventh-day Adventists, 12501 Old Columbia Pike, Silver Spring, Maryland 20904-6600. Address: M.D., Superintendent, Battle Creek Sanitarium, Battle Creek, Michigan. Phone: Nos. 135, 45, 188.

142. Emporium and Golden Rule Bazaar (The). 1898. Display ad: Groceries–How housekeepers can save money. *San Francisco Chronicle*. Aug. 7. p. 17.
• ***Summary:*** Among the 25 foods listed is: "Grape Nuts, the new health food, pkg.–20¢."

Note: Grape Nuts is a breakfast cereal developed by C.W. Post in 1897–two years after he invented Postum. He advertised both foods extensively as "health foods"–following the lead of his mentor Dr. John Harvey Kellogg. Address: [San Francisco, California].

143. Sanitas Nut Food Co., Ltd. 1898. Twentieth Century Foods (Ad). *Chicago Vegetarian* 2(12):Back cover. Aug. Address: Battle Creek, Michigan.

144. *Advent Review and Sabbath Herald.* 1898. Ontario [Canada]. 75(43):687. Oct. 25.
• ***Summary:*** Under London, Ontario: "The London health food factory is prospering beyond the company's expectation. The sales have been steadily increasing until for the month of September alone they reached $600. The company are fully satisfied that this enterprise was established in the providence of God, and will be an important factor in the missionary work in Canada."

Note: This is the earliest document seen (April 2016) that mentions the London Health Food Factory (in London, Ontario, Canada, run by Seventh-day Adventists). When did it start? What foods did they manufacture? Did they import any of the health foods made in Battle Creek, Michigan?

145. *Vegetarian* (*The*) (*London*). 1898. Birmingham leads the way. Opening of Pitman Hotel and Restaurant. Oct. 29. p. 689-91.
• ***Summary:*** This article was written by "Our special correspondent." "When you come to think of it, a first-class, properly-managed Vegetarian Hotel, Restaurant, and Stores must constitute the very best means possible for spreading Vegetarianism. The guests are first of all charmed by the novel and dainty cookery obtainable in the Hotel and Restaurant, and they are then told that they can get the self-same materials from the Stores, materials from which they can reproduce the self-same dishes in the seclusion of their own homes."

"The 'Pitman' Hotel, at Birmingham, "starts under most favorable auspices for it possesses the above-mentioned combination–hotel, restaurant, and stores. The institution was formally opened by Mr. Arnold Hills on Oct. 20th, and so impressed was he and several others with the successful and satisfactory nature of the undertaking that the wish was many times reiterated that a similar institution should be opened in every important town in the [United] Kingdom."

The "organizers have been extremely fortunate in their choice of manager and manageress; both these officials have their hearts thoroughly in their work, and are palpably anxious to spare no pains, no time, no energy, in making the business a thorough success."

An "offer has been made from an influential quarter of £240 per annum for the twenty-one years' lease.

"And now that a School of Cookery is about to be established we shall be able to secure a thoroughly trained *chef* for every Vegetarian Hotel which may be started.

"The building: The Hotel is entirely distinct from the Restaurant and retail shop; it is approached by a handsome teak staircase which leads to each floor of the building. On the first floor are the Coffee Room, Commercial Room, and Smoke Room, with manager's office at the top of the staircase. The other floors contain twenty-one airy and well-lighted bedrooms and sitting rooms... no expense has been spared to make the hotel as complete as possible for the high-class business which it is proposed to carry on.

"Exteriorly, the building is very attractive and the whole forms one of the most striking designs in Corporation Street. The design is Later Renaissance, in which modelled friezes and carefully designed low relief ornament have been introduced in such a way as to obtain the greatest value."

"The restaurant portion and retail shop consists of the basement, approached from Corporation Street, about 38 ft. by 45 ft. square. It is well lighted and the wall linings are of Majolica tiles, in quiet tones." The floor is of Venetian marble mosaic." "On this floor is a large restaurant with retail shop for the sale of high-class fruit, and with a private room for the manager.

"The kitchen has been furnished with a steam cooking apparatus, the cost of which, I understand, approaches the neighborhood of a thousand pounds. Below the kitchen in the boiler, and below that is yet another basement, which contains the furnace."

"The managing director interviewed:" Mr. Cook is a very busy man. The retail store opened on Saturday Sept. 17th, and the hotel was opened on Sept. 19th. The hotel is presently nearly full of guests. The hotel started without a smoking room as the directors preferred, but some of the commercial men "threatened to leave if one was not

© Copyright Soyinfo Center 2021

supplied," so the management "gave way and fixed up a room for them."

The Cobden Temperance Hall [a hotel] is in the neighborhood. But the rooms are smaller and the corridors narrower. Moreover, the Pitman Hotel is firmly opposed to the custom of tipping for service; inside porters and waiters are paid a fair wage by the hotel.

The restaurant on the ground floor fills up each day but the large one is in the basement "not yet quite ready for the public... I expect to easily fill our whole available space, for the only other purely Vegetarian restaurant in the town is about to close owing to the expiry of the lease."

Mr. Cook, a born organizer, "has never married as he has his heart and soul in philanthropic work" and does not want to take on any responsibilities that might distract from that.

Note: Mr. Cook later married and had a daughter named Kathleen (born in about 1908), who wrote a book titled "The First Century of Health Foods," which was dedicated to her father, James Henry Cook, and published in 1996.

The dinner: About 150 guests sat down to dinner. The menu for the 21-course meal is given. Speakers included T.C. Lowe (the chairman, who thanked the Society [corporation that sold shares] which had made the erection of the building possible), Mr. Arnold Hills (a wealthy industrialist, ardent vegetarian, and publisher of this magazine), Councillor Joseh Malins, Miss Anstey (all 3 Pitman enterprises here were being managed by Vegetarians and were expected to make money), Mr. Banks ("But for Mr. Hills' open-hearted generosity, the 'Pitman" would not have come into existence"), Mr. Albert Broadbent (who also thanks Mr. Hills).

An illustration (line drawing) shows the high-ceilinged dining room as Mr. Hills delivers his address.

146. *Kokomo Dispatch* (*Indiana*). 1898. Bucking the cow: Butter from peanuts and how it is manufactured. A Kokomo product growing in demand–locks horns with the farm cow in many markets. Nov. 12. p. 2, col. 3.

• ***Summary:*** "Out on Courtland avenue, near the Palmer school-house, stands a curious little factory. It is a modest frame edifice of one story, architecturally speaking, but it has another story but little known even in the immediate neighborhood of its location. This factory is engaged in the manufacture of butter from peanuts, a rather queer procedure one might say, but nevertheless a real, genuine occupation, started up in opposition to the saffron Jersey "sookey" [sookie, used as a call to cows] of the farm barn. The little peanut butter factory stands just across the street from a large dairy barn, which location gives evidence that the 'goober' is bearding the lion in its den [boldly confronting, opposing, and defying a powerful opponent].

"The butter made from peanuts is hairless. Like Samson shorn of his locks, the peanut butter does not attain the prodigious strength that the product of the cow is capable of, especially of the kind that frequents cheap boarding houses and depot restaurants of neighboring towns.

"The proprietor of this new industry is George B. Lane (formerly Lane Brothers), and he is doing a thriving business. The process of manufacture is simple, but interesting. Nearly a year ago Mr. Lane began in a small way to convert peanuts into butter, using Georgia and Virginia nuts, but he soon discovered that the American grown 'goobers' did not fit the bill. He now uses the Spanish nuts grown at the Philippines, Cuba, and Porto Rico.

"At the present cost of the tropical bean the butter is made and sold at fifteen cents per pound, and if these islands become American possessions the butter will be less expensive.

"Mr. Lane makes no secret of his process, and anybody who has the machinery and understands the business can make the butter. The hulled peanuts are carefully hand-picked to remove all the imperfect grains, after which the nuts are put into a baker's rotary oven and roasted to a rich brown color. After roasting the nuts are again gone over by hand to rid them of scorched and faulty ones. They are then put into a hopper and ground to the finest of flower. The product comes from the mill looking very much like putty, the natural oil of the nut giving it that consistency. This completes that manufacture, nothing being added, not even salt. It goes into the mill a peanut and comes out butter. It never goes rancid, keeps in any climate and does not stale with age.

"The butter is put up [packed] in one, two, five, ten, twenty-five and 100-pound cans and sealed. It is used for every purpose cow butter is used and is said to be an excellent substitute for the output of the cow. Rich 'Jersey' cream is also made by reducing the butter with pure water. Sky-blue milk, if wanted, will appear through the liberal application of water in the reducing process.

"The peanut butter is in great demand at health resorts and sanitariums throughout the country. It also finds favor with camping parties. Mr. Lane recently filled large orders for the annual camp meeting of the Indiana Baptists at Logansport and Rushville, and had the Spanish war lasted a little longer the butter probably would have been in use in feeding the United States soldiers–a ration the boys would have appreciated, as no butter of any kind was issued to them. The new butter is very pleasant to the taste, and physicians say it is more healthful than that produced by the cow.

"Mr. Lane also manufactures Lane Bros.' cereal, graham crackers and other health foods, having quite a large trade in Indiana and adjoining states."

Note: Mr. Lane roasts his peanuts, whereas his mentor, Dr. Kellogg, at Battle Creek, Michigan, did not.

147. Bryan (C.C.). 1898. Classified ad: Ralston Health Food. *Washington Post.* Nov. 28. p. 4.

© Copyright Soyinfo Center 2021

• ***Summary:*** "A delicious breakfast dish that both sick and well may enjoy. Ralston Health Biscuits in cartons–all kinds of New Cereals just in–some of them cooked and ready for the table." Address: 1412 N.Y. Ave.

148. Dominion Health Food Co. 1898. Something good to eat (Ad). *Evening Star* (*Toronto, Ontario, Canada*). Dec. 15. p. 5.
• ***Summary:*** "We have opened at 320 Yonge Street a branch store for the sale of the famous Battle Creek Sanitarium Health Foods.

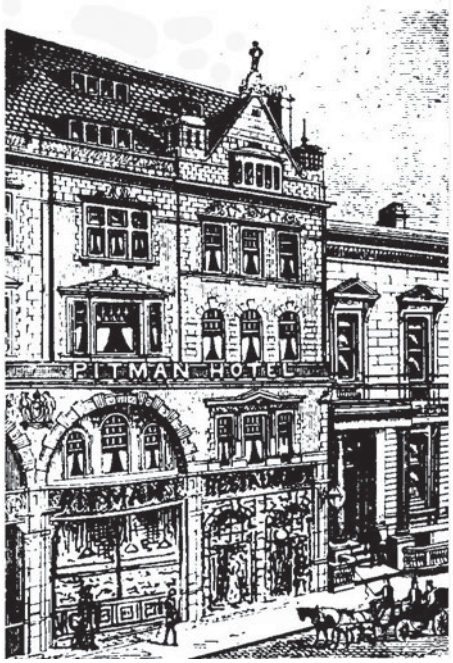
"We invite our friends and the public generally to call, examine and sample these delicious cereal and nut products. Nothing like them on the market."

The bottom half of the ad is taken up with the following very large white text on a black background: "Eat Granola and Granose. Drink Caramel Cereal" [a caffeine-free alternative to coffee]. Address: 320 Yonge St., Toronto. Phone: 8255.

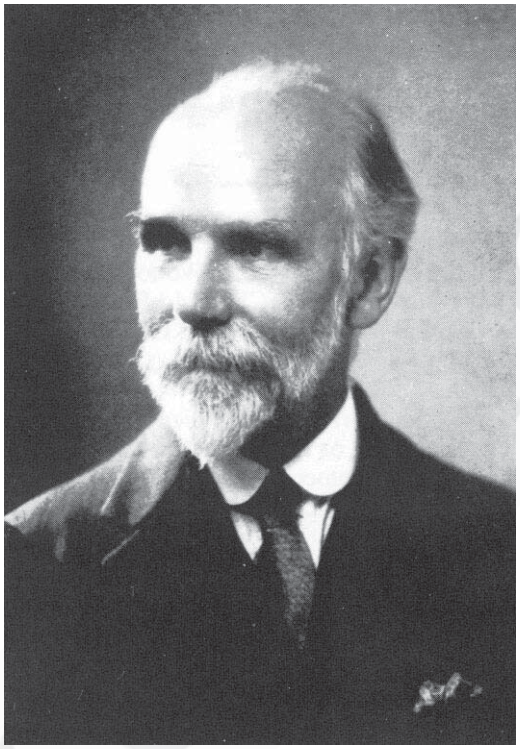
149. Birmingham Vegetarian Hotels & Restaurants, Ltd. 1898. "Pitman" Stores price list. Birmingham, England: 21 p.
• ***Summary:*** A facsimile of this first Pitman catalog appears after page 16 in the book: Hill, Ray. 1998. *The Health Food Store: A Nostalgic Look at the First–Its Origins, Philosophy and Development.* Gloucestershire, England: NuHelth Books.

The catalog has a blue cover, printed with black ink on the front and rear. Then next 23 pages show the contents of the catalog, which are the foods sold at the "Pitman Store" located on the ground floor of the "Pitman Hotel and Restaurant," located at 159, Corporation Street, Birmingham, England–next to the County Court.

At the top of the front cover is written: "Fruits, Cereals, Italian Goods, Vegetarian Specialties, &c. &c. The date, December 1898, appears at the bottom of the front cover. An illustration of the hotel, restaurant and store building appears on the inside front cover.



The first two pages of the catalog discuss: Good sold. Quality of Goods. Terms. Delivery. Postage. Standing orders. Lists. Parcel Post Rates. The rest of the catalog is the "Price List." The goods (mostly foods) are listed in alphabetical order. Some interesting items are: Agar agar (Vegetable gelatin for jellies). Almonds (7 types). Apples (8 types). Beans (6 types, not including soy). Blanc Mange Powder (Dr. Allinson's). Bottled fruits. Breakfast food (for invalids). Bromose (Malted nuts for Consumption, &c.). Butter (5 types). Caramel Cereal (Tea or coffee substitute made from wheat). Chutney (10 types). Flour (10 types, incl. wholemeal). Granose biscuits, Granose flakes. Jams and preserves (2 pages). Ketchup (mushroom, walnut, tomato). Milk ("Ideal," unsweetened in tins). Nut butter. Nuttose ("Product of nuts; a perfect substitute for meat, and much more nourishing"). Nuts. Oil. Parmesan cheese. Peas. Pea flour. Peanuts. Rice. Sago (small, pearl, bullet). Wheat. Wheatose.



On the inside back cover (also black ink on blue) is a full page of vegetarian literature, especially vegetarian cookery. Most of the publication sell for one penny each, but some larger ones are threepence each, and nine books are tenpence each. The back cover is the same as the front cover.

As Ray Hill explains on page 3 of his book, the man behind this catalog and the concept of a health food store was James Henry Cook, a portrait photo of whom appears on page 4 of Hill's book.

An Illustration of the Pitman Hotel and of James Henry Cook have been added from *The First Century of*

• ***Summary:*** In the section titled "Breakfast foods," page 1343 states:

"15325. Ralston Health Club Breakfast Food, indorsed [sic] by Ralston Health Club, Martyn College, Washington D.C. Manufactured by Robinson-Danforth Company, proprietors, Purina Mills, St. Louis, Missouri. 'A perfect food made from selected wheat, rich in gluten.'

"15326. Granose Flakes. Manufactured solely by the Sanitarium Health Food Company, Battle Creek, Michigan. 'Represents the entire wheat berry undeteriorated by any milling process and thrice cooked, whereby the starch is largely converted to dextrin.'

"15329. Granulated Rye. Manufactured by the Health Food Company, 61 Fifth avenue, New York. 'Made from the best rye, hulled by the wet process and reduced to a granular meal without the injurious heating of millstone grinding.'" Address: Chief Chemist, USDA.

153. *Vegetarian Messenger* (*Manchester, England*). 1899. The Pitman Hotel, Birmingham. Jan. p. 15-17.
• ***Summary:*** On 20 Oct. 1898, the "Pitman Vegetarian Hotel and Restaurant opened in Birmingham. Splendidly equipped, it has already achieved a considerable measure of success–and is yet another sign that "the future is with the vegetarians."

At the opening banquet, "Mr. T.C. Lowe, of Birmingham, a vice-president of the Vegetarian Society, was in the chair. Mr. Arnold F. Hills, President of the Vegetarian Federal Union, was the guest of the evening and made an eloquent speech. Other speakers were... Mr. Broadbent (Secretary of the Vegetarian Society). A good report of the evening's proceedings appeared in the columns of our contemporary, *The Vegetarian.*

"The building: The exterior of the building is very attractive and the whole forms one of the most striking designs on Corporation Street. The design is Later Renaissance." The remodeled building "has been described

© Copyright Soyinfo Center 2021

as one of the most successful pieces of architecture in Corporate street." A detailed description of the stairways, bedrooms, bathrooms, and sitting rooms is given. No "expense has been spare to make the hotel as complete as possible for the high-class business which it is proposed to carry on."

The vegetarian restaurant and retail shop are entirely distinct from the hotel; the former occupy an area 38 ft. by 45 ft. on both the ground floor and the basement, and are of the finest quality design and materials. The "food is temptingly served, the table artistically laid, and graced by the kindly manageress." The retail shop features high-class fruit and almost every other specialty item used by vegetarians, "a testimony that in regard to food all the avenues of pleasure are not closed to them."

"The dining room is spacious and there is a cosy [cozy] and luxurious sitting room and a smoke-room for those 'commercials' who are slaves to the 'weed'" [tobacco].

"Mr. J.H. Cook is the managing director, and his devotion to vegetarian principles and determination to see the Pitman successful are conditions that must ensure success."

Note: This article is based on a longer one that first appeared in *The Vegetarian* (London) on 29 Oct. 1898 (p. 689-91) titled "Birmingham leads the way: Opening the Pitman Hotel and Restaurant."

Illustrations show: (1) A small portrait of Sir Isaac Pitman. (2) The front of the hotel as seen from Corporation Street. A flag is flying from one of the turrets and there are horses and carriages on the street.

154. *Phonetic Journal* (*The*) (*UK*). 1899. Midland District. Feb. 25. p. 115.

• ***Summary:*** "The Midland Association secretaries and delegates sat down to an excellent tea at the Pitman Hotel, Corporation street, Birmingham, on 4th Feb., kindly provided by the Midland District Chairman Mr. H.E. Parkinson (Derby)... a cordial expression of thanks was accorded to Mr. Parkinson for his hospitality.

Note: This is the earliest document seen (June 2009) that mentions the Pitman Hotel, which was associated with the early health food movement in England. The hotel was located nearly opposite the Grand Theatre. Sir Isaac Pitman of shorthand / phonetic fame died on 12 Jan. 1897. On 20 Oct. 1898 this hotel was officially renamed the Pittman Vegetarian Hotel and Restaurant (see *Vegetarian Messenger.* 1899. Jan. p. 15-17).

This hotel in Birmingham is also mentioned in this periodical in 1899 on Aug. 19 (p. 518), Oct. 28 (p. 685; "A room has been engaged at the Pitman Hotel which is much more suitable to the needs of the society [Midland District, Teachers' Section] than the old meeting place..."), Nov. 11 (p. 710; "The society has decided to make the Pitman Hotel their permanent abode"), Nov. 25 (p. 741). Address: England.

155. Kellogg, J.H. 1899. Good and bad foods: Milk as food–Three kinds of cooking–Experiments showing starch digestion–Peanut butter–International Health Association. *Daily Bulletin of the General Conference* (*Worcester, Massachusetts*) 8(15):151-52. March 5.

• ***Summary:*** This is the text of a talk by Dr. John Harvey Kellogg on Thursday, March 2.

Milk: "The other day a good brother asked me if I could recommend the use of milk; and I remarked that milk is good for calves. *The fact is, so far as my observation* is concerned, that milk is not good for any class of beings but calves,–that babies or adults who are compelled to live on milk will suffer the consequences. The large share of stomach troubles and bowel difficulties of many babies is due to cow's milk... But it is an unfortunate thing for any person to be obliged to live on cow's milk. The reason for this is that mother's milk, the natural food of the child, forms in the stomach of the child small, soft, flaky curds, which are easily digested, Cow's milk, on the contrary, forms large, tough curds. I once saw a man who nearly lost his life from taking milk."

"Cow's milk is the filthiest thing that comes to our tables. Suppose water had so much filth in it, so much barnyard manure, that you had to strain it through a cloth before you would dare drink it. You would have the water

© Copyright Soyinfo Center 2021

condemned. No one would drink it... We have no use for milk at our house. Our babies do not want it, and we have not used it for a year or two.

Page 152: "The great difficulty with the vegetarian diet is that, in the first place, people felt the need of something else; and some have endeavored to make up for the quality with quantity, and have partaken of many kinds of mushes, and sugar, and syrups, and various sweets, thereby imagining that they were making an improvement, whereas they were practicing the worst kind of health reform. In fact, it was not health reform at all, but as Sister White has said, health deform..."

"There is no starch in peanuts. Peanuts are not nuts; they are legumes, and belong to the same class as peas and beans.

"Now I want to tell you how to make nut butter. Shell the nuts. Take off the skins by putting them in the oven and heating sufficiently to shrink the nuts, when the skins can be rubbed off; then crush them. Nuts do not have to be roasted in order to remove the skins. It is only necessary to dry them. The mistake that is made in making nut butter is roasting the nuts. They should not be roasted; for roasted nuts, like fried doughnuts, are indigestible. Now the question is, How are you going to make butter out of peanuts without this roasting process? I want to say that other kinds of nuts besides peanuts do not require roasting. You can make butter out of almonds, walnuts, hazelnuts, and other kinds of nuts, without roasting. But the peanut must be cooked, for it is raw. There is a process by which it can be done without roasting the nuts.

"At the sanitarium we do not use peanut butter made from roasted nuts; we do not consider it wholesome. A great many people know from experience that roasted peanut butter is not wholesome. I will tell you how you can make nut butter without roasting the nuts. It is a very simple way, and you will not need any machinery at all. Remove the skins, as explained; then take the nuts, with an equal quantity of water, and put in a covered dish; set in an oven, and let them bake for several hours. If the nuts get too dry, add a little water, and cook until the water is evaporated. Rub the cooked nuts through a colander, add a little salt if you like, and you have the most delicious nut butter you have ever tasted in your life. It is perfectly digestible, too.

"At Battle Creek we are manufacturing a blancher, which we shall be able to furnish in a short time, that anybody can use in removing the skins from peanuts. After cooking them until the kernel will shrink, they can be put in a bag, and rubbed until the skin is removed. I hope that our friends in the South will take up this peanut industry, and raise peanuts and manufacture products that they can sell to their neighbors. Other people are recognizing that it is a good thing, and people of other countries are taking it up. The manufacture of nut butter is not controlled by any sort of patent. Some years ago I saw that such a thing might be done; but I did not think it was a good thing to do. I thought it was a thing that the world ought to have; let everybody that wants it have it, and make the best of it. With nut butter, you can get everything you really need. You do not need to buy other nut products unless you want to.

"For several years I have been paying more attention to the matter of getting the health foods into the hands of our people. I believe they are interested in a dietetic reform; and if those foods could be procured at a small cost, they would largely use them. The trouble has been to find how we could sell at one price to one man and at another price to another man. Now we are sending out from Battle Creek about a thousand dollars' worth of foods every day. These foods are sent to all parts of the world. The most of our foods are sent to people who have no special interest in diet reform. Seventh-day Adventists buy a small fraction of the foods that are manufactured. The world loves these foods and is making use of them. We are sending these foods to Boston, to New York, and to other large cities. We sometimes send four or five car-load orders at once; and our cereals and nuts are bought in ten and fifteen car-load lots.

"Now the question has been, How can we sell all these at one price to one man, and at another price to another man? We could not say that we would sell to one man at one price because we like him, and to another man that we do not like at another price. The retail price has to be large enough to pay the manufacturer, the wholesale jobber, the jobber, the traveling agent, and the retail dealer. All these men take a tax on these foods for passing them along. Now the question has been how to get these foods to people who want them for their own use, and to furnish them at the smallest cost consistent. We propose to organize the International Health Association, and make every person that wants to be a member of this association declare himself to be a believer in the principles of health reform. It is a declaration, not a pledge. He simply says that he believes so and so; and if he does that we take him into our association. We will have a bureau–there will be several bureaus, and one of these will be a food bureau. Those who wish to join the association will pay one dollar, and receive *Good Health* regularly in return for it, and get all of their health foods at half the retail price. Each one obtaining the foods in this way must use them himself; he must say, I want these for my own use. All those who are interested in this plan will receive further information by writing to the Food Reform Bureau, Battle Creek, Michigan. It is expected that this bureau will be fully organized, and set in operation, at the meeting which will be held at Battle Creek next week.

"Different states can have headquarters if they wish to. If several persons want to club together, they can do so, and have the orders sent together.

"[Voice: Do you consider it unwholesome to eat nuts without blanching?]

"No, because the nut was made to be eaten raw. The grains were made to be eaten raw too. You may be surprised

© Copyright Soyinfo Center 2021

at that. It is only that half-cooked starch that makes trouble. Raw cabbage can be eaten by some when cooked cabbage can not be eaten. So long as the thing has life in it, it will not decay; but when you cook it and kill it, it begins to decay..."

"I thank the conference very much for your kind attention."

Note 1. From this article / talk we can see clearly that, at this time, Kellogg advocated a vegan or plant-based diet.

Note 2. This is the earliest document seen (June 2015) that discusses the origins of Granose Foods (a Seventh-day Adventist company) in England. Address: M.D.

156. White, Ellen G. 1899. Re: Work with health foods, including peanuts. Attitude toward nuts (1868-1876). Letter to John Harvey Kellogg, M.D., Superintendent, Battle Creek Sanitarium, Battle Creek, Michigan, April 17. 1 p. Typed, without signature.

• ***Summary:*** "As yet we have received only two hundred fifty pounds from the Echo office. Special direction was given in regard to the manufacturing of health foods, but lately we have not had money to invest in peanuts for our own family. We eat no meat or butter, and use very little milk in cooking. There is no fresh fruit in this season. We have a good yield of tomatoes, but our family think much of the nuts prepared in a variety of ways. For many months my food has been uncooked tomatoes and bread."

Note 1. This is the earliest use of the word "peanuts" see in the collected papers of Ellen G. White, co-founder of the Seventh-day Adventist church. The full text of all her letters and diary entries has been computerized and this fact is the result of a search conducted by the Ellen G. White Estate. This letter is cited as follows: Lt 73, 1899. The original letter is in the Ellen G. White Papers, Ellen G. White Estate, Inc., General Conference of Seventh-day Adventists, 12501 Old Columbia Pike, Silver Spring, Maryland 20904-6600.

Note 2. Ellen White's attitude toward nuts seems to have changed over the years. She first uses the word "nuts" in a letter to James Edson White [her eldest child/son; Willie was her youngest son] dated 27 Feb. 1868. "I have frequently asked myself what you could have done with so much money. Edson, I am answered in a dream, you are not a health reformer in principle. You do not live up to the light God has given and while you neglect one ray of light that the Lord has graciously permitted to shine upon your pathway, you will be in darkness. When you boarded yourself, did you not spend money for nuts, candies, and hurtful things and eat these between meals and at any time? I concluded that your frequent headaches were caused by the indulgence of your appetite. You gratified the taste to the injury of the stomach..." (Letter 5)

Again in July 1874, in an undated letter to Brother and Sister Abbey, she states: "You have fostered a perverted appetite by indulgence. You have allowed her to eat between meals, to fill her pockets with nuts and crackers, and to have the third meal, eating sometimes late at night. How can you expect her to have a healthy relish for coarse and healthful food? I understand her father has bought Lillie white baker's bread to tempt her delicate appetite, and at night she has eaten this baker's bread and butter in the cellar with Nellie Matthews. Is this in accordance with the principles of a health institute?" (Letter 65).

Again on 12 June 1876, in a manuscript, Ellen White states: "We were pained to hear the mothers' fretful chiding, as they sought to hold in check the outbursts of temper exhibited by the children. But these mothers did not control themselves; how then could they expect their children, with their perverted habits, to have tranquil tempers. Both parents and children ate at irregular intervals all through the day, after eating heartily three times a day. The boy on the cars who sold cakes, candies, nuts, and fruit was freely patronized by the indulgent parents." Address: "Sunnyside," Cooranbong, New South Wales, Australia.

157. Battle Creek Sanitarium Health Food Co. 1899. Announcement! The Battle Creek Sanitarium Health Food Co... (Ad). *Chicago Daily Tribune.* May 7. p. 31.

• ***Summary:*** "... Will open a Health Food Store at 178 Wabash-av., where they will carry a full line of the celebrated foods, manufactured at Battle Creek, Mich. [Michigan]. Competent demonstrators will answer all inquiries respecting the subject of Health Foods, and will have for the benefit of their patrons samples of the "Foods" so that you can judge of their merits.

"They earnestly solicit the attention of the people of Chicago to questions of healthful living, and believe they have a line of foods unequaled for purity and healthfulness and that they will be appreciated."

Note: This is the earliest English-language document seen (July 2021) that contains the term "Health Food Store" (or "Health Food Stores," regardless of capitalization). Address: [Battle Creek, Michigan].

158. Battle Creek Sanitarium Health Food Co. 1899. Health, wealth, prosperity: The Battle Creek Sanitarium Health Food Co... (Ad). *Chicago Daily Tribune.* May 14. p. 12.

• ***Summary:*** "... announce that they will open on Monday, May 15, a Health Food Store at 178 Wabash Ave., where they will give a free exhibit of all their products of all Health Foods, including the cereals and crackers, and the new Foods made from Nuts. These Foods are without question unequaled for purity and healthfulness, and as the hot weather is once more with us, probably a few suggestions respecting a suitable dietary may be acceptable to those who have not given special thought to this subject, or who have not solved the problem for themselves by practical experience. There will be at all times efficient salesmen and demonstrators direct from the Sanitarium at Battle Creek, Michigan, expert in the knowledge of Food Products, who

© Copyright Soyinfo Center 2021

will gladly answer all inquiries on this subject.

"We have over sixty different foods to select from, and are prepared to suit the most fastidious tastes. We cordially invite the public to call and participate in the good things that will be prepared Monday at our grand opening.

"Special. We will give away free to visitors Monday a beautiful booklet descriptive of all the Health Food, and also free samples." Address: 178 Wabash-Av. [Battle Creek, Michigan].

159. Battle Creek Sanitarium Health Food Co. 1899. What shall I eat? (Ad). *Chicago Daily Tribune.* May 21. p. 14.
• ***Summary:*** "'Eat ye that which is good.' You are invited to call at our Health Food Store, just opened at 178 Wabash-Av., and partake of the good things prepared for you. Free exhibit. Free exhibit of all the foods every day this week." Address: 178 Wabash-Av. [Battle Creek, Michigan].

160. *Chicago Daily Tribune.* 1899. Who's who and what's what: Progress of vegetarianism. May 25. p. 6.
• ***Summary:*** "That the number of people who do not eat meat is increasing is shown by the establishment of a new and handsomely appointed vegetarian café in the heart of the down-town district. This place makes a specialty of all kinds of health foods and caters chiefly to people with fads in the eating line. An omelet is the nearest approach to meat on the bill of fare."

Note: This "vegetarian café" is almost certainly the "health food store" just opened by the Battle Creek Sanitarium Health Food Co. at 178 Wabash av., Chicago, and advertised in the May 7, 14, 21, and 28 issues of this newspaper.

161. Battle Creek Sanitarium Health Food Co. 1899. Sanitarium health foods (Ad). *Chicago Daily Tribune.* May 28. p. 39.
• ***Summary:*** "New store at 178 Wabash-av. Free exhibit of all the health foods manufactured by the Battle Creek Sanitarium Health Food Co." Address: [Battle Creek, Michigan].

162. Sanitarium Health Food Company. 1899. Protose and Beans (Ad). *Modern Medicine* (*Battle Creek, Michigan*) 8(6):Ad at rear of issue. June.
• ***Summary:*** A full-page ad on page 5 of "Advertisements" at rear of issue. "A delicious, appetizing, and nutritious combination.

"Protose is a vegetable meat containing 25% more food value and 10% more fat-making properties than beef, with a rich, delicious, meaty flavor.

"Sanitarium Baked Beans. Are cooked three times and are easily digested. Prepared in a scientific manner, rendering them the most digestible preparation of beans on the market.

"The addition of Protose makes these porkless beans the most toothsome product imaginable. A new combination of food properties, representing the new and progressive ideas of the best food experts in the country.

"Sample free.

"Send us the name of a grocer who does not sell Sanitarium Baked Beans, with eight cents to pay postage, and we will mail you a sample can.

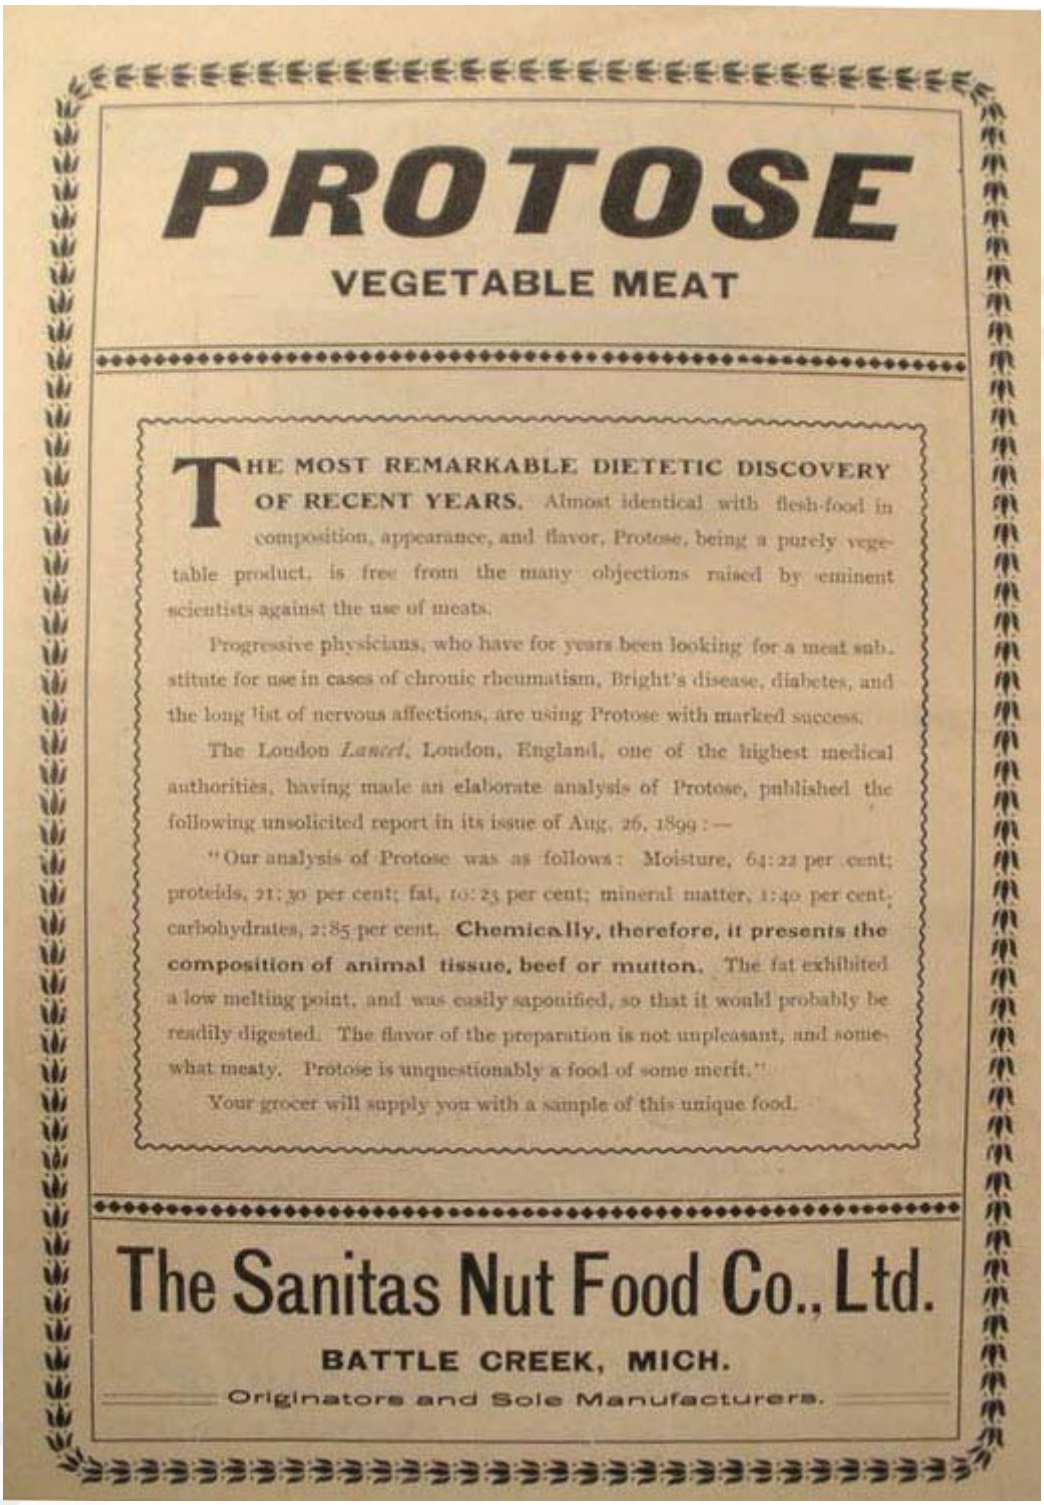
"Art Booklet on Health Foods for the asking."

Note: This is the 2nd earliest English-language document seen (Nov. 2014) that contains the term "vegetable meat" (or "vegetable meats").

Note: This is the earliest document seen (Feb. 2015) that mentions "Protose," a vegetable meat made in Battle Creek, Michigan.

This same ad appeared in the next issue of this magazine, in the same place. Address: Battle Creek, Michigan.

163. **Product Name:** Protose (Meatlike Product Made of Peanuts and Cereal–No Soy).
Manufacturer's Name: Sanitas Nut Food Co., Ltd. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1899 June.
New Product–Documentation: See next 3 pages. Ads in *Modern Medicine* (Battle Creek, Michigan). 1899. June. Full-page ads on pages 5 and 8 of "Advertisements" section at rear of issue.



Mrs. Anna L. Colcord. 1899. *A friend in the kitchen: Or, what to cook and how to cook it. Containing about 400 choice recipes carefully tested.* Oakland, California, San Francisco, New York, Kansas City: Pacific Press Publishing Company. Protose is discussed in detail on pages 108-09. "Protose. This is also a nut product and is intended as a substitute for meat. It may be prepared and served in much the same way as flesh foods, which it resembles somewhat in both appearance and flavor. While it possesses nearly twice their nutritive value, it is free from their objectionable features. Protose makes a good flavoring for soups, and is excellent cooked with vegetables." Recipes are given for: Stewed Protose. Roast Protose. Protose sandwiches.

Ad for Protose by Sanitas Nut Food Co., Ltd. 1900. July. *Good Health* (Battle Creek, Michigan). Protose is described as an easy to digest, perfect substitute for meat.

Good Health. 1904. Jan. (Insert after p. 48) "Chart of food elements." Protose (0.5 pint or 4.2 oz) contains 21.3 [units not given] protein, 10.2 fat, 2.8 carbohydrates, and 60 food units per oz.

Lenna Frances Cooper. 1923. *The New Cookery.* 8th ed., revised. The section titled "Unusual foods referred to in this book" (p. 462-64) states: They are made by the Battle Creek Food Company, Battle Creek, Michigan: "Protose (a meat substitute made from cereal and nuts)."

PROTOSE

VEGETABLE MEAT

THE MOST REMARKABLE DIETETIC DISCOVERY OF RECENT YEARS. Almost identical with flesh-food in composition, appearance, and flavor, Protose, being a purely vegetable product, is free from the many objections raised by eminent scientists against the use of meats.

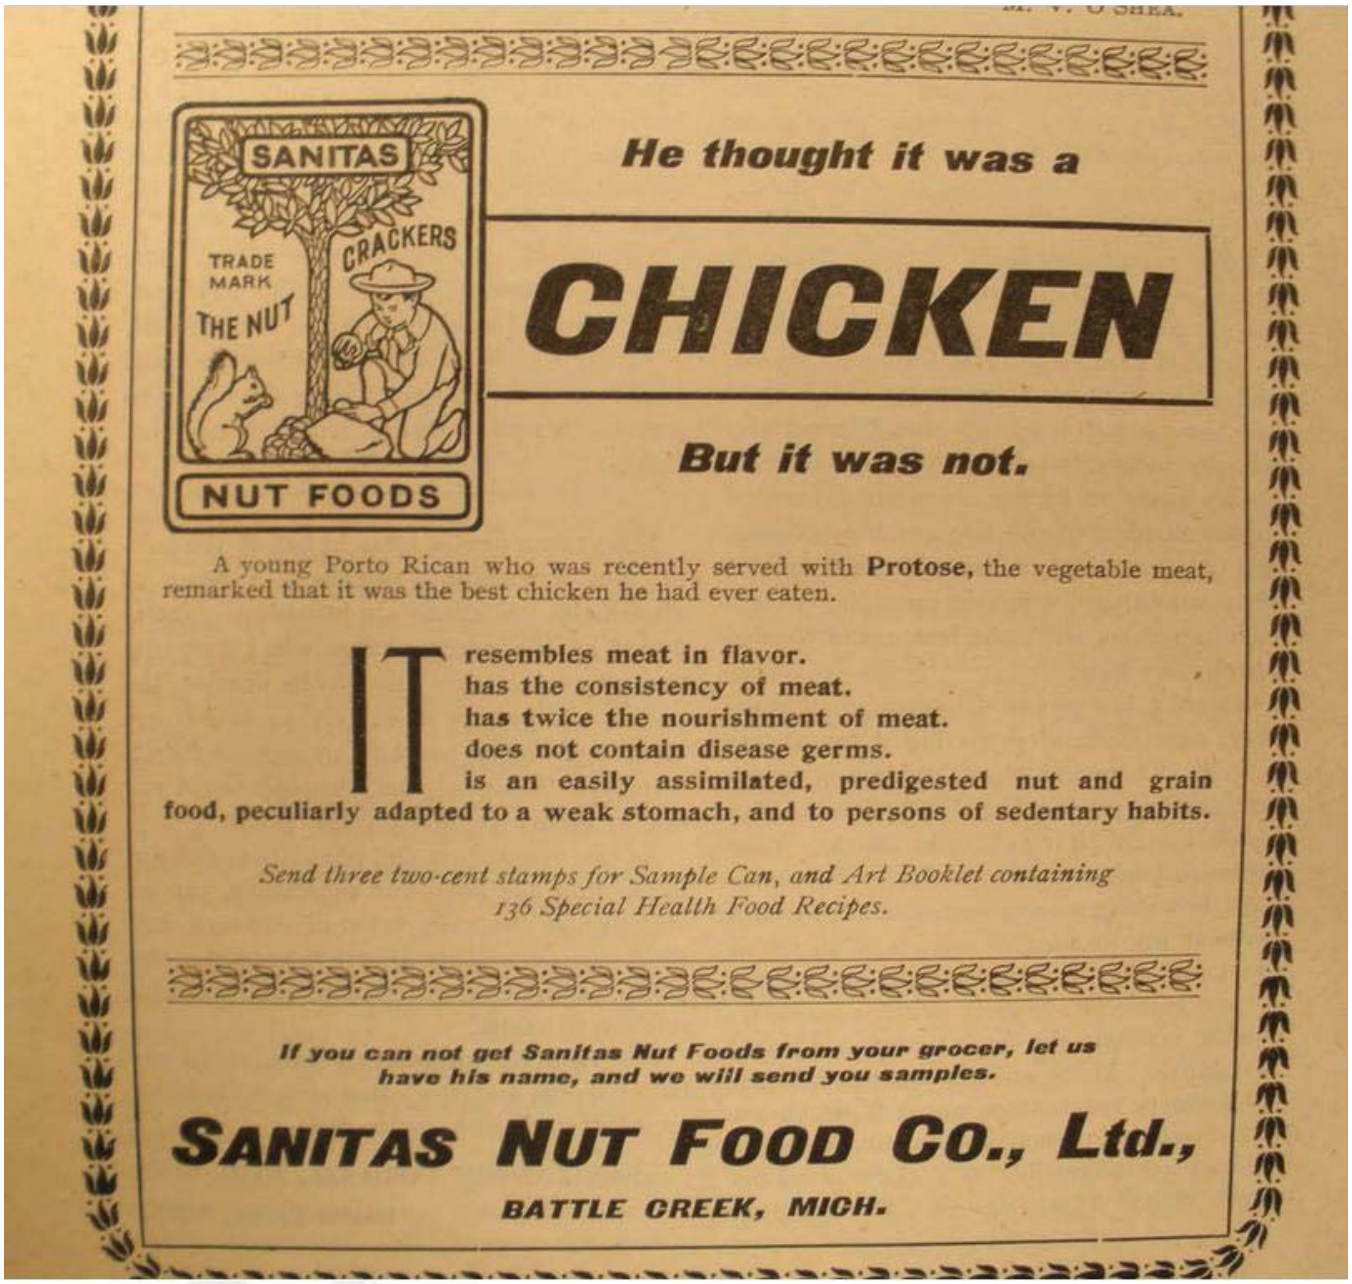
Progressive physicians, who have for years been looking for a meat substitute for use in cases of chronic rheumatism, Bright's disease, diabetes, and the long list of nervous affections, are using Protose with marked success.

The London *Lancet*, London, England, one of the highest medical authorities, having made an elaborate analysis of Protose, published the following unsolicited report in its issue of Aug. 26, 1899:—

"Our analysis of Protose was as follows: Moisture, 64:22 per cent; proteids, 21:30 per cent; fat, 10:23 per cent; mineral matter, 1:40 per cent; carbohydrates, 2:85 per cent. **Chemically, therefore, it presents the composition of animal tissue, beef or mutton.** The fat exhibited a low melting point, and was easily saponified, so that it would probably be readily digested. The flavor of the preparation is not unpleasant, and somewhat meaty. Protose is unquestionably a food of some merit."

Your grocer will supply you with a sample of this unique food.

The Sanitas Nut Food Co., Ltd.



BATTLE CREEK, MICH.

Originators and Sole Manufacturers.

John Harvey Kellogg. 1930. Good Health (Battle Creek, Michigan). Dec. 5, p. 5-7. "Soybeans as human food. I." "I was wholly unacquainted with it [the soybean], and so naturally sought to find in nuts, especially the peanut, a solution to the problem, and succeeded in producing a vegetable meat, Protose, of which several thousand tons have been since made and consumed." Note: It is not known when gluten was first used in this product, but "wheat protein" was the main ingredient in Protose made by Granose Foods in England in 1940.

Ad in *California Health News.* 1937. Feb. 19. p. 13. "For meatless days and for a delicious change. Protose: A satisfying vegetable meat." Illustrations show (each on a plate): Protose croquettes. Protose steak with onions. Protose

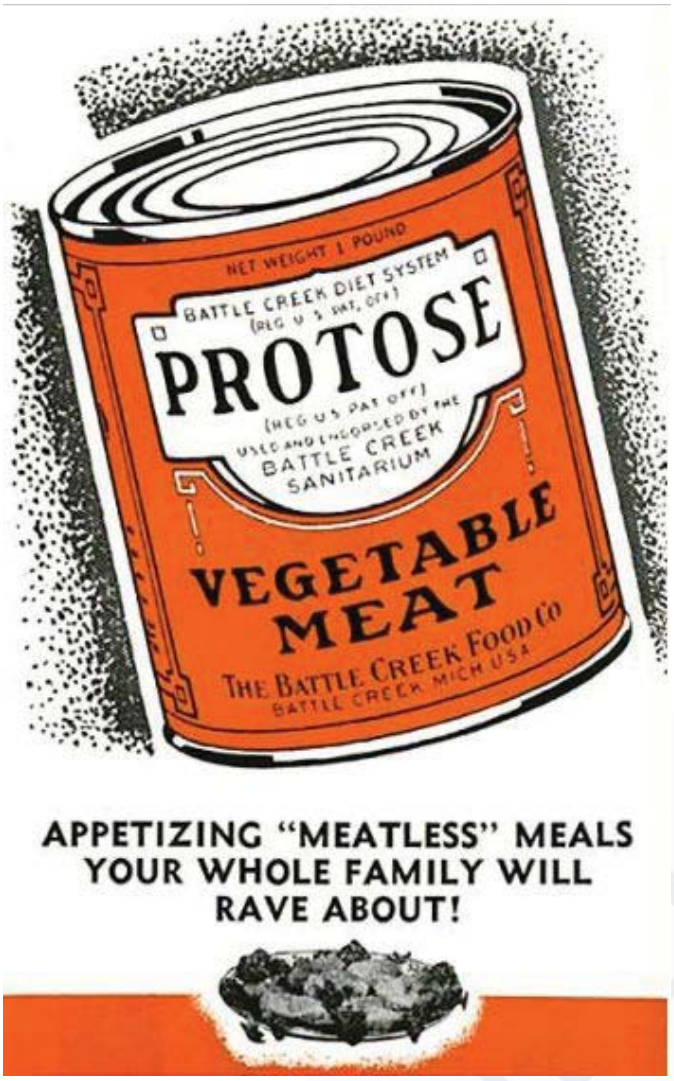
salad. A can of "Protose: Vegetable meat." "Protose is made of grains and nuts."



Ad for Protose: Vegetable Meat by Battle Creek Food Co., Ltd. 1939. *Good Health* (Battle Creek, Michigan). July, p. 380. "Protose, a vegetable meat, may be prepared in any of the ways in which meat is served." A small photo shows the Battle Creek Sanitarium.

Rosenberg's Original Health Food Store. 1940. Catalog of Health Foods... p. 18. "Battle Creek Health Products: Vegetable Meats–Protose Vegetable Meat. 1 lb. $0.50. ½ lb $0.30.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual.* 1st ed. p. 95. Protose contains 22.30% protein, ?% fat, and 22.70% carbohydrate.

Richard W. Schwarz. 1970. John Harvey Kellogg, M.D. p. 122, 209-14, 216, 218. "In 1896 [Dr. John Harvey] Kellogg announced that he had perfected the ideal substitute for meat in Nuttose, a nut product which he could prepare to taste much like beef or chicken." This was his first meatlike product. Later he developed Protose. "Shortly after the production of Granola for patients at the sanitarium began in 1877, Dr. Kellogg organized the Sanitarium Food Company as a subsidiary of the Battle Creek Sanitarium." But when Dr. Kellogg wanted to expand the business, other sanitarium doctors refused to vote the funds. So Dr. Kellogg launched the private Sanitas Food Company, relying heavily on his younger brother, Will Keith, who had served as his personal accountant and business manager since 1880. "John Harvey's

© Copyright Soyinfo Center 2021

new flaked cereals and vegetable meats became the property of the Sanitas Company." In mid-1906 Dr. Kellogg decided to change Sanitas' corporate name to the Kellogg Food Company. Then: "In the spring of 1921, to avoid further difficulties with Will Kellogg's manufacturing business [Battle Creek Toasted Corn Flake Company], Dr. Kellogg changed his concern's name to the Battle Creek Food Company."

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 162. Lists the ingredients in "Protose (Battle Creek)."

Note 1. This is the earliest known commercial product that could be used as a meat alternative in place of beef. See, for example, "Protose steak with onions."

Note that in 1960 Worthington Foods had acquired Battle Creek Food Co.

164. *Mercury* (*The*) (*Hobart, Tasmania, Australia*). 1899. Vegetarianism. July 25. p. 3.

• ***Summary:*** "[From a correspondent.] The delegates and visitors to the biennial Union Conference of Seventh Day Adventists, recently in session at Avondale College, Cooranbong, N.S.W., were much interested in the vegetarian dietary as practised at the college, and in which the delegates, visitors, and students equally participate. In order to give a good idea of the dietary in question, a week's menus at the college are appended: -

"Sunday.–Breakfast–Rolled oats, granola, milk, bread, rolls, honey, stewed quinces, caramel coffee. Dinner–Tomato soup, crutons, mashed beans, squash, corn, nut sauce, bread, zwieback, bread and fruit pudding, lemon dressing.

"Monday.–Breakfast–Oatmeal, granola, fruit toast, bread, rolls, buns, stewed apples, honey, milk, caramel coffee. Dinner–Pea soup, crutons, mashed beans, scalloped tomatoes, boiled rice, nut sauce, bread, zwieback, quince pie.

"Tuesday.–Breakfast–Oatmeal, granola, maccaroni [macaroni], nut butter, bread, rolls, gems, stewed quince, honey, caramel coffee, milk. Dinner–Bean soup, crutons, green peas, potatoes, squash, milk sauce, bread, zwieback, bread pudding.

"Wednesday.–Breakfast–Breakfast meal porridge, granola, milk, milk toast, nut butter, bread, rolls, gems, stewed peaches, jam, caramel coffee. Dinner–Tomato soup, crutons, split peas, fresh corn, squash, nut sauce, bread, zwieback, lemon pudding.

"Thursday.–Breakfast–Breakfast meal porridge, grape toast, granola, nut butter, stewed peaches, honey, bread, rolls, milk. Dinner–Potato soup, crutons, baked beans, pumpkin, fresh corn, nut sauce, bread, zwieback, apple pie.

"Friday.–Breakfast–Rolled oats, granola, maccaroni baked with granola, bread, rolls, gems, stewed apricots, honey. Dinner–Bean soup, crutons, peas puree, mashed potatoes, turnips, sauce, bread, zwieback, sago pudding.

"Saturday.–Breakfast–Oatmeal, granola, fruit toast, bread, biscuits, buns, peaches, honey, milk, caramel coffee. Dinner–Pea soup, crutons, savoury beans, sliced tomatoes, nuttose, bread, zwieback, peach pie.

"The dietary is not only thoroughly wholesome, but also exceedingly appetising."

Note: Parr and Litser (1995, p. 18-19) state that the first Seventh-day Adventist health food factory in Australia, at Melbourne, began to make its first foods in Jan. 1898.

© Copyright Soyinfo Center 2021

Edward Halsey, the master baker, produced the first batch of Granola on 27 Jan. 1898. It was made at St. George's Bakery, 46 Clarke St., Northcote, Melbourne, Victoria. The next day he roasted his first tray of peanuts and produced the first batch of Caramel Cereal. But it was soon realized that Melbourne was not the best location. On 5 Oct. 1898 (in a meeting at Summer Hill, a suburb of Sydney), G.W. Morse was elected "president of the Sanitarium Health Food Company," and it was decided "that he should supervise the transfer of the manufacturing of health foods from Melbourne to Cooranbong (the newly established SDA College in New South Wales was at Avondale in Cooranbong).

On 29 May 1899 the new SDA food factory at Cooranbong, began to make its first product (Peanut Butter, made by Edward Halsey, manufacturing wizard). "By June 16 he had turned out two batches of Granola; bread and wholemeal biscuits had come from the oven by July 5/6. And when, later in July of that year, the Union Conference session was held at Avondale, Mr. Halsey's toothsome delights of sound and sensible food were more than enough to awaken the enthusiasm of the delegates. More than this, the delegates bought over £80 worth of Halsey's special goodies during the conference."

Therefore it seems likely that most or all of the special Adventist foods mentioned above (such as granola, caramel coffee, nut butter, nuttose, etc.) were made in Cooranbong, New South Wales, Australia, and no longer imported from Battle Creek, Michigan.

165. Emporium and Golden Rule Bazaar (The). 1899. Display ad: Another remarkable offering in Pure Foods and Liquors... *San Francisco Chronicle.* July 27. p. 4.
• ***Summary:*** "... for Thursday, Friday and Saturday only." Among the 4 foods listed is: "Grape Nuts, the Popular health food, 3 packages–35¢."

Note the use of the term "Pure Foods" in the title. In the USA, the pure food movement and the health food movement were now both underway, each reinforcing the other, educating Americans about adulteration of foods and demanding better food quality. Address: [San Francisco, California].

166. Battle Creek San. Health Food Co. 1899. Look! Read! and then drop us a postal for a free health food book (Ad). *Chicago Vegetarian* 3(12):Back cover. Aug.

167. Sanitas Nut Foods Co., Ltd. 1899. Sanitas Nut Foods: Nature's foods (Ad). *Chicago Vegetarian* 3(12):Back cover. Aug.
Address: 20 Washington St., Battle Creek, Michigan.

168. Morse, G.W. 1899. The health food business. *Union Conference Record* (*New South Wales, Australia; Seventh-day Adventist*) 2(7):9. Sept. 1.
• ***Summary:*** "The work of completing the food factory at Avondale [New South Wales, Australia], and equipping it with the necessary machinery and fixtures, required much more time than was anticipated. This was the result of failure to secure sufficient means to push the work forward as rapidly as was desired. There seemed to be so many other enterprises that must have means that was contributed, that the food factory was allowed to wait. This was very discouraging to those who were responsible for the enterprise, especially as, the demands for foods were many and very urgent."

"The equipment at present consists of a boiler and engine, a reel oven, dough mixer, two nut shellers, granose mill, granose press, cracker machine, nut blanchers, several nut butter, mills, dough break, granola mill, and numerous miscellaneous fixtures. These, together with the necessary shafting, etc., has required an expenditure of nearly £400.

"P.B. Rudge has had the superintendency of the building operations, and has been ably assisted by J.S. Higgins, of Adelaide, S.A., Mr. Wainman, of Cooranbong, and others. W.J. Booth, of Ballarat, Victoria, has been secured as engineer. E.C. Halsey, who was connected with the business at Melbourne, is head baker." Address: Avondale,.

169. Goldberg, Bowen & Co. 1899. Special saving sale (Ad). *San Francisco Chronicle.* Sept. 4. p. 10.
• ***Summary:*** "Wheatena–Health Food Co.'s–30¢.
"The most wholesome of breakfast cereals."

170. *Vegetarian Messenger* (*Manchester, England*). 1899. Vegetarian Society of Victoria. Sept. p. 302.
• ***Summary:*** "The annual report of this society speaks of a considerable amount of work having been accomplished. Forty-five meetings have been held, mostly in the halls of the temperance associations in Melbourne and its suburbs. The secretary of the society has been in correspondence with several of the great shipping companies urging them to introduce wheat-meal bread among their passengers and crews, and has met with sympathetic responses. Perhaps the most important event in the history of Australian vegetarianism during the year, was the establishment by the Battle Creek [Michigan] Seventh Day Adventists of a manufactory [factory] at Sydney, for the production of health foods. The Adventists have launched a monthly vegetarian journal called the 'Herald of Health,' and have also established a cheap restaurant and lodging house for the poorest classes, which is run on pure vegetarian lines. The Vegetarian Society of Victoria congratulates itself on this addition to the forces of vegetarianism in Australia, and has elected as its president Dr. Caro, the superintendent of the Adventist propaganda. The report also notes with satisfaction the establishment of a sister Vegetarian Society in South

© Copyright Soyinfo Center 2021

Australia."

This is the earliest document seen (March 2009) in *Vegetarian Messenger* that contains the term "health foods" (or "health food" or "health-foods").

171. Woods, Chas. D.; Merrill, L.H. 1899. Cereal breakfast foods. *Maine Agricultural Experiment Station, Bulletin* No. 55. p. 93-106. Nov.

• ***Summary:*** "The general use, at the present time, of cereals on the breakfast table is largely due to the improved condition in which these foods are now offered. Twenty years ago uncooked decorticated oats, (sold under the name of oat meal), graham flour, corn meal, and hominy, all of which required long cooking, made up nearly the entire list of breakfast cereals available to the average housekeeper. Today it is possible to purchase at a moderate price cereal foods which have been previously thoroughly cooked, and subsequently dried so they will keep indefinitely."

This report gives a chemical analysis and the "fuel value per pound" of 41 of America's leading precooked cereal breakfast foods, found in the Bangor (Maine) market, including 3 gluten preparations. The chemical composition of the three gluten foods most commonly used in New England is analyzed. These are widely prescribed for diabetic patients by local physicians. The foods were Cooked Gluten, and Whole Wheat Gluten (both made by the Health Food Company of New York), and Dr. Johnson's Glutine (made by Johnson Educator Food Store, Boston, Massachusetts). A table shows that they contain only a little more protein (16.88%, 17.89%, and 15.31% respectively), and a little less carbohydrates (76.80%, 73.85%, and 82.53%) than ordinary bread flour (which contains 15.02% protein and 82.91% carbohydrates).

"Gluten preparations, containing as high as 70 per cent of protein, were on the market five years ago, and there are now preparations carrying from 30 to 50 per cent of gluten which can be used with reasonable safety by persons suffering from diabetes... Samples of flour made from the hard spring wheat of the Northwest not infrequently carry more protein than the sample of Dr. Johnson's Glutine and nearly as much as the two other samples here reported upon. Too much can hardly be said in condemnation of the foisting, by false statements in advertising such materials upon diabetic patients, imposing upon physicians as well as the public."

Another interesting wheat-based product is Ralston Health Club Breakfast Food, made by the Robinson-Danforth Company. It contains 12.16% protein, 85.36% carbohydrates, and 1.56% fat. The report says of this product: "Ralston Breakfast Food, 'a perfect food made from selected wheat rich in gluten,' is also apparently made from soft winter wheat. The sample examined carries 10.70 per cent of protein, and hence could not have been made from a 'wheat rich in gluten.' It is a well made preparation, but its cost of 8 cents a pound is too high."

Other interesting observations: "There is probably no other cereal food on the market so widely and extensively advertised as Shredded Wheat Biscuit. For the most part its advertising matter is free from exaggerated statements." Grape Nuts are manufactured by the Postum Cereal Company. "The claims of the makers are preposterous." Note the very early use of the term "Health Food" in a company name; Cooked Gluten and Wheatena were both made by the Health Food Company. This was probably the Battle Creek Sanitarium Health Food Co. (located in Battle Creek, Michigan; incorporated 1898, yet its forerunner, the Sanitarium Food Department, was making Wheatena and gluten products by 1882), which merged with the Sanitas Nut Food Co. (founded 1899) to become the Kellogg Food Co. in 1908. Note also that no company with "Kellogg" in its name is listed.

Mazama is made by the Mazama Health Food Co. (p. 94). Address: Orono, Maine.

172. *Union Conference Record* (*Australia*). 1899. The health food factory. 2(10):8. Dec. 1.

• ***Summary:*** "After a long but most determined and persevering effort the Sanitarium Health Food Factory is well fitted up, and able to turn out many of our health foods rapidly. This has required much longer time than was expected by anyone, but the work has been well done..." "They are now manufacturing granose biscuits, granose flakes, bromose, nuttose, antiseptic tablets [charcoal tablets], granola, caramel cereal, nut butter, wheatmeal biscuits, gluten biscuits, gluten meal, and still other foods are in the experimental stage. White and brown bread, for the school and the immediate neighbourhood, are also made at the factory. We are thankful to see this enterprise at last on its feet, and we believe it will be appreciated in proportion to the effort it has cost."

Note 1. This is the earliest document seen (Feb. 2010) concerning the Sanitarium Health Food Factory (or Company) in Australia, or stating explicitly that foods with names such as "granose biscuits, granose flakes," etc. are being made in Australia. Formerly foods with these names were made only in Battle Creek, Michigan, then some were imported to Australia.

Note 2. Ellen G. White, co-founder of the Seventh-day Adventist Church, apparently never used the word "gluten" in her own writings. However the above passage appears in her biography, *Biography of Ellen G. White*, 6 vols., by White, Arthur L. 1981-86. He cites it to show what products are being made by the Sanitarium Health Food Factory in Australia. Ellen White was almost certainly aware of all these products (including gluten) since she was in Australia during the 1890s; she arrived in Dec. 1891 and stayed until about 1900.

Note 3. As of May 1997, this Seventh-day Adventist

© Copyright Soyinfo Center 2021

church paper is still published under the title *Record.*

173. Postum Cereal Co. 1899. Miscellaneous. The German Emperor uses Grape-Nuts (Advertorial). *San Francisco Chronicle.* Dec. 10. p. 19.
• ***Summary:*** "Kaiser Wilhelm furnished with American food. Upon instructions of a German physician, a case of Grape-Nuts Food was lately sent by express to the German Emperor, Kaiser Wilhelm, at Berlin. This food has come into recognition by physicians as perhaps the most perfect form of nourishment in use.

"The field grains, barley and wheat, are blended in proper proportions, ground and passed through some ten or twelve different operations, during which the starch of the grains is turned into grape sugar [glucose]." The product, its taste, and ease of digestions are described and extolled.

"Most so-called health foods are inclined to be flat and disagreeable to the taste, to be used under a sense of duty. Grape-Nuts, on the contrary, is not only the highest known form of health food, but is palatable and delicious. It is thoroughly cooked before leaving the factory and can be served instantly, either cold, with a little rich cream, or made into a hot dish by pouring some hot milk or cream over it. Grape-Nuts are also used for dainty desserts, treated with gelatine or fruit juices

"All first-class grocers sell Grape-Nuts. Made at Postum Cereal Co.'s factories in Battle Creek, Michigan."

Note: Another ad disguised as an article. Address: Battle Creek, Michigan.

174. Smith's Cash Store. 1899. Prices are for this week (Ad). *San Francisco Chronicle.* Dec. 11. p. 4.
• ***Summary:*** In this ad, one food section with a large bold heading is "Health Foods–Come next–Demonstration permanently of St. Helena and Battle Creek goods–Only fully equipped Health Food Department in city."

Note: Both St. Helena (in St. Helena, California) and Battle Creek (in Battle Creek, Michigan) are makers of vegetarian health foods, owned by the Seventh-day Adventist Church.

This ad also appeared in the Dec. 3 (p. 6) issue of this newspaper. Address: 25-27 Market St., near Ferry, San Francisco, California.

175. Purina Mills. 1899. Ralston Breakfast Food: Cooks in a single boiler in five minutes (Ad). *Scribner's Magazine* 26(6):65 (Advertising section). Dec.
• ***Summary:*** This full-page ad contains an illustration of a steaming pot (with handle) of Ralston Breakfast Food. The text at the bottom reads: "The reason is that as each grain of Ralston strikes the boiling water it bursts and swells up like pop corn. 1 cup Ralston–6 cups boiling water, prepares a breakfast for 5 persons.

"If you have any difficulty obtaining Ralston Breakfast Food from your grocer, send us his name and 2¢ stamp for a sample, enough for a breakfast.

"Purina Mills."

Note: The slogan "Where Purity is Paramount" does NOT appear in this ad. Address: 703 Gratiot St., St. Louis, Missouri.

176. **Product Name:** Malted Nuts (Non-dairy Product Made from Malted Cereals and Nuts and Resembling Malted Milk).
Manufacturer's Name: Sanitas Nut Food Co. from 1899. Renamed Kellogg Food Company in mid-1906, then Battle Creek Food Co. in the spring of 1921.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1899.
Nutrition: Water 2.6%, protein 23.7%, fat 27.6%, carbohydrate (malt sugar and dextrin) 43.9%, and ash 2.2%. Calories per ounce: 140.
New Product–Documentation: Mrs. Anna L. Colcord. 1899. "A friend in the kitchen: Or, what to cook and how to cook it. Containing about 400 choice recipes carefully tested." The next to last page of the book (unnumbered) lists foods available from the St. Helena Sanitarium Health Food Company [California], including "Malted Nuts."

Sanitas Nut Food Co., Ltd. 1900. *Good Health* (Battle Creek, Michigan). 35(7):July. Ad section in back of issue. Unpaginated. "20th century foods" (Ad). Products include "Malted Nuts."

John Harvey Kellogg. 1921. The New Dietetics–What to Eat and How... Battle Creek, Michigan: Battle Creek Modern Medicine Publishing Co. p. 359. "Nearly thirty years (1892-93) the writer, in seeking to supply the needs of invalids unable to eat cow's milk, conceived the idea of combining malt-digested cereals with nuts to prepare a substitute. The result reached after many experimental efforts was the product known as 'Malted Nuts,' which much resembles malted milk in appearance, while having a delicate and very agreeable nutty flavor. This product has been produced in considerable quantities and has come to be somewhat widely used." 'Malted Nuts' is an excellent source of food iron and it increases the milk secretion in nursing mothers.

In: Richard W. Schwarz. 1970. John Harvey Kellogg, M.D. Nashville, Tennessee: Southern Publishing Assoc. 256 p. See p. 121. "In 1896 he [Dr. Kellogg] patented a product labeled 'Bromose,' which he claimed to be a vegetable equivalent of malted milk... At about the same time, John Harvey originated a similar product which he named Malted Nuts. Derived principally from peanuts and almonds, one could mix Malted Nuts with water to form a vegetable milk which Kellogg maintained looked 'exactly like milk, and tastes so nearly like it that it is a very satisfactory substitute.' He designed the latter product primarily for infants who could not tolerate cow's milk..."

177. Colcord, Anna L. (Mrs.). 1899. A friend in the kitchen: Or, what to cook and how to cook it. Containing about 400 choice recipes carefully tested. Oakland, California, San Francisco, New York, Kansas City: Pacific Press Publishing Company. 126 + v p. Illust. 19 cm.

• ***Summary:*** A Seventh-day Adventist vegetarian cookbook. The subtitle continues: Plain directions for healthful cookery; How to can fruit; A week's menu; Proper food combinations; Rules for dyspeptics; Food for infants; Simple dishes for the sick; Wholesome drinks; Useful tables on nutritive values of foods, time required to digest foods, weights and measures for the kitchen, etc.

Pages 102-03, titled "Wholesome drinks," begins:

"Water is best.–Pindar.

"Tea is a stimulant; sale [commercial] coffee is a hurtful indulgence.

"Wine is a mocker, strong drink is raging; and whosoever is deceived thereby is not wise.–Solomon.

"If you wish to keep mind clear and body healthy, abstain from all fermented liquors–Sydney Smith.

"Many who never touch alcohol ruin their health by tea.–Hygiene Review.

"Temperance is the parent of health, cheerfulness, and old age.–George Mogridge.

The rest of this section is about "Cereal coffee" or recipes for coffee alternatives–without caffeine.

Pages 105-09 discuss "Specially Prepared Health Foods" which may be obtained from the St. Helena Sanitarium Health Food Company (St. Helena, California), of the Battle Creek Sanitarium Health Food Company (Battle Creek, Michigan). They include homemade granola (thoroughly cooked and partially digested; may be eaten with milk, cream, or fruit juice), Granose (light, crisp flakes; serve like Granola), nut butter (a substitute for butter and cream), nut butter cream, nut butter gravy, nut butter pie crust, nut butter sandwiches, Protose ("This is also a nut product and is intended as a substitute for meat..."), and Caramel Cereal (a "harmless and nutritious substitute for tea and coffee, both of which are now generally recognized by the best physicians as harmful beverages, and the cause of many nervous disorders. It is made wholly from grain products...").

Page 114, "Food for infants," describes how to make such foods when mother's milk is not available. The main ingredient in each is cow's milk, and they are recommended even for an infant under 3 months of age.

Page 120 gives a week's menu and page 121 discusses the Sabbath and Sabbath dinners ("The Sabbath is the day of rest. In order that it may be devoted by all to religious exercises, holy meditation, and spiritual delight, it should be as free as possible from the ordinary duties and cares of life... With proper planning, very little, if any, cooking need ever be done on the Sabbath...").

A full-page ad on the next to last page of the book (unnumbered) lists foods available from the St. Helena Sanitarium Health Food Company (which has a San Francisco branch at 1422 Market St.): Granose ("The Queen of cereal foods"), Granola, Granose biscuit, Caramel cereal, Whole wheat sticks, Graham sticks, Pure gluten biscuit, Whole wheat zwieback, Whole wheat wafers, Nut butter, Nucose [what is it?], Nutlet, Bromose, Malted nuts, Protose, Maltol, Ambrosia, Almond butter, Manno, Fruit coco. "Unfermented breads aid digestion: Most of our crackers and sticks are unfermented."

Note: This is the earliest document seen (Feb. 2015) that mentions "Malted Nuts" (a nondairy product made principally from peanuts and almonds; when mixed with water it resembled malted milk).

178. *Los Angeles Times.* 1900. Care of the body: Valuable suggestions for acquiring and preserving health. Jan. 7. p. IM27.

• ***Summary:*** The section titled "A vegetarian restaurant" states: "Los Angeles has now a first-class vegetarian restaurant and it appears to be well patronized. The restaurant, which also keeps health foods for sale, is connected with a well-known hygienic institution [Battle Creek Sanitarium] in Michigan, which manufactures these foods on a large scale, and has branch sanitariums all over the world. For those who are not acquainted with the wide range of dishes at the command of the modern vegetarian in the United States, the following dinner bill of fare of the restaurant above referred to, on a recent Sunday, will be of interest:

"Bayo beans and tapioca soup, celery, cabbage salad, onions, nut and vegetable roast, egg macaroni, boiled potatoes with gluten sauce, lima beans and nut stew, carrots, vegetable stew, ambrosia, bromose tablets, shaved nuttose, sliced nucose, protose.

"Boiled eggs, plain omelet, scrambled, poached, poached on toast, and poached on granose.

"Rice with raisins, granose, granola, gluten mush with milk, nut cream or dairy cream.

"Steamed figs, pear sauce, baked apples with cream, sliced bananas with cream, stewed prunes, apple sauce, apples, oranges, and bananas. Apple charlotte, cream rice pudding.

"Cereal coffee, hot malted nuts, cold milk, hot milk, unfermented wine, glass one-half cream and one-half milk, lemonade, hot or cold orangeade, distilled water.

"Whole-wheat bread, graham bread, zweiback [zwieback], graham sticks, whole-wheat sticks, mixed wafers, oatmeal wafers, graham wafers, granose biscuit, gluten wafers, and whole-wheat wafers."

Note: This is the earliest document seen (March 2007) worldwide that mentions a health foods restaurant.

179. *San Francisco Chronicle.* 1900. An object lesson: In a restaurant. Miscellaneous. Jan. 15. p. 2.

© Copyright Soyinfo Center 2021

• ***Summary:*** "A physician puts the query: Have you never noticed in any large restaurant at lunch or dinner time the large number of hearty, vigorous old men at the tables; men whose ages run from 60 to 80 years..."

"If you will notice what these hearty old fellows are eating you will observe that they are not munching bran crackers nor gingerly picking their way through a menu card of new-fangled health foods; on the contrary, they seem to prefer a juicy roast of beef, a properly turned loin of mutton and even the deadly broiled lobster is not altogether ignored.

"The point of all this is that a vigorous old age depends upon good digestion and plenty of wholesome food, and not upon dieting and an endeavor to live upon bran crackers.

"There is a certain class of food cranks who seem to believe that meat, coffee and many other good things are rank poisons, but these cadaverous, sickly looking individuals are a walking condemnation of their own theories."

180. *Kokomo Dispatch* (*Indiana*). 1900. Early morning fire: The health-food concern of Lane Bros. destroyed. Jan. 16. p. 1, col. 2.
• ***Summary:*** "The Lane Bros', health-food concern, situated on Courtland avenue, was entirely destroyed by fire Friday morning [Jan. 12] at 6 o'clock. The cause was an overheated furnace. The loss is $1000. There was insurance for $450 in the American of Indianapolis."

181. Stuart (F.A.) Co. 1900. Theories about food: Also a few facts on the same subject (Advertorial). *Chicago Daily Tribune.* Jan. 17. p. 2.
• ***Summary:*** This is an advertorial for Stuart's Dyspepsia Tablets. "We hear much nowadays about health foods and hygienic living, about vegetarianism and many other fads along the same line.

"Restaurants may be found in the larger cities where no meat, pastry or coffee is served and where the food crank is in his glory, and arguments and theories galore advanced to prove that meat was never intended for human stomachs, and almost makes us believe that our sturdy ancestors who lived four score years in robust health on roast beef, pork, and mutton [sic] must have been grossly ignorant of the laws of health.

"Our forefathers had other things to do than formulate theories about the food they ate. A warm welcome was extended to any kind from bacon to acorns.

"A healthy appetite and common sense are excellent guides to follow in matters of diet, and a mixed diet of grains, fruits and meats is undoubtedly the best."

"Dr. Julius Remmson on this subject says: 'Nervous persons, people run down in health and of low vitality should eat meat and plenty of it. If the digestion is too feeble at first it may be easily corrected by the regular use of Stuart's Dyspepsia Tablets after each meal.'" These tablets "supply the pepsin and diastase necessary to perfect digestion, and every form of indigestion will be overcome by their use."

"All druggists sell Stuart's Dyspepsia Tablets at 50¢ for the full treatment.

"A little booklet on cause and cure of stomach trouble mailed free by addressing F.A. Stuart Co., Marshall, Michigan." Address: Marshall, Michigan.

182. *Los Angeles Times.* 1900. Wanted–Help, female. Jan. 21. p. II1.
• ***Summary:*** This small classified ad states: "Wanted–A good lady demonstrator at the Hoover Health Food Store, 329 W. Fourth st."

Note: This is the earliest English-language document seen (Jan. 2006) from California that contains the term "Health Food Store" (regardless of capitalization). And it may well really have been that!

183. *Kneipp Water Cure Monthly* (*The*) (*New York City*). 1900. Kneipp health food. 1(1):14. Jan.
• ***Summary:*** "Nobody will deny the fact that most of the diseases and cases of ill-health so prevalent in our times may be traced to our incorrect habits of living and to our accustomed unhealthful diet." Father Kneipp showed "us the necessity of returning to a simple, appropriate diet calling attention to the most natural and nourishing foods at our command and the proper way of preparing and using the same.

"Kneipp's Health- and Strength Foods are well known preparations and are cheap as well as good... They are not patent medicines sold at an enormous profit, but sold for a few cents and within the reach of all."

"The genuine, unfermented Kneipp Health Bread made of whole wheat and rye, should be free of any artificial leaven or yeast. It is the best and most nourishing bread made to-day." Details on "How to bake Kneipp's Whole Wheat Bread" are given. Also how to make three different types of "Strengthening Soup." (1) Boil pulverized Kneipp bread in beef or muttonbroth. (2) Boil the meal in milk with a little butter or an egg. (3) Boil the meal in water and season to taste. "This soup meal can also be bought at Kneipp-stores and Kneipp-bakeries."

Note: This is the earliest document seen (Nov. 2014) that uses the term "Health food" in connection with Benedict Lust, naturopathic pioneer in New York City.

184. Moore & Son. 1900. Moore's: The proper place to trade (Ad). *Evening Star* (*Toronto, Ontario, Canada*). Feb. 23. p. 6.

"Granose Flakes–15¢ package." Address: 402 Spandia, Toronto. Phone: 804.

185. *Los Angeles Times.* 1900. His idea of doctors. Feb. 28. p. I8.
• ***Summary:*** From the Indianapolis News: "'The doctors,' said a dyspeptic-looking man standing in front of a health-food store, are 'N.G.'

"'How so?' asked another.

"'Well, they're so changeable. Now, it was only a few years ago that they told me to drink hot water for my liver. They tell me now not to do it, because it will give me cancer of the stomach. Then they said that tomatoes were not fit for food. Now they tell me to eat lots of them, as it is natural calomel [a purgative]. That's the way it goes. They tell you to stuff yourself with one thing and then throw the switch on it.'

"Then he defiantly bought a package of prepared oats from the health-food store and said he was going home to eat some of it, because the doctor told him it 'was a paste that never ought to enter the human stomach.'"

186. Health Food Restaurant. 1900. Display ad: Gained twenty pounds in flesh. *Chicago Daily Tribune.* March 23. p. 7.
• ***Summary:*** "Mr. Charlton V. Howe, an expert engrosser of 407 Inter Ocean Bldg., is an enthusiastic patron of the Health Food Restaurant, 178 Wabash-av., three times a day. Since he began eating health foods last November he has gained twenty pounds in weight, and from an emaciated dyspeptic has become a rosy-cheeked, vigorous man. He especially recommends the Health Food Restaurant for sedentary people.

"Abundance of delicious food daily served and digestible as well as palatable." Address: 178 Wabash-av., Chicago.

187. Broadbent, Alfred. 1900. Battle Creek work in England. *Vegetarian Messenger* (*Manchester, England*). April. p. 117-18.
• ***Summary:*** "I had recently the pleasure of visiting the sanitarium at Dunedin, Cronks Hill Road, Meadvale, Redhill, in Surrey. It is about two miles walk from Redhill, is pleasantly situated, and has excellent views. There is only room for ten patients, and so far the sanitarium has been full.

"Dr. Kress, who is in charge of the work in this country, is now anxious for the sanitarium to become better known, and says it is intended to build an institution at Redhill to accommodate forty or fifty patients. When that is filled, another will be started at some other point where an equal number can be dealt with."

"The sanitarium at Redhill, is under the supervision of Dr. Kress and his wife–Dr. Lauretta Kress, and under their superintendence the work must prosper, they are so impressed by its righteousness and truth.

"Dr. Kress is a specialist for diseases of the stomach, and has had many years experience in the treatment of indigestion.

"Dr. Lauretta Kress is skilled in the treatment of diseases of women, &c. She is an excellent speaker and lecturer, and a great believer in dress reform for ladies, being most anxious to promote it in this country. She has designed some garments which sit very tidily, and are not at all sloppy. She says that any garments can be adapted to the patterns she uses.

"There are only two meals during the day in the sanitarium, one at 8 o'clock morning, the other at 3 o'clock afternoon. No liquids are allowed at meals.

"No physic or drugs are used, the treatment consists of massage, electricity, electric baths, diet and hydropathy being made special features of the treatment, which is highly successful."

"For a few years the foods sold by the London Food Co., have been imported from Battle Creek, Michigan, U.S.A., but now a factory is established at Horley, Surrey, where several kinds are already manufactured.

"The foods from now are to be sold in this country under the name of 'Life and Health Foods.'

"I have visited the factory and though the machinery was not working, I was struck with the elaborate machines required for producing the foods. Some of them go through more than twelve processes, Granose especially requiring a very long time to make.

"I was informed that the price of all the foods is being gone into, and a reduction on them all–it is hoped–will be eventually made. I hope this will come about, for I have long considered it a great pity that these valuable foods should–because of their high price–be placed beyond the reach of many whose accession to them would leave the path of food reform made easier.

"The Vegetarian Society, which has always sought to popularise food-products of a genuine nature, was the first to introduce these foods into this country, and has done much to make them so well known as they are today."

188. Purina Mills. 1900. "In five minutes its cooked": Ralston Breakfast Food (Ad). *McClure's Magazine* 14(6):107 (Advertising section). April.
• ***Summary:*** A full-page ad. The top half of the ad contains an illustration of a woman at the stove (cooking Ralston Breakfast Food), looking over her right shoulder at a huge clock on the wall. The time is 6:55–time for breakfast. A box of Ralston Breakfast Food is in the right foreground.

The text reads: "Saves time, temper and digestion. Most cereals require a double boiler and at least 20 minutes cooking, while Ralston Breakfast Food is prepared with ease and dispatch in a single boiler in five minutes.

"The vigor and strength imparting properties of Ralston

© Copyright Soyinfo Center 2021

come from Gluterean Wheat, the whole berry of which is milled into Ralston Breakfast Food.

"There's not another dish so delicious for breakfast that contains as much nutrition as Ralston Breakfast Food.

"Ask your grocer. If he doesn't keep Ralston, send us his name, and we'll send you a free sample.

"Purina Mills, 'Where Purity is Paramount.' Manufacturers of Purina Health Flour, (Whole Wheat), In 5 lb. packages and 12 lb. sacks."

Note: This is the earliest document seen (Sept. 2020) that contains the phrase or slogan "Where Purity is Paramount." Soon many other companies, including those outside the food industry, would start to use this slogan. Address: 756 Gratiot St., St. Louis, Missouri.

189. *Vegetarian Messenger* (*Manchester, England*). 1900. Price list of the Vegetarian Society's food stores, 19, Oxford St., Manchester, S.E. April. Unnumbered page at rear of issue.

• ***Summary:*** The five categories of food sold are: (1) Foods [cereal grain, whole, crushed, meal, and flakes] (First item is whole wheat meal, freshly ground from best English red wheat). (2) Beans, peas, lentils (incl. soya beans and lists the price as "4*d.* a lb" plus carriage; also 4 types of haricot beans {2.5 to 4*d.*} and 4 types of lentils {2.5 to 3*d.* a lb.}.

(3) Prepared foods (incl. Dr. Nicholl's Food of Health, Dr. Allinson's Food of Health, Fromm's Extract, Fromm's Soup, Nuttosia, Nut Butter {almond, hazel}, Nuttose, Protose, Sterilized Nut Butter, Granose Flakes, Granose biscuits, Avenola, Crystal Wheat, Nutta, Bromose, Falona). (4) Biscuits (incl. Graham crackers, Wholewheat wafers, Wheat and nut rolls, Zwieback–white or Graham). (5) Plasmon [digested milk proteid] chocolate, or biscuits).

Note: This is the earliest English-language document seen (June 2009) published in England that contains the word "Granose" (a flaked cereal food).

190. *Kneipp Water Cure Monthly* (*The*) (*New York City*). 1900. The first hygienic bakery. 1(5):83. May.

• ***Summary:*** This bakery, the first of its kind, "was established by Louis Lust in 219 East 59th St., New York, about six months ago. There were bakers who manufactured a Kneipp bread but it was not always what it ought to be."

"Besides the bread, Mr. Lust makes Kneipp's strength-giving soup, Kneipp's Baby Food, Kneipp's Zwieback, Kneipp's Honey Cakes and Kneipp's whole Wheat-rolls.

"Connected with the bakery there is a lunch room where hygienic foods (Kneipp- and Vegetarian dishes) only are served."

Note: This is the earliest document seen (Nov. 2014) concerning Louis Lust in connection with Benedict Lust; Louis was Benedict's younger brother, and the youngest child in the family, born in 1887 in Germany.

191. Postum Cereal Co. 1900. Miscellaneous. Doubters: Can be changed by knowledge (Advertorial). *San Francisco Chronicle.* June 28. p. 9.

• ***Summary:*** "If there is any doubt about making brain power by the use of certain foods, the doubter should make the following experiment."

Helen Frances Huntington of Gainesville, Georgia, explains how she was a doubter, until she discovered Grape-Nuts, "which I have found to be the most wholesome, nourishing and appetizing food that has ever come to my knowledge."

"I am not a dyspeptic, but being constantly engaged in severe brain work I found that I did not thrive on an ordinary diet..." After trying many different foods and diets she "resorted to one and another of the various health-foods, which all seemed alike, tasteless and valueless as a brain food, until quite by chance I had a dish of Grape-Nuts food served as dessert. I liked it so well I began to use it daily." Address: Battle Creek, Michigan.

192. U.S. Department of the Interior, Census Office. 1900. Paul C. Bragg in the 1900 U.S. Census in Washington, DC, on N. Capitol Street. Washington, DC.

• ***Summary:*** Robert L. Bragg. Head of Household. Born Feb. 1865 in Indiana. Mother born in Indiana. Father born in Indiana. Occupation: Composer [like typesetter], Government Printing Office.

Carrie Bragg. Wife. Born March [illegible, about 1864] in Indiana. [Age 36]. Mother born in Indiana. Father born in Indiana.

Elton Bragg. Son. Born [illegible, either January or June] 1894 in Indiana. Mother born in Indiana. Father born in Indiana.

Paul C. Bragg. Son. Born Feb. 1895 in Indiana. Mother born in Indiana. Father born in Indiana.

John Bragg. Son. Born April 1899 in Washington, DC. Mother born in Indiana. Father born in Indiana.

Note: Paul Bragg's parents, Robert and Carrie Bragg, started to raise their family in Indiana, then moved to Washington, DC, between Feb. 1895 and April 1899. Paul is the 2nd of 3 sons. His middle name is Chappius and he was born on 6 Feb. 1895–based on his Social Security Death Index record and his death certificate of 7 Dec. 1976. In the 1910 U.S. Census the father's name is given as Robert E. Bragg (this middle initial matches the one given on his son, Paul's death certificate) and his eldest son's name is given as James E. Bragg.

193. U.S. Department of the Interior, Census Office. 1900. Tony A. Berhalter in the 1900 U.S. Census in Van Buren, Jackson Co., Iowa. Van Buren, Jackson County, Iowa. 1 p. Family No. 315.

• ***Summary:*** Tony A. Berhalter is a boarder in the household of John Bormann, who is head of the household. Tony is

a white male. Birth date: Oct. 1879. Age: 20. Birthplace: Germany. Immigration Year: 1896. Relationship to Head of House: Boarder.

Father's Birthplace: Germany. Mother's Birthplace: Germany. Marital Status: Single. Residence: Preston & Miles City (Pt.), Jackson, Iowa. Occupation: View on Image. Neighbors: View others on page.

Household Members: Name & Age: John Bormann 51, Catharina Bormann 49, Johnnie H. Bormann 22, August Bormann 20, Joseph Bormann 18, Catharina Bormann 15, Thresia Bormann 13, Benidict H. Bormann 8, Clara Bormann 5, Osmond J. Hubbel 27, John Cain 39, Tony A. Berhalter 20, Nick Snyder 48, Thomas G. Pittard 36, James Crowley 29, Maggie Schaefer 25, John J. Keavin 45, H.D. Clark 40.

Note: This is the earliest document seen (July 2021) that mentions Tony (Anthony) A. Berhalter, but not in connection with health foods.

194. *Poverty Bay Herald* (*Gisborne, New Zealand*). 1900. Sanitarium health foods (Ad). July 6. p. 3.
• ***Summary:*** "Supply on hand: Caramel Cereal [a coffee substitute]. Granola (packets and bags). Granose Biscuits. Nut Butter. Nuttose. Bromose. Gluten. Charcoal Tablets.

Note 1. No company name [Sanitarium Health Food Company] or address is given.

Note 2. This is the earliest document seen (Dec. 2013) concerning "Sanitarium health foods" in New Zealand.

195. Sanitas Nut Food Co., Ltd. 1900. 20th century foods (Ad). *Good Health* (*Battle Creek, Michigan*) 35(7):July. Ad section in back of issue. Unpaginated.
• ***Summary:*** "We manufacture the most unique, delicate, and toothsome line of foods on the market. While these foods are so prepared as to be perfectly adapted to the stomach of the feeblest invalid, or the youngest child, they are at the same time of the greatest value in forming the healthy tissue of the vigorous man or woman. They are prepared with the greatest care from the choicest edible nuts. Perfect substitutes for meat, butter, and milk. Possessing none of their objections." Products include: "Malt Honey, Bromose, Protose, Nut Butter, Malted Nuts, Maltöl. Ask your grocer for samples, and if you fail to get them, write us, giving his name, and you will hear of something to your advantage."

Note: According to Stoltz (1992) Sanitas Nut Food Co. was legally founded in 1899. Address: Battle Creek, Michigan.

196. *San Francisco Chronicle.* 1900. Awards at Paris fair: United States received nearly two thousand prizes... Full list of those receiving the higher recommendations. Number of medals captured nearly double those won at the previous French exposition [of 1889]. Aug. 18. p. 3.
• ***Summary:*** "Paris, August 17.–The list of awards to American exhibitors at the Paris Exposition was made public to-day."

"Department of agriculture, food products, Group X–Libby, McNeill & Libby;... Battle Creek Sanitarium Health Food Company;..."

197. Stuart (F.A.) Company. 1900. Miscellaneous. Theories about food: Also a few facts on the same subject (Advertorial). *San Francisco Chronicle.* Sept. 30. p. 10.
• ***Summary:*** The ad begins: "We hear much nowadays about health foods and hygienic living, about vegetarianism and many other fads along the same line.

"Restaurants may be found in the larger cities where no meat, pastry or coffee is served, and the food crank is in his glory,...

This is an ad for Stuart's Dyspepsia Tablets–another ad disguised as an article. Address: Marshall, Michigan.

198. *Dietetic and Hygienic Gazette* (*New York*). 1900. Department of notes and queries. 16(9):575-78. Sept. See p. 576. *
• ***Summary:*** The answer to the question "Which breakfast foods are most nutritious?" (p. 575-76), includes: "Preparations containing admixtures of barley and rye, as in the 'Ralston Health Food,'... are much enjoyed by some and are both wholesome and nutritious."

199. Snider, Mary Foster. 1900. A Thanksgiving dinner of herbs [vegetarian]. *Good Housekeeping* 31(4):284. Oct.
• ***Summary:*** The article begins with the menu, followed by a recipe for each menu item, and concluding with this:

"The foregoing menu, carefully prepared, will prove a delicious and satisfying dinner to the most confirmed flesh-eater. Nuttose indeed so strongly resembles meat (or rather chicken) in its flavor that the keenest palate frequently fails to detect the difference. Nuttose and protose both belong to the new health dietary, and may be served in many delicious and varied dishes, simulating beef, mutton, chicken, sweetbreads, bacon or turkey, according to the method adopted in preparing them. Both of these delightful and healthful foods, together with bromose, nuttolene, ambrosia, nut butters and nut meats, may be purchased at many of the large city stores, and in a number of places there are health food stores where one may procure every known preparation of nuts and cereals scientific research and painstaking experiments have proved safe and pleasant food for man. Bromose, nuttose and ambrosia are especially delicious."

The menu calls for: "Celery soup. Nut butter sandwiches. Olives. Salted almonds. Lentil cutlets with tomato sauce. Rice croquettes with red currant jelly. Vegetable turkey. Brown gravy. Cranberry jelly. Italian chestnuts (boiled). Creamed onions. Grape sherbet. Nuttose timbales. Mushroom sauce. Mashed potatoes. Baked squash. Apple and nut salad. Granose biscuit. Almond butter.

© Copyright Soyinfo Center 2021

Pumpkin pudding. Lemon pie. White fruit cake. Pears. Apples. Oranges. Nuts. Coffee."

Peanut butter is included in the first recipe: "Celery soup... season to taste and thicken with a little flour rubbed smooth in a lump of butter, and one cupful of mashed potatoes. Let it get very hot and serve with brown bread sandwiches spread with peanut butter."

Here is the recipe for "Vegetable Turkey: Mix well together three cupfuls of chopped nuts (one or more kinds), three cupfuls of dry bread crumbs, three cupfuls of milk, one tablespoonful of nut butter dissolved in some of the milk, one and one-half teaspoonfuls of finely powdered sage, and three teaspoonfuls of salt. Lastly, stir in six well-beaten eggs. Bake twenty minutes in a brisk oven, and serve hot with cranberry jelly and brown gravy."

And the recipe for "Brown Gravy: To each cupful of water take three tablespoonfuls of peanut meal and, when boiling, thicken with browned flour. Season to taste."

Here is the recipe for "Nuttose Timbales: Measure one-half cupful of stale bread crumbs and cook it with one cupful of milk for five minutes. Then add four level tablespoonfuls of butter, two cupfuls of nuttose cut in small pieces, four beaten eggs, a little onion juice, and seasoning to taste. Turn the mixture into timbale molds and bake slowly in a pan of hot water until firm. Serve them with mushroom sauce. For this cut one dozen large mushrooms into strips with a silver knife. Fry them in four tablespoonfuls of butter for five minutes, dredge with three tablespoonfuls of flour and add two cupfuls of cream. Cook two minutes, add a tablespoonful of butter and seasoning to taste."

200. Purina Mills. 1900. Display ad: Fresh new health foods: From the Purina Mills. *Atlanta Constitution* (*Georgia*). Nov. 1. p. 4.

• ***Summary:*** This rectangular ad contains 6 boxes, above which is written: "Where Purity is Paramount."

Each box contains the description of a food:

"(1) Ralston Health Oats, 2 lb. packages; pkg. 10¢.

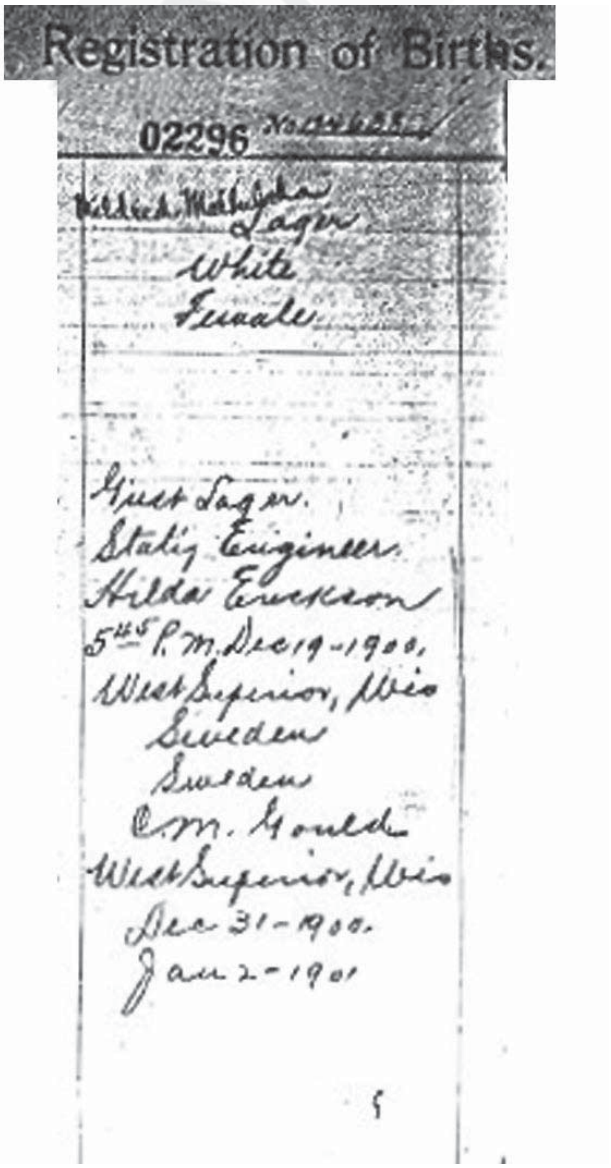
"(2) Purina Pancake Flour, 2 lb. packages; pkg. 10¢.

"(3) Purina Health Flour, 12 lb. sacks; per sack 45¢.

"(4) Purina Health Flour, 5 lb. cartons; carton 25¢.

"(5) Ralston Hominy Grits, 2 lb. packages; pkg. 10¢.

"(6) Ralston Breakfast Food, 2 lb. packages; pkg. 15¢.



"You'll find it at Kampers, 79-81 Peachtree" [Atlanta, Georgia].

201. *Star* (*Canterbury, New Zealand*). 1900. Jubilee Exhibition: The exhibits. Charlotte Jane Avenue. Nov. 17. p. 6.

• ***Summary:*** "... and beside it are the Sanitarium Health Food Company's exhibits of health foods. The commodities shown in this bay are farinaceous foods intended to promote easy and thorough digestion. The caramel cereal is intended as a substitute for tea and coffee, and by its use, it is claimed, the evils resulting from long-continued or excessive tea or coffee drinking are avoided, as caramel cereal contains neither theine [a stimulant found in tea] nor caffeine, the harmful elements of the beverages of the breakfast table. Granose is a preparation of wheat, in which all the elements of the grain are preserved. Granola is another health food, made from a combination of grain, and it is claimed for it that it is an ideal breakfast food. There are other preparations from nuts, specialties in glutens and antiseptic charcoal tablets, wheatmeal and oatmeal biscuits, etc."

Collie, "941 Logan av." Address: Cleveland Ohio.

205. Directory and Gazetteer of Kokomo and Howard County, Indiana, for 1900. 1900. Kokomo, Indiana: Staley & Staley. See p. 23, 96.

• ***Summary:*** In the business directory section under "Cereal manufacturers" (p. 23) we read: Lane Bros. Health Food Co., 11 McCann.

On p. 96: Lane Bros., health food mfgrs., West Jefferson, Kokomo. George B. Lane, owner. Wife: Lillie. Their home is at 199 West Lincoln. Address: Kokomo, Indiana.

206. Kellogg, Ella Ervilla (Eaton) (Mrs.). 1900. Every-day dishes and every-day work. Battle Creek, Michigan: Modern Medicine Publishing Co. 206 p. Index. 21 cm. [1 ref]

• ***Summary:*** The wife of the famous Dr. John Harvey Kellogg discusses her system of meatless cookery. She lived 1852-1920. This book was copyrighted 1896.

Contents: Preface. Cereals. Macaroni. Fermented or yeast bread. Unfermented or aerated bread. Fruit. The leguminous seeds (soy is not mentioned). Vegetables. Soups (without milk, with milk), Eggs. Desserts. Pastry ("Dietetic evils of pastry–General suggestions for making pies"). Cake. Toasts (incl. Zwieback). The Battle Creek Sanitarium Food Company's Products (recipes using them; including Granola, Granose, Crystal Wheat, Gluten, Zwieback, Caramel-Cereal).

Sanitas Nut Food Company's Products (recipes using them; including Nut Butter, Nuttolene, Nut Meal {"Many persons suffer from biliousness, nervousness, sick-headache, and various forms of indigestion, from the use of butter, milk, and cream, without being aware that these substances are harmful to them. Persons suffering from dilatation of the stomach, a condition which is exceedingly common, must avoid milk and butter in all forms. Nut butter, nut meal, and nuttolene have been prepared as substitutes for butter and cream. In nut butter, the fat is in a state of perfect emulsion, so that it mixes well with water. Thus it does not interfere with digestion}," Protose, Granose, Almond Meal). Hints about every-day work (Economizing time, system in work, daily program of kitchen work, economizing money, economy of material, uses of stale bread, left-overs, waste of fuel, general suggestions for economical housework, order of clearing the table, washing the dishes, dish-cloth and towels, cleaning silver, care of table linen, disposal of garbage).

Peanut butter is called for as an ingredient in recipes on pages 166 and 170 ("An icing for the peanut cake may be made in the same way by using the peanut butter").

Note: This is the earliest English-language document seen (Nov. 2013) that mentions a non-dairy icing.

Almond butter is called for as an ingredient in recipes on pages 140 (one well-rounded tablespoonful in an icing for Almond pound cake), 155 (twice), 156 (twice), 166 (twice), 170, and 172 (twice).

The term "nut butter" appears on 32 pages; see p. 201 in Index.

The word "Vegetarian" appears in this book only once, in the titled of a recipe, "Vegetarian Boiled Dinner" (p. 164).

Bran (including wheat bran) is mentioned on pages 98 and 99 (3 times each in the section on soups), 100, 144, 169, and 197.

Near the end of this book are full-page ads for: Bromose (p. 207), Malted Nuts ("presented in the form of a fine granular powder," p. 208), Protose–vegetable meat ("This truly wonderful food product is, without question, the most remarkable discovery in dietetics which has been made within the last half century... Protose is a Perfect Substitute for flesh food... Send 10 cents for a sample can," p. 209),

Battle Creek Sanitarium Health Foods (Granose, Granola, Caramel-Cereal, Battle Creek Sanitarium Breakfast Food, Germless Oats, Germless Corn Grits, Crystal Wheat {sterilized, ready cooked}, Gluten Preparations, Diabetic Foods, A large variety of crackers and biscuit and other wholesome preparations. Superior canned goods. Warranted pure. Send for catalog and price list, p. 210).

Antiseptic charcoal tablets–antiseptic, absorbent. "Charcoal Tablets are not a panacea, but they have proved to be the moat valuable remedy we possess for morbid conditions arising from fermentation or decomposition of food in the stomach and intestines. They consist of a special form of vegetable charcoal, much superior to willow, freshly prepared, to which is added sulphur, one of our most valuable intestinal antiseptics, and diastase, a starch-digesting ferment. This will at once be recognized as a happy combination for combating the action of microbes in the alimentary canal," (p. 211). *The Stomach: Its Disorders and How to Cure Them,* by J.H. Kellogg, M.D. (p. 212). *The Home Hand-Book,* by J.H. Kellogg (p. 213). *Science in the Kitchen,* by Mrs. E.E. Kellogg, A.M. (p. 214). Address: A.M., Battle Creek, Michigan; Author of *Science in the Kitchen,* etc.

207. *Evening Star* (*Toronto, Ontario, Canada*). 1901. Malt Breakfast Food: A wonderfully delicious and nutritious breakfast food (Ad). Jan. 5. p. 13.
• ***Summary:*** "Princes and potentates of the past never enjoyed such a morning dish as Malt Breakfast Food affords... Kings and queens of the past would have given any price for such a palate-pleasing health food for the breakfast table."

"Your grocer sells Malt Breakfast Food. Ask him for a package; he will recommend it with pleasure.

Note: Neither the maker of this health food nor the company running this ad appear in the ad. Similar ads for this product ran in the *Evening Star* many times in 1901.

208. Goldberg, Bowen & Co. 1901. Monday Tuesday Wednesday (Ad). *San Francisco Chronicle.* Jan. 7. p. 10.
• ***Summary:*** "Wheatena
"Health Food Co.–25¢.
"reg'ly [regularly] 30¢ package."

209. *Vegetarian Messenger* (*Manchester, England*). 1901. Of health foods and vegetarian specialties: Write for the latest and most complete price list in the Kingdom (Ad). Jan. p. [4].
• ***Summary:*** This ¼ page ad (on an unnumbered page near the front) continues: "... and Xmas and New Year Novelties. 'Pitman' Health Food Stores, Birmingham.

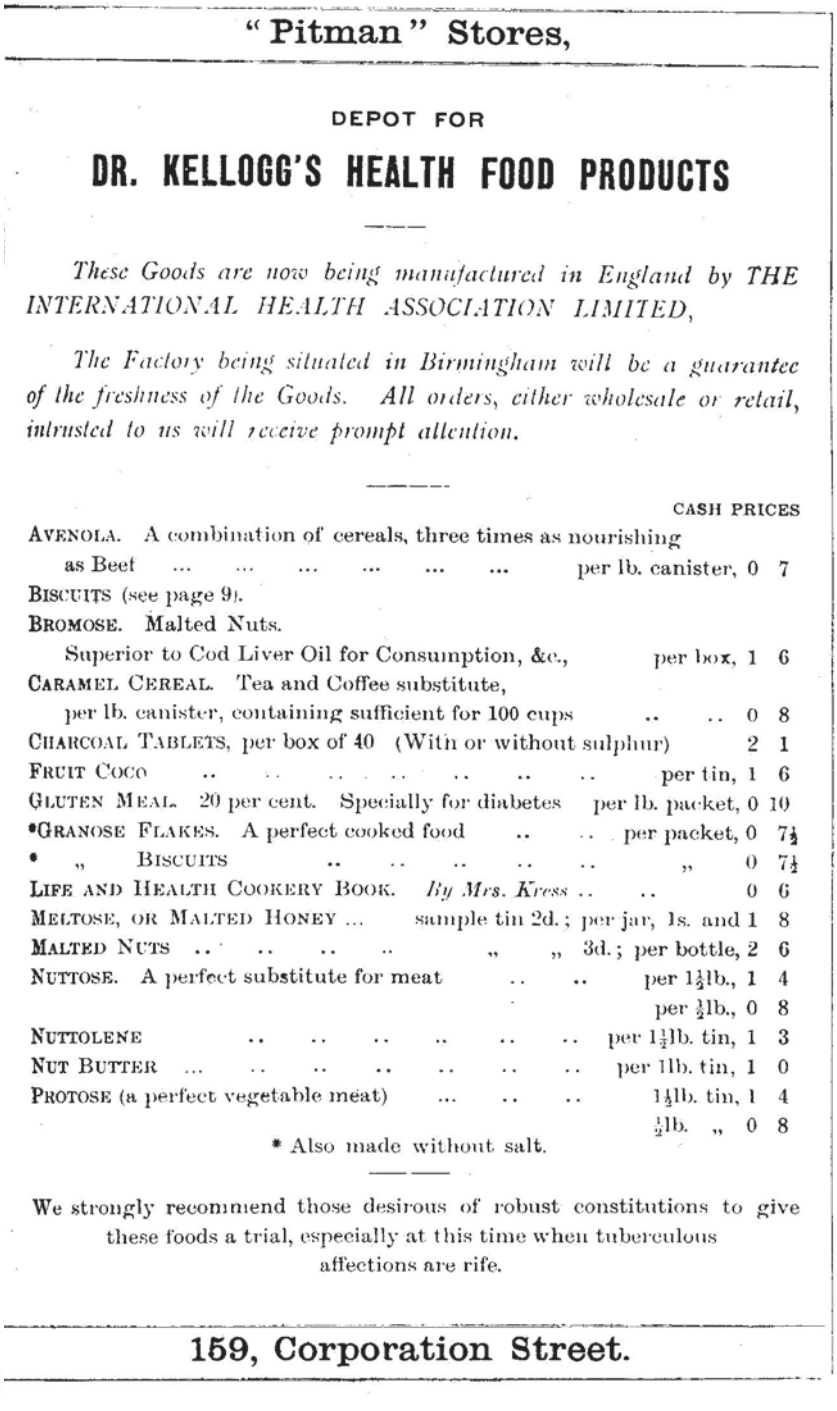
Note 1. This is the earliest English-language document seen (Sept. 2009) in England or the UK that contains the term "Health Food" or "Health Food Stores" (or Store, regardless of capitalization).

Note 2. This is the earliest document seen (Sept. 2009) that mentions "Pitman" or "Pitman Stores" in Birmingham, England, in connection with healthy foods. Pitman seems to be much less involved with making such foods than the International Health Food Association [International Health Association], also of Birmingham. IHA seems to have been the first importer of and then the first manufacturer of health foods in England and Pitman seems to have started the first health food stores. Yet it is not clear whether or not Pitman carried health foods made by IHA in its stores; it seems likely that they would have (in part since IHA apparently owned no retail stores), yet we have been unable to find any evidence to confirm this.

210. "Pitman" Stores: The depot for Dr. Kellogg's health food products. 1901. Birmingham, England: 1 p.
• ***Summary:*** See next page. A facsimile of this page appears on page 59 of the following book: Hill, Ray. 1998. *The Health Food Store: A Nostalgic Look at the First–Its Origins, Philosophy and Development.* Gloucestershire, England: NuHelth Books.

Hill's book states (p. 58) that this page appears in the "1901 February Pitman Price List."

"These Goods are now being manufactured in England by The International Health Association Limited.



"The factory being situated in Birmingham will be a guarantee of the freshness of the Goods. All orders, either wholesale or retail, intrusted to us will receive prompt attention.

The following products, and the price of each, are listed: Avenola. Biscuits. Bromose: Malted nuts. Caramel Cereal: Tea and coffee substitute. Charcoal Tablets. Fruit Coco Tablets. Gluten Meal. Granose Flakes. Granose Biscuits. Life and Health Cookery Book, by Mrs. Kress. Meltose, or Malted Honey. Malted Nuts. Nuttose, a perfect substitute for meat. Nuttolene. Nut Butter. Protose (a perfect vegetable meat). Address: 159, Corporation Street, Birmingham, England.

211. White, Ellen G. 1901. Manufacture of health foods. In: Testimony for the Church. 1901. Vol. 7. See p. 127-31.
• ***Summary:*** This talk, said to be under Divine Guidance, was presented on 16 Feb. 1901 at St. Helena, California. "I have a most earnest desire that in every place the work shall be carried forward in accordance with His commands. I see trouble ahead as high as mountains for our people in the way in which some things are now being done, and especially in regard to the health food business...

"With great skill, and with painstaking effort, Dr. Kellogg and his associates have prepared a special line of health foods. Their chief motive has been to benefit humanity, and God's blessing has rested upon their efforts... The Lord will teach His servants how to make food

preparations that are more simple and less expensive. There are many whom He will teach in this line if they will walk in His counsel, and in harmony with their brethren."

"In all our plans we should remember that the health food work is the property of God and that it is not to be made a financial speculation for personal gain. It is God's gift to His people, and the profits are to be used for the good of suffering humanity everywhere.

"Especially in the Southern States of North America many things will be devised and many facilities provided, that the poor and needy can sustain themselves by the health food industries..."

"... No one has a right to engage in the manufacture of these foods in any selfish way..." Address: St. Helena, California.

212. Parlin, E.E. 1901. Vegetarian restaurants in San Francisco. *California Missionary* 6(12):3. March 25.

• ***Summary:*** Seventh-day Adventists established some of the first vegetarian restaurants in San Francisco. "The first restaurant began in a very modest way in the rear of the food store at No. 1438 Market Street, and was confined to the family of sanitarium nurses and helpers. In December 1898, upon the removal of the health food store to No. 1436 Market Street, arrangements were made by which the restaurant was opened to the public, and a trained cook was secured from the St. Helena Sanitarium. About thirty-five persons, I am told, patronized the restaurant the first day it was opened. The idea of existing without the use of meat was a novel proposition to almost every one; but by means of lectures, demonstrations, and judicious advertising, an interest was awakened, which has steadily grown from that time to the present. 'Vegetarian cranks,' as they were frequently called, became more numerous...

Many of the customers were from down-town San Francisco. They "urged over and over again that a similar establishment be opened nearer the business portion of the city." But rents were very high there. "Finally, however, the present place, at 755 Market Street, was secured at a monthly rental of $150. Although it has dining accommodations for 60 persons at a time, "almost daily many persons go away because of inability to find a place at the tables.

"From the very beginning the class who have patronized the 'Vegetarian Cafe,' as it is now called, have been the professional and business men of San Francisco."

213. Kneipp Health Store Co. 1901. Sale agents for the United States for Father Kneipp's only genuine recipes (Ad). *Kneipp Water Cure Monthly and Herald of Health* (*The*) (*New York City*) 1(3):Unnumbered page. March.

© Copyright Soyinfo Center 2021

• ***Summary:*** "Also a complete stock of Kneipp's books, herbs, oils, tinctures, malt coffee, strength giving soup meal, Dr. Lahmann's and Bilz's nutritive salt cocoa, health foods, health underwear, linens and hygienic supplies."

Note: This is the earliest document seen (Nov. 2014) concerning the "Kneipp Health Store Co." or a store selling healthy foods connected with or owned by Benedict Lust. In March 1903 it was named "Kneipp Health Store" at the same address. Its name in advertisements changed frequently. In March 1913 it was "B. Lust Pure Food Store" at 121 East 4th St. In May 1913 it was the "Kneipp Pure Food" and in April 1914 "Pure Food Store," still at 121 East 4th. In Oct. 1922 it was named the "Kneipp Store" at 110 East 41st St." In Feb. 1933 it first used the name "Original Health Food Store," and was now located at 236 East 35th St.

In May 1913 (p. 322) this store first used the term "health foods" (or "health food") in one of its ads.

So was this really the "original" health food store? No! Fox & Co. in Hartford, Connecticut, was selling "health foods" by March 1879, and Newberry's in Los Angeles, California, was selling health foods by May 1895. Address: 111 E. 59th St. (between Lexington and Park Aves.), New York City. Phone: 1697–79th St..

214. *Good Health* (*Battle Creek, Michigan*). 1901. Dainty summer dishes prepared from the celebrated foods that have made Battle Creek famous (Ad). 36(7): July.

• ***Summary:*** This page consists of three large, horizontal photos and their detailed captains. They show: (1) Roast of Protose. "Serve with brown gravy, the recipe for which may be found in the Recipe book which may be had from the Sanitas Nut Food Co., Ltd." Note: Protose is a meatlike product made of peanuts and cereal (no soy) introduced in 1899 by the Sanitas Nut Food Co.

(2) Croquettes of Protose. "Form into croquettes, roll in granola, then in beaten egg, and again in granola. Bake until brown and serve hot, garnished with parsley." (3) "Malt honey balls.–Over freshly toasted granose flakes pour sufficient malt honey to hold the flakes together. Form into balls, and serve with fresh fruit of any kind.

At the bottom of the page is written: "Samples of the foods that are used in these dishes may be obtained by addressing the Battle Creek Sanitarium Food Co., or Sanitas Nut Food Co., Battle Creek, Michigan."

Note: This is the earliest document seen (May 2004) that mentions the Battle Creek Sanitarium Food Co.

215. Purina Mills. 1901. Ralston Breakfast Food: A breakfast for thirty people in a two pound package (Ad). *Kneipp Water Cure Monthly and Herald of Health* (*The*) (*New York City*) 2(7):199. July.

• ***Summary:*** An illustration shows the cereal box. On the front panel: "Health. A perfect food made from selected wheat rich in gluten." "Sliced dates and Ralston Breakfast Food make a delicious dessert. Our 'Little Book of Ralston Recipes' tells of other dainty dishes." "Purina Mills, 'Where Purity is Paramount.'" Address: 748 Gratiot St., St. Louis, Missouri.

216. Sanitas Nut Food Co., Ltd. 1901. Cow's milk kills babies: Malted nuts cures babies (Ad). *Good Health* (*Battle Creek, Michigan*) 36(7):Unpaginated. July.

• ***Summary:*** "By the thousand every year. The manure germ is always present in milk, and is now known to be the cause of *Cholera Infantum*, and other gastro-intestinal disturbances which are the bane of infant life, especially during the warm months. Cow's milk forms tough and indigestible curds. Cow's milk develops ptomaines which cause rickets. Cow's milk causes coated tongue and biliousness [peevish and ill-natured in disposition]. Cow's milk constipates.

"Cow's milk may be improved by mixing with malted cereals (malted milk or cream), and in various other ways, but it is cow's milk still, and often causes rank poison to the babe, and is not much less unwholesome for adults, often gastric catarrh, biliousness, periodical headache, and obstinate constipation.

"Malted nuts cures babies and adults of the mischiefs which milk creates, and is the one perfect substitute for mother's milk, a delicious and wholesome substitute for cow's milk." An oval photo on this full-page ad shows a baby. Address: Battle Creek, Michigan.

217. Battle Creek Sanitarium Food Co. 1901. Toasted Wheat Flakes (Ad). *American Kitchen Magazine* 16(1):p. xxv. Ads section at end. Oct.

• ***Summary:*** A ½-page ad. "Made by the world-famed Battle Creek Sanitarium Food Company of Battle Creek, Michigan. At last the work of achievement is accomplished, and Ceres offers the world the one of all whole wheat foods that is most acceptable to the palate and most healthful. By natural process, exclusive with us, starch, the chief element of all wheat foods, is transformed into dextrine by cooking, drying, recooking, and then hot air toasting, this preparing the way for ready digestion and perfect assimilation. No other food is completely cooked or can begin to compare with Toasted

© Copyright Soyinfo Center 2021

Wheat Flakes..."

An illustration shows a statue of Ceres, the Greek goddess of grain, holding a box of Toasted Wheat Flakes in her left hand. A youth, sitting on the floor, looks on.

Note 1. This is the earliest ad or document seen for "Toasted Wheat Flakes."

Note 2. A different half-page ad, titled "Toasted Wheat Flakes" and featuring another lovely woman, appears in this same volume, at the end of the Nov. 1901 issue, on page xxxi. Address: Battle Creek, Michigan.

218. Battle Creek Sanitarium. 1901. Battle Creek Sanitarium (Ad). *Bulletin of the American Medical Temperance Association* 8(4):Last page (unnumbered). Oct.

• ***Summary:*** In the top third on this full-page ad is an illustration of the huge Battle Creek Sanitarium. It is described as "The oldest and most completely equipped establishment of its sort in the world. Beautifully and healthfully located.

The 2nd third is "Branch institutions," those "which are conducted under the same general management as the Sanitarium at Battle Creek, Michigan. Each possesses special advantages due to locality or other characteristic features." They are: Colorado Sanitarium, Boulder, Colorado. St. Helena Sanitarium, or Rural Health Retreat, St. Helena, California. Nebraska Sanitarium, College View (Lincoln), Nebraska. Portland Sanitarium, Portland, Oregon. New England Sanitarium, South Lancaster, Massachusetts. Chicago Branch Sanitarium, Chicago, Illinois (David Paulson, M.D., Superintendent). Cleveland Branch of the Battle Creek Sanitarium, Cleveland, Ohio. Branch of St. Helena Sanitarium, San Francisco, California. Honolulu Sanitarium, Hawaiian Islands. Medical and Surgical Sanitarium, Guadalajara, State of Jalisco, Mexico. Institut Sanitaire, Basel, Switzerland. Claremont Sanitarium, Cape Town, South Africa. Skodsborg Sanitarium, Skodsborg, Copenhagen, Denmark. Sanitarium, Apia, Samoa. New South Wales Medical and Surgical Sanitarium, N.S.W., Australia.

Directory of health food factories: Battle Creek Sanitarium Food Co., Battle Creek, Michigan. Nebraska Sanitarium Food Co., College View, Nebraska. Colorado Sanitarium Food Co., Boulder, Colorado. Portland Sanitarium Food Co., Portland, Oregon. St. Helena Sanitarium Food Co., St. Helena, California. Basle Sanitarium Food Co., Basle, Switzerland. London Food Co., 70-74 Legge St., Birmingham, England.

Note: The correct name (as of Dec. 1901) of the "London Food Co." in Birmingham was probably either the "London Health Food Company" or the "International Health Association." Address: Battle Creek, Michigan.

219. Purina Mills. 1901. Ralston Breakfast Food is a hot weather blessing (Ad). *Atlantic Monthly* 88(529):47. Atlantic Monthly Advertiser. Nov.

• ***Summary:*** A ¼-page ad. The top half of the ad contains an illustration of a woman (bearing a checkerboard blouse) in a kitchen, with a box of Ralston Breakfast Food on the shelf, and a steaming bowl of the prepared food on the shelf. A clock on the wall show's that it's 6:55 a.m.–time for breakfast,' The text reads: "It cooks in 5 minutes–that's why... With fruit you have a delicious and complete breakfast, the effect of which is to nourish every part of the body without overheating the blood. A free sample for your grocer's name. Purina Mills. 'Where Purity is Paramount.'" Address: 822 Gratiot St., St. Louis, Missouri.

220. Health Food Co. 1901. Serve for breakfast at our

© Copyright Soyinfo Center 2021

expense the health food Wheatena (Ad). *Atlantic Monthly* 88(530):118. Atlantic Monthly Advertiser. Dec.
• ***Summary:*** "Most carefully prepared cereal on the market, and famous for its Rich, Nut-like flavor. The cheapest way for us to advertise is to have the whole family eat Wheatena one morning for breakfast. We will send free, Until January first, enough for an average family if you send us your grocer's name."

An illustration shows a box of Wheatena. "Ready in 2 minutes." Address: 61 Fifth Ave., New York.

221. Purina Mills. 1901. The world's fare (St. Louis, U.S.A. 1903) Ralston Purina Cereals (Ad). *Atlantic Monthly* 88(530):119. Atlantic Monthly Advertiser. Dec.
• ***Summary:*** "Don't confound them with foods of less quality that cost just as much–every package is guaranteed to contain the finest grain, hygienically milled to retain the nutritive elements which Nature intended. The most liked cereal of the century is Ralston Breakfast Food.

It represents the high quality maintained in every checkerboard package that goes forth from Purina Mills, 'Where Purity is Paramount.' Accept no substitutes, be sure you get the checkerboard kind.

"$1.00 and your grocer's name brings you the full... prepaid; 5 2-lb. packages and 1 12-pound sack of Purina... Flour–the biggest dollar's worth ever offered."

In the top 40% of the ad is an illustration of the World's Fair–soon to be hosted by St Louis. But instead a large building there are four large boxes of cereal (Ralston Breakfast Food, PanKake Flour, Ralston Health Oats), each topped by a cupola and flag, with tiny people walking among them. Address: Gratiot St., St. Louis, Missouri.

222. Macfadden, Bernarr Adolphus. 1901. Strength from eating: How and what to eat and drink to develop the highest degree of health and strength. New York, NY: Physical Culture Publishing Co. 194 p. 19 cm.
• ***Summary:*** The author (lived 1868-1955; born Bernard Adolphus McFadden in Mill Spring, Missouri) was a prolific and very popular popularizer of all aspects of health reform, especially "Physical Culture." But he wrote about everything from masculine virility to strengthening the eyes, nerves, or spine.

The preface of this book begins: "Strength! How we all yearn for this grand power!" Macfadden advocates a raw-food, vegetarian diet, but he allows the consumption of meat and fish, and has chapters on both.

Contents: 1. Appetite. 2. Mastication. 3. Process of digestion. 4. Air. 5. Water. 6. Overeating. 7. Three-meal plan. 8. Two-meal plan. 9. One-meal plan. 10. Meat, or mixed diet. 11. Vegetables. 12. Raw diet. 13. Cooking foods. 14. Health foods. 15. Food and occupation. 16. Food and temperature. 17. Alcoholic liquors. 18. Drinking at meals. 19. Ice water. 20. Coffee and tea. 21. The white-bread curse. 22. Elements of foods. 23. Muscle-making elements. 24. Fattening elements. 25. Mineral elements. 26. Wheat and wheat preparations. 27. Oats and other grains. 28. Vegetables. 29. Dairy products. 30. Fruits, berries, etc. 31. Meats. 32. Nuts. 33. Fish.

Macfadden opposes the use of coffee for several reasons (see p. 125-29): (1) It is a stimulant, pure and simple. (2) It has a bitter, acrid flavor, than is masked by sugar and cream. "Every natural wholesome food has a pleasant flavor, the very first time it is tasted by a child or adult in perfectly normal health." Yet most children strongly dislike the taste of plain coffee. (4) It is a common cause of dyspepsia–an observation made by all experienced physicians. In addition, it causes indigestion and serious irritation of the digestive organs.

Other titles include: "A strenuous lover: A romance of a natural love's vast power." "Superb virility of manhood." "Science of divine healing," etc.

Note 1. This is the earliest English-language document seen (July 2021) that contains the term "raw diet."

Note 2. Macfadden was also a publisher. In 1898 he founded *Physical Culture* magazine and introduced a method of healing called "Physcultopathy." Starting in 1919 he began to publish pulp magazines incl. *True Story, True Romances, True Detective, Photoplay,* and *Movie Mirror.* A documentary on the history of photography (PBS-TV, Oct. 1999) stated that during the 1920s in New York City there were three tabloid newspapers engaged in "the tabloid wars." These "unbelievably rowdy, raucous, in-your-face tabloids" were the *Daily News, Daily Mirror,* and "something called the *Evening Graphic,* which was probably the worst newspaper that has ever been published in North America." "The *New York Graphic* was the most extreme tabloid of all. It had the most sex, the most illustrations, the most scandal; it was the lowest-rent tabloid there was. One of its most interesting innovations was the so-called "composograph." The *Evening Graphic* decided that the real world and photographs of the real world were not interesting enough. "There are so many pictures out there that we're going to show you what you've never seen before." So Bernarr Macfadden, the editor, with his art directors come up with this idea of a composograph. They would stage the photograph, often using staffers at the newspaper, then later paste in the faces of the principals.

In 1947 Macfadden founded Cosmotorianism, "the happiness religion."

223. Rich, Burdett A.; Farnham, Henry P. 1901. The lawyers' reports annotated. Book LI. Rochester, New York: The Lawyers' Co-operative Publishing Company. 1013 p. Index.
• ***Summary:*** Page 332: "United States Circuit Court of Appeals, Second Circuit." Frank Fuller v. Barton Huff et al. Better known as "Fuller v. Huff." Basic findings: "1. The term 'health food' cannot be a technical trademark,

© Copyright Soyinfo Center 2021

either with or without the word 'company,' as the term is descriptive of quality.

2. "A mark, name, or phrase that has been so used by a person in connection with his business, or articles of merchandise as to become identified therewith and indicate to the public that such articles emanate from him cannot be used by others so as to lead purchasers to believe that the articles for sale are his, or so as to obtain the benefit of the market he has built up thereunder.

"3. The use of the name 'health food' to describe foods which the manufacturer had previously called "sanitarium foods" may be prevented by injunction at the suit of another manufacturer which had used the name for eighteen years before, even if the defendant may have been innocent in adopting the same name, where, after it had learned of the complainant's prior use, it continued to use the term in spite of remonstrance, with a guaranty to its purchasers against suits, though the packages plainly state the name of the manufacturer, and do not imitate or resemble in external appearance the packages of the complainant.

Ruling of July 5, 1900.

"The use of the prefix 'sanitarium' or the name 'Battle Creek,' in connection with the complainant's tradename, 'Health Food Co.,' does not enable the defendants, under the law, to escape infringement."

Page 333: "The addition of the word 'company' or its abbreviation 'Co.' to 'Health Food' does not make the phrase a legitimate trade-name capable of exclusive appropriation."

"Shipman, Circuit Judge, delivered the opinion of the court: The complainant, Frank Fuller, a citizen of New Jersey, commenced in the year 1875, under the name of 'Health Food Company,' to sell in the city of New York cereal products prepared for food, and has continued to the present time in that business and in the use of the same name, under which he has extensively advertised his goods by circulars, and in newspapers and magazines, at a cost of from $75,000 to $100,000. He has established agencies in Brooklyn, Chicago, Boston, Washington [DC], Philadelphia [Pennsylvania], St. Louis [Missouri], and Oakland [California]. The name 'Health Food Company' is displayed prominently upon the packages in which the various articles are presented to the consumers. About fifty different articles have been thus placed upon the market. The business has become large, and the name is unquestionably valuable to the complainant. In October, 1876, John H. Kellogg took charge, and has continued to be in charge, of the institution popularly known as the 'Battle Creek Sanitarium,' but incorporated in pursuance of the laws of the state of Michigan, in 1867, under the name of the 'Health Reform Institute.' This corporation is the owner of a large sanitarium, having branch institutions at various places, and has established in this country and elsewhere sub-organizations for the promotion of charitable and missionary work. The Battle Creek Sanitarium recommended to its patients particular kinds of cereal foods, and entered upon the business of manufacturing and selling these articles under the name of 'Sanitarium Foods.' In 1881 nineteen different articles were made. In 1888 the business of food manufacture was made a separate department, under the name of 'Sanitarium Food Company,' which advertised itself in April, 1893, as 'Sanitarium Health Food Company.' The reason for this, and a subsequent change of name, which preserved the words 'Health Food Company,' is stated by Kellogg in his deposition as follows:

"In April, 1893, our advertisement appears in *Good Health* [magazine] over the business name of 'Sanitarium Health Food Company.' This name we were led to adopt by the action of one of our old employees [Charles W. Post, developer of Postum {1895} and Grape Nuts {1897}. In 1929 the Postum Cereals company changed its name to General Foods Corporation], who, leaving the institution, set up in business in the same town, advertising himself under the name of the 'Battle Creek Health Food Company.' As quite a large proportion of our mail had for years been addressed to us as the 'Battle Creek Health Food Company,' we found this action a serious annoyance, and objected to it, with the result that an arbitration was agreed upon, the result of which was that the party referred to was required to change his name, which he did, adopting the title the 'Battle Creek Bakery Company.' We then added the word 'Health' to our business announcement, making it 'Sanitarium Health Food Company.' Our salesmen, however, in introducing our foods, so constantly made use of the term 'Battle Creek Sanitarium' in describing our foods, to distinguish between our institution and numerous other sanitariums, we finally, some two or more years ago, still further extended the business title of our food department to its present form,– the 'Battle Creek Sanitarium Health Food Company.' Our purpose in adopting the words 'health food' in our name was to protect ourselves against parties who sought to pirate the extensive business which we had built up, by assuming a name similar to ours, and making similar goods in the same town."

"In October, 1896, a retail grocers' food exhibition was held at the Grand Central Palace in New York city. The complainant exhibited his products at a booth, under the prominently displayed name, 'Health Food Company.' About 15 or 20 feet distant the defendant, Barton Huff, a citizen of the state of New York, as agent of the Health Reform Institute, exhibited its wares, and upon its booth was a placard containing the words 'Health Food Company,' in large letters, under the words 'Battle Creek Sanitarium.' The complainant remonstrated with Huff against the use of 'Health Food Company' as an infringement of the complainant's right, and threatened a suit. Huff said that he would bring the representation to the attention of the officers of the Health Food Department, but the use of the name did not cease. The food business of the defendant under its last name is extensively advertised, and, when the testimony

© Copyright Soyinfo Center 2021

was being taken, was said to amount to from $260,000 to $300,000 annually. The circuit court dismissed the bill upon the ground that the defendant's name was clearly distinguishable from the complainant's business name, and was not an unlawful appropriation. 99 Fed. Rep. 439."

"The decree of the Circuit Court is reversed, with costs, and the cause is remanded to that court with instructions to enter a decree for injunction against the defendant Barton Huff in accordance with the prayer of the bill, with costs."

Note: In short, J.H. Kellogg and the Battle Creek Sanitarium were ordered to stop using the words "Health Food Company" or "Health Food Co." in its company name. Use of these words constituted "unfair competition." Address: 1. Editor; 2. Asst.

224. Chicago Pure Food Co. 1902. Nut Food Samples (Ad). *Vegetarian and Our Fellow Creatures* (*Chicago*). Jan. 15. Unnumbered page near end.
• ***Summary:*** "Send prepaid for 35 cts. Four life-giving, strength-building, brain-nourishing foods. Malted Nut Bread, Malted Nut Cheese, Malto-Fruited Nuts, Nut Butter." Address: 3989 Cottage Grove Ave., Chicago [Illinois].

225. *Naturopath and Herald of Health* (*New York City*). 1902-1915. Serial/periodical. Edited and published in New York City by Benedict Lust, N.D. Frequency: Monthly. 25 cm.
• ***Summary:*** See next 2 pages. Preceded by *The Kneipp Water Cure Monthly and Herald of Health.* Other early names: *Hausdoktor. Amerikanische Kneippblatter. Liberator of Medical Thought. Phrenological Journal. Herald of Health and Naturopath.*

In 1908 the volume becomes much thicker because the German-language issues are now bound together with the English-language issues.

Starting with the January 1909 issue, the volume number suddenly and without explanation jumps from Vol. 9 No. 12 (Whole No. 107) in Dec. 1908 to Vol. 14 No. 1 (Whole No. 182) in Jan. 1909. What happened to those 75 missing issues? What was their title? The top of the title page, which is also new, states: "Formerly: The Amerikanische Kneipp-Blaetter (1896-1901). The Kneipp Water Cure Monthly (1900-1901). The German and English editions of the Naturopath (1902-1907). The Liberator of Medical Thought (1902-1908)." This new system of volume numbering would make sense if we took the earliest (1896) volume as Vol. 1. Benedict Lust is editor and proprietor, New York. "Published monthly, combined in English and German, since January, 1908. Devoted to Naturopathy: The art of natural healing and natural living. The science of physical and mental regeneration."

Kirchfeld & Boyle. 1994. p. 208. The "Naturopathic Societies were served by *The Naturopath and Herald of Health*, which became the official publication of the American Naturopathic Association."

The issue of Jan. 1914 (facing title page) states: "A circulation of over 25,000 copies monthly."

OCLC says (Oct. 2004): This periodical ceased in Dec. 1915 with vol. 20, no, 12.

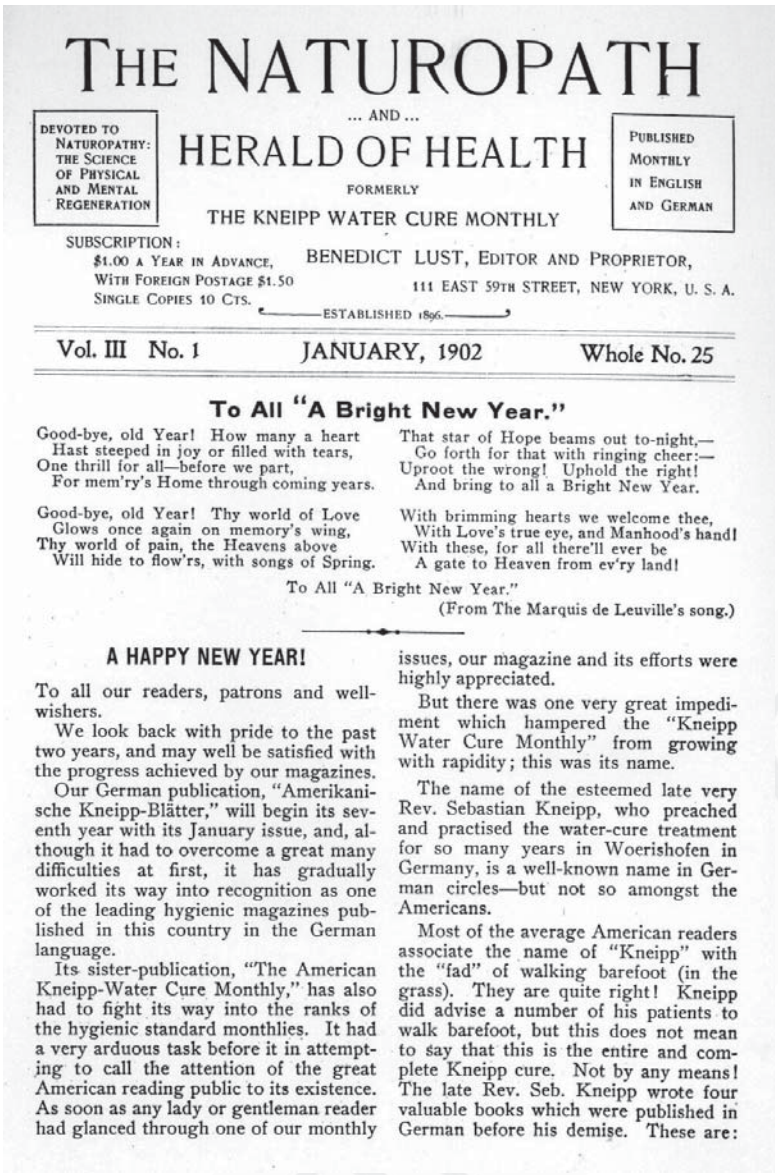
Note: The National College of Naturopathic Medicine (Portland, Oregon) has the earliest issues and the best set, but is missing 1906 (Vol. 7) and 1907 (Vol. 8). Address: 111 East 59th St., New York City.

226. *Vegetarian Messenger* (*Manchester, England*). 1902. Price list. Jan. p. 12.
• ***Summary:*** Lists prices for foods; beans, peas, lentils; prepared foods; biscuits; Plasmon; tea and coffee substitutes; nuts; jams; bottled fruit; oils; butter and lard substitutes [margarines and shortenings]; soaps; and cookery appliances, etc.

All are available for purchase from the Vegetarian Society's Food Stores at 19 Oxford St., Manchester, England.

The foods in the category "Prepared foods" are of special interest, since most are meat alternatives and would soon be called "health foods." Those known to be made (or imported) by the International Health Association Ltd. (renamed Granose Foods Ltd. in 1926). are followed by an asterisk: Dr. Nichol's Food of Health, Dr. Allinson's Food (packed it tins), Fromm's Extract (jar), Maggi's Soups (packet), Granose Flakes* (packet), Granose Biscuits* (packet), Avenola (packet), Bromose* (tin), Falona (tin), Meatose*, Nutmeatse* (tin), Vejola (tin), Nutvejo (tin), Malted Nut Caramels (tin), Nut Butter* (tin), Carnos, Golden Grain Meal (packet).

Cookery appliances include several Nut Mills, and "The Pitman Spoon."



Note: There are apparently no foods made by Pitman sold at this vegetarian store.

227. Marriage of Louis Carque and Margaret Cryan on 30 March 1902 in Manhattan, New York City, New York. 1902. Manhattan, New York City. March 30.
• ***Summary:*** Certificate No. 6036. Source: Ancestry.com.

228. Kneipp Health Store. 1902. Mother's milk (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 3(3):Unnumbered page at front. March.
• ***Summary:*** "... is undoubtedly the best food for infants. When this, however, is not procurable the best substitute for it only should be used... Dr. Lahmann's Vegetable Milk (*Pflanzen-Milch*). Dr. Lahmann's Health Cocoa (*Närsalz-Cacao*). Dr. Lahmann's Hafer Cacao (made with oats). Dr. Lahmann's (sweetened) Chocolate. Dr. Lahmann's Nutritive Extract (*Närsalz-Extract*). Dr. Lahmann's Närsalz Hafer Biscuits." Address: 111 E. 59th St., New York City.

ESTABLISHED 1896.

Vol. III No. 1 JANUARY, 1902 Whole No. 25

To All "A Bright New Year."

Good-bye, old Year! How many a heart
Hast steeped in joy or filled with tears,
One thrill for all—before we part,
For mem'ry's Home through coming years.

Good-bye, old Year! Thy world of Love
Glows once again on memory's wing,
Thy world of pain, the Heavens above
Will hide to flow'rs, with songs of Spring.

That star of Hope beams out to-night,—
Go forth for that with ringing cheer:—
Uproot the wrong! Uphold the right!
And bring to all a Bright New Year.

With brimming hearts we welcome thee,
With Love's true eye, and Manhood's hand!
With these, for all there'll ever be
A gate to Heaven from ev'ry land!

To All "A Bright New Year."

(From The Marquis de Leuville's song.)

A HAPPY NEW YEAR!

To all our readers, patrons and well-wishers.

We look back with pride to the past two years, and may well be satisfied with the progress achieved by our magazines.

Our German publication, "Amerikanische Kneipp-Blätter," will begin its seventh year with its January issue, and, although it had to overcome a great many difficulties at first, it has gradually worked its way into recognition as one of the leading hygienic magazines published in this country in the German language.

Its sister-publication, "The American Kneipp-Water Cure Monthly," has also had to fight its way into the ranks of the hygienic standard monthlies. It had a very arduous task before it in attempting to call the attention of the great American reading public to its existence. As soon as any lady or gentleman reader had glanced through one of our monthly issues, our magazine and its efforts were highly appreciated.

But there was one very great impediment which hampered the "Kneipp Water Cure Monthly" from growing with rapidity; this was its name.

The name of the esteemed late very Rev. Sebastian Kneipp, who preached and practised the water-cure treatment for so many years in Woerishofen in Germany, is a well-known name in German circles—but not so amongst the Americans.

Most of the average American readers associate the name of "Kneipp" with the "fad" of walking barefoot (in the grass). They are quite right! Kneipp did advise a number of his patients to walk barefoot, but this does not mean to say that this is the entire and complete Kneipp cure. Not by any means! The late Rev. Seb. Kneipp wrote four valuable books which were published in German before his demise. These are:

been accomplished at the Battle Creek Sanitarium during the past thirty-seven years. *Chicago Daily Tribune.* June 5. p. 7.

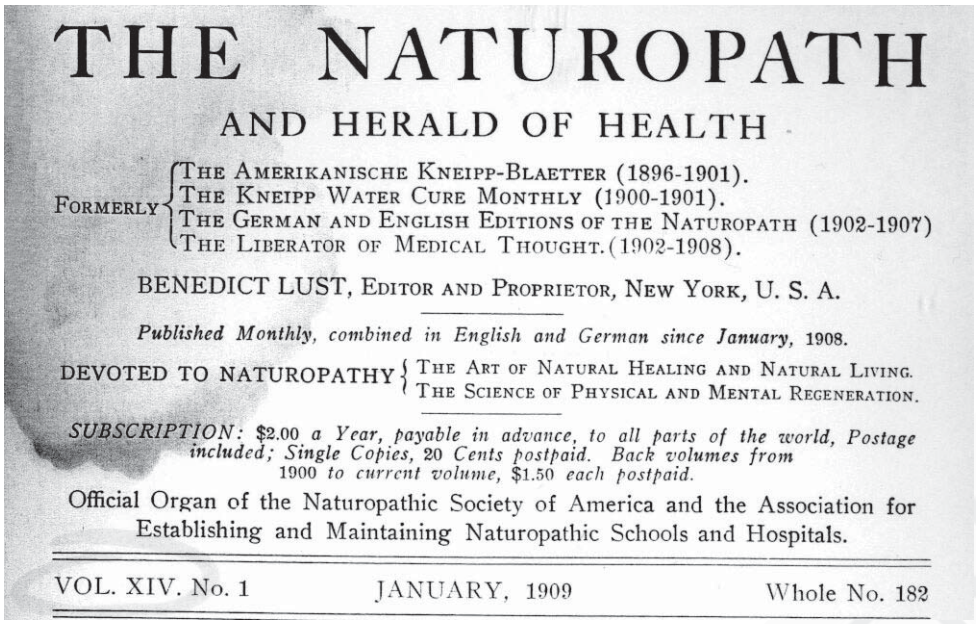
• ***Summary:*** "Just now, when the price of meat is so high as to make it an expensive luxury even to the well-to-do classes, it strikes me that it is a good time generally for people to learn the fact that meats are not the best foods obtainable to contribute to either health or strength."

"I was surprised to learn that the patients treated at this great institution were not only not given drugs for the cure of their ailments but were fed on a 'meatless' or vegetarian diet. At first I said these people are 'cranks,'... Gradually I sampled the 'vegetarian' dishes, and found them so temptingly prepared and served, that I soon learned to prefer them to the flesh foods. I was surprised at the great and pleasing variety of substitutes for meats in the line of cereal and nut preparations."

Dr. Kellogg, whom the writer has known intimately for about 6 years, "has been a vegetarian for 35 years or more [i.e., since at least 1867]. He is the hardest and most persistent worker that I know of." He works at least 14 hours a day. "He is a human dynamo of wonderful energy. Recently, when he was engaged almost night and day planning and working for the rebuilding of the Sanitarium [destroyed by fire on 18 Feb. 1902], I asked him how he could endure so much work. He answered in his uniformly courteous and cheerful way: 'O, that is simple; I live right.'" He has developed scientifically prepared foods from cereals and nuts for his thousands of patients. In "this line he is certainly the most prolific as well as the most successful inventor in the world."

These food products were primarily "for use in the Battle Creek Sanitarium, but as the thousands of patients who have been cured or benefited, learned the better way of living, they demanded that these foods be supplied to them at their homes, and as a result the Battle Creek Sanitarium Food Company and the Sanitas Nut Food Company came into existence, the former about 3 years ago [i.e., about 1899], and the latter about 7 years ago [i.e., about 1895].

"Dr. Kellogg is not the only living example of the superiority of a vegetarian over a meat diet. There are, I should judge, no less than 2,000 people in Battle Creek who do not eat meat, and who claim as a consequence that they enjoy better health on account of their method of living, and they certainly look healthier than the average persons who are meat eaters."



The Sanitarium "corps, numbering about 800, are all vegetarians, and the amount of work that they do, always with cheerfulness, amply demonstrates the fact that the 'Battle Creek Idea' is correct."

It is important to know that neither "the Battle Creek Sanitarium nor the Battle Creek Sanitarium Health Food Company is conducted for the purpose of making money." They are "wholly philanthropic in nature."

There follows a long column giving menus on specific days, starting with breakfast, 4 June 1902. Items preceded by an asterisk (*) are made by one of the two food companies. These include: Almond Cream, Bromose, Caramel Cereal, Cocoanut Crisps, Crystal Wheat, Gluten Biscuit No. 1, Gluten Wafers, Graham Crackers, Granola, Granut, Granose Biscuits, Granose Flakes, Malted Honey, Malted Nuts, Nuttolene. Protose, and Zwieback. Categories: Dextrinized grains. Unfermented breads. Eggs and milk are served, but no meat, fish, or poultry–except at the "sinners" table. Two photos show the Sanitarium, old and new.

• ***Summary:*** Continues: Health Reformer: 1(1867)-13(1878). Dr. Kellogg, a Seventh-day Adventist and head of the Battle Creek Sanitarium, was one of America's most prominent and respected doctors. This was his most important serial publication. On the title page of the Jan. 1879 edition is written: "Pure air, water, food. Health is wealth. A sound mind in a sound body. Proper clothing, ample exercise, adequate rest. A journal of hygiene devoted to physical, mental and moral culture. Cleanliness next to godliness. Temperance in all things." The magazine at this time is strongly opposed to the use of alcoholic beverages and tobacco. It supports vegetarianism, temperance, bread made from unbolted flour, and a healthful lifestyle. In 1879 there are many more articles about the dangers of alcohol and tobacco than about the benefits of a vegetarian diet, but by 1904 vegetarian articles predominated. In 1904 pneumonia was the most deadly disease in America. By the 1900s the cover of many issues stated that *Good Health* was established in 1866.

Richard Schwarz in his excellent book *John Harvey Kellogg, M.D.* writes of *Good Health:* By 1916 Dr. Kellogg estimated that more than 5 million copies of the magazine had been printed (p. 87). "Several years after he assumed the editorship of the *Health Reformer,* Dr. Kellogg decided that it needed a new name if the magazine and its teachings were to gain wider acceptance. He reasoned that public reaction to the word *reform* had changed. No longer did it call up visions of progress, advancement, and the substitution of truth for error. Rather, kellogg felt, the average person associated reform with revolution, controversy, discord, and radicalism. A more positive name was essential. He decided to rechristen the periodical *Good Health* and make it into a journal which would tell its readers how to find and maintain their health. A year after the name change [it changed in Jan. 1879], the Battle Creek Sanitarium officially acquired *Good Health* from the Seventh-day Adventist Publishing Association. Thus what had begun as a Seventh-day Adventist publication remained under Dr. Kellogg's control even after his separation from the church. Within a few months after he began his program of rejuvenating *Good Health*, he had succeeded in increasing its circulation to 20,000 copies a month... apparently the subscription list never grew much beyond 25,000, and it probably stayed considerably below that number most of the time" (p. 90-92). *Good Health* was always plagued by chronic deficits. Eventually the American Medical Missionary Board contributed more than $100,000 to keep the Kellogg journal alive (p. 220). After Dr. Kellogg's death, the Race Betterment Foundation published *Good Health.*

Excellent sets of this periodical are owned by both the National Library of Medicine and the Loma Linda Univ. Library Heritage Room (Loma Linda, California). The magazine ceased publication in Aug. 1953. Address: 451 Holloway Rd., London, N.

231. Purina Mills. 1902. Bring home a package of Ralston with the basket of peaches (Ad). *Smart Set* (*The*) (*New York City*) 7(4):Third from last page (unnumbered). Aug.

• ***Summary:*** A full page ad. "There's no dish to compare with Ralston and sliced peaches. This combination (served with cream and sugar) is a complete breakfast in itself–it's simply delicious. Try it tomorrow.

"The choicest wheat (so rich in gluten) gives to Ralston Breakfast Food its natural, wholesome flavor. Ralston is a pure, simple food, easily prepared... so be sure to buy a 15-cent package with the basket of peaches."

Across the top 1/3 of the ad is a wooden basket of peaches with a box of Ralston Breakfast Food (with a checkerboard border) in with the peaches. At the bottom left is an illustration of bowl of the cereal served with sliced peaches. To the right of it: "Purina Mills, 'Where purity is paramount.'"

233. Bilson (T.J.) & Co. 1902. T.J. Bilson & Co. (Ad). *Good Health* (*London*) 1(4):125. Sept.

• ***Summary:*** A ¼-page ad. "Supplies of the best dried fruits and nuts of all kinds.

"Also a full stock of the foods of the International Health Association [IHA], such as Bromose, Protose, Granose, Toasted Wheat Flakes, etc.

"Special offer made with respect to Welch's Grape Juice, a most delicious food-drink, and real tonic.

"Send stamp for full price list, in which you are sure to be interested."

Note 1. This small ad (3 inches high by 2.5 inches wide) is the earliest document seen (July 2009) (one of two ads on the same page) that mentions the "International Health Association," a Seventh-day Adventist organization, which was renamed Granose Foods in 1926. The IHA was an early (perhaps the earliest) manufacturer of health foods in England and the UK.

Note 2. This is the earliest document seen (July 2009) giving the name of a retail store that carries products manufactured by the International Health Association. Note that this retail store is located in London.

This same ad appeared in the Dec. 1902 (p, 228) and Jan. 1903 (p. 260) issues of this magazine. Address: 86 Gray's Inn Road, London, W.C. [England].

234. Miles (W.T.). 1902. Agent for the food products of the International Health Association... (Ad). *Good Health* (*London*) 1(4):125. Sept.

• ***Summary:*** "... and the Good Health Supply Department. All orders given prompt attention. Call and view samples.

Note 1. This small ad (1.75 inches high by 2.5 inches wide) is the earliest document seen (Dec. 2013) (one of two ads on the same page) that mentions the "International Health Association" or that gives the name of an agent that promotes and sells those products.

Note 2. As of July 2009, Croyden is near the outskirts of Greater London, about 7 miles directly south of the city center. Address: 24 Lower Coombe St., Croyden.

235. *Good Health* (*London*). 1902. The International Health Association of Legge Street, Birmingham,... 1(5):156. Oct.

• ***Summary:*** "... have added two new foods to their list of products during the last few months; namely Toasted Wheat Flakes, and, very recently, Malted Nuts. These foods are not eminently wholesome and nourishing but also very palatable. Toasted Wheat Flakes bids fair to out-rival the famous Granose Flakes, from which it differs in affording more resistance to the teeth, and in its rich, sweet taste. The Association richly deserves the increased patronage which it is enjoying."

Note: Toasted Wheat Flakes was on the market by Oct. 1901, and widely publicized by 1902. Granose Flakes was on the market by 1898. Both products were first launched in the USA by Seventh-day Adventists in Battle Creek, Michigan.

236. Purina Mills. 1902. Get a wagon free for your children: Ralston Purina cereals (Ad). *World's Work* (*The*) 4(6):83 World's Work Advertiser. Oct.

• ***Summary:*** A ¼-page ad. The top half of the ad contains an illustration of a boy pulling a small wagon from the front and a girl pushing it from the rear. The wagon is piled high with boxes of Ralston Purina Cereals, each with a checkerboard border. On the side of the wagon, in big letters: "Ralston

© Copyright Soyinfo Center 2021

Purina Cereals. Famous Health Foods.

The text reads: "Only one wagon to a family. Send us $2.00 and your grocer's name and we will send you Freight Paid, (everywhere east of the Rocky Mountains,) an elegant Wagon, strongly built, with iron axles, size 2 feet long by 14 inches wide, containing 5 pkgs. Ralston Breakfast Food, 1 pkg. Ralston Health Oats, 1 pkg. Ralston Barlet Food, 1 pkg. Purina Pankake Flour, 1 pkg. Ralston Hominy Grits and 2 12-lb sacks Purina Health Flour,–$2.00 worth of Cereals.

"Purina Mills, 'Where Purity is Paramount.'" Address: 803 Gratiot St., St. Louis, Missouri.

237. *Good Health* (*London*). 1902. It is surprising how many different health foods are on the market nowadays. 1(7):220. Dec.

• ***Summary:*** "Evidently the public interest in the diet question is growing. We have been pleased to learn that the factory of the International Health Association at Birmingham, is running night and day, and even then finds it difficult to supply the demand. Its leading products, Granose Flakes and Biscuit, and Toasted Wheat Flakes, have, in common with the well-known Shredded Wheat Biscuit, a definite status at the breakfast table in thousands of homes. Thoroughly cooked cereals of this general class are decidedly superior to soft, sloppy foods."

Note: This is the earliest English-language document seen (June 2009) that contains the term "health foods" in connection with Europe or England.

238. Lust, Benedict. 1902. Introducing the new editor. *Naturopath and Herald of Health* (*The*) (*New York City*) 3(12):522-23. Dec.

• ***Summary:*** "For seven consecutive years I have been conducting at least four different lines of business–a Sanitarium [at Butler, New Jersey], an Institute [in New York City, caring for patients], a Kneipp-Store [at 111 E. 59th St., NYC, making and selling health foods], and a Magazine. Any one of these to be advanced successfully would demand one's whole time. And the fact that they all partake of the nature of a Reform campaign makes the need more urgent for undivided and undissipated attention."

Now Edward Earle Purinton will take over as editor of this magazine, however Lust will continue to be actively involved.

239. *Naturopath und Gesundheits-Rathgaber* (*Der*) (*New York City*). 1902-1912. Serial/periodical. Published in New York City by Benedict Lust, M.D. Vol. 3, No. 1 is Jan. 1902. [Ger]*

• ***Summary:*** Kirchfeld & Boyle. 1994. p. 313. This is the parallel German-language edition of Lust's *Naturopath and Herald of Health.* It is owned by National College of Natural Medicine in Portland, Oregon. According to WorldCat (Nov. 2014) no other library in the world owns any issues of this periodical. Address: New York.

240. Miles, Eustace Hamilton. 1902. Avenues to health. London: Swan Sonnenschein & Co, Ltd.; New York, NY: E.P. Dutton and Co. 438 p. Illust. Index.

• ***Summary:*** In Chapter 15, "Diet and feeding," Miles gives a full-page list of protein foods that he believes are nourishing and free from harmful elements. "I certainly find them pleasant to the taste." These include:

"Foods of the International Health Food Association (70-74 Legge Street, Birmingham; Battle Creek, Michigan, U.S.A.). Besides Protose, Nuttose, and Malted Nuts or Bromose (over 20 per cent. of vegetable Proteid), Granose is a excellent Grain product."

"Pitman's Vigar Oil (for Salads, etc.)."

"These and other food products can be ordered through the Pitman Stores, Corporation Street, Birmingham."

Note 1. The "International Health Food Association" was probably correctly named the "International Health Association"; in 1926 it became Granose Foods. It may have been the earliest known company in England that used the term "Health Food" or "Health Food Co." in its company name.

Note 2. On the last (unnumbered) page of the book is a long list of "Works [mostly books] by Eustice Miles, M.A." A summary of the prizes he won in racquets, tennis, and squash, etc. appears at the top of the list. He was a fine, well known athlete. Eustace Miles lived 1868-1948, and was at his peak of athletic performance in about 1897-1902. Address: Author, England.

241. United States Congress. House Committee on Interstate and Foreign Commerce, United States 57th Congress, 1st session. 1902. Hearings before the Committee. Washington, DC. 637 p. See p. 325.

• ***Summary:*** The section titled "Digest of testimony. I. Pure and impure foods" states (p. 325): "Mr. Hanes, a salesman for the Battle Creek Health Food Company [Michigan], says that most of the products of his company are ready cooked. He believes that no preservatives whatever are used, not even salt. Some of the foods consist of preparations of wheat and other grains, and others of nuts, either by themselves or combined with cereals and fruits. A full line of crackers and biscuits is offered in which no baking powder, soda, or lard is used. No animal fats are employed. A peanut butter is used, made by roasting and grinding peanuts. (201-264.)"

The food value of gum gluten in comparison with other cereal products and so-called glutens: A complete digest of our present knowledge of its characteristics and application in dietetic therapeutics. New York City, NY: The Pure Gluten Food Co. 63 p. Undated. 17 cm. [3 ref]

• ***Summary:*** This book is designed to prove that the

© Copyright Soyinfo Center 2021

company's gluten products, named "Gum Glutens," are superior to other gluten products, to broader their use from mainly diabetics to the general public, and to show they can be used therapeutically to treat a wide range of common ailments. The relatively new company is owned by Mr. Arthur S. Hoyt, who is head of the long-established Hoyt's Wheat Starch industry, one of America's largest wheat starch manufacturers. It is located at Chamber St. and West Broadway in New York City. The company makes various products: *"Gum Gluten ground* and *Self-raising, Breakfast Food, Crackers, Glutenettes,* and *Macaroni."* This document is undated but (based on the statement that a July 1902 quotation was "recent" [p. 26]) it was probably published in late 1902 or early 1903.

Contents: Introduction. What is gluten?: Why called "Gum Gluten," physical characteristics of gluten, chemical characteristics. Gluten vs. meat (which is the natural food of man?): Primitive food of man, superiority of vegetable nutrition, man's food and his anatomical structure, strength and endurance of vegetable feeders, the ethical side, specific objections to the vegetable class, the people, health and meat prices, animal food inadequate for normal cell-growth. Genuine and so-called glutens: Observations by the examiners of so-called glutens, testimony of the U.S. government chemists, government analyses of our gum glutens, our claims substantiated by U.S. government analyses, ethics and advertising, the reason and remedy for food-sickness. The so-called cereal health-foods versus the U.S. government chemists: Table of 34 cereal breakfast foods, the above table and the manufacturer's claims, summarized facts, the individuality of our gum glutens, palatability and variety. Physiological characteristics of gluten and its food value in health and disease. Gum Gluten as manufactured and presented by the Pure Gluten Food Company: Gum Gluten compared with all cereal breakfast foods and so-called glutens, food selection, "vital force" and cooked, predigested, malted and peptonized foods. Therapeutic application of Hoyt's Gum Gluten Foods: Dyspepsia, gastritis, etc., diabetes mellitus, rheumatism, gout and the uric acid diathesis, obesity, convalescence, other diseases and conditions (anaemic and chlorotic, nursing mothers, enciente, aged, enfeebled, the invalid), fabrications from our Gum Gluten Ground. Comparison in nutritive value and cost of Gum Gluten of wheat with meat and with the cereal foods of the market, based on scientific analysis: Summarization.

"The modern application of rational dietetics to internal therapeutics has brought Gluten to the forefront as the speediest and most promising agency in combating diseased conditions... It may be said that there is no other, single food-substance in the whole realm of Nature so important and valuable in human diet as this chief nourisher, resident in all vegetable forms. Gluten is the prime, structural necessity of cereal growth, the spinal column in all vegetable life. On account of its close resemblance to the fibrous part of meat, it has been referred to as 'vegetable fibrin,' or more fancifully, as 'the lean meat of the vegetable kingdom.' Distinctively, it is the one great muscle-maker of the cereal grains....

"Gluten, the great nutritive principle of the wheat-kernel is chemically classed as a 'Gum.'... Gluten being the nitrogenous principle of the entire vegetable series, stands related to that grand division as do the albuminoids to the Animal Kingdom."

Wheat flour, containing 10% protein, contains the following chief kinds of proteids: Gliadin 4.25%, glutenin 4.25%, globulin 0.70%, albumin 0.40%, and proteose 0.30%.

"Both from a chemical and physiological standpoint Gum Gluten stands out among the muscle makers of Nature as *the one food substance* against which not a single vital objection can be urged. It is a perfect food to build up the perfect man. It is a noble food for young or old, for the well and strong, and especially for the sick, feeble and ill-conditioned, whose systems are in a state of low and waning vitality. It makes pure, rich blood, and this is an effective germicide and anti-septic, able to destroy all the poisonous micro-organisms which enter the system to prey on tissue and function."

One pound of Gum Gluten costs 20 cents and contains 54% (8.6 ounces) of protein. One pound of sirloin steak costs 20 cents and contains 2.5 ounces of protein. This 1 pound of protein costs $0.37 compared with $1.28 from sirloin steak. The leading 40 cereals cost on average 12 cents a pound and contain nearly 14% protein.

Note: This is the earliest document seen (Nov. 2002) that contains industry or market statistics for wheat gluten by individual companies. Address: Prof.

243. Purina Mills. 1903. Here's a perfect feast: Ralston Breakfast Food and Purina PanKakes (Ad). *Outlook* (*The*) (*New York City*) 73(5):Back cover. Jan. 31.
• ***Summary:*** A full-page ad. An illustration shows these two foods on a large cloth-covered tray against a read and white checkerboard. At the bottom two corners of the ad are boxes in which the two foods are sold.

The text: "These 2 packages for 25 cents at your grocer's." "Remember, these products are 'Appreciated in a Million Homes' which is a magnificent recommendation. Insist on getting Checkerboard Packages. Made by.

"Purina Mills, St. Louis [Missouri]. 'Where Purity in Paramount.'"

Note: This ad also appeared on the back cover of *Everybody's Magazine*, Feb. 1903.

244. *Good Health* (*London*). 1903. Our advertisers are perhaps entitled to a few words of praise. 1(8):252. Jan.
• ***Summary:*** "We need only say what the readers have already observed, that we put up the bars pretty high and only really meritorious enterprises are able to get in at all.

© Copyright Soyinfo Center 2021

In fact, we consult our readers' interests in the matter. Thus we advertise the food products of the International Health Association, not only because it is a first-class British firm worthy of hearty support in its efforts to put good foods on the market, but also because these particular foods possess special value for those who are adopting a reformed dietary. The same general statement would apply to the Hovis Co., Briggs Indian Food Co., the Natural Food Co., and other firms we might mention.

"Confirmed flesh-eaters sometimes say, 'If we give up meat and fish, what is there left to eat?' A good answer to such a question would be to hand the person one of the price lists of the three well known firms who cater especially for food reformers. We refer now to the Pitman Stores, Corporation Street, Birmingham; Mr. T.J. Bilson, 86 Grays Inn Road, London, W.C.; and Mr. Frederick Bax and Son, 35 Bishopsgate Street Without, London, E.C."

245. Pitman Stores. 1903. The Banana Perfect Food Biscuit: An ideal present (Ad). *Vegetarian Messenger* (*Manchester, England*). Jan. Inside front cover.

• ***Summary:*** "The 'Pitman' Stores have now succeeded in producing a Banana Biscuit, which is pronounced by all who have tasted it to be 'Simply Perfect.'"

It "consists of a scientific combination of the Finest Jamaica Banana Flour, Finest Whole Wheat-Meal Germ Flour, the Pure Fat of Selected Nuts and the Soluble Proteids of Pure Milk. The Biscuit contains over 20% of Proteids (Albumen).

"Weight for weight 1-lb of Banana Biscuits contain more nutriment than 3-lbs. of best lean Beef.

"Invaluable and sustaining to: Athletes and brain workers, invalids and the convalescent, those suffering from weak digestion, and those in perfect health.

"1/- [1 shilling] per lb.; per Tin 1/2 [1 shilling 2 pence] & 2/6. Sample Box, Post Free for Three Stamps, with Catalogue of Health Foods, 64 pages.

"From the Sole Manufacturers: 'Pitman' Stores, Health Food Specialists, Birmingham. The largest vendors in the British Isles. Agents wanted everywhere. Liberal discounts to the Trade." Address: Birmingham [England].

246. *Good Health* (*London*). 1903. Malted Nuts, the new food which the International Health Association is putting on the market,... 1(9):285. Feb.

• ***Summary:*** "... affords the best hot, nourishing drink that we know of. A cup of hot malted nuts may be prepared in a moment, and is in such form that it is ready for immediate assimilation into the system. It is not only far superior to tea, coffee, or cocoa, but contains a great deal more nourishment than bovril or any other meat extract, as well as being free from the harmful extractives contained in these animal foods."

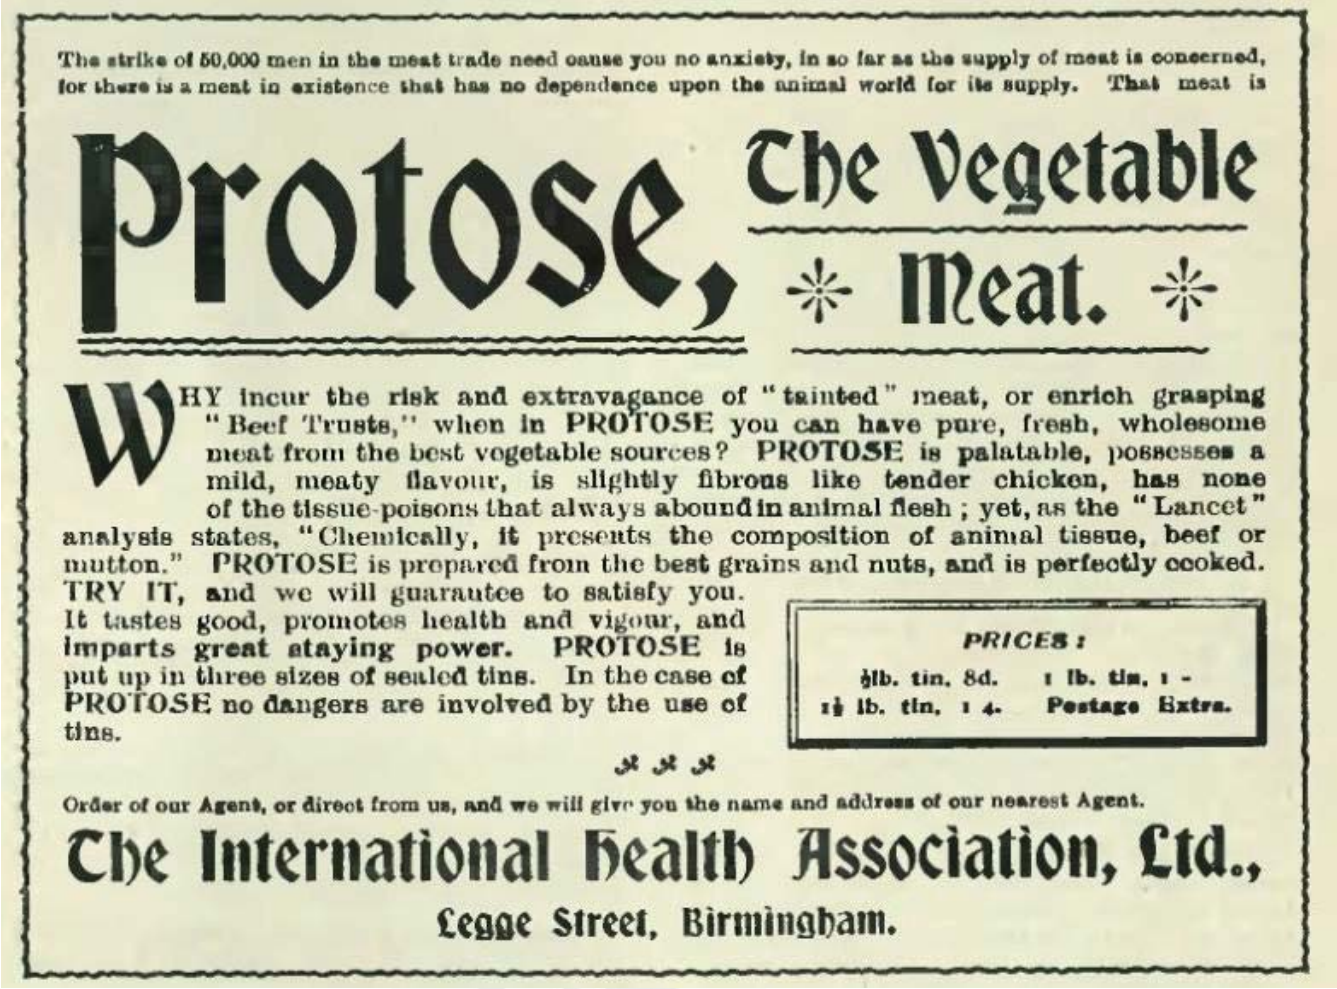
247. International Health Association. 1903. Health foods (Ad). *Good Health* (*London*) 1(10):319. March.

• ***Summary:*** See next 2 pages. A full-page 2-column ad with a large bold title. The introduction, spanning both columns, states: "The foods included in the following list are called 'Health Foods' because they are entirely free from all that is injurious, and contain just the elements required to build up the human system, both in health and disease. They are made from the purest materials, combined in the proper chemical proportions, and so perfectly cooked as to be easily digested by all."

Under the fairly large words "Price list" (also spanning both columns), the name of each of 14 foods appears underlined in large bold letters, followed by a detailed description and the price in regular size type. The foods are:

Granose Flakes (crisp flakes in packets containing about 13 ounces, 7½*d.*) Granose Biscuits ("The same as Granose Flakes but pressed into biscuit form." Sold in boxes). Toasted Wheat Flakes ("Sweetened with Malt Honey (Nature's Health Sweet)," Makes a "delicious breakfast dish." Serve warm or cold)."

Avenola (A combination of grains. "Makes porridge in one minute." Also tasty puddings. Packed in an air-tight canister). Nut Rolls (Made from "whole meal and finely ground nut meats, shortened with sweet nut oil. Very suitable for those who have to put their dinners in their pockets"). Gluten Meal (Made from wheat gluten for "diabetics and people who cannot digest starch").



Nut Butter ("Made from cooked nuts only. Can be used for shortening, flavouring soups, or for table purposes. When diluted with hot water it forms a delicate cream. In 1 lb tin"). Caramel Cereal ("A healthful and fragrant substitute for tea and coffee, prepared from cereals... One pound makes nearly 100 cups. Packed in air-tight canister. 8*d.*). Protose ("Vegetable Meat... It provides the same elements of nutrition that are found in the best meat, without any impurities. Liked by almost everyone from the first... In ½ lb. tin" 8*d.*). Bromose ("A combination of malted cereals and pre-digested nuts"). Fruit Bromose ("The same food as Bromose, combined with figs"). Wheatmeal biscuits. Oatmeal biscuits. Fruit wafers ("Made from the best flour and dried fruits, shortened with nut fats").

Across the bottom: "A package of assorted samples of the above foods will be sent, post paid, one receipt of One Shilling. Can also be obtained from your *Good Health* agent. Recipes furnished."

Note: This is the earliest ad seen (June 2009) for the various foods made or sold by the International Health Association of Birmingham. A few of these foods may be made in Battle Creek, Michigan, and imported into the UK. Address: Birmingham [England].

HEALTH FOODS

THE foods included in the following list are called "Health Foods" because they are entirely free from all that is injurious, and contain just the elements required to build up the human system, both in health and disease. They are made from the purest materials, combined in the proper chemical proportions, and so perfectly cooked as to be easily digested by all.

PRICE LIST.

Granose Flakes.—The entire wheat berry perfectly cooked and ready for use, in the form of thin, crisp flakes Can be eaten by persons with delicate digestion, infants, invalids, and athletes with equal advantage A perfect food. In packets, containing about thirteen ounces, ...7½d.

Granose Biscuits.—The same as Granose Flakes, but pressed into biscuit form. Per box, ...7½d.

Toasted Wheat Flakes.—Sweetened with Malt Honey (Nature's Health Sweet). To thoroughly cooked thin wheat flakes, a preparation of the finest Malt Honey is applied, making a most delicious breakfast dish. May be made into a *warm* breakfast dish in two minutes. In 1 lb. Packets, ...8d.

Avenola.—A combination of choice grains, combined in the proper proportion to secure perfect nourishment. Makes porridge in one minute. Makes delicious puddings. Packed in air-tight canister. In 1 lb Package,.....7d.

Nut Rolls.—A nutritious food, made from whole meal and finely ground nut meats, shortened with sweet nut oil. Very suitable for those who have to put their dinners in their pockets. In 1 lb. box,.....5d.

Gluten Meal.—Gluten, or albumen, is the life element of the wheat, the proportion of gluten present determining the food value of the grain. Diabetics and people who cannot digest starch are obliged to depend largely upon gluten, and such will find our gluten preparation unexcelled for quality and cheapness. Per 1 lb. Package 20 %, 10d.
" " " 40 %, 1/8.

Nut Butter.—Made from cooked nuts only. Can be used for shortening, flavouring soups, or for table purposes. When diluted with hot water it forms a delicate cream. In 1 lb. tin,.....1/-.

Caramel Cereal.—A healthful and fragrant substitute for tea and coffee, prepared from cereals. Easily made and exceedingly cheap. One pound will make nearly 100 cups. Packed in air-tight canister. Per package,.....8d.

Protose.—Vegetable Meat. A tasty, nutritious, and easily digested food. It provides the same elements of nutrition that are found in the best meat, without any impurities. Liked by almost every one from the first. Can be eaten cold or prepared in any way. Recipes furnished. In 1½ lb. tin, 1/4. In 1 lb. tin, 1/-. In ½ lb. tin,.....8d.

Bromose.—A combination of malted cereals and pre-digested nuts. Makes good blood very quickly. It is greatly superior to Cod Liver Oil for consumption and all other wasting diseases. Pleasant to the taste. In elegantly embossed box, containing about 1 lb.,....1/6.

Fruit Bromose.—The same food as Bromose combined with figs. Same price.

Wheatmeal Biscuits.—Shortened with Nut Oil and Sweetened. Per lb.,.....5d.

Oatmeal Biscuits.—Sweet. Per lb.,.....6d.

Fruit Wafers.—Made from the best flour and dried fruits, shortened with nut fats. Per lb.,.....8d.

A package of assorted samples of the above foods will be sent, post paid, on receipt of One Shilling. Can also be obtained from your *Good Health* agent. Recipes furnished.

"In answering advertisement kindly mention 'Good Health.'" Address: Birmingham [England].

252. Ralston Purina Company (The). 1903. Ralston Purina Foods (Ad). *Delineator* (*The*) (*New York City*) 61(6):1090. June.
• ***Summary:*** A vertical ¼ page ad. An illustration shows a man seated on a chair, holding a book at which two children are looking. "Introducing the Ralston Purina Miller–a good, wholesome fellow, who makes all the good things in checkerboard packages, at the Big Mill, 'where purity is paramount."

He explains that the company makes Ralston Health Oats (for cold mornings), Ralston Breakfast Food (made of wheat; good year round), Purina Health Flour (for making whole wheat bread). Next to his chair is a sack of Purina KornKins and a box of Ralston Cereal Coffee.

253. *New-York Tribune.* 1903. Health food waitresses: Corsets forbidden and the girls must eat this Boston restaurant's provender. Sept. 21. p. 4.
• ***Summary:*** "By telegraph to the Tribune. Boston, Sept. 20.–A new vegetarian health food restaurant has been opened in the wholesale district, in which the waitresses are obliged to work without corsets and take daily physical culture exercises. They are not allowed to eat anything except the regulation foods served in the restaurant, as the management wishes not only to serve health food, but to have the girls who place it before the customers act as living exponents of the new health system.

"All the girls are pretty and plump and can exhibit muscle creditable to a gymnast."

254. *Los Angeles Times.* 1903. Some good recipes. Oct. 29. p. A4.
• ***Summary:*** These are home-made recipes for commercial products. "Home-made Protose: As most of our readers know, 'prostose' is a favorite upon vegetarian bills of fare. Soak two cupfuls of fine bread crumbs in one cupful of hot water, in which dissolve a teaspoonful of butter, a saltspoonful of salt, and a dash of paprika. Mix in a cupful of chopped nut kernels. Beat one egg and add to bind the whole together. Make into a loaf and bake for an hour.

"You can bake it in a buttered mould and turn it out, if you prefer. Or mould [mold] croquettes, roll in cracker crumbs and raw egg, and set on ice for two hours before frying in deep fat."

255. Pitman Stores. 1903. 'Pitman' uncooked fruit and nut cakes, &c. (Ad). *Vegetarian Messenger* (*Manchester, England*). Nov. Inside front cover.
• ***Summary:*** "Complete Foods that make Muscle and Brain, that provide the Nerve and Stamina for the Athlete, and suit the palate of the Epicure.

"Ready to eat. Make splendid sandwiches.

"During his training and great walk in August and September of nearly 600 miles in 10 days, Richard Dickinson, the Lancashire working man, lived entirely on these cakes, together with fresh fruit, drinking nothing and losing nothing in weight. Made in Half-pound cakes to fit the pocket in the following varieties: Bananut and muscatalmo. Datanut and frutanut. Fig and ginger and date and ginger. Fig and almond and date and almond. Fig and cocoanut and date and cocoanut. Vigar fruit and nut wafers, to varieties in box. Bananut outfit, in beautiful decorated box, a three-course Luncheon."

260. *Washington Post.* 1904. Beauty should be lasting. March 6. p. B6.
• ***Summary:*** From the New York Press: "The woman in the health food store was communicative and well fortified with facts. 'There is no reason,' she said, 'why a woman should not grow more attractive personally as she advances in years, provided she lives in harmony with the laws of nature...'" She cites as examples Helen of Troy, Cleopatra, Aspasia [wife of Pericles], Anne of Austria, Catherine of Russia, and Mlle. Recamier. "'From thirty-five to fifty should be the richest and best years of a woman's life.'"

261. *Los Angeles Times.* 1904. Naturopathic "kick." March 10. p. A2.
• ***Summary:*** "Legitimate massage experts think they have a just complaint against the large number of fake massage and bath parlors which have sprung into existence since the crusade against the red light district began. Dr. Carl Schultz and Dr. J.V. Walden, who are interested in a naturopathic institute on Fifth street, sent a communication to the Council yesterday complaining of the large number of bawdy houses now operating as massage parlors... They ask the Council to pass an ordinance making it a misdemeanor for women to be employed to give massage treatments to me and requiring all massage operators to secure a certificate before practicing naturopathy."

262. Carqué, Otto. 1904. The folly of meat-eating. *Naturopath and Herald of Health* (*The*) (*New York City*) 5(9):211-14. Sept.
• ***Summary:*** An excerpt from his book of the same title.

263. Carqué, Otto. 1904. The diagnosis from the eye. *Naturopath and Herald of Health* (*The*) (*New York City*) 5(9):226-27. Sept.
• ***Summary:*** "A remarkable book has just been published entitled 'The Diagnosis from the Eye' by Dr. H.E. Lane–apparently the work of years of careful observation and research–which will undoubtedly attract wide-spread attention, as it treats of a new discovery whose teachings will greatly modify the present methods of diagnosing diseases." A summary of the most important points of this new doctrine is given.

Note: The book, by Henry Edward Lane, M.D., was published in 1904 by Kosmos Publishing Co. (Chicago, Illinois; the same company that published Carque's books) and by L.N. Fowler & Co. (London). The author advocates a fruitarian, raw food diet, as being the healthiest.

264. Chandler, Katharine A. 1904. How almonds are grown. *Sunset Magazine* (*Southern Pacific Co.*) 13(6):465-67 [sic; these pages should actually be numbered 565-76]. Oct.
• ***Summary:*** "Almond culture in the United States, although originally the idea of the Department of Agriculture, is the result of the energy and perseverance of a Californian, A.T. Hatch. About fifty years ago the national government imported a quantity of almond seedlings and distributed them wherever the peach was thriving, it being believed that these two fruits needed the same environment. The almond trees flourished and bloomed profusely, but matured no fruit; and it was almost accepted as a fact that this nut could not be raised in the United States.

"When all others were disheartened, Mr. Hatch continued his experiments on his ranch at Suisun [Solano Co., just northeast of and adjacent to San Francisco Bay]. He found that while the imported seedlings failed to produce fruit, the seedling germinated in California matured a nut that differed from its mother stock and also varied according to the locality in which the tree was grown. From 192 varieties that he created he selected four to develop further as staple products. By forming partnerships with numerous farmers, who furnished the ground while he supplied the trees, he was enabled to test the different climatic conditions, and to

© Copyright Soyinfo Center 2021

decide which localities were favorable.

He learned that almonds mature in a warm climate which is dry in summer. The more moisture they can have in growing time the plumper the nut, but when ripening approaches they need dryness. These requirements exclude from the culture many parts of California where the almond was first planted. The nut will not mature in the coast regions where the fog pours in each summer's day, nor in the colder parts of the state. The southern Sacramento valley and the northern San Joaquin are the localities where the almond thrives best, and here many growers are making it their principal crop."

To place their crops on the market, the growers are gradually forming themselves into associations. The missionary in the field was the Davisville Almond Growers' Association of Yolo county, formed in 1897. It achieved such good results, and so urged other vicinities to follow its example, that other district associations were organized and it is hoped that soon all the three hundred almond growers of the state will unite into a state association. Today the Davisville Association practically sets the price for almonds throughout the United States.

"In 1903 California shipped to the east about 6,000,000 pounds of almonds. In the same year the importation of this nut from Spain, France, and Italy was 9,045,783 pounds. California's number of pounds exported does not represent her full production of the nut. Within her borders certain health foods, extracts, and cosmetics are manufactured from the almond to be sold in the eastern market. The paper-shell almonds are a Californian development originated by Mr. Hatch. The highest priced, and those of best flavor, are the Nonpareil, the I X L, the Ne Plus Ultra, and La Prima. They are generally long single nuts, of varying thickness and breadth, and without the habit the European species have of producing philopenas [nuts with two kernels]. The best imported nuts reach the United States already shelled, so as to save on the duty, and go direct to the confectioner rather than to the general public. The best foreign almond the public can buy is the Tarragona, a Spanish variety, with a broad kernel less sweet than some Californian species and a thick, rather soft shell. Although California has given more attention to almond culture than has any one of her sister states, not nearly all her available acres are devoted to it. Arizona, New Mexico, and Texas, too, have localities adapted to this nut, and they have entered into its production to a small extent. If California will put the rest of her suitable ground into this industry, we may soon harvest not only enough for our own nation, but also a surplus for our neighbors across the sea."

Photos (by Tibbitts) show: (1) Almond trees in January. (2) In September. (3) In an almond orchard at harvest time, men beat the trees with long poles. (4) "A modern husking bee." Men and women seated around a table, husking almonds. (5) Almonds drying in the sun on huge wooden trays about 3 feet off the ground.

266. Carqué, Otto. 1904. The foundation of all reform: A guide to health, wealth and freedom. A popular treatise on the diet question. Chicago, Illinois: Kosmos Publishing Co.; London: L.N. Fowler & Co. 66 + vi p. 20 cm.
• ***Summary:*** About vegetarianism. Contents: 1. Man's position in nature. 2. Chemistry and physiology of nutrition. 3. The raw food question. 4. The superiority of the fruitarian diet. 5. Diet-reform, the ultimate solution to the economical and social problems (the problem of increasing consumption of intoxicating liquors is one of the principal causes of the mental and physical degeneration of man). 6. The ethics of diet-reform.

The author (lived 1867-1935) argues for the superiority of the fruitarian diet. "Man's strong resemblance to the anthropoid apes which subsist almost exclusively on fruits and nuts places him in the frugivorous class. In fact, all the great anatomists, Sir Charles Bell, Dr. Richard Owen, Dr. William P. Carpenter, Baron Cuvier, have shown that not only is man adapted by anatomical structure to a diet of fruits and nuts, but that the meat-eaters' violation of this law has been the undoubted source of endless suffering and disease. This fact, which had already been recognized by the ancient sages, as Plato, Socrates, Pythagoras, Plutarch, and others, has also been fully confirmed by the great universal law of evolution which Lamarck, Darwin and Haeckel have scientifically established and which has thrown much light on the origin of life and its development on our planet" (p. 8).

Why did humans start to eat meat? At a comparatively recent date in man's existence, there was apparently a scarcity of proper plant food and very adverse conditions. So "man was forced by fierce hunger to subsist on flesh-food. But the fact remains that in the process of evolution so great a change in man's diet had not the slightest bearing on his anatomical structure... Man's normal type dates from the period when the digestive organs of our frugivorous ancestors adapted themselves to such food;... not evolution but cataclysm caused his change of food from fruit to flesh with 'made dishes' to hide the taint of death.

"It is very probable that the so-called glacial period or age of ice, which according to geologists occurred some twenty or thirty thousand years ago and subjected organic life to altogether new conditions, had also caused man's deviation from his original and natural diet, after he

© Copyright Soyinfo Center 2021

had subsisted on the products of fruit trees during many thousands of generations" (p. 10-11). "In reviewing the long march of evolution of the human race... we come to the conclusion that for a vast period of time man subsisted on fruits and nuts, his natural diet, which was abundantly furnished by a virgin soil and a congenial climate" (p. 15).

The chapter titled "The raw food question" states: "Raw food must therefore be declared as the ideal diet of man, and the unperverted appetite demands nothing else." "But here the question arises, is the milk of even perfectly healthy cows a desirable article of food for man in general and for infants in particular? The answer must be an emphatic 'no.' Nature has destined the milk of the cow, like that of other mammals, for the nourishment of their respective young" (p. 34). The milk of all mammals, "the first nourishment of the new-born is relished in its natural and raw state." Mr. Horace Fletcher has shown that raw foods require thorough mastication, and with thorough mastication a smaller quantity of food is required (p. 36).

"An argument of the greatest importance in favor of the fruitarian diet–at least from the economical and social point of view–is, that it means the emancipation of woman. She will then no longer be a slave to the kitchen, for it will hardly be needed. The time which she formerly devoted to so much cooking and toiling, she will then be able to devote to a proper education of her children and her own culture" (p. 37).

The last sentence in this chapter reads: The "ideal food for man should consist of fruits, nuts, and grains properly masticated" (p. 38). Note 1. Such a diet (including seeds) is widely referred to as a fruitarian diet.

The next chapter, titled "The superiority of the fruitarian diet" develops this idea in more detail "The athletes of ancient Greece were trained entirely on a fruitarian diet... The Mystic Adepts who are strong physically, mentally, and who are never sick and live to great ages, all the time doing a tremendous amount of work, never eat flesh-food. They live on plant-foods exclusively" (p. 41).

A table titled "A few daily dietaries for fruitarians" (p. 67) gives 7 meal plans and the cost of each. A typical meal consists of one serving each of fruit, nuts, and unfermented whole wheat bread. Two meals a day are recommended. The total cost of the diet for 1 week is $1.60.

At the back of the book are 27 unnumbered pages of ads, including the following: (1) "Become a vegetarian–and become stronger, healthier, happier, clearer-headed–and save money. Learn about Vegetarianism through *The Vegetarian Magazine,"* published by The Vegetarian Co., 712, 167 Dearborn St., Chicago, Illinois. (2) Pacific Health Journal, published in Oakland, California. "A magazine for the home intended to give practical instruction on health and hygiene." Note 2. This was a Seventh-day Adventist publication that advocated a vegetarian diet. (3) The Sanitarium Pure Food Store and bakery of Benold's unfermented whole wheat bread, 413 E. North Ave., Near Wells St., Chicago, Illinois. "Full line of reform foods: Entire wheat,... whole wheat flour freshly ground every day on our own mill,... almond, filbert, and peanut butter." (4) Strength and beauty: Benedict Lust, naturopathic physician, 122-124 East 59th St., New York City. Another Lust ad several pages later is titled "Return to Nature." (5) *The Humanitarian Review.* Singleton W. Davis, 852 E. Lee St., Los Angeles, California. "A monthly 40 page Magazine, published in the interest of Liberal Freethought, Ethical Culture, Study of Comparative Religion, Psychology, Human Treatment of all Sentient Creatures, Human and Animal." (6) *The Animals' Defender,* organ of the New-England Anti-Vivisection Society, 1 Beacon St., Boston, Massachusetts. Established 1896. (7) Mazdaznan Health University, 3016-3018 Lake Park Ave., Chicago, Illinois. (8) *The Health Messenger,* published by the Health Messenger Co., Lamotte, Iowa. (9) Physical Culture Restaurant Co., Inc., Bernarr Macfadden, Gen'l. Manager, Main office: Suite 1119, 1123 Broadway, New York City. Has 12 restaurants in New York City, Brooklyn, Boston, and Philadelphia [Pennsylvania].

Note 3. This is the earliest document seen (June 2021) by or about Otto Carque (one of two documents). This book is advertised in *Naturopath and Herald of Health* (New York City) (June 1905, unnumbered page).

267. Carqué, Otto. 1904. An appeal to common-sense: The folly of meat-eating. A reply to an editorial of the New York and Chicago Evening American and San Francisco Examiner. 3rd ed. Chicago, Illinois: Kosmos Publishing Co.; London: L.N. Fowler & Co. 15 p. + ads on 4 unnumbered pages. 23 cm.

• ***Summary:*** Continued: "A diet of beef, white bread, potatoes, pie, coffee, which seems to be a favorite among the American people is therefore entirely inadequate. If vegetables are served at all, they are generally boiled in plenty of water, instead of being lightly steamed. The most valuable ingredients of vegetables, the organic salts which readily dissolve in water are in most instances lost."

"The ignorance among American people regarding the preparation of foods is simply appalling. Indeed millions of people practically eat themselves sick. A glance into our newspapers and magazines will convince us that at least half of the American people are suffering from one physical ailment or another..." (p. 8).

Then come 2 full-page tables of food composition, including the composition of 9 important minerals in each food. These foods are divided into groups: Animal products, fruits, nuts, vegetables, and legumes and cereals. A human body of 160 lb consists of about 90 lb of oxygen, 45 lb of carbon, 15 lb of hydrogen, 1.75 lb of nitrogen, 3.75 lb of calcium, 1½ lb of phosphorus, 1½ lb of chlorine, 3½ oz of sulphur 3½ oz of fluorine, 3 oz of potassium, 2½ oz of sodium, 2 oz of magnesium, 1½ oz of iron, 1 oz of silicon,

© Copyright Soyinfo Center 2021

and ½ oz of manganese. The ash constituents of plants [minerals] are generally combined with oxygen as oxides or acids; fluorine and manganese are found only in traces and no figures are therefore given in these tables; carbon passes in the form of carbonic acid into the air and is consequently not contained in the ash.

"Another point remains to be mentioned here which can never be too strongly emphasized. The mineral elements can only be assimilated by our system in an *organized* form, as they are contained in all the natural foods..." The body cannot assimilate the minerals in table salt (inorganic sodium chloride), in mineral waters, etc. The "presence of salt in all prepared animal foods, especially butter, cheese, lard, canned and smoked meats, dried fish, creates an unnatural thirst, because the tissues of the body are constantly deprived of a great amount of water, on account of the diuretic properties of the mineral. The increasing consumption of alcoholic beverages must be largely attributed to this circumstance; the use of alcohol and flesh foods generally go hand in hand" (p. 11).

"Milk is a nutritious food which is best suited for the newborn mammal. Only the infant's digestive apparatus is adopted for the proper digestion of milk... In the stomach of an adult which secretes more gastric juice, milk forms large, tough curds which are not easily digested. Cow's milk is a splendid food for calves, but it cannot be recommended very well for human beings."

"It is often asserted that, while a vegetarian diet would be good in tropical and subtropical countries, it would be entirely insufficient in the colder climates. This, however, is an entirely mistaken view. Not only can our body derive a far greater amount of heat and energy from a proper selection of plantfoods, such as fruits, nuts and cereals, but they are also more conducive to health" (p. 12).

"But meat is also objectionable for more reasons. Even if taken under the most favorable conditions, from perfectly healthy animals, it is contaminated by the effete and poisonous matter (urea, uric acid, creatin, creatinin, leukomain, etc.) which is constantly created in the tissues of the body. Animal life largely depends on the continuous removal of this worn-out material, and after killing the animal a large amount of these poisons naturally remains in the body, while during the further decomposition of the tissues still more waste matter is produced. With every piece of meat we therefore overtax our excretory organs, especially the liver and kidneys, by the additional poisons created in the tissues of the animal" (p. 13).

Compares the poor health of the people of Iceland (whose diet "consists almost exclusively of animal food") with the excellent health of most Pacific Islanders (who eat mostly raw fruits and vegetables. Before the Spaniards discovered Ladrone in 1620, there were "no animals on the island except a few species of birds which were left wholly unmolested. They had never seen fire and at first they hardly could imagine its effect and use").

"Another important argument in favor of the vegetarian diet is that man can derive his nourishment from a much smaller area, when living on the products of the soil, receiving them direct from the hand of nature, instead of feeding them first to the cattle and living on their meat. The land which now serves as hunting-grounds or for cattle raising, can be much better utilized by the cultivation of fruits, nuts, and cereals. It has been estimated that a certain area of well-cultivated fruit land can sustain at least twenty times as many people by its crops than could be nourished by the meat of cattle which do but pasture on its spontaneous grasses; and recently it has been found in a large slaughter-house in Cincinnati [Ohio], that the oat-meal used in fattening the pigs would have gone at least six times as far as the pork produced went in feeding people. *How preposterous, then, to spend time and money in raising and butchering animals, when nature offers us in the products of the soil the very best food material in the purest state and in the greatest abundance!"* (p. 14-15).

On the one unnumbered page at the front of this booklet are ads for: (1) A book titled *Diagnosis from the Eye.* Also published in German. (2) A book titled *The Foundation of All Reform,* by Otto Carque. (3) A booklet titled *Medicinal Foods,* by Otto Carque (16 pages). (4) Kosmos Publishing Co. and Hygienic Institute, 765 N. Clark St., Chicago, Illinois. Phone Black 5981. "This is an institution for the prevention and permanent cure of all acute and chronic male, female and children's diseases without drugs and operations, by the simple means of Nature Cure, as pure natural food, cold water treatments, sun and baths, physical culture, magnetism, etc."

On the two unnumbered pages at the back of the book are ads for: (1) Naturopathic Institute, Sanatorium and College of California (Incorporated), 556 to 560 S. Hope Street, Los Angeles. Dr. Carl Schultz, President. (2) The book (novel) *The Jungle,* by Upton Sinclair. "A story of packingtown and the beef trust. The unforgettable book of 1906." Includes 5 reviews of the book by well-known writers, including Jack London. Available from Kosmos Publishing Co., Chicago.

The author lived 1867-1935.

This booklet mentions that Carque has written a pamphlet titled "Medicinal Foods: How to get well and keep well by nature's simple remedies."

Note 1. Although this booklet is copyrighted 1904, the ad for *The Jungle* must have been inserted in a printing of 1906, the year the latter book was published. Carque's book is advertised in *Naturopath and Herald of Health* (New York City) (April 1905, unnumbered page).

Note 2. This is the earliest English-language document seen (July 2021) that uses the term "natural foods" (or "natural food") to refer to specific foods that are not refined or adulterated. Otto Carque continued to use the terms

© Copyright Soyinfo Center 2021

"natural foods" and "natural food" throughout his life, even though his colleagues preferred the terms "health foods" and "health food." Starting in 1922, in advertisements in the *Los Angeles Times*, he referred to his line of products (mostly dried fruits and nuts) as "Natural Foods of California." In 1925 he wrote and published a 359-page book titled *Natural Foods: The Safe Way to Health.* By 1931 he had renamed his company "Carque Natural Foods" and by 1935 a huge sign across the top of his food factory spelled out the company name. Address: 765 North Clark St., Chicago, Illinois.

268. Kellogg, Ella Ervilla Eaton. comp. 1904. Healthful cookery: A collection of choice recipes for preparing foods, with special reference to health. Battle Creek, Michigan: Modern Medicine Publishing Co. 299 p. Index. 19 cm.
• ***Summary:*** Contents: Methods in hygienic cookery: Healthful cookery. Measuring and combining ingredients. Breads. Unfermented, or aerated bread. Sandwiches. Toasts. Vegetable substitutes for flesh foods. Eggs. Porridges and breakfast dishes. Vegetables. Gravies and relishes. Salads. Soup. Soups with nut soup stock. Gruels and liquid foods. Desserts. The invalid's meals. Seasonable bills of fare. Note 1. Soy is not mentioned.

"Peanut butter" is called for in various recipes: Nut cheese (p. 163), Nut cream (p. 164), Nut salad dressing (p. 171), and Vegetable soup (p. 181-82).

"Almond butter" is called for in: Fruit pin wheels (p. 49), Almond cream (p. 164), Nut cream (p. 164), Peach salad (p. 169), Sweet salad dressing (p. 172), Sour salad dressing (p. 172-73), Cream of almond soup (p. 179), Almond puree (p. 197), Hot nut milk (p. 197), Granola pie crust (p. 210), Almond pound cake (p. 231, incl. almond butter in the icing), Almond filling (for desserts, p. 233), Chocolate mold no. 1 (p. 239), Cocoanut almond cream sauce (p. 245), Almond whipped cream ([non-dairy], p. 246. "Reduce Almond Butter to the consistency of cream, and pour slowly over the well-beaten white of an egg. Sweeten and flavor to suit the taste. For persons who can not use cow's cream, this makes an excellent substitute for whipped cream").

Note 2. This is the earliest document seen (Oct. 2013) that discusses a non-soy, non-dairy whipped cream.

"Nut butter" is called for in: Granuto cakes (p. 44), Nut butter puffs (p. 45), Nut gluten rolls (p. 47), and other recipes on pages 55, 57, 58, 71, 78, 82, 86, 87, 88, 104-06, 126, 136, 157, 159-62, 169, 173, 177-79, 233, 245, 301. For "Nut butters" see Sandwiches (p. 53; "The butter, whether dairy or some one of the various nut butters, should be creamed and spread smoothly on the bread...").

"Nut cream is called for in: Granuto cakes (p. 44; "Serve at once with dairy or Nut Cream, dairy or Nut Butter,..."), Nut gluten rolls (p. 47), Pease gravy toast (p. 65), Nut Lisbon steak, no. 2 (p. 75), and other recipes on pages 86, 99, 104-05, 121-23, 129, 132, 136-37, 141, 146, 151, 153, 155, 159-60, 164, 176, 192, 205, 217, 245, 253, and 283.

Gluten is mentioned throughout the book, as are gluten bread, gluten flour, 40% gluten flour, ½ cup gluten (p. 84), 20% gluten (p. 99, in Protose and gluten patties), gluten meal, and gluten gruel.

Note 3. This is the earliest English-language document seen (Nov. 2014) that mentions a kind of meatless burger or patty, which it calls "gluten patties" (one of two documents).

This is a vegetarian cookbook. In the chapter on flesh-food substitutes (p. 67+), "vegetarian" is mentioned in several recipe names: Vegetarian roast (p. 106). Vegetarian roast No. 2 (p. 107). Also: Vegetarian boiled dinner (p. 134). Major branded ingredients in this chapter are: Protose ("vegetable meat"), Nuttolene, Granola, and Nut Butter.

On page 84 is a recipe for "Vegetable turkey" which calls for "2 cups lentil pulp,... 2 eggs, 2 cups walnut meal,... ½ cup Granola, ½ cup Gluten, 1 onion, ¼ cup thick Nuttolene Cream."

On the last 2 pages of the book is an ad: "This volume contains some six hundred recipes." "For the preparation of Sanitarium foods. These foods are manufactured by the Battle Creek Sanitarium Co., Ltd., and the Sanitas Nut Food Co., Ltd., the two original health food manufacturers of Battle Creek. Our products are of world-wide reputation, some of them having been in use more than a quarter of a century [i.e., since about 1879]. The company makes more than 49 food products. "Many good grocers carry only a few of them; some, a large line; more, none at all... Thousands upon thousands of grocers have never heard of our products."

"To all express offices in the following States we prepay the express on orders of $5.00 or more." On orders of $15.00 or more they also offer a 10% discount. The names of 23 states near Michigan are listed. Then the name, weight, packaging type, and price of every product is given.

The author is the wife of the famous Dr. John Harvey Kellogg. She lived 1852-1920. A slightly enlarged edition (313 p.) was published in 1908. Address: A.M., Battle Creek, Michigan.

269. Lane, Henry Edward. 1904. Diagnosis from the eye: A new art of diagnosing with perfect certainty from the iris of the eye the normal and abnormal conditions of the organism in general and of the different organs in particular. A scientific essay for the public and medical profession. Chicago, Illinois: Kosmos Publishing Co.; London: L.N. Fowler & Co. 156 p.
• ***Summary:*** A half-page ad on the 3rd unnumbered page of ads near end of book reads: "In Preparation. 'The Drink Problem in the Light of Modern Science,' by Otto Carqué. The principal chapters in this highly interesting and instructive treatise are: The origin of alcohol. Has alcohol any food value? The waste of the world. The evils of moderate drinking. Effect of alcohol upon the various parts and organs of the body. Alcohol in medicines. The crime

© Copyright Soyinfo Center 2021

of adulteration. The nations' drinkbill. Alcohol, a constant source of mental and physical degeneration. How shall we solve the problem of the drink evil? Containing in all about 150 pages. Price $1,00; bound in cloth. If you wish to secure a copy we advise you to send your name and address NOW, as there will be a great demand for this book. Kosmos Publishing Co., 765 N. Clark St., Chicago, Illinois."

Another half-page ad on the 8th unnumbered page reads: "Sanitarium Pure Food Store and Bakery of Benold's Unfermented Whole Wheat Bread. Full line of reform foods: Entire Wheat, Cracked Wheat. Whole Wheat Flour freshly ground every day on our own Mill; all kinds of Nuts, also Almond, Filbert and Peanut Butter; Oils, Honey, Fruit Preserves. Depot for

"Randall's Unfermented Grape Juice and Pomona Books and Magazines on Natural Healing and Living, Kneipp's Herbs, Bath Cabinets and Hygienic Supplies.

"F.H. Benold, Propr. [Proprietor], 413 E. North Avenue, Near Wells Street. Telephone 2494 Black. Chicago, Illinois... Write for catalogue."

On another full page near the back of the book is a full page diagram of the iris of the eye; like a pie chart with many small wedges, it shows which part of the iris corresponds to which part of the body (feet, back, etc.).

Note: This book is written from the "natural method of healing" perspective, not from the allopathic point of view. Address: M.D. (Harvard 1871), Former Military and Civil Sanitary Inspector, Department of Porto Rico.

270. Naturopathic Health Home. 1905. Motto: "Healthy blood, best gift of God" (Ad). *Los Angeles Times.* Jan. 16. P. II5.
• ***Summary:*** "We cure Bright's disease, diabetes and all so-called incurable diseases. Stomach and female trouble a specialty. No cure, no pay." An illustration shows a number of happy people standing around a road side to Los Angeles. One is waving his 2 crutches in one hand above his head. Address: 1190 Sunset Blvd. near Elysian Park.

271. New Health Food Stores. 1905. Classified ad: Vegetarian cookery demonstration... *Manchester Guardian* (*England*). Jan. 18. p. 1.
• ***Summary:*** "... at the New Health Food Stores, 257, Deansgate, by Mr. E.C. Chapman, to-day (Wednesday), at 3 p.m. Collection." Address: 257, Deansgate [Manchester].

272. *Good Health* (*Battle Creek, Michigan*). 1905. Sanitariums. Health food restaurants. 40(1):ix (Advertisements section). Jan.
• ***Summary:*** Gives the name and address of 39 Sanitariums, including 26 in the United States, and 13 overseas (new ones since 1904 at Leicester, England. Cape Town, South Africa. Kimberly, South Africa). These "institutions are conducted in harmony with the same methods and principles as the Battle Creek Sanitarium.

Also gives the name and address of 27 health food restaurants in the United States (note that the term "vegetarian restaurants" is no longer used) including the following new ones: Vegetarian Restaurant, 555 Boylston St., Boston, Massachusetts. Vegetarian Cafe, 214 Union St., Seattle, Washington. Vegetarian Cafe, S. 170 Howard St., Spokane, Washington.

Note: This is the earliest English-language document seen (March 2007) that contains the term "Health food restaurants" (or "Health food restaurant" or "Health-food restaurant").

273. Pitman Stores. 1905. "Pitman" New Gloves (Ad). *Vegetarian Messenger and Health Review* (*Manchester, England*). Jan. Inside front cover.
• ***Summary:*** "From the animal to the ideal. Another fetter snapped. "Pitman" New Gloves. Has all the appearances and effect of Real Reindeer, but woven throughout. Warmer and more durable than Kid. Soft as Velvet and as pliable as Suede, giving freedom to the fingers. Will last two pairs of ordinary gloves and can be washed. Will stretch but will not split. All sizes in Ladies' or Gentlemen's. White, black, slate or sable. Per pair, 2/3, post paid.

"'Pitman' Stores, Health Food Specialists. The largest vendors of health foods in the British Isles. Xmas illustrated catalogue, 80 pages, post free, two stamps, with 'Aids to a Simpler Diet.'" Address: Ruskin St., Birmingham [England].

274. Pitman Stores. 1905. 'Pitman' uncooked foods (Ad). *Vegetarian Messenger and Health Review* (*Manchester, England*). Jan. Inside front cover.
• ***Summary:*** A ½-page ad. Naturalbred (Registered) (Uncooked whole wheat bread). A perfect food cure for constipation, indigestion, and similar stomach troubles. Unlike ordinary Bread, will keep fresh and good for weeks, needs no Butter, and contains neither Baking Powder, Yeast, added sugar or Water.

"A natural vital food, made from the whole wheat berry...

Fold medal Fruit & Nut Cakes. Uncooked complete foods. Ready to eat. For travelling, walking, cycling, running, rowing, and all athletic performances.

"Made by Electricity, with choice fruits and nuts only. Guaranteed free from preservatives and to contain no peanuts.

• ***Summary:*** "Should be in every home. It's good for you and it tastes good. 2 lb. 'Checkerboard' Packet, 7½ d." Address: London Agency: 43 Great Tower St., E.C.

276. Wheatose Company (The). 1905. Wheatose: An absolute food cure for constipation (if used as directed) (Ad). *Vegetarian Messenger and Health Review* (*Manchester, England*). Jan. Inside front cover.
• ***Summary:*** "7 lb. bags, carriage paid, 2/-. 12 lbs. carriage paid, 3/6. Supplied north of Birmingham by The Health Food Stores, 257 Deansgate, Manchester. And in the South of England by The Wheatose Company, 30-45 Union Street, Bristol. Write for particulars." Address: 39-45 Union St., Bristol [England].

277. Mapleton (Hugh). 1905. Mapleton's Nut Foods. Nut Cream Butters (Patent applied for) (Ad). *Vegetarian Messenger and Health Review* (*Manchester, England*). Feb. Facing p. 43.
• ***Summary:*** A 1/8-page ad. "Almond, 1/5; Walnut, 1/-; Cocoanut, 1/-. These are simply perfection.

Fruitarian cakes. Thirteen varieties; delicious flavours. Prices from 3*d.* to 7*d.* 50 tablets in box, 6*d.*

"Potted tomato & nut. 3½*d.* per tin... Superb quality. Quite unsurpassable.

"Full list of nut foods from the manufacturer."

Note. This is the earliest document seen (Oct. 2012) that mentions "Mapleton's Nut Foods," an early manufacturer of vegetarian foods in England. Address: Colonial House, Dolphin St., Ardwick Green, Manchester [England].

278. Lust (L.) & Company's Hygienic Bakery. 1905. The perfect health bread (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 6(3):Unnumbered page. March.
• ***Summary:*** A full-page ad. A round illustration shows the label of "Lust's Whole Wheat Bread: Original and Genuine." Also sells: Five types of raw, fresh opened nuts (incl. pecans, almonds, Spanish peanuts). Lust's Whole Wheat Zwieback. Lust's Whole Wheat Fruit Crackers. Lust's Nut Fruit Loaf. Lust's Barely Malt Coffee. Absolutely Pure Peanut Butter (¼ lb. jar 10¢; ½ lb. jar 20¢ 1 lb. jar 30¢; 4 lb. can 80¢), Nut Butter, Pecan Butter. Fresh ground whole wheat flour. "Write for a complete list of our New York City Agencies" [outlets / agents].

Note: Louis Lust was Benedict Lust's brother. This bakery, located in what became Harlem, was established in 1903. Address: Corner 105th St. and Park Ave., New York City. Phone: 2096 J, Harlem.

279. Carqué, Otto. 1905. The evils of moderate drinking. *Naturopath and Herald of Health* (*The*) (*New York City*) 6(5):140-43. May.
• ***Summary:*** A convincing argument, with numerous examples from France.

280. *Garden* (*The*) (*London*). 1905. Fruit preserving. 67(1753):371. June 24. [1 ref]
• ***Summary:*** "This is the title of a booklet of some of some twenty pages, which gives plain and concise instructions as to the best methods of preserving fruits and vegetables. The author, Mr. J.E. Cook, has given much valuable information in a small space, and his remarks will doubtless be read with interest by many. This booklet may be had, post free, for 1½*d.* from the Pitman Health Food Company, Birmingham."

Note 1. This is the 2nd earliest document seen (July 2021), published in the United Kingdom, that contains the term "Health Food" or the term "Health Food Co."

Note 2. This is the earliest document seen (July 2021) that mentions the "'Pitman' Health Food Company," which must have existed as early as 24 June 1905. It may have been the earliest known company in England that used the term "Health Food" or "Health Food Co." in its company name. Address: England.

281. *Gardeners' Chronicle* (*London*). 1905. Fruit preserving. No. 906. p. 12. July 1. [1 ref]
• ***Summary:*** "A pamphlet with this title, written by Mr. J.H. Cook, and published by the 'Pitman' Health Food Co., Birmingham, appears appropriately at this season of the year. It includes not merely directions for preserving fruit, but a strong plea for a diet consisting of cooked fruits eaten with nut-meal and brown bread and butter. Not stopping to analyse the statement that 'what sunlight applied outwardly is to the pores of the skin in its purifying effects, so are fruit-juices to the inside coatings of the body, having in this respects [sic, respect] effects exactly opposite to those of meat-juices,' we may say that the recipes for storing a wealth of fruits until a season of dearth will be found useful." Address: England.

282. Carqué, Otto. 1905. The nutritive and therapeutic value of unfermented fruit juices. *Naturopath and Herald of Health* (*The*) (*New York City*) 6(7):196-99. July.
• ***Summary:*** Focuses on grape juice and apple juice, and on the injurious effect of manufactured [white] sugar. A table shows the remarkable difference between the nutritional composition of unfermented and fermented fruit juices. All the natural sugar is converted to alcohol by the fermentation.

283. **Product Name:** Carnos (The Vegetarian Food and Meat Substitute).
Manufacturer's Name: Carnos & Co.
Manufacturer's Address: Great Grimsby, Lincs [Lincolnshire], England.
Date of Introduction: 1905 September.
Ingredients: -
Wt/Vol., Packaging, Price: -
How Stored: -
Nutrition: -
New Product–Documentation: Ad in Vegetarian Messenger and Health Review (UK). 1905. Sept. Inside back cover. "Carnos: The Vegetarian Food and Meat Substitute. It is the best article of its kind upon the market, being an appetising wholesome extract entirely soluble and free from fat. Send 4*d.* in stamps for 1 oz. Sample and full particulars to... N.B.–No chemicals used in the manufacture." *

284. International Health Association, Ltd. (The). 1905. Granose: The pre-eminent whole wheat preparation is the ideal food for breakfast, dinner and supper (Ad). *Vegetarian Messenger and Health Review* (*Manchester, England*). Sept. p. 253.
• ***Summary:*** "No table is complete without it. Granose is crisp, delicious, not only easily digested but an aid to good digestion, and nourishing, alike for infants, invalids, the strong and robust, the mechanic and athlete, the brain worker, and the aged. The only food of which it can be truthfully said: 'Tis the best for all.

"Sample of Granose Flakes, Granose Biscuits, and Toasted Wheat Flakes, with complete price list of other Cereal and Nut Health Foods sent post free for 3*d.;* or package of assorted samples of Health Foods for 1/ [1 shilling]."

"Eat for health and strength." Address: Legge St., Birmingham [England].

285. **Product Name:** Nut Cream Rolls.
Manufacturer's Name: London Nut Food Co. (The).
Manufacturer's Address: 465 Battersea Park Road, London, S.W., England.
Date of Introduction: 1905 September.
Ingredients: -
Wt/Vol., Packaging, Price: -
How Stored: -
Nutrition: -
New Product–Documentation: Ad in *Vegetarian Messenger and Health Review* (UK). 1905. Sept. Inside back cover. "The 20th Century Food, Which reaches the highest ideal of the Hygienic Food Reformer. Trade Mark (an illustration shows two squirrels, each holding a nut in its paws, facing one another). Made from the finest selected nuts and whole wheat. Nutritious, digestive, & appetising. On Sale at all the principal Vegetarian Stores, or direct from The London Nut Food Co.,... Assorted sample post free for 6 stamps. All orders of 5/- and upwards are forwarded carriage paid." *

286. Bosman & Lohman Co. 1905. Nutlet Butter (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 6(11):Unnumbered page. Nov.
• ***Summary:*** A ½-page ad. A large illustration (engraving) shows the huge, sprawling "B. & L. peanut health food plant." "The largest factory in the world devoted exclusively to Manufacturing Peanut Health Foods. Write for our booklet, 'The evolution of the peanut." Address: Norfolk, Virginia.

287. *Naturopath and Herald of Health* (*The*) (*New York City*). 1905. The evolution of the peanut. 6(11):336-38. Nov.
• ***Summary:*** Never in the history of the world have humans consumed so many nuts. The peanut is the leader. In 1904 the U.S. peanut crop was worth over $10 million, yet up to a few years ago they were only associated with the peanut vender and the circus. At that time, by accident, Bosman & Lohman began to produce peanut foods for both vegetarians and the general population. They are now producing "the most delicious and nutritious economic health foods of the present century." To-day "they have one of the largest plants of its kind in the world, devoted exclusively to manufacturing B. & L. Sparkling Diamond brand peanut health food products, which took the Gold Medal at the St. Louis Exposition" [of

• ***Summary:*** "Mr. E.C. Chapman writes: 'Your correspondent "Nut Cutlet" will find one or more of the various nut foods on the bill of fare each day at the Vegetarian Restaurant and Health Food Stores. If he will give us a call we shall be glad to do all we can to assist him in following a vegetarian dietary.'" Address: 257, Deansgate [Manchester].

290. Battle Creek Health Food Co., Limited. 1906. Life Chips for the workingman (Ad). *Toronto Daily Star* (*Canada*). April 21. p. 12.
• ***Summary:*** "Flesh food does not give the staying quality–the energy it produces is quickly expended.

"The workingman is much better fitted for his day's labor by a cereal and egg diet.

"His strength is more uniformly distributed, and he is never troubled with that heavy, fagged, tired-out feeling.

"His health is improved by leaving meat alone–more than half the disease of today is caused by eating flesh foods."

Life Chips are made from the whole wheat, scientifically mixed with the best quality of malt."

For breakfast Life Chips are delicious with hot or cold milk or cream. For dinner or supper, in combination with fruit, vegetables or eggs, Life Chips are nourishing and appetizing."

A large vertical illustration, in the middle of the ad running its full height, shows a man walking, smoking a pipe, wearing a hat, and carrying a cylindrical lunch bucket as he walks to work. Address: Canadian Factory, London, Ontario.

291. *Scotsman* (*Edinburgh*). 1906. Classified ad: Manager or manageress wanted for Health Food Stores;... May 10. p. 1.
• ***Summary:*** "... Good position for a capable person Address, fullest particulars. No. 3304, Scotsman."

292. Battle Creek Health Food Co., Limited. 1906. Life Chips for the young child (Ad). *Toronto Daily Star* (*Canada*). May 19. p. 5.
• ***Summary:*** "The foundation for perfect health is laid in childhood.

"Much depends on the child's diet. It most be nourishing and satisfying, without clogging the system.

"Life Chips should be the basis of every child's meal.

"They will give the vigor of perfect manhood and beautiful womanhood."

A large vertical illustration, in the middle of the ad running its full height, shows a young child, seated in a high chair at a dining table, wearing a bib, and eating from a bowl of Life Flakes. Address: Canadian Factory, London, Ontario.

293. Battle Creek Health Food Co., Limited. 1906. The public invited (Ad). *Toronto Daily Star* (*Canada*). June 19. p. 11.
• ***Summary:*** "The Battle Creek Health Food Company of London [Ontario] are having a special demonstration of Granose Biscuit, Granose Flakes, and Caramel Cereal [a coffee substitute] in the Grocery Department of the T. Eaton Co., and all visitors to the big store are invited to purchase sample packages of these most excellent foods.

"With these foods it is not a question of price, because the cost is no more, but it is a matter of quality, and to know that what you are eating is the best that time, money, and skill can produce." Address: London, Ontario.

294. Radcliffe (F.). 1906. Classified ad: Vegetarians. Wanted, Young lady attendant for Health Food Stores. *Manchester Guardian* (*England*). July 26. p. 2.
• ***Summary:*** "Must be interested in food reform and have a knowledge of health foods: one able to bake preferred. Address, stating age, wage, and references." Address: 69, Princess-street, Ashton-under-Lyne [Manchester].

295. *Los Angeles Times.* 1906. Unfermented grape juice: Opening for an important California industry. Aug. 19. p. VI15.
• ***Summary:*** A new process permits shipping grape juice in barrels. "The present methods of manufactures, storing and shipping grape juice exclusively in glass, add also considerably to its cost. Otto Carque of Los Angeles who has devoted considerable time and study to the promotion of this industry, has perfected a new process by which fruit juices can be stored and shipped in wood, without the use of any preservatives whatsoever."

Pasteurized grape juice can now be retailed in full quart bottles for 35 cents. "Mr. Carque put about 25,000 gallons of grape juice in barrels last fall and expects to turn out a larger quantity this season."

Note: This is the earliest document seen (July 2021) concerning Otto Carque's work with food or beverages (grape juice). He was a lifelong teetotaler, abstaining from all alcoholic beverages.

296. Ralston Purina Mills. 1906. The pure food for children: Wheat hearts for little sweethearts (Ad). *Outlook* (*The*) (*New York City*) 83(17):Unnumbered page near end of issue. Aug. 26.

© Copyright Soyinfo Center 2021

• ***Summary:*** A ¼-page ad. "In Ralston Health Food are the *hearts* of wheat–made into the richest, daintiest, the most delicious of foods, rich in gluten–absolutely pure. A chemist's certificate of purity on every package.

"No other food so perfectly meets the needs of growing children. Not pre-digested, but easily digested–gives the stomach something to do, but not too much.

"Not a food fad or fancy–but a staple breakfast food with body to it. When ready to serve, 14 lbs. for 15 cents–50 plates.

"Ralston Health Food, sterilized by our new patent process, is always fresh and good. Ralston retains the natural, nut-brown color of the grain.

"Ask for Ralston this time, and insist on getting it. Your grocer is instructed to give you back your money if you don't like the first package.

"Try Purina Whole Wheat Flour–for sale by all Good Grocers. Ask for the checkerboard sack and get the best.

"Ralston Purina Mills. "Where Purity in Paramount" St. Louis, Missouri. Portland, Oregon. Tillsonburg, Ontario [Canada].

In the upper left corner of this ad is a photo of the head and shoulders of man wearing a brimmed cap. In the lower right corner is a portrait photo of a child with fairly long hair.

297. Cleveland Health Food Co. 1906. See us at the food show: Royal Peanut Butter (Ad). *Plain Dealer* (*Cleveland, Ohio*). Oct. 29. p. 5.

• ***Summary:*** This display ad, in the far right column, features an illustration of a glass screw-top jar of Royal Peanut Butter. The words: "Manufactured by Cleveland Health Food Co." are visible on the front. Below the title we read: "(In sealed glass jars.) A 5¢ package of our Salted Peanuts given free with each sale at our booth.

"10¢, 15¢, 25¢ sizes."

Note: The 24 April 1895 Edition of the *Plain Dealer* has a "Help Wanted–Male" ad from the Sanita Health Food Co. which states: "Wanted–Good reliable agents acquainted with the grocery trade to handle a good selling article; references required. Address the Sanita Health Food Co., 254 Reed st., Milwaukee, Wisconsin."

The author was born in 1862. Address: Paignton, England.

299. Carqué, Otto. 1906. An appeal to common-sense: The folly of meat-eating. A reply to an editorial of the New York and Chicago Evening American and San Francisco Examiner. 3rd ed. Chicago, Illinois: Kosmos Publishing Co.; London: L.N. Fowler & Co. 15 p. + ads on 4 unnumbered pages. 8º.

• ***Summary:*** This excellent, 13-page essay begins with an epigraph: "The health and wealth of nations depends on rational nutrition." It begins: "Never have the indifferent masses been more aroused from their daily methods of living, never has the cause of vegetarianism been given a greater impetus than by the publication of Upton Sinclair's novel 'The Jungle,' a sombre and terrible picture of life in the Chicago Stockyards, with its startling revelations concerning methods in the meat-packing industry. Unfortunately, the majority of people are still deeply ignorant in regard to the food question, as our educational institutions pay little or no attention to this most vital problem. The inherited belief that fleshfoods are essential for the attainment of mental and physical vigor is still apparently widespread even among otherwise well-informed men. Mr. Arthur Brisbane, editor of the *New York Evening Journal* and *American*, presents in an editorial the following views: 'The vegetarian says that it is a hideous thing to eat meat–and it is a hideous thing. However, for the present the eating of meat is necessary–as necessary as the breathing of air or the drinking of water.

"'The lives of men are crowded, their systems can readily transform meat into the energies with which they do their work. The digestive power that would be used in grinding vegetables into blood and brain would take too much away from useful effort. *'We must eat meat–we must eat the cow that eats the grass, leaving her to digest the grass, since we have not the time or vitality to do it.'*

"Mr. Brisbane is a most brilliant writer and his views on political and social questions are up-to-date, logical and convincing, but in chemical and physiological matters he seems to be somewhat astray. I shall at first shortly answer his assertions, giving in the course of this treatise more explicit reasons of the utter fallibility of his arguments which may seem very plausible to the misinformed masses, but not to the intelligent mind.

"First; the word 'vegetarian' is derived from the Latin word *'vegetare,'* which means to 'enliven.' The old Romans used the term *'homo vegetus'* for a lively, vigorous man, sound in body and mind. The close resemblance of the two words suggests to the uninformed that 'vegetarian' is simply a 'vegetable-eater.'

"Second; the natural, physiologically and anatomically best adapted diet for man is neither grass nor meat, but fruits, nuts, succulent plants, and cereals; they alone are able to produce the highest type of man physically as well as mentally.

"Third; meat, far from being a necessary food for man, is an unwholesome article of diet and in many cases most detrimental to health. Meat is always polluted by the waste products of animal life, while it is deficient of certain mineral elements (organic salts) which are indispensable for the proper oxidation and purification of the blood.

"Fourth; energy and endurance are not produced by protein (albumen) which is one of the principal constituents of meat, but chiefly by the combustion of carbohydrates which we find in the most assimilable form, as sugar, in sweet fruits and succulent plants.

"Fifth; fruits, nuts, vegetables, and cereals, if taken judiciously, make better and purer blood and consequently give more vitality than flesh foods which are more or less stimulants; meat weakens our digestive power because it does not supply the elements necessary for the renewal of the digestive juices; it further fails, on account of lack of cellulose, to exert that mechanical influence upon the walls of the intestines which is necessary for the peristaltic movements of the bowels. Dyspepsia, constipation, appendicitis are common among meat-eating nations.

"Sixth; Mr. Brisbane's statement, *'we must eat the cow,'* is incorrect, for only a part of the cow, preferably, the muscular tissues are used as human food. He unconsciously compares himself with the ravaging beasts who devour the whole living animal; he is apparently ignorant of the fact that the different chemical elements of food are polarized in the body after the process of digestion; in other words, the chemical composition of the various anatomical parts of the body is widely different, especially in relation to their mineral ingredients.

"The idea that meat is in some manner predigested plantfood, ready to be swallowed and assimilated, is entirely

© Copyright Soyinfo Center 2021

erroneous from a chemical as well as a physiological standpoint; it has undoubtedly led to the now popular American institution, known as 'Quick Lunch Counter' where a dinner of five courses can be bolted down in so many minutes. Nature has furnished us with teeth and salivary glands for the purpose of mastication and salivation and we have to devote a certain amount of time each day to the proper feeding of our body or suffer the consequences sooner or later. Why is it that the average duration of life of 'civilized' man is hardly more than 33 years instead of a century? Why is it that we have in this country an army of over 100,000 physicians who can hardly raise the standard of health? Most assuredly because the majority of people are still deplorably ignorant in regard to the mechanism of the body and especially to the laws of nutrition."

He then discusses: The physiology of digestion. The importance and function of each of the 12 mineral constituents of food and of our body–an area in which German scientists have taken the lead. Results of individual mineral deficiencies. German scientist has shown that mineral fertilizers [NPK] are more effective in promoting fertility than animal excrements. Healthy plants require healthy soil.

Most "physicians are still hunting after germs and bacilli, confounding cause with effect, utterly ignorant of the most important chemical and physiological facts. *What we need is not vaccine, tuberculin, antitoxin, poisonous drugs, stimulants and narcotics, but natural and wholesome food, pure water, fresh air, and sunshine which alone can give us health, vitality and supreme power of resistance!"* (p. 7).

"Meat is also praised by many as a strength giving food on account of its proportionately large amount of protein as the result of Dr. von Liebig's erroneous theories which he revoked himself in his later years. He had at first believed the proteids to be the principal source of muscular energy, and the amount of nitrogenous matter needed daily by the average man is still generally as high as four or five ounces. One of the most advanced physiologists of our time, Professor Voit of Munich, has found, however, by careful investigations carried on for a number of years, *that even at the most strenuous work the body consumes not any more protein than when at rest; that heat and energy are almost exclusively created by the combustion of carbohydrates and fats, and the average man can get fairly well along with about one ounce of protein daily.* All progressive physicians admit that a large number of diseases is due to the excessive amount of protein and an inadequate supply of necessary mineral elements." (p. 7).

"The idea that meat contains some nourishing ingredients which cannot be found in plant foods is entirely erroneous. On the other hand, we find in plant foods such as fruits, nuts, and vegetables in their endless variety the needs of our body, especially the organic salts, in far larger proportions and in a much purer form than in flesh foods." (p. 8).

In cereals, the minerals are "chiefly contained in the outer layers of the kernel which are, however, removed by our 'modern' milling processes." which cause the loss of 50-75% of these valuable organic salts (p. 8). Continued. Address: 765 North Clark St., Chicago, Illinois.

300. Leach, Albert E. 1906. Food and drug inspection: Report of the analyst. *Annual Report of the State Board of Health of Massachusetts* p. 483-507. See p. 507.
• ***Summary:*** The section titled "Miscellaneous" states (p. 506-07)" "Among the brands found not to be of good standard quality were the following:–"'Protosac' and 'Glutosac,' advertised to contain respectively 40 and 35 per cent. of proteids, both products of the Health Food Company of New York; and 'Cold Blast Extra Flour,' purporting to contain 22 per cent of proteids."

301. Postum Company, Inc. 1906. This journey through the pure food factories that make Postum and Grape-nuts takes you up-stairs, down-stairs and all over the place. There is considerable to see, and "There's a reason." Battle Creek, Michigan. 32 p. Illust. 28 x 14 cm.
• ***Summary:*** Cover title: "The door unbolted, come in." Contains many old and interesting photographs, including many of the modern machines and facilities used in making Postum Food Coffee and Grape-Nuts.

The word "coffee" is used throughout this book–see pages 4-6, 18-24.

Pages 3-4: "It seems that Mr. Post, during his studies in medicine and general therapeutics, gave especial attention to nervous disorders and dietetics. The unusual number or people affected by coffee drinking attracted attention, and in collaboration with an analytical chemist he conducted a series of experiments looking towards a healthful coffee to be made of nourishing grains, that would have a good snappy flavor and, satisfying the user's palate, would feed and rebuild the nerve centres broken down by coffee or other stimulants and narcotics. Literally, hundreds of experiments resulted in failure, and upwards of a year was consumed before the method of preparing and blending the different parts of wheat produced the desired result."

"Not one grain or article of coffee... enters Postum" (p. 5).

It offers "sure relief from the many ails of coffee" (p. 6).

"The 'Reason' for Postum Food Coffee: The real trouble with tea and coffee drinking is not generally understood. Physicians advise, for a well-defined reason, the discontinuance of both tea and coffee when a person is sick. Educated physicians know of the following test: -

"When tea is added during the process of digestion, 34 per cent of albumen [protein] will be left undigested, and 66 per cent will be digested; while if coffee is added during the process of digestion the result will be but 61 per cent

© Copyright Soyinfo Center 2021

digested and 39 per cent undigested. When tea and coffee are taken into the human stomach, serious interference is set up with the natural and healthful operations. If one has an exceedingly powerful digestive apparatus, he can stand this abuse for a time, but it is sure to tell sooner or later.

"These facts should never be forgotten" (p. 18).

"Coffee and tea are not foods, but strong, powerful drugs. Sooner or later the steady drugging will tear down the strong man or woman, and the stomach, bowels, heart, kidneys, nerves, brain, or some other organ connected with the nervous system, will be attacked.

"Thousands of invalids remain so, not knowing the cause of their disease. It is safe to say that one person in every three, among coffee users, has some form of incipient or advanced disease.

"Any analytical chemist can analyze coffee and tea, and show that they contain a poisonous drug–caffeine–which belongs to the same class as cocaine, morphine, nicotine and strychnine–alkaloids.

"In highly organized people, these poisons have a direct effect upon the heart, liver, stomach and nerves, and set up various indications of approaching sickness. These facts have been known by physicians for many years, but it is difficult to induce people to leave off habits, even when those habits are known to be injurious and shorten the existence of the human body.

"There are people, however, who hold their health in high enough esteem to be willing to give a little attention to food and drink. Such people realize that good health can be turned into success, into money-making, prosperity, and the ability to do things in this world. There is no habit the creature acquires–which produces as much real enjoyment as the old-fashioned habit of being thoroughly well.

"Such a feeling all day long cannot be compared in value to the temporary, short-lived pleasure of drugging the body with any of the known drugs, tea, coffee, tobacco, whisky or morphine. When a man can inhale a deep breath of pure air and feel that every part of the machinery of the body is working perfectly, there comes a sense of comfort, easy content and thankfulness to the Creator for the mere privilege of living.

"People say they cannot quit coffee. It is to just such that Postum Food Coffee appeals strongly, for the old coffee can be left off at once, and the Postum Food Coffee, made as it should be made, furnishes a delicious beverage, pure in food value, with a deep, rich brown color which is quickly changed to a golden brown by the addition of a little cream, and with a crisp coffee flavor satisfying both palate and nerves (p. 21).

"It is true that some coffee drinkers that have been accustomed to excessively strong coffee, miss the rank, strong taste or Rio and the heavier grades of coffee; for Postum has almost an identical flavor with the milder and more expensive grades of Java.

While the manufacturers earnestly recommend every user to discontinue coffee altogether, it is nevertheless well known that thousands of families mix a little coffee in with the Postum, when the effort is made to induce certain members of the family to abandon coffee. The improvement in health in ten days will be sufficiently marked, in most cases, to induce an adoption of Postum alone.

If the reader has any sort of illness, try leaving off tea and coffee, and note the result.

"Remember, you can recover from any ordinary disease by discontinuing coffee and poor food, and using Postum Food Coffee and Grape-Nuts, for these forms of nourishment are scientifically made, and produce the results they were made to produce in the human body" (p. 24). Address: Battle Creek, Michigan.

302. Shaftesbury, Edmund [pseudonym of Webster Edgerly]. 1906. The Ralston Health Club: Book of inside membership,... known as the great 1906 edition. Washington, DC: Ralston Health Club. 176 p. 24 cm. *

• ***Summary:*** Note: The Ralston Health Club was in existence as early as 1891 and publishing books as early as 1894. The Club was devoted to the development and maintenance of health and fitness, and increasing longevity–the goal being 200 years! He placed great emphasis on physical culture, exercise, living out of doors, and self discipline / mastery. He placed relatively little emphasis on food. In many cases, but not all, he discouraged the use of meat. He firmly advocated cereal grains (such as wheat) and milk. Edmund Shaftesbury lived 1852-1926.

303. Winton, A.L. 1906. Diabetic foods. *Connecticut Agricultural Experiment Station, Annual Report* 30:153-65. For the year 1906.

• ***Summary:*** This article begins: The necessity of excluding so far as possible from the diet of diabetic patients sugars and substances, such as starch and dextrin, yielding sugar with the digestive juices, had led to the introduction of saccharine and other coal-tar derivatives and preparations containing, or purporting to contain, no starch or starch derivatives,..."

"Not only all of the cereal grains but also most of the seeds of the legumes... contain large amounts of starch and must be avoided by diabetics; the soja or soy bean, however, is a striking exception as it contains, when ripe, no true starch, or only traces. This leguminous seed is an important food in Japan and is being used in this country for the manufacture of meal for the use of diabetics. Two analyses of soja bean meal [whole soy flour] are given in Table XVI, pp. 156-157."

This table lists and analyzes about 45 diabetic foods made by about 12 companies. Only three products clearly contain soy; the first two (p. 156-57) are both named Soja Bean Meal made by the Theo. Metcalf Co. in Boston, Massachusetts; one contains 5.5% starch and the other

© Copyright Soyinfo Center 2021

7.63% starch. The first product contains 19.06% fat and is thus a whole (full-fat) soy flour; this table contains the earliest analysis seen of whole soy flour. The third product (p. 164) is a homemade "Soja Bean Meal Biscuit (Muffins or Popovers)" made from Metcalf's Soja Bean Meal. Made with 1 cup cream, 2 eggs, baking powder, and salt, plus Soja Bean Meal, it contains (on an as-is basis) 27.6% water, 5.33% ash, 16.71% protein, 1.55% fiber, 12.84% nitrogen-free extract [non-fiber carbohydrates], and 35.91% fat. Note: This is the earliest English-language document seen (Jan. 2019) that uses the term "soja bean meal" to refer to whole soy flour.

"The peanut, another leguminous seed, although very rich in oil, contains about 11 per cent. of starch, sugar, and dextrin, of which about half is starch." Most of the nuts, including almonds, "since they contain no starch and only small amounts of sugar and dextrin but are rich in protein and oil, are valuable additions to the diet of diabetics. Almond meal is used in the preparation of various biscuits and bread substitutes."

The table (p. 156-59) also contains many gluten products, together with their manufacturers and nutritional composition. Diabetic products made by Battle Creek Sanitarium Food Co. (Battle Creek, Michigan) are: 40% Gluten Flour, 40% Gluten, 40% Gluten Biscuit, Potato Gluten Biscuit, and Pure Gluten Biscuit. Diabetic products made by the Sanitas Nut Food Co., Ltd. (New York) are: Sanitas Nut Butter, Nuttolene, Almond Butter, and Protose. Nutritional analyses of each of these products are given.

This table shows that The Health Food Co., New York, makes (p. 156): Flour and meal–Glutosac Flour, 35% proteids. Protosac Flour, 40% proteids. Pure Washed Gluten Flour, 85% proteids, 6% carbohydrates, 9% water. Almond meal. Bread, biscuit, rusk, etc.–No. 1 Proto Puffs, 78.86% protein, 6.71% starch. Salvia Sticks. Protosac Bread, 40% protein, Glutosac Bread, 35% proteids. Plain Glutosac Wafers, 33% proteids. Glutona, 35% proteids. Glutosac Zweiback [sic], 35% proteids. Glutosac Butter Wafers, 35% proteids. Protosac Rusks, 40% proteids, Glutosac Rusk, 35% proteids. Diabetic Biscuit, 40% proteids.

Note: Kate G. Barber, PhD, is also a chemist in the station's Analytical Laboratory. She and Andrew Winton were later married. Address: PhD, Chemist in charge, Analytical Lab., New Haven, Connecticut.

304. *Good Health* (*Battle Creek, Michigan*). 1907. Directory of Sanitariums. Health food restaurants. Health food stores. 42(2): Feb. Near front (unpaginated).
• ***Summary:*** Gives the name and address of 37 Sanitariums and treatment rooms, including 25 in the United States, and 12 overseas (including Chaterham, Surrey, England; Leicester, England; Calcutta, India; Cape Town, South Africa; Christchurch, New Zealand; Kobe, Japan; Guadalajara, Jalisco, Mexico; Gland, Vaud, Switzerland; Skodsborg, Denmark; Wahroonga, NSW, Australia; Bez. Magdeburg, Germany; Kimberley, South Africa).

Also the names and addresses of 16 "Health food restaurants" in the United States (with names like Hygienic Cafe, Pure Food Cafe, Sanitarium Rooms, etc.) including: Vegetarian Cafe, 259 South Hill St., Los Angeles, California.

And the names and addresses of 8 "Health food stores" in the United States (in Omaha, Nebraska; Springfield, Massachusetts; Detroit, Michigan; Boston, Massachusetts; Melrose, Massachusetts; Rochester, New York; College View, Nebraska; Chicago, Illinois).

305. *Vegetarian Messenger and Health Review* (*Manchester, England*). 1907. The Pitman stores. March. Unnumbered page among ads in rear of issue.
• ***Summary:*** "The manufacturing department of this firm has grown so rapidly that it has been necessary to acquire an additional floor space of 2,000 ft; the stores now have an imposing frontage on Corporation Street, Birmingham."

306. *J. of Horticulture and Home Farmer* (*UK*). 1907. Book notices: Land reform and rural education. April 18. p. 348-49. April. See p. 349. [1 ref]
• ***Summary:*** "Bananas, and All About Them, with eighty recipes for preparing and cooking fresh Bananas and Banana flour, by Mr. James Henry Cook. Price 1d., by post 1½c. Pitman Health Food Co., Birmingham."

307. Ralston Purina Mills. 1907. Ralston Health Food (Ad). *Pearson's Magazine* (*New York*) 17:In unnumbered pages of ads at rear. April.
• ***Summary:*** A half-page vertical ad. Shows an illustration of "The Pure Food Man" holding up a box of "Ralston Health Food near his left shoulder with his left hand. The text on his white shirt and checkerboard apron reads: "One food you know is Pure–'Cause there's Chemists' Certificate of Absolute Purity on Every Package.

Most people 'stick' to Ralston Health Food–tastes so good–because–it is good. Not a fluff but a staple food–hearts of wheat–not with the color, flavor and nutriment bleached out to make it white–Ralston as all the natural golden color, sweet nut-like flavor and wholesome deliciousness of the grain.

"Always good–kept so by our process of Sterilization."

On his checkerboard apron is a 2nd ad, for Purina Whole Wheat Flour, which "won the Grand Prize (Highest Award) over all other whole wheat flours at the recent St. Louis Fair." "Ralston Purina Mills. Where purity is paramount. Checker board sacks and packages." Address: St. Louis, Missouri; Portland, Oregon; Tilsonburg, Ontario, Canada.

308. *Vegetarian Messenger and Health Review* (*Manchester, England*). 1907. The Pitman stores. April. p. 86.
• ***Summary:*** "The Pitman Health Food Company and Stores

desire us to inform our readers that they are in no way connected with any hotel or restaurant, and that they still continue to supply only such goods as are guaranteed to be absolutely free from flesh, fish or fowl."

Note: There was no obvious previous story published in this magazine to which this was referring.

309. *Agricultural Economist and Horticultural Review.* 1907. A woof for women: A page for lady readers. Peas and pears. 40(450):168. June. [1 ref]
• ***Summary:*** "There is also a little book on 'Fruit Preserving' published by Pitman Health Food Stores, Birmingham... which gives careful instructions for bottling all kinds of fruits and vegetables."

"... information concerning peas may be found in the book published by Pitman Health Food Stores."

310. Ralston Purina Mills. 1907. Ralston Health Food (Ad). *Pearson's Magazine* (*New York*) 17:Near end of unnumbered pages of ads at rear. June.
• ***Summary:*** A half-page vertical ad. The top half shows an illustration of the head and shoulders of a man with a straw and grain of wheat balanced on the visor of his cap. The bold text reads: "The Ralston miller. The pure food man." Checkerboard sacks and packages.

The bottom half of the ad shows his hands on a checkerboard box, on the front of which is written: "I'm proud of the Chemists' Certificate of absolute Purity on every package of Ralston Health Food.

"'I'm proud of the healthy, happy people that eat Ralston.

"'I'm proud of the golden-yellow hearts of selected wheat, with all their natural nutriment and rich, nut-like deliciousness, that go into the Ralston Packages.

"'Ralston isn't mere fluff–it's real food, always keeps good because I *sterilize* it.'"

"A package makes 50 plates of food. The Ralston Miller. 'Where purity is paramount.'"

This ad also appears near end of unnumbered pages of ads at rear of Sept. issue, and in December issue. Address: St. Louis, Missouri; Portland, Oregon; Tilsonburg, Ontario, Canada.

311. Fillmore, Lowell. 1907. Diet department. *Unity* (*Unity Tract Society; Unity School of Christianity, Kansas City, Missouri*) 27:47-53. July.
• ***Summary:*** In the section titled "This extract is from a traveling man's letter" is a letter from a man (T.J.C.) who became a vegetarian "because my eyes had been opened to the words in the Bible, 'Thou shalt not kill.'" He then gradually lost his former appetite for meat.

"From Otto Carque, 560 So. Hope St., Los Angeles [California], we obtained unpolished rice, the sustaining Cashew nuts of the desert, and delicious unfermented grape juice, both white and red."

There follows a page of vegetarian recipes (p. 53) and "Bill of fare at the Unity Inn for Sunday dinner, June 30." It includes "peanut croquettes and peanut butter."

312. International Health Association, Limited (The). 1907. Do you want to be rich? The [key] to the secret (Ad). *Good Health* (*London*) 5(16):507. Sept.
• ***Summary:*** "Health is wealth! How many people unconsciously exchange health for money. How many violate the laws of nature in their efforts to gain a position in the world!

"Are you healthy? If so, allow us to offer you a few suggestions on the maintenance of strength and vigour. Are you sick? We believe we can help you get well."

Perhaps "you are anxious to discard the use of flesh meats, but are at a loss to find a suitable substitute. We can remove this difficulty by offering you a Perfect Meat made from choice Wheat and Nuts, being therefore absolutely pure and wholesome. Our Protose is the best substitute for flesh meats ever produced... Protose is beneficial to the brain-worker, and will also impart strength and vigour to those engaged in manual labour.

"Supplied in three varieties: No. 1. The Original Protose. No. 2. Pine-Nut Protose. No. 3. Hazel-Nut Protose." Price: 1½ lb., 1 shilling 4 pence. 1 lb., 1 shilling. ½ lb., 8 pence.

"Send six stamps for a sample tin. Health Food Booklet sent free on application." Address: Legge Street, Birmingham [England].

313. Kellogg, John H. 1907. Food product. *U.S. Patent* 0,869,371. Oct. 29. 1 p. Application filed 24 Feb. 1906.
• ***Summary:*** "The main object of this invention is to provide an improved food product which is very palatable and nourishing and one adapted for use as a meat substitute. Second to provide a process of making such a product by which it can be economically and satisfactorily produced."

The ingredients and their proportions by weight are gluten (wet, 37%, made from wheat flour), casein (wet, 37%, precipitated from cow's milk with an acid), and vegetable oil (25%). The ingredients are shredded, mixed, put into cans, and cooked. The product may also be dried. Soy is not mentioned. Note: This patent was later widely cited by Anson and Pader in their meat analog patents of the 1950s. Address: M.D., Battle Creek, Calhoun Co., Michigan.

314. International Health Association, Limited (The). 1907. A move into the country. The International Health Association's new headquarters (Ad). *Good Health* (*London*) 5(17):533. Oct.
• ***Summary:*** "It is with pleasure that we announce our removal from Birmingham, where we have for some time been working under the disadvantages of limited facilities, a smoke-laden atmosphere, and the general unhealthful

© Copyright Soyinfo Center 2021

conditions which appertain to large cities, into a beautiful country location, where we shall be able to manufacture Health Foods under genuinely healthful conditions.

"The property consists of 55 acres of well-timbered park-land, situated one mile beyond the limits of the town, at an elevation of 300 feet above sea level.

"We have built the factory to suit all our requirements, and have fitted it throughout with electricity for power and lighting purposes.

"Our increased facilities and improved conditions warrant us to invite your continued and increased patronage, and make us feel confident of giving entire satisfaction to all. Price list free on application." Address: Stanborough Park, Watford, Herts. [Hertfordshire, England].

315. Ralston Purina Mills. 1907. Ralston Health Food: I stand for purity in food. *McClure's Magazine* 29(6):59 of ads at end of issue. Oct.

• ***Summary:*** A half page vertical ad (right half of page) near the rear of this issue shows a strong- and healthy-looking man standing upright, wearing a white shirt and cap. His left land, at waist level, is holding one "ear" of a upright sack of Purina Whole Wheat Flour. His closed right hand rests atop a box (with a checkerboard pattern) of "Ralston Health Food" breakfast cereal, which rests atop the opposite side of the bag.

Across the top of the ad: "The pure food man. The Ralston miller." Written on his white shirt: "'I've won the Chemists' Certificate of absolute Purity on every package of Ralston Health Food–the golden hearts of choicest wheat with all the natural nutriment and flavor. It's always good because I *sterilize* it. A package makes 50 plates of Food.'"

"'Where purity is Paramount.'" Mills in St. Louis, Missouri. Portland, Oregon. Tilsonburg, Ontario, Canada. Address: St. Louis, Missouri.

316. Richard's Health Food Stores. 1907. Classified ad: Now open. Food reform restaurant. *Scotsman* (*Edinburgh*). Nov. 9. p. 1.

• ***Summary:*** "Pure hygienic cooking. Luncheons, dinners, teas."

A similar ad appears in the issue of 1 May 1908 (p. 1), however the company name is given as "Richard's Health Food Store" at "75 Hanover Street (North), Edinburgh." Address: 73 N. Hanover St. [Edinburgh].

317. Andross, E.E. 1907. Dedication at Stanborough Park [of IHA food factory at Watford, Hertfordshire, England]. *Missionary Worker* (*London*) 11(21-22):177-78. Nov. 20.

• ***Summary:*** "Monday, Oct. 28th, at 2:30 p.m., in the packing room of the Food Factory (the largest room available for such a gathering) at Stanborough Park, about two hundred people assembled for the purpose of formally dedicating the estate, with all its buildings, to the service of God. While we could but say with David; 'All things come of Thee, and of Thine own have we given Thee,'..."

"The packing room was crowded to its utmost capacity, and the doors into the shipping room were thrown open, and all its available space was occupied, besides the standing room near the main entrance and on the landing being filled with attentive listeners.

"Statement of the business manager: Brother Sisley gave a brief history of our experiences in searching for a location for the headquarters of our work, and of the Lord's leading in securing this estate. He also gave a financial statement of the 'Seventh-Day Adventist Union, Limited' (the organization owning the property),..."

"Health work: Brother Barnard related some of the experiences in the development of the health food work in this field. And in behalf of its staff of workers expressed the high appreciation of, and deep gratitude to God for, the present beautiful situation and splendid facilities for the prosecution of their work."

A photo shows five, huge two-story buildings, including the food factory and printing office.

Note: This is the earliest document seen (Dec. 2013) concerning Seventh-day Adventist food manufacturing activities outside the United States.

318. Barnard, S.S. 1907. The health food work. *Missionary Worker* (*London*) 11(21-22):177-78. Nov. 20.

• ***Summary:*** "The manufacture of health foods occupies an important place in the health reform work;..."

"Many of the foods offered to the public to-day are unsafe to eat, owing to the harmful ingredients contained in them; various kinds of chemicals, adulterants, and other questionable elements being unscrupulously used by the majority of worldly firms engaged in the manufacture of foods, of whatever kind, whose chief object for being in business is to make money... With regard to flesh meat, it is an acknowledged scientific fact that its use is contrary to the best development of the physical, mental, and moral powers. The best meat naturally contains many impurities, besides which, animals are becoming more and more diseased, so that it is positively unsafe to eat their flesh.

"The health foods work began about twenty-five years ago [i.e., in about 1882] in America, when the Lord gave skill and understanding to His people to prepare [meatless] foods that are healthful and life-sustaining. These foods were adopted for regular use in our sanitariums, and proved so highly beneficial to the patients that many of them continued to use them after returning to their homes; consequently, in a little while the health food factory was sending out its products to all parts of the United States. In course of time inquiries for the foods were received from England, and in 1897 an agency for their sale was started at our Tract Society Office, 451 Holloway Road, the foods being imported from America. A year or two later the brethren in England decided

© Copyright Soyinfo Center 2021

to manufacture the foods in this country, and purchased a mill for the purpose at Horley, a village in Surrey. The enterprise was getting fairly well established when a fire burnt the mill to the ground. In September, 1900, a factory was rented in Birmingham, and for the last seven years the work has been carried on there. Unfortunately, the building and its location were unsuitable for our work, and we have long been looking for a more favourable place. The Lord has now provided us with an ideal place in the midst of the scenes of nature, for which we are truly thankful. The building that has been erected is light, airy, and hygienic in every way, and is eminently suited for the manufacture of health foods. It was publicly dedicated to the Lord's work on October 28th, at the time of the dedication of the other enterprises centered at Stanborough Park, Watford. Not only has the building been dedicated, but all the brethren engaged in the work of making the foods have dedicated themselves to the Lord, their chief motive being to work unselfishly for the benefit of their fellow men; and all will strive to reach the very highest standard of excellence."

"A few statistics bearing upon the progress of the work may be of interest. The first year at Birmingham showed a loss of £1,500, and the business would have had to be abandoned had not some of the brethren kindly assisted us with temporary loans; but since that time God's blessing has rested on the efforts put forth, each year showing a margin of profit, until on the 31st of December last, there was a balance of £400 on the right side. Our sales this year have kept ahead of last year's notwithstanding the increased competition, so that we anticipate a fair showing at the end of the present year, after deducting the heavy expenses that have been incurred in removing from Birmingham. We have sold over 100,000 packets of granose flakes and granose biscuits (our leading lines) during the last twelve months, and now we are aiming for the 200,000 mark."

"But a word now with reference to the profits that may accrue. These are to be wholly devoted to the extension of the work to which we, as a people, are committed."

"On our part we will do our utmost to merit support by supplying foods of the very best quality, carefully prepared on scientific lines, that will be health foods, not only in name, but in fact.

"Some firms are now manufacturing and selling goods that profess to be health foods, but that contain unwholesome ingredients. Again, the foods are often of so inferior a quality that much harm is done to the cause by their sale, those who buy them supposing that all health foods are similar. Foods are also being manufactured by a firm which obtained most of its recipes from one who went out from us, while many are imitating our foods and advertisements."

Photos show: (1) A corner of the bakery. (2) The room where Granose is made. Four workers are shown in each photo. Address: Manager, The International Health Ass'n, Ltd. [Stanborough Park, Watford, Hertfordshire, England].

319. Cleveland Health Food Co. 1907. For the school lunch: Royal Peanut Butter (Ad). *Good Housekeeping* 45(6):758. Dec.

• ***Summary:*** At the top of this half-page, vertical, black-and-white ad, a boy and girl are shown walking to school carrying lunch boxes. Next to them is a large jar of Royal Peanut Butter.

The text reads: "Royal Peanut Butter is so good to eat that nothing can take its place with the children. Dainty, delicious sandwiches are made by spreading it on thin slices of bread or on wafers. Royal Peanut Butter sandwiches are the ideal school lunch,–appetizing, satisfying and wholesome.

"Royal Peanut Butter (Reg. U.S. Patent Office) is excellent food, containing all the high nutritive value of best No. 1 Spanish peanuts. It is made in perfect cleanliness and packed in air-tight (paraffin sealed) glass jars. There is nothing but peanuts in it–the very finest Spanish peanuts, and a pinch of salt. There are no inferior peanuts in it, no "filler" of any sort, no oil but the natural oil of the nuts,–nothing but selected Spanish peanuts so prepared as to make the best peanut butter ever made.

"Absolutely pure food. Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 4628.

"A Sample Jar. Grocers sell Royal Peanut Butter. If your grocer does not, send us his name and address and ten cents

© Copyright Soyinfo Center 2021

to cover cost of mailing to you. Free, a 10¢. Jar, containing enough to make twenty sandwiches, and ten good recipes." Address: 110 E. Ninth Place Cleveland, Ohio.

320. International Health Association, Ltd. (The). 1907. Monotony in diet tends to mal-nutrition (Ad). *Good Health* (*London*) 5(19):607. Dec.

• ***Summary:*** "A variety of sustaining breakfast foods eaten on alternate mornings is, for most people, better than the same kind morning after morning." Each of IHA's breakfast foods is perfectly cooked and ready to serve in two minutes.

They are: Granose Flakes and Granose Biscuits. Toasted Wheat Flakes. Avenola. Gluten Meal (I.H.A. brand).

"Can be obtained from all Health Food Stores, or direct from the makers. In districts throughout the United Kingdom where we have no agents we will send, carriage paid, a packet of each of the above five foods, also a tin of our delicious Malted Nuts, and a ½ lb. tin of Protose (Nut Meat), together with "One Hundred Hygienic Recipes," for 5/-.

Note: The first page of the December issue states: "Our seventh Christmas... Our edition this month is 80,000 copies. Six years ago it was 15,000." Address: Stanborough Park, Watford, Herts. [Hertfordshire, England].

321. Carque (Otto). 1907. Carque's California Grape Juice (Ad). In: Louise Lust. 1907. The Practical Naturopathic-Vegetarian Cook Book. New York City, NY: Benedict Lust. 72 p. See p. 46. No index. 20 cm.

• ***Summary:*** "'From the Land of Sunshine, Fruits and Flowers.'"

"Is the natural, pure and unfermented juice of carefully selected grapes from Northern Sonoma Valley, the most favored grape district in California. It is sold under the guarantee of absolute purity, being free from alcohol and all chemical preservatives. Fermentation is prevented by means of an improved process of pasteurization, retaining the full flavor and nutritive value of the grape.

"It is a liquid food of great medicinal properties, purifying the blood and strengthening the nerves; an ideal food drink for the young and old, sick and well, during all seasons. One full quart bottle represents the juice of about four pounds of grapes, embodying all the life-giving principles of the fresh fruit. It will never change while sealed. After being opened it will keep for a time in a cool place.

"Carque's California Grape Juice is put up in two varieties–Zinfandel (red) and Muscat (white). The former is of somewhat heavier body, beautiful deep red color, and greater tonic value, the latter being somewhat sweeter and of excellent flavor. Sold in full quart and pint bottles.

"For shipment, we pack cases of 12 quarts or 24 pints; assorted varieties if desired.

"Special Offer.–Two cases quarts will be sent, freight prepaid, to any Railroad station in California on receipt of $9.00; to other stations in the United States, except points on branch lines in the mountains, on receipt of $10.00. Pints 25¢ more per case. Shipments made to all parts of the world. Freight and Express rates on application. Sample bottle by mail on receipt of ten cents." Address: 560 South Hope St., Los Angeles, California. Phone: Home: 7345. Main 3228.

322. Carque (Otto). 1907. Standard works on foods and dietetics, by Otto Carque (Ad). In: Louise Lust. 1907. The Practical Naturopathic-Vegetarian Cook Book. New York City, NY: Benedict Lust. 72 p. See p. 49. No index. 20 cm.

• ***Summary:*** "Medicinal Foods. How to get well and how to keep well by Nature's simple remedies. Explains the chemical and physiological functions of the organic salts in the human organism. Gives dietetic advice for the treatment of the most common diseases.

"Dr. E.R. Moras, author of 'Autology,' 1403 Washington Boulevard, Chicago, writes: 'What rich ore of information in what you write, if even but 1% of physicians knew the facts that you so clearly and interestingly present, what a glorious occupation it would be to devote oneself to the treating and educating the average individual." Sixteen pages, postpaid, 10 cents. Reduction in quantities.

"The Folly of Meat Eating. An Exposition of Rational Vegetarianism. Contains elaborate table with complete analyses (specifying the mineral elements) in various foods. "'There is a larger fund of information on the food question in this pamphlet than I have seen in the same space before. It is written in a clear and forceful manner.'–'The Liberator,' Minneapolis, Minnesota.

"16 pages, postpaid, 10 cents. Reduction in quantities.

"The Foundation of all Reform.–A popular treatise on the diet question and the mental and physical regeneration of man. Synopsis of contents: 1. Man's Position in Nature. 2. Chemistry and Physiology of Nutrition. 3. The Raw Food Question. 4. The Superiority of the Fruitarian Diet. 5. Diet Reform the Ultimate Solution of the Social and Economic Problems. 6. The Ethics of Diet Reform. "'I regard this as an exceedingly valuable contribution to the literature of hygiene, and strongly recommend it to all who are interested in the subject of food reform.'- Harry Brook, Editor of the 'Care of the Body,' *Los Angeles Sunday Times Magazine.* 75 pages, postpaid 25 cents."

"The Nutritive and Therapeutic Value of Fruits."

"A highly instructive and interesting treatise which shows the great value of natural fruit sugar for our nutrition and the injuriousness of refined sugar and fermented beverages. Sent on receipt of 2¢. stamp.

"Special Offer: On receipt of 35 cents the above valuable publications will be sent postpaid to any address. Order to-day from the author." Address: 560 South Hope St., Los Angeles, California; or Kosmos Publishing Co., 765 N. Cark St., Chicago, Illinois.

323. Lust, Louise. 1907. The practical naturopathic-vegetarian cook book: Cooked and uncooked foods. New York City, NY: Benedict Lust. 72 p. No index. 20 cm.
• ***Summary:*** This vegetarian cookbook uses milk, butter, and eggs. It also calls for many whole foods, such as unpolished rice [brown rice] (p. 41) and whole-wheat flour. The recipe for "Impromptu soup" (p. 24) states: "If soup is required quickly, not time to make a vegetable stock, it can be made by adding two tablespoons of Japan soya, which may be regarded as 'natural' vegetable salts, extract or any of the other vegetables..." Note 1. "Japan soya," probably a type of soy sauce, is sold by Dr. Heinrich Lahmann of Germany.

A recipe for "Cauliflowers" (p. 24) states: "cleanse the heads carefully from insects."

Page 40: "A large part of food among Americans is composed of white flour, sugar, and butter. People who try to live on such stuff gradually starve to death."

A long poem (p. 43), titled "The Yungborn Home, Butler, N.J., Sept. 1906, is by Yonovera Young.

Note 2. This is the earliest document seen (Nov. 2014) that mentions "Yungborn" (previously spelled "Jungborn") in connection with Benedict or Louise Lust.

At the end of the book are many interesting ads. We will list them in the order they appear.

Page 45: "The Battle Creek Sanitarium Food Co., Battle Creek, Michigan" "The health foods that made Battle Creek known the world over were first made by us 30 years ago. They are as supreme today as they were then. Take Granola, for instance. It has been copied by others but never successfully imitated. It is known as the ready to serve Breakfast Food that has withstood 30 years of competition."

Note 3. By this reckoning, Sanitarium Food Co. began making Granola in 1877 (1907-30 = 1877). Yet the earliest mention we can find of it in the SDA database is Aug. 1884–a difference of 7 years.

"We make more than sixty varieties of health foods. Full information on application."

An oval portrait photo facing the title page shows Louise Lust, N.D.

Note 4. This is the earliest document seen (Nov. 2014) that mentions Louisa (or Louise) Stroebel Lust, the wife of Benedict Lust. They were married on 11 June 1901 in Manhattan, New York. Her name at birth was Aloysia Stroebel or Stroebele (Source: New York, NY, marriage indexes, 1866-1937, online database via Ancestry.com). Benedict was born on 3 Feb. 1872 in Michelbach, Germany. He was the son Johannes Evangelista Lust and his wife, Luise Rieger. He departed by ship from Liverpool, England, and first arrived in the United States on 16 or 19 Nov. 1892 in the Port of New York. He applied for U.S. citizenship in July 1900 and was granted citizenship on 3 July 1900, having met the requirement to live in the U.S. for 7 full years as testified by Anthony Jommer / Sommer / Lommer.

Findagrave.com shows the burial marker of Benedict Lust, born 3 February 1872–died 4 September 1945 and Aloysia Lust, nee Stroebele, born June 24, 1864–died July 10, 1925. Buried in Mt. Calvary Cemetery, Butler, Morris County, New Jersey. Photos of their tombstone are on the website. So she died about 20 years before he did. Address: N.D., Naturopathic Director of Ladies' Dep. of "Yungborn," Butler, New Jersey. Instructor in Naturopathy, The American

324. Williams, Howard. 1907. The ethics of diet: A biographical history of the literature of humane dietetics, from the earliest period to the present day. Abridged edition. Manchester, England: Albert Broadbent; London: Richard J. James. viii + 242 + [6] p. 19 cm.
• ***Summary:*** This abridged classic of vegetarian literature traces writings in support of vegetarianism from ancient Greece to the 19th century. Contents: Part I: Earlier ethical dietetics. Ad on unnumbered page: Brown & Polsons patent corn flour, and "Paisley flour" raising powder. 1. Hesoid and the Orphic Poems. 2. Pythagoras: The western founder of humaner living. 3. Sakya Muni [Shakyamuni] and Buddhism. 4. Empedokles: The prophet-poet of the humaner life. 5. Plato and the transcendental philosophy. 6. Asoka [Ashoka] and the Buddhist propagandism. 7. Publius Ovidus Naso and Italian ethics. 8. Lucius Annæus Seneca and humanitarianism. 9. C. Musonius Rufus; a distinguished eclectic. 10. Plutarch and extra-human rights. 11. Florus Tertullian and his protest against the materialistic diet. 12. Flavius Clemens and early Christian dietetics. 13. Porphyrius [Porphyry of Tyre] and Neo-Pythagoreanism. 14. Ioannes [John] Chrysostom and Christian dietetics.

Part II: Modern ethical dietetics. 15. Luigi Cornaro and the dietetic Renaissance. 16. Thomas More and his ideal community. 17. Michel de Montaigne and the humanitarian philosophy. 18. Pierre Gassendi and the scientific basis of the humane diet. 19. John Evelyn, with Milton and Ray, eloquent eulogist of the fruit-diet.20. Philippe Hecquet and medical barbarism. 21. Bernard De Mandeville and the 'Fable of the Bees.' 22. George Cheyne and right methods of medicine. 23. Alexander Pope and his satire on anthropocentricism. 24. Antonio Cocchi and the diet reformation in Italy. 25. David Hartley on the callousness of carnivorism. 26. Jean-Jaques Rousseau and the natural life. 27. Francois Marie Arouet de Voltaire and the humanitarian philosophy. 28. George Louis Leclerc de Buffon and his 'L'Historie Naturelle'. 29. Oliver Goldsmith and his humanitarian essays. 30. William Paley and the utilitarian critic of pastoralism. 31. Bernardin St. Pierre and the first of idyllic romances. 32. Jean Baptiste Pressavin and the art of prolonging life. 33. Joseph Ritson and his reasons for 'Abstinence'. 34. William Lambe and hygienic dietetics. 35. John Abernethy and the dietetic treatment of cancer. 36. John Frank Newton and the return to nature. 37. Percy Bysshe Shelley the prophet-poet of humanitarianism. 38. Richard Phillips and his humanitarian labours. 39. William Cowherd, William Metcalfe, and the religious-dietetic reformation. 40. Jean Antoine Gleïzès and the new existence. 41. Alphonse De Lemartine as poet of the humaner life. 42. Jules Michelet and the historian's view of kreophagy. 43. Gustav von Struve and the first humane propaganda in Germany. 44. Edward Baltzer and the natural way of living. 45. Arthur Schopenhauer and the foundation of morality. 46. Henry David Thoreau and the simple life. 47. Richard Wagner and the aesthetic dietetics. 48. Anna Kingsford and the first prophetess of the humane life.

Ads on six unnumbered pages in the rear: [1] scientific food: Grape-Nuts. Selected "parts of wheat and barley are so treated by moisture, heat and time as to change the starch into grape sugar. This form of pre-digested starch is quickly taken up by the blood and deposited in the muscles and tissues." [2] Dr. Nichols' Food of Health. Brill's Sea Salt. Dr. Nichols' Soap. The Nichols' Brill Co., May Roberts & Co., wholesale agents, 9-11, Clerkenwell Road, London, E.C. [3] Germ-free & water-free milk. [4] Mapleton's Nut Foods. Send for complete price list to Hugh Mapleton, Nut Food Manufacturer, 2&3, Dolphin St., Ardwick, Manchester.

[5] Two good things–in three varieties. Granose: The ideal "Staff of Life." Granose flakes, Granose biscuits, Toasted wheat flakes (sweetened). Protose: The standard nut meat. The original Protose, Pine-nut Protose, Hazel-Nut Protose. "Protose is a wholesome meat, prepared from choice nuts and wheat. It resembles flesh-meat in appearance, taste, and chemical composition, and is superior to it in point of purity, digestibility and wholesomeness. Protose, being the best, is the standard nut meat, and is used by food reformers the world over." From: The International Health Association Limited, Legge St., Birmingham.

[6] The universal digestive tea. Sold by the Vegetarian Society, 257, Deansgate, M/r. "The Health Food Stores, 257, Deansgate, Manchester. Depôt for all vegetarian specialties. Pure wholemeal ground fresh daily, pure olive oil, pure dandelion coffee, shelled nuts, nut mills, wholemeal biscuits, etc."

The author lived 1837-1931. Address: M.A., Late scholar of St. John's College, Cambridge.

325. Year book (1906) of the Seventh-day Adventist Denomination. 1907. Washington, DC: Review and Herald Publishing Co.
• ***Summary:*** The section titled "Health food restaurants and stores" contains the name and address of 21 restaurants, including: Los Angeles, California. 257 South Hill St. O.F. Conway, manager. San Francisco, California. 755 Market St.

Also the address of 14 such stores (in Boston, Massachusetts; College View, Nebraska; Des Moines, Iowa; Detroit, Michigan; Fresno, California; Melrose, Massachusetts; Oakland, California; Omaha, Nebraska; Rochester, New York; Sacramento, California; San Francisco, California; San Jose, California; Santa Cruz, California; Springfield, Massachusetts).

326. Carqué, Otto. 1907? Medicinal foods. Chicago, Illinois: Kosmos Publishing Co. 16 p. Undated. *
• ***Summary:*** How to get well and keep well by Nature. Simple remedies. 10 cents. Address: 765 North Clark St., Chicago, Illinois.

© Copyright Soyinfo Center 2021

327. *Wanganui Herald* (*Manawatu-Wanganui, New Zealand*). 1908. Seventh Day Adventist Conference. Jan. 9. p. 5.
• ***Summary:*** "Cambridge, January 9. The Australian Conference of the Seventh Day Adventists has opened here and will be continued for a week. A large number of delegates are present. The Adventists recently purchased large farms and property near Cambridge and have erected a training school and health food factory."

Note: Cambridge is a town in the Waikato region of the North Island of New Zealand.

328. *Battle Creek Daily Moon* (*Michigan*). 1908. Social events. Jan. 14. p. 7, cols. 1-2.
• ***Summary:*** "Wednesday at 7:30 sharp, a banquet will be given at the Sanitarium for new members of the Y.W.C.A. secured during the contest and the members who secured the most editions. Other members can attend upon payments of 50 cents, tickets for which must be procured in advance. In addition to the health food spread, a program has been arranged with Mrs. E.C. Fisher as toastmistress. The numbers are as follows; vocal solo, Miss Irene Jackson; welcoming address–Dr. J.H. Kellogg; "Young,"–Miss Lenna Cooper..."

329. *Advertiser* (*The*) (*Adelaide, South Australia*). 1908. Sanitarium Health Food. Feb. 27. p. 6.
• ***Summary:*** "A 'Sanitarium Health Food Cafe' was opened on Monday in cool, airy, and convenient premises at 28, Waymouth-street under the management of Mr. J. G. Fisher. Great success has attended the hygienic cafes established by the same institution in Melbourne, Sydney, Hobart, and Wellington [New Zealand], where the viands purveyed have grown in public estimation every day. It is claimed that sanitarium health foods are pre-eminently calculated to supply all that is required for the development of the human body. They are prepared from the choicest grains, nuts, and fruits, and so can be eaten without fear of contracting diseases sometimes conveyed by flesh meats. Everything about the cafe is attractive, and the food is served in the most appetising way. The menu includes Macaroni cutlets, mock chicken soup, nut meat and tomato stew, and other vegetarian delicacies while the waitresses are expert and attentive. The cooking is, of course, in the hands of specialists. Meals are served at the ordinary hours, and it is asserted that in the food there are no free fats, coloring matter, or other injurious decoctions. If so desired palatable unfermented wine, the pure juice of the grape, can be taken with the meals."

330. *New-York Tribune.* 1908. The talk of the day. March 1. p. 8.
• ***Summary:*** "A new health food is being recommended to Philadelphians, according to 'The Record,' of that city, which quotes a Walnut street physician as its authority. Bran–the common feed store kind, long known as a good thing for ailing horses–is the latest breakfast dish in the Quaker City. Says 'The Record': 'Bran is the outer covering of wheat, rye, oats and other similar grain, and has been used from time immemorial for food for cattle. Its use as a food for human beings, however, is comparatively recent; but leading physicians with troublesome indigestion cases on hand are resorting to the bran cure. Brown bread had its origin as bran bread, being made from bran instead of flour... the great majority of brown bread to-day does not contain any bran. Doctors say bran is a step back to nature and consequently is healing to an ailing stomach." Bran is available from feed stores.

Note: Sylvester Graham (1794-1851), American health reformer and vegetarian, advocated the use of whole-grain bread in part because it contained the natural bran and dietary fiber found in the grain.

331. Brook, Harry Ellington. 1908. Care of the body–Suggestions for preserving health. *Los Angeles Times.* April 5. p. IM28.
• ***Summary:*** The section titled "Whole meal bread" states that the USDA, after a 6-year investigation, has concluded that whole-meal bread is less desirable than white. They acknowledge "that whole wheat contains more protein than the emasculated product, but claim that it is too coarse, and in consequence is carried out of the body before all the nourishment can be digested." Brook contends that the issue is not protein but "organic salts." There follows a table that compares the mineral salts in whole wheat flour vs. white flour. The table first appeared in this column nearly 2 years ago in an article titled "Medicinal Foods," by Otto Carque.

Note: This is the earliest column seen with this title compiled or edited by "Harry Brook." A weekly column titled "Care of the body: Valuable suggestions for acquiring and preserving health" first appeared in the *Los Angeles Times* on 25 June 1899; the name of the compiler or editor was not given. It was initially 1 page long. Address: Staff writer.

332. Ralston Purina Mills. 1908. Ralston health food: The food for growing children (Ad). *Collier's* 41(5):33. April 25.
• ***Summary:*** A 1/8 page ad. "If you want to grow children who are bright, sturdy, good-natured, and healthy, feed them on Ralston Health Food." It is the "ideal food for growing children because it is n-a-t- u-r-a-l food [natural food] and thus easily digested and rich in nature's own deliciousness and nutriment." It is "not white–but has the natural golden color of wheat. Ralston Health Food is sterilised–so always good. 15-cent packages make 50 plates of *food."* Order it from your grocer today.

Illustrations show: (1) The front and one side of a package of Ralston Health Food. (2) The Ralston Miller

(face and cap). (3) The heads of two children growing like flowers out of heads of wheat.

Note 1. This is an example of the attempt to link health, packaged breakfast cereal, and the needs of children with a brand name.

Note 2. Ralston Health Food was being advertised as early as 1905. Address: St. Louis, Missouri; Portland, Oregon; Tilsonburg, Ontario.

333. Stevens (Nat.) Publishing Co. 1908. Meat eating (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 9(5):Unnumbered page. May.

• ***Summary:*** "Bound brochure, illustrated, postpaid, 10¢. Just out. By Otto Carque (Author). A complete treatise. Unusually interesting. Scientific facts... Our fine list of special books." Address: Suite 303, Bldg. 117 N. Broad St., Philadelphia, Pennsylvania.

334. Brook, Harry Ellington. 1908. Care of the body–Suggestions for preserving health. *Los Angeles Times.* Sept. 6. p. IM316.

• ***Summary:*** The section on "Uric acid" begins by noting: "Dr. Alexander Haig of London is recognized as the leading proponent of and authority on the uric-acid theory of disease. He was led to take up the subject by noticing that the severe headaches from which he suffered ceased whenever he gave up flesh and other uric-acid foods... Doctors nowadays sneer at the uric-acid theory."

"In conclusion, the following list of purin bodies [purine bodies]–uric acid, xanthin, etc.–in foods is published. It was prepared for Care of the Body by Otto Carque. The figures represent parts per thousand in the food substances (not water-free, but in their normal condition)." The five most concentrated sources are: Sweetbread [the thymus or pancreas of a young animal (as a calf) used for food]–10.063. Liver–2.752. Steak 2.066. Sirloin–1.305. Chicken–1.295. Foods from the plant kingdom contain little or no purin bodies. Address: Staff writer.

335. Brook, Harry Ellington. 1908. Care of the body–Suggestions for preserving health. *Los Angeles Times.* Sept. 20. p. IM380-84.

• ***Summary:*** The section titled "Growing California industry" states: "One of the California products which has come into prominence in the last few years is unfermented grape juice. The present heavy crops and low prevailing price of grapes should give an additional impetus to this industry. Otto Carqué, who has put up 80,000 gallons of grape juice for the Calwa Products Company in San Francisco last year, recently wrote to the editor of The Care of the Body from Fresno that he had received orders from his company to turn out at least 500,000 gallons this season, as last year's product has been almost entirely sold. Large buildings... are being erected for this purpose at Fresno and at Geyserville in Sonoma County, while a modern bottling establishment is now in construction at Winehaven, three miles north of Point Richmond, on the Bay of San Francisco..."

"This is a great step in the line of food reform, economically as well as hygienically. Statistics show that the world's annual output of manufactured sugar is now at 10,000,000 tons, while nearly the same amount of natural fruit sugar is destroyed in the production of fermented and distilled liquors every year. Fruits and their juices should take a prominent place in our daily bill of fare..."

"Those who are fighting the liquor evil should lend every aid toward increasing the popularity and consumption of unfermented fruit juice, which has heretofore been imported to California..." Address: Staff writer.

336. *Vegetarian Messenger* (*Manchester, England*). 1908. Home news–"Pitman" stores annual outing: A new departure. Sept. p. 252.

• ***Summary:*** From *Smethwick Telephone:* "The annual outing of the go-ahead firm took place on August 8th, the whole of the establishment being closed for the day. Employees and friends to the number of about fifty, journeyed in brakes [horse-drawn carriages] and by cycles [bicycles] from the Stores at about nine o'clock in the morning, Dodderhill Common, with its beautiful surroundings, being reached about noon. A cold vegetarian luncheon was served shortly after arrival. Mr. Tom Banks (president of the Birmingham Vegetarian Society) in a moving vote of thanks to their host and hostess (Mr. and Mrs. James Henry Cook), remarked on the pleasure it gave him for the fourth time to be present at the annual outing of the 'Pitman' Co. He believed that the firm had done much towards forwarding the Food

© Copyright Soyinfo Center 2021

Reform Movement, and he believed further... that with the new departure about to be inaugurated, much greater things would be done and still greater success achieved in the future. Mr. Cook... looked upon that day as a red letter day in the history of the firm. That morning the first sod was turned for their new premises, which when completed would be by far the most compact and up-to-date [but not the largest] health food factory in the kingdom. The building throughout would be lit up with electric light, and the whole of the ground floor premises, about 160 feet in length, would be laid from end to end with tram lines. The premises would have about three times their present accommodation., and will be built so that extensions can be made from time to time on the freehold land already acquired. While outside the City [of Birmingham], the land [at Aston] was just within the borough boundary, and could be reached by tram from the centre in a very few minutes."

Note: The largest health food factory in the UK was almost certainly that of the International Health Association (IHA), a Seventh-day Adventist organization, located at Stanborough Park, Watford, Herts. The IHA moved its factory from Birmingham to Stanborough Park in 1907.

337. Brook, Harry Ellington. 1908. Care of the body–Suggestions for preserving health. *Los Angeles Times.* Oct. 25. p. IM540. Sunday magazine.
• ***Summary:*** The section titled "Otto Carque" (near the end) states: "Otto Carque has returned to Los Angeles after an absence of three months in Fresno and Sonoma counties, where he put up about 500,000 gallons of unfermented grape juice.

"Mr. Carqué is at work on a new book on diet, which he expects to publish early next year." Address: Staff writer.

338. Carque, Otto. 1908. Errors of biochemistry. *Naturopath and Herald of Health* (*The*) (*New York City*) 9(11):331-34. Nov.
• ***Summary:*** Discusses the health value of organic mineral salts over inorganic minerals, the importance of vital force, and the superiority of plant foods over animal foods.

"Indeed the majority of diseases are due to the lack of certain organic salts in our system."

"The so-called tissue salts of the biochemical school, which are supposed to be ready for assimilation, are inert and cannot sustain animal life for any length of time, nor can they supply any deficiency of the highly organized blood salts,... Animals cannot make organic matter from crude minerals, even the embryonic plant must feed on the organic compounds of the seed until the roots and leaves are grown. The elevation of inorganic matter into organic matter which takes place in the green leaves of the plants, is the starting point of life; upon it alone is based the possibility of the higher forms of the organic kingdom."

"We can hardly improve on nature, and the foods that we can take in their natural state [uncooked] are best adapted for our nutrition."

"There is a marked physiological difference between plant and animal food. Animals are distinguished from vegetables by incessant decay in every tissue, which is proportional to animal activity." Two opposing forces are at work in every part of the animal body, "the one [catabolism, destructive metabolism] tearing down, the other [anabolism] repairing the breach as fast as it can be made. In plants, no such incessant decay has ever been discovered." "Flesh foods... impart less vitality to our system than animal foods." Address: 560 S. Hope St., Los Angeles, California.

339. Black, George. 1908. A manual of vegetarian cookery. London: Horace Marshall. [122] p. 22 cm. *
• ***Summary:*** Near the front of the book, on unnumbered pages, are advertisements for vegetarian boarding houses and restaurant (Taredo, Torquay, Castle's Vegetarian Restaurants), nut foods, health foods, health food stores, food reform supplies, Mapleton's Nut Foods, Marmite, etc.

One half-page ad is for "Seven of 'Pitman' delicious 1001 health food specialties. In place of meat and free from its dangers." (1) Brazose Meat. (2) Vigar Brawn. (3) Tokio Baked Beans. (4) Placeomeat Sandwich Biscuits. (5) Vegetable Soups, in 12 varieties. (6) Nutmarto Potted Paste. (8) Vigar Gravy Essence. "Carriage [post] paid on orders for 5/- [shillings] value. The bottom half of this page has an ad for the "'Pitman' Fireless Cooker.' Address: England.

340. Colcord, Anna L. (Mrs.). 1908. A friend in the kitchen: or What to cook and how to cook it. Containing 400 choice recipes carefully tested. 16th ed. Takoma Park Station, Washington, DC: Review and Herald Publishing Association. 112 p. Illust. Portrait. 20 cm.
• ***Summary:*** One chapter in this vegetarian cookbook, titled "Substitutes for meats," contains many Biblical quotations opposing meat eating. The recipes are based mostly on nuts, lentils and peas.

Another chapter, titled "Specially prepared health foods: Nuts, oils, etc.," gives recipes including: homemade "Peanut butter" (dry roast briefly in an oven until the skins can be rubbed off easily. "Grind, and cook for several hours in a double boiler with no water added to the nuts." No salt is added). "Peanut cream" ("Mix one tablespoon of nut butter with two or three spoonfuls of water to a smooth cream. Then add one-half cupful of water a little salt and stir well together"). "Peanut milk" ("Make the same as peanut cream, only add more water"). Almond butter. Almond milk and cream. Cocoanut milk and cream. Home-made granola. Nutmeat. Protose steak. Protose cutlets. Nut gravy. Other chapters (p. 98-110) include "Simple dishes for the sick" (with recipes for Gluten gruel, Graham gruel, and Rice gruel), "Food for infants," "Remember the Sabbath Day to keep it holy," "Food combinations," "Time required to

© Copyright Soyinfo Center 2021

digest various foods" (Rice, apples, and granola take the least time, 1 hour; Roasted pork takes the longest, 5 hours and 15 minutes; animal foods generally take longer than foods of plant origin), "How to become a vegetarian," and "Vegetarianism in London."

A photo of the author, a Seventh-day Adventist, and her signature faces, the title page. Note: This is the second earliest U.S. document seen (March 1999) that mentions almond milk. Soy is not mentioned in this book. Address: USA.

341. Congregational Church (Shirley, Massachusetts), Ladies Sewing Circle. 1908. Choice selection of tested recipes from many households. Morrisville, Vermont: Wm. H. Nichols Cook Book Pub. Co. 105 p. See p. 44. Illust. No index. 19 cm.

• ***Summary:*** On the unnumbered page after page 44 (in what looks like a disguised ad) are four recipes that call for Ralston Health Food: Ralston cocoanut pudding ("one cup cooked Ralston"), Ralston Scalloped Oysters ("Four cups milk, one cup Ralston"), Ralston Cheese Souffle ("One-fourth cup Ralston Health Foods,... Cook Ralston and milk five minutes"), and Ralston scalloped salmon ("Three cups of water, one-half cup Ralston Health Food,... Have water boiling, then stir in Ralston Health Food. Boil 10 minutes; add butter, yolks of eggs, pepper and salt;...)"

At bottom of page: "If your grocer is not supplied with Ralston Health Foods, end us his name. Ralston Purina Company, St. Louis, Missouri."

The section on "Sandwiches–fillings" (p. 16) states: "Nut–Peanuts or walnuts chopped very fine are an addition to almost any sandwiches."

Note: This book appears to have a 2nd title page: "The Home Comfort Cook Book," by the same group of ladies. Address: Massachusetts.

342. Earle, Maria Teresa [Mrs. C.W. Earle]; Bryan, Violet [Mrs. Hugh Bryan]. 1908. Diet difficulties with notes on growing vegetables. London: Truslove & Hanson, Ltd. 80 p. 16 cm. [14 ref]

• ***Summary:*** This book about vegetarianism contains a "List of books useful to those who would further study the subject of a fleshless diet" (p. 68). The authors names are listed on the title page as "Mrs. C.W. Earle and Mrs. Hugh Bryan."

On the 2 pages before the title page is an ad for Eustace Miles Proteid Food (and 3 other foods), and for Pitman Health Foods–including Brazose Meat (made from Brazil nuts), Tokio Baked Beans, and Nutmarto Potted Paste ("far superior to meat and fish pastes"). Address: England.

343. Frear, William; Given, G.C.; Broomwell, A.W. 1908. Breakfast foods: Containing the results of an investigation of breakfast foods and pancake flours on sale in the markets of Pennsylvania. *Pennsylvania Dep. of Agriculture, Dairy and Food Division, Bulletin* No. 162. 40 p. See p. 17-19, 21.

• ***Summary:*** In the analyses, "Ralston Health Food" appears under "Farina preparations" (p. 17, 19).

"No. 2667 and No. 3697; Ralston Health Food: The label says 'When you open this package you can see thousands of tiny *almond-colored grains*... These are the true Wheat-hearts, or Seeds-germs of Wheat. And these germs of wheat are full of the Vegetable Phosphorus that makes *children grow like magic and develop strong mentally.* They are what make Nerve-worn people whole again, calm, composed and restful. They are what supply new Mind-Power by providing the brain all the phosphorus it can use in heavy Thinking without exhaustion of the Nerve Cells... They make good the defects in *other* Foods that lack Phosphorus... Remember you can see these Wheat-hearts or Phosphorus germs in this very package of Ralston Health Food... You can't see *them in any other* Cereal Food. Why?'"

"The germs are present here, as they are in Graham flour, and in many other wheat preparations. They are visible in other preparations, contrary to the plain implication of this label. The composition of the food, compared with that of the pure germ, shows low protein and fat; moreover, the phosphoric acid in No. 2667 is only 0.33 per cent., not more than is exhibited by many other wheat preparations, such, for example, as cracked wheat..." Address: 1. State College, University Park, Pennsylvania.

344. Kellogg Food Co. 1908. Healthful living: An account of the Battle Creek Diet System. Battle Creek, Michigan. 72 p.

• ***Summary:*** The inside front cover, titled "A bit of history about the health food business in Battle Creek," states: "Thirty-five years ago Dr. J.H. Kellogg, the Superintendent of the Battle Creek Sanitarium, began the preparation of special food products, intended at that time for the use of the patients of the Sanitarium.

"The knowledge of their value grew. New foods were added from time to time as the idea developed. One of the first was a cereal coffee (1876). Later came the invention of Toasted Wheat Flakes (1895), and Toasted Corn Flakes (1901), then Toasted Rice Flakes and a long list of nut foods and other products.

"Dozens of food companies were organized in Battle Creek to manufacture toasted flakes, cereal coffees, and other foods. Millions were made and lost in exploiting the food ideas developed by Dr. Kellogg and the reputation acquired by Battle Creek as a headquarters for health foods and ideas.

"In order to protect the public against further imposition, a company has been organized and incorporated to manufacture and sell Dr. Kellogg's food products made after original and perfected formulœ, which will be known as The Kellogg Food Company, Battle Creek, Michigan."

The price list, near the back of this booklet, gives the prices for 126 foods–including various sizes. Among these are: Almond butter (1 lb can, $1.00), almond meal, Bran

© Copyright Soyinfo Center 2021

biscuit, Bromose, Diabetic gluten biscuits, Diabetic gluten meal, 40% gluten flour, Gluten meal, Granola, Meltose, Nut butter (1 lb can, $0.30), Nuttolene, Nuttose, olive oil, Peanut butter (large jar, $0.25; small jar, $0.10), Protose vegetable meat, Salted peanut butter (1 lb can, $0.25), Savora nut butter, Sterilized wheat bran, Taro gluten biscuit, Toasted corn flakes, Toasted rice flakes, Toasted rye flakes, Toasted wheat flakes, Vegetable gelatin, Wafer–whole wheat, Yogurt cheese, Zwieback.

On page 72 is a description of the company's "Peanut butter.–We were the originators of peanut butter, the use of which has become so widespread, and which is now manufactured by many concerns in different parts of the country. But we long ago abandoned the process of roasting the nuts, as we found this to produce harmful effects by setting free the oil and producing certain chemical changes in it. For years our peanut butter has been prepared by a wholly different process, by which the injurious effects referred to may be avoided. In this respect our Peanut Butter differs from all similar products. Prepared from choicest nuts. Put up in pound tins. Most excellent fat producer. Capital for use in sandwiches, for the preparation of salads and desserts. An excellent substitute for butter. Large glass jars, 25 cents; small glass jars, 10 cents.

"Salted Peanut Butter–Same as the preceding, but containing a certain proportion of salt. Pound tins, 25 cents.

"Nut butter–A combination of various nuts. An exceedingly palatable, toothsome vegetable fat which is readily accepted as a substitute for animal fats of all sorts. Pound, 30 cents."

Note 1. This is the earliest document seen (June 2002) showing interest by Seventh-day Adventists or Dr. John Harvey Kellogg in dietary fiber, or a high-fiber food product (Bran Biscuit, Sterilized Wheat Bran) sold by an Adventist food company. Dr. Kellogg was the founder and director of Battle Creek Foods.

Note 2. This is the earliest document seen (June 2002) that mentions bran in connection with Dr. John Harvey Kellogg. It is also the first commercial product seen with "Bran" in the product name. Address: Battle Creek, Michigan.

345. Kellogg, John Harvey. 1908. The Battle Creek Sanitarium system: History, organization, methods. Battle Creek, Michigan. 215 p. Illust. See p. 137, 207.

• ***Summary:*** Note: This book was written after the U.S. Circuit Court of Appeals ruled in July 1900 that Dr. Kellogg's company must stop using the words "Health Food Company" in its company name, since that term had been used continuously since 1875 by Frank Fuller of New Jersey. A careful reading of these text reveals a great deal.

The section titled "The original Sanitarium health foods" begins (p. 137): "All the so-called Sanitarium health foods are regularly found on the Sanitarium bill of fare, having been originally devised solely for this use. The character of these foods cannot be judged by the numerous imitations and piracies which are lauded by newspapers and signboard advertisements in terms not unlike those employed by the patent medicine vendor. The Battle Creek Sanitarium has no connection whatever with these questionable exploitations."

The section on "Sanitarium health foods" states (p. 207): "Various special foods were for some time manufactured and sold by a department organized for the purpose, but after the fire of 1902 the management disposed of all its interest in the manufacture and sale of foods to friendly parties, who it was believed would conduct the business in an honorable and ethical manner, precautions being taken to secure this. Through clerical oversights and trusting too much to advertising agents, some mistakes were made, the correction of which involved large losses and reorganization. At the present time all the foods which have originated in connection with the Battle Creek Sanitarium, and some of which have at various times been sold by the Battle Creek Sanitarium Food Department, the Battle Creek Sanitarium Health Food Company, the Battle Creek Sanitarium Food Company, the Battle Creek Sanitarium Company, Limited, and the Sanitas Nut Food Company, Limited, are now manufactured and sold exclusively by the Sanitas Food Company, who announce their products under the name of the 'Battle Creek Diet System,' the only food company doing business in Battle Creek whose products are used or recommended by the Sanitarium management.

"The Battle Creek Sanitarium has never at any time had any connection whatever with the manufacture of 'Postum,' 'Grape-Nuts,' 'Obesity Pills,' or any other of the numerous nostrums made or sold by parties advertising from Battle Creek."

The section titled "A public charity–No private interest–No sectarian affiliation" begins (p. 203): "The Battle Creek Sanitarium corporation is a private enterprise conceived and conducted solely for the public welfare. It has never been owned by any church or sect. For many years the institution was closely affiliated with the Seventh-day Adventist denomination because of the fact that the original founders and the contributing members were chiefly members of the denomination named; but the nonsectarian and undenominational character of the work was always fully acknowledged, and was clearly indicated by its charter. An attempt made in recent years by the central committee of the denomination named to bring the institution under denominational control resulted in so marked a failure that at the present time the institution is absolutely free from sectarian affiliation as well as control. The personnel is made up of Christian men and women of various denominations, but there is no church or sectarian control or affiliation."

At the front of this book, on the verso of the title page, are two quotations: (1) "Nature alone can cure; this is the highest law of practical medicine, and the one to which

© Copyright Soyinfo Center 2021

we must adhere... Nature creates and maintains; she must therefore be able to cure.–Dietl (1845).” Note: Joseph Dietl (1804-1878) was a medical reformer who belonged to the so-called New Vienna School of Medicine.

(2) “Diseases are not entities that have entered into the body; they are not parasites that take root in the body; they merely show us the course of the vital processes under altered conditions.–Virchow (1847).” Note 2. Rudolf Ludwig K. Virchow (1821-1902) was a German doctor, who is referred to as the “Father of Pathology.” He is perhaps best know for his saying that “every cell originates from another existing cell like it” which he published in 1858. It is a rejection of the concept of spontaneous generation, which held that organisms could arise from non-living matter. Address: M.D., Superintendent.

346. Battle Creek Foods. 1909. The only original health foods: A complete list of our products (Ad). *Good Health* (*Battle Creek, Michigan*) 44(3):Unpaginated. March.
• ***Summary:*** The company sells seven categories of products: 1. Cereals (15 products), incl. Toasted rice flakes, Granose flakes, Granola, Granuto, and Gluten meal (20 per cent, for gruels, mushes, and purees), Sterilized bran (a gentle laxative). 2. Bakery products (12 products), incl. Graham crackers (plain or sweetened), Sanitas wafers, Zwieback, Sanitas cookies. 3. Meat substitutes (10 products), incl. Protose (made of nuts and grains, ½- or 1-lb can), Savory Protose, Potted Protose, Protose roast, L-Protose (no nuts), K-Protose (resembles veal, no nuts), X-Protose (resembles chicken), Nuttose (made from nuts, 1 lb can), Nuttolene (“Made exclusively of choice edible nuts. A vegetable butter for table use”).

4. Other nut products (5 products), incl. Peanut butter (1 lb can, unroasted), Salted peanut butter, Almond butter, Almond meal. 5. Condensed soups (4 products). 6. Savory sauces (3 products). 7. Beverages (3 products), incl. Malted nuts (large bottle), Noko (cereal coffee), Caramel cereal (“The original coffee substitute, containing no burnt molasses or artificial flavoring”). Address: Battle Creek, Michigan.

The Introduction, by Sinclair, begins with this story: About 10 years ago, when he was a college student, he became sick for the first time in 14 years. He visited a doctor and said: "'Doctor, it has occurred to me that I would like to have someone who knows about the body examine me

© Copyright Soyinfo Center 2021

M. Elie Metchnikoff, of the Pasteur Institute of Paris.
His researches have thrown great light on auto-intoxication. He believes that the normal life should be over 125 years long.

thoroughly and tell me how to live.'

"I can recall his look of perplexity. 'Was there anything the matter with you before this attack?' he asked. 'Nothing that I know if,' I answered; 'but I have often reflected that the way I am living cannot be perfect; and I want to get as much out of my body and mind as I can. I should like to know, for instance, just what are the proper things for me to eat -"

"'Nonsense,' he interrupted. 'You go right on and live as you have been living, and don't get to thinking about your health.'

"And so I went away and dismissed the idea... All doctors that I had ever heard of were people who cured you when you were sick; to ask one to take you when you were well and to help you to stay well, was to take an unfair advantage of the profession.'" Over the years he visited the doctor several times, and each time the doctor gave him a another kind of medicine to cover up his symptoms. It was first in Battle Creek, Michigan, that he found a large, modern and entirely new type of hospital with "more than a thousand nurses, physicians, and helpers, all devoting their time to the teaching of the new art of keeping well." Slowly but surely he "found the road to permanent health."

A review in Nature: "A new sort of health book, giving in condensed form the theories of Fletcher, Metchnikoff,

Kellogg and others. 16 full page illustrations. Price, $1.35."

352. *Naturopath and Herald of Health* (*The*) (*New York City*). 1910. The Rice Association of America, Crowley, Louisiana. 15(1):45. Jan.
• ***Summary:*** "Rice, of course, we mean unpolished rice, is strictly a Naturopathic food, and substitute for meat, eggs, fish, poultry, a fine food that will cure dyspepsia. The easiest cereal to digest."

"Unpolished rice is for sale, in first class quality, at the Pure Food Store, 465 Lexington Ave., New York City."

353. *Washington Times* (*DC*). 1910. Butler and gems returning to city: Butler accused of $20,000 jewel theft aids Washington detectives. Said to have told story of robbery. April 8. p. 11.
• ***Summary:*** Paul Bragg, age 15, of Quincy Place (Washington, DC), accompanied a butler, Clarence Howlett, after a jewel heist. Howlett, who had formerly boarded with the Bragg family on Quincy Place, had befriended Paul before the robbery and wanted to use him to run errands and fetch newspapers. Bragg returned to Washington Tuesday night and immediately went "to Police Headquarters, where he gave the police all the information he could about the butler's whereabouts."

Note: This article shows that in April 1910, Paul Bragg was age 15, and living on Quincy Place in Washington, DC. These three facts perfectly match those of the U.S. census conducted two months later, and show that he was born in about 1895.

This article also appeared in the *Sun* (Baltimore, Maryland) on 9 April 1910 (p. 16).

354. Brook, Harry Ellington. 1910. Care of the body–Suggestions for preserving health. *Los Angeles Times*. April 10. p. IM476. Sunday magazine.
• ***Summary:*** The first section, titled "Fasting for the cure of disease," states: "Fasting for the cure of disease, or the improvement of health, has become quite a fad in this country during the past few years. Many remarkable cures of diseases, declared by medical men to be incurable, have been reported.

"The forty days' fast of Jesus 2000 years ago, and the twice-repeated forty days fast of Dr. Tanner–now of Long Beach–about 25 years ago, have since then frequently been exceeded. Many have fasted over six weeks [42 days]. A Chicago [Illinois] lawyer, three years ago, went sixty one days without food, and thus cured himself of a chronic stomach trouble."

"More than any other man in this country, the late Dr. Edward Hooker Dewey introduced and popularized the idea of fasting. His book, 'The Fasting Cure and the No-Breakfast Plan,' was reviewed here several years ago." His books are published by the Fowler & Wells Co., New York.

"'Fasting for the Cure of Disease' is the title of a book of 180 pages by Dr. Linda Burfield Hazzard of Seattle (Harrison Publishing Co., Seattle) [Washington]. Dr. Hazzard makes a specialty of fasting for the cure of disease, and has treated by fasting during the past two years over 600 persons, having lost only six, and in all of these cases an autopsy showed that death was inevitable. Dr. Hazzard was a pupil of Dr. Dewey." The chapter on diet is particularly good.

In his book, 'The Philosophy of Fasting' (published by Benedict Lust, No. 124 East 59th street, New York), Edward Earle "Purinton sets forth the virtues of fasting for various purposes–for health, enjoyment, freedom, power, beauty, faith, courage, poise, virtue, spirituality, instinct, inspiration and love. He also gives a 'personal prologue' and 'twenty rules for sane fasting.'

Another large book on fasting is entitled 'Vitality, Fasting, and Nutrition,' by Hereward Carrington (Rebman Co., New York, 630 p.).

The section titled "A California health food" states: "Another addition to the long list of health foods has been placed on the market by our friend Otto Carqué. It is composed almost entirely of California products, including dried fruits, nuts, and a little partially-cooked grain. Such a food possesses advantages over the raw cereal foods on the market, which are harmful to the digestive organs, especially of those whose digestion is weak." Address: Staff writer.

357. Brook, Harry Ellington. 1910. Care of the body–Suggestions for preserving health. *Los Angeles Times*. April 24. p. IM540-41.

• ***Summary:*** The section titled "A husky vegetarian" states: "In a recent number of the Vegetarian magazine a correspondent writing adversely about a non-flesh dietary, criticised the appearance of Otto Carque, the well-known writer on hygiene, as seen in an engraving.

"Well, if you had seen Carque running, like a mountain goat, up the steep side of a brush-covered Southern California foothill, with fifty pounds on his back, while you, with no 'impediments,' puffed and 'blowed' behind him, you would come to the conclusion that Carque was a pretty husky kind of vegetarian." Address: N.D. [Naturopathic Doctor], Staff writer.

358. Bugby, William. 1910. A vegetarian's experiences. No II. The soy bean. *Daily Post* (*The*) (*Hobart, Tasmania, Australia*). April 30. p. 7.

• ***Summary:*** "There is a still better substitute for meat, and that is the Soy bean of Japan, which is now being extensively cultivated in New South Wales. The present writer has found nothing to surpass this most useful bean, and especially the improved variety of it grown at Wahroonga, N.S.W., by the Sanitarium Food Reform Co. [Seventh-day Adventist]. It might be introduced into Tasmania with advantage, and in a calcareous soil would prove a source of great profit to the grower. The Wahroonga variety of Soy bean takes less time to cook and is also more tender when cooked than that imported direct from Japan. It is far more digestible than any other kind of bean."

Note 1. In 1910 Wahroonga was a suburb of Sydney; it would have included some small, semi-rural market-gardening areas that provided vegetables for the city dwellers. The word "extensively" above probably means that small plots of soybeans were being grown in market gardens around towns and settlements in NSW. As of 2005 Sanitarium Food Reform Co. has been renamed Sanitarium Health Food Co. and is a thriving maker of health foods, breakfast cereals, meat alternatives, soymilk, etc.

"While the writer feels some satisfaction in the thought that more than 20 years ago [i.e., before April 1890], in the columns of a Melbourne journal, he was the first to call attention to the great merits of this most remarkable bean, and to advocate its introduction into Australia, he feels somewhat depressed at the fact that it has taken so many years to (?) its cultivation on and its adoption and recognition as an article of food. As a rule it may be assumed that it will take a generation to effect any great (?) reform. But we shall reap, if we faint not.

"The Soy bean is, in fact, a perfect and superior substitute for flesh meat, and it contains not only proteids or flesh-formers in abundance but also a large amount of pure and digestible fat. It contains the same food elements, in the same proportion, as a moderately fat mutton chop. Its skin is so thin as to be scarcely perceptible, hence it is the most digestible of the bean family, and can be flavored to suit any palate. It makes a highly nutritious soup. Children and invalids thrive upon it. The following is an analysis of the Soy bean -"

A table compares the "elementary constituents" of two varieties of soy beans, peas, lean beef, and fat mutton. For each is given the percentage composition of water, protein or nitrogenous matter, fat or hydro-carbon, carbo-hydrates (starches), fibre, and ash. The protein content is as follows: Soy bean #1–37.8%. Soy bean #2–34.0%. Peas 23.0%. Lean beef 19.0%. Fat mutton 12.0%.

"In cooking, the bean absorbs about four or five times its weight of water; this brings it closely up to an equal quantity of fat mutton. A glance at the above table will show that the Soy is superior in every respect to beef, and is only surpassed in starch by peas. Dr. Anna Kingsford, M.D., in her interesting book 'The Perfect Way in Diet' [about a vegetarian diet], has shown that the digestive organs of man are not fitted for animal food, and that such food causes irritation and increases the tendency to inflammation, and is also largely responsible for rheumatism, gout, and neuralgia. It also promotes phthisis [pulmonary tuberculosis]. The drowsiness felt by so many persons after a hearty meal of meat, together with an intense craving for stimulants [e.g., alcohol], is wholly unknown to vegetarians, and this is why, in London, the numerous vegetarian restaurants are thronged by bankers and brainy business men at the time of the midday meal.

"It is worthy of notice that the ox gives back in his meat only some of the food derived by him from the grass, retaining the balance to form his teeth, horns, hoofs and hide. So that, at best, man loses some of the best nutriment when he uses meat as food. In addition to this, in the venous blood of the animal are to be found poisonous and effete material, waste tissue, cadaveric alkaloids, and even parasites and disease-germs, wholly absent from vegetables and fruit. It is

© Copyright Soyinfo Center 2021

a rare thing for vegetarians to suffer from anaemia, though it must be supposed that even a diet so rich in all the elements the blood requires will of itself secure immunity from this and other diseases if other hygienic conditions are absent. A vegetarian diet is not a panacea, although those who adopt it suffer far less from all complaints than their meat-eating brothers and sisters. If a vegetarian lady, 'cumbered with much serving,' and beset with a multitude of household duties, keeps all day indoors and does not go out enough to exercise in direct sunlight and fresh air–and most women have too little of these–she will very likely become anaemic, like her meat-eating sister, but this is not because of her vegetarian diet, but in spite of it. Still, she will not suffer so badly, or become so 'run down,' as that meat-eating sister, and she will, moreover, make a much more rapid recovery from all her ailments.

"It is also quite possible for a vegetarian to eat too much nitrogenous food, and to suffer from consequent indigestion. Still, the diet is not responsible for a man's gluttony if he will eat to much, and will live to eat rather than live to eat. Temperance in eating is almost as essential as temperance in drinking. Here it may be added that a moderate and well-chose vegetarian diet is a certain cure for drunkenness, since the craving for intoxicants is mainly induced by the inflammatory state of the stomach caused by flesh-eating. Vegetable food is so nourishing and sustaining that a vegetarian can better afford to go without a meal than can a meat-eater. Indeed, the experience of the writer has been that for prolonged muscular and mental work there is nothing to compare with a judiciously-selected fruit and vegetable diet. The ancient Spartan and Roman athletes disdained meat. They lived on barley-cakes, olive oil, and black lentil soup. The canny and energetic Scotchman is virtually a vegetarian. The miners of Chili [Chile] are wont to ascend a perpendicular ladder with 2 cwt [1 cwt = hundredweight = 112 pounds] on their backs, and they do this all day long on a meal of beans and vegetables and fruit.

"The writer is of [the] opinion that after the age of three years milk should not be taken by human beings. It clogs his stomach, makes his brain sluggish and stupid, and in the stomach gives rise to lactic acid complications. Hence it should never be forced upon children over three years of age who have come of gouty or rheumatic parents. As a rule, such children have a natural detestation of it and a great aversion to it. Cow's milk is an abomination that ought never to be taken. It is an unnatural thing for a human being that has cut its teeth, and ought to eat solid food, to drink the milk of a brute! The human stomach resents it!"

The writer then discusses: Suitable foods for vegetarians. The benefits of eating two meals a day. The importance of understanding the "elements of nutrition" contained in each food to maintain one's proper weight and good health, the ability of a given area of land to support 6 times as many vegetarians as meat-eaters, the need to divide large Tasmanian land holdings into small plots of orchards and kitchen gardens, the sustaining and invigorating power of a non-flesh diet, the overall physical, mental, and moral effects of a vegetarian diet, and the need to abolish abattoirs or slaughter houses.

"It is not sufficiently understood that a vegetarian has far higher motives that the gratification of his palate and the satisfaction of his appetite. He regards all life as sacred, and the taking of innocent animal life as a monstrous crime, both against the animal and its right to live, and against the moral development of society at large. He regards his Creator as the Creator and Father of every living thing. When his last hour comes the vegetarian will be able calmly to meet his Heavenly Father–the Father also of every poor dumb animal–with the happy though humble consciousness that he has neither knowingly caused the infliction of pain or death, nor connived in their infliction by others upon an innocent animal. There is sound sense in the lines: -

"'He prayeth best who loveth best
All things both great and small;
For the dear God who loveth us,
He made and loveth all.'"

Source of poem: "Rime of the Ancient Mariner," by Samuel Taylor Coleridge (1798; Part VII, stanza 23). Coleridge lived 1772-1834

Note 2. This is the earliest document seen (July 2021) concerning soy beans in connection with (but not yet in) Tasmania.

Note 3. The author may have been a Seventh-day Adventist, since he states that soybeans have been grown in the Sanitarium gardens at Wahroonga, New South Wales. If he was an Adventist, this would be the earliest article seen on soybeans written by a Seventh-day Adventist. Address: Tasmania.

359. U.S. Department of the Interior, Census Office. 1910. Paul C. Bragg in the 1910 U.S. Census in Washington, DC, at Quincy Place. Washington, DC.

• ***Summary:*** Robert E. Bragg. Head of Household. Age 44. Born in Indiana. Mother born in Illinois. Father born in Indiana. Occupation: Composer [like typesetter], Government Printing Office.

Caroline Bragg. Wife. Age 45. Born in Ohio. Mother born in Ohio. Father born in Switzerland.

James E. Bragg. Son. Age 17. Born in Indiana. Mother born in Ohio. Father born in Indiana.

Paul C. Bragg. Son. Age 15. Born in Indiana. Mother born in Ohio. Father born in Indiana.

John H. Bragg. Son. Age 11. Born in Washington, DC. Mother born in Ohio. Father born in Indiana.

Note 1. The 1900 census reported that Paul C. Bragg was born in Feb. 1895 in Indiana. Mother born in Indiana. Father born in Indiana. In this 1910 census, the date of birth fits nicely.

© Copyright Soyinfo Center 2021

Note 2. In the 1900 Census, the mother, Caroline ("Carrie" in 1900) was reported to have been born in Indiana (rather than Ohio, as reported here), as had her mother and father. The middle initial of the father, Robert, was given as "L." But the "E." is probably correct.

360. Brook, Harry Ellington. 1910. Care of the body–Suggestions for preserving health. *Los Angeles Times.* Nov. 6. p. IM564-66.
• ***Summary:*** The section titled "A book for women" reviews positively book titled *Must Women Suffer Everlastingly,* by J. Hegyessy (M.D., D.O., N.D.; published by the author of San Francisco). "His ideas on the subject of diet are most sound. Two-thirds of the book is devoted to this subject." Included is a summary of a letter Dr. Hegyessy wrote to Otto Carque advocating "male continence" as practiced by the Oneida Community. Both Brook and Carque regard this practice as unnatural. Address: N.D. [Naturopathic Doctor], Staff writer.

• ***Summary:*** "If you would like to progress in physical health and in spiritual wealth, call or write to: Berhalter's Health Food Store." "Following are a few of our specialties:
"Unfermented whole wheat bread, per loaf–15¢.
"Whole Wheat Fruit Bread, per loaf–20¢
"Combination Whole Rye Bread, per loaf–15¢
"Plain Unfired Whole Wheat Bread, per box–25¢
"Plain Unfired Whole Wheat Fruit Bread–30¢
"Gluten Flour 41 per cent Gluten, per lb 15¢
Unpolished Rice... Pure Italian Olive Oil, Pure peanut oil, Pure vegetable cooking oil.
"We carry in stock such a fine variety of foods that it enables vegetarians to select supplies to carry on a vegetarian life successfully. We can also supply all the knowledge necessary to begin a vegetarian diet successfully.
"No orders less than $1.00, by mail, accepted. Call or write for price list."
Note: This is the earliest document seen (July 2021) that mentions "Berhalter" in connection with health foods. Address: Opposite New Comedy Theater, 309 North Ave., Chicago.

362. Carqué, Otto. 1910. Vegetarianism in the light of modern science. *Naturopath and Herald of Health* (*The*) (*New York City*) 15(11):664-70. Nov.
• ***Summary:*** Written for *The Vegetarian Magazine:* "Perhaps no word has met with so many false interpretations as 'Vegetarianism.' This is mainly due to the similarity of the words 'Vegetarian' and 'Vegetables.' To the average, superficial thinker, 'a vegetarian' means a 'vegetable eater' pure and simple; a man who lives on cabbage, if not grass exclusively. The slow progress of vegetarianism in the western world must be ascribed, to a great extent, to the misunderstanding of this word." Address: Author.

363. *Los Angeles Times.* 1910. Society meetings. Dec. 18. p. IV1.
• ***Summary:*** "Get Acquainted Society, 717½ East 9th street, has invited a professional phrenologist, an acute astrologer, a practical psychologist, and a cheerful clairvoyant to give talks and test readings before the society Sunday morning, 11 a.m... Health and Food addresses by... Mr. Otto Carque, food scientist, Sunday eve., 7:45 p.m. Admission free. Socials Tuesday, Friday evenings. Reputable strangers always welcome."

364. Christian, Eugene; Christian, Mollie Griswold. 1910. 250 meatless menus and recipes: To meet the requirements of people under varying conditions of age, climate and work. New York, NY: Eugene and Mollie Griswold Christian. 184 + 28 p. Portrait of Mollie. 20 cm.
• ***Summary:*** "Peanut Butter: Owing to the fact that peanuts are one of our most important food products, and that there are so many brands of peanut butter on the general market, and that grade from very inferior to an extremely superior quality, both in taste and nutritive properties, it becomes necessary for the guidance of my readers to name some particular brand or kind of peanut butter, which investigation and chemical analysis have proven to be pure and wholesome, hence worthy of a place in a literary work intended to guide the housewife in selecting only the best. In view of these facts, I have used in the following recipes a brand of peanut butter known as 'Beech-Nut" (p. 102).
In the back of this book is a section of advertisements. Page 14 (unnumbered) contains ads for: (1) The Muncie

Sanatorium at 117-119 Macon St. (corner of Marcy Ave.), in Brooklyn Borough, New York City. "All of the Christian health foods will be served at Dr. [Elizabeth Hamilton] Muncie's sanatorium." (2) "Brusson Diabetic Foods for diabetes, rheumatism, obesity, starch indigestion, etc." They sell "Gluten Bread (the most palatable bread in the world), Gluten macaroni, Vermicelli, Noodles, Small pastes, etc. Gustav Muller, 11 West 27th Street, New York City."

Eugene Christian lived 1860-1930. Note: This is the earliest document seen (Dec. 1998) that contains the word "Sanatorium" (spelled in that way). Address: 43 Seventh Ave., Brooklyn, New York.

365. Wheldon, Rupert H. 1910. No animal food: And nutrition and diet with vegetable recipes. New York, NY; Passaic, New Jersey: Health Culture Co. 125 p. Plus 18 unnumbered pages of advertisements at end. Undated. No index. 19 cm.

• ***Summary:*** A comprehensive appeal to vegetarianism, advocating exclusion of all foods of animal origin [i.e., a vegan diet]. Contents: I. No animal food: 1. The urgency of the subject. 2. Physical considerations. 3. Ethical considerations. 4. The aesthetic point of view. 5. Economical considerations. 6. The exclusion of dairy produce. 7. Conclusion. II. Nutrition and diet: 1. Science of nutrition. 2. What to eat. 3. When to eat. 4. What to eat. Food table. Recipes (100 "strictly vegetarian" [vegan] recipes as they appear in the English edition).

The Preface states that "the following pages are in vindication of a dietary consisting wholly of the products of the vegetable kingdom, and which therefore excludes not only flesh, fish, and fowl, but milk and eggs and products manufactured therefrom." "This work is reprinted from the English edition with changes better adapting it to the American reader."

Pages 30-31: "As to the testimony of individuals it is interesting to note that some of the greatest philosophers, scientists, poets, moralists, and many men of note, in different walks of life, in past and modern times have, for various reasons, been vegetarians, among whom have been named the following:–Manu, Zoroaster, Pythagoras, Zeno, Buddha, Isaiah, Daniel, Empedocles, Socrates, Plato, Aristotle, Porphyry, John Wesley, Franklin, Goldsmith, Ray, Paley, Isaac Newton, Jean Paul Richter, Schopenhauer, Byron, Gleizes, Hartley, Rousseau, Iamblichus, Hypatia, Diogenes, Quintus Sextus, Ovid, Plutarch, Seneca, Apollonius, The Apostles (Matthew, James, James the Less, Peter), The Christian Fathers (Clement, Tertullian, Origen, Chrysostom, St. Francis d'Assisi), Cornaro, Leonardo da Vinci, Milton, Locke, Spinoza, Voltaire, Pope, Gassendi, Swedenborg, Thackeray, Linnaeus, Shelley, Lamartine, Michelet, William Lambe, Sir Isaac Pitman, Thoreau, Fitzgerald, Herbert Burrows, Garibaldi, Wagner, Edison, Tesla, Marconi, Tolstoy, George Frederick Watts, Maeterlinck, Vivekananda, General [Bramwell] Booth, Mrs. [Annie] Besant, Bernard Shaw, Rev. Prof. John E. B. Mayor, Hon. E. Lyttelton, Rev. R. J. Campbell, Lord Charles Beresford, Gen. Sir Ed. Bulwer, etc., etc., etc."

The chapter title "What to eat" states (p. 83): "The Mongol procures his supply of protein chiefly from the Soya bean from which he makes different preparations of bean cheese [tofu] and sauce." "Among the foods rich in protein are the legumes, the cereals, and nuts... Fat is chiefly found in nuts, olives, and certain pulses, particularly the pea-nut."

Several recipes (p. 116-17) call for: Nut-milk, Vegeton, Nutter or nut butter, Marmite, Carnos, Pitman's Vigar Gravy Essence. These can be ordered from stores in England (see p. 111). The last 16 pages contain advertisements for *Health-Culture* magazine (monthly), "health appliances" (such as Dr. Forest's massage rollers and colon syringes), and many books published by The Health Culture Co., Turner Building, 45 Escension St., Passaic, New Jersey.

366. Labbé, Henri. 1911. Le soja et ses usages [The soybean and its uses]. *Revue Scientifique* 49(1):171-76. Jan. 7. [6 ref. Fre]

• ***Summary:*** A summary of earlier publications (mostly in French) on soybeans and soyfoods. Discusses: Soy flour (*farine de soja*) for diabetics. Soy bread (*pain de soja*). Soy flour used to make various foods for diabetics as well as for vegetarians. Soymilk (*lait végétal à base de soja*, p. 174). Soy kefir and soy yogurt (Kephir, Yohourt). Soy sauce (*sauce de Soja, soyou, choyou*). Tofu (*Le fromage de Soja ou Tou-Fou*), which was invented by the ancient Chinese philosopher Whai Nain Tzu. Fresh tofu and dry tofu [dried frozen tofu, containing 53.6% protein]. How shoyu is made.

Note: This is the earliest French-language document seen (April 2012) that uses the word *soyou* to refer to soy sauce.

The section on the nutritional value of soy and soy protein (p. 173) ends with this interesting thought: For a long time the Chinese and Japanese, who cared little about the future justification of their habits and customs, have adopted the consumption of soy on a large scale, without realizing that science would perhaps one day come to bestow / confer on them a certificate or testimonial of complete approbation.

The section on soymilk ends as follows: Soya milk, according to trustworthy Chinese persons, is not just a mere curiosity. It is used, in China, for breakfast, being mixed with cow's milk. It is also used for infant formula [literally "artificial breast feeding"] or therapeutically. For this latter purpose, it is the fermented foods, such as Kefir, Yogurt, etc. that appear to be of interest. ("*Le lait de Soja, au dire de Chinois dignes de foi ne serait pas une simple curiosité. On s'en sert, en Chine, pour le dèjeuner du matin, et en mélange avec le lait de vache. On l'utilise aussi pour l'allaitement artificiel, ou dans un but thérapeutique. Dans ce denier but, ce sont plutôt les laits de soja fermentés, genre Kephir,*

© Copyright Soyinfo Center 2021

Yohourt, etc. qui paraissent intéressants").

The author notes (p. 175, footnote) that a Chinese proverb says: *Le To-Fou est la viande des os* ("Tofu is the meat of the bones"). Note: This makes no sense and appears (Jan. 2019) to be a mistake. Tofu has long been known as "the meat without bones" (Horvath 1927, 1931, 1938, etc.) or "the meat without a bone" (Carque 1933, etc.).

The writer also notes that France is not taking any part in the development of an industry to produce soy oil (p. 176, footnote). Illustrations (p. 72) show: Soy bean plant, with roots and pods. Close-up of soy bean pod and seed. Address: Doctor of Sciences (*Docteur ès-sciences*), France.

367. Lust's Health Food Bakery. 1911. Lust's delicious uncooked fruit cake (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 16(1):Unnumbered page. Jan.
• ***Summary:*** "As nutritious as it is tempting." A large illustration shows a sheaf of wheat. Address: 100 East 105th St., New York City.

368. Kellogg, John Harvey. 1911. Food product. *U.S. Patent* 1,001,150. Aug. 22. 2 p. Application filed 19 Oct. 1908.
• ***Summary:*** "The main object of this invention is to provide an improved food product which is very palatable and nourishing and one which is well adapted for use as a meat substitute."

It is made from 3 parts each wet casein and wet wheat gluten, 3 parts vegetable oil (such as corn or nut oil, optional), plus yeast products from waste brewery yeast (either concentrated yeast extract or crude yeast product). After the ingredients are mixed and cooked in cans, the product has a meaty consistency and flavor, making it a "very satisfactory substitute for flesh foods. It is very nourishing and may be used in a great variety of ways." Address: M.D., Battle Creek, Calhoun County, Michigan.

369. Osius, Frederick J. 1911. Agitator implement. *U.S. Patent* 1,005,653. Oct. 10. 4 p. Application filed 20 Sept. 1910. 3 drawings.
• ***Summary:*** See next page. Note: It was this small electric motor that made the electric blender possible. Note the terms "liquid" and "liquid beverages."

"The primary object of my invention is to provide a portable electric motor-driven mixing implement for liquid beverages, compounds or the like, the construction and arrangement of the implement being such that the stem of an agitator disk is directly and rigidly coupled to a protruding end of the motor-shaft whereby economy in power, speed and effectiveness of the mixing operation is had.

"Another object of my invention is to provide a spring-controlled balanced motor supporting standard in telescopic connection with the base-supported post, whereby adjustment of the agitator disk is effected to remove or insert the disk within a vessel containing liquid.

"Another object is to provide an automatic electric circuit make and break mechanism for the motor incidental to movement of its supporting standard.

"Further objects of my invention are to provide an adjustable vessel-holding clip in connection with the post, and an agitator disk that is circular and free from obstructions upon its faces and edge, this construction of disk being essential to perfect agitation at high speed in order that the liquid, when agitated, is not deflected or sprayed from its containing vessel by centrifugal force.

"With the above objects in view the invention consists in various structural details and combination of parts as set forth hereinafter with reference to the accompanying drawings and subsequently claimed."

Witnesses: Chester H. Beach, John W. Ruggaber. Address: Racine, Wisconsin.

370. Carqué, Otto. 1911. Care and feeding of infants. *Naturopath and Herald of Health* (*The*) (*New York City*) 16(11):788-90. Nov.
• ***Summary:*** "Mother's milk is the best of all foods for infants." Address: Author.

371. Berhalter (T.A.). 1911. Berhalter's health foods: Vegetarian products (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 16(12):Unnumbered page. Dec.
• ***Summary:*** A half-page horizontal ad. "If you want health foods of all kinds, send us your order. We ship our goods anywhere. Our foods are strictly in accord with vegetarian dietetics...

"Our twelve years of experience [i.e., since about 1907] in accordance with vegetarianism has made us authorities of the Health Food Problem.

"These are some of our specialties:

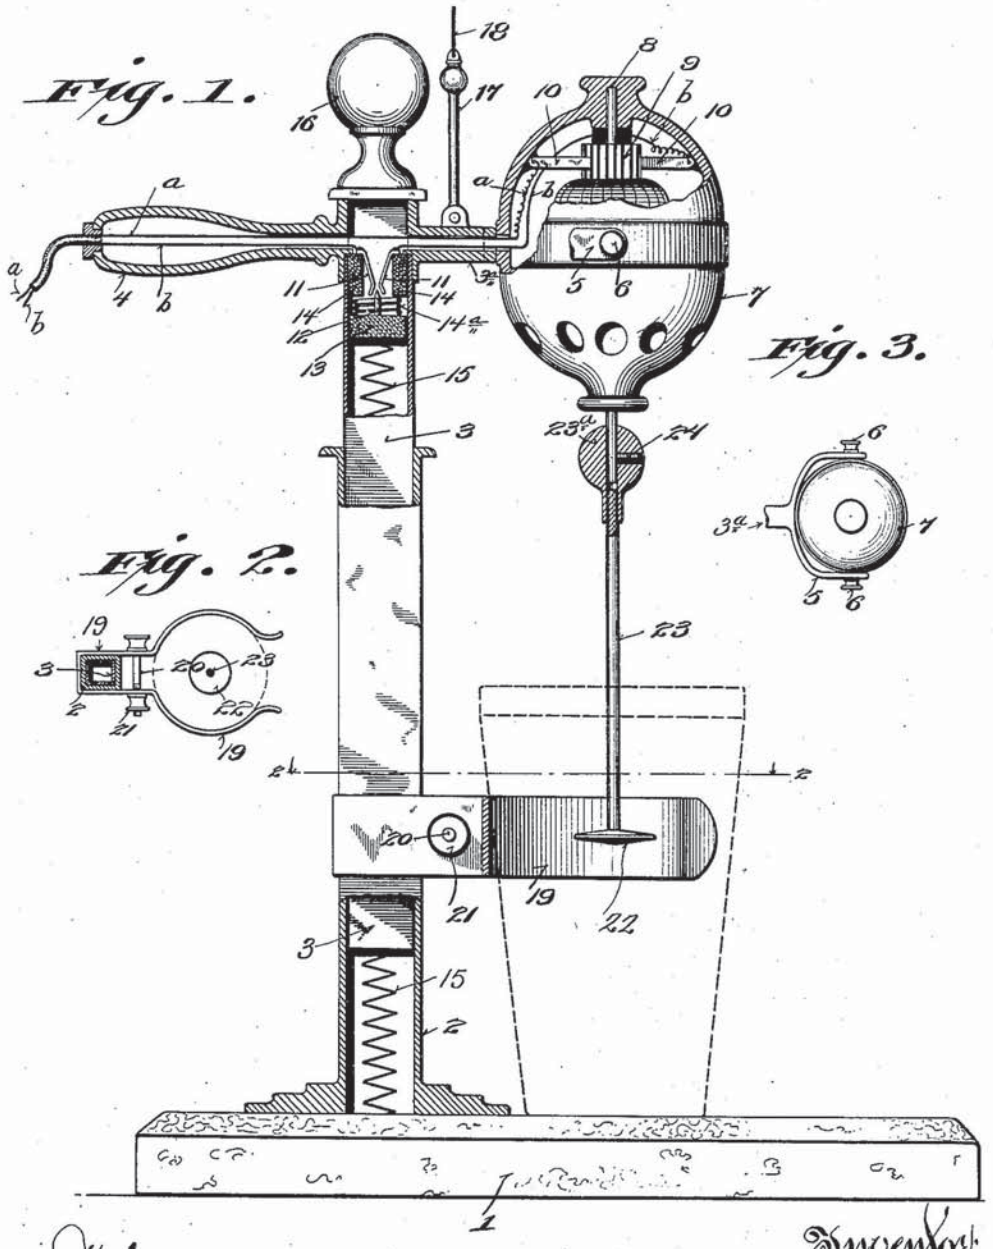
"Uncooked, laxative whole wheat fruit bread, per 2 lb. package–$0.35.

"Uncooked, laxative whole wheat bread, plain, per 2 lb. package–$0.25.

"Unfermented whole wheat bread, also act laxative, 2½ lb. loaves–$0.15.

"Bran Gluten Bread, 1½ loaf–$0.10.

"Whole wheat flour, ground in our own mill, either coarse or fine, per lb–$0.05.



"Unpolished rice, per lb–$0.10.

"Our own brand raw peanut butter, per 1-lb. jar–$0.30.

"Same in gallon pails–$2.50.

"Peanut oil, gallon–$2.00.

"Pure vegetable cooking oil, per gallon–$1.10.

Pure Italian olive oil, sun-dried ripe olives, sun-dried black figs, Smyrna pulled figs, pure grape juice (per quart).

"Write us for complete list of our foods, books, etc. No orders less than $1.00 accepted."

A creative illustration at the top shows bread and other baked wheat products streaming out of the top of a sheaf of wheat over a rising sun.

Note: This is the 2nd earliest document seen (July 2021) that mentions "Berhalter" in connection with health foods. In 1936 Anthony A. Berhalter founded the American Health Food Association in Chicago. It is not clear whether or not T.A. Berhalter (above) and Anthony A. Berhalter are one and the same person. They live in the same city and are active in the same new industry. However the ad in the Sept. 1912 edition of this magazine proves that T.A. Berhalter and Anthony A. Berhalter are one and the same person because his wife and co-worker was Kathleen, and later documents state that they began work in this industry in 1907. Address: 309 North Ave., Chicago, Illinois. Phone: Lincoln 2524.

372. Nashville Sanitarium–Food Factory. 1911. High grade health foods (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 16(12):Unnumbered page. Dec.

• ***Summary:*** "Made by expert bakers, from best selected materials, in a well-ventilated hygienic factory away out in the country, surrounded by farms and pure fresh air. Made by men who do things from principle.

"Contain no animal fat. Full line of nut foods, cereal foods... More than twenty-five kinds. Nutfoda is the great vegetable meat, pure, wholesome, delicious, a perfect meat substitute at 10, 15 and 25¢. for ½ lb., 1 lb and 2¼ lb. cans.

"Nutkysa–similar to cheese, 1 lb. can–$0.15.

"Nashville Malted Nuts, 1 lb. jar–$0.35...

"Baked Beans, Tomato or Plain, 1½ lb. can–$0.10.

Note: It is possible, but unlikely, that these baked beans are soybeans.

"Cereal Coffee, Superb, 1 lb. pkg.–$0.10...

"Dixie Kernel (a Malted Breakfast Food) 1¼ lb. pkg.–$0.15.

"20 per cent Gluten Meal, Well Cooked, 1 lb. pkg.–$0.12."

"On sale at Naturopathic Supplies Store, 465 Lexington Ave., New York, N.Y."

Note: This organization is almost certainly the same as that later known as Madison College; Madison was near Nashville, Tennessee. This is the earliest document seen (April 2017) that contains the term "food factory" or that indicates that the Madison food factory is selling its products as far away as New York City. Address: Nashville, Tennessee.

373. *Naturopath and Herald of Health* (*The*) (*New York City*). 1911. Medical persecution of the fasting cure. 16(12):776-78. Nov.

• ***Summary:*** About Dr. Linda Burfield Hazzard of Seattle, Washington. She "is widely known as a prominent advocate and practitioner of fasting for the cure of disease and has met with a large measure of success in her chosen field. She has engaged in this work for the past fifteen years, and embarked upon it under the guidance of the late Dr. Edward Hooker Dewey."

Note: Dewey wrote three major books: (1) The No-breakfast Plan and the Fasting Cure (1900). (2) The True Science of Living (1894). (3) A New Era for Women: Health without Drugs (1896).

374. *Los Angeles Times.* 1912. News in brief. Jan. 10. p. I16.

• ***Summary:*** The section titled "On children's food" states: "Otto Carque, a visiting German dietetic expert, will address the members of the Custer-avenue Social Center at the Custer-avenue School at 3 o'clock this afternoon on 'The Best Foods for Children.' His address will be preceded by an interesting musical programme. The public is invited to attend."

375. Carque, Otto. 1912. Wanted–Boy with wheel to assist in manufacturing of health foods (Ad). *Los Angeles Times.* Jan. 18. p. I7.

• ***Summary:*** "Vegetarian preferred. Home Phone 52269. Call early."

Note 1. This tiny ad (Carque's first) shows that he is about to start a business, and needs a helper–since he is single. This is the earliest document seen (July 2021) that gives an address for Carque. Address: 943 West 12th st. [Los Angeles, California]. Phone: 52269.

376. *Los Angeles Times.* 1912. Socialistic colony is to be formed at Puente. March 6. p. I14.

• ***Summary:*** On 5 March 1912 the Fellowship Farm Association purchased 72 acres of land one mile north of Puente, California. "A socialistic colony is to be established immediately thereon. The leader of the movement is George Elmer Littlefield of Boston, [Massachusetts], who has been elected treasurer of the corporation," which is composed of 80 families, each having contributed $100 as a first payment. Otto Carque [of Los Angeles] is one of the directors of the association.

Note: La Puente and Puente Hills are about 20 miles east of central Los Angeles.

377. [Lust, Benedict]. 1912. The editor's lecture tour. *Naturopath and Herald of Health* (*The*) (*New York City*) 17(4):319-22. April.

• ***Summary:*** "The editor's lecture tour of which we brought

© Copyright Soyinfo Center 2021

a report in the April number as far as Chicago was a great success. All the lectures were well attended and great enthusiasm shown, and Mr. Lust is well pleased with the reception, encouragement and appreciation of his work that was expressed to him.

"The lectures in La Crosse, Wisconsin on March 16th, 17th, and 18th proved also a great success. Dr. Riese of the La Crosse Naturopathic Society arranged for the first lecture at his institution which was attended by the members of the La Crosse Naturheilverein and the patients and students of this institution. The three principle lectures were in German. There were two lectures given on Sunday, the 17th, one in the afternoon and one in the evening. These two German lectures were also a great success. The editor was introduced by Mr. Candrian, the editor of the *Volks Post* and a number of other German papers, who is really the pioneer of La Crosse and the northwest along the lines of the nature cure movement. Mr. Candrian has practically plowed the field for the nature cure movement and Mr. Lust expressed in his lectures that he is very much indebted to him for his cooperation and that the city of La Crosse can be proud to have a man like him who has the welfare of the public at heart. His readers are also to be congratulated that he publishes a number of newspapers that are clean, free from medicine, and fake advertisements and his editorials are all along reform lines of nature cure and natural living and righteousness in every respect. The English lecture on Monday night, the 17th, at the Germania Hall was also well attended. The editor of the *Volks Post,* Mr. Candrian, was again chairman at this important meeting.

"La Crosse made a very good impression on the editor and he wants to mention Dr. Riese and Mrs. Riese as two pioneers in establishing a naturopathic institution, also Rev. Harbeck who conducts a school for mothers on natural living has also taken a step in the right direction. Mr. Harbeck at one time published in Germany a magazine on the nature cure and is well qualified to give instructions along these lines. To Dr. Riese and Mrs. Riese and other friends who have worked so hard to make these lectures in La Crosse a success; we herewith like to express our sincere thanks especially to Dr. Riese also for his hospitality and good care while staying at his institution, and Mr. Lust will surely come again at some future time to help the good work along.

"La Crosse, Wisconsin, lecture subjects were as follows: Saturday, March 16: 'Die Deutsche Naturheilkunde' Sunday afternoon: 'Zweck und Wesen der Naturheilkunde.' Sunday evening: 'Kindererziehung und Krankheitsverhütung.' Monday evening "The Science of Natural Life and Natural Cure. Health and Vigor. How to Get It."

"The next lecture was at St, Paul, Minnesota, arranged by Dr. Beckstrom of the American National Bank Bldg., at Bowlby Hall. The subject of the lecture was the 'Nature Cure Movement and What It Stands For.'"

The next lecture was at Minneapolis, Minnesota, and was arranged for by Mr. Heisser of 204 Sykes Block, the well known pioneer in that city. The lecture took place at the first Unitarian Church. The subject was 'Physical and Mental Regeneration by Naturopathic Methods.'"

"After the lecture the editor went back to Chicago where he attended to different business matters and on March 24th visited with Dr. Strueh, the famous western Yungborn at McHenry, Illinois.

"While in Chicago, the editor made his headquarters with Dr. Lindlahr, who is conducting the well known nature cure institution and Naturopathic College. Dr. Lindlahr is a man who has the necessary enthusiasm and vigor and works without getting tired."

"A special mentioning has to be made of Mr. and Mrs. Berhalter of 309 North Avenue, Chicago, Illinois, who are also pioneers in the natural living and pure food line. Their pure food store and whole wheat products bakery and manufacture of other food products are known all over Chicago and the goods are shipped to all parts of the country. I have tasted the different products they manufacture and also tasted some of the meals prepared by Mrs. Berhalter that were most excellent. I must admire the strong convictions and courage Mr. and Mrs. Berhalter manifested in introducing their work and also for the self-sacrifice and unselfish co-operation for arranging and managing the affairs for my lectures in Chicago. The readers of our magazine certainly will be pleased to know that at Berhalters they find everything in the nature cure line especially pure foods. Catalogues will be mailed to all inquiries free of charge.

"I want to express my thanks once more for the Berhalters' services as well as to the members of the Arrangement Committee that were mentioned in the March number.

"There were two receptions at Berhalters' where the editor met many friends and pioneers of the nature cure movement and he enjoyed their company very much. The editor also wants to mention Dr. George Drew, the uncooked food specialist who wrote the wonderful nature cure food book. After the lecture at the Bernard Macfadden Training School, the editor enjoyed a special dinner prepared by Dr. and Mrs. Drew to demonstrate the possibilities for preparing palatable, nutritious and naturally correct meals. More about this dinner and the discussions that took place between the editor and Dr. Drew will be published in the June and July issues which will certainly prove interesting reading about the ideas of the latest advancements in man's diet.

"The editor also visited Mr. and Mrs. Benold's Pure Food Store 413 E. North Ave., Chicago, Ill., which is the oldest establishment of its kind in Chicago. This store was started by Mr. Benold in 1898 and has been ever since the headquarters for the whole wheat bread. pure foods and other Naturopathic supplies. Benold's bread is known in Chicago and has a good name in many other cities and institutions all over the country. The editor also gave a lecture at the

© Copyright Soyinfo Center 2021

Bernarr Macfadden's Training School and was well pleased with what he saw there. If Mr. Macfadden had done nothing else in his life than bringing about the establishment of that institution he already deserves to go down in history as a benefactor of mankind. The students are a very enthusiastic and promising set of young men and women who enjoy the studies, exercises and the general natural life that is carried on at this place. The moral tone of the institution is a very high one and I was pleased to address these young men and women who will be all future benefactors of mankind, who will go out to teach and practise natural methods of cure. They will be the leaven that will rise the public to a higher and better life. I would call them the selected few picked out by Providence from the large masses of people to become pioneers for physical culture and natural living. I think it is a blessing and a great experience in anyone's life to spend a few months in such an institution."

"From Chicago the editor went to Hamilton, Ohio, to make several visits and then he went to Columbus. Ohio. The Cincinnati, New Lexington, Ohio, and Philadelphia lectures that were intended had to be dropped as the arrangements were not completed and the time was too limited."

"The next lecture was given on March 27th in the auditorium of the Men's Business College in Columbus, Ohio. This lecture was arranged by Dr. Sarver..."

"The next lecture was on Thursday, March 28th, at Joseph F. Barth's Institute for Physical Culture and Nature Cure at 318 Fifth Avenue, Pittsburg, Pennsylvania. This was the last lecture the editor delivered on his trip and was very well attended. The subject 'Drugless Methods of Healing.'"

378. *Evening Post* (*Wellington, New Zealand*). 1912. Sanitarium health food cafe. May 10. p. 8.
• ***Summary:*** "About six or seven years ago a cafe was opened in Willis-street by the Sanitarium Health Food Company. Later it was shifted to Manners-street, and owing to a fire the cafe is again located in Willis-street, in Shortt's Building. The change made is certainly a very advantageous one–a new building with a bright, cheery outlook, instead of one of the oldest places in Wellington. There are twelve tables in the room with ample seating accommodation for fifty people.

"The cafe is owned by the Sanitarium Health Food Company, whose headquarters are in Sydney [Australia], with a manufactory at Cooranbong, 80 miles from the city, and another manufactory in Christchurch [New Zealand]. The latter is likely to be shifted to Wellington, and placed under the manager of the cafe here. As considerable misunderstanding exists as to what constitutes a cereal-vegetable [vegetarian] diet, it may be stated that there are half-a-dozen classes of biscuits, a dozen kinds of green goods, six varieties of beans and two of lentils, and, generally, all vegetables and fruits in season.

"Olive-oil is imported from Italy, best selected raisins from California, unfermented wine from California and New South Wales, and clover honey is obtained from local apiaries. Amongst the many special foods for invalids are gluten flour and biscuits, and Soya beans for diabetic patients: it is stated that this bean is rich in gluten. Whilst the principal aim of the Sanitarium Health Food Cafe is to cater for those in health, it is claimed that indigestion and many forms of stomach trouble can be eradicated by the adoption of the food served up at the cafe, or by buying the ingredients and cooking them at home. The object is to endeavour to educate the public to live on what is regarded as a higher quality of food for mental or physical work."

Note: This is the earliest English-language document seen (July 2021) that contains the term "Health Food Cafe" (or "Health Food Café"), regardless of capitalization.

379. *Los Angeles Times.* 1912. News in brief. June 11. p. I16.
• ***Summary:*** The section titled "Lecture on nutrition" states: "Otto Carque and Dr. George W. Carey will lecture on "Nutrition and Blood Formation" before the members and friends of the Human Culture Society at 8 o'clock this evening in Blanchard Music Hall, No. 232 South Hill St. The public is invited."

380. Huchting, Sophia. 1912. Social. *Polytechnic Journal* (*Cal Poly, San Luis Obispo*) p. 63+.
• ***Summary:*** "On March 16, 1912, Miss Hartzell entertained with a delightful musicale in the reception room... The Polytechnic Alumni are to follow their usual custom and have a reunion June 12."

"Miss Sophia Huchting was the recipient of another box filled with many goodies, which was sent to her by her sister, Mrs. J.E. Jones of Visalia, a former Polytechnic student. A grand spread followed and those who enjoyed it were..."

On a subsequent unnumbered page of brief character sketches we read: "Sophia Huchting–A girl of great ability as a student and an athlete. She played three years on the girls' basketball team, and was a representative in the girls' tennis contest. In her junior year she was president of the class and secretary of the Student Body. In her senior year she was the treasurer of the Student Body and a member of the Journal Staff."

381. Knight, Florence; Grizzle, Olga. 1912. Class alphabet. *Polytechnic Journal* (*Cal Poly, San Luis Obispo*) p. 12-14.
• ***Summary:*** "Capable Sophia has charge of the funds. / But at the sight of a frog–O dear how she runs! / And is it for specimens for Botany / She seeks at night by the green Holly tree?"

Note 1. This is the graduating class yearbook. They graduated on 13 June 1912. Sophia Huchting was the Social editor on the Journal staff (p. 59).

Note 2. This is the earliest document seen (July 2021) concerning Sophia Huchting (later Sophie Huchting

Cubbison).

382. *Polytechnic Journal* (*Cal Poly, San Luis Obispo*). 1912. Class will. p. 15-16.
• ***Summary:*** "I, Sophia Huchting, will my success in affairs of the heart and mind to Lillabell Wade, to Kathleen Shipsey I leave my diamond ring, all my carefully boxed letters, my popularity with the dormitory boys, and sincerely hope she won't think she ought to have more. I will my knack in erasing freshman numerals from the curtains to Fern Hall and my room in the dormitory to Blondy."

"In witness whereof, we have hereunto subscribed our name, this thirteenth day of June, nineteen hundred and twelve."

383. *Polytechnic Journal* (*Cal Poly, San Luis Obispo*). 1912. Class prophecy. p. 17-19.
• ***Summary:*** "That evening we strolled down town. Everything was almost the same as it had been five years before. We noticed but one change and that was in the name that was on one of the buildings. The magnificent building that had formerly been Holly's Cafe was now surmounted by the sign, Huchting & Grizzle Cafe–Cooking done in a Scientific Way–Balanced Rations Served to Everyone."

Note 1. This prophecy–set five years after graduation–is fiction, not a true story. However, it shows that Sophie Huchting (later Cubbison) was very interested in cooking and had entrepreneurial talents. Note 2. On one unnumbered page in this yearbook are oval photos of Huchting and Grizzle. On another unnumbered page is a larger oval photo of S.C. Huchting.

384. *Polytechnic Journal* (*Cal Poly, San Luis Obispo*). 1912. Criminal record of the Sr. [senior] class. p. 20-21.
• ***Summary:*** "X. Name–Sophia Huchting. Alias–Aye, Aye. Cell–Holly Berry Bush No. 1. Crime–(1) Disturbing the Botany class by frightening all reptiles on premises; (2) Suspected of murdering a frog, also a little rabbit.

"Sentence–(1) Pending. (2) Three years' imprisonment. Identity–Tall blond. Age–20 years."

385. *Los Angeles Times.* 1912. Society meetings. Aug. 11. p. IV1.
• ***Summary:*** "Otto Carque will address the Human Culture Society on 'The Cause and Cure of Infantile Paralysis,' in Symphony Hall, 232 South Hill St., Monday evening at 8 o'clock... You are welcome."

386. *Los Angeles Times.* 1912. Incorporations. Aug. 15. p. I12.
• ***Summary:*** Gives details on various companies including: "Carque Pure Food Company, incorporators, Otto Carque, Edward Zeller, Harold D. Smith, Madeline Ronstand, Albert Maas; capital stock, $25,000; subscribed, $50."

Note: A ProQuest search on the *Los Angeles Times* 10 years before and after this Incorporation, in an attempt to learn more about the other men involved in this incorporation, turned up only two leads. In the *Care of the Body* column for 10 April 1910, the section titled "A woman's long walk," states: "E. Zeller, who until recently was a baker of hygienic bread and other foods in Los Angeles, removed recently to Inyo county, where he is now ranching, the bakery business being carried on by his son." Edward Zeller was the son of Emil E. Zeller, whose death was announced in the *Los Angeles Times* on 21 July 1943. Edward had two surviving sisters: Adele Zeller and Mrs. Helen Russell (Helen Zeller).

Note: This is the earliest document seen (July 2021) that mentions the "Carque Pure Food Company."

387. *Brain and Brawn: A Sound Mind in a Sound Body.* 1912-1917. Serial/Periodical. Los Angeles, California: Edited by Harry Ellington Brook, N.D. *
• ***Summary:*** Devoted to the nature cure. The education of the people. And medical freedom." An illustration shows the cover of the magazine.

Note: From April 1908 to until his death in 1924, Harry Ellington Brook, a naturopathic doctor, edited the pioneering "Care of the Body" column in the *Los Angeles Times.* Address: The Naturopathic Publishing Co., 508 Chamber of Commerce Bldg., Los Angeles, California.

388. Berhalter (T.A.). 1912. Berhalter's health foods: Vegetarian products (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 17(9):Unnumbered page. Sept.
• ***Summary:*** This half-page horizontal ad is similar in content to the one that appeared in the Dec. 1911 issue of this magazine, except that this one has portrait photos of Kath. Berhalter and T.A. Berhalter on each side at the top of the ad. Address: 309 North Ave., Chicago, Illinois. Phone: Lincoln 2524.

389. Smith (Walter E.) Co. 1912. Smith's: A California grocery store (Ad). *Los Angeles Times.* Nov. 13. p. I16.

© Copyright Soyinfo Center 2021

• ***Summary:*** A large ad for six food products including: "Carque. Mission Figs. Unsulphured. Now being demonstrated in our store. Taste them–small packages, each 10¢. 2½ pound packages, each 25¢."

Note 1. This is the earliest document seen (July 2021) showing Carque's food products being sold in regular stores, or concerning his sale of figs or Mission Figs. He soon popularized the black mission fig, especially in dried, unsulphured form. Black Mission fig trees, planted by early Catholic missionaries in various parts of California, had reached a height of 60 feet and a circumference of 15 feet by 1890, when they were first mentioned in the *Los Angeles Times.*

Note 2. This is the earliest document seen (July 2021) that shows Carque selling unsulphured fruit. However, he was not the first to do this. As early as May 1892, fruit-growers in the Los Angeles area were debating the practice of "sulphuring fruit." The many arguments opposing the new practice said that "the pure and natural qualities have been injured and the rich flavor of the fruit has been destroyed,..." and that those seeking more money for the fancier appearance were sacrificing California's reputation "as the producer and healthful fruits." By Jan. 1899 "Unsulphured apricots" were being advertised in the *Los Angeles Times.*

Note 3. Smith's had run an advertisement for Black Mission figs (dried) in the *Los Angeles Times* (8 March 1912, p. I14) eight months earlier; they did not mention Carque, although they probably bought the figs from him.

390. Carqué, Otto. 1912. California "likefresh" fruit: Their nutritive and hygienic value. *Naturopath and Herald of Health* (*The*) (*New York City*) 17(11):730-35. Nov.
• ***Summary:*** "No other State in the Union has gained so much fame and prominence all the world as California." First came the gold. But it "is California's excellent fruit crop, the result of soil, sunshine, and an abundant water supply from the eternal snows of the high Sierras which will ensure forever her unique position among her sister States." Address: Food expert.

391. Osius, Frederick J. 1912. Agitator implement. *U.S. Patent* 1,047,279. Dec. 17. 5 p. Application filed 16 April 1911. 4 drawings.
• ***Summary:*** This patent makes improvements on the inventor's U.S. Patent 1,005,653 issued 14 months earlier. "My invention refers to portable electric driven mixing implements or liquid beverages or the like, its object being to provide structural features whereby the apparatus is rendered durable, simple, positive in its operation and efficient, and at the same time can be economically manufactured, the main objects being: to provide efficient means for insulating the motor casing from its supporting bracket; to provide a peripherally notched, agitator disk whereby efficiency in mixing is insured; to provide the hollow supporting post with drain openings intersecting its base, whereby accumulated moisture within the post is exhausted and thus rust of the parts and the consequence is avoided; to provide metallic protecting jackets for the motor-brush insulating sleeves, the jackets being seated upon the external wall of the motor-housing through which said sleeves project, whereby breakage or damage thereto incidental to an inadvertent blow is remedied; to provide the spring-controlled telescopic motor-supporting standard with a locking dog whereby said standard and its attached agitating mechanism can be locked down to its working position;..." Address: Racine, Wisconsin.

392. **Product Name:** 20% Gluten Meal, 40% Gluten, 80% Gluten, Avena-Gluten Biscuit Mixture (made from oatmeal and wheat gluten), 40% Gluten Biscuit, 80% Gluten Biscuit, Breakfast Toast.
Manufacturer's Name: Kellogg Food Co. (The).
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1912.
New Product–Documentation: J.P. Street. 1913. Connecticut Agric. Exp. Station, Annual Report 36:107-11. For the year 1912. "Gluten and Special Foods." The protein and starch content of these diabetic foods is as follows: (1) Gluten Meal (27.50% protein, 49.64% starch); (2) 40% Gluten (47.00% protein, 31.86% starch); (3) 80% Gluten (81.25% protein, 6.21% starch); (4) Avena-Gluten Biscuit Mixture (21.38% protein, 41.13% starch; made from oatmeal and wheat gluten); (5) 40% Gluten Biscuit (47.50% protein, 35.01% starch); (6) 80% Gluten Biscuit (82.38% protein, 4.68% starch); (7) Breakfast Toast (13.63% protein, 57.42% starch).

Note: These are the earliest products seen, made by a Seventh-day Adventist food company or by Dr. John Harvey Kellogg, that contain gluten.

393. Drews, George Julius. 1912. Unfired food and trophotherapy (food cure). Designed for mothers, students and doctors. A complete treatise on the use of unfired food for the cure and prevention of disease. 3rd ed. revised. Chicago, Illinois: George J. Drews. 313 + x + [8] p. Illust. Indexes. 23 cm.
• ***Summary:*** The author (born in 1873) advocates raw foods and a vegetarian diet for physical and spiritual health. The title page states that this book is five volumes in one. Contents: Dedication. Preface. Introduction: New words coined for the unfired-fooder [glossary]. Apyrotrophy. Man's natural food. Unfired food versus cooked food. Human progress. Human apes. Digestive fluids. Discharge the cook–hire a troph. Human perversity. Warning–Never allow a doctor to suppress an acute disease with drugs. Wrong feeding and its consequences; or how cooked food produces disease. Unfired and fired food compared: Proteids, oils, sugar, starches, chlorophyll, cellulose, saline

© Copyright Soyinfo Center 2021

matter, conclusion. How to begin the unfired diet. Common or informal dinners [menu]. A banquet menu (8 courses).
1. Unfired food combinations–360 recipes [with no dairy products or eggs; however extensive use of honey makes the book non-vegan]: Health drinks, soups (summer and winter), salads (many categories), brawn foods (made from the flour of freshly ground uncooked cereal grains {such as spelt, wheat, sweet corn, hulless barley, flaked rye, oatmeal or rolled wheat}, usually mixed with an equal weight of grated, chopped, flaked or ground nuts {cocoanut, pignolias, peanuts, or almonds}). Note 1. This basic ingredient, named "Brawn Food or Nut-O-Meal," is combined with many other foods such as berries, honey, vegetables, nuts, etc. Laxative brawn food. Saline meals (free of table salt). Cakes and bread (unbaked). Cereal flakes. Pie crusts and fillings. Confections. Dressings. Nut butter and nut cheese. Nibblers. Utensils needed.

2. Materia alimentaria–The chemistry of food. Potassium and sodium salts compared. Organic iron. Organic sodium. Organic magnesium. Organic calcium. Organic potassium, etc. Tables of food composition by food type (moisture-free basis). Note 2. Four legumes are included (p. 188, 191): Lima beans, navy beans, lentils, and peas.

3. Tropho-therapy–Cause and cure of disease. "The prime cause of the common diseases is unnatural food... Where a perfectly natural life is pursued health will assert itself without any attention of the patient or the doctor." "The primary causes of nearly all diseases are lowered vitality and accumulation of waste." "The tongue is a valuable aid in diagnosing..." "Diagnosis of disease from the iris of the eye."

4. Hygienics–Promiscuous subjects: Hygienic dietetics, the daily ration, packed lunches, the average restaurant dinner, why vegetarians fail, Fletcherization (chewing), soaking, overeating, fasting, variety, the toxic poisons of emotion, flesh a stimulant, eggs (cause "albumen poisoning"), milk from cows or goats (for infants who cannot be supplied with mother's milk), food and morality (science of sarcognomy teaches oneness of body and mind), therapeutic value of fruits, fruit acids sterilize, organic or organic water, the taste buds, condiments, common salt (avoid it), commercial sugar (avoid), vacuum sugar (non-heated would be desirable), wholesome sweets, natural, happy environment is as essential to good health as are natural food, air, and sunshine. Laughter. Natural remedies. Drugs. Blood purifiers (unfired vegetable juice and fruit juice; use an "Enterprise Juicer"–p. 247). Blood and nerve tonics. The value of sunshine. The life of food. Organic molecules. The tooth destroyers. The baby. Wholesome poultices. Domestic harmony (try both fired and unfired as an experiment). Social dinners and etiquette of feasting. The power or resistance and recuperation. Man is a frugivore and herbivore (study his anatomy and ancestors). The vegetarian sport (hunt wild herbs). The sense of smell. Sunshine and shadow. Nursing a fine art. A few maxims.

5. Alimentary botany–Source and description of food: Wheat, grains, nuts, legumes (p. 266-67), chufa or earth almond, beans, lima beans, peas (p. 292-95), fruits, etc.

Index to introductory subjects. Index to unfired food recipes. Index to materia alimentaria. Index to promiscuous subjects. Index to alimentary botany. Authors quoted.

Advertisements: All are available from the author in Chicago. The Flaker (Dana Food Chopper). Apyrotropher confection bread. Shelled spanish peanuts. The Enterprise Pulverising and Grinding Mill No. 0. Sun dried olives. Raisins. Honey. The shredder. The Apyrotropher Magazine (combined with The Naturopath–Drews is publisher). National School of Chiropractic (Chicago). The American School of Naturopathy (Est. 1896. Incorporated 1905). Benedict Lust, Yungborn and New York City. Return to Nature (the book). The Kneipp Naturopathic Supplies Store (Health foods, fruits and nuts).

"New words coined for the unfired-fooder" (glossary of words coined by Dr. Drews, from the Greek, in the year 1910). Al.B., Al.D., apyrotropher, apyrotrophy, confit, eupos, eutroph, eutropheon, eutropher, eutrophy, meliart, physiotherapy (nature-cure), synede, troph (noun or verb), tropher, trophery, trophology, trophotherapy, trophoprophylaxis, vegetarian.

Page 16-17 state: "The food as prescribed in this book, in combination with sunshine, fresh air, exercise and restful sleep, will promote and maintain physical, mental, moral and spiritual health, with which beauty is concomitant. Natural food will build up and restore youthful vitality, vim, snap, celerity, strength, endurance, courage, willpower and resistance."

"Unfired food can not produce disease because it contains no inorganic sugar, glucose, soluble starch and partly decomposed protein to saturate the blood, neither inorganic salts to irritate the nerves, nor does it readily ferment or decay in the alimentary canal to produce toxic elements. Unfired foods... have true remedial value for curing nearly all diseases by supplying the proper saline elements in organic form." Note 3. This is the earliest English-language document seen (July 2021) that contains the word "Eutropheon," which is defined (p. 13) as: "An unfired fooder's eating house; a house where only dainty and aesthetic unfired food is served; an apyrotropher eating shop." This is the only word coined by Drews that was ever used by others, and in that case by only one couple, the Richters, as the name of their two restaurants in Southern California, the first of which opened in 1917.

A "fifth edition" with the same number of pages and size was published in 1921.

Note 4. This is the earliest English-language document seen (July 2021) that contains the word "juicer" or that mentions "vegetable juice." It is probably hand-turned rather than electric; see illustration of "The Enterprise Pulverizing and Grinding Mill" on an unnumbered page about 4 pages

© Copyright Soyinfo Center 2021

from end of book. On the next page, under "The Shredder," the author explains why his dislikes the use of juicers. Address: Al.D., 430 E. 42nd St., Chicago, Illinois.

394. Snyder, Sherwood P. 1912. A treatise on foods: And their effects upon health and the physical and moral life. Also a complete list of recipes and instructions for the hygienic preparation of the common food products with special lists of menus. 5th ed. Revised and enlarged. Dayton, Ohio: Health Publishing Co. 192 p. Portrait. Index. 20 cm.
• ***Summary:*** The title on the cover: "The practical hygienic preparation of foods." The author is a vegetarian. His book focuses on the keys to a long and healthy life. Contents: Preface. Prescription for a long life. Wise and healthful sayings suggest healthful thoughts–So these little messages may cause someone to think (13 quotations, including many by Shaftesbury and one by Snyder: "All sickness and sin originate in disobeying nature's laws"). Introduction. 1. The preservation of health a sacred duty. 2. The dining-room. 3. Cereals. 4. Bread and bread-stuffs. 5. Soups. 6, Meats. 7. Meat versus vegetarianism. 8. Meat imitations and meat substitutes. 9. Gravies and sauces. 10. Eggs. 11. Fats and oils. 12. Vegetables. 13. Beans, peas and lentils. 14. Rice and macaroni. 15. Salads. 16. Nuts, nut preparations, nut butters & nut cream. 17. Pies. 18. Desserts. 19. Scientific cake baking. 20. Menus. 21. Ice cream and ices. 22. Miscellaneous subjects. 23. Baby's food and care of children. 24. Foods for the sick. 25. Mastication. 26. The value of steam cooking. 27. Composition of foods. 28. Exercising. Address: Food specialist.

395. Postum Co. 1913. Never tires of the food that restored her health (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 18(1):33. Jan.
• ***Summary:*** "Finally, Mother suggested that I try Grape Nuts, and I began at once, eating it with a little cream or milk. A change for the better began at once."

"The result is a certain and steady return to health and mental activity. 'There's a reason.' Read the little book, The Road to Wellville,' in pkgs." Address: Battle Creek, Michigan.

396. *Los Angeles Times.* 1913. Fruits as food: Are superior to artificially prepared substances because they invite ready flow of digestive juices. Feb. 9. p. VI12.
• ***Summary:*** From: *California Fruit Grower:* "Otto Carque, the well known food expert, says that foods prepared by Nature are the best." Five paragraphs of quotations follow. They begin: "Modern physiology shows that there are two important factors in sustaining health and vigor of the body–first, adequate nutrition, and second, conservation of vital force."

397. Carque Pure Food Co. 1913. Carqué's California Black Mission Figs (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 18(3):Unnumbered page. March.
• ***Summary:*** "Are the best. Special offer. Ten pounds of this delicious, wholesome Fruit will be sent Express prepaid to all stations of the Wells Fargo and American Express Co. for $1.50. Add 25¢. to the other stations."

An illustration shows a long-haired woman, draped in a robe with one breast bared, holding a huge cornucopia of fruit in her right hand and a bunch of figs in her left. "New York agency: B. Lust Pure Food Store, 112 E. 41st St., N.Y. City." Address: Magnolia Ave., Corner 16th St., Los Angeles, California.

398. Carqué, Otto. 1913. Simplicity in diet. *Naturopath and Herald of Health* (*The*) (*New York City*) 18(3):152-53. March.
• ***Summary:*** "The human race, like the anthropoid apes, is by nature frugivorous." But "today people take their food from every conceivable source and in every possible artificial preparation to satisfy their perverted and depraved appetites;..." "Simplicity in diet is the foundation of lasting health." "Let us preach the great and universal truth that the restoration and preservation of health is merely a matter of living in harmony with nature. The Supreme Intelligence... certainly knows how to restore health if not hampered in her wise but often misconstrued ways." Address: Los Angeles, California.

399. Lust's (L.) Health Food Bakery. 1913. Lust's Daisy Brand Peanut Butter (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 18(3):Unnumbered page. March.
• ***Summary:*** "This is the first peanut butter ever produced on this continent with 13 years' experience behind it." "Sample jar by mail, 10¢. Guaranteed to keep. Retail prices: ¼ lb. jars–$0.10... 10 lb. can–$1.50. 55 lb. cans or 125 lb kegs" also available. "Wholesale prices on application. Vegetarian restaurants, clubs, parties and the jobbing trade is invited to ask for special quotations." Note 1. This bakery is run by Louis Lust, Benedict's brother. This ad appears in many subsequent issues of this magazine (e.g., Nov. 1913, Feb. 1915).

Note 2. This is the earliest document seen (Jan. 2008) that uses the term "Health Food Bakery" in connection with Louis Lust or Benedict Lust, brothers and naturopathic pioneers in New York City. Address: 105th Street and Park Avenue, New York City.

400. Kneipp Pure Food Store. 1913. Kneipp naturopathic health foods (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 18(5):322. May.
• ***Summary:*** They sell: Nut preparations, including Nut Prana / Nutprana from Germany. Alcalic wine juice "Calva," a non-alcoholic beverage made of the best grapes. Vegetable butter from Germany. Address: 112 E. 41st St., New York

© Copyright Soyinfo Center 2021

City.

401. *Washington Post.* 1913. Boy saves man from sea: Paul Bragg swims 300 yards with Isaac Rosenstein at beach. June 17. p. 2.
• ***Summary:*** "While thousands of people stood helpless on the shores of Colonial Beach [Virginia] Sunday afternoon listening to the frantic cries for help of Isaac Rosenstein, who was seized with cramps 300 years from shore, Paul C. Bragg, 18 years old, of 6 Quincy street northeast, leaped from the side of a yacht anchored nearby, and after a struggle with the exhausted man, succeeded in saving his life.

"Rosenstein weighs 200 pounds. Bragg turned him on his back, slipped his arm about the man's neck, and swam to shore with him."

402. Kellogg Food Co. 1913. Constipation: Fight it (Ad). *Good Health* (*Battle Creek, Michigan*) 48(6):8-9. June.
• ***Summary:*** Ninety percent of Americans are victims of constipation. "The use of salts, pills, cathartics and mineral waters is a constant menace to the health. Drugs do not cure: They afford only temporary relief and aggravate the trouble in the end. Medical laxatives of all sorts afford relief only by irritating the intestine and sooner or later produce disastrous results..."

"A new drugless remedy: The food experts of the Battle Creek Sanitarium have after years of research perfected a wonderful remedy for constipation known as Para-lax." A major ingredient is "a refined product of Russian mineral oil." Address: Battle Creek, Michigan.

403. *Los Angeles Times.* 1913. Harry Brook at the confessional: Why I left "The Times." July 6. p. II2.
• ***Summary:*** "From: Harry Brook in *Brain and Brawn* for July. Several correspondents have asked me why I left the *Los Angeles Times* where I worked as a laborer in the editorial vineyard for twenty-five years, editing the Care of the Body department during thirteen years of that period. Instead of replying directly, I will tell you a little story."

A man who went to heaven "was a nuisance, raising such a continuous disturbance that he had become unbearable." St. Peter said: "Send him down below." But before 10 days had passed Satan's chief fireman "complained that the man was preaching insurrectory doctrines and threatening to upset the system of government that had prevailed from time immemorial..." Satan said to "let him go out and start a little hell of his own."

A photo shows Harry Ellington Brook, N.D., wearing a beard and mustache.

Note: Brain and Brawn, edited by Harry Wellington Brook, as a periodical whose first issue appeared in June 1912. Volume 1 contains 18 numbers. Volume 2 begins in June 1913. Devoted to nature cures, hygiene, nutrition and exercise. Subtitled: "A magazine for those who think." LIC [last issue in collection]: Vol. 16, No. 5. Oct. 1917.

404. *Washington Post.* 1913. Ordway is in ruins. Aug. 10. p. 1, 2.
• ***Summary:*** The section titled "Annual boxing matches" (p. 2) states: "The soldiers of the Second Regiment [of the Washington, DC, National Guard] held their annual camp boxing and wrestling matches this evening immediately after supper."

"James Kelley threw Kid Johnson in two straight falls, and Paul Bragg threw Young Bertner in two straight falls.

"Bragg, of Company D, of the First, is the young man who saved Isaac C. Rosenstein from drowning at Colonial Beach last June. Application for a Carnegie medal for the young man has been made."

Note 1. At the time this article was written (according to his registration card of 1917), Paul Bragg was a private in the U.S. National Guard, Second Regiment, Company D, in Washington, DC. He served for three years. We do not know when and where he entered, why he joined, or when and where he was discharged.

Note 2. "Ordway" (in the title) refers to Camp Ordway, Harpers Ferry, West Virginia, where war games are being conducted.

405. *Indianapolis Star.* 1913. Lightweight wrestlers challenged for match: Amateur, in city few hours, offers $1,000 side bet he can defeat any in class. Sept. 18. p. 13.
• ***Summary:*** "Paul C. Bragg of Washington, amateur wrestler, passing through Indianapolis yesterday en route to St. Charles, Missouri, where he is to become physical instructor of the St. Charles Military School, authorized a challenge to any lightweight wrestler for a side bet of $1,000, any time, anywhere. Bragg is 18 years old and will wrestle any one at 135 pounds, he says.

"Four months ago young Bragg, who is an accomplished swimmer, rescued Isaac C. Rosenstein from drowning at Colonial Beach, Virginia, and was awarded a gold medal for bravery by the Washington Times. Aug. 4 of this year he saved James Kelley, a militiaman, from drowning in the Shenandoah River and received a personal letter from President [Woodrow] Wilson commending him for his bravery. Friends have also put in an application for a Carnegie medal for him.

"Young Bragg says he was an instructor in wrestling to President [Theodore] Roosevelt and taught the President's sons how to box. He bears a letter of introduction from Champ Clark, speaker of the House, to the officials of the Missouri Military School.

"Bragg's father is R.E. Bragg, formerly a printer in Indianapolis now connected with the government printing office at Washington, DC. His brother, Elton Bragg, is a member of the Interstate Commerce Commission.

"Dr. C.A. Carter of the state board of health is an uncle

© Copyright Soyinfo Center 2021

of the young man and entertained him at the Claypool Hotel last night. Bragg received his physical training in the Y.M.C.A. in Washington" [DC]. Address: Indiana.

406. Carqué, Otto. 1913. California sundried black mission figs. *Naturopath and Herald of Health* (*The*) (*New York City*) 18(10):690-91. Oct.
• ***Summary:*** An article in praise of the food he sells. These figs are sold at "the Kneipp Pure Food Store, 112 E. 41st St.," New York City. Address: Los Angeles, California.

407. Carqué, Otto. 1913. Diet in relation to health and efficiency. *Naturopath and Herald of Health* (*The*) (*New York City*) 18(11):719-21. Nov.
• ***Summary:*** Discusses a sound vegetarian diet and other major factors related to good health. "Plants really are accumulated sunshine." Address: Los Angeles, California.

408. *Naturopath and Herald of Health* (*The*) (*New York City*). 1913. The question box: A new section of the Naturopath. 18(11):763. Nov.
• ***Summary:*** "All letters addressed to the Question Box will receive our careful attention and answers to them will be published in the order in which the letters are received." "We shall be glad to answer not inquiries in regard to individual cases, but also requests for information on any topic relating to Naturopathy such as: Natural Life,... Health Foods, Natural Life Colonies, Health Cooking, Vegetarian Diet, Raw Food Diet, Fruit and Nut Diet,..."

409. LeClerc, J.A.; Jacobs, B.R. 1913. Graham flour: a study of the physical and chemical differences between graham flour and imitation graham flours. *USDA Bureau of Chemistry, Bulletin* No. 164. 57 p. *

410. Friedenwald, Julius; Ruhräh, John. 1913. Diet in health and disease. 4th ed. Thoroughly revised and enlarged. Philadelphia, Pennsylvania: W.B. Saunders Co. 857 p. Illust. 24 cm. [4 soy ref]
• ***Summary:*** The section titled "The soy bean" (p. 124-26) states: "This bean (glycine hispida), sometimes called the soja bean, is an annual leguminous plant extensively used as a food in China and Japan. Until recently it has been regarded as a botanical curiosity in the Occident. It has recently been extensively used in America as a forage crop and to improve the soil if plowed under... There are a large number of different varieties, which vary in size, shape, color, and length of time they take to mature. Some are grown exclusively for the oil they contain, and it is used for culinary, illuminating, and lubricating purposes. The light-colored beans are eaten in soups, and the pods are sometimes picked green, boiled, and served cold with a sprinkling of soy sauce. The green varieties are often pickled in brine and eaten moist or dried with meals as appetizers; the same varieties are often sprouted, scalded, and served with meals in winter as a green vegetable. The bean forms the basis of the so-called soy sauces, used as a condiment all over the world. The Oriental races most frequently eat the bean, in more or less cheesy-like foods, which are prepared from it. The most common of these are natto, tofu, miso, yuba, and shoyu. Natto is a sort of bean cheese made by boiling the beans until they become soft and then placing the resulting mass in a warm cellar where it ferments. Tofu is made by soaking the beans in water, crushing between millstones, and boiling in about three times their bulk of water. The protein is precipitated and the resulting cheese eaten. The white milky liquid of the above has nearly the composition of cows' milk, and tastes something like malt. It may be used in infant feeding to advantage (see same).

"Americans may eat the beans in numerous ways described under the head of soy bean cookery in the recipes at the end of this book. The bean is of particular value in diabetic diets (see same). It may be used to increase the protein of the diet.

There are variations in the composition of the different varieties." A table shows the chemical composition of yellow soy beans grown in the USA, both as is and calculated on a water-free basis. "The Cereo Company of Tappan, New York, have made a soy bean flour which is useful." Its composition is given. "The percentage of protein in this flour is almost one-third greater than the percentage of protein in the whole beans. This is caused by removing the coarse fibrous hulls which contain little protein.

"Vegetable food of such composition certainly is remarkable when compared with round beef, medium"– whose composition is given.

Soy flour can be used as a gruel, in broths, and in making biscuits. A table (p. 126) shows the "Composition of fresh and dried legumes (incl. soy beans, cow peas, chick-peas, peanuts) with that of other foods" (Based on Abel, Farmers' Bulletin No. 121 [1900, p. 17]).

The section on "vegetarianism" (p. 130-31) is the same as that in the 1909 edition (p. 113-14).

In the chapter on "Infant feeding," the section on "Other food for infants" has a subsection on "The soy bean" (p. 297-98) which begins: "In certain conditions the soy bean... is of great value. In cases when milk is badly borne, in certain forms of intestinal disorders, in diarrhea, and especially in the convalescence after diarrhea, in certain cases of marasmus and in malnutrition, the soy bean flour, properly used, is of great value. Each ounce contains 13 grams protein and 120 calories." A table shows the composition when mixed with various amounts of water. Recipes for making gruels are given.

In the chapter on "Diet in disease," in the section titled "Diseases in which diet is a primary factor," is a subsection on "The soy bean" (p. 592) states: "The bean contains about 8 per cent. of sugar and no starch, and furnishes a large

© Copyright Soyinfo Center 2021

amount of available protein and fat." "A patient on a strict diabetic diet, who is excreting a certain amount of sugar, will excrete less sugar when the soy bean is added to the diet. It seems to be of particular value in severe cases. In addition to this action, it is a very valuable food, both on account of its nutritious properties and owing to the fact that it may be prepared in a number of different ways, and so serves to vary the diet."

In the section on "Diabetic Foods" (p. 601-02) is based on Winton (1906) and contains the same information, including that about The Health Food Company of New York.

In the chapter on "Recipes" is a section on "Bread" (p. 740-41) which includes whole-wheat bread, zwieback, and bran muffins for constipation. The same chapter has a section on "Soy bean cookery" (p. 766-69) with the following recipes: Introduction, gruels, broths, muffins, nut-cakes, soy bean cakes, breakfast food (like oatmeal), pancakes, soy bean cheese ("In Seattle, Washington, and other places in the West we are informed that tofu is made by the Japanese and sold to the Oriental residents").

Goff (1911) offers the following: Grilled soy bean [dry roasted soynuts], [whole] soy beans with butter, soy beans au gras (fried with onions and fat), bread or cakes of soy beans.

On page 822 is a "Short list of books on food and diet." 33 books are cited; some are in German or French.

Note 1. Julius Friedenwald lived 1866-1941. John Ruräh lived 1872-1925.

Note 2. This is the earliest English-language document seen (Dec. 2012) that uses the term "Grilled soy bean" to refer to dry roasted soybeans / soynuts. Address: 1. Prof. of Gastro-Enterology; 2. Prof. of Diseases of Children. Both: College of Physicians and Surgeons, Baltimore, Maryland.

411. Lienhard, William. 1914. Information and news department. *Naturopath and Herald of Health* (*The*) (*New York City*) 19(3):[205-07]. March.
• ***Summary:*** Appears to give strong support to the eugenics movement. Moses Harman (1830-1910) of West Virginia has been credited as one of the founders of what became the eugenics movement. "He gave the spur and start to this effort. Through his journals, Lucifer, the Light Bearer, later re-christened The Eugenic Magazine, encouraged by a small circle of earnest men and women, he dug down below the surface endeavoring to bring forth a stronger and better type of men." Note: Harman was also a school teacher and publisher, notable for his staunch support of women's rights. He was also an anarchist.

Dr. John Harvey Kellogg of Battle Creek, Michigan, recently hosted the successful "National Conference for Race Betterment, upon which the attention of the eugenic scientists of all the world was centered."

One section, titled "Health Foods," includes Berhalter's Health Foods, 308 North Ave., Chicago, Illinois.

414. Lust, Louise. 1914. Good dinner cook book. Butler, New Jersey: Nature Cure Publishing Co. *
• ***Summary:*** A vegetarian cookbook. Contents: 1. Cooked and uncooked foods. 2. Substitutes for animal foods. 3. Egg plants, potato croquettes, etc. 4. Rice and farina fritters, rice with tomatoes, etc. 5. Mushroom pie, cabbage pie, spinach and eggs, stuffed peppers. 6. Soups and gruels. 7. Vegetables and what may be done with them. 8. Sauces and their importance to a good dinner. Sixteen sections with tables of food values from reliable authorities.

An ad *Naturopath and Herald of Health* (Oct. 1914, p. 697) states: "The secret is out. A treat for the epicure. A triumph of the culinary art." A large portrait shows Louisa Lust, N.D. "The Naturopathic Resort 'Yungborn' at Butler, New Jersey, and the Florida Yungborn 'Quisisana' at Tangerine have long been famous for the originality and excellence of their vegetarian diet. Visitors have described the meals as 'masterpieces of the culinary art.'"

Note: This is the earliest document seen (Nov. 2014) that contains the word "Quisisana" in connection with Benedict Lust or with the Florida Yungborn.

415. Postum Co. 1914. Learning things: We are all in the apprentice class (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 19(10):685. Oct.
• ***Summary:*** A lady from Springfield, Illinois, tells how she was "afflicted for years with nervousness and heart trouble." Finally, at the suggestion of a friend, she stopped drinking coffee and began to use Postum instead. Her health gradually improved until for the past 6 to 8 months she has been in good health and entirely free of her former afflictions. "Coffee is the destroyer–Postum is the rebuilder." Address: Battle Creek, Michigan.

416. During World War I, Hollywood, California, becomes the movie capital of the Unites States–and soon of the world

© Copyright Soyinfo Center 2021

(Important Event). 1914-1918.

• ***Summary:*** First some background:

1853–One adobe hut stood on the site that became Hollywood.

1870–An agricultural community flourished in the area with thriving crops.

The naming of Hollywood is attributed to H.J. Whitley ("the Father of Hollywood"), Daeida Wilcox, and Harvey Wilcox.

1887–The name "Hollywood" first appeared on the Wilcox's map of the subdivision, filed with the county recorder on February 1, 1887.

1900–The community, then called Cahuenga, had a post office, newspaper, hotel and two markets, along with a population of 500. Los Angeles, with a population of 100,000, lay 7 miles east through the citrus groves. A single-track streetcar line ran down the middle of Prospect Avenue from it.

1902–The first section of the famous Hollywood Hotel (which fronted on dusty Prospect Ave.), the first major hotel in Hollywood, was opened by H.J. Whitley, who was eager to sell residential lots among the lemon ranches then lining the foothills.

1903–Hollywood is incorporated as a municipality. Among the town ordinances are one prohibiting the sale of liquor except by pharmacists and one outlawing the driving of cattle through the streets in herds of more than two hundred.

1904–A new trolley car track running from Los Angeles to Hollywood up Prospect Avenue was opened. The system was called "the Hollywood Boulevard." It cut travel time to and from Los Angeles drastically.

1910–Because of an ongoing struggle to secure an adequate water supply, the townsmen voted for Hollywood to be annexed into the City of Los Angeles, as the water system of the growing city had opened the Los Angeles Aqueduct and was piping water down from the Owens River in the Owens Valley. Another reason for the vote was that Hollywood could have access to drainage through Los Angeles' sewer system.

With annexation, the name of Prospect Avenue was changed to Hollywood Boulevard and all the street numbers in the new district changed. For example, 100 Prospect Avenue, at Vermont Avenue, became 6400 Hollywood Boulevard; and 100 Cahuenga Boulevard, at Hollywood Boulevard, changed to 1700 Cahuenga Boulevard.

1910–The motion picture arrives in Hollywood. In early 1910, director D. W. Griffith was sent by the Biograph Company (New York) to the west coast with his troupe, consisting of actors Blanche Sweet, Lillian Gish, Mary Pickford, Lionel Barrymore and others. They started filming on a vacant lot in downtown Los Angeles. The Company decided to explore new territories and traveled 5 miles north to the little village Hollywood, which was friendly and enjoyed the movie company filming there. Griffith then filmed the first movie ever shot in Hollywood titled *In Old California*, a Biograph melodrama about Mexican owned California in the 1800s. The movie company stayed there for months and made several films before returning to New York.

1913–After hearing about this wonderful place, many movie-makers headed west. Also in 1913 Nestor Studios, Hollywood's first movie studio, was established.

1914–The first feature film made in a Hollywood studio was The Squaw Man (1914), directed by Cecil B. DeMille. With this film, the Hollywood movie industry was born. Note, however, that earlier films had been made in the Los Angeles area since 1906.

1914-1918–During World War I, Hollywood became the movie capital of the United States, and soon of the world.

417. Davison, Mrs. 1914. Domestic economy in Japan. [Tokyo, Japan]: Kyo Bun Kwan (Methodist Publishing House). Tokyo Katei Mondai Kenkyu Kurabu. v + 73 + [16] p.; 17 + 1157 + 6 p. No index. 19 cm.

• ***Summary:*** On the title page: "Compiled by the Home Problem Club, Tokyo." Contents: Soups. Fish. Meats and substitutes. Vegetables. Salads. Puddings. Pudding sauces. Sweets. Cakes. Breads. Native cereals. Preserves. Jams. Pickles. Suggestions. Japanese disinfectants. Useful addresses. Menu-maker (from *Ladies Home Journal*).

The front part of this book (p. v + 73 p.) is in English. The back part (17 + 115 + 6 p., reading from back to front) is in Japanese, and numbered separately. In the middle is a 16-page "Advertising section," mostly in English, on unnumbered pages. Each recipe is numbered sequentially, from 1 to 1-186, in each part. The recipe numbers in the English part correspond exactly to the numbers in the Japanese part.

Soy related recipes: "Tofu" (bean curd) soup (p. 2). [Soy] Bean roast (p. 12). "Tofu" roast (3 types; calls for 1 *cho* or 1 square of tofu, p. 12-13). "Tofu" and celery stew (p. 14). In the chapter on vegetables: "Daizu" (p. 23): "Soja or Soy bean. There are white, green and black soy beans. This bean is used in the preparation of *miso, tofu,* etc. A drink is made from the black soy bean and unhulled barley. These are parched and then boiled in a tea, sweetened with sugar ad used in the summer time." Soya beans (p. 24): "Hull and boil; remove the skins and dress like lima beans. *Azuki* a little red bean may be prepared in many ways. One way, boil, place in center of a mound of rice, and serve with a curry sauce made with apple and onion in it."

Tofu (p. 26-29): "Tofu is a most nourishing inexpensive curd made from the bean. It may be served in many ways. The process of preparation takes away part of the bean difficult to digest and leaves one of the most wholesome of foods. It is especially good for diabetic patients. It may be bought in any part of Japan. Always pour boiling water over

© Copyright Soyinfo Center 2021

it before using." These recipes follow: Scrambled "tofu". "Tofu" and cheese. "Tofu" croquettes (3 recipes). "Tofu" box. "Tofu" and tomatoes. "Tofu" and peanut butter. "Tofu" and cheese (2 recipes). "Tofu" and corn.

"Tofu" (bean-curd) salad (with 2 *cho* [= cakes] of "tofu," p. 38). "Tofu" custard (p. 40).

This book also calls for peanuts in many recipes. A few recipes call for *goma* (sesame seeds), *kanten* ("a kind of gelatine made from seaweed. A substitute for gelatine," p. 61). in a few. Pudding sauces and sweets include many recipes for "mizu-ame" ("1 pint of golden-colored mizu-ame." Some is made from millet, and some from rice). "Health food" is mentioned on p. 52. Address: Tokyo, Japan.

418. Lust, Benedict; Lust, Louise. 1914. Man, learn to think. Butler, New Jersey: Benedict Lust. N.D., M.D. 16 p. 16 cm. Naturopathic Pamphlet Series No. 18. *

• ***Summary:*** Cover title: "There's a reason." Address: Battle Creek, Michigan.

420. Street, John Phillips. 1914. Diabetic foods. *Connecticut Agricultural Experiment Station, Annual Report* 37:1-95. For the year ending Oct. 31, 1913. See p. 20-21, 30-33, 38, 45, 47-48, 56, 75-77. Part I. Eighteenth Report on Food Products and Sixth Report on Drug Products, 1913.
• ***Summary:*** Page 11: "What is a 'diabetic' food? Formerly an almost complete absence, or at least a very marked reduction, of carbohydrates was considered an essential characteristic of a true 'diabetic' food. A table of 12 different classes of diabetic foods shows that, of the 542 commercial products, "Beads, biscuits, cakes, etc." 150, and "Flours and meals" 109 were the top two classes.

In Table I, titled "Analyses of diabetic foods" (p. 18-39), the many commercial products are grouped into classes, starting with "Flours and meals." For each product is given: Year of analysis, name of manufacturer and brand, no. of pieces, net weight of package, cost per package, cost per pound, nutritional composition (water, ash, protein {Nx6.25}, fiber, nitrogen-free extract, fat {ether extract}, starch, weight supplying same amount of carbohydrates as 10 gms. of wheat bread, calculated calories per 100 gms.).

The summary (p. 75-77) groups the main commercial products into six groups based on their carbohydrate content. The first group contains less than 5% carbohydrates and the 6th group contains 25 to 35% carbohydrates. "The soy bean flours contained from 23 to 26 per cent. carbohydrates" and "cost from 30 to 65 cents per pound." Brands include: "Health Food Co., New York, Protosoy Soy Flour, Jireh Diabetic Food Co. (NY), Soja Bean Flour, Health Food Protosoy Diabetic Wafers (21.2% carbohydrates) and Protosoy Soy Flour (24.5%), Cereo Soy Bean Gruel Flour (23.7%), Metcalf's Soja Bean Meal (25.0%), Jireh Soja Bean Meal (25.8%; sometimes also named Jireh Diatetic [sic, Dietetic] Soja Bean Flour). Platschek (Karlsbad) Sojabohnenmehl (49%)."

Note. This is the earliest English-language document seen (Jan. 2019) that contains the term Soja Bean Flour (regardless of capitalization).

The Health Food Co., New York, made the following products: Flours and meals: Almond meal (analyzed 1906, 1913), C B X Cold Blast Flour, 25% protein (1911), Glutosac Gluten Flour (1906, 1909, 1911, 1913), Pronireu (Gluten Griddle Cake Flour; 1913), Protosac Gluten Flour (1906, 1913), Protosoy Soy Flour (1913), Pure Washed Gluten Flour (1906, 1913). Soft breads–Protosac Bread (1906). Hard breads and bakery products: Alpha Best Diabetic Wafer (1913), Diabetic Biscuit (1906 & 1913), Gluten Nuggets (1913), Glutona (1906), Glutosac Butter Wafers (1906), Glutosac Rusks (1906), Glutosac Wafers, Plain (1906), Glutosac Zwieback (1906), No. 1 Proto Puffs (1906 & 1913), No. 2 Proto Puffs (1911 & 1913), Protosac Rusks (1906), Protosoy Diabetic Wafers (1913), Salvia Sticks (1906). Breakfast Foods–Manana (1913). Miscellaneous products–Kaffeebrod (1913).

Peanut butter was made or sold by the following (p. 36-37): Atlantic Peanut Refinery, Philadelphia (1899), J.W. Beardsley's Sons, New York, Acme Red Brand (1913), Beach Nut Packaging Co., Canajoharie, NY (1913), A.C. Blenner & Co. New Haven, Connecticut (Distributor; 1913), D.W. Brooke (Newark, NJ; 1913), Dillon & Douglass, New Haven, CT, Perfection (Distributor), H.J. Heinz Co., Pittsburgh, Pennsylvania (1913), The Kellogg Food Co., Battle Creek, Michigan (1913), Francis H. Leggett & Co., New York, Premier (1913), MacLaren Imperial Cheese Co., Detroit, Michigan, Eagle (1913), Nut Products Co., New Haven, CT, Peanolia (1913), Peanolia Food Co., New Haven, CT, Peanolia (1899), S.S. Pierce Co., Boston, MA, Acharis Brand (1914).

Almond paste [Almond butter] was made by: Chapman, Chicago (1902-03), Henry Heide, New York (1902-03), Spencer, New York (1902-03).

Many gluten-based foods are also discussed and analyzed in a table including Kellogg's Protose (3.6% carbohydrates), Barker's Gluten Food "A" (4.1%), Kellogg's 80% Gluten Biscuits (4.4%), Bischof's Gluten Flour (5.0%), Barker's Gluten Food "B" (5.9%), Barker's Gluten Food "C" (7.7%), Kellogg's 80% Gluten (1912) (7.8%), Plasmon Cocoa 9.3% (Made by Plasmon Co., London, analyzed

© Copyright Soyinfo Center 2021

1903), Metcalf's Vegetable Gluten (1913) (9.8%), Kellogg's Pure Gluten Biscuit (1906) (10.2%), Kellogg's Potato Gluten Biscuit (1906, 1909) (11.9%, including fiber), Ferguson Gluten Bread (33.6%), Gum Gluten Breakfast Food (34.2%).

Many peanut-based foods are also discussed and analyzed including Rademann's Erdnuss-Brot [Peanut Bread 19.7%, p. 26, 77]. Frank & Co. (Bockenheim) Erdnuss-Kakes [Peanut Cakes, p. 28, 56]. Rademann's Erdnuss-Biskuits [Peanut Biscuits, p. 34]. Peanut butter: Manufacturers (with date of analysis in parentheses) are: Atlantic Peanut Refinery, Philadelphia, Pennsylvania (1899). J.W. Beardsley's Sons, New York (Acme Red Brand, 1913). Beech-Nut Packing Co., Canajoharie, New York (1913). A.C. Blenner & Co., New Haven, [Connecticut] (Distributed by D.W. Brooke, Newark, New Jersey, 1913). Dillon & Douglass, New Haven (Perfection brand; Distributed by H.J. Heinz Co., Pittsburgh, Pennsylvania, 1913). The Kellogg Food Co., Battle Creek, Michigan (2 samples, 1913). Francis H. Leggett & Co., New York (Premier brand, 1913). MacLaren Imperial Cheese Co., Detroit, Michigan (Eagle brand, 1913). Nut Products Co., New Haven (Penolia, 1913). Penolia Food Co., New Haven (Penolia, 1899). S.S. Pierce Co., Boston, Massachusetts (Acharis brand, 1913). Note the two brands that were on the market by 1899.

A host of products contain "almond" in the name, including Kellogg's Almond Butter (8.2% carbohydrates), Callard's almond shortbreads (21%), and Fritz's Mandelbrot (23%), Almond-form wafers with chocolate (from Fromm & Co., Dresden), Charasse Gluten Exquis Biscuits aux Amandes.

Other nut preparations (p. 38): The Kellogg Food Co., Battle Creek–Nut Bromose (Meltose [a malt preparation] and nuts, 1913), Nut Butter (Sanitas, 1906), Nut Meal (1906), Nuttolene (6.3%, 1906). Nashville Sanitarium-Food Co., Nashville, Tennessee–Nut Butter, Nutcysa, and Nutfoda (13.0% 6.3%, and 6.8%; Analyzed in 1913).

A section titled "Nut, Nuts Pastes, etc." (p. 62-64) notes: "Samples of peanut butter showed considerable uniformity; the carbohydrates ranged from 12 to 20, with 3.2 to 6.5 per cent. starch. Most of the peanut butters we have examined would seem to be useful additions to the diabetic's diet." The manufacturer of Kellogg's Malted Nuts claims that it "supplies the place of cow's milk as a liquid food. Its composition is similar to that of milk." The author thinks this statement is misleading, but he notes that "Kellogg's Nut Butter closely resembles peanut butter in composition, and has its same advantages as a diabetic food... Kellogg's Nut Meal is a peanut meal containing only 12 per cent. carbohydrates. Kellogg's Nuttolene and Protose likewise contained only 6 and 4 per cent. carbohydrates, respectively."

Webster's Dictionary defines "aleurone" (a word first used in about 1869) as "protein matter in the form of minute granules or grains occurring in seeds in endosperm or in a special peripheral layer." Many German products have the same root: Gerike's Aleuronat (3.1% carbohydrates, p. 76). F. Guenther, from Frankfurt, makes Aleuronat-Kakes (p. 56). R. Hundhausen, from Hamm, makes Aleuronatzweiback (high or low gluten) and Aleuronat Biskuits and Kakes (biscuits and cakes, p. 57, 30), or pure (4.0% carbohydrates, p. 76). Kirche, from Duesseldorf, makes Aleuronat-Kakes (p. 32).

Other well-known products. Protein preparations: Plasmon Co., London, makes Plasmon. Troponwerke, Mülheim, makes Tropon (p. 24). Address: Chemist of the Station, New Haven, Connecticut.

421. Semple, Dugald. 1914?. Simple life recipes, with hints on diet. London: C.W. Daniel, Ltd. 22 p. Undated. 19 cm.
• ***Summary:*** A vegetarian cookbook, with recipes compiled by Cathie Semple. On the back cover is a full-page ad for vegetarian products made by Mapleton's Nut Food Co. Ltd., Garston, Liverpool.

422. Stern, Alfred L. 1915. Lack of regular field for school games in only real holdback to longer title series. *Washington Post.* Jan. 10. p. S3.
• ***Summary:*** This article discusses high school many sports. In column 2 we read: "Boxing and wrestling are coming in for attention at Business [High School]. 'Doc' Hudson is an ardent admirer of these sports, and for some years has tried to arouse interest among the boys in the work."

"Paul C. Bragg, a newcomer at Business, who hails from Northwestern Military and Naval Academy of Highland Park, Illinois, and Albert Stern, a member of the Business High football eleven last fall, are among many others who are expected to take advantage of 'Doc' Hudson's offer of free instruction."

423. *Washington Post.* 1915. District school notes. March 7. p. 13.
• ***Summary:*** "The Balance Sheet was published last week by the students of Business High School for the first time this semester. The staff of the paper, as reorganized, is as follows:" Paul C. Bragg is one of many contributing editors.

Note: Business High School appears to be in Washington, DC.

424. Berhalter Health Food Co. (The). 1915. Health and efficiency (Ad). *Reform Advocate, America's Jewish Journal* 49:173. March 20.
• ***Summary:*** "Improve yourself by eating Berhalter's Health Foods.

"We are experts in the making of Health Breads–Wheat Meal Bread, Bran Bread, Whole Rye Bread, delicious Whole Wheat Fruit Bread, Whole Meal Cookies, Cup Cakes and many other good, wholesome foods–call and find out something new."

"Two stores: Main Store & Bakery: 1423 N. Clark St. [Chicago, Illinois]. [Phone] Superior 1289

"Branch Store: 132 E. 43rd. St. Kenwood 3058." Address: Opposite New Comedy Theater, 309 North Ave., Chicago.

425. *Los Angeles Times.* 1915. The city and environs: Events briefly told. March 31. p. I12.
• ***Summary:*** The section titled "Olive bread the latest" states: "Olive Day brought an idea to Otto Carque, of the Carque Pure Food Company and he turned it into loaves. It is olive bread, made of whole wheat flour and chopped, ripe olives. He had a call for 500 loaves the second day, indicating that olive bread 'caught on.'"

426. Nutto Product Co., Inc (The). 1915. Dietade: Mineral springwater. Promotes perfect health (Ad). *Naturopath and Herald of Health* (*The*) (*New York City*) 20(4):Unnumbered page. April.
• ***Summary:*** A large illustration on each side of the ad shows a glass bottle of Dietade Mineral Water with a metal cap. This table water "is highly recommended for its wonderful curative properties in cases of diabetes, eczema, dyspepsia, indigestion,..."

Note: On page 389 of the June 1915 issue is an article titled "Dietade," which explains that this mineral water comes from a place near the "Au Sable Chasm" in the Adirondacks [in Clinton County, New York]. The Ausable River has carved out the chasm or gorge. So bottled water has been around for quite a while. Address: 141-143 West 28th St., New York City.

427. *Vegetarian Messenger and Health Review* (*Manchester, England*). 1915. A visit to the Wallace "P.R." Foods factory. April. p. 96.
• ***Summary:*** In 1913 the Wallace "P.R." Foods Company was built on Hornsey Hill [as of 2009 named "Hornsey Rise, Islington] some five miles north of the centre of London–according to a foundation tablet on the hill. The building is large, bright, and airy–communicating its key principle–healthiness. "The firm's rules are framed to ensure the production of absolutely pure foods. The Wallace Company has set up a high standard and despite many temptations has refused to lower the quality of its specialties. Biscuits and roasted coffee are two of the specialties.

"Managers of Health Food Stores tell us that the demand for 'P.R.' specialties is steady, but does not increase rapidly."

428. *Washington Post.* 1915. Society: The marriage of Miss Neva Parnin to Mr. Paul C. Bragg... Nov. 22. p. 5-6. See p. 6.
• ***Summary:*** "... was solemnized by the Rev. S. Halstead Watkins at 6 o'clock Monday evening [Nov. 22], in the Chapel of St. Barnabas, 304 Mulberry street, New York [City]. Miss Louise Parshley was the bride's attendant and Mr. Wilfred Bruce was the best man. Until their marriage the bride and groom were residents of Washington [DC], where they have many friends and where their parents, Mr. and Mrs. R.E. Bragg and Mr. and Mrs. J. Parnin, reside. They will make their home in Jersey City [Hudson County, New Jersey].

"Bragg will be remembered as the athlete who was awarded a valuable hero medal for his daring rescue from drowning of Mr. Isaac Rosenstein at Colonial Beach in June, 1913. He afterward became the physical director at Northwestern Military Academy, at Highland Park, Illinois, and later was a student at Business High School."

429. Walker, Norman Wardhlaugh. 1915. Declaration of Intention (to become a citizen of the United States of America). New York County Clerk, NY. Dec. 20.
• ***Summary:*** Sworn to under oath by Norman Wardhaugh Walker on Dec. 20, 1915, County of Putnam, State of New York, parts of which read: "I, Norman Wardhaugh Walker, aged 29 years, occupation Real Estate, do declare on oath that my personal description is: Color White, complexion White, height 5 feet 10 inches, weight 140 pounds, color of hair Light Brown, color of Eyes Grey. I was born in Genoa, Italy on the 4th of January, anno Domini 1886; I now reside at Lake Mahopac, Carmel, New York."

He goes on (still under oath) to state that he emigrated to the USA from Liverpool, England on the Lusitania and that his "foreign residence" was London, England, and that it is his "bona fide intention" to renounce allegiance to "George V, King of Great Britain & Ireland, of whom I am now a subject".

Then he goes on to state that he arrived in the port of New York on or about the 13th day of October, 1910 (I had him pegged correctly as Passenger 19). Signed Norman Wardhaugh Walker (document was subscribed & sworn to in the Office of William H. Weeks, Clerk of the Supreme Court, in front of {can't read his name}, Deputy Clerk).

430. Grohens, Albert P. 1915. Peanuts: Peanut butter. *Simmons' Spice Mill* 38(12):1451, 1454-55. Dec.
• ***Summary:*** "Editor's Note: The greatly increasing consumption of peanut butter and the consequent demand for knowledge relating to the processes of making this popular food article impelled us to induce a high authority on the subject to contribute an article to these pages; the following matter will therefore prove of great interest to a number of our readers."

"If 20 years ago anyone had ventured to make the statement that the humble peanut was destined to become. a few years hence, one of the most popular of table food products–a product at once delicious as well as wholesome and nourishing–he would have been called a 'visionary.' Twenty years ago peanut butter was unknown. It is claimed that the first effort to place it on the market was made in 1896. For several years it was regarded merely as a table delicacy, or of the nature of a so-called health-food. Its

© Copyright Soyinfo Center 2021

consumption was thus necessarily limited until after the breakfast food wave of 1900-1904 had somewhat subsided, or was put on a more rational foundation.

"Thus the real growth of the peanut butter industry dates from 1904. Before that time there were about a half dozen small sized peanut butter factories in the whole United States. To-day there is hardly a city in the Northern States of 30,000 population and over which does not have one or more peanut butter factories, and even in many smaller places we find peanut butter plants doing a thriving business. In fact, so popular has it become as a regular table food that the consumption of peanut butter during the last three years more than equals that of all the previous years combined.

"What is considered the largest and most widely advertised peanut butter plant in this country is located in the State of New York."

The writer describes a conversation he had with the owner before this plant in Feb. 1906 before the plant began making peanut butter. He stepped off a West Shore train to get there. It ends: "'How much of an outlay will it require to start with as small an equipment as you would recommend?'

"'From $800 to $1,000.' That is the approximate cost of the plant which was installed. Thousands and tens of thousands of dollars have since been added to the equipment of this plant, and it is said that at the present time the concern turns out on an average 15 tons of peanut butter per day.

"A striking peculiarity in connection with the peanut butter industry is the fact that nearly all of the many concerns who are engaged in the making of the product were interested in other lines of manufacture and simply added peanut butter as a side-line. A goodly number of these very soon succeeded in making this their leading product. Generally we find coffee, tea and spice houses and makers of mustard, chili sauces and other table relishes engaged in the manufacture of peanut butter.

"Many Different Grades of Peanut Butter: The average consumer is probably not aware that there are many different grades of peanut butter. It is, therefore, well to explain that there are many different kinds and grades of peanuts, and that each variety will produce a butter of a quality and flavor distinctly its own. The same may be said of butter made from blends of two or more varieties or grades of peanuts. Also that the care used in the cleaning and preparing of the peanuts has its effect on the quality.

"Thus, to the experienced person, the difference in the taste of the butter is as noticeable as that of the beverages prepared from different grades or blends of coffees. Just as the cheaper grades of coffee produce an inferior drink, from a standpoint of flavor and quality, as compared with the better grades, so it is with the use of lower grades of peanuts in making peanut butter. Low grade peanuts, as a rule, contain a larger percentage of impurities than the No. 1 grades, and they are, therefore, more difficult to clean.

"The two principal varieties of peanuts grown in the United States are the 'Spanish' and the 'Virginia.' The former variety is grown largely in the States of Virginia, North Carolina and Texas, though practically all of the Southern States have more or less soil adapted to this variety of peanuts, and thousands of acres which, heretofore, were devoted to cotton culture, are now used for the growing of Spanish peanuts. The 'Virginia' varieties of peanuts are in size much larger than the 'Spanish' but do not contain as much oil. The State of Virginia produces the bulk of this variety. They are marketed extensively with the shells on. Those that are shelled are usually graded into 'Jumbos,' No. 1's and No. 2's. The shelled 'Spanish' come in No. 1 and No. 2 grades. The prices differ according to grade and variety. Then there are different kinds of imported peanuts, as the 'Chinese,' 'Japanese' and 'Javas,' each variety having its distinct individuality and flavor.

"No. 1 Nuts Make No. 1 Butter: The No. 1 grades of our domestic, or home-grown, peanuts are generally considered as productive of the best flavored peanut butter. However, the 'Chinese' are a very close second. While they resemble in size our 'Virginia' Jumbos and No. 1 varieties, they contain a greater per cent. of fat and, in that respect, even surpass our 'Spanish.' The 'Chinese' are used extensively, if not exclusively, along the Pacific Coast and the quality of butter produced there is of the highest.

"Process Not a Secret One: It is thought by some that the process of making peanut butter is a secret one and that it is necessary to mix with the peanuts olive or some other kind of vegetable oil, flour, cornmeal, bread crumbs, spices, etc. This is an erroneous idea. In fact, it is usually the product which is entirely free from concoction, made only from clean and first-class peanuts, that has the best flavor and predominates in quality. Wherever there is an inclination to doctor the product it is found that, as a rule, this is clone with the idea of lessening the cost rather than improving the quality.

"The production of a first-class peanut butter depends primarily not only upon the proper selection of the peanuts, but also upon the machinery used in connection with its manufacture. A superior article cannot be produced from inferior raw materials nor with machinery unsuited to the work. With No. 1 peanuts and the proper equipment at hand the process of making high-grade butter is a very simple one." Continued. Address: [President and General Manager, Lambert Machine Co., Marshall, Michigan].

431. Daniel, Florence. 1915. The healthy life cook book. 2nd ed. London: C.W. Daniel, Ltd. 114 p. Index. 17 cm. Series: Healthy Life Booklets, No. 4.

• ***Summary:*** Discusses vegetarianism and English cookery. Contains many ads, including Mapleton's Nut Foods (frontispiece, facing the title page), Eustace Miles Proteid Foods Ltd. (p. 118; 40-42 Chandos St., London, W.C.; Emprote and Popular Proteid), International Health Association, Ltd. (p. 122; Stanborough Park, Watford,

Herts.; Granose [crisp, delicate flakes], Protose, Avenola, Health Coffee [made from cereals], I.H.A. Health Biscuits; "Manufactured in the interests of health and NOT merely for profit"), Manhu Food Co. Ltd. (p. 123; Manhu Flaked Wheat; Manhu Diabetic Foods). Address: England.

432. Lindlahr, Anna; Lindlahr, Henry. 1915. The nature cure cook book and A B C of natural dietetics. 1st ed. Chicago, Illinois: The Nature Cure Publishing Co. xii + 469 p. No index. 21 cm. On cover: Nature Cure Series, Vol. II.
• ***Summary:*** This book is divided into two parts. Part I "Nature Cure Cook Book," is a vegetarian cookbook. Part II is "A B C of natural dietetics." Contents: Part I. Key to our system of recipe marking. Examples of Combination salad, Our health bread, Milk. What constitutes a natural diet. Diet prescriptions made easy for the doctor. A timely warning. Uncooked food vs. cooked food. Cause and cure of beri-beri. Vitamines. Dangers of extreme raw food diet. Raw foods and their medicinal properties. Medicinal vegetables. Simple vegetable salads and dressings. Soups. Salads. Croquettes (baking or roasting is better than frying). Vegetables (the recipe for "Chop Suey (2)," p. 209, calls for 1 can protose. "Add Chinese sauce (Soy) if desired"). Desserts (many recipes use 1 cup sugar). Cereal foods (incl. Graham flour, whole wheat flour, Protose). Dr. Lindlahr's health bread (p. 277-78). Leguminous foods (dangerous because they contain an abundance of "the negative, acid-forming proteid and starchy elements," p. 284). Rice, macaroni, spaghetti. Dairy products ("There is something in animal food which, we cannot secure from purely vegetable food,–and that is the animal (magnetic) life element, or, as we usually call it, the animal magnetism." Dairy products are good, but meat is bad). Eggs (use in moderation; best eaten raw, soft boiled, or poached. "Prolonged boiling or frying coagulates the albumin, making it hard and tough and therefore less digestible"). Sandwiches (incl. "Peanut butter sandwiches"). Beverages. Sample menus.

Part II, titled "A B C of Natural Dietetics," with 13 chapters, is about the benefits of a vegetarian diet and lifestyle. Chapters include: 1. Two sides to every question: Why we favor a vegetarian diet. Why we sometimes deviate from a strictly vegetarian diet. What are the indications of meat requirement? Why vegetarianism will triumph in the future. 2. Is it worth while to pay attention to diet? What is natural food? 3. For what do we eat and drink? Is vital force derived from food, medicines and tonics? "Vital force" active after death in spiritual body. 9. The magnetic properties of foods. 10. Polarity of foods and medicines. 11. Classification of foods according to the electro-magnetic qualities (animal foods are positive, legumes are very negative).

"This cookbook is based on the system of dietetics originated by the German School of Nature Cure. Drs. Lahmann, Hensel and others found a solution to the problem of scientific food selection which stands every test of theoretical inquiry and of practical application." "We have divided all food materials into the following five groups: Group I (St.) Starches. Group II (S.) Sugars, dextrine. Group III (F.) Fats, oils. Group IV (P.) Proteins, albumin, gluten, myosin, hemoglobin, etc. Group V (M.) Positive mineral elements: Potassium, sodium, iron, lime, magnesium, manganese, lithium, etc." (p. 5)

"Every recipe in this cook book, underneath its title, will be marked in such a way as to show the various food elements which it contains, in the order of their amount and importance."

A natural diet "must conform in its component elements to the chemical composition of milk or red (arterial) blood." Thus half of the food materials must be of Group V (Mineral Elements) and half from groups I through IV (p. 6).

"A timely warning:... Do not become finical or hypochondriacal over this matter of food selection and combination" (p. 9). The authors generally recommend uncooked or raw food–but not exclusively. "Nature did not create man with a cookstove by his side. Man existed on this planet for ages before he knew how to start a fire..." (p. 11).

"A mixed cooked and raw food diet, with liberal allowances of the dairy products, seems to agree best with the majority of our friends" [patients]. "We recommend, and serve in our Sanitarium regimen, one meal daily consisting of raw foods only. All the juicy fruits and vegetables that can be relished and digested in the natural state are not only excellent foods, but the best medicines for the human body" (p. 16-17).

Gluten flour and Protose are discussed on p. 272-733.

The red blood [in the arteries] carries into the body the various nutrients, and comes back laden with poisonous gases, broken down cell material, and devitalized food products (wastes). This debris is carried in the venous blood to the various organs of depuration and excreted in the form of feces, urine, mucus, perspiration, etc... The meat-eater, therefore, has to eliminate, in addition to his own morbid waste products those of the animal carcass" (p. 339). "The American suffers from uric acid and phosphoric acid poisoning..." (p. 347).

"What is natural food? We have endeavored to define this term as follows: '"Natural" for animal and man is that food which appeals to the senses of sight, taste and smell in the natural condition, as it comes from Nature's hands.' Any food which needs disguising by cooking, spicing, pickling, etc. is not 'natural'" (p. 359).

On the last pages of this book are five ads: (1) Nature cure by mail, from The Lindlahr Nature Cure Institutes, Inc., Chicago. (2) Lindlahr College of Nature Cure and Osteopathy (3 year course; also Nurses' training course, six months' condensed course, and quiz courses for State Board Health Exams), same address. (3) The Lindlahr Nature Cure Institutes, Inc.–one in Chicago and one in the country–the beautiful Elmhurst Health Resort, a 40-minute

© Copyright Soyinfo Center 2021

ride by Electric car from Chicago's center. Two full page photos (on unnumbered pages near rear of book) show the sanitarium in Chicago and the resort at Elmhurst. "Some of our healing factors: Pure food diet, water cure treatment, open-air, light and air baths, massage, osteopathic and magnetic treatments, mud baths for rheumatism, corrective gymnastics and breathing exercises, mental therapeutics and normal suggestion (on a common-sense, scientific basis), scientific relaxation, homeopathic and simple non-poisonous herb remedies, diagnosis from the eye [iridology]. (4) Carqué Pure Food Co., Inc., 1603 So. Magnolia Ave., Los Angeles, California. "From California's sunkissed orchards direct to your table... Black mission figs, Unsulphured white figs, Unsulphured calimyrna figs, Large prunes, Muscatel cluster raisins, Unsulphured apricots, Assorted dried fruits." 10 pounds for $1.50 to $2.00 postpaid. Also nuts, olive oils, honey, unfermented grape juice, and books on hygiene and dietetics. (5) *Iridology: The diagnosis from the* [*iris of the*] *eye*, a book by Henry Lindlahr. 156 pages, 70 illustrations.

Henry Lindlahr was a physician (M.D.) who lived 1862-1924. The eleventh edition of this book was published in 1918 in Chicago by the same publisher. The 15th edition, published in 1922 in Chicago by the Lindlahr Publishing Co., was titled *The Lindlahr Vegetarian Cook Book and A B C of Natural Dietetics.* The 18th edition (535 pages) was published in 1926 with the same title and publisher. Address: 1. Mrs.; 2. M.D. Both: The Lindlahr Nature Cure Institutes, Inc., 525-29 Ashland Blvd., Chicago, Illinois.

435. Postum Cereal Company, Ltd. 1915. Good things to eat from Wellville: Dainty dishes made with Postum Products. Battle Creek, Michigan. 48 p. Illust. Index. 17 cm.
• ***Summary:*** On the front cover of this color booklet is a round illustration of a girl feeding her doll with a spoon. On the back cover is a color illustration of a "Portion of the administration building of Postum Cereal Co., Ltd." The Introduction states that the company has big factories at Battle Creek, Michigan; they are impressive to the many visitors. The company's leading products are: Postum (a pure-food drink made from roasted wheat and wheat bran plus molasses). Grape-Nuts (a breakfast cereal made from whole wheat and malted barley flours). Post Toasties (a breakfast cereal made from flaked corn). Post Tavern Porridge (made from corn, wheat, and rice).

Contains recipes for the following (each using a Postum product): Soups. Meats and entrees. Vegetable dishes. Salads. Salad dressings. Breads & sandwiches. Pastries. Cakes. Desserts. Custards. Puddings. Jellies. Sauces for desserts. Candies. Drinks. Breakfast dishes. The recipes were compiled and tested by Minnie Alice Emmons. Address: Battle Creek, Michigan.

436. Carqué, Otto. 1915? The folly of meat-eating: How to conserve our food supply. A plea for saner living. Los Angeles, California: Published by the author. 17 p. Illust. 22 cm. Undated. Facsimile edition reprinted in 1970 by Provoker Press. *
• ***Summary:*** This booklet, originally written in the 1910s, presents economic, ecological, and nutritional arguments for vegetarianism. It is bound together with *Food Preservation and Fruitarianism: The Social and Economic Aspects of the Meatless Diet* by Henry E. Lahn. Address: Los Angeles.

437. Thrasher, Marion. 1915? Long life in California. Chicago, Illinois: M.A. Donohue & Co. 130 + vii-x p. Illust. 19 cm. *
• ***Summary:*** A book about centenarians (people who are 100 years old or older) in California in about 1900. No copyright or publication date is given but the preface was written in 1915. Address: M.D.

438. *Los Angeles Times.* 1916. Will push campaign: Actors' Fund movement to be carried on vigorously among motion-picture folk of this locality. Jan. 2. p. V10.
• ***Summary:*** A California campaign will work to raise funds to be added to those secured by the national committee of the endowment of the Actors' Fund of America. They will begin work at once among the thousands of motion-picture actors in Southern California. The committee is composed of well-known theatrical people and film makers, including Clarke Irvine.

Note: This is the earliest document seen (July 2021) concerning Clarke Irvine, health food pioneer in California.

439. *Herald of Health and Naturopath* (*New York City*). 1916-1922/-. Serial/periodical. Published in New York City by Benedict Lust, M.D., of the American Naturopathic Association. This new title starts with Vol. 21, No. 1 (Whole No. 267). Jan. 1916.
• ***Summary:*** Preceded by *Naturopath and Herald of Health.* The "Herald of Health and Naturopath" and the "Naturopath and Herald of Health" seemed to have been appear cut from the same cloth. These two titles were flip-flopped a few times

throughout their history. Here is what the National College of Natural Medicine Library (NCNM, Portland, Oregon), which has the full set, has in their collection:

Naturopath and Herald of Health–1902-1915.
Herald of Health and Naturopath–1916-1922.
Naturopath–1923-1927 (appears to be same publisher as above)
Naturopath and Herald of Health–1935-1944.
Herald of Health and Naturopath–1947-1957.

Kirchfeld & Boyle. 1994. p. 208, 313. This was the official publication of the American Naturopathic Association.

OCLC says: This periodical was published from 1916 to 1922 by Benedict Lust of the American Naturopathic Association. It started in Jan. 1916, with Vol. 21, No. 1, whole no. 267-. Preceding title: *Naturopath.* Address: New York.

440. *Los Angeles Times.* 1916. The human body: Its care, use and abuse. Aids to good health, by a medical man. May 21. p. IM28. Sunday magazine. [1 ref]
• ***Summary:*** The section titled "Modern bread and deficiency diseases" discusses an article in the *Journal of the American Medical Association* on this subject. "These investigators show that the modern methods of milling remove the bulk of the vitamins."

Note 1. This is the earliest article seen (July 2021) in the *Los Angeles Times* that mentions the word "vitamins" (or "vitamines").

Note 2. This column by a "medical man" seems to be designed as an antidote to the popular "Care of the Body" column, which began in this newspaper in Sept. 1899 and was written by Harry Ellington Brook, a naturopathic doctor, from April 1908 to 1924.

441. *Chicago Daily Tribune.* 1916. New incorporations. June 1. p. 23.
• ***Summary:*** "Berhalter Health Foods company. Chicago; capital $200,000; incorporators, Anthony A. Berhalter, Katherine Berhalter, Robert F. Minor."

442. Kingsley, Grace. 1916. Drama. *Los Angeles Times.* Sept. 28. p. I-13.
• ***Summary:*** This is a sort of early humor and gossip column. The section titled "Sky's the limit" states that Clarke Irvine is a correspondent for the World, "scenario writer, publicity expert, professor of pinochle, and champion cosy-corner fusser." He has just purchased a new sky-blue car.

443. *Chicago Daily Tribune.* 1916. The Tribune investor's guide. Nov. 8. p. 18.
• ***Summary:*** The section titled "Berhalter Health Food" is a reply to an inquiry from M.M. "The Berhalter Health Food Store, which operated as a partnership from 1907 till this year, has incorporated for $200,000 and is selling part of the stock to help finance the construction of a large bakery. Present earnings are said to be at the rate of $1,000 a month. A purchase of stock would be participation in a business venture which has been successful thus far..."

444. Emerson, John; Loos, Anita. 1916. His picture in the papers (Motion picture). *
• ***Summary:*** This is a very early black-and-white U.S. silent film starring Douglas Fairbanks, who plays "a vegetarian health-food tycoon." It was written by John Emerson and Anita Loos, directed by John Emerson, and produced by Fine Arts Film Corp.

According to the AFI (American Film Institute) Catalog of Silent films (www.afi.com): "Meat-eating Pete Prindle has always been an embarrassment to his wealthy vegetarian father, Proteus Prindle. As a result, when railroad baron Christopher Cadwalader insists that in order to marry his daughter Christine, Pete must have a half-interest in Proteus' health food empire, Pete's bachelorhood seems assured. Proteus gives in somewhat, however, and, after admiring the testimonial given to vegetarianism by his daughters Pansy and Pearl in the *Vegetarian Gazette,* he tells Pete that he can have the half-interest if he manages to get his picture in the papers. Pete then swims to shore from a steamer, wrecks his car and beats up a champion boxer, but he can never get the publicity he wants. Then, when he prevents a train from being derailed by a gang of thugs, the media make him a national hero. As a result, he gets his picture in the papers, he gets his half interest, and he gets married."

445. Emmons, Minnie Alice. 1916. Good things to eat from Wellville: Dainty dishes made with Postum products. Battle Creek, Michigan: Postum Cereal Co., Ltd. 45 p. Illust.
• ***Summary:*** This is a book of recipes. Many are not vegetarian.

446. Joslin, Elliott Proctor. 1916. Treatment of diabetes mellitus, with observations upon the disease based upon one thousand cases [5th ed.]. Philadelphia and New York: Lea & Febiger. xvi + 17-440 p. 25 cm.
• ***Summary:*** Joslin (lived 1869-1962) recommended the use of Hepco Flour, a soybean product, in his diabetic diets. Page 397 states: "Soya bean is also extensively used, and probably deserves a still wider introduction into the diabetic diet. It is used in the manufacture of Hepco Flour." Page 400 states that "soy bean meal" [probably soy bean flour] contains 34.0% carbohydrates. "Ralston Health Food" is a type of "Cereal breakfast food." Page 402 notes, under "fresh vegetables," that soy beans [i.e. green vegetable soybeans] contain on average 28.0% carbohydrates (range 19.3-39.0%).

In the section titled "Composition of so-called diabetic foods" (p. 406-17) the author notes that such foods have been more thoroughly studied at the Agricultural Experiment

© Copyright Soyinfo Center 2021

Station in New Haven, Connecticut, than elsewhere. The lengthy list that comprises most of this section is based on original analyses found in Connecticut Agricultural Experiment Station Reports, for 1913, Part 1; for 1914, Part 5, and for 1915, Part 5. The table contains the following columns: Date of analysis. Manufacturer and brand. Protein per cent. Carbohydrate per cent. Fat per cent. Starch per cent. and Calculated calories per 100 grams. The following contain soy: Cereo Co., Tappan, New York: Soy Bean Gruel Flour (1913 [date of analysis]). Health Food Co., New York: Protosoy Soy Flour (1913, 1914), Protosoy Diabetic Wafers (1913, 1914). Jireh Diabetic Food Co., New York: Soja Bean Flour (1913). Theo. Metcalf Co., Boston, Massachusetts: Soja Bean Meal, 18% starch (1913). Waukesha Hepco Flour (1913).

A large number of companies in the USA and Europe make products containing gluten; among these are The Kellogg Food Co. in Battle Creek, Michigan. The Nashville Sanitarium Food Co. in Nashville, Tennessee makes Malted Nut Food, Nut Butter, Nuteysa, and Nutfoda.

A list of 13 peanut butter manufacturers is given (p. 415), including The Kellogg Co. (Battle Creek, Michigan), Beech-Nut Packing Co. (Canajoharie, New York), and H.J. Heinz Co. (Pittsburgh, Pennsylvania). The fat content of the various brands ranges from 42.8% to 51.3%; Kellogg's is 49.7%. Two companies whose peanut butter was analyzed in 1899 were: Atlantic Peanut Refinery, Philadelphia, Pennsylvania, and Peanolia Food Co., New Haven, Connecticut.

Special protein preparations include Soson and Tropon (made in Germany), and Plasmon (made in London, England). Address: Asst. Prof. of Medicine, Harvard Medical School, Massachusetts.

447. Thayer, Gilbert. 1916. Perfect health and how to attain it: or, The secret of health without drugs. Lafayette, Indiana. 71 p. Illust. *
Address: Lafayette, Indiana.

448. *New-York Tribune.* 1917. Wilson may try rookies' diet: Calory meals at White House hang on wife's consent. Health Food Day president's plan. Jan. 24. p. 2.
• ***Summary:*** President Woodrow Wilson "is in favor of setting aside one day a year as a National Health Food Day. He said it would be a good thing for every person in the country to study food values and household efficiency for at least twenty-four hours a year."

"Mrs. Eula McClary, who interested the president in the diet test, has promised to have a menu, especially for the President's use, prepared by the food experts who have made out the rookies' daily calorie programme."

Note: The National Health Food Day never happened. To see why, read Mrs. Eula McClary's obituary in this newspaper on 14 Sept. 1946 (p. 5).

449. Carque, Otto. 1917. Infantile paralysis. *Herald of Health and Naturopath* (*New York City*) 22(1):[553]-60. Jan/Feb.
• ***Summary:*** "Infantile paralysis is a functional disease of the spinal cord, and according to medical authorities, like any other endemic or epidemic disease, it is caused by a specific germ. It is needless to say that I do not share this view."

"There is no doubt that infantile paralysis is caused by eating too many white flour products, artificial sweets [with white sugar] and the use of cow's milk, particularly pasteurized milk." Those having contracted infantile paralysis should eat "fresh fruits, fresh fruit and vegetable juices, with their abundant supply of organic salts,..."

450. *Tennessean* (*The*) (*Nashville, Tennessee*). 1917. Classified ad: Just opened. Vegetarian Cafeteria and Health Food Store... April 24. p. 7.
• ***Summary:*** "... at 137 Sixth Ave., N. Main 4193."

Note: This vegetarian cafeteria is run by the Nashville Agricultural Normal Institute (NANI)–known as Madison College after 1937. Address: Nashville, Tennessee.

451. U.S. War Department. 1917. World War I draft registration card for Paul C. Bragg. Washington, DC. June 5.
• ***Summary:*** This government record shows: Name in full: Paul C. Bragg. Age 22. Home Address: 2435 N. New Jersey, Indianapolis. Date of birth: Feb. 6, 1895. Place of birth: Batesville, Indiana, USA. Present occupation: Insurance agent. Employer: Metropolitan Life Ins. Co., 1411 Merchant's Bank Bldg., Indianapolis (?). He is married and his wife is Caucasian. He is a private in the National Guard, where he has served for 3 years in Washington, DC. He requests a deferment from war duty because he has a dependent wife. Signed: Paul C. Bragg. Date: June 5, 1917.

Note: To see an image of this card Google: Wade Frazier Paul Bragg Legacy.

Note 1. Letter from Charlene Keck of Ripley County Health Department, Vital Records Division, Versailles, Indiana. 2006. Feb. 15. Their records for births and deaths start in 1882, but they do not have a birth record for Paul C. Bragg born on the date and at the place shown above. However, Batesville is divided between two counties: Ripley Co. and Franklin Co.

Note 2. Talk with Angie, the vital statistics expert in the Franklin County Health Dept. Their records for births and deaths also start in 1882. She just looked but was unable to find a birth record for Paul C. Bragg born on the date and at the place shown above. She concludes that he probably does not have birth certificate; quite a few people born in Indiana at that time do not. The system was very loose and unofficial in those early days.

registration card for Anthony Albert Berhalter. Washington, DC. Sept. 12.
• ***Summary:*** This government record shows: Name in full [signature]: Anthony Albert Berhalter. Permanent home address: 1210 Drafar (?), Chicago, Cook County, Illinois. Age in years: 40. Date of birth: October 30, 1878. Race: White. U.S. citizen: Yes, naturalized.

Present occupation: Baker. Employer's name: Berhalter Baking Co. Place of employment: 130125 Diversay Ave. (?), Chicago, Illinois. Nearest relative: Mrs. Berhalter, wife. Address: 1210 Doafamat (?), Chicago. I affirm that I have verified above answers and that they are true [signature]: Anthony A. Berhalter.

453. Carqué, Otto. 1917. The folly of meat-eating: How to conserve our food supply. A plea for saner living. Chicago, Illinois: Kosmos Publishing Co. 18 p. Illust. 21 cm. 25th Thousand.
• ***Summary:*** The first 16 pages of this interesting book are as described by the author and title above. Copyright 1904 by Otto Carqué, this booklet is quite similar to the booklet titled *An appeal to common-sense: The folly of meat-eating. A reply to an editorial of the New York and Chicago Evening American and San Francisco Examiner. 3rd ed.*, by the same author, except for the following: (1) The first and last parts of the title have been omitted. (2) All the ads on the inside front cover are different (see below). (3) All the text on page 3 and the first 2 paragraphs on page 4 are different. Thereafter, all the text to the end of page 16 is different.

Page 17 is titled "Food preservation and fruitarianism: The social and economic aspects of the meatless diet," by Henry E. Lahn, M.D.

The top two-thirds of page 18 contains many circle charts showing the value (in dollars), supply and consumption of fruits, imported food, vegetables, meat foods [animal products] (incl. dairy products, honey, fish, oysters) and grain foods (incl. peas and beans). The bottom one-third contains two graphs: (1) Meat supply: 1850-1900. Animals per 100 persons. All have decreased–hogs from 118 to 43, sheep from 94 to 50, and cattle from 25 to 20. (2) Vegetable foods: 1850-1900. Bushels per 100 persons. All have increased–wheat from 430 to 600, potatoes from 283 to 356, corn from 252 to 333, and oats from 90 to 362. In short, just what a vegetarian would have hoped for.

The last three pages are titled "Books on natural life and rational cure." Book categories: Diagnosis. Diseases. The medical question. Fasting. Mental therapeutics and new thought. Naturopathy. Miscellaneous. Sexology. German-language publications (by F. Anlicker, Bilz, Bunge, A. Ehret, A. Erz, Dr. J. Heininger, Elbert Hubbard, Dr. K. Kabisch, A. Just, E. Koehler, Father Seb. Kneipp, Dr. Henry E. Lahn, Dr. B. Lust, R. Richter, Dr. F. Schoenberger and W. Siegert, D. Spohr, and A. Uhlig). All are available from The Nature Cure Publishing Co., Butler, New Jersey, Benedict Lust, N.D., M.D., Proprietor. Branches in New York City and Orange County, Florida.

The back cover is a full-page advertisement for Carque's Pure Food Co., 1605-1607 South Magnolia Ave., Los Angeles, California. They specialize in sun-dried black mission figs, and have a complete line of selected California dried fruits, nuts, nut butters, fruit juices, olive oil, olives, honey, natural whole rice, etc. These foods "have been selected and prepared with especial care... to which Mr. Carqué has given years of study and research."

On the inside front cover are four more ads: (1) J.H. Heisser, Minneapolis, Minnesota. Dealer in natural products, such as: "Natural brown rice." Natural brown rice polish. "Stone ground w.w. [whole wheat] flour. Stone ground corn meal. Unsulphured black figs, prunes, peaches, raisins, etc. Minnesota wild rice. Alfalfa products. Malt and banana coffee. Banana products... Nut oils. Grinding mills. Fruit presses. Shredders. Honey. Fruit driers. Bottle cappers. Water stills. Books on diet, health, salt, sugar. Vegetarian cook books, etc." (2) The book *Unfired Food and Trophotherapy,* by George L. Drews. (3) Hercules Hygienic Supply House, Chicago, Illinois. "General clearing house for health foods, books, appliances and apparatus." (4) Carqué Pure Food Co. (Inc.) "Carque's pure natural food products" (1605-1607 South Magnolia Ave., Los Angeles). The company sells unsulphured fruits, black mission figs, white figs, calimyrna figs, almonds, nut butters, olive oil, honey, fruit juices, natural whole rice, whole wheat flour, nut and grain mills, literature on dietetics and hygiene. Otto Carqué lived 1867-1935.

Note 1. This is the earliest document seen (July 2021) that gives the address of Carque's Pure Food Co. as 1605-1607 South Magnolia Ave. in Los Angeles.

Note 2. This is the earliest document seen (July 2015) that mentions a food product or products ("Alfalfa products") made from alfalfa. Unfortunately no details are given. Address: Los Angeles, California.

454. Hall, George W. 1917? Food in war time–Vegetarian recipes for 100 inexpensive dishes. London: G. Bell and Sons, Ltd. 48 p. Reprinted in 2006 by Read Books. *
• ***Summary:*** This book retails for only one penny. Page 41: Ad by the "The International Health Association, Ltd., Stanborough Park, Watford, Herts." They make Granose, Protose, Avenola, Nuttolene, Health Coffee (made entirely from cereals), I.H.A. Biscuits. "Everybody who studies his health should become acquainted with our Health Foods, for they are manufactured in the interests of health and not merely for profit. For sale at all Health Food Stores and leading Grocers."

"I.H.A. foods are the very basis of food reform. They were the pioneers of the movement in this country and still stand unrivalled."

455. Lindlahr, Henry. 1918. How I became acquainted with nature cure. *Herald of Health and Naturopath* (*New York City*) 23(1):21-29. Jan.
• ***Summary:*** A good autobiography. A large portrait photo shows Henry Lindlahr. To be continued. Address: M.D., N.D., Chicago, Illinois.

456. *Peanut Promoter* (*The*) (*Houston, Texas*). 1918. Peanut butter notes. 1(2):28-29. Jan.
• ***Summary:*** Contents: Peanut butter to the rescue (peanut butter is a very economical source of energy/calories). Peanut butter facts. Peanut butter as a food. Use more peanut butter. Peanut butter bread. Homemade peanut butter.

"Twenty-five years ago [i.e. in 1893] peanut butter was unknown. It is claimed that the first effort to place it on the market was made in 1896, and then only as a health food. The real growth of the industry dates from 1904, when there were only a half dozen small-sized factories making it in the United States. Today hardly a northern city of any size but has one or more peanut butter factories, while the largest factory located in New York State has a capacity of 15 tons daily."

"Use more peanut butter: The more general use of peanut butter as a substitute for ordinary butter and the more expensive jams and jellies is strongly urged by the Food Administration."

457. Lindlahr, Henry. 1918. How I became acquainted with nature cure (Concluded). *Herald of Health and Naturopath* (*New York City*) 23(2):122-30. Feb.
• ***Summary:*** Contents: The law of periodicity. Treatment of acute disease. The unity of disease and cure. The natural treatment of wounds and open sores. The treatment of chronic diseases. Photos show: (1) Dr. Lindlahr's Nature Cure College and Sanitarium, Chicago, Illinois; (2) Dr. Lindlahr's Health Resort, Elmhurst, Illinois. Address: M.D., N.D., Chicago, Illinois.

458. Carque, Otto. 1918. The building stones of the body. *Herald of Health and Naturopath* (*New York City*) 23(4):332-35. April.
• ***Summary:*** Includes a discussion of organic salts. Address: [Southern California].

459. *Herald of Health and Naturopath* (*New York City*). 1918. Great pioneers: A series of short sketches of the lives of great men. 23(5):446-47. May.
• ***Summary:*** The four men (all Germans) are: (1) Prof. F.E. [Friedrich Eduard] Bilz. He was given a castle by a wealthy patron and it became the famous Bilz institution at Dresden-Radebeul. (2) Dr. Katz. As Surgeon-in-Chief of the Prussian Army, he became convinced that antiseptics were more damaging than they were of benefit. He preferred normal salt solutions. He founded a Nature Cure Sanitarium at Hoehenwaldau-Degerlach, near Stuttgart, Germany. (3) Dr. Heinrich Lahmann. Expelled from the University of Leipzig for "spreading medical sedition among the students." He later founded the world's largest Nature Cure institution at Weisser Hirsch, near Dresden, Saxony. "His works on diet are authoritative and his 'nutritive salts theory' forms the basis of rational dietetic treatment. This work has but recently come to light in America and progressive dietitians [such as Otto Carque, Henry Lindlahr, and Alfred McCann] are forsaking their old, worn-out, high-protein, chemical and caloric theories for the 'organic salts' theory."

(4) Louis Kuhne, author of *New Science of Healing* (1861), "the greatest work of Basic Principles of rational Healing. "He is the founder and first Master of Naturopathy. A large illustration shows Bilz, and a portrait photo shows the other three men.

460. *Los Angeles Times.* 1918. Wheatless bread loaf for Hoover. Prize-winning Pasadena baker sends formula to food chief. July 18. p. II3.
• ***Summary:*** "Local correspondence. Pasadena. July 18. Fred Hoover at Washington [DC] is to receive a loaf of crown city wheatless bread baked in accordance with a $100 prize-winning formula by William Cook. Bakers from all parts of Southern California entered the contest, which was for the purpose of producing the best loaf possible from the less expensive of the wheat substitutes. Cook, the winning baker, is in the employ of a local confectionery.

"It is possible that Hoover will see fit to submit the formula to the entire country after it has been tried out in the government bake shops and laboratories. The formula follows in three parts, like a historical novel, a story of yeast, potatoes, tapioca, barley and corn, all in a big mix-up to defeat Germany.

The main ingredients, in descending order of predominance, are barley flour (6 lb), milo maize flour (commercially called milo flour, 4½ lb), and tapioca flour (1 lb). The sponge method is used, with both yeast and baking powder.

Note 1. William Cook was born Wilhelm Koch. This prize was his big break, that also set the tone for the rest of his life–baking specialty wheat-free breads. He later changed his name to William "Bill" Baker and lived much of his life in nearby Ojai, California.

Note 2. This is the earliest document seen (July 2021) concerning Bill Baker.

461. Walker, Norman Wardhlaugh. 1918. Petition for Naturalization (to become a citizen of the United States of America). New York, NY. Aug. 6.
• ***Summary:*** He repeats herein much of what he declared in his Declaration of Intention of 20 Dec. 1915, except he is now living at 94 Grove Street, New York City and that his occupation is "aviator". He also again states that he was born

© Copyright Soyinfo Center 2021

in Genoa, Italy on Jan. 4, 1886, but a "British Subject." He says he is married, that his wife's name is "Margaret Oleott" (I mistakenly read "Scott" on his Draft Registration form, but this Petition was typed, so much easier to read); she was born on 26 July 1888 in the U.S.A., and she "now resides at Farmingdale, L.I." (I presume that's Long Island, but it's unclear why her address is different than his); he has no children.

His two witnesses, Mabel & Grace Negley of New York City state that they personally know Norman W. Walker has been a resident of the U.S.A. for the required five years.

Note: On November 22, 1918, Norman Wardhaugh Walker took an Oath of Allegiance to the United States and was admitted to citizenship by the New York County Court that day under Certificate of Naturalization No. 920727.

462. *Peanut Promoter* (*The*) (*Houston, Texas*). 1918. Peanut butter: Peanut butter facts. 1(9):53. Aug.
• ***Summary:*** "Trade interest in peanut butter as a typically American substitute food leads Simmons Spice Mill to publish some interesting facts about this product. Twenty-five years ago peanut butter was unknown. It is claimed that the first effort to place it on the market was made in 1896, and then only as a health food.

"The real growth of the industry dates from 1904, when there were only a half dozen small-sized factories making it in the United States. Today hardly a northern city of any size but has one or more peanut butter factories, while the largest factory located in New York state has a capacity of 15 tons daily.

"There are many grades of peanut butter, classed according to the grade of nuts used, the amount of oil they contain, and the method of manufacture. There is no secret about processes, and the product, contrary to popular notions, is made only from good peanuts without the addition of other ingredients than salt. High grade peanut butter will retain its sweetness and flavor for many months in airtight packages."

Note: The main office of this publication officially changed from Houston, Texas, to Suffolk, Virginia, with Volume 2, issue No. 9 (Aug. 1919).

463. Central High School. 1918. Echo (Yearbook). Superior, Wisconsin. See p. 27.
• ***Summary:*** On page 27 are portrait photos and sketches of five students, all seniors. "Mildred Lager–English.

"She is the embodiment of perpetual motion."

"Athena 1, 2, 3, 4. Dream Pictures 2. Joan of Arc 2."

Source: Superior Public Library.

464. *Madison Survey* (*Madison, Tennessee*). 1919. The triple alliance. 1(1):2. Feb. 26.
• ***Summary:*** "The triple alliance is complete when a health food factory is conducted in connection with a school and a sanitarium, and the three are located on the land...

"Never in the history of our country has there been such a demand for vegetable meats. Scientists are experimenting with new vegetable products and new processes of food combination. The school at Madison has had its experience in raising soy bean and other leguminous crops, and has recently begun the manufacture of health foods."

Note 1. *The Madison Survey* began publication on 26 Feb. 1919 and was still being published quarterly (circulation 800+) in March 1993.

Note 2. This is the earliest document seen (May 2017) to mention a "health food factory" in conjunction with the school at Madison, Tennessee. The school grows many of its own soybeans, and serves the foods at the school and sanitarium (hospital oriented to prevention).

465. *Los Angeles Times*. 1919. Cookless food city's latest: "Restauraw" serves unbaked bread and unfired pie. Wilson and Debs vis-a-vis in mural decorations. Delicate appeal to all of "unperverted taste." April 7. p. II3.
• ***Summary:*** "The genuine 'restauraw' has been discovered. Just what there may be in common between raw food and revolution it would probably require a logician of the first order to determine. Nevertheless the two seem to have gone into partnership at a raw-food dining room on South Olive street. At this unique cafe, at which coffee is never served, the patron is provided with uncooked soup, fruit and flower salads, unbaked brawn bread and unfired pie."

On one wall is a large photograph of President Woodrow Wilson. On the opposite is a picture of Eugene V. Debs. On a third wall is a leaflet entitled "The Truth About Russia."

466. Nashville Agricultural Normal Institute, Food Department. 1919. Re: Soy bean and peanut products. Letter to Mr. George Washington Carver, Tuskegee Normal and Agricultural Institute, Tuskegee, Alabama, April 29. 1 p. Typed, without signature on letterhead. [1 ref]
• ***Summary:*** "Yours of April 10 received. We have sent you two cans of our Soy bean product. We also can soy beans in three ways, plain, with tomato, and with nut meat.

"We do not know as anything we have would do to exhibit except our soy bean flour, and that you say you make yourself. We have never seen a sample of the milk though we have tried to make it many times. We would be much pleased to receive a little sample of you. Do you think you can make a success of producing milk from the soy bean? I hope the soy bean food reaches you O.K." Initials Dp or Sp.

Handwritten note on bottom of letter: "Is the wood stain you made from the soy bean of much use? Would be pleased to hear how you are succeeding with these experiments.

Note 1. Names printed at the top of this letterhead are E.A. Sutherland, M.D., N.H. Druillard, W.F. Rocke [farm

manager of the Madison school], and M. Bessie De Graw.

Note 2. Letter from Sam Yoshimura. 1981. March 19. When Sam attended Madison College from 1937-1943 Nut Meat was made from peanuts, water, and seasonings.

Location: Library of Congress, Washington, DC. Microfilm of The George Washington Carver Papers in the Tuskegee Institute Archives, Roll 6 #0152. Address: Madison, Tennessee (near Nashville). Phone: Walnut 1789-W.

467. **Product Name:** Nut Meat (Made from Peanuts).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1919 April.
Ingredients: Peanuts, water, seasonings.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Nashville Agricultural Normal Institute, Food Department. 1919. April 29. Letter to Mr. George Washington Carver, Tuskegee Normal and Agricultural Institute, Tuskegee, Alabama. "Yours of April 10 received. We have sent you two cans of our Soy bean product. We also can soy beans in three ways, plain, with tomato, and with nut meat."

Madison Survey. 1919. July 16. p. 4 "The Food Factory." "A visitor finds the big oven full of crackers, and hundreds of pounds on the cooling racks... The steam cooker is filled with cans of nut meat; mills at the south end of the room are grinding peanut butter, hundreds of pounds; and the blancher, tended by one of the young women, is handling peanuts, not by the pound but by the ton."

Madison Survey. 1922. March 8. p. 3. "Madison Food Factory products." "The food factory puts out Nut Meat, Savory Meat, and Soy Bean Meat."

Note: Madison Foods started in 1918. The first manager and treasurer was Mrs. Nellie Druillard (affectionately called "Mother D"). Mr. and Mrs. Andrew Wheeler were the first in charge of food production.

468. National Biscuit Company. 1919. Display ad: Graham Crackers. *Chicago Daily Tribune.* May 8. p. 13.
• ***Summary:*** "N.B.C. Graham Crackers have health building and digestive qualities which make them the national health food."

469. *Madison Survey* (*Madison, Tennessee*). 1919. Instead of meat. 1(15):3. June 4.
• ***Summary:*** "That it is not necessary to take nourishment in the form of flesh meats is demonstrated all about us. The government is spending thousands of dollars to place before people the food value of different vegetables and other products of the soil. Nothing illustrates this better than the agitation of the soy bean question. Here is an edible seed, that until a few years ago, was practically unknown to our country. The Orient was feeding its multitudes before we were awake to the value of a large class of legumes."

"Miss McKay has returned to Madison after several months at Carthage, Missouri, and she tells of the desire she met from people of all classes to learn how to prepare health foods. In response to urgent requests, she held classes and gave demonstrations. When people wanted to know where to buy foods that will take the place of meat, she told them of the Madison food factory, and of its vegetarian meat and various soy bean products."

470. Grohens, A.P. 1919. Manufacturers of peanut butter. *Peanut Promoter* (*The*) (*Houston, Texas*) 2(7):37, 41, 43. June.
• ***Summary:*** "Twenty-five years ago peanut butter was unknown. It is claimed that the first effort to place it on the market was made in 1896. For several years it was regarded merely as a table delicacy, or of the nature of the so-called health-food. Its consumption was thus necessarily limited until after the breakfast food wave of 1900-1904 had somewhat subsided or was put on a more rational foundation. Thus the real growth of the peanut butter industry dates from 1904. Before that time there were about a half dozen small sized peanut butter factories in the whole United States. Today there is hardly a city in the United States of 30,000 population and over which does not have one or more peanut butter factories, and even in many smaller places we find peanut butter plants doing a thriving business. In fact, so popular has it become as a regular table food that the consumption of peanut butter during the last three years more than equals that of all the previous years combined."

Note 1. This is the "peanut products" edition of this magazine. On the cover are photographs of about 27 different products, including many brands of peanut butter and peanut oil (including Planters), Planters salted peanuts, Planter's Jumbo Block (candy), The Original Peanut Butter Sandwich, etc.

Note 2. This is the earliest document seen (Feb. 2015) by A.P. Grohens, who wrote several interesting early histories of peanut butter. Address: President Lambert Machine Co., Marshall, Michigan.

471. *Madison Survey* (*Madison, Tennessee*). 1919. The food factory. 1(21):4. July 16.
• ***Summary:*** "A visitor finds the big oven full of crackers, and hundreds of pounds on the cooling racks... The steam cooker is filled with cans of nut meat; mills at the south end of the room are grinding peanut butter, hundreds of pounds; and the blancher, tended by one of the young women, is handling peanuts, not by the pound but by the ton."

Note 1. Though soy beans are not mentioned, they were being canned at the food factory by April 1919.

Note 2. Some of this food is probably going to the Nashville Cafeteria.

© Copyright Soyinfo Center 2021

472. **Product Name:** Peanut Butter.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1919 July.
Ingredients: Incl. peanuts.
New Product–Documentation: Madison Survey. 1919. July 16. p. 4 "The Food Factory." "A visitor finds the big oven full of crackers, and hundreds of pounds on the cooling racks... The steam cooker is filled with cans of nut meat; mills at the south end of the room are grinding peanut butter, hundreds of pounds; and the blancher, tended by one of the young women, is handling peanuts, not by the pound but by the ton."

Madison Survey. 1922. June 14. p. 3. "The Food Factory." "A man and his wife, members of the faculty, have charge of the food department, where are manufactured various nut and soy bean meats, malted nuts..., peanut butter, and other health foods."

Note: Madison Foods started in 1918. The first manager and treasurer was Mrs. Nellie Druillard (affectionately called "Mother D"). Mr. and Mrs. Andrew Wheeler were the first in charge of food production.

473. *Madison Survey* (*Madison, Tennessee*). 1919. Food factory. 1(38):6. Nov. 12.
• ***Summary:*** It "has been necessary to raise the price of foods. It is our purpose to make healthful foods, and since this is not a money-making enterprise, prices will be kept as low as possible."

474. *News* (*Frederick, Maryland*). 1919. New "Y" physical director: Paul C. Bragg, Washington, elected at meeting last night. Nov. 12. p. 6.
• ***Summary:*** "At the regular monthly meeting of the directors of the Y.M.C.A. last night, Paul C. Bragg, Washington [DC], was elected physical director and boys' work secretary. He is married and will remove to this city and enter on his new duties December 15.

"Mr. Bragg has considerable experience in the Y.M.C.A. and physical work and comes to the local association highly recommended. For some time he was engaged in physical work among high school boys on Long Island [New York] but more recently has been associated with the Y.M.C.A. in Washington." His plans are discussed.

A similar article mentioning that Bragg was Physical Director of the YMCA in Frederick, Maryland, appeared in the Sun (Baltimore, Maryland) on 12 Dec. 1919 (p. 12). His assistant, Alvin Quinn, has just been appointed.

475. *News* (*Frederick, Maryland*). 1919. Athletic revival by new "Y" director: Paul C. Bragg, in charge of physical activities, plans work. Aquatic and gymnastics. Nov. 18. p. 4.
• ***Summary:*** "Paul C. Bragg, the new physical director and boys' work secretary of the Y.M.C.A., arrived yesterday and began work at once. He is a graduate of the physical director department of the Y.M.C.A. Training School at Springfield, Massachusetts. Since then he has taken summer courses in the physical schools of Cornell [New York], Harvard [Massachusetts], American College of Physical Education, and at National School of Physiotherapy [now called physical therapy].

"His first work was as gymnasium instructor at the Military and Naval Academy at Lake Geneva, Wisconsin. Since then he has had charge of physical work in the Y.M.C.A.'s of Indianapolis, Indiana, and at Washington, D.C., and of physical education in the public schools of Suffolk county, Long Island, N.Y., and physical work in army camps under the Commission of Training Camp Activities during the war."

He plans to introduce new aquatic and gymnastic events, and to teach boxing and wrestling in groups. "At least two afternoons a week in the gymnasium will be given to the ladies. They will also take up volley ball, and swimming."

476. *Madison Survey* (*Madison, Tennessee*). 1919. Medical missionary volunteer activities. 1(43):1-3. Dec. 17.
• ***Summary:*** "A group of workers, including Miss McKay, formerly a member of the Madison faculty, has opened a cafeteria in Birmingham, Alabama. Their card reads: Vegetarian Cafeteria–Number 3. Health Foods. Home Cooking. 117 1-2 N 21st St., Birmingham, Ala. This group has purchased a farm as a rural base for city work."

477. Friedenwald, Julius; Ruhräh, John. 1919. Diet in health and disease. 5th ed. Reset. Philadelphia, Pennsylvania, and London: W.B. Saunders Co. 7-919 p. Illust. 25 cm. [4 soy ref]
• ***Summary:*** Most of the passages cited are similar to the 1913 ed., except for the following: The section titled "The soy bean" is now on p. 135-36. A table (p. 137) shows the "Composition of fresh and dried legumes (incl. soy beans, cow peas, chick-peas, peanuts) with that of other foods." At the top of page 137 are 4 references to soy by Ruhrah (3) and Friedenwald and Ruhrah.

The section on "vegetarianism" (p. 141-42) begins: "Theoretically vegetarians are supposed to subsist on an exclusive diet obtained from the vegetable kingdom, including vegetables, cereals, fruits, nuts, etc. [sic], but as a matter for fact many add milk, butter, eggs, gravies and animal fats. The disadvantages of a strictly vegetable [vegan] diet are too obvious to require comment."

In the chapter on "Infant feeding," the section on "Other food for infants" has a subsection on "The soy bean," which is now on p. 302-03.

In the chapter on "Diseases in which diet is a primary factor" is a section on "Substitutes for bread" (p. 596-

© Copyright Soyinfo Center 2021

97) which includes gluten bread and bran bread. Table 1, "Analysis of diabetic foods," shows (p. 602) that the "Ralston Health Food Co." makes "Gluten flour" which was first analyzed in 1895, then later in 1902-03. The same chapter has a long table titled "Analysis of diabetic foods" (p. 610-13). A 7-day vegetarian diet with a minimum of protein menu is recommended for treatment of cancer by Bulkley at the New York Skin and Cancer Hospital (p. 673-73).

In the chapter on "Recipes" is a section on "Bread" (p. 773-74) which includes whole-wheat bread, zwieback, and bran muffins for constipation. A recipe for Camplin's bran cakes (p. 792) is given. The same chapter has a section on "Soy bean cookery" (p. 798-810) with the same recipes as in the 1913 edition. Address: 1. Prof. of Gastro-Enterology; 2. Prof. of Diseases of Children. Both: Univ. of Maryland School of Medicine and College of Physicians and Surgeons, Baltimore.

478. McCann, Alfred Watterson. 1919. The science of eating: how to insure stamina, endurance, vigor, strength and health in infancy, youth and age. Garden City, New York: Garden City Publishing Co., Inc. xiv + 15-408 p. No index. 22 cm. [40+* ref]

• ***Summary:*** This is an amazing book, full of very interesting revelations related to food, diet and health. For example (p. v-vi): "Following his graduation from the food industry, Mr. McCann received the support of a New York newspaper, *The Globe,* which equipped him with a laboratory and set him free to report the results of his discoveries without regard to their influence upon the Advertising Department. Subsequently forty-one other newspapers in as many cities of the United States took up his work, but so heavy was the pressure applied by advertising agencies that the publishers of all these papers, with one exception, the *Chicago Daily News,* found themselves compelled to discontinue his exposures. In this respect the photographs of original documents showing how truth is suppressed in daily journals, weekly periodicals and monthly magazines are in Mr. McCann's possession, a fitting justification in these days of 'regeneration' and 'reconstruction' for a Congressional inquiry into the nature of the silent influences at work to muzzle the press.

"During Mr. McCann's service on the *New York Globe* he has been made a deputy health commissioner by five municipalities, has been employed by as many mayors and police commissioners to make surveys of the food conditions obtaining in the communities represented by them. He has led squads of plain clothes men and trained field agents, including attorneys and physicians, upon raids that have resulted in scores of indictments, trials and convictions in municipal, state and federal district courts."

"He has initiated two hundred and six successful prosecutions of food adulterators and has never lost a case."

Page 57: In 1918 in the United States draft for World War I: "Of the 1,366,142 men available between the ages of 32 and 45 nearly 450,000 (435,378) are grouped as 'physical rejects,' leaving 601,236 men fit for service.

"Of the 2,568,012 men available between the ages of 18 and 22 nearly 800,000 (770,403) are grouped as 'physical rejects,' leaving 1,797,609 men fit for service."

Basic themes: Companies that process foods adulterate those foods and deceive consumers. Refined foods are a major cause of disease. Contains many case studies.

In 1919 this book was published by four different publishers–all in New York: (1) Eugenics Pub. Co. (2) Truth Pub. Co. (3) Garden City Publ. (4) George H. Duran Co. But the copyright pages states: "Copyright, 1918, 1919, by George H. Doran Company."

Alfred Watterson McCann lived 1879-1931. In 1931, at age 52, he died of a heart attack. Address: [New York City, New York].

479. Thayer, Gilbert. 1919. Perfect health and how to attain it: or, The secret of health without drugs. 10th ed. [sic]. Lafayette, Indiana: Gilbert Thayer. 122 p. Illust. Reprinted in 1919 (11th ed.). *

• ***Summary:*** A popular work about diet and nutrition. Address: Lafayette, Indiana.

480. *Motion Picture News* (*Hollywood*). 1920. Maurice Tourner producer of "Treasure Island" presenting a real skeleton to Clarke Irvine, editor of Goldwyn Studio Skeleton (Photo caption). Jan. 3. p. 442.

• ***Summary:*** This black-and-white full-body photo shows Clarke Irvine (left) and Maurice Tourner with a human skeleton between them. Note: This 8 by 10 inch glossy photo is in the Clark Irvine file at the Herrick Library in Beverly Hills; a copy is owned by Soyfoods Center.

481. U.S. Department of the Interior, Census Office. 1920. Anthony Berhalter and family in the 1920 U.S. Census in Chicago, Cook County, Illinois. Chicago, Cook County, Illinois. 1 p. Enumerated Jan. 8. Line 25. Family No. 105.

• ***Summary:*** Anthony Berhalter is head of household. Home owned or rented: Rented. Sex: Male. Color or race: White. Age at last birthday: 40. Whether single, married, widowed, or divorced: Married. Year of immigration to U.S.: 1890. Whether naturalized or alien: Naturalized. If naturalized, give the year: 1895. Attended school any time since September 1, 1919: No. Whether able to read: Yes. Whether able to write: Yes. Place of birth of this person: Germany. Mother tongue of this person: German. Place of birth of Father of this person: Germany. Mother tongue of Father of this person: German. Place of birth of Mother of this person: Germany. Mother tongue of Mother of this person: German. Whether able to speak English; or, if not, give language spoken: Yes. Trade, profession or particular kind

of work done: Grocer. General nature of industry, business: (blank). Whether an employer, employee, or working on own account: Own account.

His wife is Catherine Berhalter. White female. Age 40. Can read and write. She was born in Illinois. Catherine's mother and father were both born in Germany [sic, Czechoslovakia].

Other household members: Howard Berhalter, son, age 7. He has attended school. He can read and write. He was born in Illinois. His father born in Germany and his mother born in Illinois.

482. *Frederick Post* (*Maryland*). 1920. Y educational program: E.E. Briggs preparing to open night school. Jan. 9. p. 6.
• ***Summary:*** The local Y.M.C.A. is about to begin work on its educational program. "Paul C. Bragg, physical director, announced that he has organized a boys' basketball league of four teams, and that this league will soon open its season."

483. *Frederick Post* (*Maryland*). 1920. Mr. Paul C. Bragg is visiting his brother, John H. Bragg... March 23. p. 5, col. 3, bottom.
• ***Summary:*** "... who is a patient in a hospital for shell shocked soldiers in Washington" [DC].

484. Brook, Harry Ellington. 1920. Care of the body. *Los Angeles Times.* May 2. p. X18. Sunday magazine.
• ***Summary:*** In the section titled "Surplus food causes disease" is a long quotation (8 paragraphs; the source is not given) by Arnold Ehret. He discusses: Overfeeding charges the body with poisonous matter, which manifests itself by various secretions, especially mucus. A drunkard can reach a high age but not a glutton. The poorest countries produce the greatest number of centenarians. "Where everything else has failed, one may gain results by eating less and eating less often. This is slower but more convenient than fasting." "Of course, an absolute fast, graded in severity according to the powers of reaction in a given individual, is the most potent and rapid method of restoring the digestive functions to their normal condition..." Address: N.D. [Naturopathic Doctor].

485. Brook, Harry Ellington. 1920. Care of the body. *Los Angeles Times.* May 9. p. X18. Sunday magazine.
• ***Summary:*** The section titled "Land and food" notes that Malthus, "whose theory is now generally discredited, taught that it was necessary artificially to repress the increase of the human race, by 'birth control,' or the race would be in danger of starvation." Malthus "made the great mistake of not distinguishing between our present method of devoting the land to the raising of cattle, and a natural diet of fruit, nuts and grain, which many believe to be the natural diet of man." A table (from *The Foundation of All Reform*, by Otto Carque) shows the number of pounds of various plant foods that can be produced per acre compared with the weight of beef from range cattle. Bananas 120,000. Apples 25,000. Potatoes 10,000. Peaches 10,000. Corn 1,500. Legumes and peanuts 1,200. Wheat 900. Range cattle 30.

The section on "Unsulphured dried fruits" contains extracts from a letter from Prof. Harvey Wiley, former Chief Chemist, USDA: "The use of sulphured fruits,... is, in my opinion, highly deleterious, and should be prohibited by law."

"For years a Los Angeles man [Otto Carque] has been doing missionary work, in giving the people a chance to eat unsulphured black California figs. Of late he has produced and marketed on a small scale unsulphured apples, pears and peaches and apricots." Address: N.D. [Naturopathic Doctor].

486. Brook, Harry Ellington. 1920. Care of the body. *Los Angeles Times.* May 30. p. X18. Sunday magazine.
• ***Summary:*** The section titled "Where fruit is cheap" contains an extract of a "letter from Emil Bischoff to Otto Carque of Los Angeles, for whom he previously worked. Mr. Bischoff is a vegetarian–or rather a fruitarian. The letter is dated from Cuyutlan, State of Colima:" [on the Pacific coast]. He describes the many fine fruits and related business opportunities "What a formula for an enterprising gringo nature temptingly provides here. There would be millions in it." Address: N.D. [Naturopathic Doctor].

487. Carque Pure Food Company. 1920. Carque's natural pure foods (Ad). *Los Angeles Times.* June 27. p. IX19. Sunday magazine.
• ***Summary:*** "Unsulphured dried fruits, nuts, nut butter, sundried olives, olive oil, honey, fruit juices, whole rice (unpolished); Whole grain flour ground fresh daily by our own mill. Send for descriptive circular and price list."

Note: This is the earliest document seen (July 2021) which mentions that Carque now grinds flour using his own mill. It is also the earliest advertisement seen run by Carque, and the first showing that he has a line of products, described in a circular with price list. Address: Magnolia Ave., S.W. Corner 16th St., Los Angeles, California. Phone: 52269.

488. Raw Food Dining Room (The). 1920. Live food. Live people (Ad). *Los Angeles Times.* June 27. p. IX20.
• ***Summary:*** "The only restaurant serving no salt, sugar, or vinegar. Health drinks–uncooked soup–fruit, flower and vegetable salads–unbaked breads and brawn foods–unfired pies and cakes. All very delicious to the unperverted taste.

"Try our Raisinnut Pemikent. a wholesome unfired cereal food ready to eat. 30¢ per lb. package. Mail orders filled.

Note: This is clearly the same restaurant, previously on South Olive street, described in an article titled "Cookless food city's latest" in this newspaper on 7 April 1919, p. II3. Address: 326 West Second St. [Los Angeles].

489. U.S. Department of the Interior, Census Office. 1920. Paul C. Bragg in the 1920 U.S. Census in Frederick, Maryland, on East 2nd St. Washington, DC.
• ***Summary:*** Paul C. Bragg. Head of household. Age 28. Born in Indiana. Mother born in Indiana. Father born in Indiana. Occupation: Director, YMCA.

Neva Bragg. Wife. Age 26. Born in Indiana. Mother born in Indiana. Father born in Indiana.

Loraine Bragg, Daughter. Age 2 years, 3 months. Born in Washington, DC. Mother born in Indiana. Father born in Indiana.

Neva P. Bragg. Daughter. Age 4 months. Born in Washington, DC. Mother born in Indiana. Father born in Indiana.

Note: This is the earliest document seen (March 2007) showing that Paul C. Bragg is married, has a wife named Neva, and two young children (both girls), separated in age by about 2 years.

490. *News* (*Frederick, Maryland*). 1920. Secy. Briggs and P.C. Bragg resign "Y" posts. July 2. p. 6.
• ***Summary:*** The directors of the YMCA felt that they did not have the revenue to keep employing Mr. Bragg as head of the physical department, so they decided to let him go as a means of reducing expenses. It "was simply a matter of finances." Mr. E.E. Briggs, secretary, felt he could not continue his work without the assistance of Mr. Bragg. Both men tendered their resignations effective Aug. 1.

Mr. Briggs began working at the YMCA in Oct. 1919 "and Mr. Bragg took up his work there about a month later."

Note: A similar article appeared in the *Sun* (Baltimore, Maryland) on 10 July 1920 (p. 3) under the title "Shake-up in Frederick 'Y.'" No mention of money shortages was made.

491. *Daily Courier* (*Connellsville, Pennsylvania*). 1920. The sporting world: Interest in football is picking up among players on the high school team. New physical instructor, Paul Bragg, will be coach of C.H.S. eleven. July 31. p. 6. Saturday.
• ***Summary:*** The Connellsville High School football team will have a new coach when practice begins in a few days. Only six weeks are left before the opening of school. "Paul Bragg, the new physical director, will be in charge of the eleven. He has a reputation of building up winning aggregations..."

Note: Connellsville is about 25 miles southeast of Pittsburgh, Pennsylvania. In 1920 it was a rural coal mining town with a population of about 20,000.

492. Brook, Harry Ellington. 1920. Care of the body. *Los Angeles Times*. Aug. 29. p. X18. Sunday magazine.
• ***Summary:*** The first section, titled "The fasting cure," discusses the health benefits of proper fasting, and the astonishing ignorance that prevails among laymen and medical men alike on the subject of fasting.

The section on "Prohibition boosts raisins" contains a letter from Otto Carque (from Fresno) explaining that since the prohibition law went into effect [16 Jan. 1920] the price of raisins, a wholesome food, has greatly increased. Address: N.D. [Naturopathic Doctor].

493. Brook, Harry Ellington. 1920. Care of the body. *Los Angeles Times*. Oct. 24. p. X18. Sunday magazine.
• ***Summary:*** The section titled "Flesh food" contains a letter from Otto Carque discussing the meat diet eaten by Eskimos. "Anatomically and physiologically the use of flesh food by man is unnatural, a remnant of a by-gone age, and cannot be defended in the light of modern science." Address: N.D. [Naturopathic Doctor].

494. Postum Cereal Company, Inc. 1920. A trip through Postumville where Postum Cereal, Instant Postum, Grape-Nuts, Post Toasties, etc. are made. Battle Creek, Michigan: Postum Cereal Co., Inc. [40] p. Illust. (part color). Port. 27 cm.
• ***Summary:*** There is an image and caption on every page of this book. Charles William Post lived 1854-1914.

Note: There is no indication in this book that a company named the "Battle Creek Health Food Co." ever existed. Address: Battle Creek, Michigan.

495. Shaftesbury, Edmund [pseudonym of Albert Webster Edgerly]. 1920. Life building method of the Ralston Health Club. "All nature" course. The 115th ed. of the Ralston Health Club. Founded on the newly discovered laws of human life. [Hopewell, New Jersey]: Ralston Health Club. 240 p. Index. 24 cm.
• ***Summary:*** The title page states that Edmund Shaftesbury [lived 1852-1926] did not write or edit this book; he "interpreted" it. The "General introduction" (p. 7) states: "The Ralston Health Club was founded in 1876 by seven scientific investigators.; the first meetings were held in laboratories. The early teachings were in lecture-form; afterwards they appeared in manuscripts which were copied by the members; and finally, by general demand, they were issued in books, the first editions being very small."

"A Ralstonite is any person who believes that Perfect Health of Body and Mind is the greatest blessing that can come into the life of any human being. That is the only requirement.

"The Ralston Health Club is the name of a book: this book..." The Ralston Health Club has nothing to sell [except these books {see p. 219, 221, 235}, and one advances by 5 points in the hierarchy of the club by buying a new Ralston book]. This book is filled with numbered rules, laws, and examples. A good diet is the key to good health.

Contents: Creed of the "Ralstonites" ("Ralstonites are

© Copyright Soyinfo Center 2021

those who seek health." Life-Builders are at a more advanced stage of commitment and attainment than Ralstonites). A brief outline ("1. The Ralston Health Club will soon be forty-four years old. 2. It has achieved a success in its line that has never been paralleled in the history of mankind. 3. It has entered three million homes in all parts of the civilized world... 5. Twelve hundred thousand [1,200,000] lives have been saved from the grave"). 1. Origin of humanity. 2. How life is built. 3. Building the body (food should be chewed well and mixed well with saliva, p. 34). 4. Life enemies (Buttermilk and milk are the best foods. Meat has at place in the diet. A list of foods that must never be eaten {p. 61} includes apples, catsup, pickles, spices of all kinds, adulterated foods, preservatives). 5. Facts about food (Tea is a direct poison. Wheat is the king of cereals. The use of medicinal foods and life-building foods will produce an absolutely perfect body). 6. Problems. 7. One-food meals (these are the best kind of meals). 8. A new body. 9. Growing old. 10. Liver influences. 11. Natural cures by the Ralston treatment (Smoking and tobacco cause cancer. Ralston axioms {10}). 12. Warnings ("Do not form the medicine taking habit, nor the pill habit"). 13. Life and death facts.

Organization of the Ralston Health Club: Why organize? Rules of the RHC. Constitution of the RHC. By-laws. The pledge of membership. Agents and reagents (a Reagent is a man or woman who owns a copy of the 115th edition of this book. A Grand Reagent "is any man or women of sufficient influence to organize or secure each one hundred reagents... Each reagent controls 25 members. Inner membership... "made necessary by the Coming Great Change in civilization"). Goal of Creation "is the most important course of reading and study in the famous group of twenty-five dollar courses prepared by Shaftesbury. It is the highest educational system in the world..." How to enter the Temple of Great Achievements (you will be admitted on reaching the Twenty-Fifth Degree). The form page ("I wish to become a Reagent without delay; and hereby send fifty dollars for twenty-five copies of the book of Life Building;...").

Note 1. This book makes no mention of a person named "Ralston." Apparently there was no "Dr. Ralston" or "Mr. Ralston" connected with this movement or book.

Note 2. Merriam Webster's Biographical Dictionary (1995) makes no mention of Edmund Shaftesbury or of Albert Webster Edgerly.

496. Cubbison's Bakery. 1921. Cubbison's Bran Crackers (Ad). *Los Angeles Times.* Jan. 2. p. VIII-20.
• ***Summary:*** "Whole wheat flaxseed and Unsweetened Graham crackers. A food and laxative. Try them, sample postpaid 25¢. Cubbison's genuine whole wheat health bread, very nourishing. Cubbison's products for sale at Walter's Bakery, Summit Grocery, Pasadena, Young's Markets, Albert Cohns, Van Houtens, etc."

This ad also appeared in the 10 July 1921 issue (p. VIII-20) of this newspaper. Note: This is the earliest document seen (April. 2004) that gives Cubbison's Bakery address as "3417 Pasadena Ave., Los Angeles." Address: 3417 Pasadena Ave., Los Angeles [California]. Phone: Lincoln 2969.

497. Carqué, Otto. 1921. Vegetarianism in the light of modern science. *Herald of Health and Naturopath* (*New York City*) 26(2):79-84. Feb.
• ***Summary:*** "Having lived as a vegetarian for over a quarter of a century [i.e., since 1896 or before], and having made a study of foods and dietetics a part of my life-work, I fell qualified to say something to those who are ready to abandon the conventional ways of living. I shall deal with the question of diet from a historic, hygienic, ethical and economic point of view." Address: [California].

498. Carque Pure Food Co. 1921. Carque's natural pure foods (Ad). *Los Angeles Times.* April 24. p. IX21. Sunday magazine.
• ***Summary:*** This ad is identical to the one which appeared in this newspaper on 27 June 1920, p. IX19 (Sunday Magazine). Address: Magnolia Ave., S.W. Corner 16th St., Los Angeles, California. Phone: 52269.

499. International Committee of Young Men's Christian Associations. 1921. Year book of the Young Men's Christian Associations of North America: For the year May 1, 1920 to April 30, 1921. New York: Associated Press. 509 p. See p. 137-38. Illust. Index. 23 cm.
• ***Summary:*** In the section titled "Officers," for the state of South Carolina (p. 137-38), the "Local" officers of each branch are given. At the YMCA in Spartanburg, South Carolina, we read: "Physical: Paul C. Bragg. Industrial: F.R. Corwin. Boys: George E. Simmons. Gordon V. Booth."

Note: A year earlier, Bragg had been "physical director" or "head of the physical department" at the YMCA in Frederick, Maryland. By the fall of 1921 he was working for the YMCA near Los Angeles. Address: 347 Madison Ave., New York.

500. *Los Angeles Times.* 1921. Carque's natural pure foods (Ad). May 1. p. VIII20.
• ***Summary:*** This ad is identical to one that appeared in this newspaper on 27 June 1920, p. IX19 (Sunday Magazine), except that the address has changed to 2618 W. 7th St. in Los Angeles. Note: This is the earliest document seen (July 2021) in which Carque appears at this new address. Address: 2618 W. 7th St., Los Angeles, California. Phone: 52269.

501. Brook, Harry Ellington. 1921. Care of the body. *Los Angeles Times.* May 29. p. VIII18.
• ***Summary:*** The first section, titled "Milk substitutes," argues that cow's milk is not suited for human infants (who should use mother's milk) or adults (for many reasons,

© Copyright Soyinfo Center 2021

including tuberculosis germs). "Recognizing the limitations of milk as a food, many have endeavored to introduce some form of synthetic or artificial milk. In France, for many years, the soya bean has been used for this purpose, in feeding infants. It is not well adapted thereto, because, like the peanut, it contains starch, and infants cannot digest starch."

Dr. Elmer Lee of New York, recently developed a new synthetic milk made from oats and peanut meal. However these foods also have a high starch content. The best milk substitutes would be made from nuts, which contain no starch. The peanut is not a true nut. "The almond is the best nut to use for this purpose, blanched, ground into cream, but not heated, and mixed with distilled water." An infant deprived of its mother's milk will thrive much better on this nut milk, mixed with a little raw fruit juice, than on the milk of a cow, "while for adults it is greatly superior to milk."

The section titled "Removal" states: "The Carque Pure Food Company has moved from Magnolia avenue to 2618 West Seventh street, two blocks west of Westlake Park." Address: N.D. [Los Angeles, California].

502. *Washington Post.* 1921. Red Cross plans life-saving corps: District chapter acts to make bathing places safe for patrons. July 29. p. 7.
• ***Summary:*** "With a view of making Washington beaches and watering places safe against further tragedies, the District chapter of the American Red Cross yesterday started a program to create a corp of certified life-savers."

"Paul C. Bragg and John H. Bragg [Paul's younger brother by about 4 years] have been appointed the examiners for the District."

503. Lust's (L.) Health Food Bakery. 1921. Raw peanut butter (Ad). *Herald of Health and Naturopath* (*New York City*) 26(7):358. July.
• ***Summary:*** "Natural–Healthful. L. Lust's unroasted. A boon for the uncooked food dietist. Free from the dry parsley taste so common in all roasted Peanut Butter. Highly nutritious. Rich in protein and nutritive salts. Will keep for months." 2 lb tins only 65 cents.

Note: L. Lust is Louis Lust, brother of Benedict Lust. Address: Corner 105th Street and Park Avenue, New York City.

504. *Los Angeles Times.* 1921. "Y" announces new classes, teachers. Sept. 28. p. II 12.
• ***Summary:*** "New courses and changes in personnel of the local Young Men's Christian Association [YMCA] were announced yesterday... R.R. Russick has been named associate physical director to be assisted by Paul Bragg, formerly a physical director in the New York City public schools, who is a specialist in coaching basketball teams and wrestlers."

Note 1. This is the earliest document seen (Oct. 2009) about (or by) Paul C. Bragg in California. He and his family must have arrived in California in the summer of 1921; the last article about him on the East Coast (Washington Post) is dated 29 July 1921.

Note 2. Paul's last job on the East Coast was apparently as a football coach, starting in the fall of 1920, in Connelsville, Pennsylvania.

505. *Oxnard Daily Courier* (*Oxnard, California*). 1921. Second day of county fair record breaker. Oct. 6. p. 1.
• ***Summary:*** "Well, they made quite a doin's out of this seventh annual Ventura country fair.

First, there's the largest loaf of bread ever baked in the West. It's thirteen feet and six inches long and weighs 75 pounds,

"W.C.–but everybody calls him 'Bill'–Baker, Ventura's enterprising bakerman, baked it."

Note: William Cook was born Wilhelm Koch. He later changed his name to William "Bill" Baker and lived much of his life in nearby Ojai, California.

506. Herb Vegetable Compound Company. 1921. Inter-Clean (Ad). *Herald of Health and Naturopath* (*New York City*) 26(10):515. Oct.
• ***Summary:*** "Prof. A. Ehret's latest achievement to clean the bowels of all particles of old and hardened retention. Can be safely used by everybody, babies as well. The real cure for constitutional constipation, removing the cause of most disorders. You will feel young and live longer by using it. Price $1.00. Literature free. New York Depot: Kneipp Store, 110 E. 41st Street [NYC].

Note: This is the earliest document seen (May 2015) that mentions "Inter-Clean" or the Herb Vegetable Compound Company. Note that Arnold Ehret is still living. Address: W. Alhambra, California.

507. Brook, Harry Ellington. 1921. Harry Brook the one and only reporter: How the little country paper defeated Grover Cleveland for president. *Los Angeles Times.* Dec. 4. p. VIII4. Sunday magazine.
• ***Summary:*** This gives a brief biography of Harry Chandler and tells how he invited Brook to do this column in Chandler's newspaper, the *Los Angeles Times.*

"Harry Chandler is responsible for... the department of the *Times* I have the honor to conduct. In 1899 when General Otis [the father of Chandler's wife] was in the Philippines, Chandler said to me one day–'Brook, suppose we start a health department. As that had been my hobby since youth, I readily agreed and 'The Care of the Body' was born. After General Otis returned, as he was looking over the new features, he said to Chandler, pointing to the department, 'I don't think much of that thing.' However a year later General Otis told a friend of mine, 'I read the darned thing myself

© Copyright Soyinfo Center 2021

every Sunday. Strange, isn't it. Why many of the doctors read it and some of the most intelligent of them learn things from it, only they don't like to admit it."

"Thirty five years ago, on Nov. 9, 1886, when I joined the editorial staff... the Times was five years old."

Akasha Richmond adds: Early in his career, Brook wrote promotional pieces about Los Angeles to encourage people to come there. That was before the motion picture industry was established in the early 1900s.

This article contains 3 photos of printing presses. Address: Editor, "Care of the Body," Los Angeles Times.

508. Pierce, Anne Lewis. 1921. Little journeys to the homes of famous foods: Three specialized products made from wheat with special thought to health and flavor. *New-York Tribune.* Dec. 18. p. D13.
• ***Summary:*** The story of how the Ralston Health Club joined with Ralston Purina Co., whose president was W.H. Danforth. Four photos show W.H. Danforth and his company.

509. *Madison Survey* (*Madison, Tennessee*). 1922. Health foods and how to make them known. 4(2):2-3. Jan. 11.
• ***Summary:*** "Teachers in the pulpit and teachers in the class room should be prepared to instruct in the care of the body. They should understand the science of physiology and hygiene, and should teach those under their direction the sacredness of the human body and the laws of its life."

"Simple preparations are to be made, the price of which will fall within the reach of the poor, and many are to be taught to make their own foods rather than to depend upon factory-made foods.

"Every cafeteria, every sanitarium, every school, and likewise, every home table, should be a practical demonstration center of foods properly prepared to give health of body and mind."

510. *Herald of Health and Naturopath* (*New York City*). 1922. Naturopathic news. 27(1):32-33. Jan.
• ***Summary:*** At 7:30 p.m. on 9 Dec. 1921 Prof. Arnold Ehret gave a lecture and Ehret dinner on the 3rd floor of the Boos Bros. Cafeteria, 650 S. Broadway, Los Angeles, California. "Professor Ehret who ranks high in the dietetic field is a leader in fasting and curative diet." The dinner consisted entirely of mucusless foods. Address: N.D.

511. *Los Angeles Times.* 1922. To show how motion pictures are made. Feb. 5. p. V5.
• ***Summary:*** Clark Irvine has leased the Walker Theater at Seventh and Grand for two months to present the show of which he is producer, "Making the Movies," for tourists and visitors to Los Angeles. Real players will act before a real camera, just as in the studios. The first performance will take place tonight.

512. *Los Angeles Times.* 1922. Course of lectures by Linda Burfield Hazzard and Otto Carque (Ad). Feb. 12. p. VIII18.
• ***Summary:*** The lectures will be at Metaphysical Hall, 512-13 Fay Building, Third and Hill Streets, Wednesday and Friday evening, Feb. 15 and 17, at 8 p.m. "No admission fee. Dr. Linda Burfield Hazzard, author of *Fasting for the Cure of Disease, Diet in Disease and Systematic Cleansing,* etc. is the greatest recognized authority on the fast and all natural curative methods. These will be fully explained.

"Mr. Otto Carque, food chemist and biologist, author of *Natural Foods of California, Curative Foods, Biological Chemistry,* etc. is California's foremost purveyor of natural unfired foods. Mr. Carque will give a complete exposition of these and allied subjects."

Dr. Hazzard, Chirothesian, can be reached at 6912 Sunset Boulevard, Hollywood. Phone: 577-382.

Note: A Google Internet search (March 2005) for "Chirothesia*" gets 499 hits, and for "Chirothesian Church" gets 23 hits. The Chirothesian Church of Euth and the Chirothesian Church of Faith are both said to have been founded in 1917.

513. *Herald of Health and Naturopath* (*New York City*). 1922. Whole wheat bread and your health. 27(2):79. Feb.
• ***Summary:*** From the New York American, Dec. 22, 1921. An interview with Benedict Lust, who praises whole wheat bread.

514. Vitamin Food Company, Inc. 1922. The earth is NOT flat! (Ad). *Herald of Health and Naturopath* (*New York City*) 27(2):56. Feb.
• ***Summary:*** "The Vitamin Theory, accepted by the greatest minds of the last decade, is occasionally attacked by some... who seek to discredit it." This company sells three products: (1) Vitafood, a "delicious fruit wafer–the only method of obtaining all the four Vitamins A, B, C, and D..." (2) Vegex, an "essential food, in highly concentrated form, many times richer in Vitamin B than any other food stuff known to science." (3) Dr. Benjamin Harrow's authoritative book on vitamins. "Dr. Benedict Lust endorses and uses Vitafood products."

Note: This magazine–which belittles the vitamin theory–is now taking ads from companies that sell vitamins! Address: Eugene Christian, President, 610 Gotham National Bldg., 169 West 71st St., New York City.

515. *Madison Survey* (*Madison, Tennessee*). 1922. Madison Food Factory products. 4(10):3. March 8.
• ***Summary:*** The factory's loaf of whole-wheat bread is riding a wave of popularity. "With many who are studying diet problems the first question is, 'What shall I prepare in place of meat?'

"There are vegetable preparations just as rich in food

© Copyright Soyinfo Center 2021

elements as the flesh of animals, and not only more easily prepared than meats, but lacking in those undesirable points that are driving a good many people to give up the use of flesh foods. The food factory puts out Nut Meat, Savory Meat, and Soy Bean Meat.

"Recipes for dishes made from these vegetable meats are sent with every order.

"Much is being said and written against the free use of cane sugar, and cane sugar products."

Note: This is the earliest document seen (Aug. 2013) that mentions "Savory Meat" in connection with Madison College. This product may have been made with wheat gluten. The last mention seen of Savory Meat in the *Madison Survey* is on 2 July 1922, page 3.

516. *Los Angeles Times.* 1922. Course of lectures by Linda Burfield Hazzard and Otto Carque (Ad). March 11. p. I14.
• ***Summary:*** The lectures we be at the "American Legion Hall, 327½ South Hill Street. Eight p.m. March 11th, 18th, 25th, and April 1st... No charge for admission."

517. Carqué, Otto. 1922. Natural foods of California. Los Angeles, California: Carqué Pure Food Company. 21 p. 22 cm. *
• ***Summary:*** A review in the *Herald of Health and Naturopath* (March 1922, p. 148) states: "Mr. Carque, who is so well known to Naturopaths and Physical Culturists, has here given to his friends an interesting discussion of the relation of food to health. Mr. Carque, who did so much to educate the American public upon the importance of the positive organic mineral salts found in natural food has again placed due emphasis upon this phase of the food problem. He asserts that the body if fed natural foods can build its own vitamines and does not need to depend upon the artificially prepared foods, the commercial world is now exploiting." Address: Los Angeles.

518. **Product Name:** Soy Bean Meat.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1922 March.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Madison Survey. 1922. March 8. p. 3. May 10. p. 3. Canned. Probably made from whole mature soybeans. It is not clear what ingredients (in addition to soy beans) were used or how it was made. This was America's second commercial soy-based meat alternative (meat analog).

Note: This is the earliest known commercial soy product made in Tennessee.

519. *Madison Survey* (*Madison, Tennessee*). 1922. Added facilities for a growing institution. 4(19):1-2. May 10.
• ***Summary:*** "A number of years ago when the flakefood business was being pushed, a large food factory was erected near Madison. The promoters had a big institution on their hands before the people of the country had been educated to eat the products of the concern. The plant passed from one group of men to another [including Jethro Kloss, who took over this Nashville Sanitarium Food Factory in about 1915], each finding that it was too large and expensive to operate with profit. Finally, it was decided to scrap it.

"It seemed a pity to do this, for the enterprise stood for the manufacture and sale of health foods which the public needed. With the help of friends, the food factory was purchased and rebuilt on a more simple plan on the school grounds. It has since been operated, as are other departments of the institution, with student labor, and has contributed its share to the support of students who meet expenses by work while in training.

"The demand for health foods is on the increase. The latest advance has been in the manufacture of malta [probably made from malted grains], a grain sweet which is more wholesome than cane sugars and cane syrups. A small house was built for the manufacture of malta."

Note 1. According to W.C. Sandborn (1953, p. 123), the food factory was opened at Madison in 1918. This date was verified by Elmer Bush who helped move the factory.

Note 2. This is the earliest document seen (May 2009) related to Jethro Kloss, although his name is not mentioned.

520. Lust, Benedict. 1922. Whole wheat bread. II. *Herald of Health and Naturopath* (*New York City*) 27(5):227-29. May.
• ***Summary:*** Continued. See Article I in the Dec. 1921 issue. Here, Dr. Lust explains how to make this bread, with many variations, at home. Many bakers omit the yeast. Freshly ground meal or flour is preferable.

Includes ideas by vegetarian pioneers Carlotte Schultz (a great German authority on diet), the late Alfred von Seefeld, and Prof. Dr. Gustav Jaeger. Address: Dr.

521. Carque Shop (The). 1922. "Natural Foods of California." Have you read the headline? (Ad). *Los Angeles Times.* June 11. p. VIII18.
• ***Summary:*** "For ten years the Carque Pure Food Co. has been supplying them to a steadily increasing and appreciative mail-order trade. Our price list and descriptive booklet will be mailed upon request.

"For years it's been the aim of the Carque Pure Food Co. to introduce fruit dried only in the sun or by a dehydrator, and without the use of chemicals. We manufacture nut butters which are a revelation in flavor and nutritive quality. We grind from whole wheat a wheat flour and a corn meal which bake breads of satisfying goodness, and our selection of whole grain crackers is unique. Natural whole brown rice, pure honey, and 'Prunola' and other fruit confections are all items of real food which are exceptional.

"We invite city customers to visit the Carque shop (Natural Foods of California) at 2618 West Seventh St., Los Angeles. Phone 52269."

Note: This invitation shows a new openness. Address: 2618 W. Seventh St., Los Angeles, California. Phone: 52269.

522. *Madison Survey* (*Madison, Tennessee*). 1922. The food factory. 4(24):3. June 14.
• ***Summary:*** "A man and his wife, members of the faculty, have charge of the food department, where are manufactured various nut and soy bean meats, malted nuts, malta, whole wheat and bran crakers [sic, crackers], whole wheat bread, peanut butter, and other health foods." Various pieces of food processing equipment, including a peanut blancher, prepare "health foods for the market, for the city cafeteria, and the home table."

523. Christian, Eugene. 1922. Ten little lessons on vitamins. Westfield, Massachusetts: Vitamin Research Association. 10 v. Illust. 17 cm.
• ***Summary:*** A review in the *Herald of Health and Naturopath* (June 1922, p. 305-06) states: "These little lessons are undoubtedly the best that Dr. Christian has written. The text is clear and simple and easy to understand."

"The Vitamine theory is purely hypothetical and will doubtless be forgotten in a few more years. Nevertheless the hypothesis has served to emphasize the importance of eating whole foods rather than the denatured and refined ones. It has pointed out to medical men the importance of fresh fruits and vegetables... However we have been unable to get the medical men to see these facts."

Each of the ten volumes / pamphlets is a different lesson, from Lesson No. 1 to Lesson No. 10. Each is a left-stapled pamphlet with medium-stock covers measuring nearly 4½ inches by 6½ inches and containing 32 internal pages.

Lesson 2, for example, is "A brief history of vitamin discovery" (29 pages. 23 references). The references are given in Lesson 10. Address: [New York].

524. *Madison Survey* (*Madison, Tennessee*). 1922. Health foods manufactured at Madison. 4(26):3. July 2.
• ***Summary:*** "For the benefit of those who are inquiring about foods put on the market by the food department of the Madison School, we give the following list: Unleavened Breads–whole wheat fruit crackers, sweetened whole wheat crackers, unsweetened whole wheat crackers, bran crackers, whole wheat beaten biscuit, whole wheat beaten sticks, breakfast crisps.

"The vegetable meats, in cans of various sizes, are–Nut meat, Soy bean meat, Savory meat.

"There are soy beans, plain canned... Steamed whole wheat is put up in 16-ounce cans, and sterilized bran and forty per cent gluten flour are for sale."

525. *Madison Survey* (*Madison, Tennessee*). 1922. The manufacture of health foods an important part of our work. 4(30):1-2. July 26.
• ***Summary:*** "For a number of years before the establishment of the school, a food factory was operated in this section of the South. It was in the days when flake foods had been popularized, and this factory was started as a money-making enterprise. Although it was in no way connected with the work of the denomination, yet our people were looked upon as responsible for the project, and when it failed they received the censure.

"In order to keep alive the health food industry, the factory was purchased and operated for a number of years by the conference. The location was unfavorable and the labor problem a perplexing one, and so in spite of the fact that good foods were manufactured, the enterprise was a losing one, and it was decided to close.

"Finding it difficult to dispose of the property to any company whose object was the making of money, it was decided to scrap the plant, but Brother Jethro Kloss, who had a keen interest in the food work, and who had some experience in a small way in the manufacture of foods in Minnesota, decided to buy. He operated the factory for several years. He was enthusiastic over the production of foods, not so much from the financial as from the philanthropic side of the question. But the labor problem was still a difficult one. He could not pay the prices demanded, and the factory was again to be shut down.

"When the Madison School faced the closing of the food factory,–the only one then operating in the South for the manufacture of health foods,–and considered the statement made in the early history of the institution, that Madison should interest itself in the food work in the South, the management of the School decided it to be their duty to keep the health food business alive.

"This was in the time of the Great War [World War I], a time of unusual stress everywhere. But with the assistance of Sister Josephine Gotzian, who has befriended more than one struggling health food enterprise, the Madison School faculty purchased the plant. The buildings were wrecked and brought to the School farm. Here, a new factory was built. It is not large but it is well planned and thoroughly sanitary. It has cost nearly fifteen thousand dollars, and aside from Sister Gotzian's assistance the School has borne the expense. The money came out of what otherwise would have gone to faculty members as a salary. They willingly made the sacrifice because of their love for health principles and their desire to help forward this type of work in the South.

"The factory has had a moulding effect on the work in this field. It has made possible the whole grain bread campaign that is being carried forward in many other places... It is encouraging men and women to discard the use of flesh foods by providing proper foods to take the place of meat."

© Copyright Soyinfo Center 2021

Note 1. Though soy beans are not mentioned, by April 1919 this food factory was canning soy beans grown on the school farm. In later years it would make many commercial soy products and sell some of them throughout the USA and the world.

Note 2. This is the earliest document seen (May 2009) related to Jethro Kloss which mentions his name.

526. **Product Name:** Soy Beans (Plain Canned).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1922 July.
Ingredients: Incl. whole soybeans.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Madison Survey. 1922. July 2. p. 3. Gray. 1936. All About The Soya Bean. p. 123.

527. *Los Angeles Times.* 1922. Parnter wanted (Ad). Sept. 24. p. XI28.
• ***Summary:*** "... for health-food store proposition in Southern California. Moderate investment desirable. Write, stating qualifications, F, Box 31, Times–Office."

528. Kneipp Store. 1922. Health foods. Toilet articles (Ad). *Herald of Health and Naturopath* (*New York City*) 27(10):512-13. Oct.
• ***Summary:*** Under "Health foods: Breads and specialties. Diabetic foods and remedies (incl. Gluten bread). Laxative foods and remedies (incl. bran bread, crackers, wafers, and cookies). Cereal coffees (8 brands). Tea substitutes and health cocoas. Nut butters, honey and jellies (incl. Carqué's almond butter, Lust's peanut butter {roasted or unroasted}). Vegetable extracts, food additions and olive oil. Unfermented imported wines. Unsulphured, sundried fruits (incl. Black Mission Figs). Meat substitutes (Protose, Nuttose, Vegetable Meat or Roast, Vej-Meat or Vej-Roast, Watson's Nut Meat, Beans–Kidney, Soya, or Navy, Bromose–Nut or Fig, Mushrooms). Cereals (11 brands, incl. Carqué's Natural Whole Rice).

Note: The "Health Foods" half of this add appeared in the Sept. 1925 (p. 854) issue of this magazine. Address: 110 East 41st St., New York City.

529. [Lust, Benedict]. 1922. Naturopathic news. *Herald of Health and Naturopath* (*New York City*) 27(10):499-506. Oct.
• ***Summary:*** "Our recent trip to the West was a great success in every way. We left New York on the 26th straight for Ft. Wayne, Indiana, for the Ross Chiropractic Convention, August 27th to August 30th. The editor received a hearty welcome from Dr. Ross, the faculty and the student body of the school, as well as from the audience of the convention, This was a real Chiropractic Convention of liberal Chiropractors, no others would have been tolerated. It was an open forum, and Dr. Ross is to be complimented for his broad and liberal attitude. In introducing the several speakers, he stated he wants everyone to speak on this platform as he feels, whether it agrees with his ideas or not, whether it hurts the feelings of somebody or not, whether it is straight Chiropractic or not. It was a Progressive Chiropractic Convention in the true sense of the word with real common sense, not a straight or Narrow Convention, but a real common sense convention all the way through.

"The different leaders and speakers came from all parts of our great America and some of them from Canada. The Canadian Day was especially interesting. Dr. Macfie of London, Ontario, and Dr. Clayborn of Toronto, were two extraordinary characters, who uttered words of wisdom and truth as we have never heard come from a Chiropractic platform. Dr. Clayborn stated that the Chiropractors have to adjust in addition to the spine a man's habits, a man's environment, a man's eating, a man's thoughts. Such broad and liberal and true expressions we have never heard before from a Chiropractor anywhere. Dr. Clayborn is in thought a true Naturopath, believing in all methods of drugless healing, with Rational Chiropractic first.

"It was refreshing and made us happy to see that Chiropractic has advanced to that point where it falls in line with the universal truth–which has always existed, is now and always will be the foundation for all methods of healing, right environment, right habits, natural life. If all Chiropractors would assume the attitude as Dr. Clayborn, The Chiropractic Movement would clarify itself with one stroke of all the accusations which has been brought against it throughout the country, by its egoistic leaders, who are narrow and selfish and who are narrow simply for exploiting the public and making a living on the 'public's back.'"

From there Dr. Lust went to Fort Wayne, Indiana. "From Indiana we went to Chicago where we received a great welcome with applause and cheer, at the Progressive College of Chiropractic and the Lindlahr College of Natural Therapeutics. This is the greatest center of the Nature Cure Movement in America and Dr. Lindlahr is the man who is to be admired for his great zeal and enthusiasm for true progressive methods of healing and for his ability to do things. The new college building is located in the back of a beautiful natural little park. On both sides are the sanitarium buildings, the headquarters in the city, in conjunction of which Dr. Lindlahr conducts a very fine country sanitarium at Elmhurst, where he has at present as a patient, Eugene Debs, the candidate for the socialist party. The Lindlahr's institutions are regular bee hives of activity along the Nature Cure line. Whatever a man needs for his practical well being and for his restoration to health, he finds it there. The fundamental constitutional methods of the true Nature Cure are practised to the fullest extent, and on this solid foundation are lined up all the methods of rational

© Copyright Soyinfo Center 2021

therapeutics, one after the other.

"There is no backwardness at Lindlahr's, everything is progressive and up to date. The staff of Physicians, assistants and students run into several hundreds and an outsider cannot realize how it is possible that Dr. Lindlahr can manage solely the whole institution. His assistants who work for him certainly deserve also every praise for their intelligent co-operation and harmony that is always present. The students and the visiting doctors also made a very fine impression, and I was happy to speak to them. Dr. Lindlahr in his introduction said that he owes his first inspiration and his conversion to the Nature Cure to me and that our little magazine from its very start was the incentive and the agent through which he not only found his health, but also his education along Nature Cure lines, and it induced him to go to Germany to continue his studies and to return to Chicago to establish himself with a institution and college."

"Sunday we went to Dr. Carl Strueh's who is our old friend, conducting a sanitarium at McHenry, Illinois for Nature Cure. The Strueh institution has been established for over 25 years and is a great success. Dr. Strueh deserves a monument for what he has accomplished, at McHenry. He worked in a different direction, having concentrated all his efforts to sanitarium work. He never took up other enterprises such as publishing, or the establishment of a college, but devoting all his time in this one direction, he has made a great success with his institution. I gave a lecture to the patients and guests on Sunday night, and we had a jolly good time at Yungborn No. 2 of the West."

"On my Western trip I have learned this one thing, that a doctor who thinks he knows it all, who closes his ears and eyes to new ideas, and new methods, as they turn up, is dead, and he is burying himself by degrees. The Naturopaths are the only true drugless practitioners because they have the true philosophy, the proper foundation which is necessary for practising rational healing. Other methods and cults are only auxilliaries, and there is only one method of healing and that is the Nature Cure and Natural Living."

"The great Physical Culture Exhibition will take place in New York City from October 23rd to October 28th. The Herald of Health and Naturopath has rented a special booth and the magazine and its work, what has been accomplished in an educational way in America, will be exhibited. Our books and supplies will also be on exhibition. Louis Lust and Company will exhibit a full line of health foods, such as their special raw peanut butter, whole wheat zwieback, whole wheat bread, whole wheat crackers, and other health food specialties. We want everybody to visit our booth. There will be free demonstrations and free talks to all who want to hear the gospel of natural life and Nature Cure.

"Dr. Clifford B. Severn, whose picture appeared in the last issue of the Herald of Health and Naturopath, the Naturopathic athlete from South Africa has now associated himself with the American School of Naturopathy and is teaching Dietetics, massage, gymnastics and physical culture and Naturopathy in the broadest sense. The student bodies are to be complimented to have this great man on their faculty. Everybody is taken up by his unique method of teaching, his great power and skill in expounding natural principles and practice. Get acquainted with him at our booth at the P.C. Exhibition in Madison Square Garden" [in midtown Manhattan, New York City].

"The Florida Yungborn will open on November 1st. Dr. Louisa Lust will be in charge for the whole season and I intend to spend some of the winter there myself. The buildings have been renovated and painted and many alterations have been made. The old and new visitors will all be delighted to see the many changes."

530. **Product Name:** Savory Meat.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1922.
New Product–Documentation: *Madison Survey* (Madison, Tennessee). 1922. March 8. p. 3 "Madison Food Factory products." "There are vegetable preparations just as rich in food elements as the flesh of animals, and not only more easily prepared than meats, but lacking in those undesirable points that are driving a good many people to give up the use of flesh foods. The food factory puts out Nut Meat, Savory Meat, and Soy Bean Meat."

Madison Survey (Madison, Tennessee). 1922. May 10. "Instead of meat." "The Food Department of the Madison School puts out a number of foods to take the place of flesh meats, such as Nut Meat, Soy Bean Meat and Savory Meat." Two recipes for serving Nut Meat or Savory Meat are given. Note: Nowhere can we find any proof that Savory Meat contained wheat gluten. Yet it was a meat alternative that probably did not contain soy. The last mention seen of Savory Meat in the *Madison Survey* is on 2 July 1922, page 3.

Letter from Mavis Sutherland. 1994. July 3. "I may have solved the gluten question [What was the first commercial product made by Madison Foods that contained gluten?] but I can't prove it. I will send copies of the *Madison Survey* which cause me to feel that gluten came on the scene in 1921 or 1922. It was called Savory Meat."

Note: Madison Foods started in 1918. The first manager and treasurer was Mrs. Nellie Druillard (affectionately called "Mother D"). Mr. and Mrs. Andrew Wheeler were the first in charge of food production.

532. *Naturopath* (*New York City*). 1923-1927/-. Serial/periodical. Published in New York City by Benedict Lust, M.D. Vol. 1, No. 1. Jan. 1923.
• ***Summary:*** Preceded by *Herald of Health and Naturopath.* Note: The last issue of this title was June 1927. This magazine was not published from 1928 to 1933 (probably because of the Great Depression and the loss of Benedict Lusts' entire life savings in a bank that declared insolvency in June 1929). The "Herald of Health and Naturopath" and the "Naturopath and Herald of Health" seemed to have been appear cut from the same cloth. These two titles were flip-flopped a few times throughout their history. Here is what the National College of Natural Medicine Library (NCNM, Portland, Oregon), which has the full set, has in their collection:

Naturopath and Herald of Health–1902-1915.

Herald of Health and Naturopath–1916-1922.

Naturopath–1923-1927 (appears to be same publisher as above)

Naturopath and Herald of Health–1935-1944.

Herald of Health and Naturopath–1947-1957.

Kirchfeld & Boyle. 1994. p. 313. This periodical was succeeded by *The Naturopath and Herald of Health*, which became the official publication of the American Naturopathic Association.

OCLC gives no dates for this periodical but says: Preceding titles: Hausdoctor. Amerikanische Kneippblatter. Kneipp Water Cure Monthly. Liberator of Medical Thought. Phrenological Journal. Herald of Health and Naturopath. Address: New York.

533. Hamburger's Grocery Store. 1923. Go to Hamburger's Grocery Store for Health Foods (Ad). *Los Angeles Times.* Feb. 7. p. II20.
• ***Summary:*** "We carry the most complete line to our knowledge on the West Coast. Established 1881. 'Some ha' meat who canna' eat'–then it is they seek the most appetizing, most nutritious health foods. Hamburger's has searched this country and abroad to bring the best to you. One entire department is given over to health foods alone..." Two lines of health foods are advertised: Eugene Christian Vitamin Foods (Vegex brand), and Battle Creek Sanitarium Health Foods. For the latter: "- new goods arriving daily. Laxa–a combination of sterilized wheat, bran and Ceylon agar. Calax, Paramels, Paralax, Lactose, Dextrine, Acidophilus Lactose, Dialtetic [sic, Diabetic] Bran, Cooked Bran, Soy Biscuit, Black Fig, White Fig and Prune Marmalade, Gluten Meals, Malted Nuts, Yogurt Tablets. Among the many meat substitutes are Protose, Nuttose and Nuttolene."

"Free delivery, convenient charge account and special phone service." Groceries delivered free twice a day.

Note: A similar but larger ad appeared in 11 April 1923 issue, p. II22. Here we read "Diabetic Bran, Soy Biscuits." Address: Fourth Floor [Broadway at Eighth, Los Angeles]. Phone: Broadway 3940.

534. **Product Name:** Soy Biscuit or Soy Biscuits.
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1923 February.
New Product–Documentation: Ad in *Los Angeles Times.* 1923. Feb. 7. p. II20. "Go to Hamburger's Grocery Store for Health Foods." This store carries a complete line of Battle Creek Sanitarium Health Foods, including "Soy Biscuit" (also called "Soy Biscuits").

Note: This is the earliest known commercial soy product made in Michigan.

535. Innerclean Laboratories. 1923. Innerclean, an aromatic herb (Ad). *Los Angeles Times.* March 7. p. I5.
• ***Summary:*** "Compound perfected by Prof. Arnold Ehret, originator Mucusless Diet Healing System. Wonderful intestinal cleanser. Attacks and removes disease-producing impurities."

Note: This is the earliest document seen (May 2015) that mentions "Innerclean" (or "Inner-Clean"), or "Innerclean Laboratories." Arnold Ehret is no longer living. He was killed in an accident in 1922. Address: 846 East Sixth St., Los Angeles, California.

536. Thayer, Gilbert. 1923. Perfect health: How to be young at sixty and live to be one hundred. 42nd ed. [sic]. Lafayette, Indiana: National Health Bureau of America. 143 p. Illust. 23 cm. *

Address: 846 East Sixth St., Los Angeles, California.

540. Vital Food Company of California. 1923. Consecrated to health: VPO makes for happiness (Ad). *Los Angeles Times.* Sept. 16. p. XI31. Sunday magazine.
• ***Summary:*** "Let's talk less of disease. "Let's talk more of health. "Let's try a dose of VPO. "Let's talk be Healthy and Happy.

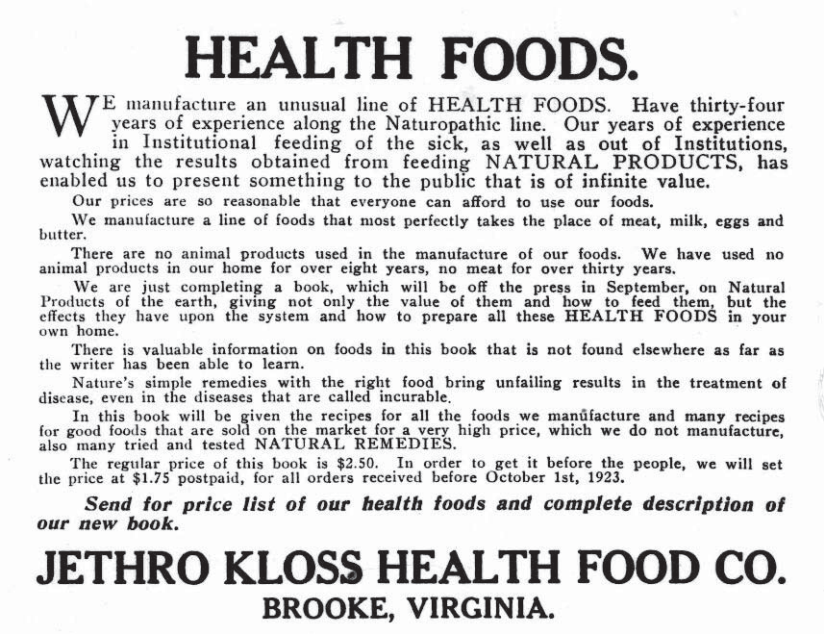
"Nature's remedy for constipation and the ills arising from it. VPO is a compound of Natural herbs, based on a formula by Mrs. W.S. Wilke, natural food specialist. 50¢ per package, or 55¢ postpaid. Sample mailed for two-cent stamp. 'Worth a dollar a dose.'

"For sale by Carque's. 2618 W. 7th St. Eutropheon [Dr. J.T. Richter], 927½ W. 6th St., Vitamine, 713 S. Figueroa St.

"And at your favorite drug or 'drugless' store, or direct from the manufacturers."

Note 1. This is the earliest document seen (July 2021) in the *Los Angeles Times* that mentions Eutropheon, an early raw-food vegetarian (actually vegan) restaurant–probably the first in California and perhaps even the first in the United States. The last document in the *Times* that mentioned Eutropheon (actually *eutropheon*) was an article on 13 April 1932. "Eutropheon" is mentioned in at least 44 ads and articles between those two dates–so it was well publicized.

Note 2. This is the earliest document seen (March 2003) that contains the word "vitamine" (or "vitamin" or the plural of either) in connection with the health food movement in the USA. This is surprising, since the word was coined in 1912. Notice that here it is the name of a company. Address: 650 N. Mariposa Ave., Los Angeles, California. Phone: 596-861.



541. Healtheries Natural Foods Company (The). 1923. Welcomes mail orders for... (Ad). *Naturopath* (*New York City*) 28(9):492. Sept.
• ***Summary:*** "... 100% whole wheat bread (Maxwell's 3V Bread, for Vim, Vigor and Vitality, has been used for extensive feeding tests at Westfield Laboratory and is highly endorsed by Professor Allyn after those tests. It is made of whole wheat, whole milk and further fortified with vegex [sic, Vegex], the wonderful vegetable extract and nerve nutrient, rich in vitamins and organic mineral salts.)

"Delicious sun-dried fruits (not chemically treated). Wild fruit juices,... Crackers, cookies, cakes; whole grain foods that are naturally laxative. Cereal drinks instead of coffee. Nuts and nut meats in choice selection..."

"You must get acquainted with these two stores, just the kind a true Naturopath longs for. We need you. You need us."

"No white denatured flour or refined sugar used in any of our products. John Maxwell, the President, hopes to meet you at the convention." Address: (1) 23 E. Van Buren St.; (2) 2731 No. Clark St. Both: Chicago, Illinois.

542. Kloss (Jethro) Health Food Co. 1923. Health foods (Ad). *Naturopath* (*New York City*) 28(9):488. Sept.
• ***Summary:*** "We manufacture an unusual line of Health

HEALTH FOODS.

WE manufacture an unusual line of HEALTH FOODS. Have thirty-four years of experience along the Naturopathic line. Our years of experience in Institutional feeding of the sick, as well as out of Institutions, watching the results obtained from feeding NATURAL PRODUCTS, has enabled us to present something to the public that is of infinite value.

Our prices are so reasonable that everyone can afford to use our foods.

We manufacture a line of foods that most perfectly takes the place of meat, milk, eggs and butter.

There are no animal products used in the manufacture of our foods. We have used no animal products in our home for over eight years, no meat for over thirty years.

We are just completing a book, which will be off the press in September, on Natural Products of the earth, giving not only the value of them and how to feed them, but the effects they have upon the system and how to prepare all these HEALTH FOODS in your own home.

There is valuable information on foods in this book that is not found elsewhere as far as the writer has been able to learn.

Nature's simple remedies with the right food bring unfailing results in the treatment of disease, even in the diseases that are called incurable.

In this book will be given the recipes for all the foods we manufacture and many recipes for good foods that are sold on the market for a very high price, which we do not manufacture, also many tried and tested NATURAL REMEDIES.

The regular price of this book is $2.50. In order to get it before the people, we will set the price at $1.75 postpaid, for all orders received before October 1st, 1923.

Send for price list of our health foods and complete description of our new book.

Note 1. This is the earliest document seen (July 2021) that contains the phrase "Natural Foods of California."

Note 2. This is the earliest document seen (July 2021) that mentions the "Carque Shop" or that uses the word "shop" in connection with Carque. Address: 2618 West Seventh St., Los Angeles, California. Phone: 52269.

545. Van Houten's Health Food Company. 1923. Prof. Arnold Ehret's wonderful discovery: Inner-Clean assists nature (Ad). *Los Angeles Times.* Oct. 14. p. IX26.
• ***Summary:*** "Not a drug but nature's way. Makes you better day by day. Are you constipated? Intestinal scourer and toxemia remover. Insist on the genuine Inner-clean! Will give immediate relief. 50¢ per packet. Send for free sample." "In business for your health."

Note: This company's name and address have changed. On 19 Aug. 1923 it was Van Houten's Health Food Store, 323 So. Hill St., Los Angeles, California. Address: 746 West 7th St., Los Angeles, California.

546. Carqué, Otto. 1923. Rational Diet by Otto Carqué: An epoch making book–just off the press (Ad). *Los Angeles Times.* Nov. 11. p. IX26.
• ***Summary:*** "It conclusively proves that faulty nutrition is one of the principal causes of physical degeneration and disease; that the most essential factor in immunizing the human body and in the prolongation of life, is a rational system of diet, paying attention to the relative amounts of the different organic salts [minerals] in our food.

"Thirty chapters, 540 pages, substantially bound in genuine art buckram. Price $5.00 postpaid. Table of contents free on request. Otto Carque, 2618 West 7th Street, Los Angeles, California. Phone: Dunkirk 4797." Address: 2618 West 7th St., Los Angeles, California. Phone: Dunkirk 4797.

547. Vital Food Company of California. 1923. To Otto Carque–author, lecturer, scientist, purveyor of natural foods–VPO extends congratulations (Ad). *Los Angeles Times.* Nov. 11. p. IX25.
• ***Summary:*** Congratulations to Otto Carque "upon the publication of his new book, *Rational Diet,* in our estimation the most exhaustive scientific study of foods and their values."

"VPO is a compound of Natural herbs, based on a formula by Mrs. W.S. Wilke, natural food specialist." For sale at all Sun Drug Stores, Carque's, Eutropheon, and Vitamine. The address of each is given. Address: 650 N. Mariposa Ave., Los Angeles, California. Phone: 596-861.

548. Carqué, Otto. 1923. Rational diet: An advanced treatise on the food question. Los Angeles, California: Times-Mirror Press. xvi + 540 p. Illust. 24 cm. [104* ref]
• ***Summary:*** In a review of this book, *California Health News* (30 Nov. 1933, p. 2) calls it "Carque's master work..."

The preface of this book begins: "The aim of this book is to disseminate a better knowledge of diet and its relation to health and disease, in plain non-technical language, understandable to all who seek more scientific information on this vitally important subject." The author advocates a vegetarian diet, with dairy products and eggs consumed in small amounts–if at all; their pros and cons are discussed on pages 324-340.

In the chapter on "Flesh Foods," pages 353-54 state: "Writing to his friend Firmus, who had abandoned the Pythagorean doctrine in order to eat meat, the philosopher Porphyry, living in the third century, said: 'I cannot believe that your change of diet is due to reasons of health, for you yourself have constantly affirmed that a vegetable diet is much more suitable than any other, not only to give perfect health, but even a philosophic and balanced judgment, as a long experience had taught you.'

"And Seneca, who, after studying the problem of nutrition for many years, had adopted vegetarianism, wrote: 'Struck by such arguments, I also have given up the use of flesh of animals, and at the end of a year my new habits have

© Copyright Soyinfo Center 2021

become not only easy to me, but most agreeable; and it even seems to me that my intellectual aptitudes have become more and more developed.'

"Isaac Newton adhered strictly to a vegetarian regimen while performing the prodigious intellectual work which made his name immortal. Among the modern philosophers and artists who have followed or advocated a rational vegetarian regimen may be mentioned: Shelley, Byron, Thoreau, Tolstoi [Tolstoy], Richard Wagner, Tagore, Maeterlinck, Alexander Pope, and George Bernard Shaw."

Chapter V, "Cereals, Legumes, and Miscellaneous Food Products," contains a section titled "Beans," which is largely devoted to soy beans (*Dolichos soya*) (p. 316-318). It discusses green vegetable soybeans ("Soy beans, when about three-fourths grown, make a most palatable and nutritious green vegetable, like the green pea or the lima bean."), soy flour, soy bean milk, bean cheese (tofu), and soy sauce.

Note: This is the earliest document seen (Nov. 2010) in which Otto Carqué mentions or discusses soybeans or soyfoods.

Concerning the wastefulness of the animal as a converter of feed to food, page 361 contains a long quotation from an article in the prestigious journal *Science* titled "The cost of roast pig," by Prof. Henry P. Armsby (1917).

In extensive tables of food composition, the composition of soy beans is given on page 504. The author lived 1867-1935. Address: Los Angeles, California.

549. Gourd (Henry E.). 1923. Célestins Vichy (Ad). *Naturopath* (*New York City*) 28(11):704. Nov.
• ***Summary:*** "Célestins Vichy is bottled only at Vichy, France, under the direct supervision of the French Government."

"The place of Célestins Vichy in the dietary is distinctive and important. It is an alkaline water of diuretic action, and indicated in cases of the following: Chronic hepatic disorders; gastric and intestinal indigestions; acid dyspepsia;..." and 6-7 more. A large illustration shows this bottled water with a metal cap. Address: General Distributor, 456 Fourth Ave., New York City.

550. Thayer, Gilbert. 1923. Perfect health cook book. Lafayette, Indiana: National Health Bureau of America. 64 p. 23 cm. *
• ***Summary:*** About vegetarian cookery. Address: Lafayette, Indiana.

551. *Los Angeles Times.* 1924. Health in California fruits and nuts: They contain all the elements of a balanced ration and eating them would make the whole nation better. Jan. 1. p. I12.
• ***Summary:*** "Vitamine is a new word in our vocabulary... Now to obtain the trio of vitamines, cellulose, and the organic salts we simply have to eat raw natural foods." Mentions and quotes from the "valuable and interesting book" *Rational Diet*, by Otto Carque, who is well known for the "delicious fruits and natural products that appear under the Carque brand."

552. Brook, Harry Ellington. 1924. Care of the body. *Los Angeles Times.* Jan. 13. p. H24.
• ***Summary:*** In the section titled "Dietetics" is a long quotation from John Harvey Kellogg, M.D. that begins: "Regulation of the diet is perhaps the most important of any single measure, in the treatment of chronic disease."

The section titled "Organic and inorganic salts" states: "In *Rational Diet*, Otto Carque writes: 'We must draw a sharp line of demarcation between organic and inorganic salts, as well as between vitality and chemical energy.'" Organic salts come from living things, such as plants or animals. "'It is only through the life-process of the plant that the constituents or air and soil become vitalized.'" Address: N.D. [Naturopathic Doctor].

553. Poplawski, Stephen J. Assignor to Arnold Electric Company (Racine, Wisconsin). 1924. Beverage mixer. *U.S. Patent* 1,480,914. Jan. 15. 7 p. Application filed 8 Feb. 1922. 6 drawings.
• ***Summary:*** This looks like an early version of a blender–but clearly it is not. The electric motor inside the base, below the tall container, turns a "rotating agitator" inside the container at the bottom. A "control switch" on the base turns the motor on and off. "The particular adaptation of the invention which has been chosen for the purpose of illustration is that of a beverage mixer usually found at so-called soda fountains." Thus, its function is that of a milk shake mixer. The "agitator" looks more like two little paddles than like blades.

Note: There is no way this could be called a blender or an early model blender; it is designed to mix things like malted milk and milk shakes at soda fountains. It contains no blades that could chop, grind, or puree foods. The blender was invented in the late 1930s by Fred Osius. It was first manufactured and promoted by Fred Waring. Poplawski patented his first blender on 8 Dec. 1942 (U.S. Patent No. 2,304,476). Address: Racine, Wisconsin.

554. Health Food Products Co. 1924. Formerly Van Houten Health Food Co. Same firm–New name (Ad). *Los Angeles Times.* Feb. 3. p. K30.
• ***Summary:*** In business for your health. Prof. Arnold Ehret's genuine Inner-Clean [Innerclean]. Cubbison's whole wheat bakery products. Unsulphured fruits and nuts [from Otto Carque]. 565. *Los Angeles Times.* 1924. Death claims "Times" writer: Dr. Harry E. Brook succumbs... Spent life trying to give health to humanity. May 5. p. A1.
• ***Summary:*** Contains a good biography and portrait photo of Dr. Harry Ellington Brook, N.D., who for 38 years was a member of The Times editorial staff. He was known to readers nationwide for his column "Care of the Body." He died at his home at 2129 Elsinore on Saturday night [May 3]. Death resulted from a nervous breakdown from overwork several months ago.

Dr. Brook was born on 21 March 1849 in St. John's Wood, London. His father, of Norse descent, was a merchant. "As an infant, Dr. Brook was poisoned by inoculation against smallpox, losing permanently the hearing of one ear and the

© Copyright Soyinfo Center 2021

use of a finger, and being reduced from a robust vitality to a weakly frame." From this affliction he traced his interest in health. At age 12 he began to study health, especially diet, and he took up long-distance walking. As a result, before he was out of his teens, he had overcome the handicap of his infancy.

At age 17 he first traveled to Europe, then spent much of the next 10 years back packing around Switzerland, Italy and France, studying nature cures and preparing himself for his career.

In 1877 he came to the USA and immediately headed for California. He spent 5 years in San Francisco editing *The Wasp,* then 5 more years in the mountains of California and Arizona. In the mining camps of Arizona he edited and published several newspapers. In 1884 he married Mr Agnes Plath, a widow with children. In 1886 Dr. Brook came to Los Angeles and became a member of The Times editorial staff, except for the years 1912-1917 when he published and edited a health magazine, *Brain and Brawn.* In 1921 he was awarded a special degree form the American School of Naturopathy.

He leaves a widow, a son and daughter, three stepdaughters, a stepson, and a cousin.

566. Innerclean Mfg. Company. 1924. Inner-Clean assists nature: Catarrhal conditions, asthma and hay fever (Ad). *Los Angeles Times.* May 11. p. H30.
• ***Summary:*** "... are caused by toxic accumulations within the blood. 50¢ per package. An aromatic herb-compound perfected by Prof. Arnold Ehret. Originator of the Mucusless Diet Healing System.

"Removes from the intestines 'age-old,' sticky, pasty material that has been robbing you of your energies thru pollution of the blood stream. Innerclean has completely restored thousands to perfect health. Relieves constipation.

"For sale at: All Owl and Sun Drug Stores; Standard Homeopathic Co., 316 S. Broadway; Health Food Products Co. 946 W. 7th St.; The Grist Mill–Sanitary Market, 3rd and Spring Sts., and at all leading druggists.

"Free samples will be mailed by receipt of coupon..." At the bottom is a coupon. Address: 846 East Sixth St., Los Angeles, California.

567. *Naturopath* (*New York City*). 1924. Late naturopathic news: In memoriam–Harry Ellington Brook. 29(5):491. May.
• ***Summary:*** Dr. Harry E. Brook, editor of the "Care of the Body" department of the *Los Angeles Times* passed on Saturday, May 3. "In him we lost the most important pioneer and effective worker for Naturopathy, medical freedom and constitutional and national human rights in the State of California. No other man has shaped public opinion to such extent for Naturopathy as the deceased did."

568. Carque Shop (The). 1924. Be rational in your diet (Ad). *Los Angeles Times.* June 15. p. I24.
• ***Summary:*** "Food should be sustaining, with no indigestible additions. It should be natural–not deprived of vital parts. It should please your palate without depressing your nervous system. It should leave nothing in the body to create disease.

"Eat Delectables–Carque's fruit candy–made with honey instead of sugar. Visit The Carqué Shop–Natural Foods of California." Address: 2618 West Seventh St., Los Angeles, California. Phone: DUnkirk 4797.

569. Lovell, Philip M. 1924. Care of the body. *Los Angeles Times.* June 22. p. I24. Sunday magazine.
• ***Summary:*** Begins with a section titled "In memoriam," dedicated to Harry Ellington Brook, who started this column 25 years ago. He had a "truth-loving mind and virile pen." In those days: "Autocratic medicine ruled men's minds and bodies with an iron hand. Calumny, ridicule, sarcasm, the biting, burning scorn of hating pens and tongues–these were the early rewards of his efforts. Few indeed were the persons who believed in the sublime strength and infinite mercy of Nature's healing power. Men knew little of the care of their body. The pill and nostrum antidoted pain and fever. The contents of a bottle were expected to counteract the abuses of mind and body. Upon this scroll of men's ignorance and medical autocracy, the seeds of his writing took root."

Today his work "has crystallized itself into a new public opinion on matters of health. The ideas of Nature's healing power have permeated the public intelligence..."

Note: This is the first installment of Lovell's "Care of the body" column. Address: N.D. [Naturopathic Doctor].

570. Paul C. Bragg is in California (Important event). 1924.
• ***Summary:*** Members of the class of 1924 at Redondo Union High School will hold their 50th anniversary reunion on June 23 in Los Angeles. All graduates and their descendants will be welcomed at the event. "Planning to attend the event are... Paul C. Bragg, now in his 90s, who was the physical education teacher for the class."

Note: This article shows that in 1924, Paul C. Bragg was in California, in the Los Angeles area. Another article shows that he was in Los Angeles at the YMCA as early as Sept. 1921.

571. *Los Angeles Times.* 1924. Wanderlusters to hike. July 5. p. A3.
• ***Summary:*** "The first hike of the reorganized *Wanderlusters Hiking Club* will be taken tomorrow and all members and others interested are invited to be at 946 West Seventh street at 8:30 a.m. for the start. Club membership is open to anyone and there are no dues or formalities of any kind, it was announced yesterday. Dr. Paul C. Bragg is head of the club. Lunches for the hikes are prepared under the direction of a dietetic expert."

Note 1. This is the earliest document seen (March 2007)

© Copyright Soyinfo Center 2021

in the *Los Angeles Times* that mentions "Wanderlusters."

Note 2. This is the earliest document seen (April 2010) in which Paul Bragg is referred to as a doctor–"Dr. Paul C. Bragg." Of what is he a doctor? And where did he earn his degree? Could he be a naturopathic doctor like Philip Lovell?

Note 3. The hikers will meet at the Van Houten Health Food Company, 946 West 7th St., Los Angeles. This is the earliest document seen (March 2007) that mentions Paul Bragg in connection with 946 West 6th Street. Within a year (by May 1925) Paul Bragg will become actively involved with this company (which was also named Health Food Products Co.).

572. Lovell, Philip M. 1924. Care of the body. *Los Angeles Times.* Aug. 3. p. I24. Sunday magazine.
• ***Summary:*** The section titled "Hikes" begins: "In this great Care of the Body family I wonder how many of you, coming from the East, were members of one of the numerous McFadden hiking clubs." Here in the Southland a similar "hiking club known as the Wanderlusters has been formed by the readers and boosters of this column. They are all interested in health questions; a group of strong, virile fans and lovers of the great outdoors."

They meet on the 1st and 4th Sundays of each month at 8:30 a.m. at 946 West Seventh street. "The hikes that are planned are under the leadership of Dr. Paul Bragg, a trained physical culture director... Practical demonstrations along lines of posture, physical culture, breathing, etc. will be given by Dr. Bragg. Occasionally a talk will be given by the editor [Lovell].

"Come! You'll meet congenial friends." Address: N.D. [Naturopathic Doctor].

573. May Co. (The). 1924. Battle Creek health foods! Have you tried them? (Ad). *Los Angeles Times.* Aug. 3. p. I25. Sunday magazine.
• ***Summary:*** "Others have had astounding results... If necessary you can make three delicious meals a day from these famous foods." The May Co. is "headquarters for Battle Creek health foods;... we have a dietician to advise you."

"Paralax–lubricates the intestinal walls. Acidone–supplies gastric acid when deficient. Acidophilus–combats autointoxication. Protose, Nuttolene and Nuttose–meat substitutes. Almond butter–for soups, sandwiches, etc. Soy biscuit–for diabetics."

On the 4th floor. "The May Co. Formerly Hamburger's." Address: Broadway at Eighth, Los Angeles, California. Phone: BRoadway 3940.

574. Reinhold, Alice M. 1924. The passing of Harry Ellington Brook, of Los Angeles, California. *Naturopath* (*New York City*) 29(8):720-21. Aug.
• ***Summary:*** An obituary. He died on 5 May 1924, at age 75, from overwork. He contributed a long column once each week on the subject of Nature Cure to the *Los Angeles Times.* "From the age of 17 to 27 he spent most of his time tramping through Europe and America, studying Nature Cure in the different places, and otherwise preparing for his later famous work as a writer on the subject, and a teacher of health." Address: N.D.

575. May Co. (The). Formerly Hamburger's. 1924. Health first! (Ad). *Los Angeles Times.* Sept. 7. p. I25.
• ***Summary:*** "The May Co. headquarters for Battle Creek [Michigan] and other famous health foods! Yogurt Tablets, a Battle Creek product that makes very superior buttermilk. Vegex–a vitamin food in four different forms and sizes. Cubes, almonds, paste and fruit wafers. 10¢ to $11.50.

"Fruit and Nut Bromose–health chocolates and meltose sweets. Zo–Vitamin breakfast food (Battle Creek Food Co.) rich in food iron and other food salts.

"For a full list of Battle Creek and other health foods, also catalog of fine groceries, write for Bklet [Booklet] 67T." Address: Fourth Floor [Broadway at Eighth, Los Angeles].

576. Irvine, Clarke. 1924. Lassen side trip is out... But you can still climb Mt. Shasta. *Los Angeles Times.* Oct. 5. p. G4.
• ***Summary:*** Irvine climbed beautiful Mt. Shasta. Eight miles from the base is Alpine Lodge, the Sierra Club's $7,000 rest camp.

577. Lovell, Philip M. 1924. Care of the body. *Los Angeles Times.* Oct. 5. p. I24. Sunday magazine.
• ***Summary:*** The section titled "Lectures" (near the end) states: "For years before I assumed the editorship of this column I have lectured on public health topics. The lecture season is again approaching and in lieu of sending out my customary program, I use this means of notifying the various clubs and organizations that I am in a position to again fill lecture dates,...

"For the month of October I shall lecture in the Health Food Store, 946 West 7th street, on the topic of 'Constipation.' Friday, October 17, 8 p.m. This lecture is open to the general public, without charge." Address: N.D. [Naturopathic Doctor].

578. Lovell, Philip M. 1924. Care of the body. *Los Angeles Times.* Nov. 2. p. J24. Sunday magazine.
• ***Summary:*** The section titled "The truth about the drugs I sell," is a reprint (with permission) of a remarkable article first published in the Sept. 2004 issue of *Physical Culture* magazine, owned and edited by Bernarr Macfadden. Lovell wrote a short introductory paragraph: "It is a long time since I have read anything which goes so keenly and intuitively into the evils of the drug business. Read it and you will agree with me."

© Copyright Soyinfo Center 2021

It is the story, told in the first person, of a druggist who confesses the evils of his trade. He watched people become slaves to and victims of the drugs he prescribed. He knew the real cure for their problems (such as eating less, having a better diet, and exercising more) but he shamelessly sold them drugs anyway. It caused him such tremendous guilt that he finally confessed. Address: N.D. [Naturopathic Doctor].

579. Lovell, Philip M. 1924. Care of the body. *Los Angeles Times.* Nov. 2. p. J24. Sunday magazine.
• ***Summary:*** The section titled "The naturopathic convention" discusses the convention which will be held Nov. 20-22 in Los Angeles at the Clark Hotel. "Dr. Benedict Lust, one of the staunchest fighters in the drugless movement and, at present, the president of the American Naturopathic Association, will preside at the opening."

"Of the great figures in the drugless movement, perhaps Bernarr McFadden is best known." His splendid magazine, *Physical Culture,* is very widely read. "He is an international figure and undoubtedly the greatest leader in popularized health education from a drugless standpoint. His magazine, *Physical Culture,* has done more than any other single magazine to enlighten the people of this country and elsewhere as to the dangers of medical autocracy. Mr. McFadden has done more to raise the standard of physical health of the man in the street than any ten thousand doctors." The convention would be well worth attending if only to see and hear him.

In addition: "Victor Lindlahr, the worthy successor to his brilliant father, Dr. Henry Lindlahr," Dr. George Starr White, Dr. Riley of Washington, DC, Dr. Carl Schultz, etc. There is no charge for any kind of admission to the convention. Address: N.D. [Naturopathic Doctor].

580. Dyas Co. (B.H.)–Ville de Paris. 1924. Carque–(Kar-Kay) California gift packages are now available at the Ville de Paris (Ad). *Los Angeles Times.* Nov. 19. p. 9.
• ***Summary:*** "... and Jevne's chocolates and fruit cakes."

"The Holiday Packages Section on the Second Floor presents a remarkable treat for those in search of gifts typically Californian in character to send back East, or back home anywhere!

"A pleasing selection of California's sun-dried fruits, nuts, honey and other pleasing delicacies. Delightfully packaged in original and interesting gift boxes."

Note: This is part of a very stylish full-page ad. Carque's address is not given. Address: Seventh at Olive, Los Angeles, California.

581. *Los Angeles Times.* 1924. Memorial to naturopaths: Convention honors pioneers of drugless healing. Nov. 22. p. A6.
• ***Summary:*** Memorial services were held to honor four pioneers in drugless healing: Prof. Arnold Ehret, Dr. Harry Lindlahr, Dr. Harry Ellington Brook, and Dr. Harry A. Elbl [sic, Harold A. Elbe, N.D., who had a practice at 1419 Grand Ave., Los Angeles]. The services were conducted yesterday afternoon at the Little Church of the Flowers at Forest Lawn Cemetery [Los Angeles] by the American Naturopathic Association during its 28th annual convention.

Following the services, attendees visited the urn of Prof. Ehret, and his ashes were formally dedicated by Dr. Gay Bogart.

During the morning session at the Hotel Clark, Dr. Phillip Lovell began by asking his audience to "pay silent tribute to the spirit of Mrs. Warren G. Harding." He then lectured on professional ethics. Other speakers at the morning meeting included Otto Carque, Dr. Benjamin Israel, Dr. F.E. Dorchester, Dr. Harvey Hazel, Dr. George Gillespie, Dr. Arthur W. Dennis, and Dr. James Faulkner.

During the afternoon conference, Dr. Gillespie, president of the American Association of Drugless Physicians, "paid a tribute to modern American womanhood." Dr. James A. Sanford lectured on "Educational requirements of the drugless practitioner."

Note: The title "Dr." above refers to an N.D. or doctor of naturopathic medicine.

582. Brook, Agnes. 1924. Health–Advice (Ad). *Los Angeles Times.* Nov. 30. p. J24.
• ***Summary:*** "By the late Dr. Harry Ellington Brook. This is the Three Months' course of Dietetic Home Treatment giving full and explicit directions in regard diet, exercise, breathing, etc.

"In order to dispose of the few remaining sets, the price has been greatly reduced. This is the last opportunity to secure this most excellent course. Send addressed stamped envelope for descriptive pamphlet. Mrs. Agnes Brook."

Note: Dr. Brook, longtime writer of the "Care of the Body" column in the *Los Angeles Times,* died on 3 May 1924. Address: P.O. Box 415, Los Angeles, California.

583. Carque Shop (The). 1924. Carque products (Ad). *Los Angeles Times.* Nov. 30. p. J24.
• ***Summary:*** "... are sold under U.S. Registered Trade Mark 'Natural Foods of California.' They are better foods at all times everywhere. Price list of new crop fruits and other foods upon request." Address: 2618 West Seventh St., Los Angeles, California. Phone: DUnkirk 4797.

584. Carqué, Otto. 1924. The naturopathic movement in Southern California. *Naturopath* (*New York City*) 29(11):1030-31. Nov.
• ***Summary:*** 1900–Dr. Carl Schutz, the pioneer, opened the first Naturopathic Institute and Sanitarium on West Seventh St., not far from Figueroa St. A few years later he moved to Hill Street and later to Fifth Street near Olive St.

1899–Harry Ellington Brook, N.D. starts his "Care of

© Copyright Soyinfo Center 2021

the Body" column in the *Los Angeles Times.* It continued until his death on 5 May 1924. His very able successor was Philip Lovell, N.D.

1904–Otto Carque starts his long career of making and selling natural foods in Los Angeles.

1909–California State Legislature passes the Naturopathic Bill, largely due to the untiring efforts of Dr. Schultz. Other early naturopaths in Los Angeles were Dr. Henry Gross and Dr. P. Olsen. Dr. George Starr White was the author of many valuable books on natural living and healing.

1915–Arnold Ehret arrives in the USA, at the invitation of Dr. Benedict Lust to visit the Panama Exposition [1915, held in San Francisco] and to examine the fruits raised in California. World War I forces him to prolong his stay. He settles down in Southern California, the land of fruits and flowers.

1917–John and Vera Richter start the first truly raw foods dining room in the United States.

Every year Southern California is attracting more and more people "as a place where an ideal climate, fertile soil and beautiful scenery combine to make this favored spot a practical out-of-door sanitarium." Address: Author of "Rational Diet" [California].

585. Health Food Products Co. 1924. Healthy News (Ad). *Los Angeles Times.* Dec. 14. p. J29. Sunday.
• ***Summary:*** This large square ad is a reduction of the front page of a newspaper titled *Healthy News.* Below the title in small bold letters: "Published in the interest of Better Health by the Health Food Products Co., 946 West Seventh St. Los Angeles, Cal." In a box to the right of the title: "Notice: This is a miniature reproduction of the front page of the Nov. *Healthy News.* If you would like to receive *Healthy News* regularly, free of charge, send your name and address to the Health Food Products Co., 946 W. 7th St. Los Angeles, Cal." Below that, in a banner running across the entire page: "Vol. 1; No. 10. November 1924. Mailed free to those interested."

There are then 6 boxes, each promoting something different: (1) Article titled "Therapeutic value of dried fruits," by Dr. Philip M. Lovell, Editor 'Care of the Body,' Los Angeles Sunday Times Magazine. After 5 lines: "(Continued on Page 4). (2) Article titled "Fasting for Health," by Dr. Frank McCoy. "Nationally known as a diet specialist and diagnostician, he has consented to contribute a series of monthly articles on Health and Diet Advice to Healthy News. After 14 lines: "(Continued on page 2).

(3) Article titled "Discovered! Vital force, by Paul C. Bragg. It begins: "We have accepted the theory that some foods contain vitamines and mineral salts which modern science has proven necessary for health and immunity from disease. But try as they may, they cannot separate them and show us that they exist. (Continued on page 3). (4) Ad for "Xmas packages" which "are more beautiful than ever this year. They include the choicest sun dried unsulphured fruits and nuts attractively packaged. What nicer gift could you make a friend, especially those in the East... Prices range from $1.00 to $5.00 including postage..." "In business for your health." (5) Ad for "Mucusless-Diet Healing System, by Prof. Arnold Ehret. A complete course in 25 lessons for those who would control their own health. Price $1.50 postpaid. Ehret Literature Publishing Co., 846 East 6th Street, Los Angeles, Cal." (6) Ad for "Inner-Clean–assists nature. Catarrhal conditions. Asthma and hay fever are caused by toxic accumulations within the blood. Mailed anywhere. 50¢ per package. An aromatic herb-compound perfected by Prof. Arnold Ehret, originator of the Mucusless Diet Healing System. Removes from the intestines 'age-old,' sticky, pasty material that has been robbing you of your energies thru pollution of the blood stream. Innerclean has completely restored thousands to perfect health. Relieves constipation. At your druggists."

Note: This is the earliest document seen (March 2007) that mentions Paul Bragg in connection with 946 West 7th Street. Address: 946 West Seventh St., Los Angeles, California.

586. Photograph related to Sophie Cubbison and the Cubbison Cracker Co. of Los Angeles. 1924. Undated.
• ***Summary:*** See next page. The following undated black-and-white photo (8 by 10 inches) was donated to Soyfoods Center by Leo Pearlstein of Lee and Associates in Los Angeles, a long-time friend of Sophie Cubbison:

Four black delivery vehicles (1 private car, and 3 trucks with solid rubber wheels) and 4 drivers parked in front of "Cubbison's Health Food Store" (large sign on white store. Barely legible under the sign is: "Owner: 3419 Pasadena Ave."). Analysis of the 4 license plates by an expert analyst (Jeff Minard of Huntington Beach, California) shows that this photo was taken in 1924. On the side of each truck is printed "Cubbison's Whole Wheat Products." In smaller letters: "Flaxseed crackers. Whole wheat bread. Soda (?) crackers. 3417 Pasadena Ave., L.A. Phone Lincoln 2969" (glossy). Note: Leo Pearlstein (2004/02) recalls visiting Sophie at this address (3419); the bakery was located next door (3417).

587. Richter, Vera M. 1924?. Mrs. Richter's cook-less book: With scientific food chart. Second ed. Los Angeles, California: Los Angeles Service and Supply Co. and Eutropheon (Published by the author). 53 p. Undated. No index. 19 cm.
• ***Summary:*** A book of raw food vegetarian recipes. Contents: Preface. Vegetable salads. Fruit salads. Dressings. Soups for the toothless. Beverages. Sun-dried breads. Cakes. Pies. Confections. Curative values of natural unfired foods (Food chart).

The chapter on "Confections" (p. 42-44) contains a

© Copyright Soyinfo Center 2021

number of natural-food confections in which the ingredients are rolled out, cut into squares, and served. these include: Carob confection (with pignolias and honey). Cocoanut-honey caramel. Cocoanut-raisin caramel. Peanut butter confection (with dates). Figola. Fig-almond confection, etc.

At the back of this book are many ads on unnumbered pages. One of these is titled "For a taste of sunshine try Dr. Richter's Natur-Bits: Unfired confections made of high grade fruits, nuts, honey–Delicious and nourishing. Twelve kinds; $0.70 a pound." The first three are: Cocoanut-Honey Squares. Cocoanut-Raisin Squares. Walnut and Fig Squares. (The Eutropheon, 927½ W. Sixth St., Los Angeles). Note: These natural confections sound like the forerunners of today's nutrition bars.

The previous ad, titled "The natural food diet courses," shows that John T. Richter, N.D., Al.D., gives a series of 7 free lectures at 927½ West Sixth St, Wednesday afternoons at 2:30 and Thursday evenings at 7:30. The public is invited and questions are answered. The 7th lecture includes an examination and certificate of endorsement.

The next ad, titled "What is health," is by The Grist Mill, at Sanitary Market, 251 South Spring St., Los Angeles. Tel. MAin 4874. "Health follows the keeping of natural laws." A few of the company's many products are listed, including whole wheat flour, and soy bean flour.

Two pages later is a price list of 25 products made and sold by the package goods department of the Los Angeles Service and Supply Co. and Eutropheon. These include breads, nut butters, and 12 kinds of confections. Address: 927½ West Sixth St., Los Angeles, California. Phone: BRoadway 0643.

588. Health Food Products Co. 1925. Free lecture: Every Tuesday night (Ad). *Los Angeles Times.* Jan. 11. p. K27.
• ***Summary:*** "Hear Prof. Paul C. Bragg, noted physical culturist, lecture on important health subjects. Lectures given every Tuesday night at 946 West 7th street under the auspices of the Health Food Products Co. Admission entirely free."

Note: This is the earliest document seen (July 2021) in which Paul Bragg uses the title "Prof." before his name; it is unclear when or from where he obtained this title. Address: 946 West Seventh Street, [Los Angeles, California].

589. Fair (The). 1925. The popular price store (Ad). *Chicago Daily Tribune.* Jan. 18. p. C6.
• ***Summary:*** Within this full page ad is a section titled

© Copyright Soyinfo Center 2021

"Bargain basement: Pure food store," states: "Battle Creek Sanitarium Health Foods. Mrs. Toppe, a direct representative from Battle Creek, Michigan, and an expert on Battle Creek Health Foods, is in charge of our demonstration. Complete line of these health foods are on display and Mrs. Toppe will give you very valuable information in regard to their use and preparation." Battle Creek Lextro-Dextrine [Lacto Dextrine?] sells for 98¢ per package. Address: State, Adams and Dearborn Streets.

590. May Co. (The). 1925. Grocery store (Ad). *Los Angeles Times.* Jan. 23. p. 8.
• ***Summary:*** "Listed below are many of the rare, out-of-the-ordinary delicacies to be found in this complete Grocery Store–helpful suggestions for the discriminating hostess."

"China and Japan: Jasmine tea. Hong Kong ginger in crocks. Shoyu sauce. Boiled bamboo shoots."

"Imported health foods–from Dr. Huedebert, Paris; Dr. Charasse, Marseilles; Brusson Jeune, Ville Mur–for diabetes, dyspepsia, constipation, indigestion and reducing weight." Includes Aleurone bread muffins, Gluten bread, Levulose powder, Mignonettes of gluten–small bread balls for soup.

"Battle Creek Sanitarium Health Foods [Michigan]. These famous preparations will also be found in our Health Food Section, and include Colax, an agar biscuit; Lacto auxiliary food; Lacto Dextrine, antitoxic food; Casein-Gluten Flour, a superior food; Canned fruits, vegetables for restricted diet; Charcoal tablets; Vegex–the wonderful vitamine food." Address: Broadway at Eighth. Grocery store–Fourth Floor [Los Angeles].

591. Lust's Health Food Bakery, Inc. 1925. Moving to larger headquarters (Ad). *Naturopath* (*New York City*) 30(1):90. Jan.
• ***Summary:*** A full page ad. Louis Lust's bakery will move to their new, large headquarters in the double buildings at 309-311 East 56th St., New York City. Phone: Plaza 7687. This location will also have a modern "Retail Department, where a full line of all their own Health Food products as well as a department of the Battle Creek Food Co.'s products [Michigan] and many other noted health food quality products will be kept on sale."

"The old stand at the corner of 105th Street and Park Avenue, established since 1903, will be continued as their Harlem Retail Branch, which will be supplied twice daily" with the company's freshly baked goods. Phone: Lehigh 2111.

This ad also appeared in the April 1925 issue (p. 389) of this magazine.

592. *Los Angeles Times.* 1925. Broadcast: KHJ. Feb. 15. p. 17.
• ***Summary:*** Tonight at 7:30 p.m. "Radioland will be addressed on the subject of art, by Harold Swartz... He will be followed by Dr. Philip Lovell, who speaks on 'Care of the Body.'"

593. *Naturopath* (*New York City*). 1925. Notes on the proceedings of the Twenty-Eighth Annual Convention of the American Naturopathic Association. Los Angeles, California, Nov. 20-22, 1924. 30(2):105-10. Feb.
• ***Summary:*** Summarizes presentations by Dr. J.J. Ritchie. Dr. F.E. Dorchester (Vancouver, BC, Canada). Dr. Frank McCoy. Dr. John F. Killeen (San Francisco). Dr. Grace Eldridge. Dr. Benjamin Israel (Chiropractic). Dr. Axel Emil Gibson. Dr. Philip Lovell (Health Education). Prof. Paul Bragg ("As drugless men we must... show the example of proper exercise, diet, breathing." We should walk at least two miles every day. "Bernarr Macfadden has done more to make health popular than any other individual").

Large portrait photos show: (1) Dr. Gustave W. Haas, President, California State Society of Naturopaths. (2) Dr. Henry Gross, State Representative of the A.N.A. for California. (3) Dr. Carl Schultz, the Father of Naturopathy in California–wearing a large handlebar mustache.

594. *Naturopath* (*New York City*). 1925. Notes on the proceedings of the Twenty-Eighth Annual Convention of the American Naturopathic Association. Los Angeles, California, Nov. 20-22, 1924. 30(3):[205]-09. March.
• ***Summary:*** Summarizes presentations by Dr. Starr White–"The true physician." Dr. J. Haskel Kritzer–"Iridiagnosis." Otto Carqué–"The value of fruits." Dr. Harvey Hazel–"The doctor's reward." Dr. James Faulkner–"Unfired foods." E.C. Burton–"Battle Creek [Michigan] and Dr. John Harvey Kellogg." Harry G. Cubbison [husband of Sophie C. Cubbison, health food pioneer in Los Angeles]–"The value of whole wheat." Dr. C.A. Newcombe [former police surgeon in New York City]–"Treating incorrigible inmates at Sing Sing penitentiary with a vegetarian diet."

595. *Los Angeles Times.* 1925. "Raw! Raw!" will have new meaning. April 8. p. A10.
• ***Summary:*** This article, by a "Local correspondent," with a dateline of "Inglewood, April 7," notes that Clark Irvine climbed Mt. Shasta last summer on a diet of apples and has a food budget of 11 cents a day; his health diet is consumed raw. On Thursday evening, Irvine will deliver a lecture titled "How to live right through diet and exercise" to the members of the Inglewood Woman's Club as the "first gun in his campaign" to start a naturopathy school here. If successful, the school's college yell will include "raw! raw!"

596. *Naturopath* (*New York City*). 1925. Naturopathic news. 30(4):363-80. April.
• ***Summary:*** Discusses Benedict Lust's trip to California for the ANA convention in Los Angeles, and meetings with many West Coast naturopaths, including Dr. Gross, Dr. Haas,

© Copyright Soyinfo Center 2021

Dr. Carl Schultz, and Paul Bragg. Discusses at length the late Arnold Ehret and his manager Fred Hirsch.

597. Health Food Products Co. 1925. "The fast way to health." Free lecture by Dr. Frank McCoy (Ad). *Los Angeles Times.* May 3. p. J28.
• ***Summary:*** "The Health Food Products Co. has been very fortunate in being able to book Dr. McCoy to deliver his famous lecture that has started thousands on the road to regained health and happiness. Doors open free to the public. Come early for a good seat. Lecture begins promptly. Prof. Paul Bragg will also speak.

"Friday, May 8th, 8 p.m. Choral Hall, 5th & Olive Sts."

"Free health lecture every Tuesday, 8 p.m., at The Health Center, 1000 West Seventh Street."

Note: This is the earliest document seen (March 2007) concerning Paul Bragg in connection with 1000 West Seventh Street.

Note 3. Before Feb. 1924, Health Food Products Co. was named Van Houten Health Food Store / Company. Now, it seems that Health Food Products Co. and The Health Center are both at the same location, 1000 West Seventh St. By 15 Aug. 1926 Paul Bragg was clearly the owner of the Health Center. Address: 1000 West Seventh Street, [Los Angeles, California].

598. *Los Angeles Times.* 1925. Film star for Burbank Show: Actress to preside at food booth. July 18. p. 5.
• ***Summary:*** Miss Charlotte Stevens will appear nightly and act as the official hostess of the Cubbison booth at Burbank's industrial and pure food show. "Miss Stevens is one of the effervescent stars of Screenland and attributes her health to correct dieting and the proper selection of foods. She is a regular patron of the Health Food Center of Los Angeles." In San Francisco she recently played the ingenue part of "Lady Be Good." A large photo shows Charlotte Stevens.

599. *Nature's Path* (*New York City*). 1925-1960. Serial/periodical. Published in New York City by Benedict Lust, M.D., and the American Naturopathic Assoc. Vol. 1. No. 1. July 1925. Vol. 58. No. 12. Dec. 1953.
• ***Summary:*** Mergentime. 1992. Natural Foods Merchandiser. Dec. p. 26. In 1926 Benedict Lust (lived 1872-1945), M.D. owned The Original Health Food Store in New York City. "In addition to lecturing around the country, Lust produced a publication called *Nature's Path* in the basement of the store."

Kirchfeld & Boyle. 1994. p. 209, 313. "The first issue of *Nature's Path* in 1925 sold 50,000 copies." It "was a popular magazine for the lay population" and "was published until 1953. Thereafter, no other periodical of the American naturopathic profession equalled Lust's publication with respect to breadth, depth, and duration."

Talk with Rex Manus of Health Research in Mokelumne Hill, California. This periodical was published from 1925 to at least 1933. Rex has a 1933 issue, which was published from 236 E. 35th St., New York, NY. The predecessor this magazine was *Naturopath,* published from 1902-1927. Lust died in about 1946.

Talk with Lynn Attwood, librarian, NCNM. 2007. July 30. The National College of Natural Medicine (Portland, Oregon) owns *Nature's Path* 1925-1953 (bound) and 1954-1960 (unbound). The issues of *Nature's Path* from 1954 on look just like the previous years. They are the same size, same subscription rate, different editorial office address, but it is still in New York City, and the volume number continues with 1954 being volume 59. Address: New York City.

600. *Natures Path to Health and Power.* 1925-1927. Serial/periodical. Published in New York by the American Naturopathic Association. Vol. 1, no. 1 July 1925. *
• ***Summary:*** "Official journal of the lay department of the American Naturopathic Association and other similar societies."

601. Ralphs Grocery Co. 1925. Announcement: Opening (Ad). *Los Angeles Times.* Aug. 10. p. 4.
• ***Summary:*** "After 51 years of successful merchandising in Los Angeles," Ralphs announces the opening of a complete market at 5470-72-74 Angeles Mesa Drive (Corner 57th St.). Tuesday, Aug. 11. "Refreshment and samples served free by demonstrators of the following goods:" There follows a list of about 80 brand-name foods, incl. "Carque's Fig Cereal" [coffee substitute]. Address: [California].

602. Carqué, Otto. 1925. Natural foods: The safe way to health. Los Angeles, California: Carqué Pure Food Co., Inc. 359 p. Illust. Index. 20 cm.
• ***Summary:*** This book advocates a natural-food, vegetarian diet, but not necessarily a vegan diet.

Contents: Part I: Fundamental facts about food and health. 1. The old and new conceptions of the cause of disease. 2. Drug medication, vaccination, and serum therapy. 3. Nature's healing factors: Sunlight, fresh air, exercise, rest, water, the importance of natural foods for life and health, why denatured foods (white flour, refined sugar, candies, etc) are injurious. 4. The constituents of food considered in the light of modern physiology and biology: Proteins, carbohydrates, fats and oils, cellulose, fruit acids are organic acids, organic salts, the alkaline or base-forming elements (iron, sodium, calcium, magnesium, potassium, manganese, and aluminum), the acid-forming elements (phosphorus, sulphur, silicon, chlorine, fluorine, iodine, bromine, arsenic), the vitamins.

5. Rational soil culture essential for the production of superior foods. 6. The conservation of vital force (stimulants, narcotics, elimination of waste, quality of foods, prolongation of life, alkaline and acid-forming foods). 7.

© Copyright Soyinfo Center 2021

Why the calorie theory is misleading. 8. Fruit, man's best friend (the fruit of the tree, sulphured and unsulphured fruits). 9. Nuts–Nature's most concentrated foods.

10. Vegetables–Nature's blood purifiers (Great hygienic value of green leaves, proper soil fertilization most essential to vegetable culture, loss of organic salts in cooking, classification of vegetables–5 classes). 11. Cereals and legumes (Cereals falsely called "The staff of life," whole grain products are the best, the great waste of food elements by modern milling processes, legumes–an important food). 12. Milk and dairy products (Milk not a perfect food for adults). 13. Meat–the least essential and most expensive of all foods (the vegetarian alternative).

Part II: Practical dietetics. 14. How to live well on less food. 15. The feeding of infants and children (lactation, almond milk, soy bean milk). 16. The rational preparation of foods. 17. Rational food combinations (importance of simplicity of eating, the mono-diet and its advantages). 18. Simple and well balanced menus for all seasons.

Appendix: Tables and statistics. A1. Analyses showing the amount of sodium, calcium and iron in foods. A2. Amount of food materials necessary to supply one ounce of protein. A3. Amount of calories contained in one pound and one ounce of 200 food products. A4. Average time required for gastric digestion of foods. A5. Annual consumption of sugar, soft drinks, salt, spices, coffee, tobacco, drugs, alcohol, etc., in the United States. A6. Regulations for the enforcement of the Food and Drug Act. Important information about chemical preservatives and artificial colors.

The Preface (and the book) begins: "Two powerful superstitions are impeding the welfare and progress of the human race. The one is the conviction that disease is an entity, a mysterious something that attacks us without warning from the outside, either in the form of germs or as inclemency of weather. The other–perhaps the more harmful of the two–is the belief that for each disease specific remedies must be found, such as drugs, serums, vaccines, glandular extracts, etc., and that, when we are afflicted, we have to submit to a specialist's treatment or even to the affected parts or organs."

The average individual tries "to shift the responsibility for his sins of omission or commission to some imaginary cause, rather than to hold himself accountable for the violation of nature's laws." There is "almost universal ignorance of the fact that disease is merely an effort on the part of nature or the universal life force to restore normal conditions in the organism. Our present system of commercialism has taken advantage of this situation by misleading people through clever advertising to persist in their errors in order to maintain the demand for drugs and serums, proprietary medicines,..."

Chapter 11, "Cereals and Legumes," briefly discusses many types of soyfoods–soy bean sprouts, milk, flour, tofu, soy sauce, and oil (p. 142). Page 196 discusses the use of soy bean milk and almond milk for feeding infants and children.

Chapter 16, titled "The Rational Preparation of Foods," contains a long and detailed section on soy beans (266-71), with subsections on boiled soy beans, soy bean milk, tofu, soy sauce, and soy bean sprouts. Home preparation of each is described. Miso, yuba, natto, and hamananatto are also mentioned (p. 268). Soy-related recipes include: Baked soy beans (p. 269). Soy bean loaf. Soy bean croquettes. Soy bean bread (p. 270).

The section titled "Home made cheese" begins: "Man can live well without milk and dairy products, if he makes judicious use of legumes and nuts in various forms, as has been explained in the preceding chapters, but under the present system of agriculture and production of foodstuffs, many people have to make occasional use of milk products... As the commercial cheese are generally heavily salted, preference should be given to home made cheese... Cottage cheese made without salt is the most wholesome of the cheeses."

Chapter 9 (p. 119-24), about nuts, states: "The making of nut butters is not a difficult process. At present peanuts and almonds are chiefly used for this purpose... The blanching of peanuts and almonds is now done on a large scale by special machinery, and the blanched nuts can be procured in nearly all the larger cities." Break the blanched nuts into small pieces by running them through the Climax Grater or a food chopper. Put them into a moderately hot oven for a few minutes to make them dry and crisp, then run them through a tightly adjusted nut mill to create a "smooth, palatable nut butter." A large table (p. 122) compares the composition of various nuts and nut butters (almond butter, peanut butter) with meat, cheese, eggs, cow butter, and whole wheat bread. "The pecan contains the largest amount of fat, about 70%, closely followed by the hickory nut, brazil nut, filbert and pine nut, which all contain over 60% of fat. The pignolia imported from Spain ranks highest in the amount of protein, containing nearly 34%; the peanut comes next with 29.8%; the butter nut, almond. pistachio, all contain over 20% protein, excelling the best cuts of meat in that respect. The almond does not contain any starch as is, therefore, the nut best suitable for infants, especially in the form of almond milk." Chufa contains 3.5% protein and 31.6% fat.

The section titled "Fruit and nut confections" (p. 212-15) discusses and has recipes for natural candies and confections.

The section titled "How the American people deplete their vitality by their favorite poisons: The tremendous waste of our material wealth" (p. 328-43) discusses (p. 338-43): The amount spent in 1924 on each of 15 "adulterated foods and drinks and of poisonous stimulants and narcotics" ($5,040 million) compared with the amount spent on foods and vegetables ($850 million, or 16.8% as much). Refined sugar. Coffee. Tobacco. Condiments, etc. Alcoholic

© Copyright Soyinfo Center 2021

beverages. Drugs. Regulations for the enforcement of the Food and Drug Act (due to untiring efforts of Dr. Harvey W. Wiley, former chief of the Bureau of Chemistry, USDA). Sodium benzoate and sulphur dioxide. Salt. Saltpeter. Boric acid and borax. Saccharine. Mineral and coal tar dyes. Laxity in enforcement of the Pure Food Law.

On pages 344-47 is information about the Carque Pure Food Company (incorporated 1912) and its founder and owner Otto Carque, including a brief biography of Otto, a list of leading Carque food products, and a full page photo of the company's new home at 729 Seward St., on 1 Oct. 1925 (2 story brick building).

The food products are arranged by groups: Fruits: Sun-dried and dehydrated, without bleaches or preservatives (Black mission figs, white Smyrna-type figs, prunes, dates, olives, raisins, apricots, peaches, pears). Nuts: Fresh, selected and unroasted (almonds, walnuts, Brazil nuts, pecans, pignolias, pistachios, peanuts). Confections: Of assorted fruits, nuts and honey, without sugar, salt, glucose or preservatives (delectables, fruit nuggets, Kandy-Andy). Stamina and laxative foods (Nut-Fruto, Prunola {prunes and olives}, fruit laxative). Nut butters: Ground from whole nuts, uncooked and unsalted (almond, nut cream, peanut). Cereals and products: Made from re-cleaned whole grain (wheat flour, yellow corn meal, brown rice, breakfast food, crackers). Miscellaneous (olive oil, strained honey, raw sugar, fig-cereal breakfast drink {instead of coffee}). Price list and descriptive circulars on request.

Note 1. This is the earliest English-language document (or book) seen (June 2021) with the term "Natural foods" in the title that also discusses soy.

Note 2. This is the earliest document seen stating that Carque's company had a new home at 729 Seward St. Address: Los Angeles, California.

603. *Vegetarian Magazine and Fruitarian.* 1925. Progress of the movement: Report of National Vegetarian Society. 24(9):12. Sept.

• ***Summary:*** "National Vegetarian Society officers: President, L.J.C. Daniels, Trinity Court, Boston, Massachusetts. Vice President, George Starr White, M.D., 327 Alvarado St., Los Angeles, California. Secretary and treasurer, Jean Roberts Albert, Juliaetta, Idaho. Board of directors: Mrs. Mary Smith Heywood, Chadron, Nebraska. William Howard Hay, M.D., Buffalo, New York. Sara Lee Doyen, Madison, Maine. Dr. Philip G. Peabody, Boston, Mass. Prof. John Orth, Boston, Mass. Alice Park, Palo Alto, California. Otto Carque, 2618 W. Seventh St., Los Angeles, Calif. The society is chartered under the laws of Illinois.

"Membership, 25 cents. Annual subscription to *The Vegetarian Magazine,* $1.50 in America; Canada and foreign, $1.75."

604. Carque Pure Food Company, Inc. 1925. Carqué products... (Ad). *Los Angeles Times.* Oct. 4. p. L2. Sunday magazine.

• ***Summary:*** "The gift of distinction is Catholic. All have it; it is evinced in many ways. Carqué products are different; they have always been so. And they are 'naturally' inseparable from *Health.*

"For more than thirteen years [i.e. since about 1912] the Carque Pure Food Company has packed in Los Angeles and distributed throughout the United States fruits that are naturally dried, cereals from which no part is removed, unsalted nutbutters made from whole uncooked nuts, and many other food products of essential purity.

"The Natural Foods Building, Seward Street, Los Angeles, today is dedicated to your interests. Remember that a safe food protects its user and then rely upon a rational diet as your insurance against ill health."

"Visit the Carqué Shops–Natural Foods of California–at 729 Seward St.: Main store–near Melrose Ave.–Hollywood Dist. (Moved from 2618 West Seventh Street), Los Angeles.

"Mail this coupon today–Kar-Kay–to the Carque Pure Food Company, Inc." for a free "illustrated price list."

Note 1. In the upper left corner of this ad is a small triangular map showing the location of Carque's shop in relation to Seward St., Melrose Ave., Highland Ave., Santa Monica Blvd., and Vine St.

Note 2. This is the earliest document seen (July 2021) in connection with Carque which contains the term "Natural Foods Building" or which mentions Seward St.; the Building is located at 729 Seward St.

Note 3. This is the earliest English-language document seen (Dec. 2012) that contains the word "nutbutters" (or "nutbutter," spelled as one word). However it appears to be a typographical error, since in the company's next ad in this newspaper (and in all subsequent ads), it is spelled "nut butters" (two words). Address: The Natural Foods Building, 729 Seward St., Los Angeles, California.

605. Carque Pure Food Company, Inc. 1925. Food... (Ad). *Los Angeles Times.* Nov. 1. p. K2. Sunday magazine.

• ***Summary:*** "... should be sustaining, with no indigestible additions. It should be natural–not deprived of vital parts. It should please your palate without depressing your nervous system. It should leave nothing in the body to create disease.

"For more than thirteen years the Carque Pure Food Company, Inc. has sold such foods. They are distributed under this registered trade mark–'Natural Foods of California' and include:

"Fruits dried without chemicals. Unsalted nut butters made from whole uncooked nuts. Cereals from which no part is removed. Pure fragrant honey and olive oil. 'Fig-Cereal' breakfast drink and 'Prunola' sandwich filling. Pale-roasted coffee mellow with age. Fruit candies made with honey. Laxative preparations–natural. Books on health and diet by Otto Carque. A safe food protects its user."

606. Dyas Co. (B.H.)–Ville de Paris. 1925. Carque California Fruits and Nuts! (Ad). *Los Angeles Times.* Nov. 22. p. C10.
• ***Summary:*** This stylish, elegant display ad, with illustrations of Christmas trees, candles, and wreaths, also shows the cover and interior of two round metal gift canisters of Carque mixed fruits and nuts. "Again, for the Christmas season, the Ville de Paris introduces Carque California Fruits and Nuts!

"Typically Californian delicacies, packed in Los Angeles at the unique Carque factory, come to the Ville de Paris–for the holiday gifts one loves to send to friends in other parts of the country.

"Carque (pronounced 'Car-kay') Fruits are known for their purity in packaging and preparation–attractive gift packages–delicious combinations!

"Available at the Ville in colorful tins; redwood and pine boxes, baskets–even burlap bags of nuts!

"Fruit cakes. Plum puddings. Assorted fruits. Glace fruits. Walnuts in shells. Grapefruit cup. At the Ville–Second floor." Address: Seventh at Olive, Los Angeles, California.

607. Health Food Products Co. 1925. The Health Center News (Ad). *Los Angeles Times.* Nov. 29. p. K25. Sunday.
• ***Summary:*** This large square ad looks like the reduced front page of a newspaper titled *The Health Center News.* Above the title on a banner: "In business for your health." In the middle of the title in white on a bold black background: "1000 W. 7th St." Below the title in large bold letters: "Published by the Health Food Products Co." In smaller all-capital letters running across the page: "Mail and phone orders given special attention. Phone VAndyke 4063."

There are then 5 boxes, each promoting something different: (1) "Inner-Clean removes cause of every sickness." This is an "aromatic herb-vegetable compound perfected by Prof. Arnold Ehret, originator of the Mucusless Diet Healing System" [MDHS]. "Prof. Arnold Ehret's 'M.D.H.S.' lesson course sent anywhere in the U.S.A., $1.50 postpaid."

(2) "Free health lectures, Health Center Hall, 1000 W. 7th St. Tues, Dec. 1, 8 P.M.,–Prof. Paul Bragg. Subject: 'Breathe your way to health.' Fri., Dec. 4, 8 P.M.–Dr. John Dequer (Decker), America's foremost health lecturer. Subject: 'Conquering ill health through seasonal foods.'"

(3) "Disease questions and health answers. Questions of health will be answered in this column or by personal letter. Address communications to Chief Clinician [Bragg], Health Center, 1000 W. 7th St., Los Angeles. Enclose stamped envelope." There are 2 questions. Each answer recommends the purchase of one or more products sold by the Health Center. For example: Q2. "A doctor tells me I must quit coffee. I have tried one or two coffee substitutes, but don't like flavors. What do you recommend? E.A.H." Ans: "Minute Brew, made by the Battle Creek Food Co. [Michigan], contains many of the elements of flavor and aroma that appeal to coffee drinkers and is absolutely free from caffein [caffeine]. Kafex is a coffee substitute made of cereals with an especially delicious flavor. Our Health Food Store carries all these fine beverages."

(4) "Wanderlusters' hike next Sunday, Dec. 6th."

(5) "By special appointment we are headquarters for Battle Creek Sanitarium Foods. Ask for valuable booklets and samples. Health Food Products Co. Phone VA. 4063. Free city delivery. 1000 W. 7th St."

Note: The basic concept and format of this ad is very similar to that titled "Healthy News" and run by the Health Foods Products Co. on 14 Dec. 1924. Moreover, Paul Bragg contributed an article to that ad in Healthy News. Address: 1000 West Seventh Street, [Los Angeles, California]. Phone: VAndike 4063.

608. *Naturopath* (*New York City*). 1925. Bread that kills. 30(11):955. Nov.
• ***Summary:*** "Consumers of white bread commit suicide by degrees." "Whole grain contains two powerful ferments called peptase and diastase. The diastase changes the starch into sugar. These ferments are retained in the production of wholewheat bread, and this is the reason why wholewheat bread aids digestion. But white bread, which is deprived of these powerful ferments, retards digestion and clogs the intestines."

"It was the Hon. Chauncey M. Depew [1834-1928, U.S. Senator from New York] who has made the remark as far back as thirty years ago, that we dig our graves with our knives and forks."

609. Baker, William C. 1925. Mastercraft in cakes and decorating: Decorating designs and instructions, recipes and methods of handling. Chicago, Illinois: Bakers' Helper Co. 194 + [4] p. Illust. (some color). Index. 26 cm.
• ***Summary:*** About cakes, cake decorating, confectionery, and desserts, with many photos. Pages 119-192 are time-tested recipes. Pages 193-94 are about "Photographing cakes." The Foreword (by the publisher) says that neither time nor money have been spared in the production of this book. "It is representative of the life of a man sincerely interested in the improvement of the baking trade and with an actual experience of 38 years [i.e., since about 1888] to draw upon for the material in this book. This includes 22

© Copyright Soyinfo Center 2021

years [since about 1903] of hotel experience, in the best hotels of the country. The cakes pictured were all made and sold in his own bakery, to fill orders in the regular line of business." "Mr. Baker considers cake ornamenting one of the essential professional acquirements of the baker who wants to progress." He has found the art one of his best assets for advertising and he is an enthusiastic believer in the value of advertising. He gets the best type of free publicity from window displays. "Photographs of the beautiful cakes which he has made for special celebrations in his own city and surrounding territory have frequently appeared in the pictorial section of Southern California newspapers."

Concerning window displays, Baker notes: "I am proud to say no other store in this town has such crowds of people in front of its windows as the American Bakery. I know some have come inside who would not have otherwise."

"As Mr. Baker has maintained a good paying trade in decorated cakes... he is placing his knowledge at the service of other bakers in the present form."

The author's Preface begins: "The purpose of this book is to help better the baking business by giving others the benefit of my own knowledge, as I do not believe a man should keep to himself what he has learned. Having the success of every baker at heart, I present "Mastercraft in Cakes and Decorating" not to make a name for myself, nor for profit, but to help the baker who wishes to improve in cake making and ornamenting... When deciding to be a baker, a man should be ambitious to know the business completely... The young baker should realize that, no matter how modest his start in business, if he has learned his work well, and offers real service to his community, he is bound to succeed."

"Every baker today is at least able to read, and with the experience of old bakers, the up-to-date advantages of machinery, and chemistry helps all brought to the student's door, there is not reason why he should not forge ahead."

"I was fortunate enough to take up ornamenting when a boy, for pleasure, just as any other boy would take up music or painting. This art is my hobby, and I use it in my business whenever an opportunity presents itself... There is a growing demand for delicious cakes with special decorations to fit occasions. The popularity of ornamenting has been reviving steadily, and the ambitious baker is recognizing its worth as a success factor." At the end of the Preface is Baker's signature, "W.C. Baker."

Note 1. None of the following are mentioned in this book: Soy (in any form), lima beans, gluten, or gluten-free products.

Note 2. This is the earliest document seen (July 2021) by Bill Baker or that mentions Bill Baker (the author). Address: [Southern California].

610. Finkel, Harry. 1925. Health via nature: The health book for the layman, including a rational system of health culture and the prevention, treatment and cure of disease by natural methods. Also the study of natural dietetics, the preparation and combination of foods for health and disease. Los Angeles, California: Society for Public Health Education. 270 p.

• ***Summary:*** "Dedication: This book I dedicate to those who have been sacrificed on the altar of science, and to those who have died through lack of understanding of the proper care of their bodies."

Poisons or toxins in the body are the primary basis of all disease (p. 8).

"Dear reader, you are sick because you have disobeyed the laws of nature and abused your body. To correct your debilitated condition you must change your mode of living and remove the cause that is responsible for your physical derangement" (p. 10).

"The time for drugless methods has arrived. Nature cure treatment is spreading like wildfire in all parts of the world, tearing down and sweeping away the false notions of drug therapy" (p. 11).

Chapter 8 begins: "Meat not a fit food for man: From all evidence presented by science meat is not fit for human food." He then discusses human anatomy and physiology (p. 131) and advocates a vegetarian diet (p. 134-35).

Chapter 9, titled "Key to the charts," begins with: "How to select and combine foods" [food combining]. In the chart on p. 151, under Legumes, one of the foods is "Soy beans, dry." They are a Class 1 food with a high degree of toxicity. "All foods are uncooked unless otherwise indicated."

Finkel's three classes of food, defined on page 130, are "based on the degree of toxin usually produced by them in the body." Class 1, the least toxic, contain less than 5% protein. Class 2 contain 5-15% protein. Class 3, the most toxic, contain more than 15% protein. Class 3 foods "are mostly fresh cheese, cream, and most of the nuts and legumes.

"There are other articles generally classed as foods, such as meat, fowl, fish, and aged cheese. These so-called foods are not advisable to be eaten at all because of their extreme production of uric acid toxins in the body and their rapid rate of decomposition." Address: N.D.D.C., The Society for Public Health Education, 544 No. Rossmore Ave., Los Angeles, California.

© Copyright Soyinfo Center 2021

cm. Reprinted in 1972 by AMS Press. [31 ref]

• ***Summary:*** Prof. R. Numbers, in *Prophetess of Health: A Study of Ellen G. White* (1976, p. 209), calls this the best history of Seventh-day Adventists written to date. It is widely considered a valuable account of the denomination's history and activities worldwide into the early 20th century.

The Preface and Introduction state: "The history of a denomination is best understood when viewed in its relation to church history as a whole, and especially to that history in its early stages" (p. 11).

Chapters 8 and 22 are about publishing work and publications. Chapters 11, 31, and 34 are about health and temperance work. Contains a good bibliography and a chronology of key events in the history of the Advent movement from 1831 to 1924. On 1 Oct. 1860 the name "Seventh-day Adventist" was adopted by the denomination. In 1865 the first health publication, titled "How to Live," was published. It was written and compiled by Mrs. Ellen G. White. On 1 Aug. 1866 the first denominational health journal, titled *Health Reformer,* was published. Later that year, on 5 Sept. 1866, the Health Reform Institute (later Battle Creek Sanitarium, Battle Creek, Michigan) was opened for patients.

W.W. Prescott had general charge of Adventist work in Great Britain from 1897 to 1901. During this time beginnings were made toward a health magazine and a health food factory. Note: The factory was operated by The International Health Association Ltd., founded in 1899; the Association was renamed Granose Foods Ltd. in 1926.

"The health food factory, situated in Surrey [it began operating in 1899], burned to the ground [in 1907]; but through the efforts of H.G. Butler the business was put on its feet again, the factory moved to Birmingham, and a good patronage built up" (p. 368-69).

Note: In 1907 all SDA institutions in England, including the food factory, were centralized at Stanborough Park, Watford, Hertfordshire.

"The Stanborough Park Sanitarium, located on grounds adjacent to the college of that name, was dedicated on July 3, 1912." A health food factory was also built at Stanborough Park [in about 1907-09]. A photo (p. 377) shows this health food factory.

"An important feature of our medical education is in the operation of our College of Medical Evangelists at Loma Linda and Los Angeles, California. This unique institution, the only one of its kind in the world, was established for the purpose of training medical missionary physicians and other medical evangelists" (p. 648-49).

"Our health food factories are flourishing. With ten food factories, many food stores, cafés, and cafeterias, this feature

© Copyright Soyinfo Center 2021

THE HEALTH FOOD FACTORY

of our health work occupies a wide field of usefulness. The health food business of the Australasian Union deserves notice. With several factories, a large wholesale depot, many retail stores, and a system of affiliated cafés, it represents en enterprise of widespread usefulness and influence. The food sales of a single year amount to $750,000. The profits are largely used for the support of church schools.

"Our health work stands distinctly as one of reform... This means to point out the better way of living, make plain the laws of health, and urge obedience to them. It enables us to present these laws as the laws of God, and to point men and women to Him as the healer alike of body and soul" (p. 649).

Mahlon Ellsworth Olsen lived 1873-1952.

614. Richter, Vera. 1925. Mrs. Richter's cook-less book: With scientific food chart. Third ed. Los Angeles, California: Los Angeles Service and Supply Co. and Eutropheon (Published by the author). 53 p. 19 cm.

• ***Summary:*** A book of raw food recipes. Contents: Preface. Vegetable salads. Fruit salads. Dressings. Soups for the toothless. Beverages. Sun-dried breads. Cakes. Pies. Confections. Curative values of natural unfired foods (Food chart).

The Preface states: "To the logical thinker it is plain that a sound body cannot be built of poor material. Of what does the right material for body-building consist? How shall we judge? We read many books, attend lectures, we hear divers theories expounded.

"We must judge by results. 'By their fruits ye shall know them.' A system of living which will take us through life without sickness and without fatigue is sought by all. Taking this as a criterion, the natural food system stands the test. *It gets results*–not only the negative results of freedom from sickness and fatigue, but creates a new feeling of well-being and vigor. However, those who have built their bodies year after year of poor material and too much of it, must not expect to rejuvenate themselves quickly. There are no miracles in Nature. Results of a lifetime of indulgence in cooked food cannot be expected to be eradicated by just a few meals of natural food.

"People who have existed for years on devitalized food, when making the change to natural or uncooked food, sometimes complain of not feeling satisfied on their new diet. This is because their body cells are clamoring for the old stimulants, cooked foods, of which they are built. Such individuals usually do not realize that the artificial energy which they experience for a time on the cooked food diet is but due to a whipping or irritation of the nerves by the poisons with which the system is loaded.

"In cleansing a dirty house dust will arise and inconveniences must be endured. When one resolves to cleanse the physical temple after a long period of wrong living it must be remembered that the eliminations which will occur are preliminaries in the re-building process. Perseverance must be the watchword during these temporary conditions, in the knowledge that the disagreeable symptoms will soon give way to normal and healthy reactions. It will be found that the cleansing period will be shortened if, in addition to natural food, sun and air baths are indulged in, thus encouraging elimination through the skin, also deep breathing and exercising. Remember that 'Nature cures, not the physician', and once the question of the proper care of the body is settled, the natural life may be lived

© Copyright Soyinfo Center 2021

automatically. It isn't necessary to talk and think food ad nauseam, but go about the real business of living, knowing that the body will not intrude upon our attention with the usual train of ills which mankind unnecessarily endures.

"These recipes you will find simple, economical and satisfying to the unperverted taste–more so with time. They are in use at our Dining Room, the Eutropheon.–Vera Richter."

The chapter on "Confections" (p. 42-44) contains a number of natural-food confections in which the ingredients are rolled out, cut into squares, and served. these include: Carob confection (with pignolias and honey). Cocoanut-honey caramel. Cocoanut-raisin caramel. Peanut butter confection (with dates). Figola. Fig-almond confection, etc.

At the back of this book are many ads on unnumbered pages. One of these is titled "For a taste of sunshine try Dr. Richter's Natur-Bits: Unfired confections made of high grade fruits, nuts, honey–Delicious and nourishing. Twelve kinds; $0.70 a pound." The first three are: Cocoanut-Honey Squares. Cocoanut-Raisin Squares. Walnut and Fig Squares. (The Eutropheon, 927½ W. Sixth St., Los Angeles). Note: These natural confections sound like the forerunners of today's nutrition bars.

The previous ad, titled "The natural food diet courses," shows that John T. Richter, N.D., Al.D., gives a series of 7 free lectures at 927½ West Sixth St, Wednesday afternoons at 2:30 and Thursday evenings at 7:30. The public is invited and questions are answered. The 7th lecture includes an examination and certificate of endorsement.

The next ad, titled "What is health," is by The Grist Mill, at Sanitary Market, 251 South Spring St., Los Angeles. Tel. MAin 4874. "Health follows the keeping of natural laws." A few of the company's many products are listed, including whole wheat flour, and soy bean flour.

Two pages later is a price list of 25 products made and sold by the package goods department of the Los Angeles Service and Supply Co. and Eutropheon. These include breads, nut butters, and 12 kinds of confections.

Note 1. Vera Richter's life before coming to Los Angeles is a bit of a mystery. She was born in Pennsylvania in 1884. At some point, she married Dr. John T. Richter, a naturopathic physician, who was two decades her senior. By 1917, they had arrived in Los Angeles, and soon opened their first restaurant, the Raw Food Dining Room, at 640 South Olive St. Considered by many to be the first raw vegan restaurant in the world, it was an anomaly in a meat-and-cheese era, according to naturopath Phillip Lovell, who wrote the "Care of the Body" column in the Los Angeles Times. By the March 1926 the Richters had moved, opening several new restaurants, including ones at 833 South Olive St. and 209 South Hill St., Los Angeles

Note 2. A 13th ed. was published in 1925, and 18th ed. in 1945, and a 30th edition in 1948 (the latter by Hale publications). Address: 927½ West Sixth St., Los Angeles, California. Phone: BRoadway 0643.

615. Sansum, W.D. 1925. The normal diet: A simple statement of the fundamental principles of diet for the mutual use of physicians and patients. St. Louis, Missouri: The C.V. Mosby Co. 72 p. Illust. Index. 20 cm. [26 ref]
• ***Summary:*** Contents: Introduction. 1. The caloric requirements of the body. 2. The protein requirements of the body. 3. The bulk requirements of the body ("The normal diet should contain an adequate amount of bulky, residue-containing foods to insure natural movements of the bowels"). 4. Acidosis ("The normal diet should be balanced so as to prevent acidosis"). 5. The mineral requirements of the body. 6. The water requirements of the body. 7. The vitamine requirements of the body.

Chapter 4, "Acidosis," begins: "The normal diet should be so balanced as to prevent acidosis... The living body is always slightly alkaline, and, as its alkalinity is reduced below normal, the urine becomes abnormally acid. It is because of the abnormal acid reaction of the urine that the individual is said to have an acidosis. Should the tissues of the body become acid to the slightest degree, death follows, and serious illness results long before the alkalinity of the body is reduced to the neutral point. All substances may be classified with respect to their chemical reaction, as neutral, acid or alkaline." The section titled "The acid ash foods" (p. 40-41) states: "These foods should always be balanced by adequate alkaline foods. When the urine is excessively acid, many of them should be omitted, at least for a time." A table (p. 41) shows that the 10 foods with the most acidic ash (in descending order of acidity) are: Oysters (30.0), egg yolk (26.69), chicken meat (17.01), haddock fish (16.07), rabbit meat (14.80), lean beef (13.91), veal meat (13.52), oatmeal (12.93), lean pork meat (11.87), and eggs (11.10).

The section titled "The alkaline ash foods" (p. 41-43) states that most fruits, vegetables, nuts and milk are alkaline in their final reaction in the body. A table (p. 42) shows that the foods with the most alkaline ash (in descending order of alkalinity) are: Lima beans (41.65), dried beans (23.87), raisins (23.68), almonds (12.38), beets (10.86), and carrots (10.82). These foods "should always be used in adequate amounts to maintain a favorable alkaline balance in the body." Address: M.S., M.D., Director of the Potter Metabolic Clinic, Dep. of Metabolism, Santa Barbara Cottage Hospital, Santa Barbara, California; 2. M.D., Member of the staff, The Sansum Clinic; 3. 618. Cole's Date Shop. 1926. Expectant mothers: Investigate Cole's Dagar (Ad). *Los Angeles Times.* Jan. 17. p. L26.
• ***Summary:*** "Relieves constipation. If your druggist or Health Food Shop cannot supply your wants, we will mail, postage prepaid... Easy and pleasant. Health foods–Gift boxes–Clean California dates."

Note: This is the earliest English-language document seen (July 2021) that contains the term "Health Food Shop" (or "Health Food Shops," regardless of capitalization). Address: 2719 W. 6th Street [Los Angeles]. Phone: DRexel 8806.

619. Mensana. 1926. Dietetic board at Mensana! (Ad). *Los Angeles Times.* Jan. 31. p. K27.
• ***Summary:*** "(Mensa-Sana = Sane Table). Hydro and helio therapy. Massage and chiropractic. Under the direction of Otto Carque and Charles James, D.C. [doctor of chiropractic]. Moderate rates."

Note: This is the earliest document seen (July 2021) concerning Carque's connection with Mensana. Address: 1851 No. Berendo St. (corner Franklin Ave.), Los Angeles, California.

620. *Los Angeles Times.* 1926. Grain mill to start initial work tomorrow. Feb. 28. p. E10.
• ***Summary:*** "The El Molino Mills will commence operations March 1, using as the trademark of their product the name of one of the oldest mills in California, the El Molino Mill, which was constructed by the padres in 1871 and is still standing in San Marino."

Note 1. San Marino is in the Los Angeles area, southeast of Pasadena.

The new mill will have a capacity of 10,000 barrels of flour and 2,500 tons of feed per year.

It will be headed by E.A. Vandercook (who will be general manager), formerly head miller for the Sperry Flour Company at various locations for the past twelve years.

Note 2. This is the earliest document seen (July 2021) that mentions El Molino Mills in Southern California.

621. Eutropheons (The). 1926. Goodbye cooks & disease! Mrs. Richter's Cook-less Book (Ad). *Los Angeles Times.* March 21. p. K25.
• ***Summary:*** "... means no more sickness, food waste and drudgery in your home. Eat your way to health and youth through the wonderful variety of raw foods described in this book. $1.00 postpaid.

"The Eutropheons (Raw food dining rooms)." Note: The Richters now own two of these dining rooms. Their first Eutropheon was at 325 West 3rd St. in Los Angeles. Source: *Children of the Sun,* by Gordon Kennedy. They have apparently moved from their 2nd location (since Sept. 1923) at 927½ W. 6th St. Address: 833 South Olive St. and 209 South Hill St., Los Angeles.

622. Health Food Products Co. 1926. The Health Center News (Ad). *Los Angeles Times.* March 21. p. K25. Sunday.
• ***Summary:*** This large square ad is similar in format and appearance to that published in this newspaper on 29 Nov. 1925. However the content is different.

There are now 7 boxes, each promoting something different: (1) "Children gain health by diet and treatment." Contains the text of a letter from Cloud V. Bond of Los Angeles praising the benefits of the "personal treatments and diet schedule for myself and children." All health problems were solved. "Other letters recently received illustrate the benefits received from the Marathon Bio Bloodwash Baths." "Send today for Prof. Ehret's 'Mucusless Diet Healing System,' a 25-lesson course in healing therapy, sent postpaid anywhere in the U.S.A. for $1.50."

(2) "Health lectures free. Tuesday, March 23, 8 p.m., Prof. Paul Bragg: 'A diet for everyone.' Wednesday, March 24, 6:45 p.m., Ehret Club Dinner. By special appointment. Friday, March 26, 8 p.m. Dr. Philip M. Lovell 'Things that make for success.'"

(3) Inner-Clean is used by drugless practitioners. "Many Osteopaths, Chiropractors, Naturopaths, and other drugless practitioners" recommend it. (4) Business men like cafeteria health luncheons. At the "Corrective Eating Cafeteria" at the Health Center. (5) You are eligible to join Wanderlusters. "Inexperienced hikers should not hesitate to join this happy group of nature lovers." (6) "Health food specials this week: Unsulphured sterilized golden dates–20¢. Calimyrna figs–25¢ per lb. S & W. Sauerkraut–large can 20¢; small can 15¢.

(7) "By special appointment we are headquarters for Battle Creek Sanatorium Health Foods. Health Food Products Co. 1000 W. 7th Street." Address: 1000 West Seventh Street, [Los Angeles, California]. Phone: VAndike 4063.

623. Eutropheons (The). 1926. Dr. Richter's sun baked breads (Ad). *Los Angeles Times.* April 18. p. K28.
• ***Summary:*** "Magnetized and vitalized by the life-giving rays of the California sun. Also health drinks, uncooked soups, fruit, and vegetable salads, fruit-nut cakes and confections–delicious and wholesome–will build and maintain perfect health."

"The Eutropheons (Raw food dining rooms)... Free lectures, 7:30 P.M. Tues. at 209 S. Hill St. and Thurs. at 833 S Olive St. 7 different breads 50¢." In this beautiful little display ad, illustrations show: (1) A rayed sun with a smiling face. (2) A pretty, smiling girl is eating a wafer; in front of her is a food package. Address: 833 S. Olive St. and 290 S. Hill St.

624. Small photograph of Mildred Lager's parents

© Copyright Soyinfo Center 2021

(probably). 1926.
• ***Summary:*** This black and white photo, 2½ by 3½ inches, shows a man and woman who are probably Mildred Lager's parents, Gustav and Hilda Lager. Each is wearing a hat and there are woods in the background, as if they were on vacation. On the back is written in ink: "June 19, 1926. Tourist camp. Velva, North Dakota." A purple stamp reads: "Permanent Highcross Print. Jun 24 1926. Fullmer's Photo Service. Havre, Montana."

625. Carque Pure Food Company, Inc. 1926. Food (Ad). *Los Angeles Times*. July 4. p. J2.
• ***Summary:*** Identical to ad in the 1 Nov. 1925 issue of this periodical (p. K2), except that Carqué has a new downtown shop at 831 So. Flower St., Los Angeles, California.

Note: This is the earliest document seen (July 2021) showing Carque with an address on Flower Street (831 So. Flower St.). Address: 729 Seward St., Los Angeles, California. Phone: GLadstone 4003.

626. Brady, Wm. 1926. Sunday health talks. *Atlanta Constitution* (*Georgia*). July 11. p. 17.
• ***Summary:*** Note: This article seems to be about Anthony Berhalter, yet it is 10 years earlier than any other articles we can find about him. However a 1936 article states: "Thirty years ago [in 1907] Mr. Berhalter, now a nationally known health food manufacturer and dealer, started a health food factory and store in Chicago."

This article begins:

"The cure of the cult habit: A shrewd young man engaged as advertising manager for a department store saw the light, quit his job, and started in the business of marketing 'health food.' His food preparation is no half bad, as a food, but, believe the young man, it is the salvation of the world, the one way the people can escape cancer, tuberculosis, etcetera. This young man now has agents or house-to-house canvassers in most towns, and they have a wonderful line of lingo which impresses the sapient layman."

He sometimes gets the use of a pubic school auditorium or of a Y.M.C.A. hall or other public building for 'lecture.'

"On such occasions he purports to be the president of an impressive organization having a name something like 'National Nutrition association' [sic, National Health Foods Association?, or NHFA, later NNFA]–of course there is no such public official organization, but the sapient citizens fall for it and permit the young man to put over his 'lecture.'" In this way he gets many new customers. Address: M.D.

627. Bragg, Paul C. 1926. Health? *Masonic Digest* (*Los Angeles*) 6(1):29+. July.
• ***Summary:*** A photo shows Paul Bragg.

628. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times*. Aug. 15. p. K27. Sunday.
• ***Summary:*** Although "newslets" looks like a column, it is actually (we learn about 18 months later) an ad; today (2021) it would be called an "advertorial." Did Paul Bragg invent this new type of ad?

Bragg begins by promoting the free health lectures he gives every Tuesday and Friday evening at 8 o'clock at his "Health Center, 1000 W. 7th Street. Make it a point to attend this week. It won't cost you a cent and you are bound to hear something important to your own happiness.

"When Bernarr Macfadden, famous physical culturist, described the Marathon Bio-Bloodwash Bath as 'the greatest discovery for the health of the human race in the world today,' very few believed him. And that is only natural. Even I, who see these baths given daily at the Health Center, 1000 W. Seventh St., am continually astounded at the amazing results.

"With the Marathon Baths [water cure], supplemented by colonic lavage [enema], scientific massage and Prof. Ehret's Mucusless Diet, we have successfully treated thousands of cases of such varied diseases as chronic rheumatism, asthma, partial paralysis, gout, diabetes, hemorrhoids, goiter, dysentery, etc., that we are forced to the conclusion that every human ailment can be relieved by this method."

What would the druggists do if they couldn't sell "physics," which Bragg believes only aggravate the constipated condition.

"Prof. Arnold Ehret's 'Mucusless Diet Healing System' is a 24-lesson course containing healing therapy. Sent postpaid anywhere in the U.S.A. for $1.50. These lessons when taught personally by Prof. Ehret cost. $100." Note 1. Arnold Ehret died in an accident on 10 Oct. 1922.

For a "real invigorating non-heat producing summertime menu," visit "the Health Center Cafeteria, 1000 W. Seventh St. Delicious balanced meals are served daily from 8:30 a.m. to 8:30 p.m., with a special 35¢ lunch from 1:30 to 2 p.m."

Note 1. Bragg promotes his Health Center by giving

© Copyright Soyinfo Center 2021

its name and address in four different paragraphs. From this one Center (how big was it?) he runs a naturopathic clinic, health food restaurant, health food store with mail order catalog, lecture program, exercise classes at the gymnasium accompanied by music, and bookstore. This is the first appearance of his new column in the *Los Angeles Times* Sunday magazine; it was published in at least 30 issues, roughly twice a month, until 11 Dec. 1927. Recurring themes (besides self-promotion) are: The many basics of a naturopathic philosophy, how almost any disease or ailment can be cured at his clinic (where he is Chief Clinician), the importance of good diet and exercise, fasting, inner cleanness and enemas, constipation.

Note 4. What kind of a building was located at 1000 West Seventh St.? From about Dec. 1903 until at least 1908 it was The Westmore, a "Handsome new colonial family and tourist hotel." By 1924 it was the "Oriental Rug and Importing Co." Then in May 1925 it was the "Health Food Products Co."

Note 4. One can see in this advertorial the origins of the big conflict that developed between the health food industry and the U.S. Food and Drug Administration. People without formal medical training advertising their services as doctors / healers, and selling their own medicines and literature. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

629. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Aug. 29. p. L27.
• ***Summary:*** There is a veritable Paradise in the mountains near Los Angeles "and yet few people avail themselves of the opportunity to frolic in the sunshine and reap the benefits of an enjoyable outing. I lead a happy group of Wanderlusters every first and third Sundays, leaving the Health Center at 8:30 a.m. by bus to one of Nature's beauty spots... No dues or initiation fees. Bring your lunch for an all day's outing.

"I have been giving free health lectures for the past three years every Tuesday evening at 8 p.m. at the Health Center, 1000 W. 7th St., above [west of] Figueroa, selecting topics that are inspiring... with all the bunk left out. I try to talk in understandable everyday language..."

"Someone asked me what diet I used to give me my 'splendid strength.' It is no secret. I eat the same balanced menus that are served to the public at the Health Center Corrective Eating Cafeteria, 1000 W. 7th St."

"There is a vast difference between so-called 'Health Foods' and genuine tested health foods. You will find all the recognized products, such as the Battle Creek Sanitarium foods and other nationally famous makes at the Health Food Store, 1000 W. 7th St. Write for mail order price list if unable to buy in person." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

630. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Sept. 5. p. K27.
• ***Summary:*** A dull or lost appetite is "Nature's warning that your system is being poisoned by a clogged intestinal tract. I have found that the most effective internal cleansing medium is Innerclean Intestinal Laxative. This is a compound of aromatic herbs and vegetables developed by Prof. Arnold Ehret, originator of the famous 'Mucusless Diet Healing System.' Innerclean thoroughly removes the long accumulated filth, mucus and poisonous toxemias clinging to the intestinal walls and rejuvenates the whole digestive system. You fell like a million and have an appetite like a wolf! Innerclean is 50 cents a package at the Health Center and all druggists. The Innerclean Mfg. Co., 846 E. Sixth St, will mail a generous free sample by writing them a postal or letter."

"A proper diet will go a long way toward preventing that 'bound up' condition in the first place. Come to the Health Center... Our health food store here carries the most complete line of genuine recognized health foods to be found in the city–including the famous Battle Creek Sanitarium foods, Nutradiet, canned fruits and vegetables, a wide variety of delicious vegetable meat substitutes, whole wheat products from our own ovens, and many other items. Mail orders are given prompt attention." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

631. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Sept. 19. p. K27.
Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

632. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Oct. 3. p. K27.
• ***Summary:*** "This Friday evening, Oct. 8, at 8 o'clock, Dr. Philip M. Lovell, your editor of the Care of the Body Section of this [Sunday] magazine, will lecture at the Health Center, 1000 W. 7th St. His subject, 'The Care of Children,..." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

633. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Oct. 10. p. K27.
• ***Summary:*** "Every one needs to continually keep 'in training' for the match of life. Proper muscular exercise is very essential to maintaining perfect health.

"During my long experience as a physical director I have developed a special system of exercises with piano accompaniment. Enroll at one of my classes at the Health Center gymnasium, 1000 W. 7th St., and see how much better you feel. Visitors are welcome during class work."

"Men's classes every Monday evening at 6:30 p.m. Women's classes every Tuesday and Friday mornings at 10 o'clock; and there are two classes Tuesday evening..."

Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

634. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Oct. 17. p. K27.
• ***Summary:*** "'Jiddu Krishnamurti is a nut.' That is what thousands of people will be saying of the 30-year-old seer from India who is being hailed by some as the new World Teacher. But he is a healthy nut. When he arrived in Los Angeles recently" he discussed the importance of "bodily cleanliness. Another was that he had never eaten meat, drunk liquor or smoked."

"Krishnamurti says our goal is happiness. He's right. And the first ingredient of happiness, to my mind, is health." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

635. Hain Health Foods. 1926. Formal opening of Hain Health Foods. Oct. 18, 8 A.M. (Ad). *Los Angeles Times.* Oct. 18. p. K26.
• ***Summary:*** This is an ad for the opening of the 1st Hain retail health food store in Los Angeles. "Something new in health foods. From the grower direct to you enables us to sell high grade, fine quality products at lower prices. Our foods are 100% pure and in accordance with health standards. Our policy is quality first–service–courtesy."

Contains a long list of products sold at the store, with weights and prices, divided into the following categories: Flour (incl. 5 whole grain flours, Hain Health Meal, and Soy bean flour, 80¢ for 5 lbs). Breakfast cereals (6, incl. Hain Health Bran). Legumes (lentils, split peas, green peas, garbanza beans). Legume flours (6). Hain Health Mayonnaise (made with lemon juice and honey). Selected dried fruits (dates, figs, prunes). Hain pure mountain honey. Italian pure olive oil. Hain nut butters (almond butter, nut cream butter, peanut butter). Shelled nuts. Raisins–fancy.

Phone orders delivered. Mail order service. "Will gladly mail catalogue: Ask us for one."

Note: This is the earliest document seen (May 2019) concerning Hain. Note that the company sold soy bean flour from day one. Address: 329 W. 3rd St. (near Hill St.), Los Angeles, California. Phone: MUtual 1703.

636. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Oct. 31. p. K27.
• ***Summary:*** What is IT that people long for? "Some call it personal magnetism, some call it sex appeal. I will tell you what IT is–vibrant electric health! When you meet a vigorously, buoyantly healthy person can't you instantly feel their magnetism? That's IT. You won't find this characteristic in weaklings."

"Buoyant health depends on four principal factors–correct breathing, correct posture, exercise, and correct eating... attend my classes at the Health Center gymnasium." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

637. Carque Pure Food Company, Inc. 1926. Carqué, "Kar-Kay." This name stands for the ideal in natural foods (Ad). *Los Angeles Times.* Oct. 31. p. K2. Sunday magazine.
• ***Summary:*** "For 20 years Carque Products have been sold to America. Otto Carque's little store sowed the seed of Natural Foods in 1906." Nationwide, "intent people have been eating their way to efficient health. Such people are nationally minded; when they find that California foods are so good as Carque Products prove to be, their orders come in every mail, every day from everywhere... No Carque product has been depleted of natural elements, processed to improve looks at the expense of natural food-value, or treated to preserve it or alter its natural composition or taste."

"Dried fruits: Unsulphured, unbleached, unburned, uncoated. Nut butters: unroasted, unsalted, unsugared. Whole grain products: Wheat flour, yellow cornmeal, cracked wheat, Crown crackers, kitchen cookies, natural brown rice, barley flour." A sort of logo shows an acorn with the slogan: "Natural causes produce natural effects."

Otto Carque now has 3 Carqué Shops with 3 different addresses: 729 Seward St., 6411½ Hollywood Blvd. (right in the middle of everything), and 831 South Flower Street (which is now downtown).

"Write a one-cent postal card to our general offices for: New edition 1926-1927 illustrated free price list."

Note: This is the earliest document seen (July 2021) showing Carque with a shop at 6411½ Hollywood Blvd.–a fashionable address. Address: General offices: The Natural Foods Building, 729 Seward St., Los Angeles, California.

638. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Nov. 28. p. K27.
• ***Summary:*** "The Japanese are noted for original methods of suicide... Most people eat themselves to death–only it generally takes half a lifetime to do it. Every time you stuff or eat the wrong kind of food, you are committing suicide by slow but sure degrees. Wrong eating is a habit. But it's an easy habit to break, because the right kind of food is even more palatable than the other... just try a meal at the Corrective Eating Cafeteria here at the Health Center, 1000 West Seventh Street." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

639. Dyas Co. 1926. Say "Merry Christmas" with Carque fruits and nuts (Ad). *Los Angeles Times.* Dec. 5. p. C11.
• ***Summary:*** "Glace and dried fruits and nuts, gathered from rich California orchards, and prepared according to the unique Carque processes–in the famous Los Angeles 'daylight' factories–then, packed in delightful boxes, dozens of gift combinations for the choosing. Carque Gift Packages will be sent prepaid and insured to any portion of the United

© Copyright Soyinfo Center 2021

States." Address: Second floor, Seventh at Olive, Los Angeles, California.

640. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Dec. 12. p. K27.
• ***Summary:*** "There has been such and increase in the public's interest in corrective eating that a new health cafeteria has recently been opened in the heart of the Los Angeles business district under the same management as the Health Center. It is conveniently located at 217 West 6th Street, between Spring and Broadway.

"A 100% whole wheat bakery is also operated in connection with the cafeteria."

Note 1. This is the earliest English-language document seen (July 2021) that contains the term "health cafeteria."

Note 2. This is the earliest document seen (July 2021) that mentions Paul Bragg in connection with 217 West 6th Street, or stating that Paul Bragg's Health Center owns a health cafeteria at this address. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

641. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Dec. 19. p. K27.
• ***Summary:*** "Most people in this hurry-up age are taxing their nerves to the limit of endurance and beyond. And such stimulants as coffee only tax the nerves more. The caffein [caffeine] in one cup if injected in concentrated form will kill a rabbit instantly... If it doesn't 'agree' with you, change to a good coffee substitute. There are several excellent ones to select from at the Health Center food store, 1000 West Seventh St." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

642. Bragg, Paul C. ed. 1926. Health Center newslets (Ad). *Los Angeles Times.* Dec. 26. p. J27.
• ***Summary:*** "Have you ever noticed how healthy animals are? All except man. (For, excepting for the contents of his skull, man himself is nothing more than an animal.) Why is it that the human is the sickest being on earth?

"I will tell you–because with that big brain of his he has tried to remodel Nature's laws of living–particularly her laws of eating. Try feeding any animal–from guinea pig to elephant–contrary to natural diet, and pretty soon you will have the buzzards circling over."

"... I invite you to sample the menus at the new Health Cafeteria, at 217 West Sixth Street, between Broadway and Spring Street, or our Corrective Eating Cafeteria, 1000 W. 7th St. You will get a delicious lesson in eating the way Nature intended... These are the very folks I would like most to try these Health Food Cafeterias."

At either place, many "whole wheat oven treats for the home table" are sold. "Which reminds me of the Health Food Store also at the Health Center." "I just had a workout in the 'Health Center gymnasium.'"

"We have just republished Prof. Ehret's 'Rational Fasting.' This wonderful book completely covers the subject of scientific fasting and gives lessons for practical application. It can be procured at the Health Center for one dollar per copy."

Note: This is the earliest English-language document seen (July 2021) that contains the term "Health Food Cafeterias" (or "Health Food Cafeteria"). Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

643. California Fig-Co Company, Inc. 1926. "Fig-Co" is the most wholesome, palatable coffee substitute you ever had! (Ad). *Los Angeles Times.* Dec. 26. p. J29.
• ***Summary:*** "During his 3 years of apprenticeship (1884-1887) in one of the oldest coffee-substitute factories in Europe, Kramer Bros. in Ottensen near Hamburg [Germany], our manager, Mr. W.H. Riecken, originated 'Fig-Co' from selected sun-dried unsulphured figs and finest malt-barley."

"Good for your stomach and your nerves. It relieves constipation. 1 lb. package, 35¢–Health is wealth, buy the best." Address: [Los Angeles, California].

644. California Food & Health Service. 1926. The original (1912) fig cereal coffee substitute (Ad). *Los Angeles Times.* Dec. 26. p. J29.
• ***Summary:*** "At all health food stores. A five food family drink. Regular price 35¢. Special price 29¢. 7253 Sunset Blvd., Hollywood. 215 West Broadway, Glendale. 2156 Colorado Blvd., Eagle Rock. 445. E. Colorado St., Pasadena. Drop a one cent postal card to any of the above addresses for a complete price list of Health Foods."

An illustration shows the front of the package, on which is written: "Drink California Cof-Fig. 'Coffee's successor.' J.R. Neff." Address: [Los Angeles, California].

645. Mensana. 1926. Get well! (Ad). *Los Angeles Times.* Dec. 26. p. J29.
• ***Summary:*** "Get well! and keep well at Mensana, Hollywood Health Home. Dietetic board $15.00 per week and up. Sun baths–hydrotherapy–massage. Under direction Dr. Charles James and Otto Carque." Address: 1851 No. Berendo St. (corner Franklin Ave.), Los Angeles, California. Phone: 596-632.

649. **Product Name:** Canned Soy Beans.
Manufacturer's Name: Hain Health Foods.
Manufacturer's Address: 329 W. 3rd St. (near Hill St.), Los Angeles, California.
Date of Introduction: 1926?
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Interview with Ben Kahan. 1983. Dec. 4. Early history of the health foods industry in Southern California. 3 p. transcript. "Harold Hain made the first canned soybeans in about 1924" [sic, Harold Hain started Hain Health Foods in 1926].

Note: This is the earliest known commercial soy product sold or packed by Hain.

650. *Los Angeles Times.* 1927. Young company in new baking combine deal. Jan. 21. p. A8.
• ***Summary:*** Combining two separate interests, a new baking corporation named the Oakes-Young Baking Company has been established with assets of $25,000 by Young's Market Company and J.W. Oakes of Los Angeles.

In the future, all bread products distributed by Young's will be baked by the new corporation. These brands include those already handled by the Young company as well as the Cubbison breads, the rights to which were purchased one year ago by Oakes and his son, Harry W. Oakes.

The Cubbison bakery [at 3417 Pasadena Ave., Los Angeles, California] continues to make its line of products other than the bread.

• ***Summary:*** "Most grouches are first of all dyspeptics... Wiser men than I have said it. What is a dyspeptic? Simply one who has chronic indigestion. And its darned hard to smile when you have a bellyache.

"Indigestion is a silly trouble for any sensible person to have, for all you have to do, to avoid it in the first place and get rid of it in the second place, is to eat properly and to maintain strict innercleanliness. Yet indigestion in some one of its forms, autointoxication and constipation, is the scourge of the race." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

652. Lust, Benedict. 1927. Our trip to the Fatherland. III. *Naturopath* (*New York City*) 32(1):7-14. Jan.
• ***Summary:*** "From our home town we continued our trip to Baden Baden, the great Universal Health Resort. Of all hot springs in Europe Baden Baden is still the leader. The Roman Emperors have travelled every summer over the high Alps to get health, strength, relaxation, and pleasure at this great natural health resort.

"Here are still the foundations of the Roman Baths (thermae). They must have been colossal institutions and there must have been great life and luxury, pleasure and indulgence around the Roman courts in those days. It is very strange that these radio-active hot springs of Baden Baden are simply an outlet from a vein of hot water or hot river under the earth, because in other parts of South Germany borings have been made and they have struck the same hot mineral water. The whole section in this country is of vulcanic [sic, volcanic] origin. I have loved Baden Baden because I am born only two hours from this place and there are many associations of my youth connected with this happy place. Two summers I worked there as a boy. The hotels and institutions, the outline and the grounds are all made for health and for comfort and relaxation. I took a few hot radium baths with one of my younger brothers, but I must say of all the hot springs I have tried, there is no such exhilaration and after effects as you find after you have been in the radium waters of Baden Baden. You don't feel tired, you feel wonderful, and not overstimulated as is usually the case with ordinary mineral springs.

"We visited the Trinkhalle and the Hotel de Holland, where we worked when we were a young man..."

"We then visited Freiburg in Baden and went through the Black Forest by the way of the great scenic railroad to Constance on the lake of the same name, where we spent two days. This lake is the largest body of water in inland Europe. The scenery and environment is simply beautiful with the grand snow-capped Alps in the background, and the blue, green and emerald waters of the lake ever changing."

"Constance is the gateway to Austria, Bavaria, Italy and Switzerland."

"The next day they took a boat over a beautiful lake and passed Friederickshafen where they saw the Zeppelin works.

We stopped then at Lindau and proceeded to Kempten in the sub-alpin Algäu. There we visited the Publishing House of Joseph Koesel which has full control of all the writings of Father Kneipp. Originally a small publishing concern, over 150 years old, but after publishing Father Kneipp's book 'My Water Cure' in German they became world publishers, and they published the Kneipp works by the millions, not only in German, but in all the civilized languages."

"Our next stop was Memmingen–which is known as the town where the first Kneipp Linen porous or mesh underwear was made. Father Kneipp recommended the mesh garments, the porous linen or vegetable fibre for next to the skin, as it causes a gentle friction and holds sufficient air in the meshes

© Copyright Soyinfo Center 2021

to protect the body against excessive heat and cold."

"Kneipp was very generous. He extended his good will to everybody and gave his approval readily to anybody who had anything worth while for mankind. He never asked for any fees or demanded any royalty. There are many millionaires in the world to-day who got rich by Father Kneipp's genius and work, especially through his books, health foods, remedies, linen underwear, mead (honey wine), air shoes, porous sandals, outside open mesh garments, malt coffee, institutions, socks and stockings, sanitaria, health resorts, schools for natural life and nature cure, sun and air baths, real estate, etc."

"How few of the American manufacturers of health food-concerns who put up whole wheat preparations, whole rye foods, whole barley and whole oats, coffee substitutes, etc., think of Father Kneipp, who was the founder of all these things. He used them first, lectured and wrote about them. Kneipp had no endowments, nor Rockefellers, nor the rich to back him up, he had no agricultural department, nor the government's support paying him his expenses; but he has done more for mankind and for the prevention of disease, than all these agents–public and private–put together. Kneipp simply worked in his Parish House, where he had a laboratory of his own. Barley Malt Coffee, called Kneipp Malz Kaffe, and whole wheat bread are sold in all the countries of the world.

"His idea of feeding children was roadbreaking and is correct. He recommended elementary food and not the denatured refined commercialized foods in fancy packages of today. He believed in using the whole grains, and he recommended every housewife to be her own miller. He further advised to bake one's own whole wheat bread, to use real corn [whole-wheat] meal by grinding the flour yourself, have it fresh in your own home by doing the milling yourself and then you have at the same time Physical Culture. Now electricity can do all this in your own home."

"In Memmingen we met Dr. L. Weidle, who is an ideal Naturopath with a broad heart and love for all mankind. When meeting him for the first time you imagine you have met a second Christ."

Illustrations and photos show: (1) "Father Kneipp lecturing on 'How to live and how Nature cures' to his patients in Wörishofen (full page). • ***Summary:*** "Have you ever eaten the kind of menu specified by Prof. Ehret? Then take dinner this evening at either of these two Health Cafeterias, 1000 West 7th St. [the Health Center] and 217 West Sixth St. [The Health Cafeteria, between Spring and Broadway]. It will be a great treat for your stomach and for your palate too." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

661. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* March 13. p. K27.
• ***Summary:*** "Did you read that Emile Vandervelde, head of the Belgian Socialist party and Minster of Foreign Affairs, attributes his unusual physical fitness to the 'simple life?' He eats with moderation and in recent years has cut out breakfast and dinner altogether. Bernard Shaw, the famous writer, is another stickler for sane living and careful diet. Nine-tenths of mankind are still eating themselves into a premature grave–but I think they are gradually getting a little sense." Recent government statistics show that U.S. meat consumption has decreased by about 25% during 1926. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

662. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* March 20. p. K27.
• ***Summary:*** "Frequently I am taken for 15 years younger than I really am. And I don't intend to get old for several decades yet."

"Overeating, especially of meats and pasty foods, clogs your digestive tract with decaying filth that poisons the whole system..."

There are two health cafeterias in Los Angeles. "Delicious vegetable menus served here are non-clogging. See if you don't feel better after such a meal."

Whole wheat bakery products are "baked fresh daily in our own health bakery at 1607 West Sixth St." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

663. *J. of the American Medical Association.* 1927. Medical news: California–The "Health Center of Los Angeles." 88(14):1085. April 2.
• ***Summary:*** "The 'Health Chautauqua Association' recently put on a 'show' at the Philharmonic Auditorium, Los Angeles, and on the first page of its program were the names of the active members of the 'Drugless Physicians of Southern California'; these individuals, it is reported. comprise the Health Chautauqua Association, McArthur

© Copyright Soyinfo Center 2021

Timmons is a layman employed on a salary to promote two 'shows' a year, and his address, 1000 West Seventh Street, is the address of the 'Health Center of Los Angeles.' The 'Health Center of Los Angeles' has several departments; a licensed chiropractor, J. Bruce Clark, was in charge of the 'treatments'; the 'Health Food Products Co.' is managed by Maurice Goldman; 'The Corrective Eating Cafeteria,' managed by M.M. Day; 'Corrective Exercises, Breathing, Physical Culture, etc.,' by. Prof. Paul C. Bragg; 'Massage,' by Archie Jordan, and 'Chiropractic Treatments, Baths, etc.,' by Emiel A. Wiseman, D.C. One half of each department is owned by Fred S. Hirsch who is listed as 'managing director.' Frank McCoy, drugless practitioner; Wesley Barrett, D.O.; Philip M. Lovell, drugless practitioner; R. Stone, D.D.S., and others were said to lecture two days a week. The 'health center' places a great deal of stress, it is reported, on 'Arnold Ehret's Mucusless Diet System' and the 'Bio-Bloodwash Marathon 'Bath.'"

664. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* April 17. p. K27.
• ***Summary:*** "Three-fourths of humanity are only half alive. You can tell it by the blank looks in their faces. You can tell it by the way they walk... After a few Marathon Bloodwash Baths and other Naturopathic treatments at our Health Center Clinic, 1000 West Seventh Street, I have seen prematurely old, sallow-faced men and women walk out with a sparkle in their eyes and the springy step of youth in their strides–completely regenerated." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

665. *Los Angeles Times.* 1927. Tonight 8 p.m. (Ad). May 6. p. 18.
• ***Summary:*** "The message that is thrilling the world. 'Glorious, Radiant Health." First of a series of vitally interesting and inspiring lectures by Bengamin Gayelord Hauser. Internationally famous young Viennese food specialist, author, lecturer, and teacher. Assembly Hall. Friday Morning Club (Playhouse Theatre). Admission free." At the top of the ad is a portrait photo of Mr. Hauser.

Note: This is the earliest document seen (July 2021) concerning Gayelord Hauser.

666. *Los Angeles Times.* 1927. Lima bean acreage cut: Oxnard district ranchers raising more sugar beets and other vegetables this year. May 14. p. 6.
• ***Summary:*** The California Lima Bean Growers' Association, located in Oxnard and with more than 1,100 members, has just issued a lengthy report that discusses this decrease in acreage. In 1926 the total acreage planted to regular lima beans in Southern California was about 100,000 acres. It is expected to decrease by 3,000 to 4,000 acres this year, partly because of lower prices. About 43,000 acres of baby limas were planted last year.

The report states that there is considerable interest in "lima bean flour and bread... The experiments and successful tests of Dr. D.W. Sansum, director of the Potter Metabolic clinic in Santa Barbara, in this connection, have given the lima bean association a new idea that promises to further the lima bean industry tremendously."

As a result of experiments conducted by Dr. Sansum, a good-tasting and wholesome bread, made chiefly with lima bean flour, is now on sale at several places. Dr. Sansum is prescribing lima bean muffins for his patients suffering from various forms of acidosis.

"Lima beans are the most alkaline food known... Some of the flour has been sent to Battle Creek [Michigan, to Dr. Kellogg] and also to two or three large bakeries in the East for the purpose of developing a formula by which good lima bean bread can be made."

Note 1. This is the earliest English-language document seen (July 2021) that contains the term "lima bean flour" or the term "lima bean bread."

Note 2. Bill Baker of Ojai, California, is not mentioned.

667. *Los Angeles Times.* 1927. Bengamin Gayelord Hauser (Ad). May 21. p. A2.
• ***Summary:*** "This Sunday–3 p.m. Your last opportunity to hear Bengamin Gayelord Hauser, internationally famous young Viennese food scientist, whose lectures have inspired thousands to live, eat, and think correctly. 'Health and Happiness for 100 Years.' Symphony Hall–Music-Art Bldg. Admission free. Hill St. entrance."

This small ad appears in a section of ads titled "Go to church Sunday," which includes ads for Christian Science, Swami Dhirananda, and the United Lodge of Theosophists–in addition to regular Christian denominations.

668. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* May 22. p. K27.
• ***Summary:*** "If all the pill addicts in the world only knew the wonderful curative power of drugless healing methods–as exemplified every day at the Health Center clinic–they would empty all their pill boxes into the garbage can... To met the new demand for drugless practitioners, the Health Center has founded a college, the American School of Naturopathy, where a complete course of instruction in natural healing methods and drugless therapy is given. A great number of both men and women have enrolled within the past week."

One of the most popular items sold by the Health Center "is unsulphured, unadulterated dried fruit–you never tasted such delicious prunes, figs and raisins! Full of vitamines and rich in mineral salts. Send for the price list." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

678. Carque Pure Foods. 1927. Two interesting new Carque products (Ad). *Los Angeles Times.* Aug. 14. p. K27.
• ***Summary:*** "Pecan Meal–8 oz. can 65¢; by mail 75¢. Made from fresh pecans–an ideal companion for summer fruit salads.

"Malto-Almonds–7 oz. can 50¢; by mail 60¢. A special preparation of malt, almond meal, and dextrinized cereals. Samples by mail 10¢.

"Carque Shops at 381 S. Flower St. and 6411½ Hollywood Blvd." Address: 729 Seward St., Los Angeles [California].

679. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* Aug. 21. p. L27.
• ***Summary:*** Chicago [Illinois] just had "a national convention of beauty specialists (cosmeticians they call them). I suppose there will be no end of discussion of the latest ways to put a mask of youth and beauty on the pale and wrinkled face of premature old age. I don't say powder and rouge are 'wrong'–but I emphatically say they are not necessary!

"Why tolerate a flabby face when a firm, unblemished skin naturally tinted by the glow of health is much more beautiful than make-up? It can be the possession of every woman, long after youth is past, if she will follow a few simple rules of diet, exercise and cleanliness–such as are practiced at the Health Center." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

680. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* Aug. 28. p. L27.
• ***Summary:*** "John D. Rockefeller is 88–but not because of his millions. He knows wealth cannot buy health–for health itself is riches. John D. says he is not 'on a diet,' but that he 'eats sparingly.' He also says: 'I never hurry my meals and I am never in a hurry to leave the table.'

"That's certainly sound talk! Most people eat like pigs; many of them look like pigs, and a lot of them drag through their short lives sleepy as pigs. Do you know why the average person overeats? Because of the artificial palate–stimulation of high seasoning and because the food is too rich, too high concentrated." Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

681. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* Sept. 4. p. L27.
• ***Summary:*** "Dr. Annie Besant, the world-famous president of the International Theosophical Society, is more healthy and vigorous at 80 than most women at 40. Just now she is completing a lecture tour of the principal cities of Europe and has been doing her traveling... almost entirely by airplane. How many others would be equal to it?

"The secret to Dr. Besant's remarkable postponement of old age is in her habits of living, particularly as regards diet. She has been a strict vegetarian for years. If you want to stay young eat non-clogging vegetables and fruits.

At Los Angeles' two Health Cafeterias, the innovation of "girls passing around wholewheat muffins during each evening meal is very popular."

The Health Center's bakery has moved to 820 West Sixth Street, from 1607 West 6th. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

682. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* Sept. 11. p. K27.
• ***Summary:*** "Jack Dempsey has always taken a great pride in his body. He wasn't a 'candy kid' when a boy,... He says he eats simple foods, eats only when he is hungry, and often makes three square meals in a row of fruit alone." And he does stomach exercises each day. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

683. Carque Pure Food Co., Inc. 1927. Everyone enjoys Carque's carob fruit candy: A delightful wholesome confection (Ad). *Los Angeles Times.* Sept. 11. p. K27.
• ***Summary:*** "Made of St. John's bread [carob], figs, raisins, nuts and honey. Give it freely to your children in place of refined sugar candy and chocolates. 5¢s a bar–Special this week, 3 bars 10¢. At our shops, 831 S. Flower St. and 6411½ Hollywood Blvd. Or at Main Office... Write for catalog with reduced prices."

Note: This is the earliest document seen (July 2021) that mentions an "energy bar" made in the USA. Unlike most energy bars of the 1990s and early 2000s, it contains only simple, natural ingredients. Address: Main office: 729 Seward St. [Los Angeles, California].

684. Carque Pure Food Co. 1927. Carque's Herbal Health Tea (Ad). *Los Angeles Times.* Sept. 18. p. K27.
• ***Summary:*** "A scientific blend of wholesome herbs rich in alkaline blood purifying elements. Drink it daily in place of tea and coffee. Large container 50¢, small package 10¢ (sent by mail). At our shops–531 South Flower St. and 6411½ Hollywood Blvd. or 729 Seward St.

The text is inside of a pretty illustration of an oval wreath of herbs. Address: Los Angeles, California.

685. **Product Name:** Carque's carob fruit candy.
Manufacturer's Name: Carque Pure Food Co., Inc.
Date of Introduction: 1927 September.
Ingredients: St. John's bread [carob], figs, raisins, nuts and honey.
New Product–Documentation: Ad in Los Angeles Times. 1927. Sept. 11. p. K27. "Everyone enjoys Carque's carob

686. *Los Angeles Times.* 1927. Dr. Lovell plans evening health and diet class. Oct. 5. p. A13.

• ***Summary:*** Dr. Philip Lovell [N.D., Naturopathic Doctor] writes his health columns in the *Sunday Times Magazine* section and gives weekly talks on health over KHJ radio. Now he is presenting a weekly class on diet and health each Thursday afternoon in the auditorium of Southern California Manufacturers' Exhibit, Southwest Building, 130 South Broadway. To accommodate the hundreds who have attended or who cannot attend afternoon classes, he will announce an evening class, a baby clinic, and a physical-culture class.

Various firms have displays supplementing Dr. Lovell's blackboard talks: Holsum Whole Wheat Bread, Cubbison Biscuit Company, Hollywood Cup, Haine [Hain?] Health Food Stores, Los Angeles Brewing Co., Carque Pure Food Co., Sparkletts Artesian Water, and others.

687. Lovell, Philip M. 1927. Care of the body. *Los Angeles Times.* Oct. 16. p. K26. Sunday magazine.

• ***Summary:*** We must obey Nature's laws in diet, breathing, sleeping, working, and sex life. But patients don't want to hear that from their physicians, because they don't want to take responsibility for their ailments. They would rather consider themselves innocent victims, and take a pill.

The section titled "Health lectures" notes that this Thursday afternoon, Dr. Lovell will speak on "The drugless curing of disease" at the Southern California Manufacturers' Exhibit auditorium. It is free of charge and open to the public.

The section titled "Light is life" contains excerpts from an article from *Health Culture* by Mr. Clarke Irvine about Dr. Auguste Rollier, "a regular allopath." With no aspiration to fame or fortune, he has cured more than a thousand patients using mere sunlight. His "Outdoor Temple of the Sun," a tuberculosis sanatorium, is at Leysin, in southwestern Switzerland [near Lake Geneva], at an elevation of 5,000 feet in the beautiful Alps. He started this work in 1903 and now has 37 clinics. One feature of his cure is that "only cereals, with raw fruits and vegetables are given as food." No meat or eggs are given since they suffocate the patients with mucus. He also believes that maintaining a happy frame of mind, and feeling comfortable and free, is essential to the cure. Therefore nudity is practiced. Address: N.D. [Naturopathic Doctor].

688. California State Board of Health; Bureau of Vital Statistics 1927. Marriage record: Lillian Reicher and Otto Carque. Los Angeles, California. 1 p.

• ***Summary:*** "Place of marriage: County of L.A. [Los Angeles].

Note 1. The official marriage date is 5 Nov. 1926. The wedding ceremony was Nov. 6.

Note 2. Otto's place of residence and Lillian's residence are a very long block part.

Note 3. Deepest thanks to Wayne Dawson, genealogist, Tucson, Arizona, for finding this record on Ancestry.com and sending it to Soyinfo Center. Address: Los Angeles, California..

689. *Los Angeles Times.* 1927. Dietician to wed business assistant. Nov. 5. p. 24.
• ***Summary:*** "Otto Carque, dietician, and Lillian Reicher, formerly of New York City, will be married tomorrow. Mr. Carque is president of the Carque Pure Food Company, and Miss Reicher has been assisting in the reorganization of the business. Following the wedding, the couple will be entertained at dinner at Mensana Home by Mrs. Clara Coleman, principal."

690. Carque Pure Food Co. 1927. Carque's holiday gifts (Ad). *Los Angeles Times.* Nov. 6. p. K27.
• ***Summary:*** "The most delightful assortment of gifts to suit every taste and purse. An elegant selection of dainty imported baskets, bowls, and novelties, artfully designed, packed full of Carque's California's finest fruits, nuts and health confections. A pleasant surprise for your Eastern friends. Ship early and avoid the rush. Illustrated holiday catalog now ready.

"At our stores: 831 S. Flower St.; 6411½ Hollywood Blvd.; Factory and main office: 729 Seward Street."

Directly below this ad is a smaller ad for Mensana titled "Get well and stay well." Address: 729 Seward St., Los Angeles, California.

691. *Los Angeles Times.* 1927. Food concern head weds business aid. Nov. 7. p. 23.
• ***Summary:*** "The girl he employed to recently to help reorganize his business was led to the altar yesterday by Otto Carque, dietician and president of the Carque Pure Food Company. The bride formerly was Lillian Reicher of New York. Following the wedding the couple was entertained at dinner at Mensana Home by Mrs. Clara Coleman."

692. Record that marriage record was filed: Lillian Reicher and Otto Carque. 1927. Los Angeles, California. 1 p.
• ***Summary:*** Date: 1927 Nov. 8. Women married: Reicher, Lillian. To whom married: Otto Carque. Where recorded: Book 761. Page 189.

Source: California, US, County, Birth, Marriage and Death Records 1849-1980.

Note: This is not the official California state marriage record, but rather the bare-bones record showing that the official marriage record was filed–on Nov. 8. They were officially married on 5 Nov. 1927 (see that record), and the church wedding was on 6 Nov. 1927. Address: Los Angeles, California..

693. *Los Angeles Times.* 1927. Activities of hosts and hostesses this week: Dinner musicale. Nov. 13. p. 43.
• ***Summary:*** "Following a quiet wedding which took place last week, Mr. and Mrs. Otto Carque were entertained at Mensana Home by Mrs. Clara M. Coleman with a dinner and musical program. Among those present were Dr. and Mrs. Philip Lovell, Mr. and Mrs. W.S. Eilke, Mr. and Mrs. H.G. Cubbison, Dr. F.E. Malony, Miss Marie Press, Mr. and Mrs. Seiler, Mr. and Mrs. William Reicken, Dr. Charles James, Mrs. Frank Starr, Mrs. Leybrooke, Mr. James Berlin and Mr. P. Ludwig Conde."

Note: Dr. Philip Lovell writes the "Care of the Body" column for the *Los Angeles Times.* Sophie Cubbison and her husband may have also been present.

694. Natural Foods & Products Co. 1927. L.A. stomach sufferers acclaim doctor who discovers Flaxolyn (Ad). *Los Angeles Times.* Dec. 4. p. L31.
• ***Summary:*** Contains a long directory of the names and addresses of many stores (incl. many health food stores) in Los Angeles and vicinity that sell Flaxolyn, which relieves constipation and therefore aids sleep. Companies appearing in this longer directory that did not appear in the ad of 27 Feb. 1927 (p. J31) run by this company in this newspaper include: Health Food Cafeteria, 216 W. 6th St., Los Angeles. Address: 5341 (or 5311) Pasadena Ave., Los Angeles, California. Phone: GArfield 8523.

695. Bragg, Paul C. ed. 1927. Health Center newslets (Ad). *Los Angeles Times.* Dec. 11. p. K27.
• ***Summary:*** The Health Center's bakery is now named the "Whole Wheat Bakery-Cafe, 820 West 6th St., near Figueroa."

"Thousands and thousand of mean and women are pitiful prey to imaginary ills induced by reliance on drugs. If you really are not well, then there is a natural reason for it. So don't run for an unnatural palliative, which will probably multiply your trouble. Eliminate the ailment, don't try to suppress it."

A portrait photo at the top left of the column shows a handsome Paul Bragg. This is the earliest known issue of this column to carry his photo. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 W. Seventh St.

696. Shippey, Lee. 1927. Lee side o' L.A. *Los Angeles Times.* Dec. 17. p. A4.
• ***Summary:*** There are two Eutropheon dining-rooms in Los Angeles. Eutropheon means "uncooked" in Greek. They serve pies, with sub-baked crusts and a filling of dried or fresh crushed fruits. "These restaurants also, of course, serve a great many nuts. But most of the diners we saw looked like

extra-intelligent people."

697. **Product Name:** Soy Meal. Renamed Soy Flour by 1934, Soy Bean Flour by 1936, and Soybean Flour by Dec. 1943.
Manufacturer's Name: Battle Creek Food Co. (Marketer-Distributor). Made in the USA by A.E. Staley Manufacturing Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1927.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Horvath. 1927. The Soybean as Human Food. p. 41, 44. "This soy meal contains: moisture 5.5%, protein 53.8%, fat 9.2%. This roasted meal is manufactured from fresh press cake. The roasting greatly improves the taste, digestibility, and keeping capacity of bean meal. This procedure is largely applied to soybean meal (flour) in China and Japan."

S.S. Pierce Co. 1935. Spring and summer mail order catalog (Boston). p. 72.

L.B. Breedlove. 1936. *Chicago J. of Commerce and La Salle Street Journal.* June 25. p. 14. "Soy bean–The magic plant. Article XI." "Battle Creek Food Factory, Battle Creek, Michigan: Soy bean flour."

A photo shows commercial soy products from William Morse's office. 1936. "Soy Bean Flour." Canned, Low in Starch. Price List. 1940. Soy Flour. 1 lb or 4 lb bag. Miller. 1943.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 5. The company sells Soybean flour. Distributed through health food stores.

Price Lists. 1955 and 1960. Soybean Blue Book. 1947. p. 70.

Note: This is the earliest commercial soy product seen made by Battle Creek Foods or Dr. John Harvey Kellogg.

698. **Product Name:** Soy Gluten Biscuit (For Diabetics).
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1927.
New Product–Documentation: Horvath. 1927. *The Soybean as Human Food.* p. 57. "At present a special soy biscuit for diabetics can be obtained from the Battle Creek Food Company. Its chemical composition is: moisture 5-10%, protein 50-60%, fat 7-10%, pentosans etc. 17-22%, ash 4-6%, starch 1-3%.

Battle Creek Food Co. Catalog. 1937. Consists of equal parts soy flour and wheat gluten. Note: This is America's earliest commercial soy product that also contains gluten, according to the SoyaScan database as of May 1992.

Letter from Dr. John Harvey Kellogg to Mr. Richard Haughton, of Paoli, Pennsylvania. 1937. Sept. 21. "The Battle Creek Food Company makes a number of products from the soy bean, among which are soy gluten biscuit, which consists of equal parts of soy flour and wheat gluten. It is extremely toothsome and the most highly nourishing of all foodstuffs with which I am acquainted."

699. Lovell, Philip M.; Press-Lovell, Leah. 1927. Diet for health by natural methods: Together with health menus and recipes. Complete instructions for the cure of the sick without the use of drugs. Los Angeles, California: The *Times-Mirror* Press. xiii + 428 + [7] p. No index. 21 cm.
• ***Summary:*** Part I: Treatment and diet, by Dr. P.M. Lovell. Part II. The preparation of health foods, by Leah Press-Lovell (recipes, p. 129-428). Some of the recipes in this book first appeared in the "Care of the Body" section of the *Los Angeles Times,* which Dr. Lovell has edited for the past few years. "This is the pioneer health department of any newspaper in the country, undoubtedly the most widely read and unique, in so far as it advocates drugless, natural therapy" (p. 4). "This book is based on vegetarian principles. Meat recipes... are not included." Many reasons for this are given. Meat includes fish and fowl (p. 8-9).

Soy-related: "Soy sauce or shoyu is made from soy beans and can be bought at Japanese stores. It gives a tasty flavor to gravies and to cereals" (p. 134). Chop suey (3 types), each served with "Soy bean sauce" (p. 290-91). Soy gravy (with soy–also called soy sauce or shoyu, p. 305). Chapter 14, "Legumes" (p. 366-70) discusses chick peas (Garvanza), lentils, peanuts, and "Soy beans: Best known in China and India. Rich in oil. Contain almost no starch. Require slow cooking to bring out flavors. Hulls are difficult to digest. Therefore remove them by rubbing through a colander." "About the soy bean: The soy bean is very important in the Orient. When three-fourths grown it makes a nutritious green vegetable [yes] known as 'bean sprouts' [no]. Products of soy beans are soy bean flour, soy bean milk, soy bean cheese (tofu), soy sauce, soy bean oil, sprouts, etc. Soy bean products can be bought at Japanese and Chinese grocery stores." Contains 3 recipes: Soy roll or bread (replace 25% of the whole wheat flour with soy flour in any whole wheat bread recipe). Soy bean porridge (cook 1 cup soy bean flour with 3 cups water for 2 hours in a double boiler. Cool, slice, roll in corn flour and bake with butter or oil to make croquettes). Soy bean croquettes (with "1 cup soy bean porridge"). Soy bean milk (made from soy bean flour, p. 420; also almond milk and cocoanut milk).

Also discusses: Of the general advice given to patients, "the subject of diet occupies the leading position" (p. viii). Agar flakes (vegetable gelatine) are better than animal gelatine (p. 135). Almonds–How to prepare almond milk, cream, and meal (p. 152). Cocoanut–To prepare cocoanut milk. Peanuts–How to prepare raw peanut butter (p. 153). Garvaza [garbanzo] beans and meal (p. 308-09). Nut loaf (Vegetable turkey) (with peanuts, p. 315). Carqué's unfermented whole wheat bread (p. 351). Carqué's

© Copyright Soyinfo Center 2021

unleavened fruit bread (p. 351). Recipes using Graham flour (different from whole wheat flour, p. 356-59).

Ads on the last 7 (unnumbered) pages are for: (1) Lovell Health Offices. (2-3) Lovell's drugless health library (39 titles on diseases and health problems; pocket edition size). (4) Health of the Child, by Dr. Philip M. Lovell. (5) Carqués California Pure Natural Food Products: Fruits–sun-dried and dehydrated without bleaches, fumigants or preservatives (incl. black mission figs), nuts, confections, stamina and laxative foods, nut butters, cereals and products (incl. soy bean flour), miscellaneous. And Carqué Pure Food Co., Inc. (6) Cubbison's Cracker Co., 3419 Pasadena Ave., Los Angeles. And Cubbison's Whole Wheat Flaxseed Crackers. Cubbison's also sells Whole wheat crackers, and Whole wheat nut bread (See p. 32-33, 104). (7) The Cary Health Cooker (for steaming and baking; Elmer E. Cary Co., Los Angeles).

Note: This is the earliest published document seen (July 2021) that gives the address of Cubbison's Cracker Co. as 3419 Pasadena Ave. Address: 1. Dr., drugless practitioner, Health Offices, 238 Chamber of Commerce Bldg., 1151 So. Broadway, Los Angeles, California; 2. His wife. Phone: WEstmore 8275.

700. Thayer, Gilbert (Mrs.). 1927. The Gilbert Thayer cook book: Life-giving preparations of food combinations. Los Angeles, California. 71 p. 23 cm. *
• ***Summary:*** A popular work about vegetarianism and vegetarian cookery. Ads appear on pages 67-71. Address: Lafayette, Indiana.

701. Thayer, Gilbert. 1927. Perfect health. Los Angeles, California: G. Thayer. 208 p. Illust. Portrait. *
Address: Lafayette, Indiana.

702. Bragg, Paul C. ed. 1928. Health Center newslets (Ad). *Los Angeles Times.* Jan. 1. p. J27.
• ***Summary:*** The wonderful "Miracle Water" in Douglas Fairbanks' new motion picture *"The Gaucho"* "has nothing on our Hydralite Bloodwash Bath at the Health Center Clinic... It is far more miraculous because the healing is actual fact, not fiction. I have seen case after case of such serious ailments as inflammatory rheumatism, diabetes, gout, partial paralysis, asthma, tumors, pernicious anemia, obesity and hemorrhoids successfully treated by these baths and our supplementary natural healing methods. No matter how helpless you may have been told your trouble is, we can help you."

A rectangular portrait shows Paul Bragg. Address: Prof., Chief Clinician, Health Center of Los Angeles, 1000 West Seventh St.

703. Carque Pure Food Co. 1928. The Carque Pure Food Co. (Ad). *Los Angeles Times.* Jan. 1. p. J27.
• ***Summary:*** "The Carque Pure Food Co. enters the New Year with a confident spirit of helpfulness and intelligent co-operation, pledging its best efforts towards a keen and thorough understanding of your specific health food needs." Address: 729 Seward St., Los Angeles, California.

704. Hain Health Foods. 1928. Happy New Year (Ad). *Los Angeles Times.* Jan. 1. p. J27.
• ***Summary:*** This tiny ad includes addresses for both the Hain Los Angeles shops: (1) 329 W. 3rd St. (2) 429 S. Hill St. Address: 329 W. 3rd St., Los Angeles, California.

705. *Los Angeles Times.* 1928. Bragg's new health cafeteria (Ad). Jan. 12. p. 4.
• ***Summary:*** "It opens today at 11 A.M. 840 South Hill St. Where delicious health food will reign supreme. Wonderful crispy salads–marvelous vegetables and meat substitutes–100% whole wheat breads and rolls, and whole wheat pies. Health ice cream and desserts that will melt in your mouth."

Note: This is the earliest document seen (March 2007) that mentions Paul Bragg in connection with 840 South Hill Street, or stating that Paul Bragg owns a health cafeteria at this address. Subsequent ads and articles show that he no longer owns the health businesses he used to at 1000 West Seventh St. (from 2 May 1925), 217 West 6th St. (from 12 Dec. 1926), or 820 West 6th St (from 17 July 1927). He appears to have sold these three properties, perhaps in connection with his divorce from his wife, Neva.

706. *Los Angeles Times.* 1928. Bragg cafe opens. Jan. 13. p. A5.
• ***Summary:*** Bragg's New Health Cafeteria opened yesterday in [840] South Hill Street, near Ninth. "This cafeteria features crispy salads, fresh vegetables, meat substitutes, 100 per cent whole-wheat bread and rolls, whole-wheat pies and health ice cream and desserts.

"This type of food is finding an increase [sic] demand among health advocates and no doubt will lead to an extensive patronage for this new cafeteria."

707. Carque Pure Food Co. 1928. Carque whole wheat bread (Ad). *Los Angeles Times.* Jan. 15. p. K27.
• ***Summary:*** "Try our delicious, unsurpassed, complete" bread. "Made from selected hard wheat, milled and baked by electricity in Carque's Bake Shop. 15¢ per 24 oz. loaf.

"Demonstration this week at our stores: 831 S. Flower St. 6411½ Hollywood Blvd. 729 Seward St., near Melrose Ave.

"Also for sale at Jones Grain Mill, Grand Central Market, Hain Health Food Stores (329 W. 3rd St. and 429 S. Hill), American-Italian Grocery (407 S. Hill St.), Dr. Krich's (730 W. 6th St.), Hollywood Health Food Shop (5455 Hollywood Blvd.).

© Copyright Soyinfo Center 2021

"Mail orders promptly attended to. Ask for new catalog with reduced prices." A small illustration shows a plow and a sheaf of wheat. Address: Los Angeles, California.

708. Health Center of Los Angeles. 1928. Important!! Read every word of this (Ad). *Los Angeles Times.* Jan. 15. p. K27.
• ***Summary:*** "Professor Paul C. Bragg, for many years Chief Clinician of The Health Center of Los Angeles, has opened this wonderful new institution combining many features for restoring and maintaining perfect health." Discusses: The Clinic. Bragg's Health Cafeteria. Free public health lectures by Prof. Bragg every Tuesday. Hiking Club ("Professor Bragg will personally conduct a hike into the beautiful mountains every second and fourth Sunday, starting at 8:30 A.M. Everybody welcome").

"Visit this wonderful institution." Address: 840 South Hill St. [Los Angeles].

709. Bragg, Paul C. 1928. Health hints. *Los Angeles Times.* Jan. 22. p. K29. Sunday.
• ***Summary:*** "Everyone should take two baths a day, one inside, one outside." A great idea for an inside bath is a glass of warm water with the juice of a grapefruit, taken upon arising. It sweetens the breath and "smashes constipation."

He spends the rest of the column promoting his projects. Bragg says people are packing into his "Health Cafeteria, 840 South Hill St." He tells how great his salads are. He is continually amazed at what "Nature Cure" will do. On Jan. 24 he plans to give a "red hot free Health lecture" on "How to build your body back to health... Come early if you want a seat."

Note: Bragg has dropped the titles "Prof." and "Chief Clinician." His Sunday column has changed its title from "Health Center Newslets." His Health Center, now named "Bragg's Health Center," is at the same location as his health cafeteria, which opened on 12 Jan. 1928. Either there have been major changes in his life and business or this is just a gimmick. Address: Director, Bragg's Health Center, 840 South Hill St. [Los Angeles].

710. Hirsch, Fred S. ed. 1928. Health Center newslets (Ad). *Los Angeles Times.* Jan. 22. p. K27.
• ***Summary:*** "450,000 years ago there were intelligent human beings on earth... But they were far cleaner internally than mankind today... If you want to know what it really feels like to be thoroughly, refreshingly clean inside, take Innerclean Intestinal Laxative. This is not a drug extract but a wholesome compound of dried aromatic herbs and vegetables perfected by Prof. Arnold Ehret,..."

"Nature will keep you clean internally if you give her a chance. But you have to do your part with exercise, proper breathing, and non-clogging foods... fruits and non-starchy vegetables mostly." Discover the Health Cafeteria, 217 West 6th St. (between Spring and Broadway), and 1000 West 7th St., and the Whole Wheat Bakery-Cafe at 820 West 6th St., near Figueroa. The latter is open all day Sunday and specializes in a "wonderful 60 cent table d'hote vegetarian dinner."

"I speak every Tuesday at 8 p.m. in conjunction with Dr. Newcomb, Chief Clinician of the Health Center, and Prof. Barclay Severns has charge of a lecture program every Friday at 8 p.m. Our hall was packed last week. Were you there?"

Note: This is the earliest document seen (March 2007) in which Paul Bragg is *not* mentioned in connection with the Health Center. It is also the earliest document seen (July 2021) that mentions Fred. S. Hirsch or Dr. Newcomb in connection with the Health Center. Fred Hirsch has been Arnold Ehret's manager since about the early 1920s. Newcomb is probably a naturopathic doctor. But does he have any credentials? Note the three addresses given above. Starting on about 15 Jan. 1928, Bragg and his Health Center are at a new address, 840 South Hill Street. What's going on here? Address: D.N.S., Managing Director, Health Center, 1000 West Seventh St. [Los Angeles].

711. Bragg, Paul C. 1928. Health hints. *Los Angeles Times.* Jan. 29. p. L29.
• ***Summary:*** "This man Mussolini of Italy is a wonderful man. He has started Italy on a new era of prosperity. Mussolini has tremendous vitality. When asked to what he attributed his remarkable energy he answered–a simple diet and plenty of outdoor exercise. If we would all follow this rule of life we would also have more Pep."

Note: For this one issue, Bragg is apparently writing Philip Lovell's column "Care of the Body." Address: Director, Bragg Health Center, 840 South Hill St. [Los Angeles].

712. Bragg, Paul C. 1928. Health hints. *Los Angeles Times.* Feb. 5. p. K29.
• ***Summary:*** "When the world learns to keep the blood stream clean and pure, jails and asylums will cease to be needed. Our aim at the Bragg Clinic is to cleanse the body of its disease poisons, both of the mental and physical benefit of the patient... A recent case which comes to mind is that of a young man who was brought here with Epileptic fits. It required only two Colonic Irrigations to bring a cupful of worms out of his intestines, and with the auxiliary treatments he was quickly normal."

"The important in maintaining a pure blood stream is the cleansing foods. At my Health Cafeteria the food is not only palatable and appetizing, but is selected to keep the body sweet and clean."

"This coming Wednesday I will serve my famous 35¢ Health Chinese meal" at the Cafeteria. "It may be had at any time during the day," with lunch or supper.

"Everybody who comes into my Health Cafeteria

says 'Fig-Co. Please." They all love this wonderful drink. Besides being satisfying to the taste, 'Fig-Co' [an alternative to coffee] is good for your stomach and nerves. Address: Director, Bragg's Health Center, 840 South Hill St. [Los Angeles].

713. Hain Health Foods. 1928. Free advice on diet (Ad). *Los Angeles Times.* Feb. 5. p. K29.
• ***Summary:*** This tiny ad includes addresses for both the Hain shops in Los Angeles: (1) 329 W. 3rd St. (2) 429 So. Hill St. Address: Los Angeles, California.

714. Hirsch, Fred S. ed. 1928. Health Center newslets (Ad). *Los Angeles Times.* Feb. 5. p. K27.
• ***Summary:*** "What is the secret of Nature's healing... I will tell you–Elimination." Use Innerclean Intestinal Laxative. "The Innerclean Mfg. Co., 846 E. 6th St., will send you a generous trial package free."

"Have Prof. Barclay Severns, popular physical advisor of Radio KMTR and Instructor of Corrective Exercises at the Health Center, tell you how to keep fit. Personal instructions can be had any day at the Health Center by appointment." Also promotes the company's two Health Cafeterias and the Whole Wheat Bakery-Cafe.

On the last line of this long column, by itself, is written: "–[Advertisement]."

Note 1. For the first time, after about 18 months, we are told that that these "Newslets" from the Health Center are actually advertisements, rather than health columns.

Note 2. This is the 3rd issue of the "Newslets" in which Paul Bragg is not mentioned. Address: D.N.S., Managing Director, Health Center, 1000 West Seventh St. [Los Angeles].

715. Morison, C.B. 1928. Lima bean bread. *Journal* (*The*)*: American Bakers Association and American Institute of Baking* (*Chicago*) 1(2):16-18. Feb. 15. [3 ref]
• ***Summary:*** "Dr. W.D. Sansum, of the Potter Metabolic Clinic, Santa Barbara, California, has called attention to the application of lima bean flour for correcting acid diets as follows:... In the severe forms of this type of acidosis (acid ash type) and especially those associated with high blood pressure and its applications, basic or alkaline diet menus should be used... In the past we have used soy bean muffins, but patients as a rule soon tire of them. We believe we have found a solution of this difficulty in lima bean flour, which has been developed for us to a high degree of fineness by the California Lima Bean Growers Association of Oxnard, California. The lima bean is the most alkaline food known, containing 41.65 points of alkalinity. It is so alkaline that we believe that wheat flour, having an acidity of 9 points, may be safely mixed with it. Muffins, pancakes, or waffles may be made by using equal parts of lima bean flour and white flour. Our bakers have recently developed an excellent bread using: Whole wheat flour–2 parts. Lima bean flour 1 part, together with raisins, nuts, yeast..."

Three samples of "lima bean bread" were sent to the Institute. Their composition was analyzed. One sample, in external appearance, resembled a fruit cake.

Tables show: (1) Composition of 3 samples of lima bean bread as received and calculated to dry basis. This "bread contains comparatively high amounts of crude fat." (2) Amounts of base-forming and acid-forming elements in lima beans (based on Sherman & Gettler 1912). (2) Percentage of base-forming and acid-forming elements in lima bean bread (3 samples). (4) Excess of base-forming elements in lima bean bread.

716. *Los Angeles Times.* 1928. Diet authority will give talks. Feb. 22. p. A12.
• ***Summary:*** "Dr. W.D. Sansum, director of the Potter Metabolic Clinic at Santa Barbara, and authority on nutrition and disease-preventive diet, will give a series of four lectures" at 116 South Figueroa street, Los Angeles, sponsored by the South California Public Health Association. The first lecture will discuss acidosis and diet. Dr. Sansum's research has shown that acidosis may be prevented and cured through proper food.

717. Stop & Shop. 1928. Buy your Sunday dinner at this store (Ad). *Chicago Daily Tribune.* Feb. 24. p. 12.
• ***Summary:*** One section is titled "Stop & Shop now offers Battle Creek Sanitarium Health Foods to you–Every day in the year a complete line of standard Battle Creek foods... Battle Creek expert always in charge of this department." Featured: "Savita–a valuable substitute for meat extracts; rich in vitamin–excellent for diabetics. Has the fine flavor of mushrooms and rivals the finest meats. 50¢ jar. Protose–looks like meat, smells like meat, tastes like meat; has the composition of meat yet is purely vegetable. 35¢ jar." An illustration shows 11 products, including Psylla [from psyllium], Gluten Flour, Malted Nuts, Lacto Dextrine, Zo, Savita, Protose, and Laxa. Address: 16 N. Michigan and 12 W. Washington.

718. Hirsch, Fred S. ed. 1928. Health Center newslets (Ad). *Los Angeles Times.* Feb. 26. p. K27.
• ***Summary:*** "When Henry Ford heard that Albert D. Lasker, former chairman of the U.S. Shipping Board, had given $1,000,000 to the University of Chicago" [Illinois] to be used for finding why so many men die just after age 50, Ford sent him the *Life of Luigi Cornaro.* Cornaro lived in Venice, Italy, a long time ago [1467-1566]. "For 40 years he lived 'foolishly,' and then was given up to die by his doctors. Whereupon he regulated his diet and put off dying till he was 105. The action of Ford's was a clever way of saying 'Why spend a million to find out something that has long been known?'"

© Copyright Soyinfo Center 2021

On the last line of this long column, by itself, is written "–[Advertisement]."

Note: This is the 4th issue of the "Newslets" in which Paul Bragg is not mentioned. Address: D.N.S., Managing Director, Health Center, 1000 West Seventh St. [Los Angeles].

719. Health Center (The). 1928. Find out why (Ad). *Los Angeles Times.* March 3. p. K27.
• ***Summary:*** This large ad is a full page high and about 3 columns wide. "So much needless worry about sickness! So much needless pain and expense. All due as much to *guessing at the cause of all the trouble* as to improper treatment. Know what is the matter. That means a thorough physical examination first."

"For a short time only we are going to offer 'Care of the Body' readers the opportunity of a free physical examination and consultation by our Chief Clinician, Dr. Newcomb, at the Health Center Clinic, 1000 West Seventh St... Simply bring the coupon on the right."

"Thousands find health at this great institution: The fame of the Health Center grows and grows. One proof of this is the large number of imitators that have sprung up, calling themselves 'Health Centers.'"

Correct eating. Free health foods. Corrective exercise, Hair culture, Free health lectures by Dr. Newcomb and Fred. S. Hirsch, D.N.S... "conducted under the auspices of the American School of Naturopathy." Four illustrations show different activities of the center. Address: 1000 West Seventh St. [Los Angeles].

720. Bragg, Paul C. 1928. Health hints. *Los Angeles Times.* March 4. p. K29.
• ***Summary:*** "Life is not worth living without sound nerves. Your nerves govern your life–your efficiency, your happiness, your health. If your nerves are depleted you cannot concentrate or think clearly; you have not the 'pep' and spirit to enjoy your pleasures... Is life worth living under these conditions? I do not think so It is merely existence, and you are missing the great joys Life has to offer.

"Nervousness is a universal disease... The reason for this is that the average dietary of the human race today does not include enough of the kind of food necessary to supply the nerves with energy. Green vegetables, fruits and whole grain breads are the foods the build nerve power. At my Health Cafeteria... I specialize in nerve building foods. Sound nerves create immunity to all disease. Thousands of busy people are gaining nerve energy and health from my food. Try it." Address: Director, Bragg's Health Center, 840 South Hill St. [Los Angeles].

721. Carque Pure Food Co. ed. 1928. Just off the press: Mrs. Carque's Recipe Book (Ad). *Los Angeles Times.* March 4. p. K27.
• ***Summary:*** "Containing a large number of extraordinarily fine recipes of delightfully tempting fruit and nut salads and vegetable dishes; distinctly health-promoting, simple to prepare, yet conspicuously inviting and appealing to the most fastidious taste. Nicely illustrated.

"Only 40¢ a copy. Special price in quantities. Free with a copy of Otto Carque's famous book "Natural Foods–The Safe Way to Health." 360 pages of priceless dietetic information–$2.00." Address: 729 Seward St., Los Angeles. Branch stores: 831 S. Flower St. and 6411½ Hollywood Blvd. [Los Angeles].

722. Health Center (The). 1928. Health stories from real life (Ad). *Los Angeles Times.* March 11. p. K27.
• ***Summary:*** Describes how a woman who had suffered for several years from skin disease that had never responded to treatment by doctors. Her husband had spent a fortune trying to cure here, but to no avail. "After some hesitation she agreed to give our Ehret Healing System a trial." She changed to eating "non-clogging foods and took Innerclean daily... After the third treatment in our clinic her skin began to clear... A week later she reported the rash had completely disappeared. It would be futile to describe the woman's happiness, or to write of her husband's gratitude. Henceforth... she will be a life-long booster for natural healing methods as practiced here." Address: 1000 West Seventh St. [Los Angeles].

723. Whole Grain Wheat Dist. Co. 1928. Are you in ill health? (Ad). *Los Angeles Times.* March 11. p. K27.
• ***Summary:*** This national company has brought "150,000 people back to happy, normal health. We also serve thinking people in their home, (for the immediate family only,) a complete educational meal of seven of our twelve natural, cooked foods, including Whole Grain Wheat (not sold in stores)–at no cost whatever. Fill in the coupon below and mail it today–this demonstration serving costs you nothing." Address: 3625 So. Grand Ave., Los Angeles.

724. Health Center. 1928. Health stories from real life (Ad). *Los Angeles Times.* March 18. p. K26.
• ***Summary:*** "Each week at the Health Center we see examples of restored health that are little less than miraculous. This is the second of a series to be reported to 'Care of the Body Readers.' For obvious reasons, names are omitted.

"A taxi stopped at the Health Center, 1000 West Seventh Street, one day recently en route to the hospital. The passenger, a prominent Los Angeles man, was suffering intensely from gall stones and all arrangements were made for an operation. Instead he placed himself under the care of Dr. Newcomb, Chief Clinician of the Health Center, who immediately applied drugless methods of the Ehret Healing System... Early in the morning of the fifth day the patient

© Copyright Soyinfo Center 2021

eliminated between 30 and 40 stones. To his surprise, the elimination of gall stones and fecal matter continued for several days. Since then, although entirely well, he has taken a full course of body building treatments to put him in the very pink of condition, taking most of his meals in the meantime at one of the Health Cafeterias, located at 1000 W. 7th St., 217 West 7th St., of at the Wholewheat Bakery-Cafe, 820 West 6th St.

"If interested in your health don't fail to attend our Free lectures by Dr. Newcomb this coming Tuesday and Friday at 8 p.m.–[Advertisement]."

Note: This ad also appeared in the March 28 issue (p. K26) of this newspaper. Address: 1000 West Seventh St. [Los Angeles].

725. Drugless Physicians of Southern California. 1928. $1,000,000 worth of health free given at the semi-annual Health Chautauqua–1928 (Ad). *Los Angeles Times.* March 25. p. K29.
• ***Summary:*** "Three full days and nights of lectures, exhibitions, and contests. Never before has the public had such a wonderful opportunity to receive such priceless information and entertainment from so many brilliant minds–all absolutely free. Every subject will be covered by Specialists.

"Care of the entire body. The following specialists will personally lecture on vital health subjects. The Hair–Eyes–Teeth–Nose–Throat–Chest–Stomach, etc.

A list of names is given, including: Dr. Carl Schultz. Otto Carque. Prof. Paul C. Bragg. Dr. J.T. Richter. Betty Brownlee.

Note: This is the earliest document seen (July 2021) that mentions Betty Brownlee in Los Angeles, or together with Paul Bragg. She later became his second wife.

726. Carque, Lillian R. 1928. Mrs. Carqué's recipe book. Los Angeles, California: Otto Carqué. 32 p. Illust. 15 cm.
• ***Summary:*** Inside front cover: "Dear Friends: This recipe book has been created to fill a deeply felt human need, namely to emphasize the importance of a fruitarian as well as vegetarian dietary, and to encourage the greater use of nature's most wholesome foods..." Signed, Lillian Carqué (Mrs. Otto Carqué).

This book has no table of contents. However the recipes are divided into "divisions." Fruit & nuts (p. 1-12). Vegetable salads (p. 13-18). Cooked dishes (p. 18-23). Vegetable soups (p. 23-24). Fruit soups (p. 24-25). Fruit cocktails (p. 25). Desserts (p. 25-27). Sandwiches (p. 27-28). Unfired pies [raw] (p. 28-29). Sauces & dressings (p. 29-31). Breads (p. 31). Health confections (p. 32).

Soy related recipes include: Soya bean bread (with 1½ cups Carque's Soya Bean Flour 2 cups whole wheat flour, 1½ cups nut milk, 2 tablespoons Carque's Honey, etc., p. 31).

A photo at the top of many pages shows the dish prepared from the recipe on that page.

The recipes call for many Carque brand products by name–such as: Carque's Almond Butter, Carque's Black Mission Figs, Carque's California Dates, Carque's California Honey, Carque's California Olive Oil, Carque's Celery Salt, Carque's Cracked Wheat, Carque's Deglet Noor Dates, Carque's Dried Apricots, Carque's Fig Paste, Carque's French Dressing, Carque's Gem Peanut Butter, Carque's Granulated Agar, Carque's Lentil Flour, Carque's Natural Whole Rice [brown rice], Carque's Nut Cream Butter, Carque's Nut Fruto, Carque's Nuts, Carque's Onion Salt, Carque's Orange Blossom Honey, Carque's Peanut Butter Dressing, Carque's Peanut Meal, Carque's Pecan Meal, Carque's Pitted Dates, Carque Powdered C-Leaves, Carque's Prunola Dressing, Carque's Raw Hawaiian Sugar, Carque's Ripe Olives, Carque's Savory Nut Loaf, Carque's Seeded Muscat Raisins, Carque's Seedless Raisins, Carque's Shredded Cocoanut, Carque's Soya Bean Flour, Carque's Thompson Seedless Raisins, Carque's Unsulphured Dried Peaches, Carque's Unsulphured Dried Pears, Carque's Whole Wheat Macaroni.

Lillian R. Carqué was born in 1899. This book was published about 7 years before Otto Carqué's death on 9 Jan. 1935.

According to OCLC (Dec. 2010) Helen Evans Brown was a former owner of this book. It was donated to the Huntington Library by Philip S. Brown. Address: 1016 So. Hill St., Los Angeles, California.

727. Bragg, Paul C. 1928. Health hints. *Los Angeles Times.* April 1. p. K29.
• ***Summary:*** "A new Body in 90 Days! Sounds impossible, eh? Well, that's what a lot of folks said about flying machines, radios, etc., till the right men came along and proved it."

"I would like to take out of your diet all meats, white bread, white sugar and other unnatural foods." "Between and with your meals I would insist that you drink six glasses of the purest water." Sparkletts is the best. "I would demand that you get 8 hours sleep..." "Remember ninety days to Health." Address: Director, Bragg's Health Center, 840 South Hill St. [Los Angeles].

728. Bragg's Health Center. 1928. Health hints (Ad). *Los Angeles Times.* April 1. p. K29.
• ***Summary:*** "A new body in 90 days! Sounds impossible, eh? Well that's what a lot of folks said about flying machines, radios, etc., till the right men came along and proved it."

And last but not least–I would have you attend my free health lectures because it is here that I teach this wonderful system of living. This Tuesday my talk will be 'How to cure disease by natural living' and Betty Brownlee, the health girl who won second place in the Miss Los Angeles contest, will appear in bathing suit and show you exercises that will keep

© Copyright Soyinfo Center 2021

your body youthful."

Note 1. This is the earliest document seen (Sept. 2010) that mentions Betty Brownlee appearing (or working) at Paul Bragg's Health Center in Los Angeles. Bragg is married and the father of several children. What does his wife think about her husband's beautiful new employee?

Note 2. This is the first of more than 20 ads, paid for by Paul Bragg, in which Betty Brownlee is mentioned prominently as part of the show. Many of the other ads contain a photo at the top showing Paul Bragg in a one-piece bathing / gym suit.

Others ads are: 1928 April 15 ("and on Friday Betty Brownlee, the Health Girl, will give a Free lecture"). April 22. ("and on Friday night Miss Betty Brownlee will give her famous talk: 'How to defeat disease and live 100 years.' Both of these lectures start at 8:15"). May 6. ("On Friday night Miss Betty Brownlee will give her greatest lecture, 'Beauty, health and strength by gland stimulation'). July 15. ("Prof. Bragg and Betty Brownlee can show you the way to health... and on Friday Betty Brownlee, the Health Girl, will lecture 'Health for all'"). Sept. 2 ("and on Friday you have a real treat, Betty Brownlee will give a great lecture, 'How to cure yourself.' She will serve free Fig Ice Cream"). Sept. 16 ("On Friday night Betty Brownlee, the Health Girl, will give an amazing talk, 'How to be healthy and youthful forever.' Free Health Lunch served at both lectures which start at 8:15").

On 26 Sept. 1928, the divorce of Paul Bragg and his first wife, Neva, is announced in the *Los Angeles Times* (p. 24); they have three young children.

Oct. 14. ("and Friday night Betty Brownlee, the Health girl, will lecture 'Youth, health, beauty for men and women forever'"). Nov. 4 ("On Friday night Betty Brownlee, the Health Girl, winner of the Cecil DeMille Beauty Cup, will deliver an amazing lecture 'Health and beauty forever'"). Dec. 23. ("On Friday, Dec. 28, Betty Brownlee and I will have a great lecture for you with music and everything").

Note 3. We next hear of Betty Brownlee in the *Los Angeles Times* about 3 years later, on 20 Dec. 1931 when she is selling honey candies from a different address. She and the Professor have probably separated. Address: 840 So. Hill St. [Los Angeles].

729. Bragg's Health Center. 1928. This is the man who has made hundreds of weak and sick people, healthy (Ad). *Los Angeles Times*. April 15. p. L29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Paul C. Bragg: The man who can give you health," standing in a full-length gym outfit and looking very fit and strong. "Prof. Paul C. Bragg... has been conspicuous in the field of Diet and Natural Living for many years. He has demonstrated in his own body, which is perfectly developed, that he has the right system." There are three glowing testimonials but no names are given. Address: 840 So. Hill St. [Los Angeles].

730. Bragg's Health Center. 1928. Let this man give you new health–beauty, vigor!! By re-charging your glands (Ad). *Los Angeles Times.* May 6. p. L29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Paul C. Bragg: The man who can give you health," standing in a full-length gym outfit and looking very fit and strong. Discusses: "Glands must have natural foods." "White flour weakens gland strength." "Will meat give gland strength? Absolutely, no!" "Oxygen re-charges the glands." "What does coffee do to the glands? Coffee contains the dangerous drug caffein [caffeine]. This drug dries up the glands–causing nervousness and sleeplessness." "What about tea? Tea contains a poison known as Tannin" which "will deaden the glands and cause premature old age." "Buttermilk is a wonderful gland food." Try "Knudsen Pure Churned Buttermilk." "Painful menstruation due to weak glands." "Cold hands and feet a dangerous sign." "Prof. Bragg's clinic doing wonderful work." Address: 840 So. Hill St. [Los Angeles].

731. Bragg's Health Center. 1928. The man who works miracles ridding hundreds of men and women of illness and old age (Ad). *Los Angeles Times.* June 3. p. L29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: The wonder man," standing in a full-length gym outfit and looking very fit and strong. Discusses: "How to keep the energy of youth. You cannot eat dead, lifeless food and expect to be well and youthful." "Why whole wheat?" "Glands need iron." "Kidneys and glands need water." "Catarrh is a curse to health." "Regenerex–the wonder gland tonic." Address: 840 So. Hill St. [Los Angeles].

732. Bragg's Health Center. 1928. Prof. Bragg can perform miracles on your body: He can banish sickness, give you new energy, make you look years younger (Ad). *Los Angeles Times.* July 1. p. K29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: Can give you new health," standing in a full-length gym outfit and looking very fit and strong. Discusses: Bragg's "famous health-giving baths." "The cause of most disease is eating foodless food such as white bread, meats and messy mixtures." Try "Flax Crax Crackers." "Prof. Bragg serves Otto Carque's products" at his Cafeteria. Try Wheatose. "Minerals the key to life." "The one big secret of health: The bowel which is the sewer of the human house must be kept clean." Free lecture every Tuesday. July 3, "How to banish disease and gain new health." Address: 840 So. Hill St. [Los Angeles].

733. *Oakland Tribune*. 1928. Mrs. Nettie Coward Deacon to become bride of Henry Clay Pendleton. July 8. p. 4A.
• ***Summary:*** "Mrs. Nettie Coward Deacon, member of a pioneer Oakland family, and Henry Clay Pendleton, wealthy

© Copyright Soyinfo Center 2021

contractor and clubman, will be married Tuesday night at the bride's home, 182 Orange street, Oakland, it was revealed yesterday."

"Mrs. Deacon is the daughter of Herbert C. and Mrs. Louise Coward of Piedmont. Coward for years was regarded as the Pacific Coast salt king." "The bride-to-be is a graduate of Sacred Heart convent in Oakland." On their return, they will live in Crocker Highlands where Pendleton purchased a home.

A large portrait photo shows Nettie Coward Deacon dressed in a hat and wraps like a flapper.

Note 1. These two people became the parents of Patricia Pendleton, who lived for many years with Paul Bragg. Bragg stated in his Will of Jan. 1958 that he had adopted her as his daughter.

Note 2. Nettie Coward Deacon & Harry Clay Pendleton were married on 10 July 1928 by Rev. R.T. MacFarlane.

Note 3. Their marriage lasted only about 5 years, ending as follows (based on Alameda County records):

1933 Nov. 10. Nettie and her husband, Henry / Harry separated.

1935 May 13. Nettie, the Plaintiff, filed a Complaint (or Divorce) against Harry, the Defendant, on May 13, 1935 in Alameda County Superior Court, Oakland, California, Case No.135796, under the grounds of "extreme cruelty." Harry M. Gross & Edwin G. Wilcox were her attorneys.

1935 Oct. 8. An Interlocutory Judgment and Degree of Divorce was entered in the Pendleton matter, in which Nettie was awarded sole custody of the two children, child & spousal support & certain community property assets.

1938 June 24. Nettie filed an Affidavit which primarily stated that Harry was in arrears of his ordered support payments to the amount of $1,105.

1938 Oct. 1. A Final Judgment of Divorce in the Pendleton matter was signed by Edward J. Tyrell, Judge of the Alameda County Superior Court & entered on the same date in Book 219, page 735, Alameda County Records. Fini.

734. Bragg's Health Center. 1928. This advertisement may save your life: Read every word of it (Ad). *Los Angeles Times.* Aug. 5. p. K29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Paul C. Bragg: He may save your life," standing in a full-length gym outfit and looking very fit and strong. Discusses: "Know your physical condition: Everyone should have a thorough Physical Examination once a year." Bring this ad and you will be given one for free by "the Chief Diagnostician of the Bragg Health Center." Keep your "intestines clean and free from putrefaction. Hundreds of folks eat daily at my famous Vegetarian Health Cafeteria." "Prof. Hall can give you luxuriant hair... the noted hair specialist is doing wonders for folks with falling hair, dandruff, oily, gray, off colored hair." Call for a free scalp examination. Free lecture by "Betty Brownlee, the Health girl." Address: 840 So. Hill St. [Los Angeles].

735. *Los Angeles Times.* 1928. Eutropheons to be meet motif. Aug. 14. p. A3.
• ***Summary:*** "The Eutropheons, who claim the distinction of having originated the only dining-rooms in the world in which no cooked foods are served, will be the guests of Dr. Philip M. Lovell and staff at the dietetic lecture-demonstration this afternoon at 2 o'clock... at 130 South Broadway.

"Dr. Lovell will talk on the preparation of unfired foods, while Mrs. Eva Richter, manager of the Eutropheons, and her assistants will prepare and serve... natural products without any cooking except that done by the sun.

A booth will display more than 50 natural food products and samples of olive bread, nut roll and rhubarb drink will be served.

736. *Los Angeles Times.* 1928. Classified ad: Business opportunities. July 18. p. A18.
• ***Summary:*** "Health Food Shop: Nationally advertised health food products; best Hollywood district; well established bus. [business]. 1612 W. Pico."

737. *Bessemer Herald* (*Bessemer, Michigan*). 1928. City and township schools open on Tuesday for 1928-29 Term; list of 21 new teachers. Grades and special corps in city system have new teachers. Aug. 31. p. 1, 3. Friday.
• ***Summary:*** The teachers are divided among two schools: High School and Washington School. Mildred M. Lager, Superior, Wisconsin, will be teaching at Washington School.

738. Bragg's Health Center. 1928. A new body for $3.00: Investigate this startling offer (Ad). *Los Angeles Times.* Sept. 2. p. L29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: Can make you well and young again," standing in a full-length gym outfit. "Hundreds of seekers of health and youth are taking advantage of this amazing offer. And are finding a new health, a spring in their step and a sparkle in their eyes,

"Here's what I'll do. I will have the Doctor in charge of my clinic give you a complete physical examination... including blood pressure and urinalysis. Then you will be given one of my famous Rejuvenation Treatments– which tears disease and old age out by the roots. After this treatment you will be given a special diet for yourself. In thirty days you will feel ten years younger. Let me prove it.

"My food given health. You are what you eat. Eat trash and your body is trash. Eat good healthy food and you will have a healthy body."

No dead animals served. If you're looking for dead meat you will have to go to the morgue or some place where they serve dead animals. In place of meat I serve the greatest body

© Copyright Soyinfo Center 2021

builder I know of, 'Knudsen's Velvet Cottage Cheese.'

"Getting up nights can be stopped. Often in 24 hours by Alvita tablets. They are made of alfalfa and are recommended by hundreds who have used them with great success."

Near the bottom of this ad is a second one: "This advertisement may give you a new head of hair." A small photo shows "Prof. Hall, the great hair scientist..." "Call for appointment–TUcker 8639." Address: 840 So. Hill St. [Los Angeles].

739. *Los Angeles Times.* 1928. Divorce decrees granted. Sept. 26. p. 24.

• ***Summary:*** "Bragg, Neva C. from Paul C."

Note 1. Neva was the first wife of Paul C. Bragg, of health food fame. They had three children, Neva P. and Lorraine, born in 1917 and 1918 respectively, in Washington, DC, and Robert Elton, born in 1922 in Los Angeles.

Note 2. After the separation and divorce, Paul Bragg's wife, Neva, and their children continued to live in the Los Angeles area. But did Paul continue to see his children, help to raise them, and develop a close relationship with them? When they grew up, did they marry? Where did they live? Are any still alive as of Nov. 2009?

Some of the answers can be found on the Wikipedia webpage for Paul Bragg, which states (17 Aug. 2007) that by the time of the 1930 U.S. Census, Paul and Neva Bragg had divorced. Neva and her new husband, August Busch, were living with the three Bragg children (Lorraine, Neva Polly and Robert Elton) in Los Angeles, California. There is no record of Paul C. Bragg being counted in the 1930 Census. The source of the information about Neva was almost certainly the 1930 U.S. Census.

The pertinent court papers concerning this divorce are still available in Los Angeles. It looks like Paul was a wife beater–at least the Judge specifically "found" for Neva's claims on these allegations in his 1928 interlocutory judgment. The year of their "final judgment" was 1929, not 1928.

740. Bragg's Health Center. 1928. This amazing invention: Banishes pain almost instantly (Ad). *Los Angeles Times.* Oct. 7. p. K29.

• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: Can banish pain instantly," standing in a full-length gym outfit. The amazing invention is "The H20 Red Ray Lavage," which cures almost everything. The Professor has also discovered a new drink: "2 glasses of liquid steam. This is the purest water you can drink. It is fairly alive with tissue building ozone." Its good with a "cup of Bowers Alfine Coffee-Like." For lunch and supper only one glass of liquid steam is recommended. For constipation, take Flaxolyn. Prof. Bragg says: "I can re-charge the human battery with dynamic powers, tireless energy, amazing vitality. I can turn the clock of time back 20 to 30 years."

Near the bottom of this ad is a second one: "Would you pay $1 for a new head of hair?" A small photo shows Prof. Hall who "has a natural system of hair culture which never fails." Address: 840 So. Hill St. [Los Angeles].

741. *Los Angeles Times.* 1928. Judicial toast: "How dry I am!" Courtroom sounds like conclave of masticating equines as contestants over Melba product induce everyone to munch on evidence. Oct. 18. p. A1.

• ***Summary:*** In the driest case ever heard in Judge Gates's court, Henry G. Cubbison, the plaintiff, complained that he was being treated unfairly and unjustly by the Regal Food Products Company, defendant, and asked for an injunction to stop it. Note: The co-owner of Cubbison's was Harry R. Cubbison; we have never heard of a Henry G. Cubbison.

Mr. Cubbison explained that for a long time he has been manufacturing Melba toast and selling it in a distinctive package. Last summer, he complained, Regal started selling a similar product under the same name, in a package that was almost identical to his. This has already caused him $10,000 in damages.

Leland S. Bower, attorney for Cubbison's, placed in evidence a package of each of the parties' product. They looked very similar. He invited Judge Gates, the clerk and the bailiff, and even the newspaper reporters to taste it. For a few minutes the courtroom was filled with the sound of munching; then everyone went to the water cooler.

William Haughton, attorney for the defense, argued that Melba Toast is a generic name, like French toast, and that everyone has a right to use it. The judge then "took the petition under submission."

Note: According to *The Food Chronology,* by James Traeger (1995, p. 345), "Melba Toast" was first created (and the term coined) in 1894 in London by Chef Auguste Escoffier to honor the Australian opera singer Madame Nellie Melba (Helen Porter Mitchell). He grilled a slice of toast, split it down the middle to make it twice as thin, then grilled it again. However he adds the puzzling statement that Escoffier created it "originally to satisfy the wife of hotelman César Ritz" (1850-1918, the Swiss hotelkeeper, who owned fashionable and opulent hotels in London, Paris, New York, etc.). The *Encyclopedia Britannica* contains only one sentence about Melba toast under "Melba, Nellie" (1861-1931), who was born and died in Australia: "Melba toast and peach Melba were named for her."

742. Health Center. 1928. $300.00 prize contest: First prize $50 cash (Ad). *Los Angeles Times.* Oct. 21. p. J26.

• ***Summary:*** "There are only ten days left to submit letters in the big $300.00 prize contest... All you have to do is to write an interesting, convincing letter of not more than 300 words on either [sic, any] of the following subjects: A. What the Health Center is doing for the thinking people of

© Copyright Soyinfo Center 2021

Los Angeles and Southern California. B. Why I eat at the Health Cafeterias. C. Advantages of Highland Springs Health Resort. D. Why Innerclean is the ideal intestinal cleaner for keeping the body physically fit. E. Why Prof. Beamon keeps hair from falling out through his Natural Hair treatments."

Note: This is the earliest document seen (July 2021) that mentions Highland Springs Health Resort. It is located in Beaumont, southeast of Los Angeles, about 85% of the way to Palm Springs. Address: 1000 West Seventh St. [Los Angeles].

743. Bragg's Health Center. 1928. Would you pay $3.00 for a new body? Read this amazing offer (Ad). *Los Angeles Times.* Nov. 4. p. H29.

• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: Can give you a new body," standing in a full-length gym outfit. "Here's a youth builder." At my Health Cafeteria we "have a dandy salad we call 'Youth.' Because if you eat one every day you will feel years younger. Its Knudsen's Velvet Cottage Cheese–with lettuce, tomatoes, celery, parsley and olives."

Near the bottom of this ad is a second one: "A new head of hair for $1.00." A small photo shows "Prof. Hall, the nationally renowned specialist on ailments of hair and scalp,..." He will give you "one of his famous 'New Life Hair Treatments.'" Address: 840 So. Hill St. [Los Angeles].

744. Bragg's Health Center. 1928. Prof. Bragg saved my life! Read this startling testimonial (Ad). *Los Angeles Times.* Nov. 18. p. H29.

• ***Summary:*** A photo shows "Prof. Bragg: The man who saved my life," standing in a full-length gym outfit and looking very fit and strong. At the bottom left, another photo shows a rear side view of the head of one "Dr. Hall." There are many glowing testimonials but no names are given.

One person writes: "I understand that Prof. Bragg is giving a special examination and body cleansing and body strengthening treatment for three dollars. You should accept this marvelous offer." Another person writes: "I ate my meals at his famous Health Cafeteria at 840 So. Hill and I must say they are delicious." A third person writes: "I could write here forever about Prof. Bragg, but come down this Tuesday and hear his greatest free lecture and on Friday night Betty Brownlee will lecture. A free Health lunch is served. Both nightly lectures start at 8:15." Address: 840 So. Hill St. [Los Angeles].

745. Health Center. 1928. Are you playing safe when you eat? (Ad). *Los Angeles Times.* Nov. 18. p. H27.

• ***Summary:*** "There is more truth than folks realize in the statement that may people dig their graves with their teeth." Bad diet is the main cause of disease and suffering. "Highly seasoned foods, such as are served at most restaurants and homes, are bad for a healthy stomach, and if the person who eats them has anything wrong with his digestive system they may be as bad as poison.

"There is just one way to play safe with your diet and that is to eat at a place where the most scrupulous care is taken to avoid dangerous combinations of highly seasoned or otherwise unwholesome foods.

The Health Cafeterias: In Los Angeles there are four Health Cafeterias which are seriously dedicated to the principles of scientific diet. Only such foods as are known to be beneficial are selected. All meats are omitted from the menus. Specially designed cooking utensils insure the maximum retention of the vitamin content and mineral salts which are known to be veritable well springs of health."

Initially, "you may miss the pepper, the vinegar and the other condiments to which you may be accustomed. But the taste of Health Cafeteria food will grow on you, especially after you have noticed a marked improvement in your health and general well being.

"Health is wealth–Why be poor? Patronize the Health Cafeterias at either of the following locations: 217 West Sixth Street, 320 West Sixth Street, 639 South Olive Street, 1000 West Seventh Street.

"The Health Cafeteria at 639 S. Olive St. is open Sundays! Good music every evening.

"More benefits–Less costs at Highland Springs Health Resort." There "you can get the celebrated Arnold Ehret System of Mucusless Diet." Sunbathing, sports, and "entertainment of all sorts." "Enjoy a week end for as low as $4. Make reservations at any Health Cafeteria..."

Free lectures Monday and Tuesday nights by Dr. C.A. Newcomb and Fred S. Hirsch. Wearever aluminum cooking utensils given away with lecture on "Proper cooking as health insurance."

"Send for a free package of Prof. Arnold Ehret's Innerclean intestinal laxative, from Innerclean Mfg Co., 846 E. 6th St., L.A."

Note: This is the earliest document seen (March 2007) that a Health Cafeteria (or any other health-related organization) at 630 South Olive Street. However Paul Bragg is not mentioned. Address: 1000 West Seventh St. [Los Angeles].

746. McCoy, Frank. 1928. Health and diet advice. *Los Angeles Times.* Nov. 29. p. A6.

• ***Summary:*** Shows a one-week non-vegetarian menu, three meals a day. Wednesday breakfast calls for "Soy bean muffins with peanut butter." At the end of the week's menu is a recipe for the soy bean muffins, which includes ½ cupful "soy bean flour." Address: Dr., author of "The Fast Way to Health".

747. Bragg's Health Center. 1928. My latest achievement: For the good of humanity (Ad). *Los Angeles Times.* Dec. 2. p. H29.

© Copyright Soyinfo Center 2021

• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: Will give you health," standing in a full-length gym outfit. "I always knew that all of the 4,000 diseases which tortured and finally killed were traceable to one cause. At last after years of discouragement I have discovered a system which will absolutely tear disease out by the roots.

"Let me prove it. Bring this ad and $3.00 and let us show you the amount of poisons you carry in your body. If you are sick and struggling for health, come in and try this famous treatment. It may save your life." Liquid Steam is served free to all who eat at his Cafeteria. It is made by a "New and Exclusive process of Pasteurization and Intersticization" that produces a "pure, Ozoned, lively, sparkling water for drinking purposes."

Near the bottom of this ad is a second one: "Would you pay $1 for a new head of hair?" A small photo shows "Prof. W.M.J. Hall, the noted hair specialist,..." "He uses no tonic or lotions. He sends the blood coursing to the scalp and restores hair to its youthful condition." "Call TUcker 8639 for appointment." Address: 840 So. Hill St. [Los Angeles].

748. **Product Name:** Bill Baker's Lima Bean Bread, and Lima Bean Flour.
Manufacturer's Name: Baker (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1928.
Ingredients: Incl. lima bean flour.
New Product–Documentation: Baker, W.C. 1928. "Lima Bean Bakery Products–Bill Baker's Lima Bean Bread." Trifold leaflet printed front and back.

749. Baker, W.C. 1928. Lima Bean bakery products–Bill Baker's Lima Bean Bread (Leaflet). Ojai, California. 3 panels each side. Each panel: 14 x 7 cm.
• ***Summary:*** On the front panel, inside a large illustration of a lima bean, we read: "Bill Baker's Lima Bean Bread: A real-health bread." Below that, in small italics: "A non-acid bread having an ash in which base forming elements predominate.

"Copyright 1928. By W.C. Baker, Ojai, California."

On the remaining 5 panels are the following recipes; each calls for lima bean flour (LBF) and some call for white pastry flour (WPF), cake flour (CF), or white flour (WF)–the latter being refined wheat flours. Many call for milk, eggs, sugar, shortening, and/or baking powder:

Lima bean muffins (with 1 lb each LBF and CF). Lima bean hot cakes (same as above but with more milk). Lima bean cookies (with 3 lb each LBF and WF). Lima bean biscuits (with ½ lb LBF and 1½ lb WPF). Lima bean soup (with LBF). Lima bean cheese straws (with ½ lb each LBF and WPF). Bill Baker's Lima Bean Bread (with 2½ lb LBF and 10 lb strong spring wheat flour). Lima bean cup cake, layer cake and loaf cake. Lima bean butter wafer. At the bottom of the back panel is stamped the date: March 21, 1928, and the copyright number.

Note 1. This is the earliest document seen (Jan. 2009) that mentions lima beans in connection with Bill Baker. Note 2. Soyfoods Center is surprised that most of these recipes contain wheat flour. We thought Bill Baker developed these specialty breads for people who were allergic to wheat flour. Address: Ojai, California.

750. Merritt, Frank Clinton. 1928. History of Alameda County, California. Vol. 1. Chicago, Illinois: S.J. Clarke Publ. Co. 694 p. See p. 254. Illust. Portraits. 27 p. *
• ***Summary:*** In the chapter on Oakland in the 1890s, the author goes block by block. giving details on the companies in the major buildings. In the old Central Bank Building, on the northeast corner of Broadway and 14th (p. 254): "The fifth floor housed the Ralston Health Food Company, the Mutual Benefit Life Insurance Company,..."

Note: Frank Clinton Merritt was born in 1889.

751. Sansum, W.D. 1928. The normal diet: A simple statement of the fundamental principles of diet for the mutual use of physicians and patients. 2nd ed. St. Louis, Missouri: The C.V. Mosby Co. 136 p. Index. 20 cm. 1st ed. 1925. [7 ref]
• ***Summary:*** Contents: 1. Normal diet menus. 2. The bulk requirements of the body ("an adequate amount of bulky, residue-containing foods to insure natural movements of the bowels)." 3. The acid-ash type of acidosis ("an adequate amount of alkaline-ash foods to balance the acid-ash foods"). etc. The three meals of the day are breakfast, dinner, and supper. The section titled "The acid-ash foods" (p. 43-44) states: "These foods should always be balanced by adequate amounts of alkaline foods. When the urine is excessively acid, many of them should be omitted, at least for a time." Two tables (identical to those in the 1925 edition) shows the foods with the most acidic and the most alkaline ash.

The section titled "Alkaline-ash foods" (p. 44-51) begins like the 1925 edition, then greatly expands on the theme of alkalinity: "Blatherwick proved that the acidity of the urine can be changed at will, the change paralleling the ash of the foods used. Untreated high blood pressure patients usually have very acid urines. These urines are oftentimes from one hundred to as high as one thousand times as acid as the body. A standard treatment for high blood pressure has been the administration of alkaline drugs or waters to counteract such abnormal acidities." In experiments over many year, Sansum has found that acid urines can be corrected by diet alone. Fifty patients with high blood pressure were treated with a "basic diet." In 90% of the cases the blood pressure fell an average of 40-50 points. "Only the terminal cases with very marked sclerosis (hardening) of the blood vessels and excessive kidney damage failed to respond satisfactorily (*JAMA* 1923, vol. 81, p. 883).

To add alkaline-ash foods: "In the past I have used soy bean muffins, but patients as a rule soon tire of them. I

© Copyright Soyinfo Center 2021

believe that I have found a solution of this difficulty in lima bean flour, which has been developed for me to a high degree of fineness by the California Lima Bean Growers Association of Oxnard, California. The lima bean is the most alkaline food known, containing 41.65 points of alkalinity. It is so alkaline that I believe that wheat flour, having an acidity of 9 points, may be safely mixed with it. Muffins, pancakes or waffles may be made by using equal parts of lima bean flour and white flour. Our bakers [Bill Baker of Ojai] have recently developed an excellent health bread using two parts of wheat flour, one part of lima bean flour, together with raisins, nuts, yeast and such other ingredients which go into the making of bread. I am in hopes that this new non-acid bread will find a wide usage in both the prevention and treatment of this type of acidosis."

Four pages of menus for "Basic diets" [i.e. alkaline] follow (p. 52-55). On p. 62 is a recipe for Lima bean muffins. Address: M.S., M.D., F.A.C.P., Director of the Potter Metabolic Clinic, Dep. of Metabolism, Santa Barbara Cottage Hospital, Santa Barbara, California; 2. M.D., Member of the staff, The Sansum Clinic; 3. Dietitian, The Sansum Clinic.

752. Bragg's Health Center. 1929. Prof. Bragg saved my life! Read this startling testimonial (Ad). *Los Angeles Times.* Jan. 13. p. H29.
• ***Summary:*** A photo at the top left of the ad shows "Prof. Bragg: The man who saved my life," standing in a full-length gym outfit. This entire ad is a testimonial, but no name is given. Address: 840 So. Hill St. [Los Angeles].

753. Health Center. 1929. Eat at the health cafeterias (Ad). *Los Angeles Times.* Jan. 13. p. H27.
• ***Summary:*** This ad has 6 parts: (1) "Eat at the health cafeterias. 'The only place in Southern California.' our patrons say, 'where you can follow a natural diet.' Dozens of delicious fresh vegetables, fruits, and other non-clogging dishes to choose from. All the life-giving vitamins retained... 3 convenient locations: 217 W. 6th St. (between Spring & Broadway). 818 W. 6th St. (below Figueroa). 639 S. Olive (open Sundays)."

(2) "Prof. Arnold Ehret's Innerclean, intestinal laxative, relieves constipation."

(3) Come to Highland Springs Health Resort [Beaumont, California]. The only resort in the world offering the famous Mucusless Diet Healing System of Prof. Arnold Ehret... Splendid hotel or cottage accommodations. Week end rates as low as $4, including room and board. Make reservations at any of the Health Cafeterias. Under the same management as the Health Center.

(4) Open Sundays, the Health Cafeteria, 639 South Olive Street.

(5) "Gain real health this sane way! Thousands attest to the phenomenal results obtained through the Health Center's system of Drugless Healing. New commodious quarters [just moved from 1000 West 7th St.]. Treatments include the famous Danish Rays, color light therapy, improved colonic lavage, scientific massage, Arnold Ehret diet instruction, and other sound therapeutics. Consultation with Fred S. Hirsch, managing director, is free and without obligation. The Health Center. Entire second floor, 818 West Sixth Street."

(6) "Free health lecture. Fred S. Hirsch will deliver a free lecture on a topic of special interest to health seekers at the new Health Cafeteria, 818 West Sixth Street. Tuesday evening–8 o'clock. No collections, no obligations." Address: 818 West Sixth St. [Los Angeles].

754. *Los Angeles Times.* 1929. Discover new outlet for lima crop: Baker named Baker bakes bread from common product. Jan. 14. p. A8.
• ***Summary:*** "Ojai, Jan. 13." Health authorities throughout the USA have "decreed that the 'lowly lima' is invaluable in combatting acidosis and high-blood pressure, common ills in prosperous America with her abundance of overly rich foods." Dietitians have long recognized that the lima beans are the most alkaline food known.

"Taking a hint from the Chinese, whose main food is bread made from the soya bean [sic], and who are free from acidosis or high blood pressure, Dr. W.D. Sansum of Santa Barbara, noted dietitian, centered his experiments on that bean. He tried having the soya bean ground into flour and bread made, but because of the objectionable flavor, gave up the idea.

"He then decided to try the lima bean, which he had discovered possessed about the same alkalin [alkaline] content as the soya." He used a coffee mill to have some limas ground to flour, which he used to make muffins and cakes. He appealed to the California Lima Bean Growers' Association to help him make a finer flour. Many efforts failed, but finally W.C. "Bill" Baker, the "famous baker of Ojai," developed baked lima bean products that taste good and are as alkaline as Sansum's soya bean bread.

Baker sent a loaf of his lima bean bread to the American Institute of Baking in Chicago, Illinois, which submitted it to a thorough test. "It was found to meet every requirement for a health food." The Institute's analysis was published in the *Journal of the American Bakers' Association* (15 Jan. 1928), and reprinted in: (1) *Food Facts*, "a magazine published by the medical profession in Los Angeles, and (2) the *Baker's Helper,* (21 Aug. 1928), and excellent trade magazine published in Chicago.

Baker then developed a thin "100 per cent Lima Bean Wafer" (or cookie) which is now being shipped in hermetically sealed 1-pound cans.

Baker's cookies and bread were both shown and demonstrated at the recent convention of the American Hospital Association in San Francisco [Aug. 1928]. They won "widespread testimonials from physicians and

© Copyright Soyinfo Center 2021

dietitians... who tasted and tested them."

To be able to satisfy "the constantly increasing demand for his lima-bean products, Baker has installed a complete lima bean bakery in a new building near his regular bakery plant. Now Ojai boasts of what is believed to be the first lima bean bakery in America." Bill Baker and Dr. Sansum are being given the credit. A photo shows Bill Baker with three young women, seated together on a wooden crate and acting playfully, in his modern lima-bean bakery, with apparently new ovens.

Note 1. This is the earliest document seen (July 2021) concerning Bill Baker and Ojai, California–where he lived and baked for the rest of his life.

Note 2. This is the earliest document seen (July 2021) stating that Bill Baker is making and selling lima bean wafers and bread.

755. Walgreen or Economical Drug Store. 1929. Display ad: Chicago health leader gives formula for kidney and liver sufferers. *Chicago Daily Tribune.* Jan. 18. p. 16.
• ***Summary:*** "States amazing Flaxolyn discovery relieves constipation condition naturally and brings sound, restful sleep by perfecting digestion."

A sidebar is titled "Flaxolyn 'Open Formula'–Not a secret–Nothing to hide, says dietitian Anthony A. Berhalter of Chicago. Here are the ingredients of Flaxolyn and their use." The first four of the 12 ingredients are: Baked flaxseed, vegetable charcoal, juniper berries, African ginger roots. "Flaxolyn is sold in boxes containing many treatments at $1.00..."

A large portrait photo shows Anthony A. Berhalter. The caption describes him as "a leader of the movement for better health through correct eating and natural remedies, who praises Flaxolyn highly." Address: Mail orders filled at 4134 Cottage Ave., Chicago, Illinois.

756. Bragg, Paul C. 1929. Amazing new book: "Cure Yourself" (Ad). *Los Angeles Times.* Jan. 20. p. H28.
• ***Summary:*** "By Prof. Paul Bragg for men and women. Tells over 100 ways to regain lost youth, physical beauty and enjoy perfect health. Contains 256 pages crammed full of health suggestions on how to banish disease, gain and reduce [weight], correct eating and exercise. Write today for your Free copy of 'Return to Youth' and complete information about Prof. Bragg's new book 'Cure Yourself.' Prof. Paul C. Bragg, Dept. 80, 840 So. Hill St., Los Angeles, California." Address: Prof., 840 So. Hill St.

757. Bragg's Health Center. 1929. My latest achievement: For the good of humanity (Ad). *Los Angeles Times.* Jan. 20. p. H29.
• ***Summary:*** Note 1. This is the last ad seen for or by Bragg's Health Center. At about this time he probably stopped running this center and began writing books, selling products by mail order, and lecturing on health.

Note 2. This ad is identical to the one that appeared in this newspaper on 2 Dec. 1928–the first time we have seen a Bragg ad repeated. Address: 840 So. Hill St. [Los Angeles].

758. Cubbison Cracker Co. 1929. Insist on Cubbison's Whole Wheat Flaxseed Crackers and Melba Toast (Ad). *Los Angeles Times.* Jan. 20. p. H28.
• ***Summary:*** "There is no substitute." Address: 3419 Pasadena Ave., L.A. [Los Angeles]. Phone: CA. 2969.

759. Bill Baker standing in his modern-looking bakery (Photograph). 1929.
• ***Summary:*** See next page. This photo shows Bill Baker standing in a new-looking bakery. He is wearing a dark two-piece suit and tie, wearing glasses, holding a cigar in his left hand, and laughing. Behind him, on a counter, are baking sheets with thin wafers or cookies on them, and behind those are cans with white labels. In an oval on the front of each label is written "Bill Baker's Original Lima Bean Wafers." In the center of the room, three young women are seated together on a wooden crate and acting playfully. Two are holding the same type of can with a white label, and one of these is placing a wafer into the open mouth of the third. It is clearly a staged, promotional photo.

Note: This photo appeared in the *Los Angeles Times* on 14 Jan. 1929 (p. A8) in an article titled "Discover new outlet for lima crop." The article explains that to be able to satisfy "the constantly increasing demand for his lima-bean products, Baker has installed a complete lima bean bakery in a new building near his regular bakery plant."

This 8 by 10 inch glossy photo was sent to Soyfoods Center by Rose Boggs of Ojai, California.

760. Bragg, Paul C. 1929. Cure yourself. Los Angeles, California: National Diet & Health Association of America. 240 p. Jan. Frontispiece (2 portraits). Illust. No index. 21 cm.
• ***Summary:*** There are two frontispiece portraits: (1) Portrait of a handsome, confident-looking man, dressed in a coat and tie, with his hair parted in the middle, titled "Professor Paul C. Bragg." (2) Full-body photo in a black one-piece wrestling or swim-suit, with one strap over his left shoulder and his right breast bared–looking rather like Tarzan. Same title.

In the introduction, titled "My message to you," begins: "The world is full of sick people, nervous people, weak ineffectual people, men and women lacking the vital energetic force to become successful and happy." "There is no one alive who cannot be strong and well, full of pep, free from all hampering ailments.

"I have rejuvenated myself from the lowest ebb of vitality. What Nature has done for me, she can do for anyone. I was a hopeless invalid, doomed to death..." The South was his home. "From birth I suffered from chronic catarrh and

© Copyright Soyinfo Center 2021

asthma, which later developed into tuberculosis. At one time my left breast almost caved in. Constipation poisoned my blood stream to such an extent that I was practically blind in the left eye, and for days could not see out of either eye. At [age] twenty I was thirty-five pounds underweight and so crippled with rheumatism that at times I could hardly walk.

"I was taken to Richmond, Virginia, Louisville, Kentucky, Atlanta, Georgia, and Birmingham, Alabama, securing no relief. At a consultation of five physicians in Washington, DC, I was given thirty days to live.

"From this twisted, pain-wracked creature I have rebuilt myself to one of America's leading athletes. In 1918 I won the South Atlantic A.A.U. Wrestling championship at Baltimore, Maryland. In Los Angeles in 1926 I won the Pacific Coast Endurance Championship, having run from Los Angeles to Santa Monica, California and return, a round trip distance of forty miles. At the finish of the race I was declared by physicians to be in perfect condition after a thorough examination of heart and lungs. I am always active in swimming, boxing and wrestling at the Los Angeles Athletic Club."

He is in "the highest and most perfect physical condition. Because I have found this wonderful thing, the Secret of Health; because I have proved, not only in my own body, but in that of thousands of others who have been my patients, that sickness and disease can be banished, that splendid health is impossible to no one; because, if you will listen to me, I can help You, I am writing this book and presenting my information to the world." "You can Cure Yourself through hygienic living, and possess Perfect Health, Strength and Vigor" (p. 13-15).

Why are we sick? Living a civilized life, "we are slowly, insidiously, surely, *making ourselves sick.* When man discovered Fire and first learned to cook his food, the Demon Disease was born. That is when the custom of *preparing* our food instead of eating it as presented to us by Nature, had its beginning, and with it an endless train of human ills."

One section / chapter is titled "There is but one disease"

© Copyright Soyinfo Center 2021

(p. 23-29), and the next is titled "One doctor" (Nature). In "Why vegetarianism has failed" (p. 48-50) he gives two reasons, both based on misunderstandings or fallacies. First, people think they need more protein than they actually do, so they substitute "copious amounts of beans, nuts, eggs, cheese, bread, potatoes, cereals, and so forth, for the meat they have discarded." Consuming an over-abundance of these "nourishing" foods is a grave mistake. Second, people misunderstand that eating a healthy, natural diet leads to elimination crises. They think they are getting worse, when they are actually getting better.

Part II is titled "How to cure yourself." "Whatever is wrong with you, your cure will be through elimination of the poison matter in your body." There are five factors which bring this about: "Diet, exercise, deep breathing, sunshine, and fasting. All of these factors are essential in a well-balanced program of regaining health." In the section on "Diet" is a table of "bad foods" (incl. eggs, dairy products, dried peas, dried beans, peanuts) and "good foods" (fresh fruits, raw vegetables, and cooked succulent vegetables only). Natural cereal grain, and nuts are neither good nor bad. The chapter on "Fasting" (p. 147-52) explains that will be part of the best cure for a serious or long standing ailment. Details are given on how to fast, what to expect during elimination, and how to break a fast.

Part III, "Recipes" (p. 199-240), contains many salads, some whole wheat breads, and some baked natural desserts. The "Health ice cream" calls for equal parts fruit (fresh or stewed) and whipped cream.

Note 1. This is Paul Bragg's first book. An ad for it appeared on 29 Jan. 1929 in the *Los Angeles Times.*

Note 2. For the first time in this book, Paul Bragg reveals something about his life story; yet he never explains three key facts: (1) When and where he was born. In 1976, he told a reporter in Hawaii that he was born in 1881 in Wakefield, Virginia, and that he was now age 94. That means in 1929 he would be age 48. Yet in the two photos he appears to be in his late 20s or early 30s. Actually, he was born on 6 Feb. 1895 in Indiana. So in 1929 he was about age 34. (2) His educational background. (3) When or how or where he became a professor.

Note 3. This is the earliest document seen (Sept. 2011) in which Paul C. Bragg mentions tuberculosis or claims that he suffered from tuberculosis when younger.

Note 4. This is the earliest document seen (Sept. 2011) in which Paul C. Bragg claims that he was once crippled with rheumatism.

Note 5. This is the earliest document seen (Sept. 2008) in which Paul C. Bragg claims that he was once crippled.

Note 6. In one book, facing the first photo, is an inscription, in well-formed script: "Yours for Health Truth, Paul C. Bragg, Denver, Colo. [Colorado], May 22, 1929." Address: Los Angeles, California.

761. Carque Pure Food Co., Inc. 1929. Carque's new process Fig-Cereal: The world's best coffee substitute (Ad). *Los Angeles Times.* March 17. p. H26.
• ***Summary:*** "25¢ a package. A most wholesome drink for young and old. Sold all over the United States and Canada. For sales at Ralphs Stores and other leading groceries and health food stores. Also at the Carque Shops, 831 S. Flower St., 6411½ Hollywood Blvd. Factory and main office 729 Seward St. near Melrose Ave.–Sample package free.

An interesting logo to the left of the ad has the word "Carque" in a circle with a diagonal line through it. "Every day drink California Fig Cereal, coffee substitute: The unexcelled health beverage," Address: [Los Angeles].

762. Health Center. 1929. Tomorrow she was to go under the knife! (Ad). *Los Angeles Times.* March 24. p. G27.
• ***Summary:*** The poor tortured woman, suffering from appendicitis and dreading an operation, "gladly consented to place herself under our care. After barely a week of our new Colonic Lavage, Danish Rays, Color Light Therapy, Scientific Massage, and a strict dietary based on the famous 'Mucusless Diet Healing System' of Prof. Arnold Ehret, all signs of the appendicitis had gone... She will eat regularly at the Health cafeterias listed below. Arrange today for free consultation with Fred S. Hirsch, managing director." Free lecture.

"Under the same management: The Health Cafeterias. 217 W. 6th St. (between Broadway & Spring). 818 W. 6th St. (between Flower & Figueroa). 639 S. Olive (open Sundays, between Sixth & Seventh)." Highland Springs Health Resort, Beaumont, California. Address: 822 West Sixth St. (entire second floor) [Los Angeles].

763. Hauser (Bengamin Gayelord). 1929. Five free lectures: By America's foremost teacher of health, Bengamin Gayelord Hauser (Ad). *Washington Post.* April 7. p. S7.
• ***Summary:*** "Internationally famous young Viennese Food Chemist, originator of the Eliminative Feeding System, and founder of the New School of Health movement in America.

"'Radiant health, Youth everlasting.'

"'The Chemistry of Types.'

"The fascinating new science of 'Chemicanalysis' as introduced to America by Bengamin Gayelord Hauser will teach you the new way of selecting your foods according to your chemical type. There will be daily demonstrations from the audience.

April 9th, 8:15 p.m.; April 10th, 2:30 and 8:15 p.m.; April 11th, 8:15 p.m.; April 12th, 2:30 p.m.

"Hall of Nations, Washington Hotel." A portrait photo shows Gayelord Hauser.

764. *Dallas Morning News* (*Texas*). 1929. Athlete will give lectures on health. April 12. Part 2, page 1.
• ***Summary:*** Prof. Paul C. Bragg, who has rebuilt himself

© Copyright Soyinfo Center 2021

from a cripple at the age of 20 years to an athlete at the age of 49, will deliver a series of health lectures at the City Hall Auditorium in Dallas, beginning Wednesday, under the auspices of the National Diet and Health Association of America, with headquarters in Los Angeles" [California].

Bragg says that in 1918 he won the South Atlantic A.A.U. wrestling championship, and in 1926 the Pacific Coast endurance contest for a 30 mile run.

Note 1. This is the earliest document seen (Dec. 2007) in which Bragg claims to be older than he actually is! He was born on 6 Feb. 1895. Therefore on 12 April 1929 he would be age 34 years, 2 months, and 6 days. However he claims to be age 49, roughly 15 years older than he really is. Since he is a writer and lecturer on diet, health, and longevity, the reason for this deception is clearly to impress people; how could a man aged 49 look so young? He must have some secrets that most people would want to learn.

Note 2. This ad also marks the beginning of Paul Bragg's nationwide health lecture tours–which continued for decades.

765. Health Center. 1929. She lost her job! (But worked again when she recovered from asthma) (Ad). *Los Angeles Times.* April 14. p. G27.
• ***Summary:*** Except for the first few paragraphs, this ad is quite similar to that which appeared in the March 24 issue of this newspaper. Also gives the address of all 3 health cafeterias.

The new last paragraph states: "If you are interested in adopting a new and remunerative vocation, send for information concerning the Southern California Branch of the American School of Naturopathy, 254 S. Broadway corner of Third St. Course preparing students for the degree of Health Science Specialist consists of three night classes per week, lasts three months and costs $50.00, including certificate. Now is the time to enroll." Address: 822 West Sixth St. (entire second floor) [Los Angeles].

766. Certificate of birth for Patricia Pendleton. 1929. Oakland, Alameda County, California. 1 p. April 29.
• ***Summary:*** Full name of child: Patricia Pendleton. Date of birth: April 29, 1929. Place of birth: Peralta Hospital, Oakland, Alameda County, California. Female. Full name of father: Harry Clay Pendleton. Residence: 1092 Clarendon Crescent, Oakland, California. Color or race: White. Age at last birthday: 39. Birthplace: Georgia. Occupation: Builder & contractor. Self employed. Mother: Full maiden name: Nettie Mabel Coward. Residence: Pakland, California. Color or race: White. Age at last birthday: 30. Birthplace: California. Occupation: Housewife. Number of children born to this mother including present birth: 1 [Nettie had one child in a previous marriage]. Number of children of this mother now living: 2.

Was a prophylactic for Ophthalmia Neonatorum [neonatal conjunctivitis, infecting the eyes]: Yes, Silver Nitrate 1%.

Certificate of attending physician or midwife: I hereby swear that I attended the birth of this child, who was born alive at 1:57 a.m. alive.

Note: According to a note by Sparky 37 in the discussion section of the Wikipedia entry on Paul Bragg: "My research indicates that... Patricia Bragg's 'birthparents' were Harry Clay Pendleton, Sr. (died 3 March 1931 at age 88 in Alameda County, California) & Nettie Coward Deacon (died 29 July 1964 at age 64 in Oakland, California). I believe at that point, the Pendletons had been divorced for decades." Address: Oakland, Alameda County, California.

767. *Madison Survey* (*Madison, Tennessee*). 1929. Soy-bean products replace dairy products. 11(20):78-79. May 15.
• ***Summary:*** "For many years we have been warned that the increase of disease among cattle would put an element of danger into dairy products. This set us to studying foods that contain the essential elements of dairy foods with [sic, without] this objectionable feature." Describes the post-graduate work with soybeans done by two of the school's teachers, Miss Frances Dittes (Peabody College, Nashville) and Prof. P.A. Webber (Michigan State Agricultural College, Lansing).

"It is intensely interesting to those who are looking for something to replace dairy products, to see the products of the soy-bean cheese is delicious and capable of many variations in the dietary. One of the latest articles sampled is a loaf of yeast bread in which soy-bean milk was used instead of water. The bread is fine of grain, sweet, light, and with a toothsome crust that will appeal to the taste of the most fastidious."

"The soy-bean with nuts will supply every thing we have been obtaining from milk and flesh foods. And the danger that lurks in the products of diseased animals is entirely eliminated by the use of soy-bean products.

"There is a future for soy-bean products. We expect to see hundreds of our people demonstrating the value of these foods. This is a real missionary work for which Madison is preparing."

768. Yvonne of Hollywood. 1929. Shopping along Hollywood Boulevard: "Style center of the world." *Los Angeles Times.* June 20. p. 9.
• ***Summary:*** "Healthful living is amazingly simplified when you can order the unsulphured fruits, whole-grain cereals and breads, nuts, honey, dairy products, etc. and have them delivered in any part of the city. Just call the Hollywood Health Food Shop, 5455 Hollywood Blvd. GR 9144."

A similar article appeared on 11 July 1929 (p. 11). The shops address was the same by the phone number was TR 9144. "For natural unrefined foods. Free delivery."

© Copyright Soyinfo Center 2021

769. *Madison Survey* (*Madison, Tennessee*). 1929. Food work. 11(33):126-27. Aug. 14.
• ***Summary:*** "The raising of foods is an interesting and profitable work for students. The manufacture of health foods and the serving of those foods to the public is a close second in educational value. The Madison Food Factory is putting up crackers of various sorts, nut meats, malt honey, soybeans and steamed wheat in cans, and other attractive products. A variety of bakery goods, specializing in whole wheat breads and buns, gives employment to a group of students."

"A group of men and women drive to the city each morning and return each evening. They are the working force of the vegetarian cafeteria, located on Sixth Avenue, just off Church Street, and a short distance from the busiest section of the city. The cafeteria is one of the most attractive projects of the institution. It affords a business training that ought to be the delight of any active student. A group is training there throughput the year under the direction of Kenneth Sheriff.

"The training of cooks and dietitians is given special attention at Madison... The Dietitian's Course is headed by Miss Francis Dittes."

770. Brown, Eugene. 1929. The alfalfa habit. *Los Angeles Times.* Aug. 17. p. A4.
• ***Summary:*** "In the health-food shops alfalfa tea is put up in fancy packages and sold at a price that would make the average ten-acre alfalfa patch pay a dividend of more than a million per cent."

"But the dried leaves and blossoms of the alfalfa do make a comforting beverage when properly steeped..."

"Also I have found staunch nourishment in biscuits made from alfalfa meal."

"But with the alfalfa habit spreading California will be in the heart of production. Honestly we do seem to have all the luck. No fad or passion arises but what we are in the thick of it."

771. Bragg, Paul Chappius. 1929. Truth about sex. Hollywood, California: National Diet and Health Association of America. 267 p. Illust. *
• ***Summary:*** Note: The first two books published by Paul Bragg were published in 1929. This is probably the second of the two. Note: In Sept. of the previous year he and his first wife had been divorced. Address: Professor, California [Los Angeles].

772. *Madison Survey* (*Madison, Tennessee*). 1929. Soybean products. 11(42):168-69. Oct. 23. [1 ref]
• ***Summary:*** Discusses a report on the calcium content of soybeans and tofu presented by Miss Frances Dittes at the annual meeting of the American Home Economics Association, and quoted in the October issue of the *Journal of Home Economics.* Last year Miss Dittes wrote her thesis on this subject while studying at George Peabody College for Teachers. She made three types of soybean curd using calcium sulfate, lactic acid, and rennet as coagulants, then measured their calcium content. All were low in calcium, although that made with rennet had the highest calcium content. "It is concluded that soybean curd in the dietary should be supplemented by foods rich in calcium."

Dr. Bailey at New Haven, Connecticut, found that soybean curd had no starch and no significant amounts of sugars. "This means that the soybean curd is a food eminently fitted for use by patients suffering from diabetes."

773. **Product Name:** La Sierra Soy Gluten (Meat Analog).
Manufacturer's Name: La Sierra Industries.
Manufacturer's Address: Arlington, California.
Date of Introduction: 1929 November.
New Product–Documentation: Two interviews with and two letters from Charlotte Van Gundy Holmes. 1981. This meat analog was made of Soy Spread mixed with ground gluten, resembling Dr. Kellogg's Protose, but with soy.

Note: This the earliest meatlike product seen, made by a Seventh-day Adventist food company, that contains gluten.

774. Free, A.M. 1929. Re: Thank you for Christmas cakes. Letter to Mr. W.C. Baker, Ojai Bakery, Ojai, California, Dec. 2. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "My dear Mr. Baker: The two cakes arrived in fine condition. Many thanks. My two children immediately said the big one was too nice to cut even at Christmas... so Bill Baker and his Ojai Bakery are getting a good deal of advertising in Washington, as everyone who comes to our home is attracted by the cake. You are certainly an artist.

"You asked me if President Hoover would like a cake for Christmas. I feel quite sure that he would... If you care to send one for him send it to me and I will present it personally to him." Address: 8th District, California, Congress of the United States, House of Representatives, Washington, DC.

775. Carque Pure Food Co. 1929. Carque Laxajel: A laxative (Ad). *Los Angeles Times.* Dec. 22. p. 26.
• ***Summary:*** "An agar jelly containing fresh raspberries, fig juice, aromatic herbs, etc. Put up in a convenient bar with eight divisions. Price 15¢. Sent also by mail.

The addresses of Carque's three stores on Seward St., S. Flower St., and Hollywood Blvd. are given.

"On sale also at leading health food stores."

Note: The last document seen (July 2021) in the *Los Angeles Times* showing a Carque company on S. Flower St. or on Hollywood Blvd. was an ad identical to this one that appeared on 17 April 1930 (p. J23). Address: 729 Seward St., Los Angeles, California.

776. Bill Baker and wife seated on a black car overlooking the Ojai Valley (Photograph). 1929. Undated.
• ***Summary:*** Baker, seated on the left front fender, is dressed

© Copyright Soyinfo Center 2021

in a dark two-piece suit and tie, smoking a cigar, wearing glasses, holding a hat, and taking a wafer with his left hand from a white a can labeled Bill Baker's Original Lima Bean Wafers held by his wife who is sitting on the running board. Note the two spare tires on the back of the car. On the far right horizon are the Topa Topa Mountains. The car is parked on the Dennison Grade.

This 8 by 10 inch glossy photo was sent to Soyfoods Center by Rose Boggs of Ojai, California.

777. Bill Baker and wife standing on the Dennison grade, overlooking the Ojai Valley (Photograph). 1929. Undated.
• ***Summary:*** See next page. This photo was taken on the same day as the one showing Baker and his wife seated on their black car. However this one is taken from a point high above the car (which is parked behind Baker and his wife) and facing a different part of the Ojai Valley. Three women, acting playfully, are clustered around the front of the car–one seated atop the hood, one seated on the front bumper, and one with her right foot on the driver's-side running board. The first two are reaching into a white can labeled Bill Baker's Original Lima Bean Wafers. It is clearly a staged, promotional photo.

A dog inside the car is looking out of the driver's window towards the photographer. The sprawling cropland of the east end of the Ojai Valley, laid out in huge squares, is clearly visible, each square filled with neat rows of orange trees–either navels or Valencias. At the top center is Chief Peak. The town of Ojai lies to the left of this photo.

This 8 by 10 inch glossy photo was sent to Soyfoods Center by Rose Boggs of Ojai, California.

778. Kingsley, Myra. 1930. The doctor who teaches how to deserve health: Dr. Frank McCoy, health writer of The Times (Ad). *Los Angeles Times.* Jan. 2. p. H30.
• ***Summary:*** This large portrait photo, with a jet-black background, shows Dr. McCoy. The text below it reads: "Every adult individual usually gets the health he deserves. This statement was at first startling, coming from such a health authority as Dr. Frank McCoy, who is perhaps the best

© Copyright Soyinfo Center 2021

known and best loved physician in America.

"Dr. McCoy, who is devoting all of his energy to suffering humanity, is the kindliest of men... To satisfy his desire to multiply the effects of his work, the newspaper writing was started, and then the extensive lecture tours all over America. In a recent tour Dr. McCoy delivered seventy-five lectures within a period of seven weeks, thus personally appearing before millions of people, with lectures being broadcast through the radio at most of these meetings.

"Dr. McCoy broadcasts at least once a week through the KHJ Station of Los Angeles, ad these radio talks are written down and sent all over the country to other broadcasting stations to be read by he local announcers.

"Dr. McCoy is in hearty accord with all of the methods used by any of the thousands of sincere physicians on America. He has never used one line of space in his health articles to criticize any physician or school of physicians,..."

"The marvelous results from the fasting ad diet cure have convinced Dr. McCoy that medicines are generally useless and much of the surgery so commonly advised is unnecessary."

"A further extension of Dr. McCoy's work is now being developed. For years he has been training assistants in his own office to take care of his increasing practice. The older of these trained assistants are now being sent into other cities to establish branch offices where those interested in Dr. McCoy's methods can receive the diagnosis and office treatments which are often indispensable to a complete cure."

Note 1. Mildred Lager left Superior, Wisconsin, in 1930–apparently headed for California (Obituary 27 Jan. 1960). In Nov. 1932 she was in California recovering her health and was expected to return to the shoe store in Superior of which she was a co-owner (*Evening Telegram*, 4 Nov. 1932). At some point, "as a result of intensive study of foods and their value to health, she became a demonstrator for Dr. Frank McCoy,..." (*Evening Telegram* 27 May 1938). On 35 Oct. 1933 Mildred started her own business, a health

© Copyright Soyinfo Center 2021

food store and teaching center named "The House of Better Living." Her philosophy of diet and health was very similar to that of Dr. Frank McCoy, but (so far as we know), she never mentioned him, nor did he ever mention her.

But why did Mildred leave Wisconsin for California? And how did she meet or learn about Dr. Frank McCoy? He may have given a lecture in Superior, Minnesota, on the seven-week lecture tour in late 1929 mentioned above. Or she may have heard one of the radio broadcasts described above, or read one of his syndicated columns that were being published in Superior's *Evening Telegram* by 27 May 1938.

Note 2. It is not clear whether this is an ad, an article, or an advertorial. For the previous two years, during the first week in January, Dr. McCoy has run what are clearly large, bold ads praising his work. Address: Brack Shops Building, Los Angeles.

779. Dorsett, P.H.; Morse, W.J. 1930. Tofu in Tokyo, Japan (Document part). In: P.H. Dorsett and W.J. Morse. 1928-1932. Agricultural Explorations in Japan, Chosen (Korea), Northeastern China, Taiwan (Formosa), Singapore, Java, Sumatra and Ceylon. Washington, DC: Foreign Plant Introduction and Forage Crop Investigations, Bureau of Plant Industry, USDA. 8,818 p. Unpublished log.

• ***Summary:*** Page 3469 (8 Jan. 1930). Tokyo, Japan. "Worked at the office until about 10 or 10:30 then took our camera and went out to get pictures and information about Tofu, soybean curd.

"We visited a place not more than half a dozen blocks from the Sankaido Building and got a nice lot of information about making tofu. Also secured a few pretty good pictures.

An elderly Japanese lady fried (or seared as we would say) the cakes about 3 by 9 by ½ to ¼ of an inch in thickness, over a charcoal fire [to make grilled tofu or *yakidofu*] on the street or side walk in front of their house.

"Detailed information about the making of this tofu will be found in the special report on soybeans and soybean products, which will be a special report added at the end of our exploration work.

"We saw for the first time fried Tofu which had had chopped carrots added to it [ganmodoki]. We had not prior to this known of vegetables of any kind being added to or mixed with the bean curd or Tofu before frying.

Pages 3470 to 3471. Photos show: (1) "Soja max. Tofu, bean curd. Tokyo, Japan. A nearby view of an elderly Japanese lady frying Tofu on the street. Children and Mr. W.J. Morse are looking on." (2) An elderly Japanese lady frying or searing Tofu. To the right, children are watching the operation, and so are Mr. Morse and Suyetake, in the background. (3) "A fairly nearby view of an old Japanese lady fanning a charcoal fire over which she is frying or searing tofu." (4) "Cakes of soybean curd piled upon bamboo strip supporters [arranged on bamboo mats] and weighted to express the surplus moisture before frying. A metal two prong piece [skewer] is run through each to handle them with" (negatives #44714 to #44717).

Pages 3472 to 3473. Tofu in Tokyo. Photos show: (1) "A fairly nearby of an old Japanese lady turning the cakes of Tofu she is frying [sic, grilling] over a charcoal fire." Note 1. The rectangular charcoal brazier appears to be about 14 inches long, 8 inches wide, and 8 inches deep. This is the same old Japanese lady described on pages 3470-3471. (2-3) "An old Japanese lady fanning a charcoal fire and frying [grilling] Tofu on the street, not far from the Sankaido Building.

(4) A nearby view of five large cakes of skewered tofu being grilled on a brazier over a charcoal fire. (Negs. #44718 to #44721).

Page 3476. "Oblong piece of fresh soybean curd which had been toasted over a charcoal fire... This is used in soups and also cooked with vegetable mixtures. Purchased from a bean curd factory, Tokyo, Jan. 8. The piece is 7½ inches long and 2½ inches wide" (Neg. #44736).

Page 3477. "*Phaseolus angularis.* Adsuki bean. Packages of adsuki bean flour purchased in a store, Tokyo, December 24, 1929. This is a sweet flour used in making sweet bean soup. Package 3 1/8 inches long; 1½ inches wide. D. & M. #3100 (Neg. #44737).

Page 3478. Soybean. This soybean product is sold in tubs from Tokyo small stores, and is known as 'Gomoku Mame.' It consists of a mixture of five cooked products, namely: soybeans, lotus root, fish sausage, seaweed and burdock roots." Purchased at a small grocery stand in Tokyo, Jan. 6. "It is eaten just as it is. Product is on bamboo leaf which measures 8 inches long and 5 inches wide" (Neg. #44738).

Page 3481 (8 Jan. 1930). "Fried soybean curd cakes. The round cake (D. & M. #3096) is known as 'Ganmodoki,' and is fresh bean curd mixed with chopped carrots. The cakes are fried in mustard [rapeseed] oil until brown and sell for three sen each. Each cake is 4½ inches in diameter and 3/8 inch thick. The oblong cake (D. & M. #3097) is known as 'Aburage.' It is a fresh bean curd mixed with chopped carrots and fried in mustard oil until brown. The cake is 8½ inches long, 3 inches wide, and 3/8 of an inch thick. Sell for three sen. These forms of fried bean curd are eaten when dipped in soy sauce and also in soups" (Neg. #44741).

Note 2. This is the earliest English-language document seen (April 2013) that contains the term "Fried soybean curd" or the term "Fried soybean curd cakes."

Page 3532 (11 Jan. 1930). "A soybean preparation used as a health drink, 'Almen: The Health Food Drink.'" Sold in a can whose front and back are shown. "Manufactured from soybeans by the Nippon Almen Shokuryo Co., Ltd., near Kobe, Japan. This form of flour is also used in making confections. Packages of 3 1/8 inches high and 2 1/8 inches wide" (Neg. #44758). Note 3. Soy flour is apparently used to make the canned health drink.

Page 3542. Bean curd factory. View showing stone mill for grinding soaked soybeans into a mash for making soybean milk and bean curd. Above the hopper is a small round tank of water from which flows into the hopper of beans, a small stream of water while the beans are being ground" (Neg. #44766).

Page 3543. Soybean curd factory. View showing the furnace and boiler where the ground bean mash [*gô*] is boiled in making soybean milk. To the left of the furnace is the wooden tub into which the milk is strained, and where the magnesium sulphate solution is added to form the bean curd. To the extreme left is the partitioned rectangular box into which the bean curd is dipped and pressed into blocks" (Neg. #44767).

Page 3544. "View inside soybean curd factory showing in background stone mill for grinding the beans; on the right the oblong charcoal fire box for roasting blocks of the fresh bean curd; and in the foreground and on the left stacks of blocks of bean curd ready to be roasted. The tub in the center is where the blocks of bean curd are placed" (Neg. #44768).

Page 3545. "Inside the bean curd factory showing a stack of oblong blocks of fresh bean curd with long handled forks [skewers with several prongs] in one end. These blocks are ready to slightly roast over a charcoal fire" (Neg. #44769). Address: Agricultural Explorers, USDA, Washington, DC.

780. Morse, W.J. 1930. Re: Soybean products collected. Trip to Manchuria and China. Letter to Dr. E.A. Hollowell, Office of Forage Crops, USDA, Washington, DC, Jan. 12. 2 p. Typed, with signature on USDA letterhead.

• ***Summary:*** "Dear Holly: I have your letter of December 16 with reference to the soybean products and the more I collect over here the less inclined I am to loan them out... In my last such experience, I fitted up a soybean product exhibit for some sort of health food show in New York City and I never did get it back although we had considerable correspondence about it. As I recall I even took it up with the Secretary [of Agriculture] because they wanted it for a permanent exhibit and so I was out a nice exhibit which it took me considerable time to get up. After that I would not let anything go out unless I had several products of the same kind but it cured me of fixing up exhibits for any one or letting out products or pictures that I could not easily duplicate.

"Therefore, even with Dr. Burlison I do not know of any of the products we have in the office that I care to let out..."

"Last week we visited a large soy sauce factory [almost certainly Kikkoman] at Noda-Machi, about a three hours' run from Tokio... They use twenty thousands of bushels of soybeans annually and the same amount of wheat."

"I was rather anxious about the work but as you state if the Arlington [Farm in Virginia] work can be arranged, you and Lee can hold things until I return. I think that this can be arranged so that Lee will not be over-loaded with the work now on hand and the new introductions we are sending in...

"Dorsett is making pictures of the various [soybean] products as they are collected and making pictures that can not be beat.

"The beancurd, miso and natto factories are mighty interesting and we are getting lots of good data and pictures as well as samples of the varieties of beans used. The beancurd factories are only small places but they are very numerous and each has its own way of making the curd."

781. Hauser (Bengamin Gayelord). 1930. Free lectures: By America's foremost teacher of modern food and health. Bengamin Gayelord Hauser. "Radiant health through harmonized food selection" (Ad). *Hartford Courant* (*Connecticut*). Jan. 15. p. 4.

• ***Summary:*** "Bengamin Gayelord Hauser, internationally known young Viennese Food Chemist, is originator of the famous Eliminative Feeding System. One of the world's leading food authorities, he has shown the way to radiant health to hundreds of thousands of people both here and abroad.

"Recently returned from Vienna where he has been conducting further research and study, Bengamin Gayelord Hauser will tell of science's latest food discoveries–discoveries that mean new health, new vigor and vitality to You!

Hear him explain the wonderful new science of Chemicanalysis–learn what type you are and how this knowledge can help you win health and youth.

January 16-17, 18-19, at 8:15 P.M. Unity Hall, Pratt Street. A portrait photo shows Gayelord Hauser.

782. *Los Angeles Times.* 1930. Infant industry develops: Southland baker boosts lima beans. Jan. 27. p. A9.

• ***Summary:*** "Ojai, Jan. 26." Today the well-known Bill Baker shipped the first carload of "Limabean Toast" and "Lima Bean Wafers" to the East; the Southern Pacific railroad carried it to New York City. Baker has already been shipping lima bread to all parts of the USA. During the past year, Baker's "sales have jumped from a few loaves of bread and a few boxes of wafers to the carload shipment today." The toast and wafers keep longer than the bread. Baker is now supplying hundreds of individuals who order the toast and wafers to combat acidosis and high blood pressure, as well as wholesale and retail grocery stores nationwide. Dr. W.D. Sansum, the "famous dietetic physician of Santa Barbara," decreed that lima bean products can help combat acidosis and high blood pressure.

Baker recently gained fame by sending President Hoover his Christmas fruit cake from California.

A photo shows two black delivery trucks parked at the Ojai station near a railroad line. Between them, two men are shaking hands. One the side of one is written, in large white letters (hard to read), "Ojai–Good Bread."

Note: This is the earliest document seen (July 2021) stating that Bill Baker had sent a Christmas fruit cake to the president of the United States. Most later documents agree that he sent his first such cake to Calvin Coolidge, who was president of the USA from 1923 to 1929.

783. Marriage license application and marriage license for Paul Chappius Bragg and Betty Brownlee on 17 Feb. 1930 in Clearwater, Pinellas Co., Florida. 1930. Clearwater, Pinellas Co., Florida. 1 p.

• ***Summary:*** Paul C. Bragg and Betty Brownlee were married on 17 Feb. 1930 by Harry Hewitt, County Judge. Alice Dillard, a Notary Public and a "Minister or Legally Authorized Officer," performed the ceremony in Clearwater, Pinellas County, Florida. Witnesses were Mary Croun (looks like) and W.R. Wright–neither of whom rings a bell, but they may have just been brought in for the ceremony to act as such witnesses.

In the marriage application (a separate document), Paul C. Bragg claimed to be age 49 and gave his birthplace as "Pinkle, Virginia." Betty gave her age as 21 [sic, she was born on 7 June 1902, which would make her age 27 in Feb. 1930] and her birthplace as Eau Claire, Wisconsin. Paul said he was divorced in Los Angeles, California, and Betty said she had never been married. Paul gave his occupation as "Lecturer" and Betty gave hers as "Advance Manager" [for Paul's lectures]. The Application didn't ask for parents' names. Both people gave "1109 N. Hudson Street, Hollywood, California" as their address. Note: This is the earliest document seen (Sept. 2011) in which Paul C. Bragg says he was born in Virginia. He was actually born in Indiana. Why did he feel a need to lie about his birthplace? And why did he start at this time to claim that he was born in Virginia? We can find no such place as "Pinkle, Virginia." Address: Clearwater, Pinellas Co., Florida.

784. U.S. Department of the Interior, Census Office. 1930. Otto and Lillian Carque in the 1930 U.S. Census in Los Angeles City, Los Angeles County, California. Washington, DC. April 2.

• ***Summary:*** Enumerated April 2, 1930 by Fremont Anarelle. Sheet No 1-B, Enumeration District 19-33. Supervisor's District No. 16.

House No. 1004. Dwelling 24. Family 24. Family Enumerated. Otto Carque. Head of Household. Rented. his home worth $3,500. He had a radio. It was not a farm. He was a white male, age 63 and first married at age 60. He had not attended school or college during the year. He did speak and write English. He was born in Germany, father in France, mother in France. He spoke French at home before coming to the United States. He immigrated in 1895 and speaks English. He is president and owner of Pure Food Co. He had been at work the day before. Also living in the household was Lillian Carque, his wife. She was 30 years old. Born in New York to parents both born in Czechoslovakia.

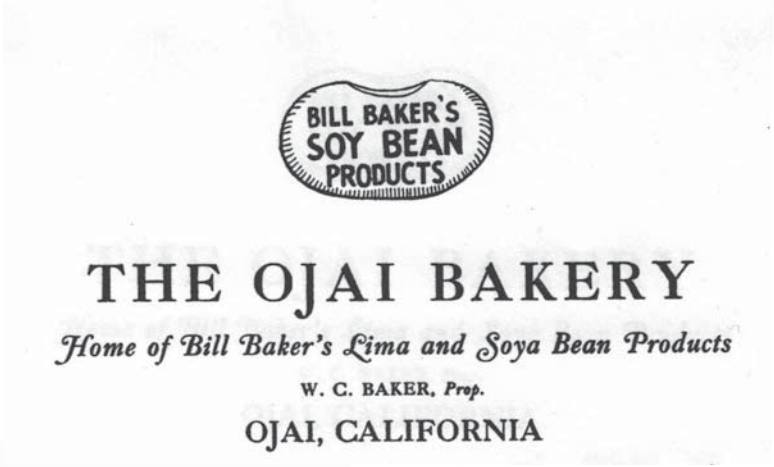
785. U.S. Department of the Interior, Census Office. 1930. Louis Carque in the 1930 U.S. Census in Jersey City, New Jersey. Jersey City, New Jersey. 1 p.
• ***Summary:*** Name: Louis E. Carque. Birth year: 1879 [sic. 1877]. Gender: Male. Race: White. Age in 1930: 51. Birthplace: Germany. Marital status: Married. Relation to head of house: Head. Home in 1930: Jersey City, Hudson, New Jersey. Street address: Bowers St. Ward of city: 12th Pt. Block 1308. House number: 190. Dwelling number: 74. Family number: 144. Home owned or rented: Owned. Home value: $9,500. Own a radio set: No. Lives on a farm: No. Age at first marriage: 24. Attend school [now]: No. Able to read and write: Yes. Father's birthplace: Germany. Mother's birthplace: Germany. Naturalization: Alien. Able to speak English: Yes. Class of worker: Wage or salary worker. Employment: Yes. Household members: 6 [Louis E. wife Margaret {age 46}, Ludwig Carque {son age 12} and 3 roomers]. Neighbors: View.

786. U.S. Department of the Interior, Census Office. 1930. Anthony A. Berhalter and family in the 1930 U.S. Census in Chicago, Cook County, Illinois. Chicago, Cook County, Illinois. 1 p. Enumerated April 10. Ward 43. Block No. 54. Part of precinct 29. Family No. 49.
• ***Summary:*** Anthony A. Berhalter is head of household. Home owned or rented: Owned. Value of home if owned: $75,000. Do you own a radio set: Yes. Does the family live on a farm: No. Sex: Male. Color or race: White. Age at last birthday: 51. Marital condition: Married. Age at first marriage: 30. Attend school or college at any time since 1929: No. Whether able to read and write: Yes. Birthplace: Germany. Birthplace of father: Germany. Birthplace of mother: Germany. Citizenship–Year of immigration to the United States: 1894. Naturalized or alien: Naturalized. Whether able to speak English: Yes. Occupation: Owner and operator of a bakery.

His wife is Katherine. White female. Age 51. Age at first marriage: 30. Catherine's mother and father were both born in Czechoslovakia.



Other household members: Howard Berhalter, son, age 17.

Anton Richter (cousin), age 21. Born in Germany. Working as a baker's helper in the family bakery.

787. Bragg, Paul C. 1930. That stinging word–weakling! (Ad). *Los Angeles Times.* April 27. p. J23.
• ***Summary:*** "I'd rather be dead than called a weakling. A horrible thing to think about! And yet so many men over 40 show signs of lost vitality, impotence, physical weakness–and do nothing about it. Don't you realize that science has made amazing strides?" Regain vitality and strength with "Glantex, an astonishing new discovery," which "contains no drugs." It "is worth a fortune to any man over 40–and for women it means freedom from fatigue headaches, and menstrual distress, a new lease on life."

"Write for special Free offer of full 30-day treatment and for my Free Book, 'The Return of Youth.'" Address: Dep. 136, 1109 Hudson Ave., Hollywood, California.

788. Richardson, W.D. 1930. Re: Results of nutritional analysis of lima bean toast. Letter to Mr. W.C. Baker, The Ojai Bakery, Ojai, California, May 2. 2 p. Typed, with signature on Ojai Bakery letterhead.

• ***Summary:*** "The [lima bean] toast which you submitted to us was found to have the following analysis: Starch 60%. Dextrin 6.4%. Protein 13.2%.

"We have examined the two samples of lima bean flour which you submitted, one of which was said to be treated and the other in its original state. The starch cells in the sample which had been treated had been ruptured as if they had been subjected to steam pressure. This condition, however, does not affect the quality of the flour. It will, however, enable it to take up more water than the original product, and also makes it somewhat more digestible."

Note: The most interesting thing about this letter to Bill Baker is the letterhead upon which it is written. At the top center is a bean-shaped logo, inside of which we read: "Bill Baker's Soy Bean Products." Below that in large, bold letters: "The Ojai Bakery." Below that, in italics on two lines: "*Home of Bill Baker's Lima and Soya Bean Products. W.C. Baker, Prop.* [Proprietor]." Finally: "Ojai, California." Note 1. This is the earliest letter seen (Feb. 2018) written on Bill Baker's letterhead.

Note 2. This is the earliest document seen (Feb. 2018) indicating that Bill Baker is making and selling soya bean bread. Address: Chief Chemist, Swift & Company Research Laboratories [Chicago, Illinois].

789. Woodward & Lothrop. 1930. Display ad: National Health Food Week. *Washington Post.* June 4. p. 7.

© Copyright Soyinfo Center 2021

• ***Summary:*** "This week visit our Battle Creek Health Food Section–This is National Health Food Week. Join the nation-wide campaign for better health by making a visit this week to our Battle Creek Health Food Section on the Fifth Floor.

We carry a complete line of Battle Creek Health Foods, and our Battle Creek Representative will be glad to tell you about the health foods which will be especially beneficial to your health.

"Savita, a Battle Creek vegetable extract, is served in the Fountain Room–the Down Stairs Store."

Note: This is Woodward & Lothrop's golden anniversary (1830-1930).

790. Bragg, Paul C. 1930. The vigor of youth (Ad). *Los Angeles Times.* June 8. p. K22.
• ***Summary:*** Regain youthful vigor by taking *"Glantex,* Prof. Paul C. Bragg's marvelous new discovery," which "is scientifically designed to nourish the glands upon which your health and happiness depend." It "contains no harmful drugs. Through its use thousands have already gained strength and endurance. To men who have become conscious of advancing age, it will bring back enjoyment of youthful power which was supposed lost forever. For women, *Glantex* eliminates headaches, fatigue, and menstrual distress.

"Write at once for my special Free offer of a 30-day treatment, and for my new Free Book, 'The Return of Youth.'" Address: 1109 Hudson Ave., Hollywood, California.

791. *SoyaScan Notes.* 1930. Was Jack LaLanne a skinny weakling when he first met Paul Bragg? Did Bragg inspire him to become Mr. Physical Fitness? (Overview). Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** This Overview is based on an e-mail from an expert researcher on both Paul Bragg and Jack LaLanne.

"Remember way back when that I said the oft-repeated story of Jack LaLanne, a skinny, sickly, underweight boy being dragged by his mother to hear a Paul Bragg health lecture, & completely turning his life around somehow just didn't jell with me? Looks like I was right.

"Just recently the *Berkeley Daily Gazette,* from its inception in the late 19th Century until it closed its doors a couple decades ago, was finally digitized by name & subject search, and the Oakland Public Library subscribes to the service that did that digitization. I was hoping for this as it sure saves hours upon hours of scrolling through newspaper microfilm.

At any rate, in the almost full year BEFORE that first Oakland Bragg lecture series (there were four others in years following at the Oakland Women's City Club, & three in the early 1940s at the Oakland Ebell Society Club), the Berkeley Gazette, on its sports page, ran several articles mentioning Jack, when he would have been age 15.

"Bottom line, he played in a Berkeley-Gazette newsboys football game; he came in third place in the 12# shot-put for boys in the 130 lb. & over category in the Northern California Y.M.C.A. 'Californiad Track Fest,' which was an all-day track & field event where about 10 Bay Area Y's competed against each other; and he was also a player-manager for a baseball team in a league sponsored by the Berkeley American Legion Post for boys who were Berkeley residents & had not yet attained their 17th birthday. About a game his Berkeley team played against a boys team from Livermore, California: 'LaLanne hurled the last three innings and he repeated Shoemaker's [his teammate who pitched the first three innings] stunt of pitching no-hit, no-run baseball' (*Berkeley Daily Gazette,* June 23, 1930)."

"As far as Bragg's lecture visits to Oakland, my notes indicate that he was here October 10-17, 1930 for 7 lectures, and advertised three times in the *Oakland Tribune* on Oct. 6, Oct. 9 & Oct. 12, 1930. at pages 6B, 10A & 8A, respectively. (He didn't lecture on Oct. 15, which is why the above actually includes 8 days).

"He next came for a lecture series of five lectures from June 21 thru June 25, 1932. He only advertised one time in the *Oakland Tribune* on page 21 of their June 21, 1932 issue.

"He next came for a lecture series, again of 7 lectures, from March 18 thru March 24, 1934. He only advertised once in the *Oakland Tribune,* on March 17, 1934, but the page number is too faint to read.

"His last visit to Oakland in that decade, at least for health lectures, was a series of six lectures, Sept. 4 thru Sept. 9, 1935, advertising in the *Oakland Tribune* Sept. 1, Sept. 3 & Sept. 4, 1935, Pages "not readable" on the first date, and at 12D & 11B, respectively, on the last two.

"ALL of the above took place at the Oakland Women's Club Auditorium on Alice Street in Oakland. The Ladies lost their building by foreclosure during The Great Depression; it has changed hands many times, but still exists as something called the Oakland Center For The Arts.

"Then Paul Bragg made three lecture trips to Oakland in the early 1940s, specifically Jan. 22 & Jan. 23, 1941 (2 nights); one night only on Jan. 12, 1942; and 4 nights on Feb. 15 to Feb. 18, 1943. Those three were ALL held at the Ebell Club Auditorium on Harrison Street in Oakland. According to city history, the building burned down in 1959."

792. U.S. Department of the Interior, Census Office. 1930. Paul C. Bragg in the 1930 U.S. Census in Southern California, and in Burbank, California, city directories. Washington, DC.
• ***Summary:*** There is no record of Paul Bragg being counted in the 1930 Census, although Burbank, California, city directories of the time reflect his residence in that city from 1935 to 1954, and that his food manufacturing company, Bragg Live Foods, was also located there during that period. Subsequently he relocated to Desert Hot Springs, California.

793. *Kokomo Tribune* (*Indiana*). 1930. Geo. B. Lane passes

© Copyright Soyinfo Center 2021

away in his sleep: Had come here from Florida to spend summer–Formerly prominent here. July 21. p. 1, 8.
• ***Summary:*** This front page obituary notes that George B. Lane, age 60, died in his sleep early Monday morning [July 21], in Kokomo. His home is in Orlando, Florida, but he had been residing temporarily at 615 North Wabash avenue. Death was due to heart trouble.

"Surviving are the widow, Lillie Charles Lane; one son, Ovid C. Lane, 901 West Monroe street, a member of the news staff of the Tribune; two daughters, Mrs. K.F. Brown, Battle Creek, Michigan, and Mrs. D.A. Bays, Orlando, Florida; four granddaughters, Myra Janice Lane, Jeanette Bays, and Anita and Bonnie Joan Brown; one brother, Ira B. Lane, 814 West Jackson street, and two sisters, Mrs. William C. Adrian, 1101 South Bell street, and Mrs. Amos Brubaker, residing near Burlington" [Indiana].

"Mr. Lane was born near Point Isabel, Grant county [Indiana], May 16, 1870, the second son of James and Rebecca Lane, both dead several years. The parents moved to the city of Tipton and later to the village of Kempton, while he was still a child. When he was eleven years old the family moved to Kokomo, where he continued to reside until 1919, when he moved to Orlando, Fla., going there on account of failing health. He returned for a period practically every year. He came back several weeks ago and was intending to spend the summer here.

"As a young man, Mr. Lane followed the baker's trade. He was employed at that time in the Zwisler restaurant in Buckeye street [in Kokomo]. Thirty-five years ago [i.e., 1895], he went to Battle Creek, Michigan, where he was employed for several months by the Kellogg Company, and where he made the first peanut butter that concern ever marketed. He also created other new foods for them.

"Returning to Kokomo, he started a health food factory in South Webster street, just north of the Palmer School building. This enterprise was highly successful. It was, however, wiped out by fire and, unfortunately, at a time when the insurance had lapsed. After this disaster, he entered the truck gardening business, here and at Denver, Indiana."

"In 1915, Mr. Lane entered the real estate business, a line which he followed the remainder of his life."

"Mr. Lane was a man of intelligence, character and thrift. He was largely self taught, but was well informed on a number of subjects. He was straightforward and square in his dealings, did not hesitate to express his convictions and had the respect of all circles in which he was known. The record he leaves is one by which he will be long and pleasantly remembered.

"Mr. Lane was a member of the Seventh Day Adventist church, and was head deacon in the church of that denomination in the city of Orlando."

Talk with Bonnie Van Kley, Curator of Archives, Howard County Historical Society, Kokomo, Indiana. 2004. Jan. 13. Bonnie found this important article. She adds: George's brother, Ira Lane, helped to build the Seiberling Mansion, which is now the Howard County Historical Museum, located in Kokomo.

794. *SoyaScan Notes.* 1930. The marriage of Neva C. Parnin Bagg (her second) to August Henry Berthold Busch (Overview). Compiled by William Shurtleff of Soyinfo Center.
• ***Summary:*** Sharon Freeland has been doing an extensive family tree. She is somehow related to Neva Parnin Bragg Busch through the Kilbourne family. Mr. Busch's profession was apparently in the accounting field. The following information appears on the following website, compiled by Sharon: http:// worldconnect.rootsweb.ancestry.com/ cgi-bin/ igm.cgi?op= GET&db= connections&id= I14238.

Neva C. Parnin's first marriage was to Paul C. Bragg. Neva was born on 27 July 1897 in Indianapolis, Marion County, Indiana. Her father was Joseph Eugene Parnin, born 13 Dec. 1872 in Fort Wayne, Allen County, Indiana. Her mother was Agnes Lawson Kilbourne, born 19 Oct. 1877 in Indianapolis, Marion County, Indiana.

Neva and Paul Bragg had three children: (1) Neva Pauline Bragg, born 14 Oct. 1918 in Washington, District of Columbia. (2) Lorraine Agnes Bragg, born 3 Oct. 1919 in Washington, District of Columbia. (3) Robert Elton Bragg, born 25 March 1922 in Los Angeles, Los Angeles County, California.

Neva's second marriage was to August Henry Berthold Busch, born 1 Dec. 1894 in Bad Odesloe, Germany. They were married between 1929 and 1930 in Los Angeles, California. In the 1930 U.S. Census, Neva and her husband August are living in Los Angeles, California. We have no record of Neva and August having any children.

Neva died on 23 Nov. 1988 in Van Nuys, Los Angeles County, California.

795. *J. of the American Medical Association.* 1930. Medical news: Indiana–Move to eliminate food faddists from Indiana. 95(5):348. Aug. 2.
• ***Summary:*** "The Indiana State Medical Association has requested the cooperation of members to eliminate food faddists from the state. It is the custom of some of these faddists to appropriate the title of 'doctor' or 'professor' to carry on a flaring publicity campaign in various cities, which includes free lectures attacking the medical profession. Particular attention is directed to the following: Paul Sampson, National Health League; Bernarr Macfadden and his agent (Physical Culture); Frank McCoy, chiropractor; Prof. Paul C. Bragg, 'scientific health specialist'; R.A. Richardson, oculist and lecturer, and J.D. Levine, 'The Health Messenger.'"

796. *Madison Survey* (*Madison, Tennessee*). 1930. Demonstrating health foods. 12(30):119. Aug. 6.

© Copyright Soyinfo Center 2021

• ***Summary:*** "As an advertising scheme for the health foods of the Madison Food Department and for other lines which are being handled by Mr. Ralph Meade, this gentleman gave a banquet for the men heading the chain stores of the Atlantic and Pacific Grocery Company, of Birmingham, Alabama. The company of some seventy or eighty business men was entertained in the Vegetarian Cafeteria of that city.

"A group of young people from Madison, and another from Southern Junior College, took part in the program of music and song, and assisted in the serving of lunch."

797. Griesbauer, J.A. 1930. Re: Lima bean bread–patent search. Letter to Mr. W.C. Baker, Ojai Bakery, Ojai, California, Aug. 28. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "We acknowledge the receipt of your letter of August 24th enclosing check for $20.00 to apply on account of the cost of a search of the Patent Office records relative to the above-named invention [Lima Bean Bread], and an informal application of the same.

"The search of the Patent Office records will be promptly made and the search report mailed to you..." Address: Law offices of H.B. Willson & Co., United States and Foreign Patents, Trade-Marks and Copyrights, Willson Building, 711 8th St. N.W., Washington, DC. Phone: Main 1632.

798. Carque Pure Food Co. 1930. A few foundation foods (Ad). *Los Angeles Times.* Sept. 7. p. K21.
• ***Summary:*** These foods are psyllium seed, Kova (a coffee substitute), Laxajel, and agar.

Note: This is the last document seen (July 2021) in *The Los Angeles Times* showing the Carque Pure Food Co. Address: 729 Seward St., Los Angeles, California.

799. Baker, W.C. 1930. Re: Soya bean flour. Letter to Mr. J.C. [sic, I.C.] Bradley, Taylorville, Illinois, Sept. 9. 3 p. Typed, without signature on letterhead (carbon copy).
• ***Summary:*** "My dear sir: The other day I forwarded to you a sample of the flour I am using successfully. It is made from roasted Soya Bean which will work much better than raw.

"I have discovered one more factor in making Soya Bean Bread, and that is the baking must be extremely slow, as this I find will do away with the rope effect which, as you will remember, was spoken of in the analysis of the 'Standard Brands,' and also in the 'Bakers Helper,' which call [sic, called] my attention to it and was a great handicap in getting the bread correct.

"The price of the flour laid down to me in Ojai is about 9½ cents [per pound]; which I believe is not so high considering that the bran must be roasted first.

"You mentioned in your letter that the roasting would injure the Chemical contents, but unless the bean is roasted too much or too dark it will not injure the contents, as I have roasted the lima bean flour and had both raw and roasted tested in the Swifts Laboratories in Chicago." Baker then quotes the letter concerning the results of Swift's tests.

"As soon as I am ready and you are able to furnish the correct flour necessary, I shall give the correct recipe and shall give reasons why Soya Bean Bread should be used; we have started on the muffins in the 'Baker's Helper.'"

"After returning the copy of your patent an after thought occurred to me. In case I make a bigger success of the Lima Bean Bread Business than I am doing at present some one is liable to interfere and beat me to it; so I want to be careful. I am figuring to take out a patent on Lima Bean Bread only, as the Wafers and Toast are protected by my copyrights and Trademark labels.

"I have talked with Mr. Max Fleischmann [of yeast and margarine fame] on this subject and he agreed with me that the Baking Business is in need of something new to create more interest." Baker has done all he could in educational matters. Each month he spends at least a day of his time "to do my bit toward the cause through the *Bakers' Helper* in Chicago."

"So I would like to ask you a favor, if I am not able to obtain a Patent on Lima Bean Bread; then I would like to ask if you would grant me a license under your Patent (as your Patent calls for Soya Bean, Peanut, or Similar Flours)."

"If you should be able to help me, that is if I need the help, I shall promise you to help put the Soya Bean in its right place where it belongs.

"I would like also the exclusive right on Soya Bean for bread for Southern California... Whatever happens I shall boost the Soya Bean Bread as both are Neutral, Non-acid breads, and what helps one helps both. So please let me know what you think of my idea.

"I have received 600 pounds of Soya Flour this morning from Los Angeles, so you need not be in a hurry only if I want you to get it right. With kind regards, Yours truly..."

Note 1. This is the earliest letter seen (July 2021) written by Bill Baker.

Note 2. At the top center of his letterhead is a new logo. The size and shape of the bean is the same as it was in May 1930. But the text now reads: "Bill Baker's Lima Bean Products."

Note 2. I.C. Bradley, a pioneer in the soybean processing industry, worked for Funk Brothers at the time of this letter. Address: Proprietor, The Ojai Bakery, Ojai, California.

800. *Oakland Tribune.* 1930. Be young at 70! Old age is not a matter of years states Prof. Paul C. Bragg (Ad). Oct. 9. p. 10.
• ***Summary:*** "It is a matter of the amount of poisons in your tissues. Everyone who eats the standard devitalized, de-mineralized, over-rich and over-concentrated foods of the present day is accumulating in his or her tissues Old Age and Disease poisons. It is not the number of years you have lived, but how you have lived in those years that determines the

© Copyright Soyinfo Center 2021

condition of your physical body at any certain age.

"Learn how to eat vitality-giving foods, foods nearer the natural diet of mankind... Learn how Nature's Way of healing through Blood Cleaning and Tissue Purification will make you Healthy and Youthful."

The seven free lectures will be held Oct. 10-17 at the Women's City Club Theater, 1428 Alice St.

The titles of the lectures are: "Friday, Oct. 10–'How to banish disease and live 100 years.' Cancer healed Nature's way.

"Saturday, Oct. 11–'Constipation, the curse of mankind today.'

"Sunday, Oct. 12–'Perfect eyesight without glasses.'

"Monday, Oct. 13–'The secret of vitality–Breathing.'

"Tuesday, Oct. 14–'Why we are a nation of physical wrecks.' See Prof. Bragg's famous Death Dinner.

"Thursday, Oct. 16–'How to build your body back to health.' Prof. Bragg will appear in athletic costume and exhibit his magnificent physique.

"Friday, Oct. 17–'The truth about your sexual problems.' Children under 12 not admitted."

A portrait photo in the upper right corner of the ad shows Paul Bragg.

Note: It could have been at these lectures that Jack LaLanne first met (and was deeply inspired by) Paul Bragg. LaLanne was born on 26 Sept. 1914 according to the California Birth Index, so he would have been age 16. He lived in nearby Berkeley.

801. *Hartford Courant* (*Connecticut*). 1930. Vienna specialist to give food talk: Benjamin G. Hauser. Nov. 7. p. 7.
• ***Summary:*** "Dr. Benjamin Gayelord Hauser, food specialist of Vienna, who believes the American people can solve any drawbacks attached to enforcement of the prohibition amendment by changing the type of food they consume, will give one free lecture in Hartford [Connecticut] in the Colonial Room of the Bushnell Memorial Saturday evening at 8 o'clock."

"The Viennese specialist arrived in this country recently to present his ideas to President Hoover." A portrait photo shows Hauser wearing a beret, coat and tie, and overcoat.

802. Bragg, Paul C. 1930. The enemy at your table: Common salt direct cause of many diseases says noted health authority (Ad). *Los Angeles Times*. Nov. 16. p. L20.
• ***Summary:*** At first sight, this looks like a column. But the reader soon realizes that it must be an ad. Today (2021) it would be called an "advertorial." It begins: "Los Angeles has been the scene of a startling food discovery that gives promise of changing the dietetic standards of the nation." Common salt is the cause of many serious, common diseases. It is "an inorganic substance,... as hard and inedible as rocks." Yet many people continue to poison themselves 3 times a day. The alternative is Bragg's amazing discovery, Live Sprinkle, a "delicious seasoning for foods made from living organic substances from the vegetable kingdom." It contains dehydrated "orange juice with its health-giving mineral salts, calcium carbonate..."

Live Sprinkle may be purchased at the following stores: "Hain's Health Food Store, 329 W. 3rd St.; Grist Mill Food Products, 524 W. 8th St.; Carque Health Foods, 6411½ Hollywood Blvd.; United Health Service, corner 4th and Broadway; Jones Health Foods, Grand Central Market, Hill St. Side, Stall A-12."

Or fill out the coupon below, enclosing 10 cents for postage, for a sample of Live Sprinkle and a free copy of the booklet "Why Salt Destroys."

A small portrait photo shows a healthy and handsome Paul Bragg.

Note the big distinction made between inorganic, dead substances (table salt) and mineral salts from living things (calcium carbonate). Today (2021) this distinction is no longer considered important or real. Address: Bragg Laboratories, 1109 Hudson Ave., Hollywood, California Dep. 103.

803. Allax Mfg. Co. 1930. Constipation and gas banished forever (Ad). *Los Angeles Times*. Dec. 7. p. H19.
• ***Summary:*** "Constipation is responsible for more human misery, mental and moral disaster than any other agent. It is the Mother of all disease.

"Civilized man is a wreck. People living in civilization are the sickest of the living things on earth. They eat the sticky, slimy, refined, devitalized, demineralized foods of today. They spend $500,000,000 yearly to try and move the great American bowel.

"Allax can be purchased at the following health stores: (1) Hain's Health Food Store, 329 West 3rd St. (2) Grist Mill Food Products, 524 W. 8th St. (3) Jones Health Foods, Grand Central Market, Hill St. side, stall A-12. (4) Carque Health Foods, 6411½ Hollywood Blvd. (5) United Health Service, Corner 4th and Broadway (6) California Food and Health Service, 215 West Broadway, Glendale; 7253 Sunset Blvd., Los Angeles; 230 N. Larchmont, Los Angeles; 175 N. Lake, Pasadena; 445 E. Colorado, Pasadena; 309 Santa Monica Blvd., Santa Monica.

Note 1. The last document seen in *The Los Angeles Times* showing a Carque store on Hollywood Blvd.

Note 2. By Jan. 1933 Allax Mfg. Co. had changed its name to "Live Food Products, Inc." but was at the same address. They made a South Sea Candy described as "A wholesome raw sugar and honey bar." Address: 6122 Santa Monica Blvd., Hollywood, California.

804. *Los Angeles Times*. 1930. Gift cake to be sent president: "Bill" Baker of Ojai again bakes giant present that will grace Hoover table. Dec. 15. p. 11.
• ***Summary:*** Santa Paula, Dec. 14. President Hoover will

soon receive a Christmas cake from the Ventura County Chamber of Commerce. It is the handiwork of Bill Baker, the famous cake-making of Ojai. "The cake will be shipped Monday to Congressman Arthur Free of this district." The cake weighs 65 pounds and contains delicious California fruits and nuts. "The motif for the design is a combination of the Christmas season and patriotism." Using sugar, he has created a replica of the San Buenaventura Mission.

805. Lovell, Philip M. 1930. Care of the body. *Los Angeles Times.* Dec. 21. p. J19.
• ***Summary:*** The last section, titled "Congratulations," is "best wishes for success in the venture started by our old friend, Mr. Otto Carque... It is my frank opinion that Southern California has, in the person of Otto Carque, a man who known more about the technical, scientific details of food, its adulteration, pollution and chemistry, than other scientists known to me.

"For many years Mr. Carque has been engaged in the health-food business as well. Now he has opened his new store at 1016½ South Hill street."

"The name, 'Carque,' attached to a label or food is, to me, sufficient warranty of its wholesomeness, purity and goodness." Address: N.D. [Naturopathic Doctor].

806. Bragg, Paul Chappius. 1930. Professor Bragg's live food cook book and menus. Hollywood, California: National Diet and Health Association of America; and, Live Food Products. 170 p. No index. 24 cm.
• ***Summary:*** About raw food and vegetarianism. Contents: 1. Why I write this book. 2. Our daily food, is it nourishment or poison? 3. There are no meat recipes in this book. 4. Poisonous white sugar. 5. Dairy products not human food. 6. Coffee and tea are drugs. 7. Don't use condiments. 8. Salt–The enemy of life and health. 9. Pure food. 10. Don't use aluminum cooking ware. 11. Gas, indigestion and stomach trouble. 12. Acknowledgment of recipes and suggestions fork other health food writers. 13. Salads. 14. Fruit salads. 15. Salad dressings. 16. Directions for making nut butter and nut milk. 17. Relishes. 18. Soups (incl. Carque's nut milk soups, made with his nut milk). 19. Cooked vegetables. 20. Meat substitutes and main dishes. 21. Desserts. 22. Breads and bread foods. 23. Sauces and gravies. 24. Drinks. 25. Health confections. 26. Health sandwiches... 30. Baby's diet from birth to 18 months. 31. Diet schedule for the growing child.

Chapter 1 (p. 11) states: "The drug doctor has been a failure. After hundreds of years of his reign there is still universal sickness and suffering which, instead of abating, is unmistakably on the increase."

Chapter 12 (p. 26) acknowledges: "A few of the recipes in this book were taken from the works of some of the most prominent men in the field of Natural Living. I have considered, in giving a cook book to my people, that they should have, not only my own favorite recipes, but also the best of other men who have experimented along this line. I have therefore included recipes from the books of: Dr. John T. and Mrs. Vera Richter, the leaders of the Raw Food movement in the West. Dr. Philip M. Lovell, distinguished editor of the most widely read Health column in the world, the Care of The Body section of the *Los Angeles Times.* Dr. Henry Lindlahr, the great pioneer Nature Doctor. And Otto Carque, chemist, research worker and crusader in the fight for natural foods."

Chapter 16, "Directions for making nut butter and nut milk," begins with a long passage from *Natural Foods: The Safe Way to Health,* by Otto Carqué (1925). It contains recipes for: Cocoanut milk. Nut milk (made by mixing 1 level tablespoon nut butter with 1 cup warm water, plus a little honey or sweet fruit juice if desired). Almond milk for infants. Nut cream (made from unroasted nut butter, warm water, and honey). Combination nut butter (peanuts, pignolias, cocoanuts). Apple and almond butter. Nut meal.

Chapter 20, titled "Meat substitutes and main dishes" (p. 111-18), contains largely cooked dishes, and makes widespread use of the "Battle Creek Sanitarium product, Protose, being available at most fancy grocers." Vegex and Savita are also widely used in recipes. Soy sauce is used to season Vegetable chop suey (p. 114). It "may be purchased at a Chinese store or any fancy grocers."

The National Diet and Health Association of America is located at 1109 North Hudson, Hollywood, California.

Note: This is the earliest document seen (July 2021) by or about Paul C. Bragg that mentions soy. No juicer is mentioned in this book. A portrait photo (just after the title page, p. 5) shows handsome "Prof. Paul C. Bragg." Address: Professor, California [Los Angeles].

807. Carqué, Otto. 1930. The key to rational dietetics: Fundamental facts about the prevention of disease, the preservation of health, the prolongation of life. New, revised and enlarged ed. Los Angeles, California: Published by the author. 151 p. See p. 86. 24 cm.
• ***Summary:*** The Preface notes: "In this volume the author has condensed the teachings presented in his larger volume 'Rational Diet.'" Discusses the therapeutic and health-enhancing benefits of vegetarian foods, exercise, rest, fresh air, sunlight, and pure water. Though soybeans are not mentioned, the author recommends cooking other legumes in a pressure cooker with baking soda (p. 86). Address: Los Angeles, California.

812. Pitman Health Food Co. 1930. "Pitman" Health Food Co. New factory: Vitaland, Four Oaks: The home of health foods (Brochure). Four Oaks, Sutton Coldfield, Warwickshire, England: Pitman Health Food Co. 15 p. Illust. Portraits. 12 x 15 cm.

• ***Summary:*** Cover title: A commemorative booklet containing portraits of the founder, James Henry Cook, his managerial staff, and exterior & interior views of the new factory, Vitaland. On each page (except the cover and pages 8 and 9) is a photograph with a caption. The numbers that follow are the page numbers. These photos show: Cover: Illustration of an aerial view of the plant. (2) Portrait, with signature, of James H. Cook, F.I.S.A., "Founder and principal 'Pitman' Health Food Co." (3) "Executive and heads of departments, 1930. Standing [left to right]: Mr. J.B. Lief (Order Dept.); Mr. J. Pickering (Despatch); Miss F.M. Price (Retail Accounts); Mr. A.J. Townley (Engineer); Miss M.M. Hope (Wholesale Accounts); Mr. F.M. Sutherland (Stock Keeper); Mr. R. Roberts (Milling). Sitting: Mr. P.S. Barber (Secretary); Miss. K.V. Cook (Cashier); Mr. Jas. Hy. Cook (Principal); Miss F.A. Vernon (Statistical Dept.); Mr. R. Turner (Factory Manager)."

(4) Vitaland (view from East). Showing terraces, rockery [rock garden or alpine garden] and flowering shrubs. (5) Vitaland (view from West). Showing lawns, fruit trees and rose beds. (6) Order department With a floor space of3,200 square feet. (7) Corner of stores. Showing overhead traveling cranes and conveyors.

(10) Wrapping section. Size of open space in main factory, 100 ft. by 160 ft. (11) Machinery bay. Total area of glass covering the six factory Northern lights: 5,850 superficial feet [square feet]. (12) Vacuum plant for reducing liquids at low temperatures (130ºF). (13) Wheat mill showing right to left, wheat pit, elevator, mill (without stones or rollers), conveyor, receiver, and sack being filled with flour, as finely ground as ordinary white flour. (14) Mill house with overhead runway. Showing high speed grinders, up to 4,000 revs. a minute. (15) Boiler house showing patent oil fuel burners. (16) Land tennis court, Four Oaks, Warwickshire.

Text on pages 8-9: "Vitaland is undoubtedly the latest, the most modern, the most up-to-date factory in a garden for the production of health-giving Vital Foods. It is built in a green field of 1.5 acres, in rural England with in a few minutes walk of Sutton Park, one of the largest and most interesting natural public parks in England. The park comprises 2,280 acres of unspoilt heather-clad moors, century old woodlands, and lakes that provide unbounded joy and pleasures to thousands of people.

"The factory presents a very pleasing effect with its white cement facing contrasting well with the quaint old pattern red pantiles [interlocking clay tiles] on the roof. The lay-out of the space between the road and front of factory indicates the fact that a sense of beauty need not be destroyed by a factory and its precincts.

"The main entrance opens to a reception hall containing handsome show cases, its walls being hung with portraits of noted Vegetarians and pioneers in the food reform movement. Over the door leading from the reception hall to factory appear the lines from William Blake's poem–'To build a New Jerusalem in England's green and pleasant land.'

"On the right of the reception hall are situated the private and general offices. To the left are the raw material stores with receiving deck, overhead travelling cranes and conveyers to facilitate the quick conveyance of goods to any part of the building. On left and back of the reception hall and offices are the stores for manufactured goods, and ordered departments. Extending to the rear is the large open factory with granolithic floor. The machinery and work-tables run parallel with front of the building, under northern lights, ensuring excellent lighting. A broad centre gangway runs from front to back. The power for machinery is transmitted from electric motors, by shafting so arranged as to make it available wherever required. The tables are served by metal trucks on rubber wheels, each truck capable of holding hundreds of full bottles or other articles, for removal

© Copyright Soyinfo Center 2021

to the stores for finished goods.

"Along the right hand side of the factory are situated the packing department with despatch deck; the mill-house for grinding of wholemeal flour; also separate departments for dry and wet steam-cooking ranges; the baking and drying ovens; the roasting and vacuum plant; and the plant for special chocolate making. The boiler house is also located on the right-hand side of the main building. But as oil is the only fuel used, unsightly chimney stacks are entirely absent.

"The oil is fed to the heating boiler through patent burners, with the flow of oil automatically controlled (according to the degree of heat required in any particular part of the factory) by means of a thermostat. In the same way the desired pressure in the steam-boiler is automatically maintained. Once the controls are set, the oil supply needs no attention as any excess, or deficiency of temperature or pressure at once provides the remedy by cutting out, or continuing (as the case may be) the supply of oil. There is thus complete elimination of dust and grime, inseparable from the usual coal-furnace installation. The boiler house can be accordingly kept as clean as any other part of the building.

"The factory is equipped with most up-to-date machinery and labour-saving appliances. An ample supply of soft water is assured, independent of the public supply.

"On the right of the main building, but separated from it by a paved yard, is the store for bottles and jars. Its position prevents the dirt and dust–connected with straw and packing–entering the factory. Here are also situated dining and cloak rooms and cycle sheds. At the back of the building there is space available for future extension, at present it forms the "Pitman" employees' sports ground.

"In the planning of the factory, every care has been taken to ensure that working conditions are conducive to absolute cleanliness, and to the comfort and health of workers. It is realized that only under such conditions can a maximum of satisfactory service be rendered."

Note: This is the earliest document seen (July 2021) that mentions "Vitaland," formerly 'Pitman' Health Food Co. Address: Four Oaks, Sutton Coldfield, Warwickshire, England.

814. *J. of the American Medical Association.* 1931. Bureau of Investigation: Prof. Paul C. Bragg, A food faddist and sexual rejuvenator debarred from the mails. 96(4):288-89. Jan. 24.
• ***Summary:*** "Paul C. Bragg of Los Angeles, California, is well named, He styles himself 'Professor;' the 'cripple who rebuilt himself' and 'America's Foremost Lecturer, Teacher, and Writer on Scientific Living Principles.' Under the heading, 'Prof. Bragg's Distinguished Record,' he admits that he:

"... is President of the National Diet and Health Association of America, member of the Board of Examiners of the American Red Cross Life Saving Corps (Certificate granted and signed by the late President Woodrow Wilson), First Vice-President of the Columbia Academy of Applied Drugless Science, Honorary Dean of the Health Center Institute of Drugless Healing; holds special credentials from the New York and California Boards of Education, is National Physical Director of the Industrial Boys' League, and is on the board of advisors of other leading health societies." »

Below this (see next page) is a reprint of two pages of a four-page leaflet advertising Bragg's "Free lectures"–at which collections were taken–given at Trinity Church, Denver, Colorado, in May, 1930. A photo shows Bragg standing, scantily covered with a sort of diagonal "Tarzan" garment that leaves the right side of his torso, as well as his legs and arms, bare.

"Occasionally, Bragg works on the ignorance or gullibility of preachers and gets them to permit him to use their churches for his so-called free lectures. Less than a year ago, Trinity Methodist Church of Denver opened its doors to this mountebank and advertised Bragg with a large banner describing him as 'America's Foremost Lecturer.' A report made by a physician of Bragg's talk, given May 20, 1930, at the Trinity Church, Denver, makes an interesting study. Two or three of the opening paragraphs of this report are worth quoting:

"'Prof. Bragg was introduced to a crowded house by his Secretary-Business Manager-Advance Agent, Miss Betty Brownlee, who mentioned his last visit to this city [Denver] and the large number of letters they have received requesting his return. A showing of hands indicated that a goodly number of those present had heard Prof. Bragg before. They were requested to lead the applause and to let Prof. Bragg know how glad they were that he was back.

"'As Prof. Bragg came on the platform with a leap and a bound, the audience began their applause. He immediately followed suit in an exaggerated fashion, saying: 'I like to hear people clap their hands. The clapping of hands vibrates the blood. If a person has a low rate of blood vibration, he is sick, prematurely old, nervous, etc., while a high rate of vibration indicates pep, enthusiasm, energy and good health. We sing to open up our lungs. Songs reaching away down in the diaphragm pep us up. That is why we sing at the beginning of a church service.' Prof. Bragg then sang, 'Holy, Holy, Holy,' in a loud voice and very much off key!

"'With many gesticulations and much excess motion, Bragg goes on to state: 'I am a hundred years ahead of my time. I have a new message. No other man on the platform

"BE YOUNG AT 70!"

Says Prof. Bragg:

"Old age is not a matter of years. It is the accumulation of toxins and waste products in the system that devitalize and age the tissues. When we learn how to cleanse the whole system—blood stream and tissues as well—by following Nature's laws in regard to our physical bodies, we can stave off old age many, many years. Anyone can be young at 70 by living more naturally."

□□□

Prof. Paul C. Bragg

nationally known health lecturer, writer, research worker and author of "Cure Yourself," brings to this work a most unusual and colorful background of experience. Many years of his life have been devoted to intensive clinical work and health research. He has delivered thousands of lectures throughout the country before leading educational institutions, international service clubs and civic organizations, and has dealt with countless numbers of sick people.

Prof. Bragg's Distinguished Record

The Professor is President of the National Diet and Health Association of America, member of the Board of Examiners of the American Red Cross Life Saving Corps (certificate granted and signed by the late President Woodrow Wilson), First Vice-President of the Columbia Academy of Applied Drugless Science, Honorary Dean of the Health Center Institute of Drugless Healing; holds special credentials from the New York and California Boards of Education, is National Physical Director of the Industrial Boys' League, and is on the board of advisors of other leading health societies.

Perhaps never again will you have the opportunity of personally hearing this great Health Specialist, so come early!

has the courage to tell the truth. The truth hurts.'"

"Some of the further statements reported as having been made by Bragg during this talk are equally interesting. According to the report Bragg declared that the tonsils are spongy organs located in the throat and that tonsillitis is due to eating 'mucus-forming foods' and the mucus so produced is caught by the spongy tonsils and they swell up; that cancer is caused by eating 'gooey, slimy foods'; that tuberculosis is due to the fact that young girls smoke cigarets [cigarettes]; that 'colds' are caused by the eating of white bread or ice cream; that asthma, 'gas on the stomach,' 'pink tooth brush,' etc., are all caused by formations of mucus due to eating white bread!

"About this time, says the report, the audience began to get a little restless and a few of the more intelligent began to leave, so the 'Professor' decided to take up a collection. Following this important interruption, Bragg again turned his guns on white flour and white bread, and described his own 100 per cent bran bread that had revolutionized the baking industry!

"At a subsequent lecture, the attractive Miss Brownlee, in again introducing the 'Professor' told the audience that Bragg would have some classes after the free lecture which would cost $25 to each individual enrolling. At the end of this particular free lecture, Bragg complained that while there were fourteen hundred people in the audience the night before, the collection amounted to only $11.60, and he intimated that a silver offering would be more acceptable than applause. While girls were passing the collection boxes, Bragg explained that he had some books for sale–one, entitled 'Cure Yourself,' sold for $3; another, containing a thousand recipes, was $2.50, and as a closing plea, he urged all of the audience to buy some of his bread or books, or at least invest in his purgative, 'Allax.'

"An examination of Bragg's book, 'Cure Yourself,' shows it to contain the usual farrago of platitudes and nonsense common to publications of this sort. In describing his treatment for constipation, he recommends senna leaves, because they are not drugs! He has the obsession common to food faddists regarding food combinations and states, 'Do not eat fruit and starchy food together under any circumstances.'

"Next to white flour and white bread (for which Bragg has a substitute), his chief obsession seems to be against common salt, for which he also has a substitute.

Bragg sells Glantex: "One month's supply of Glantex sold for $5 through the United States mails. In November, 1930, the postal authorities at Washington [DC] called on 'Prof.' Paul C. Bragg and his National Diet and Health Association of America, and his Bragg Laboratories, to show cause why a fraud order should not be issued against them. Bragg failed to show cause. The Hon. Horace J. Donnelly, Solicitor for the Post Office Department, in a memorandum to the Postmaster General dated December 27, 1930, briefly outlined the facts regarding Bragg. Mr. Donnelly stated that the National Diet and Health Association of America and the Bragg Laboratories were 'owned and operated by Paul C. Bragg, self-styled 'Professor,' who is not a physician.'

© Copyright Soyinfo Center 2021

The memorandum stated, further, that Bragg advertised in certain periodicals his various preparations and books, as well as his so-called course of treatment. Some of Bragg's advertisements dealing with Glantex were then quoted in detail.

"It was further brought out in the memorandum that those who purchased Glantex, both men and women, received a circular-letter advising them to take cold sitz baths daily–whether the patient suffered from inflammation of the prostate or from painful menstruation ! Solicitor Donnelly, in view of the facts, recommended that a fraud order be issued against the National Diet and Health Association of America, Bragg's Health Center, Bragg Laboratories, Professor Paul C. Bragg, and their officers and agents, as such. On December 30, 1930, Postmaster General Brown notified the local postmasters that they were forbidden to pay any postal money orders drawn to the order of Bragg's outfits, and were to return all letters and other mail matter addressed to Bragg and his concerns to the senders, with the word "Fraudulent" stamped on it.

"This, of course, will not prevent Bragg's continuing his much more profitable schemes of 'courses' and 'lectures' in person, but that is not the fault of the federal authorities. State officials, could of course, prevent it. But the interest, if any, shown by prosecuting attorneys in schemes such as Bragg's is usually largely academic."

*Facts Concerning The Soy Bean

ANIMAL products are often unsafe because of the diseased condition of the animals. It is necessary to learn how to prepare foods that are wholesome and palatable without the use of animal foods. Like Daniel and his associates, we should carefully consider our diet and keep our appetites under control.

For more than four thousand years the soy bean has been cultivated and used as a human food. Its use dates back to the beginning of China's agricultural age under the Emperor Chen Nung. The soy bean is mentioned in the Ben Tsao Gang Mu, the ancient "Materia Medica," written in the year 2838 B. C. This bean is remarkable for its richness in oil (average 20 per cent), protein (average 40 per cent), and ash (average 5.5 per cent); and the almost complete absence of starch.

Since time immemorial the soy-bean has been the most universal article in the Chinese dietary. It is also extensively used for food in Korea, Japan, Indio-China, the

*P. A. Webber, Ph. D., in the Madison Survey.

• ***Summary:*** "The soy bean is the only seed, as far as we know, which contains both the water soluble and the fat soluble vitamins."

"In 1917 during the World War, a special committee appointed by the Department of Agriculture, while searching for a cheaper source of protein for human consumption, discovered the soy bean. Shortly afterwards, soy bean in the form of flour was manufactured and this has been on the market now for some time. The entire soy bean ground into flour contains double the amount of protein and calories present in beefsteak."

"The soy bean is also very rich in lecithin. It has been clearly shown the soybean oil contains fat soluble vitamins A, D, and E."

A soybean milk can be prepared "in the same way as almond milk... Many tests have been made in the pediatrics

© Copyright Soyinfo Center 2021

departments of various universities in the United States showing that soybean milk can be used as the only source of protein in the nutrition of young infants." Also gives details on tofu. "In the Orient, 'tofu' forms a very popular and almost indispensable dietary article. This 'tofu' can be used in many different dishes, taking the place of meat or eggs. It is delightful as a constituent of roasts, omelets, etc."

"In Russia the soybean is taking prominence in the dietary of the people there. 'Plant soybeans and you plant meat, milk, egg omelets,' is the newspaper cry. A Soy Institute was recently organized in Moscow as well as a special exhibition of soy foods at which one hundred thirty varieties of soy dishes, including cutlets, pastry, salads, candy, and beef were shown. There is every reason to believe that the United States will become the leaders in introducing the soybean in the daily diet of the white race."

"The following are a few of the ways in which it is being prepared and used in the United States at the present time: Soybean flour is being used by large bakeries as a constituent of bread, rolls, pastry for pies, cakes, etc. Baby foods are coming on the market containing certain percentages of soybean milk. Chocolate malted milk containing a good per cent of soybean products is now manufactured and sold by several companies. For some time, manufacturers of diabetic foods have been placing on the market productions made largely from the soybean. The soy sauce, otherwise known as Oriental 'Shoyu' has been popularized by the Chinese chop suey restaurants, and is now being used in many dishes made in the home. The bean curd is being canned and manufactured in various other ways and sold on the market. Powdered soybean milk has become a commercial product."

"For several years the Health Food Department of the Nashville Agricultural Normal Institute has been experimenting with this most interesting legume, and is now offering two basic products which may be used in many nutritious and appetizing dishes: the soy cheese and soybean flour. These two products have been used in scores of recipes tested out at the Madison Rural Sanitarium, the Nashville Vegetarian Cafeteria, and other health food places. Just recently several different recipes for the use of soybean flour bread, rolls, and cakes have been perfected. These with other recipes, will be sent free to those who inquire for them."

"A move to substitute vegetable proteins for animal proteins is a move in the right direction, and there is no plant so promising as the soybean. A soybean research foundation has been suggested. Large space at the coming World's Fair in Chicago [Illinois] will do much to bring this important but neglected food to the attention of the American people."

Note 1. This article was reprinted as a little 8-page booklet (15 x 9 cm, undated) by T.A. Van Gundy of La Sierra Industries. This shows that Van Gundy was aware of the pioneering work of Madison Foods at an early date. On the last page of Van Gundy's booklet is the following paragraph which does not appear in P.A. Webber's original article: "For some time the founders of La Sierra Industries, Arlington, California, have been experimenting with this most interesting legume and are now prepared to offer a number of products which may be used in many nutritious and appetizing dishes: canned soys, soy soup, soy flour, soy cheese, soyco (a coffee substitute), smoein (vegetable smoked meat), soy breakfast food and soy-loaf." What a shame that this little booklet is not dated! At least we know it was printed after November 1931.

Note. 2 This is the earliest English-language document seen (Dec. 2015) that contains the term "soyco." In this case it refers to a "soy coffee."

Note 3. This is the earliest document seen (Oct. 2020) that contains the term "soybean research foundation." Address: PhD, Madison, Tennessee.

824. *Food Manufacture* (*London*). 1931. Trade notes: Edible soya flour. Soyolk in health drinks and foods. 6(11):334-35. Nov.

• ***Summary:*** "The pure edible soya flour (Soyolk) with a 20 per cent. fat content, prepared from the soya bean by the Berczeller process, is meeting with a ready response from many of the leading food manufacturers in U.S.A. After importing Soyolk from the British company for just over a year, the American concessionaires operating this process, we are informed, have commenced milling activities in a large plant at Nutley, New Jersey, and are supplying numerous bakers, confectioners, and food manufacturers with their product, known under the trade name of Soyex." Discusses the many types of American foods in which Soyex is used.

Note 1. This is the earliest document seen (Nov. 2013) stating that the Soyex Company is located in Nutley, New Jersey.

"A new field which Soyolk is said to be invading is that of the ready-to-take health food drink... A breakfast food in which soya bean flakes or puffed beans appear is one of the latest applications of this valuable food material, and salted soya beans promise to compete with salted almonds, the new invader being not only considerably cheaper in cost, but also easier to digest.

"English manufacturers will not be slow to follow the lead given by those in the American food industry..."

Note 2. This is the earliest English-language document seen (Dec. 2012) that uses the term "salted soya beans" to refer to soynuts.

Note 3. This is the earliest document seen (Nov. 2013) that mentions soy flour in international trade.

Note 4. This is the earliest English-language document seen (Jan. 2019) that contains word "soya bean flakes"–used to refer to a food. Address: UK.

825. *Los Angeles Times.* 1931. Divorce suits filed: Bragg, Gertrude E. against Paul C. Dec. 5. p. 16.

© Copyright Soyinfo Center 2021

• ***Summary:*** Note: Gertrude Elizabeth "Betty" Brownlee's first marriage was to Paul C. Bragg–so far as we know. They were married in Clearwater, Pinellas Co., Florida.

Larry Pumphrey, a researcher from Los Angeles has found (e-mail of 6 April 2011): Her second husband William M. Moore, was better known by his stage name, Peter Potter, who was host of Juke Box Jury and many other radio and TV programs. They were married in 1933. "You can Google him and another of his wives named Rebel Randall for quite a bit of information. Elizabeth and William were married for at least 5 years as she filed for divorce in 1938, but I haven't yet found out when the divorce was final. William married Rebel in 1943. So there is still enough time for Elizabeth to have another husband between 1940 and 1947-48 when she married Ernest Bachrach."

Her third husband was Ernest Bachrach, a famous photographer who worked for RKO Pictures (Radio-Keith-Orpheum, a famous American film production and distribution company). He took still photos of many famous Hollywood movie stars that worked for RKO, including Marilyn Monroe, Gloria Swanson, Katharine Hepburn, Ingrid Bergman, Fred Astaire, Ginger Rogers, Lucille Ball, Dolores Del Rio, etc. Some of his photos are extremely valuable today (April 2011).

Betty died in 1949.

826. *Los Angeles Times.* 1931. Eat honey candies for a healthful Christmas (Ad). Dec. 20. p. D20.
• ***Summary:*** "Tempting chocolate creams. Delicious honey fudge. Tasty honey caramels. Sweetened with honey and unrefined sugar only. There is no white sugar in Honey Candies... You will say it is 'The best candy you ever tasted."

"Purchase honey candies at: Health foods stores. Or direct from Betty Brownlee, 6122 Santa Monica Blvd., Los Angeles, California."

Note: The word "direct" suggests that these honey candies were developed by Betty Brownlee, Paul Bragg's second wife. She had met Bragg by March 1928, and she was working at "Bragg's Health Center" in Los Angeles by 1 April 1928, where she was bill as "the health girl who won second place in the Miss Los Angeles contest." Address: Santa Monica Blvd., Los Angeles, California.

827. **Product Name:** Zoybeans (Cooked Soybeans), Zoy Soup, Bacon and Zoybeans, Zoy Bouillon.
Manufacturer's Name: Madison Foods?
Manufacturer's Address: Madison, Tennessee?
Date of Introduction: 1931 December.
New Product–Documentation: W.L. Burlison and O.L. Whalin. 1932. *Journal of the American Society of Agronomy* Aug. p. 594-609. "The production and utilization of soybeans and soybean products in the United States." See p. 608. "Zoybeans," "Zoy soup," "Bacon and zoy beans," and "Zoy bouillon" are listed as soybean food products made and sold in the USA.

Question: What was the "Bacon" in "Bacon and soy beans," what company made it, and how was it made? Madison Foods, a maker of vegetarian foods at a vegetarian college, would almost certainly not sell real bacon made from a pig.

W.L. Burlison. 1936. *Industrial and Engineering Chemistry* 28(7):772-77. July. "The Soybean: A Plant Immigrant Makes Good." See Table II, p. 775. "Zoybeans (cooked beans). Bacon and Zoybeans. Zoy bouillon." States that these products were on the market during the latter part of 1931. They were probably made by Madison Foods in Madison, Tennessee.

828. Lindlahr, Henry; Lindlahr, Victor Hugo. 1931. The practice of nature cure. New York, NY: Nature Cure Library. 226 p. Illust. *
• ***Summary:*** Henry Lindlahr lived 1862-1924. Victor H. Lindlahr lived 1895-1969. Address: Dr., Chicago, Illinois.

829. Ojai Bakery (The). 1931? Health-giving. Nutritious. Bill Baker's lima bean products (Leaflet). Ojai, California. 2 panels each side. Each panel: 8 by 7 cm. Undated.
• ***Summary:*** On the front panel, inside a logo shaped like a lima bean, we read: "Bill Baker's lima bean products." Below that "Trade mark U.S. registered."

The text on the other 3 panels states: "After considerable experimenting for people with Acidosis and High Blood Pressure, by Dr. W.D. Sansum of the Santa Barbara Cottage Hospital, a non-acid alkaline bread and cookie were introduced to people who could not eat any other bread or cookies.

"Bill Baker's Lima Bean Bread has undergone complete analysis by the American Institute of Baking in Chicago [Illinois] and the findings were favorably received by the medical profession; bread and cookies were exhibited at the American Doctors and Hospital Convention and were highly praised.

"Bill Baker's Lima Bean Toast is made from Lima Bean Flour, honey, milk and hard spring wheat flour. It is highly dextronized [sic, dextrinized] so as to kill the starch content of the flour The toast is very palatable and will be enjoyed by everyone, including babies and children.

"Bill Baker's Lima Bean Wafers are made with 100% lima bean flour (no other flour used), honey, butter, and the finest hydrogenated shortening with fresh ranch eggs. They are well baked and therefore this highly palatable wafer is recommended for grown-ups and children to replace the ordinary cookie to be eaten with ice cream, teas, and desserts.

"Made by W.C. Baker. Ojai, California." Address: Ojai, California.

830. Lovell, Philip M. 1932. The care of the body. *Los*

Angeles Times. Jan. 3. p. K20-23. Sunday magazine.
• ***Summary:*** The section titled "The soy bean" begins: "If you are worried about the proteins when you consume a vegetarian dietary, you should realize that there are about a dozen foods which not only make up for the protein you do not get when you go off the flesh food diet but which sometimes contain as much as two or three times the quantity there is in meat."

Whereas typical lean beef contains 17-20% protein, the soy bean contains well over 40%. "It is a food with which we should be better acquainted." We should use more sprouts made from soy beans.

Concludes with three recipes from Lovell's 1927 book *Diet for Health:* Soy roll or bread (with "soy flour"). Soy bean porridge (with "soy bean flour"). Soy bean croquettes (with soy bean porridge). Address: N.D. [Naturopathic Doctor].

831. *Los Angeles Times.* 1932. Divorce decrees granted: Bragg, Gertrude E. from Paul C. Jan. 12. p. 20.
• ***Summary:*** Note: Gertrude Elizabeth "Betty" Brownlee is now officially divorced from Paul C. Bragg.

Note: It was his 2nd marriage and her first. The L.A. Times was a morning paper so the actual date of filing was 4 Dec. 1931 and of divorce was 11 Jan. 1932. Apparently the waiting period for divorces was only 30 days in 1931.

832. U.S. Department of Commerce. 1932. Ship passenger manifests. *
• ***Summary:*** Name of passenger: Paul C. Bragg. Age: 36. Departure: Honolulu, Hawaii. Arrival: Wilmington, California, Jan. 22, 1932. Passenger's date of birth: Feb. 6, 1895. Place of birth: Batesville, Indiana. Ship: "City of Los Angeles."

833. Health Center. 1932. Now you can be well! Mentally, physically sick–Come hear these men! Free double lecture (Ad). *Los Angeles Times*. Feb. 14. p. J20.
• ***Summary:*** "... by two nationally famous speakers, Fred S. Hirsch, President Ehret Club of America, and Dr. J.R. Empringham, of London, England, the man who was old at fifty but young at seventy." Hirsh will speak on "Man's greatest enemy, constipation, banished." Dr. Empringham will tell you "The secret of mental and physical rejuvenation." Come Feb. 16th at 8 p.m. Walker Auditorium. 730 South Grand Ave., Free.

Small photos show Fred S. Hirsch and Dr. J.R. Empringham. Address: Los Angeles.

834. Lovell, Philip M. 1932. The care of the body. *Los Angeles Times.* March 13. p. J20. Sunday magazine.
• ***Summary:*** The section titled "Salts" notes that England has an active and vigorous health food and physical culture movement. In London, Lovell ate at "several extraordinarily fine vegetarian restaurants where nothing but whole grain breads were served," along with a variety of vegetarian, raw, cooked and baked foods. Address: N.D. [Naturopathic Doctor].

835. Poplawski, Stephen J. Assignor to Hamilton Beach Manufacturing Company (Racine, Wisconsin). 1932. Fruit juice extractor. *U.S. Patent* 1,849,112. March 15. 5 p. Application filed 10 Sept. 1928. 7 drawings.
• ***Summary:*** A common kitchen utensil is the glass "reamer," used to manually squeeze half an orange or lemon by pushing it down on the stationary reamer and then twisting it back and forth so that both the juice and pulp are removed from the rind and flow into a receptacle around and/or below the reamer. This invention is a motorized, sanitized version of that common kitchen utensil.

"The invention relates to juice extractors for citrus and other fruits of the type in which the rotary bulb or head is used to remove the pulp or juice from the rind while the latter is held against rotation." Other "motor driven juice extractors of this type" are now in use.

Both the top and the mouth of the "discharge spout" can be covered "to prevent the entrance of insects and impurities while the extractor is not in use." The electric motor inside the base, below the container, turns the reamer. The "control switch" on the base turns the motor on and off.

Note: This machine cannot be used to juice carrots, bananas, leafy vegetables, etc. Address: Racine, Wisconsin.

836. Lovell, Philip M. 1932. The care of the body. *Los Angeles Times.* March 27. p. K20. Sunday magazine.
• ***Summary:*** The section titled "Tropher club" states: Those of you who want to hear and discuss everything and anything concerning diet, "raw foods versus cooked foods,... for for your mother-in-law and food for thought,..." there is no better place than at the Tropher club. They usually meet at the "habitat of the raw food brigade–the home of the diet reformists, the religious vegetarians and the how-to-be-healthy vegetarians–none other than Dr. Richter's Eutropheon, located at Olive street between Eighth and Ninth." Its a rare treat and the public is invited. Address: N.D. [Naturopathic Doctor].

837. Jones Grain Mill. 1932. For your health's sake: Use Jones fresh ground soy bean flour. Soy beans: Their value as food! (Ad). *Los Angeles Times.* April 3. p. 21.
• ***Summary:*** "You may not actually be sick, but at the same time you may not be enjoying buoyant Health. An examination of your diet will reveal that you are perhaps eating expensive and refined but foodless food lacking in vitamins and minerals.

"As a food, the soy bean is unique. It easily takes precedence over all other foodstuffs in the greater percentage of protein which it contains. The protein is of such superior

© Copyright Soyinfo Center 2021

quality that in animal feeding experiments it has proved itself to be capable of replacing protein of all other sorts, even milk protein, the superior character of which is acknowledged. The soy bean yield of protein is nearly twice that of average meat, four times that of eggs, five times that of bread, twice that of lima or navy beans.

"Quoting from Govt. Bulletin No. 1617 [Jan. 1930]: *It contains at the most but a slight trace of starch. Extensive experiments in North America and Europe indicate its value as the basis of food for persons requiring a low starch diet as Diabetics. Extended investigations show that soy bean flour as a gruel is a most valuable food in the dietary of infants.*

"The soy bean when consumed in the body is alkaline and never distresses with gas as other beans usually do. It is rich in lime and bone and brain building elements, in which flesh meats of all sorts are deficient.

"Soy Beans Whole, 10¢ per pound. 3 pounds 25¢. Soy Bean Flour, 15¢ per pound. 2 pounds 25¢." Address: Stall A-12, Grand Central Public Market, Third & Hill Streets [Los Angeles, California]. Phone: MUtual 0766.

838. Shippey, Lee. 1932. Lee side o' L.A. *Los Angeles Times.* April 13. p. A4.
• ***Summary:*** This entire long column is about Trophers–people who eat raw food. "'Trophers, Trophers, raw, raw, raw!' This is the college yell of the Trophers Club." They think their athletes "can out-swim, out-hike, out-tennis any Cook's tour party that ever was–for they do it all on raw food."

Trophers say they take their name from *eutropheon,* a "Greek word meaning an eating place is which nothing is cooked by fire." They have no dishes to wash, no pots or pans to scour after a meal. They just "throw the nutshells in the fireplace, the banana peels, apple cores and vegetable tops in the garbage can, and they're all set to enjoy themselves. So they go to their gymnasium, their clubhouse or out for a lark in the mountains or at the beach while we carnivorous animals" stay home and wash the dishes.

There must be thousands of trophers in Los Angeles, for they have a clubroom [and restaurant] "at 833 South Olive street, publish a weekly newspaper and have a couple of get-to-gethers every week." Every weekend they take a trip, usually to the mountains or beach, for hiking, swimming, sun bathing, or athletic sports. Laughter "is one of the standard medicines among Trophers." At one of their upcoming meetings, "Dr. Philip M. Lovell, to whom the California fruit, vegetable, and nut growers ought to erect a monument, is to speak."

Clif Sherwod, chess editor of The Times–who isn't a Tropher but who likes the crowd–says:" These Trophers are as fine looking a lot of men and women as I have ever seen in bathing suits. I train with them because they are always having such good times, and go in for the physical exercise I need. It isn't just a fad with them, its a religion–outdoors, sunshine, hardening of their bodies to the elements and the belief that nature will take care of you if you give it a chance. They take delight in simple pleasures... A great many of the Trophers are young people who hardly know the taste of cooked food."

Trophers say the original Eutropheons were Greeks during the Golden Age, and "that Greece owes much of its classic grandeur and greatness to them." Contains 4 cartoons of Trophers.

839. *Washington Post.* 1932. Market meanderings: Fruit blossoms on sale at flower stands;... April 23. p. 11.
• ***Summary:*** "Whole wheat is highly recommended as a health-giving food" according to "a health-food shop on Fourteenth street northwest... A small wheat grinding mill is a new idea offered in this health-food shop."

840. Lovell, Philip M. 1932. The care of the body. *Los Angeles Times.* April 24. p. I20. Sunday magazine.
• ***Summary:*** In the section titled "Soy bean" (p. 21) the following letter is reprinted in full: "Torrance, California. Dear Dr. Lovell. In the health section of the Los Angeles Times Magazine several weeks ago I read an article about soy beans.

"As a Japanese farmer I raised and used soy beans for many years but since coming to this country I have not seen soy beans grown. I believe this is too bad, as I believe soy beans are a valuable crop.

"For many centuries the people in Japan used this product for their main supply of protein. They also used it for nitrogen for their lands.

"Contrary to common belief, the Japanese have not used much fish for their diet and no animal meat at all, for Buddhism does not recommend its followers to kill and eat their fellow animals.

"Many due to Buddhism or the difficulty in transporting fresh fish, did not use much fish. The only thing they could depend upon for the protein was a cake made of soy beans, called tofu. We also make a sauce of the soy beans [soy sauce].

"In the Orient this is a staple crop. The farmers raise it as one of the rotating crops. I should really like to see more soy beans raised here but on account of the lack of popular usage there is not much demand for them.

"Could you give me more information about the use of this product which would appeal to the popular taste? I would appreciate it very much.

"Sincerely yours, Tatsuo Inouje [Inouye].

Lovell responds that, as he has stated before, 80% of the people worldwide are "vegetarians, either by religion or economic necessity." The Japanese are a progressive race. What they have accomplished during the past 70-80 years is "a miracle of the century. Yet they have done it essentially on a vegetarian diet."

© Copyright Soyinfo Center 2021

The soy bean has replaced animal protein for the Japanese and for most followers of Buddhists and Confucianism. "It is the roast beef of the Orient. It contains twice as much protein as the richest of meats. It is a very fine food indeed. The health food stores are slowly building up a sale for it. Recently I ran across a soy bean bread. I believe the average health food store can procure it." Address: N.D. [Naturopathic Doctor].

841. *Los Angeles Times.* 1932. Leader tastes spoils of office: Tribute to the chief (Photo caption). July 23. p. A1.
• ***Summary:*** This photo shows a large decorated white cake on a table with the white letter "L" on a circular background around the sides. It was presented after Charles H. Hatton of Wichita, Kansas, was installed as president of the International Association of Lions Clubs in the final session of their convention at the Biltmore Hotel is Los Angeles.

Four people are standing around, and two are tilting it up for the camera. The lower caption reads: "Jack Polski, president of the Ojai Lions Club; Charles H. Hatton, new president of the International Association of Lions Clubs; Mrs. Hatton and W.C. (Bill) Baker of Ojai, presenting Hatton with a cake."

842. *Vegetarian Messenger and Health Review* (*Manchester, England*). 1932. The "Pitman" Health Food Company: Vitaland, Four Oaks, Warwickshire. Aug. p. 223-25.
• ***Summary:*** The company's model factory, Vitaland, is located only a few minutes' walk northeast of Sutton Park, about 10 miles northeast of Birmingham. "Vitaland had its beginning in 1898 in the centre of Birmingham, but in 1908 it was found necessary to take larger premises, to meet the demands of a growing manufacturing business, and a move was made to Aston, a densely populated suburb, 2-3 miles northeast of central Birmingham. In 1930 the final move was made to Four Oaks. Mr. James H. Cook, the principal of the "Pitman" Company, looked upon the building at Aston as a step toward his long-cherished idea of a 'factory in the country' and Vitaland is a 'dream come true.'

There follows a description of the large, spacious, well-lit factory. Photos show: (1) The Order Department with a floor space of 3,200 square feet. (2) Machinery Bay. "The total area of glass covering the six northern lights is 5,850 superficial feet [square feet].

"On the day following his visit to the factory our representative joined the '34th Annual Staff Outing' [apparently starting in 1899] when a party of 70 journeyed by motor coach to Ludlow and Church Stretton and spent a thoroughly enjoyable time."

"Food reformers who are interested not only in the composition of the food they eat, but also in the conditions in which they are manufactured are invited to visit Vitaland."

Note: The statement that "Vitaland had its beginning in 1898" seems slightly misleading. According to "The First Century of Health Foods," by Kathleen Keleny (the daughter of James H. Cook) (1996): "In the summer of 1898 the first Vegetarian hotel in England, called the Pitman Vegetarian Hotel, was opened and I was made manager of that too" (p. 7). The vegetarian meals were an immediate success, hundreds of people were soon enjoying lunch at the hotel daily, and many of the hotel's visitors became vegetarians. "The customers started asking for foods which they could take home with them... I produced simple and appetising foods from nuts, cereals, fruits and vegetables to take the place of meat, lard, butter, cheese and jelly made from animals..." So Mr. Cook, probably with his staff, made these vegetarian foods in the hotel's kitchen. There is no indication that they were labeled or packaged; so they were more like "take out" dishes than commercial products.

In 1902 he started a health food store "and the manufacturing side was increased. "I realised that it was not economical to run a factory in the centre of Birmingham, so I bought a site in Aston where I could build the first factory" [in 1908] (p. 8).

But what products did he sell at his health food store starting in 1902? Many were probably made by the International Health Association at a real health food factory in Redhill, Surrey, starting in 1899. In his very carefully researched and documented book, The Seventh-day Adventists in the British Isles, 1878-1933, Gideon David Hagestotz, PhD, explains: In 1899, near Redhill, Surrey, the International Health Association purchased Harley Mill, which it enlarged and called Salford Mill before starting production of health products. The management imported some of the machinery and purchased the remainder in England. The products resembled the noted Kellogg and Post health foods; in fact the association had procured the 'rights' to make Battle Creek foods in England.

"Early in 1900, just after the factory gave promise of developing into a profitable industry, fire destroyed the plant... With the undamaged machinery as a nucleus for a new start, the Association leased property in Birmingham [far to the northwest, between London and Manchester] the following November [1901] where it functioned as a stock holding company under British law. Unfavorable conditions in the form of high rent and improper location" led to "a financial loss of £1,500 at the end of the first year of operation." Thereafter "each year the plant showed a profit in spite of some competition created by substitutes for the commodities it produced."

In short, the Seventh-day Adventists started the first health food factory in England in 1899. In 1926 the rapidly expanding International Health Association (I.H.A.) was renamed Granose Foods Ltd.

843. *Madison Survey* (*Madison, Tennessee*). 1932. Madison notes [The Food Factory]. 14(35):140. Sept. 14.
• ***Summary:*** "From the Food Factory comes the report

that five salesmen have recently entered Chattanooga and surrounding territory with Madison health foods. The factory has been kept unusually busy of late getting out orders for Breakfast Crisps, Three-Minute Wheat, and Vigorost. The last-named item is proving to be very popular. From Michigan a firm writes, 'We have to compete with other companies, but a taste of Vigorost has settled the matter in favor of your foods.' A California patron writes, 'Vigorost is the best food we have eaten along the health food line.' May we hear from others in regard to this new product?"

844. **Product Name:** Vigorost (Fibrous-Textured Canned Meatless Steak). Renamed Vigoroast by 1965.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1932 September.
Ingredients: Wheat gluten, firm tofu and/or okara, whole peanut meal, seasonings.
Wt/Vol., Packaging, Price: 14 and 20 oz cans.
How Stored: Shelf stable.
Nutrition: Protein 19.4%, fat 8.6%, carbohydrates 12.3%, ash 2.1%.
New Product–Documentation: Madison Survey. 1932. Sept. 14. p. 140. Dec. 7. p. 179. For entrees, sandwiches, salads.

Madison Survey. 1937. "The soy bean marches on." April 21. p. 59-60.

Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1941. July. p. 273. "A treat without meat." Vigorost is one of five basic food products made and sold by Madison Foods. Taylor. 1944. The Soy Cook Book. p. 201.

Madison Health Messenger. 1949. V. 49-2. p. 5. "Vigorost–a fibrous-textured vegetable steak used like meat. Also for sandwiches, salads, etc. Ingredients: gluten, soy cheese, whole peanut meal, seasonings. 14 & 20 oz. cans."

Note from Sam Yoshimura. 1981. March 19. When Sam attended Madison College from 1937-1943 Vigorost was made from wheat gluten, soy cheese [tofu], and seasonings.

Note 1. This is the earliest known commercial soy product that is a meat alternative resembling beef; it uses tofu and/or okara.

Note 2. This the second earliest meatlike product seen, made by a Seventh-day Adventist food company, that contains gluten.

845. **Product Name:** Breakfast Crisps (Ready-to-Eat Soy-Based Breakfast Cereal).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1932 September.
Ingredients: Incl. whole soy flour.
How Stored: Shelf stable.
New Product–Documentation: Madison Survey. 1932. Sept. 14. p. 140.

Madison Survey. 1937. "The soy bean marches on." April 21. p. 59-60.

Madison Health Messenger. 1938. Spring, p. 4. A photo shows a young boy at the breakfast table (dressed in a white shirt and bow tie) eating "Breakfast Crisps." The package is clearly shown.

Note: This is the earliest known commercial soy product that uses whole soy flour as an ingredient.

846. *Los Angeles Times.* 1932. Health aid and diets on program: Food specialist to assist director of 'Times' Home Service at meeting. Oct. 19. p. A6.
• ***Summary:*** Marian Manners, director of the [Los Angeles] Times' Home Service Bureau, announces a program for today at 3 o'clock in the auditorium of the Southwest Building, 130 South Broadway, held especially for those who are interested in "foods from the standpoint of diet and health."

"Hazel Denis, dietitian for La Sierra Industries, manufacturers of the complete line of soy bean products, will prepare soy cream pie and Boston roast, showing two novel and delicious ways of introducing this health food into the diet."

Note 1. This is the earliest published and dated document seen (Oct. 2013) concerning La Sierra Industries, founded by T.A. Van Gundy.

Note 2. This is the earliest document seen (Oct. 2013) that mentions a "soy cream pie." We soon learn that this "soy cream pie" closely resembled a non-dairy cheesecake.

847. *Evening Telegram* (*Superior, Wisconsin*). 1932. Family Shoe Store holds grand opening Saturday. Nov. 4. p. 9, col. 2.
• ***Summary:*** "The Family Shoe Store, formerly located at 624 Tower avenue, will hold its grand opening in its new quarters, 702 Tower avenue, Saturday.

"Owners and operators of the Family Shoe Store are August Abrahamson and Mildred Lager. They formed a partnership in 1929, taking over the shoe store known for years as Giesen's.

"Miss Lager in West: At the present time Mr. Abrahamson is in full charge of the store. His partner is on the Pacific Coast recovering her health. She is expected to return shortly.

"Before forming partnership with Miss Lager, Mr. Abrahamson was with the Giesen's Shoe Store for 18 years."

848. La Sierra Industries. 1932. Soy bean (Ad). *Los Angeles Times.* Nov. 6. p. J20.
• ***Summary:*** This small, square ad reads: "One of the most

© Copyright Soyinfo Center 2021

perfect foods on the market today. Perfect in protein and practically free from starch, with an Alkaline Reaction.

"Soy bean products are offered in twelve different varieties: Soy-Co Breakfast Beverage [soy coffee], Soy Milk, Cheese [tofu], Butter, Bologna, Loaf, Spread, and Others.

"On sale at health food stores. Manufactured by the La Sierra Industries. 'Packers of superior foods.'" Address: Arlington, California.

849. *Madison Survey* (*Madison, Tennessee*). 1932. The food factory. 14(45):179-80. Dec. 7.
• ***Summary:*** "For many years, as one of the campus industries at Madison, a health food factory has been operated. It has furnished foods for the college cafeteria, for the sanitarium diet kitchen, and for the Nashville Vegetarian Cafeteria, and has sold much to the outside trade. Recently more than usual interest is being shown in health foods. Quotations from a few letters written by those representing and those using our food in other places will be of interest to many of the Survey readers."

Popular products include Vigorost, Soy Cheese [tofu], Soybean Dixie Fruit Crackers, and Soy Bread.

Dr. E.A. Ruddiman, in charge of Soy Bean Research at the Henry Ford Laboratory in Dearborn, Michigan, wrote that he took home the samples of Vigorost and Soy Cheese and enjoyed them very much; his wife made some croquettes from the Soy Cheese.

Dr. A.A. Horvath of the Bureau of Mines in Pittsburgh, Pennsylvania, ordered 12 small cans of soy cheese. "Dr. Horvath is an expert on the soy bean and our correspondence with him is most interesting.

"Dr. Harvey Holmes of the Severance Chemical Laboratory, Oberlin College [Ohio], writes: 'I am very anxious to try the "tofu" (soy cheese) and learn the various ways of serving it. I would like to obtain a sample of the Soybean Dixie Fruit Crackers.'"

850. *Los Angeles Times.* 1932. Cake masterpiece sent to Hoover: Ojai Baker again honors president with gift. Dec. 17. p. 8.
• ***Summary:*** Ojai, Dec. 16.–For the fourth time since President Hoover has occupied the White House, "Bill" Baker, the mastercraft baker of Ojai, has shipped him a Christmas cake. Weighing 100 pounds, with an exact replica of the White House on top, this year's cake is the largest and most beautiful ever made by Baker–"whose lima bean bakery products are known all over the country." Baker is author of a book titled *Mastercraft in Baking.* A large photo shows Miss Dorothy Gardiner Smith of Santa Paula with the huge cake.

851. *Los Angeles Times.* 1932. South Seas boomed as trade area: Clarke Irvine, lecturer, urges local concerns to "look beyond Orient." Dec. 26. p. A7.
• ***Summary:*** Clarke Irvine, globetrotter and lecturer, has returned to Los Angeles after an absence of 3 years, during which he traveled about 40,000 miles "around and about the Southern Cross" [four bright stars in the southern hemisphere]. His lecture encouraged Los Angeles manufacturers to expand their trade to the Orient, and beyond to the South Seas. "The opportunities are tremendous."

Irvine, a native of Santa Monica, spent many years in the Los Angeles area as a "newspaper man and publicity writer before embarking on his travels." He now resides in Honolulu but spends most of his time traveling worldwide and lecturing about 2 motion picture films he has made, "The Birth of a Flower" (an educational film about Hawaii) and "Roaming in the South Seas" (a record of his adventures there).

He and his wife have visited the Great Barrier Reef and the Queensland Mountains in Australia, and Manila (Philippines).

During his publicity days in Los Angeles, Irvine was best known as head of the publicity department for Warner Brothers and later for the former Goldwyn company.

852. **Product Name:** Soy Cheese (Tofu).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.

856. Hauser, Bengamin Gayelord; Berg, Ragnar. 1932. Dictionary of foods. New York, NY: Tempo Books, Inc. x + 135 p. 20 cm. Also issued in 1934 by Tempo Books.
• ***Summary:*** One chapter, titled "Alkaline and Acid Forming Foods," begins: "Here, in America, most adults suffer from some form of acidosis. This is chiefly due to the fact that too many acid-forming foods are eaten. Statistics show that we eat about 70 per cent of such foods as meat, cheese, eggs, starches, and sugars, all of which are acid forming; and only consume about 30 per cent of the alkaline-forming foods, namely, fruits and vegetables."

A table (p. 121) lists the most widely consumed acid-producing foods and the amount of acid that each forms. The principal acid-forming elements are phosphorus, sulphur, silicon, fluorine, and iodine. In addition to most animal foods, cereal grains and legumes also feature prominently in this table. For example, rice is said to be one of the most acid-producing foods (41.64), exceeded only by meat extract (44.60). Lean beef is 23.51. Legumes are 4.00.

A table (p. 123) lists the most widely consumed alkaline-producing foods and the amount of alkaline that each forms. The principal alkaline-forming elements are potassium, sodium, calcium, magnesium, iron, and manganese. Among the most alkaline-forming foods are soya beans (25.21), cucumbers (31.50), dried figs (27.81), and celery (11.33).

A photo (facing the title page) shows Hauser and "Ragnar Berg, Germany's foremost food scientist, standing in the latter's laboratory in the Stadtkrankenhauss, Friedrichstadt, Dresden, Germany."

857. Hauser, Bengamin Gayelord. 1932. Health day (*Gesundheitstag):* The one-day-a-week health holiday as introduced in America. New York, NY: Tempo Books, Inc. 4 + 57 p. No index. 20 cm. *

859. Hauser, Bengamin Gayelord. 1932. Keener vision without glasses. 2nd ed. New York, NY: Tempo Books, Inc. 8 + 162 p. Illust. (portrait). 22 cm. *
• ***Summary:*** Includes a keener vision test and practice chart.

860. Bund, Mildred Reed. 1933. Market meanderings: Highly nutritious fresh goat milk now available from modern dairy nearby; Cheese cake bargain is found; Dried sugar corn offered. *Washington Post.* Jan. 17. p. 13.
• ***Summary:*** "Goat milk, as yet, is found only in Washington shops devoted to health foods." It is valued "for its nutritious, digestible and laxative qualities and for its alkaline reaction."

"Special refrigerators for handling the goat milk have been installed in the health food shops prepared to sell it, and delivery may be arranged for through these shops,..."

Honey graham wafers, labeled "sunalized," are also sold in health food shops, as is "Sea Vigor," a food made from seaweed, that is "said to contain iodine, copper, phosphorus and iron."

861. Kester, Frank. 1933. Intercoastal speed mark set by new Lurline. *Oakland Tribune.* Jan. 26. p. 20.
• ***Summary:*** The Panama-Pacific liner Virginia will be sailing from San Francisco Saturday for New York, Panama and Havana [Cuba]. Captain George V. Richardson will take on a heavy cargo of California products and a long list of passengers, including "Paul C. Bragg, lecturer, of Los Angeles." Note: Bragg's destination is not given.

862. *California Health News* (*Hollywood*, *California*). 1933. Bragg returns from lectures. 1(1):1. Jan. 30.
• ***Summary:*** "Paul Bragg and his staff are returned from a successful campaign in San Francisco where several hundred joined his class out of ten thousand who heard his seven free talks on health. He reports that the health movement in the bay district is gaining steadily, more people showing interest in how to properly feed their bodies.

"In Portland [Oregon] this dynamic health evangelist held two large classes of several hundred each, both highly enthusiastic. As a result the Portland Health Club was formed, and now meets regularly for discussions and to hear speakers.

"Seattle [Washington] also saw Bragg's inspiring personality and several hundred were converted to his mode of life, much to the benefit of the health food stores."

Note: This is the earliest seen (Nov. 2009) by or about Paul Bragg in the *California Health News.* Many more would follow.

863. *California Health News* (*Hollywood*, *California*). 1933.

Here we are! 1(1):2. Jan. 30.
• ***Summary:*** Clarke Irvine explains why he has started a new newspaper. "Greetings from California. We hardly need say that this is the first issue of the *California Health News*. We hope that the future will be as inspiring as the work on this edition. "Old Man World is sick today. The year 1933 will hear much moaning before the big-head of *super-prosperity* drops to normal.

"And yet people are sick, suffering, dying–but today, *glorious 1933*, the world is becoming health-minded, and looks to its diet, care of the body–and pocketbook.

"Our purpose is to spread the knowledge of health, tell of the happiness that results from right living and the economic advantage thereof–so valuable today.

"This ideal is the culmination of ten years belief and practice of healthful living; a desire to turn a lifelong news training into more constructive lines; to sing of the exuberant life that all may live, here and now!

"This time is ripe for a frequently and regularly published health journal." Address: [Founder, editor-in-chief, and publisher].

864. *California Health News* (*Hollywood, California*). 1933. New cracker by Cubbison. 1(1):2. Jan. 30.
• ***Summary:*** "Harry Cubbison, nationally known whole-wheat baker of Melba toast and other health substantials, is introducing the new Melba cookie, on display this week, one more good number added to the Melba family of crackers, and breads. It is made with honey and other pure ingredients. This Los Angeles product is distributed all over the world." Address: [Los Angeles, California].

865. *California Health News* (*Hollywood, California*). 1933. Hike dates. 1(1):2. Jan. 30.
• ***Summary:*** "Organizations holding regular hikes are invited to use this column for announcements. *Sundays.* L.A. Health club (Bragg group), starts 9:00 a.m., foot of Mt. Hollywood, Western avenue entrance to Griffith park. *Sundays.* Trophers club (Richter group), announced at Wednesday night meetings (see Lectures). Auto trips to distant points."

866. *California Health News* (*Hollywood, California*). 1933. Meetings. 1(1):3. Jan. 30.
• ***Summary:*** Wednesday, 7:30. Trophers club, 833 S. Olive [Richter's Eutropheons–Live Food Cafeterias]. Everybody welcome. Sunday hike announced here.

Wednesday, 8 p.m. Dance. L.A. Health Club, Goldberg ball room, Venice Blvd. at Flower, members 25¢.

Saturday, 6 to 8 p.m. 833 S. Olive. All invited to come and relax, rest, dine and express ideas or ask questions on any timely subject. No fees. Dining optional.

867. *California Health News* (*Hollywood, California*). 1933. Hain Health Foods (Ad). 1(1):3. Jan. 30.
• ***Summary:*** "100% pure. We carry a most complete stock of health foods of the finest quality. Free delivery in Los Angeles and Hollywood of orders for $2.00 or more. Mail orders given prompt and careful attention." Address: 329 W. 3rd St., Los Angeles, California. Phone: MAdison 2588.

868. *California Health News* (*Hollywood, California*). 1933. Jones Grain Mill (Ad). 1(1):3. Jan. 30.
• ***Summary:*** "Listen in. Ann Warner Program, KFI, Monday, Tuesday and Thursday, 1:15 P.M. The New Health Program. Complete line of natural foods. Mail orders promptly attended to." Address: 322 South Hill St., Los Angeles, California. Phone: MUtual 0766.

869. *California Health News* (*Hollywood, California*). 1933. Foreign readers (Ad). 1(1):4. Jan. 30.
• ***Summary:*** "The editor [Clarke Irvine] will appreciate it if you will send in sample copies of health publications so that communication may be made with editors in far places. Readers in this country will confer a favor upon this paper and its readers if they can forward such material for the column 'Digest of World Health News.' Perhaps you have copies of magazines and papers from abroad that you can send."

870. *California Health News* (*Hollywood, California*). 1933. Lecture dates. 1(1):4. Jan. 30.
• ***Summary:*** "*Daily afternoon.* Various doctors at United Health Service, Fourth and Broadway. Free. *Tuesday.* Dr. Richter, 209 S. Hill, music 6:30, lecture 7:30. Free. *Tuesday,* 8 p.m. Dr. Rotondi, 1633 N. Argyle. Free. *Thursday.* Dr. Richter, 833 S. Olive, music 6:30, lecture 7:30. Free. *Friday,* 8 p.m. Dr. Rotondi, 1633 N. Argyle. Free."

871. *California Health News* (*Hollywood, California*). 1933. A new creation: Cubbison's Melba Supreme Cookies (Ad). 1(1):4. Jan. 30.
• ***Summary:*** "Made by the bakers of Melba Toast. A real treat in store for you." Illustrations show boxes of Cubbison's Melbettes Toast and Cubbison's Melba Supreme Cookies.

872. *California Health News* (*Hollywood, California*). 1933. New lecturer appears in north. 1(1):4. Jan. 30.
• ***Summary:*** "As a result of taking Paul Bragg's two Portland classes, Charles H. Withers is now an independent teacher, according to a letter and poster received by *the News.*

"Some years ago Mr. Withers weighed over 200, was sick and had to quit work. He took [Gayelord] Hauser's class and studied with other teachers, until today, after taking all Bragg's work, he is in prime condition, inspired to help others to radiant health.

"The News is asking Mr. Withers to represent it in Oregon. Health folks are urged to meet him. His address is 1150 Center Street, and he may be secured for health talks."

873. *California Health News. A National Journal of Better Living* (*Hollywood, California*). 1933--. Serial/periodical. Clarke Irvine, Editor and Publisher. 4647 Russell Ave., Hollywood, California. Vol. 1, No. 1, Jan. 1933 (4 p.). Biweekly.

• ***Summary:*** This was the first consumer magazine focusing on the young, but rapidly growing, health foods movement in and around Los Angeles, California, but also giving good coverage to events nationwide. It was one of America's earliest and most influential health periodicals.

The masthead for Vol. 1, No. 1 (30 Jan. 1933) states: "Free. Independent. Frank. Officially endorsed and recognized as the spokesman of Western health activities. Clarke Irvine: Editor and publisher. Marguerite Irvine: Business manager... dedicated to health, happiness, beauty, and economic security; and stands for freedom of thought, speech and action. Issued on the 15th and 30th of each month at 1255 N. La Brea, Hollywood, California, U.S.A. Telephone HEmpstead 2434. Price: 3¢. One year, one dollar. Accepts advertising only for items beneficial to health. Health lectures for schools, churches, clubs, shops, stores, etc. may be arranged through this office without cost." The top of page 1 states: Complimentary copy, Circulation: 5,000 this issue. "The only independent health journal on the Pacific Coast." At the bottom of page 1 in big bold capital letters: "Editors please note! Contents not copyrighted. Two copies mailed to you. Clip and use freely. Two copies mailed to you. Clip and use freely. Credit appreciated–Editor."

The masthead on 25 Jan. 1935 states: "Established 1933. 4647 Russell Ave., Hollywood. Phone No. 9017. Published fortnightly on Friday. Clarke Irvine, editor and publisher. Marguerite Irvine, business manager. Jack Silver, advertising manager. Accepts advertising only for items beneficial to health."

In. Feb. 1937 (Vol. 5, No. 4), some 7,000 copies of each issue were published fortnightly (once every two weeks) on Friday. A year's subscription was $1.00; each issue was 5 cents. It was edited and published by Clarke Irvine, who wrote a column titled "Tomorrow" on page 1.

Starting with the issue of 17 Sept. 1937, the title was shortened to *Health News.* In 1939 each issue sold for 5 cents. The masthead on 14 March 1941 gives the address as 1702 N. Vermont, Hollywood. Tel. NOrmandy 9017. Clarke Irvine, editor and publisher. Tom Gaines, assistant editor. But by 23 May 1941 the address had changed to 4657 Hollywood Blvd.–with everything else the same.

On 15 May 1942, it became *Let's Live*, which still sold for 5 cents an issue–although the price had doubled to 10 cents by June 1945. In August 1988 the magazine celebrated its 55th anniversary. In December 1999 it boasted "more than 2 million readers worldwide." As of Nov. 2003 *Let's Live* (which see) is published by Franklin Publications in Santa Monica, California. Phone: 310-445-7504. They still have almost all back issues (except the year 1938), in excellent condition! Address: Hollywood, Los Angeles, California.

874. Bragg (Paul C.). 1933. Coming! Paul C. Bragg (Ad). *New York Times.* Feb. 25. p. 18.

• ***Summary:*** "Who brings a message of the religion and health of the Polynesians in 7 Free Lectures. Starting March 1st, 8 P.M. and every night except Saturday. His philosophy of life and health has helped thousands to a new way of living.

"Pythian Temple Auditorium, 70th Street and Broadway" [New York City]. A photo shows Paul Bragg.

Note: This ad is on the page titled "Religious services."

• ***Summary:*** Amidst five very fashionable display ads for Hedda Hopper, white sportswear for summer glamour, summer hats, gowns, etc. is a small announcement: "Author of health books. Here at 2:30 p.m. Friday. Bengamin Gayelord Hauser will autograph his books on food and health. First floor." Address: Seventh Street and Grand Avenue [Los Angeles].

881. *Los Angeles Times.* 1933. Food expert will talk at Broadway. May 18. p. A1.

• ***Summary:*** "Those who believe that the science of food has much to do with everyday efficiency and health will be interested in the announcement that Bengamin Gayelord Hauser, formerly of Vienna, food scientist and radio lecturer, will appear in the Broadway Department Store's auditorium this afternoon at 2 o'clock to talk on 'Food Harmony–and You.'"

The author of several books, he "will discuss the importance of right combinations of food in the daily diet. The lecture is open to the public without charge."

882. U.S. Department of Commerce. 1933. Ship passenger manifests. *

• ***Summary:*** Name of passenger: Paul C. Bragg. Age: 38. Departure: New York, NY. Arrival: Los Angeles, California, May 28, 1933. Passenger's date of birth: Feb. 6, 1895. Place of birth: Batesville, Indiana. Ship: "Santa Rosa."

883. *California Health News* (*Hollywood, California*). 1933. Child health is key to America's future. May 30. p. 1.

• ***Summary:*** "Bengamin Gayelord Hauser has left Los Angeles, and today the air is full of health, and for several years his influence will be felt hereabouts, for that man Hauser is a regular volcano of health!

"New speakers are on the air. New lecturers are opening talks. Older ones are starting again. Books are being written, films being made, publicity being put out..."

He recently talked in San Francisco to large audiences. "Hauser made a hit with the kiddies, and why not? He is big, human, genuine, inspiring, honest. If I were to write a prayer, I'd pen one for the good lord to give us more men to lecture on modern health, especially to mothers and children, in whom rests the future welfare of our great nation; these youngsters who may be taught to grow up without knowing white bread, white sugar, cigarettes and liquor!

"Help develop these men of a new day, men of Tomorrow, the health men, who will grow up living peacefully. Then wars will cease!"

A photo shows Hauser surrounded by about 50 children.

Last minute news: Otto Carque. May 30. p. 1.
• ***Summary:*** "Otto Carque, pioneer health food and dried fruit producer, closes his Hill Street retail-wholesale store, is moving to 1315 South Maple where wholesale in general health foods will be done. Mr. and Mrs. Carque know the business. He is author of several books and has helped thousands to get started on the health path, among them the publisher of this paper [Clarke Irvine].

Note 1. This is the earliest document seen (July. 2021) that gives Carque's new address on Maple (probably Maple Ave.).

Note 2. Carque's consolidation may have been caused by the Great Depression, which started in 1929.

Note 3. This is the earliest reference to Otto Carque seen (July 2021) in *California Health News.*

885. Lindlahr, Victor H. 1933. Health food stores lauded: Lindlahr sees demise of drug and grocery lines. *California Health News* (*Hollywood, California*). May 30. p. 1, 3.
• ***Summary:*** "Three years ago I mentioned 'health food store' on the air. Dozens of letters came asking me 'what is a health food store?' where is one? what do they do?... In the biggest, busiest, most progressive city in the United States, not one person perhaps in 150,000 had ever seed a health food store... I was quite surprised. In all New York, center of 10,000,000 people, three years ago, there were only three health food stores. Today, thanks to agitation, there are many, many more." Address: Dr.

886. *Vegetarian Messenger and Health Review* (*Manchester, England*). 1933. Mapleton's Nut Food Co. Ltd., Garston, Liverpool. May. p. 143-45.
• ***Summary:*** Last month saw the opening of the new factory of Messrs. Mapleton's at Garston, about 10 miles southeast of Liverpool on the northeast side of the River Mersey estuary. The company was founded by Mr. Hugh Mapleton some 30 years ago [in about 1903] in Manchester. To celebrate the opening of the new factory, two oil paintings of the founder were unveiled and presented. In about 1908 Mapleton moved his company from Manchester to Garston, where it has been making health foods for the past 25 years.

The company began in Manchester in one room of a house containing 23 other rooms. Hugh Mapleton had one boy as his assistant. The "remaining part of the house was soon brought into use and the back yard roofed over to form another room. Later, the house next door was rented which brought into use a further 17 rooms. New premises were the found on the top of a hill outside Rochdale [about 20 miles northeast of Manchester]. After two years, on account of the situation being too remote and the atmosphere too damp for the manufacturing process, a removal was made to Garston. The present building, remodeled and rebuilt after the disastrous fire which occurred in October, 1931, is the seventh factory which Mr. Mapleton has equipped for the business." The new plant has over one acre of floor space, "33 motors, 100 machines, many of which are the result of Mr. Mapleton's ideas, and a staff of 250 workers, augmented during the busy season, busily engaged in the manufacture of nut butters, fruitarian cakes, nut meats, savoury pastes and a wide variety of other fruit and nut preparations which form a more delightful and healthy form of food than that which is obtained from the dead bodies of animals."

Before World War I, Mapleton opened a factory in Hamburg, Germany. "This was of course taken over by the Germans in 1914, and is still in operation under German ownership. It took eight years of strenuous effort to recover from German funds the bare cost of the investment in this factory. But in many other foreign countries there is now a steady and increasing demand for Mapleton's foods.

"As a pioneer in the manufacture of health foods, Mr. Mapleton can look back with pride and satisfaction at the work he has accomplished..."

887. *Los Angeles Times.* 1933. Health and trade show under way: Chiropractors' four-day demonstration of methods opens at Alexandria. June 27. p. A5.
• ***Summary:*** The California Health Show and Trades Exposition opened yesterday at the Alexandria [a hotel east of Pershing Square near downtown Los Angeles]. 250 doctors attended, "health foods of every description," and scores of booths were on display in the ballroom. "Western chiropractors will join members of the California Academy of Health and the National Society of Physiotherapy in a series of lectures, contests and demonstrations designed to improve public health" during the 4-day convention.

Members of the program committee included Clarke Irvine.

888. *California Health News* (*Hollywood, California*). 1933. Carque settled in modern plant. June 30. p. 3.
• ***Summary:*** "Although Otto Carque... has a new policy of wholesale only, his standard products may be obtained through almost every health food store. His new factory and warehouse, 1315 Maple Avenue, is busy getting settled for the arduous summer's work. A record fruit pack is anticipated, he reports. The place is completely equipped, all departments laid out with room for growth, and unless the signs of the times are wrong the plant will grow fast.

"Carque came to California in 1889, at Los Angeles since 1905, where he organized his first company. He is a capable author, chemist, teacher, and has helped thousands to health with his kindly advice and intelligent, honest writing. He is the man who put over the black mission fig. Carque is an altruistic gentleman and has the good of the people at heart. 'Fifty per cent of our foods are not good for us,' he declares. 'Annually America spends over ten billions for food. Five of that is wasted money!'"

895. *Los Angeles Times.* 1933. Chapel wedding. Aug. 8.
• ***Summary:*** Miss Elizabeth Brownlee, daughter of Mr. and Mrs. J.T. Brownlee, of North Beachwood Drive and Mr. William M. Moore, son of Mr. and Mrs. C.B. Moore of Long Beach, were married on July 26, 1933. The ceremony was conducted in the Hollywood Wedding Chapel, with Dr. James Hamilton Lash officiating.

The bride wore an attractive gown of old rose pink, trimmer with darker pink velvet and a small matching fez. She carried a spray of white roses, gardenias and lilies of the valley. The mad of honor was Miss Rose Mary Moag and the best man was Boyd J. Colivette.

Note 1. According to researcher Larry Pumphrey (e-mail of 12 April 2011), the marriage record is in Marriage Book 1106, page 104. Dates–License: 18 July 1933. Wedding: 26 July 1933. Recorded: 31 July 1933.

Groom: William M. Moore. Age: 28. Place of birth: Oklahoma. Personal: white, single, 1st marriage. Address: 334 N. Normandie Ave., Los Angeles. Occupation: adjuster, Barker Bros. Father: Columbus Bell Moore, born Tennessee. Mother: Mary Thomas, born Texas. Bride: Elizabeth Brownlee. Age: 26 [sic, she was born on 7 June 1902, which would make her age 31 in July 1933]. Place of birth: Oklahoma [sic, Eau Claire, Wisconsin]. Personal: white, divorced [from Paul Bragg], 2nd marriage. Address: 2014 N. Beechwood Dr., Los Angeles. Occupation: -. Father: Joseph T. Brownlee, born Wisconsin. Mother: Elizabeth Braun, born Wisconsin. Witness: Boyce J. Colwell, Los Angeles. Witness: Rose Mary Moag, Anaheim. Clergy: James H. Lash, Congregational Minister. Married in Hollywood, California.

The 1936 Los Angeles City Directory shows William and Elizabeth living at 6855½ Los Altos Place in Hollywood. He is listed as an actor. The 1938 Directory shows only William–still at the same address. Now his occupation is listed as "announcer CBS."

896. *Los Angeles Times.* 1933. Health speaker accused in girl case by mother. Sept. 8. p. A13.
• ***Summary:*** "Charged with having committed a statutory offense against 18-year-old Betty Thompson, former high school girl, deputy sheriffs yesterday were seeking Paul C. Bragg, health lecturer.

"Mrs. Cora Thompson of 1965 Tamarind avenue, mother of the girl, asked for the complaint when she appeared before Dep. Dist.-Atty. [District-Attorney] Crail.

"According to the complaint the asserted attack occurred in Bragg's Hermosa Beach cottage in April, 1932, at which time the Thompson girl was but 17 years of age. The girl was given wine by Bragg and the couple danced to radio music,

© Copyright Soyinfo Center 2021

after which Bragg assaulted her, the girl's mother declares in her complaint. Numerous bathing parties were attended by both and several trips followed, Mrs. Thompson asserts."

897. *Los Angeles Times.* 1933. Health lecturer accused by girl in damage suit. Sept. 9. p. A2.
• ***Summary:*** "Miss Betty Thompson yesterday filed a suit in Superior Court asking $100,000 damages of Paul C. Bragg, health lecturer, asserting betrayal on the part of the defendant. The action, prepared by Attorney Harold A. Fendler, is brought in behalf of the girl through her mother, Mrs. Cora Thompson, as guardian.

"The complaint asserts Bragg promised to aid Miss Thompson in following a business career; that she allowed him to become her advisor and counselor, and later fell in love with him, a man of middle age.

"The petition further asserts Miss Thompson was induced by Bragg to go with him to his summer home at Hermosa Beach on April 13, 1932."

898. Poplawski, Stephen J. 1933. Mixing cup. *U.S. Patent* 1,927,184. Sept. 19. 4 p. Application filed 25 July 1931. 7 drawings. [1 ref]
• ***Summary:*** This looks quite like a modern blender. The electric motor inside the base, below the container, turns a "propellor [propeller] or agitator" on which are two opposed "radially extending blades" which are "bent or canted in opposite directions so as to have the proper action on the material being mixed." These blades seem to work more like those of a blender than of a milk shake mixer. However, the inventor apparently sees this as an improvement on his "Patent #1,480914, issued to me January 15, 1924," which had paddles like a milk shake mixer. No examples of uses are given. The word "blender" is never used. Address: Racine, Wisconsin.

899. *Nature's Path to Health* (*Melbourne, Australia*). 1933. Directory of health aids. Aug/Sept. p. 26.
• ***Summary:*** This is a directory of F.G. Roberts' health stores and clinics in Melbourne, Geelong, Ballarat, Adelaide, Norfolk Naturopathic College at Helmsdale (Glenelg [suburb of Adelaide]), Sydney, Newcastle, Toowoomba, Brisbane, Maryborough, Rockhampton.

Roberts describes his own work and headquarters as follows: "Victoria. Home of the Nature Cure Movement. 430 St. Kilda Rd., Melbourne. Treatments in harmony with Nature. Curative Dietetics, Osteopathy, Chiropractic, Hydrotherapy, Spinal Diagnosis, Iridiagnosis, Urinalysis, Diathermy, and Blood Washing, etc. All the latest methods of natural treatment obtainable. Experienced and qualified nurses in attendance. Herbal Foods, Herbal Pills, and All Natural Remedies Obtainable. F.G. Roberts, N.D., Principal, assisted by G.M. [Gladys Maud] Roberts and Staff."

Immediately below this listing is the following: "Melbourne. Mr. W.H.J. Willson. 40 Chapel St., East St. Kilda. A nature cure dentist. The father of preventive dentistry. Call for advice."

Examples of names of the organizations listed are: "Nature Cure Health Store" (Geelong). "Natural Health Clinic" (Adelaide). "Norfolk Naturopathic College" (Helmsdale, Glenelg). "Health Food Store" (Sydney). "Nature Cure Store" (Toowomba). "Nature Cure Drugless Clinic" (Brisbane, Queensland). Address: Australia.

900. *California Health News* (*Hollywood, California*). 1933. Otto Carque works for finer, healthier race. 1(21):1, 14. Nov. 30.
• ***Summary:*** Editor and publisher Clarke Irvine writes: "I am indebted to Otto Carque. He helped me regain my health, along with McFadden, Hauser, Marden, Lindlahr, Bragg, Ehret, Richter, and teachers of this decade. It was the benign Mr. Carque who first awoke in my drowsy mind the necessity of eating natural foods; given in poignant but brief instructions with his unsulphured, sundried fruits. He has helped thousands of others. I salute!"

Carque, who is nearing age 67, popularized the black mission fig. "This season he celebrates 25 years of health-building business, and almost one year at his new location for wholesale exclusively.

"Pioneer and staunch advocate of natural foods, he has unswervingly dedicated himself to the task of offering for public consumption foods as wholesome and undenatured as are possible to provide through commercial distribution. Otto Carque's first problem was to offer California fruits without sulphur. Apricots, pears, peaches, nectarines and white figs are usually bleached with sulphur dioxide to improve their appearance at the cost of their wholesomeness. So Mr. Carque eliminated chemical treatments and processes and devoted himself to perfecting sundrying and dehydration.

"Otto Carque's life story lacks drama–there is no period of outraging health, then a breakdown, followed by a slow, grim struggle back to health. On the other hand his story has the charm of intelligence, altruism, as well as a rare ability to apply to his being, nature's immutable laws. An idealist, a man of vision, science and practical training in commercial life, the quality and purity of the nation's food supply have always been his deepest concern.

"Otto Carque was a personal friend of the late Dr. Harvey W. Wiley, 'father of the pure food and drug act of 1906,' who often commended him for the good work he was doing. When on a lecture tour some years ago, he enjoyed the privilege of having Dr. Wiley introduce him to a large audience in Washington [DC] as one of the few men in America who practically carried out the spirit of the law.

"He attributes his health and endurance to a diet of simple, natural foods, mostly fresh fruits and vegetables, with some nuts, nut butters and occasionally legumes, whole grain and dairy products. He believes that simplicity in diet

© Copyright Soyinfo Center 2021

is the key to health and longevity; moreover that the building of a sound and healthy body and mind should only be a means to an end.

"'It enables us to more efficiently discharge our duties towards ourselves and our fellowmen,' he says."

A portrait photo shows Otto Carque, balding with white hair, a large white mustache, wearing a two-piece suit with tie and a flower on the left lapel. The caption: "He popularized Black Mission Fig."

901. *California Health News* (*Hollywood, California*). 1933. Four valuable text books given health field by Carque. 1(21):2. Nov. 30. [4 ref]

• ***Summary:*** "During the past decade the health world has benefited to the extent of four major volumes on several phases of health work by that pioneer, Otto Carque, the latest of which, 'Vital Facts About Foods,' is just off the press and reviewed by Marguerite Irvine in another column.

"All of the Carque works are now out of print except the new one, and Mrs. Carque's Recipe Book, mentioned later. Briefly, 'Rational Diet' [1923] is Carque's master work, found in libraries and on shelves of every healthman. It is more than a text book on food and nutrition, but really an encyclopedia of dietetics, in condensed form. It is a treasure-house of important dietetic information, with description and analyses of the world's principal food products, giving the amounts of various organic salts in over 200 foods. It fully explains causes of disease by a deficiency, over-supply, or wrong proportion of elements in the ever-increasing number of artificially prepared foods; and the restoration of health by a proper selection of natural foods.

"'Natural Foods' [1925] in an enlightening and readable manner, teach the new gospel of living well on less food. The prevention of disease and the maintenance of personal fitness by rational methods of eating and living are set down in a logical and authoritative way. The author showed through his thorough knowledge of the composition and effects of food, just where we unconsciously did ourselves personal injury by wrong eating habits. It includes over 200 simple and wholesome recipes and menus, together with advice on infant feeding.

"'The Key to Rational Dietetics' [1930]–This small but monumental work, a compendium of 'Rational Diet,' covers in a most exhaustive manner the mineral elements or organic salts–the missing link in dietetics; complete mineral analyses of more than 200 food products; and offers simple and wholesome menus for all seasons.

"'Mrs. Carque's Recipe Book' (still available) embodies an array of delightfully tempting fruit and nuts, as well as vegetable salads and dishes-conspicuously inviting yet simple to prepare and appealing to the most fastidious taste."

902. *California Health News* (*Hollywood, California*). 1933. Carque factory supplies quarter million customers. 1(21):6. Nov. 30.

• ***Summary:*** "Where does the United States get its health foods? Automobiles [come] from Michigan... but it remains for California to supply the major portion of health foods, and one of the chief sources is the new and modern plant of Otto Carque, 1315 South Maple, Los Angeles.

"This large plant fills a genuine place in the life of every health-seeker. Over 250,000 customers... known the country over for nearly a quarter of a century as a purveyor of nature's best, free from preservatives, and above all, untampered with.

"It is a pleasure to visit this hustling place these pre-holiday times, where daily shipments go forth worldwide. In the fruit room is kept tons of unsulphured, sundried fruits, from California's best orchards. A dehydrator adjoins, whose chief function is to take up surplus moisture of the fruits, as well as to render nuts more crisp, and thus by the absence of moisture insure their more ready flow through the nut butter mills.

"Only thorough mastication can make available all the fine food value of nut meats. Hence the Carque mills break up every particle, producing nut butters that permit one to enjoy the enticing flavors of nature's finest concentrated food reduced to a consistency that is easily assimilated.

"In the mill room are several machines that grind fruits and flake nuts for various purposes. Nearby are mills for making fresh daily whole-grain flours. Here is manufactured Carque Wheatose (ready-to-eat) breakfast food, toasted crumbles of wheat, fruit, honey and carob meal; also Lax-a-Meal, a breakfast food requiring cooking-a pleasing combination of selected whole grains, flaxseed meal and agar.

"And now we see Carque's Fig Cereal (coffee substitute) prepared, a blend of unsulphured figs and barley malt combined into a distinctly coffee-like beverage. In this department is also blended Carque True Vita Sal, a salt-free salt substitute, possessing dehydrated pulverized vegetables and Pacific kelp; also Carque's Colon Food–a blend of lactose and dextrin designed to inhibit the growth of harmful bacteria and to promote friendly bacteria in the intestines.

"Here too, are blended various aromatic alkalinizing herbs, in Carque Laxative Tea, promoting regularity; as well as Carque Herbal Health Tea, Alfamin Tea, Peppermint and Strawberry Teas-all neutralizers of acidity.

"Carque Mayonnaise is made here from fresh eggs, a good salad oil and wholesome spices.

"On numerous tables adjoining the mill are poured huge batches of health candy, raw sugar and honey only, to be wrapped into bars; also bulk fruit, nut candy, chocolate covered, for the holiday trade. Discriminating consumers find in Carque Confections both a delicious candy and true food, containing, as they do, unrefined sugar, honey, wholesome nut meats, in combination with unsulphured fruits and natural flavors.

© Copyright Soyinfo Center 2021

"Beautiful Yuletide fancy fruit packs for Christmas merchandising are in evidence, all artfully designed and daintily packed–brimful of California's loveliest.

"The shipping and packing divisions are busy centers; men and women are industriously engaged in packing and weighing foods for shipment to fill the thousands of orders from every corner of the United States, and even abroad.

"There is also a large storage room in the rear containing not only Carque finished goods, but many jobbing specialties which Otto Carque recommends and endorses for human consumption, such as Gud Fud Soy Bean line, Custo Agar Gelatines and Puddings, Vegetrate, Bonwheat, and many other preparations well known in health food stores. Bulk foods such as agar, sea lettuce, Pacific kelp, unfermented and unsweetened fruit juices, raw sugar, whole brown rice, and similar whole foods, are continuously stocked.

"Executive and administrative details are carried out with precision from the spacious offices in front. The entire plant pervades the sincere expression and spirit of Otto Carque, California's health food pioneer, who has made the study of dietetics his life work, and who is determined to offer for human consumption only wholesome, undenatured foods."

Photos show: (1) The front of the plant with employees standing below the large sign that reads "Otto Carque Natural Foods." (2) Workers packing foods at tables inside the plant.

903. Irvine, Marguerite. 1933. Otto Carque publishes masterful health work. *California Health News* (*Hollywood, California*) 1(21):3. Nov. 30. [1 ref]
• ***Summary:*** Otto Carque's new book, 'Vital Facts About Foods,' covers the food question in all its aspects, and, particularly one branch of food chemistry which has not hitherto received the attention it deserves, and which Mr. Carque calls the missing link in dietetics. He says, 'the mineral elements, or organic salts, are of prime importance for well-balanced nutrition. They are most essential for the proper physiological functions and normal growth of the animal and human organism; they really are the 'building stones of the body.'

"This book contains analyses of 250 food products, specifying the mineral elements, and should prove invaluable to students and teachers of 4 dietetics. It embraces the latest scientific findings in the prevention of disease and the prolongation of life by rational methods of eating.

"Mr. Carque is an idealist, who has always worked for the betterment of humanity, at no little sacrifice to himself. Believing that sane and natural diet is a most important factor in building a happier race, he has contributed largely to the spreading of useful knowledge along these lines, this being the fourth volume to his credit.

"He is recognized as one of America's leading dieticians, having devoted the greater part of his life to research and study of food-chemistry and nutrition, and their practical application in everyday life. 'Vital Facts About Foods' contains all of this information in simple language, with the addition of balanced health menus and recipes for all occasions, and should be used in every home.

"It sells for only $1 paper, or $1.50 cloth cover, postpaid, and may be purchased through the California Health News, health food stores, or popular bookstores.–M.I."

904. Lavender, Grace. 1933. Carque idealism builds vast California business. *California Health News* (*Hollywood, California*) 1(21):10, 7. Nov. 30.
• ***Summary:*** "Otto Carque's interest in the food question developed early in life, when he recognized the inadequacy of prevailing methods of cultivating food products and of artificially preparing them for the table. For over 30 years, both in Europe and America, he has been a close student of the laws of diet and health, his publications on the subject enjoying widespread distribution.

"Mr. Carque fervently believed that one of the most essential factors in promoting health and personal hygiene is the quality and purity of our food supply. Hence for more than a quarter of a century he has continuously offered for public consumption foods as wholesome and undenatured as are possible to provide through commercial distribution. In his ardent food reform activity he clearly and forcefully exposed the hidden dangers that lay in the ordinary and apparently harmless foods, which unfortunately have become staple products the world over.

"Having lived in California for over a quarter of a century, Otto Carque has seen the Golden State rise to international importance as a producer of the world's finest fruits. Recognizing that fruit should be an essential part of the rational dietary because of high alkalinity, he paid special attention to its preparation without preservatives. Hence Carque's unsulphured fruits and his many other products are known throughout the world.

"That is why Carque's Natural Foods of California are so popular, for behind them is the intelligent and trustworthy dietetic knowledge of Mr. Carque. A business organization has, moreover, been painstakingly built up, where pervades the spirit of food reform–where heart and interest are zealously working towards attainment of the highest quality and purity.

"In 1923 Mr. Carque crystallized his vast knowledge into a masterful work, 'Rational Diet,' his first book, with his later ones, described elsewhere, and today is looked upon as an authority on health foods.

"It may not be entirely amiss to inject a little romance into Otto Carque's industrial history. On a lecture tour in 1926 he went to New York City and there met his wife, Lillian. Mrs. Carque subsequently came to California, married Mr. Carque [on 6 Nov. 1926], heretofore an

© Copyright Soyinfo Center 2021

inveterate bachelor, at his maturely ripened, yet youthful, age of 61. He considers this the most important event in his career, ardently maintaining that 'the cosmic forces brought us together at a time when the world was ready to receive a much needed message.' To quote John Ruskin, 'When love and skill unite, expect a masterpiece!'"

A large photo shows many Carque products.

905. Modern Health Products. 1933. Swiss-Kriss, Nu-Vege-Sal, Correcol, Vitana, Meatless, Bouillon, Slim, Nutro-Links (Ad). *California Health News* (*Hollywood, California*) 1(21):3. Nov. 30.
• ***Summary:*** "California distributor. Edward Higgins, 133 N. Ave. 50, Los Angeles, California."

Note: This is the earliest document seen (Sept. 2004) concerning Modern Health Products in Milwaukee. In the upper right corner is the symbol of the NRA (National Rifle Association), with the slogan "We do our part." Address: Milwaukee, Wisconsin.

906. Ainsworth, Ed. 1933. Along El Camino Real. *Los Angeles Times.* Dec. 13. p. 10.
• ***Summary:*** "Bill Baker, the lima bean baker of Ojai," has been working on his Christmas cake for President Roosevelt since last June. The theme is "Along El Camino Real." Describes in detail how Baker designed and made the cake and its decorations. "Every ingredient is California's finest."

When Baker came to American from Germany more than 40 years ago, he could neither read nor write English. But he had ambition–and integrity. He is also "simple, kindly, practical. I guess, too, he's the only baker in the world who is kind to mice. He even furnishes the material [old newspapers] for them to build nests between his flour sacks."

907. *Los Angeles Times.* 1933. Giant cake going to Roosevelts: Bill Baker models El Camino Real missions in sugar. Dec. 13. p. 10.
• ***Summary:*** Ojai, Dec. 12.–The huge fruit cake, weighing 110 pounds with a California mission motif (9 missions are reproduced in exact miniature), was made by "Bill Baker, the lima bean baker" of Ojai. "Every ingredient is produced within a radius of 100 miles of Ojai–raisins, flour, sugar, everything"–even lima bean flour. The cake leaves Ojai tomorrow "with a special guard provided by the American Express Company." "Even a tiny N.R.A. [National Rifle Association] sign is included" in the cake's design. A large photo shows Miss Sophie Kosub of Ojai with the giant cake.

908. Carqué, Otto. 1933. Vital facts about foods: A guide to health and longevity with 200 wholesome recipes and menus and 250 complete analyses of foods. Los Angeles, California: Published by the author. 208 p. Index. 24 cm. [20+* ref]
• ***Summary:*** This manual of food reform discusses the importance of a simple vegetarian diet of natural foods, sunlight and sunbaths, fresh air, pure water, exercise and rest. Also talks about acid and alkaline foods, the influence of mind on health, the failure of synthetic foods, why refined sugar is injurious, the dietetic value of sea plants, table salt is unnecessary and harmful, fruit is man's best food, sulphured and unsulphured fruits, nut butters, food preparation, and the treatment of disease.

"Dedicated to my dear wife, Lillian, who through her sincere and earnest spirit of cooperation has greatly assisted the author in his work of food reform."

The germ theory of disease has not been proven since potentially harmful germs are omnipresent yet often fail to harm healthy individuals (Pasteur was a chemist and laboratory worker, not a physician. Germ action is always secondary; "when germs invade a living organism it is a sign that the organism is enervated and its chemistry perverted." p. 114-15).

The section titled "'Meat substitutes' not essential" (p. 130) states: "Those persons who want to adopt a meatless diet should not look for artificially prepared meat substitutes as a source of protein. A food constituent required in such a limited amount as protein is easily supplied by the various products of the vegetable kingdom. Such combinations as 'roast vegetable turkey' or 'vegetarian steak' seem to be the result of the belief that meat is a necessary food and must be replaced in some form. Indeed, vegetarians, who live largely on foods in which the protoplasmic cells have been more or less disorganized by prolonged cooking, have very little advantage over mixed eaters.

"All other factors being equal, a judiciously selected meatless diet is far more conducive to health than the usual mixed diet, consisting, for the most part, of animal and starch-bearing foods deficient in alkaline elements. We should understand that the proteins of fruits and vegetables, supplemented by a small amount of the proteins of nuts, legumes (especially soy beans), or dairy products, are fully able to maintain health and efficiency. It is entirely feasible to live on an exclusive diet of fresh ripe fruits and green-leaf vegetables for many weeks and months, thereby purifying the blood and greatly improving the keenness of our senses. In fact, in many pathological conditions such a restricted diet is more helpful than an absolute fast.

"Among the legumes which contain a large amount of protein, the soy bean takes first place. Its protein content, nearly 40%, is higher than that of any other food. Moreover, this protein is of excellent quality, as valuable as the casein of milk; it contains all the essential amino acids. It contains a sufficiency of vitamins A and B, and in this respect it is superior to all seeds. It contains very little carbohydrate, only about 6%, and is practically free from starch. The soy bean fills the place of meat as well as milk in the dietary of many millions of sturdy Orientals; it is destined to become one of the great food staples, not only of this country, but of

© Copyright Soyinfo Center 2021

the world. A number of recipes for the preparation of the soy bean are given in Chapter XXI."

The section titled "Fruit and nut confections" (p. 133-35) begins: "Fruit and nut confections made without refined sugar and glucose should take the place of candies." These "sweet-meats"... "should be the only kind of confections allowed to growing children, which have a natural craving for sweets." Recipes include stuffed dates, date caramels, nut fruitose, carob confection, raisin-nut balls, and honey cocoanut balls. For Nut fruitose: Mix dates, figs, raisins, almonds and walnuts. "Run through a food chopper twice. Press the mixture into a flat pan in a layer about 1 inch thick, let stand overnight, and cut into convenient sizes." Note 1. Carque was a pioneer in the development of healthy, natural treats. The last recipe could be considered a forerunner of the less-healthful "nutrition bar" of the 1990s.

The next section, titled "Nuts and nut butters," states that "salting and roasting greatly impair the nutritive value of nuts and prevent their proper assimilation. The proteins become coagulated by roasting, and the fats split into glycerine and free fatty acids, while the vitamins are destroyed. Nut butters made from salted nuts should, therefore, have no place in our dietary." Rather, the peanuts or almonds should be blanched (scalded or parboiled in water or steam). "Since few people, on account of defective teeth, can masticate nuts well enough to be acted upon by the digestive juices, the mechanical emulsification of nuts by means of nut butter mills is quite dispensable."

The section titled "Melba toast" and "Melbettes" (p. 156) states: "These are delicious dextrinized whole wheat products made by the Cubbison Cracker Co., Los Angeles." Melbettes are also made from whole rye. "Calavo Melba Toast is another tasty whole wheat product; it contains the natural fruit fat of the California Avocado or Alligator Pear as shortening."

The section titled "Natural whole rice" (p. 156) notes: "Whole rice, also called brown rice, contains the bran, cuticle, and germ of the cereal. In milling nothing has been removed but the husk and dirt."

The section titled "The Soy Bean, a Remarkable Food" (p. 158-61) discusses boiled soy beans, soy bean milk, tofu ("it is called by the Chinese 'the meat without a bone...'"

Note 2. This is the earliest English-language document seen (Aug. 2016) that refers to tofu as 'the meat without a bone.'

"Other preparations of the soy bean, which are but little known in this country, are *natto, hamananatto* [*hamanatto*], *Yuba* and *Miso*. The principal use of miso, which is a slightly [sic] fermented mixture of soy beans and rice or barley, is for making soups and for cooking vegetables"), soy sauce, soy bean sprouts, and various recipes.

Under "Boiled soy beans" we read: "The dry beans are best soaked in soft water over night or for at least 20 hours and then cooked with sufficient water in a waterless cooker or Pressure cooker until tender. This may require as much as 2 hours or more, according to the variety of beans used. The best results are obtained if the beans are allowed to simmer rather than boil quickly. Onions, tomatoes, celery, parsley and other seasoning vegetables increase the palatability of the soy bean. A fireless cooker may also be used in preparing soy beans for the table."

Under "Ready made soy bean products" (p. 161) we read: "As the preparation of the soy bean in the average household is often not convenient, the author has arranged to supply the following products at reasonable prices: Canned Soy Beans, Soy Bean Spread, Soy Bean Stew, Soy Bean Loaf, Soy Vegetable Onion Soup, Soy Bean Vegetable Bologna, Soy Bean Tasty Lunch, to which others will be added in the course of time. These products have met with ready approval, as they fill a long felt want for tasty, nutritious and wholesome vegetable protein foods to substitute meat and dairy products."

The author's signature appears at the end of the Preface. Address: Los Angeles, California.

909. Finkel, Harry. 1933. Seven day trial on natural food diet... containing a week's recipes and menus for breakfast, lunch and dinner. Also natural food sandwiches and health drinks. 1st ed. Los Angeles, California: Society for Public Health Education. 182 + [9] p. Recipe index.

• ***Summary:*** This "2nd ed." appears to be quite similar to the first edition, published the same year with the same number of pages. However some of the unnumbered pages at the rear are different.

A handwritten inscription on a blank page near the front reads: "March 22, 1934. To suffering humanity.

"Health is not an accident. Normal physiological conduct depends on the hygienic and dietetic habits of the individual.

"Nature's laws in relation to health and disease are infallible. Man abuses these laws and suffers disease.

"Natural foods only when properly prepared and combined hold the key to the solution of a healthy humanity.

"Hail–Hail–Hail–to a healthy and civilized humanity!!!

"With compliments from Dr. Harry Finkel, to the University of California at Berkeley."

Contents include: What is meant by natural foods (p. 154). The story of the health food store (p. 155-57). Explanation of general health foods catalog (p. 158-60; incl. Graham flour, soya bean flour, Carque's Wheatose, soy beans, Nut butters {almond, peanut, pecan, cashew, cocoanut}, Carque's mayonnaise, unsulphured dried fruits, meat substitutes {Protose, Nuttose, Nuttolene, Vita Meat, Savory Loaf, Nut Meat, Soya Loaf, Meatless bouillon cubes}, miscellaneous {health candies, carob meal, vegetable gelatine, agar–sea weed gelatine, St. John's bread, poppy seeds, sesame seeds}). How to prepare and cook natural foods (p. 161+; "It is said that because fruits and vegetables

© Copyright Soyinfo Center 2021

have been sprayed with poisons to destroy the insects which infest them, their outer coverings should be removed before eating... if one will wash and scrub them very thoroughly, the danger of being poisoned is removed,...”). The soya bean (p. 178-82).

Concerning the acid and alkaline reaction of the human body. Recently scientists concluded “that the normal or ‘mean’ of this condition should be fixed at the ratio of 80% alkaline and 20% acid. It is now definitely known that a deficiency in the alkaline reserve, or a marked increase in the acid content leads to many serious diseases.” Refer to “Finkelgram No. 26 (A short thesis on acidosis)” to become familiar with the acid and alkaline reactions of various foods.

It “is very fitting to introduce one of the best foods Nature grows for mankind–the Soya bean. Because the Soya bean is practically starch-free, it is not only acid-free but is also one of the greatest aids in neutralizing an existing acid condition of the body and in maintaining the 80-20 balance of the two physiological conditions known as acid and alkaline reactions.

“Of late, scientists have made and extensive study of this unusual type of natural food, and after making many experiments upon human beings in various stages of health and disease, pronounced the Soya bean one of the best foods of the vegetable kingdom. This they have concluded because of its very high percentage of protein which is by far superior to all animal protein, and also for the reason that it is in a form which is easy of digestion and assimilation. Besides being practically free from starch, they consider it one of the best foods for the human body, and find that it can very satisfactorily take the place of meat in the diet of man.

“The protein content of the Soya bean is nearly twice the amount of the average run of meat, and the remarkable feature of this unique food is that while it ranks extremely high in protein substance, yet its toxic properties are insignificant compared with the large amount of toxic properties all animal foods contain.”

“Like many of the leading scientists who believe in the great food value of the Soya bean, so does this author share the same opinion. It is for this reason that he desires to familiarize the public with the many advantages of this nutritious and valuable food.

Health through eating lies mainly in three directions: First, in selecting natural, wholesome foods; second, in preparing them properly; and third, in arranging meals in which the foods are properly combined.

The following 10 menus are examples giving you an idea as to how to balance your meal using the various soya bean products. These menus are appropriate for either lunch or dinner as each of them is sufficient for a full course meal.”

“Soya bean menus.” These are not recipes, but menus for individual meals, each of which includes a soy recipe. The first, for example, reads: “Soya vegetable-onion soup. Finkel baked potatoes. Red cabbage, apple, and raisin salad with mayonnaise dressing. Sewed prunes. Cereal coffee. No bread.”

“Soy beans are mentioned on page 74. Ads on unnumbered pages in the rear: Page 2. “Carque–Natural Foods of California: The symbol of trustworthy and unimpaired natural foods. Wheatose. Almond butter. Otto Carque. Established 1908. California’s natural foods pioneer. 1315 S. Maple Ave., Los Angeles, Calif. Endorsed by the Society for Public Health Education.”

Page 3: Hollywood Cup, Inc., The perfect coffee substitute. 823 Traction Ave., Los Angeles, Calif. Four pages of ads for books by Dr. Harry Finkel. Address: N.D. [doctor of naturopathy], D.C. [doctor of chiropractic] [Los Angeles, California].

910. Morse, W.J. 1933. Soybeans now a major crop in United States; Few grown before 1898. *Yearbook of Agriculture* (*USDA*) p. 198-205. For the year 1933.

• ***Summary:*** Contents: Variety adaptation. Variety utilization (incl. bean curd, bean milk, soy sauce, miso (bean paste), bean sprouts, green vegetable beans, bean flour, roasted beans, bean confections [made using roasted whole soy flour], beverages, oil and meal, special fermented bean products). Soybean oil and meal industry. Soybean meal. Soybean oil. Soybeans for human food. Soybeans as an export crop.

Introduction: “Introduced into the United States in 1804, the soybean has risen gradually from the status of merely a curiosity from the Far East, and from the lowly place of a substitute and emergency crop, to a position of considerable economic importance in American agriculture and industry.

“Variety adaptation: Prior to the introduction of numerous varieties by the United States Department of Agriculture in 1898, not more than eight varieties of soybeans were grown in the United States and the culture of these was limited to a few sections... The Virginia, Laredo, Manchu, and Biloxi have a greater range than most other varieties. The Virginia, Mansoy, and Harbinsoy varieties excel on the less productive types of soil, while on better soils the Mansoy and Harbinsoy give inferior results.

“Since the Department of Agriculture began to introduce soybean varieties more than 7,000 samples of beans have been collected from Japan, Chosen [Korea], Manchuria, China, Taiwan (Formosa), Java [in today’s Indonesia], Sumatra, and India. There are more than 2,000 distinct types in this large collection, ranging from 75 to more than 200 days in reaching maturity. At present about 40 varieties are generally grown in the United States.”

“In Japan, where the soybean is used extensively as a green vegetable, more than 60 varieties, ranging in maturity from 75 to 160 days and differing in flavor, are grown solely for this purpose. The soybean in used in the United States primarily as forage, being preserved either as hay or silage, or cut and fed green as soilage, and is also pastured

© Copyright Soyinfo Center 2021

extensively with hogs and sheep."

"Soybeans for human food: In Asiatic countries the soybean is grown primarily for the beans, which are used largely in the manufacture of numerous food products that supply the principal source of protein in the Asiatic diet as that in the diet of western people is furnished chiefly by meat and dairy products. "Oriental people use very few dairy and meat products, yet for many centuries they have lived on an apparently well-balanced diet of which the protein is derived largely from the soybean.

"The most commonly used soybean foods in the Orient are soy sauce, miso or bean paste, bean curd, bean milk, bean flour, roasted-bean confections, green-vegetable beans, bean sprouts, roasted bean flour, boiled beans (with rice, millet, or sorghum), coffee substitute, and health drinks made from roasted soybeans.

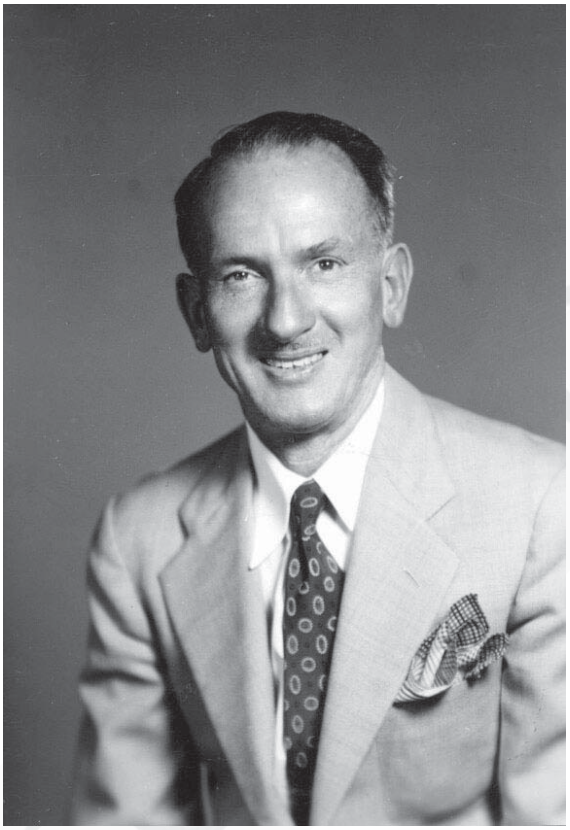
"In the United States the soybean and its products have attracted attention as an article of food at various times, but only within the last three or four years have there been any extensive investigations along this line by commercial interests. Soybean flour, made by grinding either the whole bean (preferably yellow-seed varieties) or the press cake after the oil has been removed from the beans, is finding increasing favor in the manufacture of various products, such as malted milk, macaroni, vermicelli, spaghetti, noodles, crackers, cookies, ice-cream cones, breakfast foods, health foods, diabetic foods, and infant foods. Within the last year several large baking companies have began using 15 to 20 per cent of soybean flour in making bread and cakes." Address: Bureau of Plant Industry, Washington, DC.

911. Photographs of Clarke Irvine, founder, editor, and published of *California Health News.* 1933. California.

• ***Summary:*** These seven black-and-white photos (each about 3 by 4 inches) were sent by Alice Irvine, Clarke's second wife. In most photos Clarke is dressed in a coat and tie, and has a small moustache. (a) Clarke as a baby, 3 months old. Salem, Oregon. (b) Clarke in his '30s, Excellent. (c) Head to waist shot of 3 men standing together. L-R: Clarke, editor Hamilton, Mr. Pierce, inventor of the slant board. (d) Clarke and Alice on honeymoon in Las Vegas, Nevada, 1946. They are standing on opposite sides of a

saddle. A sign on the wall above 2 guns reads: "These are some of the guns that were used by Kit Carson's men while fighting savage Indians." (e) Portrait of Clarke in his late '40s with handkerchief in pocket. (f) Clarke in his '50s. (g) Clarke standing with Dr Maxwell. Clarke is wearing an open-collar shirt and white shoes. Dr. Maxwell has a white beard, is dressed in a coat and tie, and is holding a hat.

912. Soya Foods Ltd. 1933. Soyolk: The most highly concentrated natural food. Springwell Lane, Rickmansworth, Herts., England. 20 p. 18 x 12 cm.



• ***Summary:*** At the top center of the cover is a circular yin-yang symbol. Contents: Comparative analysis of principal flours in everyday use (% composition): Soyolk, finest wheat

© Copyright Soyinfo Center 2021

flour, rye flour, oat flour, maize flour, bean flour, pea flour. Note: Soyolk is by far the highest in calories, protein, and fat.

Soyolk ("It was only after years of research that the Soya Bean, thanks to the use of a special non-chemical process, yielded 'Soyolk,' a fine ivory coloured powder").

Soyolk: An ideally balanced food ("It must be specially emphasized that 'Soyolk' contains far more of the most expensive form of nourishment, protein and fat, than such

© Copyright Soyinfo Center 2021

costly foods as beef and eggs themselves"): Vitamins, proteins, fat, carbohydrates, starch, ash, lecithin, analysis by H.B. Cronshaw, London.

The uses of "Soyolk." Bread (as a yeast food and bread improver, 1½%). In brown bread and wholemeal breads (5-7½%). Soyolk bread (22%). Soyolk in cakes and confectionery (5-10%). Puddings. Porridge, oatmeal and breakfast foods (15-30%). Invalid and health foods. Baby foods. Vegetarian foods. Diabetic food. Tuberculosis. Minced meats, meat and fish pastes. Sausages. Chocolate. Cocoa. Hospitals, Sanatoria, etc. Competitive soya flours and meals. Table: Bar chart: Comparative table of cost of 1000 calories of the most current foodstuffs. Address: Rickmansworth, Herts. [Hertfordshire], England. Phone: Rickmansworth 468.

913. **Product Name:** Cubbison's Soy Melba Toast (Thin Toast Containing Soy Flour), and Soya or Soy Bean Toast. Called Cubbison's Soya Toast from July 1940 to 1947, then Cubbison's Melba Wheat Soya Toast by July 1951.
Manufacturer's Name: Cubbison Cracker Co.
Manufacturer's Address: 3417-3419 Pasadena Ave., Los Angeles, California.
Date of Introduction: 1933?
Wt/Vol., Packaging, Price: 4 oz. Cellophane package.
New Product–Documentation: Jones Grain Mill Natural foods catalog. 1933? p. 55. "Soy Melba Toast–1 lb. 30¢. House of Better Living Catalog. 1938. March. p. 13, 16, 22. $0.25/lb.

Eat For Health (Rosenberg's, San Francisco). 1940. Spring. p. 8. Cubbison's now makes "Soya Melba Toast."

Ad and short article in *Health News* (Los Angeles). 1940. July 26. "Cubbison's Soya Toast."

D.S. Payne. 1943. The story of soya products. Dec. p. 16. "In the cracker and cookie field, soya products have had a rather sensational acceptance all over the country." The Cubbison Cracker Co., Los Angeles, California, sell Soya Toast.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 4. Soya Toast contains 20% soya; it has national distribution.

Taylor. 1944. Soy Cook Book. p. 201.

Soybean Blue Book. 1947. p. 70. "Cubbison's Soya Toast." Safeway ad in *Los Angeles Times.* 1947. June 18. p. 6. "Cubbison Soya Toast. 7-oz. pkg. 17¢."

Soybean Digest. 1951 "Cubbison pushes soy on West Coast." July. p. 20, 22. "Typical of these [West Coast] companies is the Cubbison Melba Toast and Cracker Co. of Los Angeles, headed by the aggressive and sales-minded Miss Sophie C. Cubbison... Cubbison's popular Wheat Soya Toast" is rich in soy flour, which makes it high in protein and "helps alkalize the wheat starch." The slow toasting process converts the starch to dextrines, which are more easily digested and assimilated. "It is packed 24 pieces to the tray, wrapped in printed cellophane." A photo shows a package of Cubbison's Melba Wheat Soya Toast. Printed diagonally on the front panel: "Toast of the Nation."

Glossy undated black-and-white photo (8 by 10 inches) of package, with ingredients partly legible, sent by Leo Pearlstein. Probably taken in the early 1950s.

914. Madison Food Co. 1933? Madison soy cheese. Madison, Tennessee. 6 p. Undated.
• ***Summary:*** Contains a brief introduction to tofu with 8 American-style tofu recipes. "The principal protein of the Soybean is much like the protein casein of milk, and when the bean is properly treated a milk quite comparable in appearance, taste, and food value can be manufactured from it. From this milk, when allowed to become acid, or when a slight amount of a precipitating agent is added, a cheese can be prepared in consistency much like cottage cheese. This vegetable cheese (tofu) has been one of the principal articles of diet in the Orient for many centuries.

"In order that the people of America may have this most important food as an article of diet, a method of manufacturing and preserving has been perfected at the Madison Food Factory.

"For several years it has been used as a daily article of diet in the Madison Rural Sanitarium, Nashville Vegetarian Cafeteria, and many other Good Health places. It has proven its value as a diabetic food, and as a splendid meat substitute."

Tofu recipes include: Soy cheese salad. Stuffed egg with soy cheese. Tomato soy sandwich. Soy sandwich filling. Soy croquettes. Soy cheese loaf. Soybean omelet. Soybean cutlets.

On the back panel is a list of "Health foods manufactured and distributed by Madison (Sanitarium) Food Company, Madison, Tennessee: Nut Meat, Vigorost, Peanut Butter, Fruit Sticks, Sterilized Bran, Psyllium Seed, Cereal Drink, Soy Flour, Soybeans (Dry), Malta (Malt Syrup), Soy Fruit Crackers, Soybeans (Canned with Tomato Sauce), Madison 3 Minute Breakfast Wheat, Sanitarium Baked Beans, Steamed Whole Wheat, Malted Breakfast Crisps, Whole Wheat Fruit Crackers, Sweetened Whole Wheat Crackers, Soybeans (Canned Plain), Soy Cheese (Bean Curd), Madison Fruit Candy, Regulose (composed of Lactose and Dextrine). Write for descriptive literature."

Note 1. The company is now named "Madison Food Company."

Note 2. Many of Madison's publications about its foods are undated; this makes it very difficult to determine when a specific food was first made and sold commercially. Address: Tennessee.

915. *Los Angeles Times.* 1934. Bragg funeral set for today. Jan. 13. p. 6.
• ***Summary:*** Hermosa Beach, Jan. 12.–Caroline J. Bragg

© Copyright Soyinfo Center 2021

(of this city), mother of health lecturer Paul's Bragg, died Wednesday at age 68. Funeral rites will be conducted tomorrow (Jan. 14) at the Wee Kirk o' Heather, Glendale, at 2 p.m. "Interment will follow in Forest Lawn Memorial Park, with funeral arrangements in care of the Forest Lawn mortuary." She is survived by her husband, Robert E. Bragg, and four sons, "Paul C. Bragg of Los Angeles, John H. Bragg of 1837 North Alexandria avenue, Hollywood; James E. Bragg of New York City and Rufus A. Chappins (Chappius?) of Lancaster, Ohio."

916. *Naturopath and Herald of Health* (*New York City*). 1934-1944. Serial/periodical. Published in New York City by Benedict Lust, M.D. of the American Naturopathic Association.

• ***Summary:*** See next page. Preceding title: *The Naturopath.* This is Lust's professional magazine; *Nature's Path* is his popular magazine.

The bottom of the title page (Jan. 1934) begins: "A monthly magazine devoted to Naturopathy, the art of Natural Healing, and the Science of Physical and Mental Regeneration on the basis of Self-Reform, Natural Life, Clean and Moral Diet, Hydrotherapy (Preisznitz, Kneipp, Bilz, Kuhne and Just Systems), Osteopathy, Chiropractic, Mechano-Therapy, Heliotherapy (Sun, Light and Air Cure), Diet, Phytotherapy, Physical and Mental Culture.

Subscription per year $5.00 to all parts of the world, single copy, fifty cents; back copies of 'Naturopath,' 1902 to 1927 per volume, cloth bound, $10.00. Back volumes 'Nature's Path.' 1925 to current per volume, cloth bound, $6.00."

Note: This magazine was not published from June 1927 to Dec. 1933. This title starts with Jan. 1934 (Vol. 33, No. 1). This magazine is now published in a larger 8½ by 11 inch format, with fewer issues per issue and per volume.

Kirchfeld & Boyle. 1994. p. 208. The "Naturopathic Societies were served by *The Naturopath and Herald of Health*, which became the official publication of the American Naturopathic Association." Note that this periodical had this title previously from 1902-1915.

Note: The National College of Natural Medicine (NCNM in Portland, Oregon) has an excellent set of this magazine. Address: 236 E. 35th St., New York City (in Jan. 1934).

917. *Los Angeles Times.* 1934. Letter on life evidence in suit. Jan. 24. p. A12.

• ***Summary:*** "'Life doesn't always work out the way we want it to; it's always the unexpected that happens–and, after all, it's the unexpected that gives us the big thrills of life,' read an excerpt from a letter assertedly [allegedly] written by Paul C. Bragg, health lecturer, to 18-year-old Betty Thompson, musician, which became a part of the evidence in her suit to compel him to pay $100,000 damages.

"The case is proceeding before a jury in Superior Judge Sproul's court."

918. *California Health News* (*Hollywood, California*). 1934. Pioneer Otto Carque honored at well attended health banquet. Jan. 26. p. 10.

• ***Summary:*** "In tribute to Otto Carque for his noble work in teaching the science of natural living and laying the foundation so that it may become universal knowledge, this great emancipator was the guest of honor at a unique health banquet January 12, at Health Cafeteria, 217 West Sixth [St., Los Angeles]. The affair was sponsored by Charles Heiser of the Cafeteria, who introduced the master of ceremonies, Clarke Irvine. Over 200 attended, many be presented by the chairman, all offering testimony and appreciation of Carque and his work.

"After a pleasing introduction by his friend Dr. Philip Lovell of the [Los Angeles] Times, Carque spoke brilliantly in his usual beaming style, pointing to the great work accomplished by the health movement recently.

"'For the past 25 years,' Carque said, 'mankind has gone through severe historical upheavals which have laid the foundation for the awakening of a higher spiritual consciousness. A great step forward has been made in the advancement of civilization which will be put down in the history of mankind. I believe that the next 25 years will bring the fruits of our suffering and deprivations. This health movement has played a great part in the awakening of mankind and it should give us more power, mental and spiritual, to carry on further.

"'In order to perform this great work we must have healthy bodies; the closer we live to nature, the simpler food we eat, and the finer physical bodies we create, the sooner will we realize our dream of a greater and better civilization. Political and economic strife will be a thing of the past. Mankind will join in Universal Brotherhood and the instruments of war will be shown in the museums as relics of the past. (Applause.) I believe that the health movement has laid the foundation for this newer civilization.'

"From a digested report of the testimonials it appears that Otto Carque perfectly embodies the great spiritual teachings of the masters in his superb kindliness and love for humanity. He is an idealist, a profound thinker and his fame is not only local, he is known throughout the world for his illustrious work. Several splendid books stand to his credit.

"Mrs. Lillian Carque, who received much credit for her devoted efforts in assisting and inspiring her husband, asserted how much more delightful it was to see him being honored for his splendid work now, instead of after he passes, as is so often the case with celebrated men."

919. *Los Angeles Times.* 1934. Rows with girl over her mother cited by doctor. Jan. 26. p. A9.

• ***Summary:*** The self-proclaimed "doctor" is Paul Bragg.

A $100,000 suit has been brought against "Dr. Paul Bragg, health lecturer and author," by pretty Betty Thompson, age 18 and a musician. When Bragg took the witness stand yesterday in Superior Judge Sproul's court, "he explained his romance was terminated through Miss Thompson's quarrels with him over her mother, Mrs. Cora Thompson.

"Dissension first arose between them in 1933, following their trip to New York via the Panama Canal, when Miss Thompson insisted that he send for her mother, he said." The trial will resume tomorrow.

Note: This is the earliest document seen (April 2010) in which Paul Bragg refers to himself as a doctor–"Dr. Paul Bragg." Of what is he a doctor? And where did he earn his degree.

920. Lust's Health Food Bakery, Inc. 1934. Lust's Almond Butter (Ad). *Naturopath and Herald of Health* (*New York City*) 33(1):28. Jan.

925. *Los Angeles Times.* 1934. Retrial of $100,000 suit by girl set. April 2. p. A3.
• ***Summary:*** The original $100,000 lawsuit for betrayal brought by Betty Thompson against Paul C. Bragg, health lecturer, ended 6 weeks ago in a hung jury. The retrial is to take place today in Superior Judge McComb's court.

926. *Los Angeles Times.* 1934. Trial of damage suit against Bragg opens. April 4. p. A8.
• ***Summary:*** Retrial of the $100,000 damage suit brought by Betty Thompson, age 18, against Paul C. Bragg, health lecturer, got underway yesterday in the court of Superior Judge Smith. "Miss Thompson asserts betrayal. Bragg denied her assertions. The trial is expected to end today."

927. *Los Angeles Times.* 1934. Sprightly costume dance to

© Copyright Soyinfo Center 2021

flavor tea (Photo caption). April 5. p. A6.
• ***Summary:*** This photo shows two lovely young ladies fashioning sheer gowns with plunging necklines. The lower caption reads: "At a tea to be given this afternoon by Elizabeth Arden at the Ambassador [Hotel] honoring Dr. Bengamin Hauser of Vienna, a feature of the entertainment will be a dance in costume by Misses Ruth Piper and Jane Frances Mullen, two members of the Southland Society. These debutantes are pictured in a characteristic pose."

Note: He is now "Dr." Hauser, even though he never went to medical school and never was a physician with an M.D. degree.

928. *Chicago Daily Tribune.* 1934. He admits kiss; She gets $4,000 court award. April 6. 21.
• ***Summary:*** Los Angeles, California, April 5. [Special]– Betty Thompson, an 18 year old musician at the church of Rev. Aimee McPherson, was awarded a $4,000 jury verdict today against Paul C. Bragg, 70 year old lecturer and health exponent, in conclusion of her $100,000 damage suit against Bragg charging betrayal. "Bragg testified he had fallen in love with the girl and kissed her but denied further improprieties."

929. *Los Angeles Times.* 1934. Betrayal case decided for girl. April 6. p. A10.
• ***Summary:*** "Paul C. Bragg, health lecturer, was ordered to pay $4,000 to 18-year-old Betty Thompson, musician, Superior Court Judge Smith decided yesterday at the conclusion of her suit for $100,000 damages for asserted betrayal." A former trial ended in a hung jury.

930. *Los Angeles Times.* 1934. Friendship Club to meet. April 7. p. A14.
• ***Summary:*** Clarke Irvine, traveler and lecturer, will discuss Hawaii, Tahiti, and the South Seas today at the International Friendship Club (217 W. Sixth St.) at 7 p.m. Hula dancing, Hawaiian music, and South Sea paintings and exhibits will also be presented.

931. *Los Angeles Times.* 1934. Judgment case figure put in jail: Paul C. Bragg, health lecturer, charged with debt default. April 14. p. A10.
• ***Summary:*** Bragg was arrested late yesterday in Superior Judge Westover's courtroom corridor. He was charged on a bench warrant with being a defaulting judgment debtor. He was immediately taken before Judge Collier and held on $1,000 bail, then later locked up in the County Jail.

"The bench warrant was issued when Betty Thompson, who obtained a $4,000 judgment against him last week before Superior Judge Smith on grounds of betrayal, swore an affidavit yesterday that Bragg had transferred his personal property to the Life Food Products Company and advised her that he was going to leave the State and be gone for two years."

Bragg was in Judge Westover's court awaiting return of the jury in the trial of a suit against him brought by Norma Martin in connection with an automobile accident near Chehalis, Washington.

932. *California Health News* (*Hollywood, California*). 1934. House of Better Living improved. 2(8):3. April 20.
• ***Summary:*** "In a year the House of Better Living, conducted by Mildred M. Lager, food economist, 1207 West Sixth, Los Angeles, has become a rendezvous for women who are learning modern health methods.

"Miss Lager conducts three health cooking classes every Monday and Thursday, 1 p.m. She also has the 'Better Living' hour on KFAC, 7:45 a.m., Monday, Tuesday, Wednesday and Thursday. Her place on Sixth street has a regular exposition room for all sorts of modern health appliances, with a health food store in connection.

"This week she is opening a new library that lines almost one-half of the store. She is installing an air conditioning plant, which will insure fresh, cool air when it is warm. She recommends and uses scores of products from some of the largest manufacturers in the west, and, of course, distributes several hundred copies of *California Health News.*"

Note 1. This is the earliest document seen (Sept. 2009) concerning Mildred Lager in California (one of two documents).

Note 2. This article was published on the same day Mildred began her long-running column titled "Food Facts" in this periodical.

933. Lager, Mildred M. 1934. Food facts. *California Health News* (*Hollywood, California*) 2(8):9. April 20.
• ***Summary:*** This column begins: "Listen for Miss Lager's 'Food Facts and Recipes,' every Monday, Tuesday, Wednesday and Thursday, KFAC."

The column is about food combining: "All food is good but all items do not combine for the best digestion and assimilation. If your meal does not agree so well, be a bit more careful about your combinations... Attend Miss Lager's free 'Healthful Cooking Classes' every Monday and Thursday, 1:30 p.m., at The House of Better Living..."

Note 1. This is the earliest known installment of Mildred's long-running column "Food Facts."

Note 2. This is the earliest document seen (Sept. 2009) concerning Mildred Lager in California (one of two documents).

Note 3. At the top of page 1: "An impartial journal covering the Western states. No copyright. One dollar a year. 7,000 average circulation. 5¢ on news stands." Address: Food Economist and Director, House of Better Living, 1207 West Sixth, Los Angeles.

934. *Los Angeles Times.* 1934. Hauser lecture to end series. April 24. p. 3.
• ***Summary:*** "'Vitamic Cooking' will be the subject of the special lecture to be presented by Dr. Bengamin Gayelord Hauser in the May Company roof garden theater today at 2 p.m."

He will focus particularly on the way in which good food can be prepared economically and will show how vegetables, fruits and nuts can be made to satisfy the most fastidious tastes.

This lecture will be the last in his series at the May Company in honor of the store's food fair.

935. *Naturopath and Herald of Health* (*New York City*). 1934. Classified advertisements. 33(5):158. May.
• ***Summary:*** Under "Health Foods" (the 1st category), we read: "Original Health Food Store, 236 East 35th St. New York City. Tel. LExington 2-1263. Complete catalogue on request. Advice free. 1,000 books on diet, reducing, Water-cure, etc. Herbs and health foods."

Under "Health Periodicals" (the 2nd category): "California Health News. Spokesman for western health activities. 7,000 [circulation] twice monthly. One year: $1.00. Clarke Irvine: Editor and publisher. Send five cent stamp for next issue. 2124 Hillhurst Ave., Hollywood, California."

Under "Health Resorts" (the 3rd category): "'Yungborn,' Butler, New Jersey. Best equipped, best conducted, healthiest, most delightful Nature Life spot in New Jersey. Outdoor life. Quiet. Secluded Well equipped sanitarium."

Note 1. This is the earliest document seen (Jan. 2008) that mentions "Original Health Food Store" clearly in connection with Benedict Lust. Lust in connection with Benedict Lust.

Note 2. "Yungborn" in Florida is not mentioned.

936. *Los Angeles Times.* 1934. "Times" building tops cake for world fair (Photo caption). June 1. p. A5.
• ***Summary:*** This photo shows a huge decorated cake with a portrait photo of Bill Baker inset in an oval at the right. The lower caption reads: "The giant fruit cake, shown below, is on the way to the world's fair in Chicago [Illinois] to take a prominent place in the California exhibit. Topped with a glowing replica of the new Times Building before a sunburst flanked with replicas of California wild flowers, the cake is nearly six feet tall and twelve feet in diameter, and weighs 350 pounds. An intricate frieze showing faithful replicas of twelve early California missions surrounds the upper layer. The cake was baked by Bill Baker (shown in the inset,) Ojai baker, who devoted six months' work to the piece. Every bit of it is edible."

Note: In 1933-1934 the Century of Progress Exposition was held in Chicago; it is sometimes called the Chicago World's Fair.

937. La Sierra Industries. 1934. La Sierra soy bean products: Perfect protein, high alkaline ash, low starch (Ad). *Health* (*Mountain View, California*) 1(3):30. June.
• ***Summary:*** "Add variety and new flavors to your menu with the following foods–soy cheese [tofu], soy milk, soy butter [like a soynut butter, non-hydrogenated], sandwich spread, canned soy beans, soy breakfast food, soy flour (raw), Mamenoka, Smoein, Soy-Co (beverage), soy oil, soy noodles, soy loaf.

"Low in price. Ask your health food store or grocer, or write to La Sierra Industries."

Note 1. This is the earliest document seen (June 2001) that advertises or markets tofu.

Note 2. This is the earliest dated publication seen (Sept. 2000) concerning La Sierra Foods and soy.

Note 3. This is the earliest English-language document seen (Dec. 2012) that uses the term "soy butter" to refer to soynut butter. Address: Arlington, California.

938. *California Health News* (*Hollywood, California*). 1934. Woman shows mothers how to feed family. 2(15):1, 3. July 27.
• ***Summary:*** The story of how Mrs. Sigan Jones founded Jones Grain Mill in about 1925. At the time, her husband as the manager of the new Grand Central Market in Los Angeles. She used a stone buhr mill, and this improved the flavor of flours and the health of thousands who have bought fresh stoneground grains from the famed Jones Grain Mill, 322 South Hill St., Los Angeles. A portrait photo shows Mrs. Jones. Address: Los Angeles, California.

939. Whitcomb, V.O. 1934. Re: Slow delivery to Carmel of bread made by Bill Baker of Ojai, California. Letter to Bill Baker, Ojai, California, July 31. 2 p. Handwritten, with signature.
• ***Summary:*** "Dear Sir: The loaf of Lima Bean Bread which you sent July 27th (Friday) Special Delivery, only arrived today (Tuesday) after being en route four days: 280 miles in four days, by Special Delivery!" He then criticizes the Republicans and the Post Office Department for their slow service. He has lived in Carmel for at least 15 years. Address: Dr., R.F.D. Box 130, Carmel-by-the-Sea, California.

940. Laming (W.C.) & Co., Ltd. 1934. Display ad: The sauce for epicures! Kikkoman, the sauce without vinegar. A product of the healthful soya bean. *Times* (*London*). Oct. 24. p. 17, col. 7.
• ***Summary:*** "Kikkoman is the only product of its kind in the world. Made from the wonderful Soya Bean, it is an important Health Food that should be included in everyone's diet. Kikkoman is a real tonic, appetiser and stimulant, increases vitality and is decidedly nourishing. Kikkoman adds to Soups..." Address: 29, Tooley St., London, S.E. 1.

© Copyright Soyinfo Center 2021

941. *Naturopath and Herald of Health* (*New York City*). 1934. State news: The American Academy of Health... 33(10):309. Oct.
• ***Summary:*** "... announces a series of lectures by Professor Paul C. Bragg of California. These talks were scheduled for October 3rd to 10th inclusive, at the Pythian Temple, New York City. As we go to press we understand the crowds have been flocking to these lectures and they are proving highly interesting and instructive."

942. Baker, Ivan. 1934. Meet for the meatless: Four hundred meatless entrées, lunch and supper dishes. London: Ivor Nicholson & Watson Limited. xii + 340 p. 19 cm.
• ***Summary:*** In the chapter titled "Beans," the author notes that "the new Soyolk, fine meal of the soya bean, is now obtainable at all health food stores" (p. 143). Address: London.

943. *Los Angeles Times.* 1934. Serve giant birthday cake. Dec. 2. p. E3.
• ***Summary:*** A photo shows a huge 5-layer, 1800-pound cake. Each of the bottom 4 layers is circled with candles–75 in total. On the top is a little red school house. Standing around the cake are (left to right) Joe E. Brown, Bill Baker (who created the cake), Jimmy Dixon (a local Chevrolet dealer who organized the picnic), and Eleanor Keller.

In the background are 200,000 children and their parents, in Griffith Park last Sunday (Nov. 25). For lead-up articles, see Nov. 10, 17 and 18.

Note 1. Two later accounts say that the cake was baked to celebrate the 75th anniversary of the public schools of Los Angeles. However a lengthy search found no such connection.

Note 2. Soyfoods Center has a photocopy (8½ by 11 inches) of another photo of this cake, inside a screen fence, with many children standing in the background, before cutting of the cake started.

944. Carqué, Otto. 1934. Vital facts about foods: A guide to health and longevity with 200 wholesome recipes and menus and 250 complete analyses of foods. 2nd ed. Los Angeles, California: Published by the author. 208 p. Index. 24 cm. [20+* ref]
• ***Summary:*** This so-called 2nd edition is identical to the first edition (1933) except that: (1) Two lines on the 2nd page of the Preface have been moved to the first page; both pages are unnumbered. (2) Two paragraphs, titled "Preface to the second edition" have been added to the end of the Preface and dated "November, 1934." The author's signature again appears at the end of the Preface.

Note: The first 5,000 copies were exhausted in about a year. Address: Los Angeles, California.

945. Four delivery trucks parked in front of Bill Baker's Ojai Bakery in Ojai, California (Photograph). 1934. Undated.
• ***Summary:***

This photo (see next page) was taken in 1934 from the center of the street facing Bill Baker's Ojai Bakery. The four trucks are facing toward the right. The license plates are all 1934 PC ("Pneumatic Commercial") which was standard for trucks. The two black Dodge trucks on the left were made between 1933 and Aug. 1935. On the side of each, in large white letters, is written: "Bill Baker's Lima & Soya Bean Bread."

The third truck from the left, longer and painted white, is a Model AA Ford, it was made between 1930 and early 1932. On the side near the top, in fairly large black letters, is written "Bill Baker's Lima Bean Bread." Below that, all on one line in smaller letters: "Soy Bean Bread–Whole Wheat Bread–Gluten Bread."

The truck on the far right, which is all black, a Buick (made 1921-1922), is the oldest of the four. A strip on top of the license plate says "3000 to 6000"–meaning the payload. It has the words "Ojai" and "Bread" visible on the side. The angle of the trucks relative to the camera enables us to see the front and most of one side of each truck. The front license plate on each of the trucks is legible.

In the background is a building with shops to the right and left of an open central gateway with a driveway under the arch. There are no signs on the left half. On the right half is a small sign near the top: "Ojai Bakery." Cypress trees grow at both corners of the building. A blowup of the image enables us to identify a tall, white, intricate sugar cake in the far right window of the bakery as the same cake shown at the right hand side of a 1934 photo, with Bill Baker standing behind it and with Pat Carsner standing beside Baker and behind another shorter cake.

Thanks to license plate expert Jeff Minard of Huntington Beach, California, for identifying the make, model, and license plate of each truck, and the year the photo was taken.

This 8 by 10 inch glossy photo was sent to Soyfoods Center by Rose Boggs of Ojai, California. Talk with Rose. 2004. July 18. Bill Baker owned these trucks, which he used to deliver his breads and other baked goods to Los Angeles, and to Ojai and Ventura County. One truck may have delivered to the Sansum Clinic in Santa Barbara. If you stood in the street and faced Bill Baker's Ojai Bakery at this time, it was on the right of a building which he owned, and which had a large gate in the middle and Mr. Burdick's music store on the left. Burdick rented his space from Bill Baker and lived in back of his music store in small living accommodations. When demand for his lima bean baked goods began to increase, Bill Baker took back the music store and installed a new lima bean bakery in that left half of the building.

946. Hauser, Bengamin Gayelord. 1934. Here's how to be

© Copyright Soyinfo Center 2021

healthy. New York, NY: Tempo Books, Inc. 48 p. 19 cm.
• ***Summary:*** A vegetarian cookbook about "health cocktails," the new international sensation made from raw fresh fruit and vegetable juices–with recipes. Instead of eating vegetables, you now drink them. Gives therapeutic uses of fruit and vegetable juices.

947. Pat Carsner and Bill Baker each standing behind a tall, elegant wedding cake (Photograph). 1934. Undated.
• ***Summary:*** See next page. Pat Carsner (an employee, dressed in a white shirt and cap) is on the left and Bill Baker (in a dark two-piece suit and tie) is on the right.

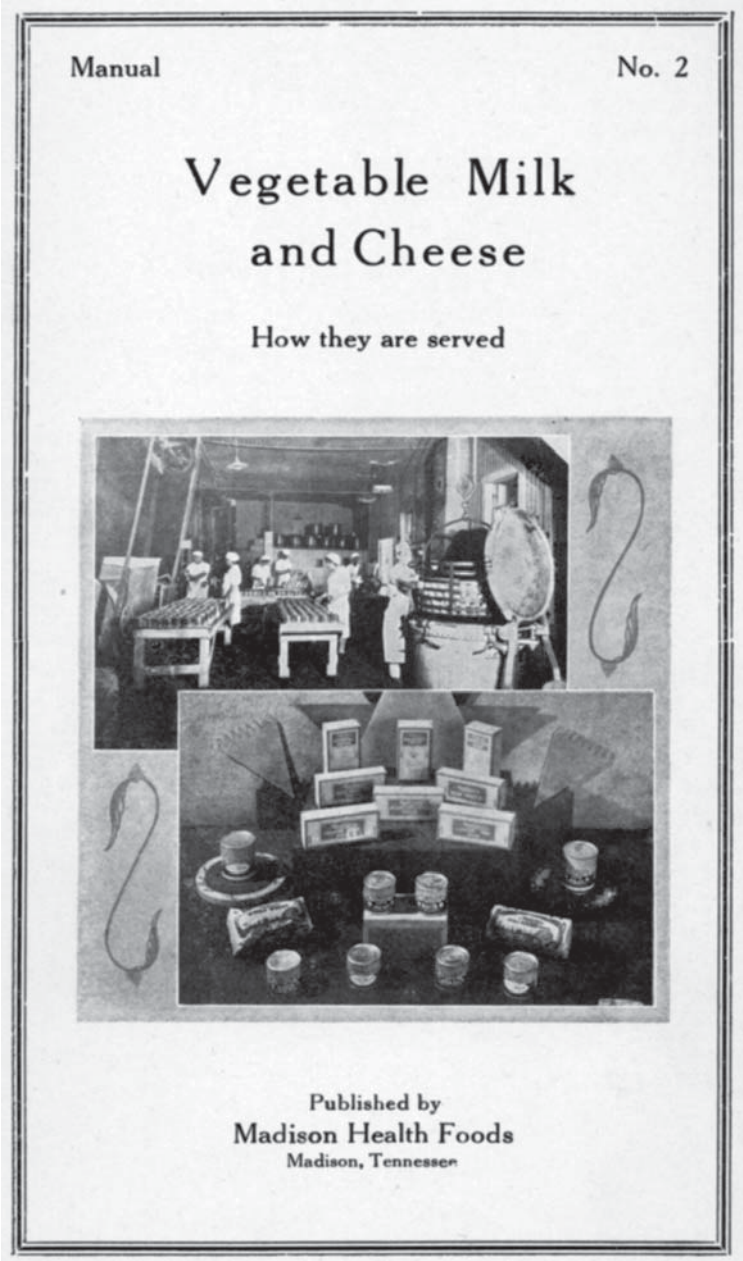
This 8 by 10 inch glossy photo was sent to Soyfoods Center by Rose Boggs of Ojai, California. Rose notes that Bill Baker–because he was very well known–created wedding cakes for many prominent people, especially when he was baking in Ventura, but also in Ojai. Pat Carsner drank alcohol more than Bill Baker liked him to.

948. Pretorius, Martin W.; Bournman, Lillian; Gillanders, Agnes White. 1934. Scientific feeding: A careful compilation of tried and approved health recipes arranged according to their respective classes, in order to assist the housewife who is interested in the health of her family to balance and prepare her meals scientifically and easily. 3rd ed. Hollywood, California: The Food Chemistry Educational Institute. 112 p. Index. 27 cm.
• ***Summary:*** Contents: Instructions for using this book. Proteins: Section I. Nuts, legumes (beans, peas, lentils, soy beans), meats, cheese, eggs, meat substitutes, fish and sea foods. Alkalinizing foods: Section II. Fruits, vegetables, cooked vegetables, vegetable salads, vegetable juice cocktails. Carbohydrates: Section III (Starches and sweets). Dried fruits, vegetable gelatin dishes, starches (cereals, breads, cakes, etc.), candies (made from dates, honey, preserves, etc.), natural starches (bananas, potatoes, etc.), ice cream. Hydrocarbons: Section IV (Fats and oils). Avocado calavo recipes, salad and other dressings.

© Copyright Soyinfo Center 2021

Note 1. This is not a vegetarian cookbook: It contains many recipes for red meat, poultry (p. 23-26), fish and sea foods (p. 45-48). However it also contains many recipes for meat substitutes.

Note 2. The text of this book is printed on only the front side of each page. The paper in each section is a different color (pink, light blue, yellow, etc.). Each of the recipes is numbered sequentially from 1 to 719. But a few pages (p. 74-A) and recipes (474C, 478A) seem to have been added at the last minute.



Note 3. Martin W. Pretorius (whose portrait photo appears on the title page) was the pen name of Martin Wessels (born in 1905).

Note 4. As of Sept. 2004, neither the 1st nor 2nd edition of this book is owned by any library in the USA. Address: Director, The Food Chemistry Educational Inst., P.O. Box 1857, Hollywood, California.

949. Madison Health Foods. 1934? Vegetable milk and cheese. How they are served. Manual No. 2. Madison, Tennessee. 21 p. Undated. 22 cm.

• ***Summary:*** See next page. Contents: Introduction. Composition of the soybean. Soybean–A food for infants. Salads: How to make a perfect salad (20 recipes, including 11 with soy cheese [tofu] and 7 with grated soy cheese): Tomato, pineapple, cheese salad (with grated soy cheese). Jellied soy salad (with grated soy cheese). Waldorf cheese salad (with grated soy cheese). Raisin and soy cheese salad (with grated soy cheese). Almond and soy salad (with grated soy cheese). Sliced fruit and cheese salad (with soy cheese). Soy peach salad (with grated soy cheese). Tomato and soy salad (with soy cheese). Baked apple with soy sauce (with grated soy cheese). Pineapple and cheese salad (with grated soy cheese). Apple, carrot and soy salad (with grated soy cheese). Soybean salad (with whole soybeans). Soybean sprout salad (with soybeans sprouted until the sprouts are about 2 inches long). Cold sliced curd (with thin-sliced soy cheese). Potato soy salad (with grated soy cheese). Stuffed egg with soy cheese. Vegetable soy salad (with grated soy cheese). Cheese, cantaloupe, and tomato salad (with grated

© Copyright Soyinfo Center 2021

soy cheese). Mock chicken salad (with grated soy cheese). Pea soy salad (with grated soy cheese).

Sandwiches (9 recipes, incl. 5 with soy cheese and 4 with grated soy cheese; one recipe uses Vegex). Cooked vegetable dishes with soy cheese (40 recipes, all use soy cheese except 2 which use soybean puree). Other soy dishes (3 recipes). Desserts (1 recipe for Soy cream custard, with soy milk). Diabetic foods (4 recipes, each using soy meal [flour]). Soups (5 recipes, using soybeans, grated soy cheese, and soy milk or soybean milk). Breakfast dishes (4 recipes, using canned soybeans, soy meal, or grated soy cheese).

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "grated soy cheese" to refer to grated tofu.

On the last page (inside back cover) are listed "Products for sale by Madison Health Foods Inc. (Madison, Tennessee): Soy cheese, 14 or 30 oz. Soy beans, 14 or 30 oz. Soy milk, 14 or 30 oz. Soy meal, 5 or 10 lb. Also many other health products. Write for information and prices."

Two photos on the cover show: (1) Students at work inside the Madison food factory, with two long tables and a retort cooker. (2) Various food products made by the company.

Note 2. Although this booklet is undated, the two photos on the cover appear in the *Madison Survey* issue of 14 March 1934 (p. 31). Address: Madison, Tennessee.

950. Baker's (Bill) Lima Bean Products. 1935. Bill Baker's original Lima and Soya Bean Bread: Toast and wafers (Ad). *California Health News* (*Hollywood, California*) 3(1):2. Jan. 11.
• ***Summary:*** "Shipped to any part of the United States. At all health food stores and better markets in the West." Address: Ojai, California. Phone: AN. 18425.

951. *California Health News* (*Hollywood, California*). 1935. Aluminum poison menaces humanity! Kitchen ware is being discarded. Ulcers, colitis, cancer and other troubles traced to use of common cooking utensils. 3(1):1, 12. Jan. 11.
• ***Summary:*** "If you cook in aluminum utensils you are jeopardizing the health of your family!" Within a few years the aluminum pan "will be relegated to the trash heap along with vaccination and a few other present-day mistaken ideas."

952. *California Health News* (*Hollywood, California*). 1935. Hauser, master of food science, is here again. 3(1):1, 14. Jan. 11.
• ***Summary:*** "Just before going to press, information was received from Hauser headquarters that Bengamin Gayelord Hauser, popular authority and internationally famous writer on diet and health topics, who arrived in Los Angeles last week from eastern campaigns and his European summer trip, will lecture here at Trinity auditorium on January 15th, 16th and 17th, at 8 p.m. (That's Tuesday, Wednesday and Thursday.)

"This is his first public appearance here in the past two years, his 1933 lectures being by invitation only.

"The past season has been a banner one for the Hauser organization, the most important development in his great work being the signing by King Features syndicate for a daily article, now appearing in most important American newspapers.

"His sparkling column has proven a great success, indicating that the world is greedy for practical information

© Copyright Soyinfo Center 2021

on food science."

A large photo shows Bengamin Gayelord Hauser. Caption: "His teachings are changing nations!"

953. *California Health News* (*Hollywood, California*). 1935. Latest news: Carque dies. 3(1):1. Jan. 11.
• ***Summary:*** "Otto Carque, dean of healthmen, of Los Angeles, struck by an automobile Sunday night as he was leaving Stop & Shop Health Food Store, Hollywood, died at General hospital early Thursday morning. He was 69 years old and leaves his widow, Lillian Carque. Next issue will carry his complete life story."

Note: This announcement, in large bold letters, appears in the lower right corner of the front page, surrounded by a bold border. Apparently the sad news arrived just as the issue was going to press.

954. *California Health News* (*Hollywood, California*). 1935. Carque's funeral. 3(1):2. Jan. 11.
• ***Summary:*** Inside a bold border we read: "From Hollywood Cemetery Chapel, 6000 Santa Monica Boulevard, 2:30 p.m. Saturday, January 12. Service conducted by Clarke Irvine."

955. *California Health News* (*Hollywood, California*). 1935. Leading health food stores' directory. 3(1):2. Jan. 11.
• ***Summary:*** Gives the name, address, and phone number of health food stores that distribute *Health News* in the following California towns and cities: Alhambra (1 store). Beverly Hills (1). Burbank (1). Glendale (2). Hollywood (9). North Hollywood (1). Huntington Park (1). Long Beach (3). Los Angeles (13). Pasadena (4). San Diego (3). Santa Barbara (1). Santa Monica (2).

956. *California Health News* (*Hollywood, California*). 1935. Book list: All prices include postage (Ad). 3(1):13. Jan. 11.
• ***Summary:*** "Hauser's works: *Food Science and Health,* $2.10. *Harmonized Food Selection,* $2.10. *Types and Temperaments,* $2.10. *Dictionary of Foods,* $2.60. *Keener Vision Without Glasses,* $2.60. *Child Feeding,* $2.50. *Health Day,* $1.10.

"Skipper Irvine's *Health,* With Remedies and Recipes, regular 75¢, with an acid-alkaline food chart, 10¢; total 85¢. Special, only 50¢.

"Aluminum Poisoning–by Dr. Charles T. Betts, who discovered in 1913 the damaging effects of aluminum cooking utensils. Price $2.50 postpaid. Cloth, 250 pages." Address: Hollywood, California.

957. Live Food Products Co. 1935. At last! The perfect vegetable juicer arrives from Europe (Ad). *California Health News* (*Hollywood, California*). 3(1):13. Jan. 11.
• ***Summary:*** Contents: Drink your way to health. Put life into your blood. Live Food Juicer no toy. "Famous health specialist endorses juicer. Paul C. Bragg, nationally famous health lecturer, says 'It's the greatest invention that has come to the health world in 150 years. Send for free booklet and health cocktails. Machine sent postpaid on receipt of $5.95." A photo shows the hand-turned juicer, with a stalk of celery in the hopper and many vegetables on the table. It looks and works quite like a hand-turned meat grinder.

Note: This is the earliest English-language document seen (July 2021) that contains the term "vegetable juicer" used generically (see title). This is also the earliest English-language document seen (July 2021) that mentions the "Live Food Juicer" or that uses the word "Juicer" in the brand name of a commercial product. Address: P.O. Box 428, Burbank, California.

958. *Los Angeles Times.* 1935. Obituary: Otto Carque. Jan. 11. p. 17.
• ***Summary:*** "Final rites for Otto Carque, 69 years of age, food scientist and fruit shipper, who died Wednesday [Jan. 9] from traffic accident injuries, will be conducted at 2:30 p.m. tomorrow at the Hollywood Cemetery chapel. Cremation will follow and his ashes will be scattered over the Hollywood hills. Mr. Carque was responsible for the development of the Black Mission fig. He leaves his widow at the family residence, 1315 Maple avenue."

959. *Los Angeles Times.* 1935. Official death list. Jan. 17. p. 15.
• ***Summary:*** Otto Carque, age 69, died in January. Address: N.D. [Naturopathic Doctor].

960. Bragg, Paul C. 1935. A tribute to my teacher, Otto Carque. *California Health News* (*Hollywood, California*) 3(2):7. Jan. 25.
• ***Summary:*** "News of the death of Otto Carque fills me with a sense of great personal loss. I mourn his passing as I would that of a brother. He was my friend and teacher. He it was who inspired me to carry over the United States his rules for health and longevity. Any degree of success which has followed my efforts is due largely to his encouragement and instruction. He was the most distinguished pioneer in the field of 'health promotion through the eating of natural foods only.' He lived and worked for an ideal–that God's foods should not be polluted, should not be profaned–and never once did he forsake that ideal for gold. He pointed out to thousands of sick and discouraged people the road to buoyant health. He lived a noble life, gathered lasting friendships, and the respect of all with whom he came in contact. To his foresight, courage, and ability, all who are engaged in health work must acknowledge a debt of lasting gratitude." Address: Burbank, California.

• ***Summary:*** "(Inspired at the bier of Otto Carque, Jan. 12, 1935).

We stand in reverent mood, my friend, beside his sacred bier. / We breathe a prayer, yet do not grieve, nor do we shed one tear. / We know this is not death for you, you live–a fuller life, / Above the world's impatient din; above its toil and strife.

"We've known you long, we've loved you well, as sincere, brave and true; / We feel our loss e'en more because God made so few like you! / God gives thee surcease from thy toil; He gives thee peace and rest. / You've given love–love flows to you from all who knew you best.

"We see the calm, we see the light, which rests upon thy face; / We miss you more because we know there's none to fill your place; / Still, we'd not wish you back again, go on–to higher planes, / 'Tomorrow' we shall pierce the veil, and clasp they hand again." Address: N.D., D.C. "Brown the Bread Man".

964. *California Health News* (*Hollywood, California*). 1935. California owes Carque huge debt. 3(2):5. Jan. 25.
• ***Summary:*** "A quarter of a century ago black mission figs were almost unknown, but today many tons are sold all over the world as a valuable adjunct to the modern diet. Tons are used in candies, cookies, and so on.

"All this is due to the knowledge and efforts of Otto Carque, promoter of this wonderful food through his writings, lectures and huge mail order fruit business. Wherever fruit is grown and dried in California the name of Carque is a household word, and an asset, for Carque checks have put money in many a rancher's house up and down this coast.

"When he arrived here in 1905 with his life's work ahead of him, he had one idea, to market to the world the delectable dried fruits of California–richest in such yields–so he began with the lowly black fig. And he succeeded, as everyone in the trade knows.

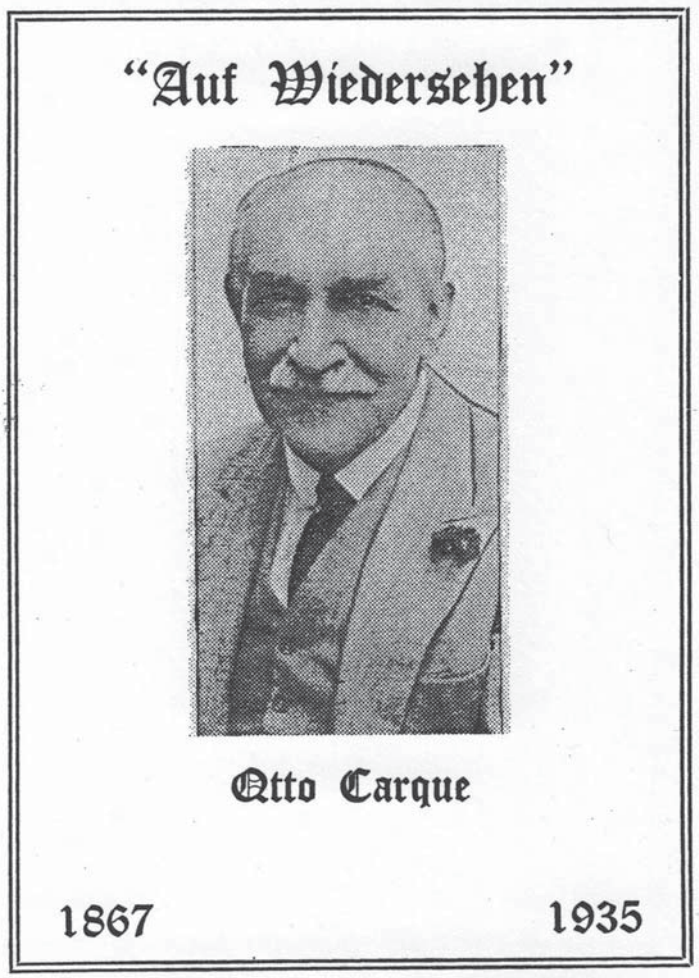
"Ambitious to supply America with safe foods, in 1905 at Los Angeles, he organized the Carque Pure Food Co., and for 30 years has built up a name that stands for rational diet.

"His foundation was an education for business, starting in the wholesale grocery trade. He liked chemistry, specialized in food chemistry, all of which helped him in California, where he is acknowledged as the one who popularized the black mission fig, one of man's finest foods.

"His three decades in California were valuable to the world as well as to California."

965. *California Health News* (*Hollywood, California*). 1935. Vegetarians increase. 3(2):5. Jan. 25.
• ***Summary:*** As the standard of living rises the vegetarian tendency increases, according to a recent survey of meat preferences covering 16 representative American cities.

"The census disclosed that two thirds of the native white population has beef first on its marketing list, with pork, lamb, and veal in order. About 5 per cent use no meat at all, it seems that as intelligence increases mankind uses less flesh food, to his advantage, of course."



966. *California Health News* (*Hollywood, California*). 1935. Academy honors Carque. 3(2):5. Jan. 25.
• ***Summary:*** "At the last meeting of the California Academy of Health, where Carque was always a welcome guest and friend, a silence of one minute was observed in his memory.

"Clarke Irvine, founder of the organization, always declared that his entry into health educational work was due in a great measure to the inspiration of Carque."

967. *California Health News* (*Hollywood, California*). 1935. In memory of our beloved friend. 3(2):6. Jan. 25.
• ***Summary:*** See next page. In the center of this full page memorial is a large portrait photo of Otto Carque (1867-1935) titled "Auf Wiedersehen" [Goodbye]. Surrounding it are the names (and usually addresses) of 77 companies and individuals involved with health foods who wished to say goodbye. These include (listed alphabetically): Alvita Products, American Health Food Stores, Lima and Soya Bean Products (Mr. and Mrs. Bill Baker), California Food and Health Service (5 entries), California Health Food Store, California Health Hotel, Lillian Carque, Cubbison Cracker Co., Inc., Dr. Harry & Lucy Finkel, Defensive-Diet League of America, Health Cafeteria, Health Foundation of California, House of Better Living (Mildred Lager, 1207 West Sixth), Hygienic Food Co., Dr. Philip M. Lovell, Dr. Benedict Lust and staff, Oakland Health Food Store, The Old Mill, Paradise Health Resort, Martin W. Pretorius, Richter's Live Food Cafeterias, Rosenberg's Original Health Food Store (San Francisco), Santa Monica Health Food, Sexauer Natural Food, Vegetarian Cafeteria and Bakery (San Diego) [San Diego's Health Food Center, C.A. Thompson, proprietor; 1125 Sixth St. Phone F. 2744 {see p. 15}].

Note: This is the earliest document seen (July 2021) that contains a directory of health food stores and individuals in the United States.

968. *California Health News* (*Hollywood, California*). 1935. Hundreds of tributes sing Carque praises. 3(2):12. Jan. 25.
• ***Summary:*** "The truth is that really great men are never justly honored until after their passing is graphically illustrated in the death of Otto Carque. Mrs. Carque and *Health News* have received hundreds of letters and a few telegrams from all over the country extolling the virtues of this humble man who spent over 30 years in an endeavor to make life safer and better for all mankind..." Here are a few:

In a letter to "Dr. and Mrs. Harry Finkel, Dr. Benedict Lust, editor of *Nature's Path*, said: 'There is one man who had no enemies.' He well remembered the day Carque landed from Mannheim, Germany, in 1887. He was associated with Dr. Henry Lane, in New York, father of iridiagnosis in this country. He mentioned how Carque worked hard, overcame many struggles, published his first book, 'Foundation of Food Reform,' later challenging Arthur Brisbane on vegetarianism, and became nationally known–but never mentioned it.

"'In 1915 we raced on the beach at Venice,' he wrote, 'and Otto won. He was always in fine shape. I loved him like a brother. Please express to all out west the sympathy of his many friends in the movement in New York.'"

"Bengamin Gayelord Hauser (from the platform)–Otto Carque was always at my lectures and we miss him tonight–all of us. He inspired me and you. When I came here he said, 'I am for you–you're just what America needs, you tell them.'"

969. *California Health News* (*Hollywood, California*). 1935. Destiny gave romance to life of Carque. 3(2):13. Jan. 25.
• ***Summary:*** "Nine years ago [ca. 1926] the threads of Otto Carque's destiny pulled him to New York on a lecture tour–and there he met his wife, Lillian.

"Mrs. Carque subsequently came to California, married Mr. Carque [on 6 Nov. 1927], heretofore an inveterate bachelor, at his ripened, yet youthful, age 61. He considered this the most important event in his career, ardently maintaining that 'the cosmic forces brought us together at a time the world was ready to receive a much needed message.'

"So together in the spirit of love and service Otto Carque, with a vigor reinforced by the sincere and earnest spirit of co-operation of a congenial and loving companion, ventured forth anew, continuing to persevere in his unswerving policy of dietetic and pure food merchandising activity."

970. *California Health News* (*Hollywood, California*). 1935. Carque lived in West 30 years. 3(2):13. Jan. 25.
• ***Summary:*** "Although he came here [to California] first in 1889, nearly half a century ago, it was not until 1905 that Otto Carque made the Golden State his permanent residence.

"'In 1889 I struck my beloved California for the first time,' he said in a recent interview. 'I returned to Germany, came back to America for the World's Fair (1893), lived in New York for a few years, and then in 1905 I went out to Los Angeles, where I have lived ever since.'

"Carque seldom spoke of his personal life or history. It is believed that he has one sister in Germany. He had no children. He thought that there was too much needed work in the world for one to talk about himself; to desire things and diversions; too much suffering to waste time enjoying personal pleasures. His great joy was work."

971. *California Health News* (*Hollywood, California*). 1935. First Carque visit told by woman editor. 3(2):15. Jan. 25.
• ***Summary:*** "Mabel K. [Kennedy] Alspaugh, publisher of Oregon's Health Herald, relates an interesting incident when she first met Otto Carque here.

"'I shall never forget it,' she writes, 'for it stands out like a beacon in my eventful life with the health movement. I made a trip to Los Angeles to gather information in regard to natural food and living. So, of course, I felt that I must see

© Copyright Soyinfo Center 2021

Otto Carque.

"'Reluctantly I went into the office and asked for him, half expecting to be told that Mr. Carque was busy. But no, they set out to find him. I was a little surprised when I looked at him, but I tried not to show that I had expected a man full of dignity and the other things that accompany it. He was so friendly, genial and kind, that I fell in love with him on the spot. We visited for an hour, and all of the time he made me think that he was the flattered one, and not myself!"

Also on this page is a poem of tribute to Otto Carque by Mrs. Alspaugh.

972. *California Health News* (*Hollywood, California*). 1935. Carque optimistic while facing death. 3(2):15. Jan. 25.
• ***Summary:*** "Although suffering intense pain with broken ribs, damaged lungs, possible skull fracture, general cuts and bruises, and terrific shock racking his body, Otto Carque, 68, but with the body of a man 20 years younger, according to physicians, carried on business details. He saw his wife and a few intimates during the four days from his accident to his death, which was painless. He passed two terrific crises, then entered a coma. He talked, joked, and even revealed a new food formula, little realizing that he would never rise again.

"Mr. Carque's indomitable spirit remained with him to the end. The morning after he was injured he declared to his wife: 'Oh, I'll be out tomorrow.' He went out, all right, but in a larger way than even he realized. Carque never was pessimistic or downcast. No matter what happened he was always happy and his spirit was buoyant."

973. *California Health News* (*Hollywood, California*). 1935. Natural foods saved Carque: But unnatural living took him off prematurely at only 68. 3(2):17. Jan. 25.
• ***Summary:*** "Like many healthmen, Otto Carque worked for the emancipation of man; sought his release from machines, stores, offices; worked always to help man back to the land, away from unnatural foods and modes of life, and strangely enough, although his life was preserved through natural foods and living habits, it was an unnatural death, a tragic accident, a violent death that ended his career of good work.

"In any company Carque was the healthiest individual around–yet he ate less, remained a vegetarian, used no liquor, tobacco, drugs or stimulants, and retained his buoyancy of mind and body until the very end.

"His boyish body was like a trim organic machine with few spare parts; usually bronzed, hard and enduring like the sturdy mountains that he so dearly loved to climb.

"Born in Germany near the French border, of French blood, Carque lived half his years with a smile on his face–no wonder he always beamed. Handicapped with a weak physique, he early took up physical culture. It restored him, along with right living and natural foods, which he found remedied his acute constipation. When quite young his mother died–'because of the doctors,' he claimed, causing him to reflect upon health, disease and death, which in time wrought the mighty brainpower that carried him down through the years in his work for humanity.

"At 28 he was a vegetarian, lived 15 years on raw foods, then fresh fruits and vegetables, varied occasionally with eggs, cheese and nut butters, unroasted, sustained him in arduous endeavors."

974. *California Health News* (*Hollywood, California*). 1935. Dr. Pietro Rotondi (Ad). 3(2):17. Jan. 25.
• ***Summary:*** This tiny ad states: "Hours 2 to 5 and by appointment. Residence calls: GR. 4492. Free health lectures. Mondays. 7:45 P.M." A small portrait photo shows Rotondi. Address: 1633 N. Argyle, Hollywood [California].

975. *California Health News* (*Hollywood, California*). 1935. Health News digs up interesting snaps of Otto Carque (Photo caption). 3(2):18. Jan. 25.
• ***Summary:*** This is a collage of 7 photos showing Otto Carque. In the top five photos he is wearing a hat. The lower caption and the story below that caption describes some of them, as follows (from top left): (1) On 11 May 1913 at Strathmore, standing in front of a grove of orange trees. (2) "He was an outdoor lover and was interested in agriculture, at one time owning a ranch near San Jose, where he is seen... coming down the steps of 'Villa Schultz,' on which he wrote about 1925." (3) Standing at the foot of a huge cross, on top of Mt. Hollywood, which he has just scaled. (4) Standing by a stream in a pretty canyon, in a dress suit and hat [circa 1925], "taken on one of the Wanderluster club hikes, led by Paul Bragg a few years ago. Skipper [Clarke] Irvine, Fred Hirsh, Bragg and Carque were cronies on these old Wanderluster trips." (5) Standing in front of some tall yucca plants, inscribed by himself: "Among the Century Plants–Porterville Park, Tulare Co., May 11, 1913." (6) With a group of about 20 men sunbathers, each with a white towel around his waist, "in a Los Angeles sunbath. You will recognize Mr. Carque, Charles James, and 'Daddy' Riecken, who formerly lived with Carque." (7) Five men and a dog standing around a delivery truck, "his early business wagon, probably around 1912, with a group of healthmen." Carque, with a large mustache, nearly bald head, and dark suit, appears to be standing by the rear corner of the vehicle. On one side of the truck is written "Carque's Pure Foods" in white letters. Note: It is hard to tell whether or not the wagon was motorized.

The caption below this collage reads: "Great men are unassuming and always seek the background, but fortunately several friends of the genial Otto sent these early-day pictures [some of] which show him over 20 years ago" [i.e. before 1915].

976. *California Health News* (*Hollywood, California*). 1935. Vinegar indicted often by Carque. 3(2):18. Jan. 25.

© Copyright Soyinfo Center 2021

• ***Summary:*** "Writing, teaching and selling thousands of boxes of dried fruits, Otto Carque undoubtedly changed the lives of millions all over the world; he made them realize the folly of trying to maintain health on unnatural foods."

In his book *Natural Foods: The Safe Way to Health* (1925), Carque indicts vinegar. "Like all alcoholic beverages, it is positively injurious to the digestive organs... The annual production of fermented cider in North America and Europe amounts to over 600 million gallons This is an enormous waste of good food material, for the valuable fruit sugar is converted into alcohol during the process of fermentation. Unfermented apple juice can be easily preserved" by canning.

Americans spent $10,000,000 for vinegar in 1924! "Vinegar has no place in the rational dietary... Health-minded folks never use vinegar."

977. *California Health News* (*Hollywood, California*). 1935. Carque was one of 41 killed. 3(2):18. Jan. 25.
• ***Summary:*** In the first 21 days of January in Los Angeles, 41 people died and 989 were injured in 763 traffic accidents–according to a *Health News* survey of L.A.'s traffic records. "Mr. Carque was struck, tossed several feet, run over and dragged. The car had to be lifted off of him, according to J. Lowenthal of Stop and Shop Market, where Carque had just left. He helped lift the car. Mr. and Mrs. Lowenthal closed shop, followed their injured friend to Hollywood emergency hospital, where first treatment was rendered."

978. *California Health News* (*Hollywood, California*). 1935. Many attend Carque funeral: Dean of healthmen mourned by the pioneers of nature-cure. 3(2):19. Jan. 25.
• ***Summary:*** "At a simple funeral, several hundred paid last tribute to Otto Carque, grand old man of the health movement in America, on Saturday, January 12, at Hollywood cemetery chapel, Skipper Clarke Irvine conducting the service, which followed natural philosophy.

"The plain gray coffin, humble as its occupant was in life, rested before beautiful flowers banked to the ceiling. Appropriate music included violin solos by Edward Babson, and piano and vocal solos by Miss Mayes Donoho, friends.

"Mr. Irvine, an old friend, sketched briefly the life and work of Mr. Carque, told of the survival of the spirit, how such a man must live on, and that those remaining should make his work their work; to do good and to teach about health and pure foods.

"Dr. Philip M. Lovell told how 'He'd want all of us to carry on the work. His purpose was not to acquire wealth, but to help humanity.'

"He mentioned Carque's huge task, investigating, writing all his manuscript in longhand, in perfect English, editing being unnecessary.

"'He was simple, naive, humble, yet capable of discussion in any field of knowledge,' he declared. 'He preached food reform, lived to see it come true. It's a pity he had to go so quickly–he was good for many more years. Work was his joy–from 7 a.m. to 10 and 11 p.m.–working for others, never for Otto Carque, and many are getting the benefit of his labors. They know him everywhere that Nature-cure is known. He left life as clean and wholesome as he found it, and in spite of all his fame he left it almost penniless!'

"Charles James, who made his home with Carque, told of his contact, painted a glowing picture of the man himself. 'I've known no more lovable, gentler soul,' in a voice that revealed profound sorrow.

"He related an incident at Christmas in a department store that well pictured the spirit of Carque, how they were searching for a Santa Claus, and spying Otto with his beaming face, approached him and said, 'Here–you're just the man! We want you to be Santa Claus.' Mr. James read his farewell poem, printed elsewhere.

"Dr. John Clough of a Theosophical school where the Carques were students, told his views on the continuance of life, the immortality of the soul and that there should be nothing sad about death. 'He will come again,' he reassured.

"The body was viewed, many old friends and associates being visibly affected. Cremation followed, the ashes to be scattered by Skipper Irvine on the Hollywood hills, so dearly loved by Mr. Carque, simple-souled friend of mankind."

979. *California Health News* (*Hollywood, California*). 1935. Carque killed in safety walk. 3(2):19. Jan. 25.
• ***Summary:*** "Otto Carque, 68, for over 30 years an international authority on health and food reform, died in general hospital, Los Angeles, shortly before midnight on Wednesday January 9, from injuries incurred the previous Saturday at 11 p.m., when struck in a crossing by an automobile driven by Mildred Methmann, on Santa Monica boulevard, near Western.

"Mrs. Methmann, 5423 Barton Way, was not held. At the inquest she testified that she did not see Mr. Carque; all she knew was that a large shadowy object suddenly loomed before her and then an impact–yet she drove in a lighted business district, and the 'shadow' was in a pedestrian 'safety' crossing.

"Mr. Carque, of French descent, who lived in Los Angeles, was born July 11, 1867, in Alsace-Lorraine, lived in Mannheim, Germany from where he migrated to America." "He was one of 41 killed by car in Los Angeles in only 21 days!"

Note: Carque was born on July 11, 1866, not 1867. He was born in Wiesloch, Germany, not in Alsace-Loraine, then had moved to Mannheim, Baden Wuerttemberg, Germany by 8 April 1892.

980. *California Health News* (*Hollywood, California*). 1935. Carque ideal was unsulphured fruit. 3(2):20. Jan. 25.

© Copyright Soyinfo Center 2021

• ***Summary:*** "Only a few years ago every packet of dried fruit emanating from California was sulphured, except prunes and raisins, dark fruits that need no bleaching chemical.

"When Otto Carque came here at 38, versed in food chemistry and aware of the damage being done the great American stomach through this commercial process, he had an ideal–to put out California fruits safe and without sulphur.

"As everyone who uses dried fruits today knows, he succeeded in placing the official ban on this dangerous practice. The uninformed always ask 'why no sulphur?' Sulphur produces sulphurous acid, which spoils the true flavor, bleaches it, harms the kidneys and lessens the red corpuscles, thus reducing immunity to illness, and generally undermining health. It kills bugs but preserves the color, like an embalming agent–so who wants to eat embalmed fruit!

"This revelation was made by the late Dr. Harvey W. Wiley, friend of Carque, so he carried on the work, eliminated chemical treatments, and perfected dehydration at 140 instead of scorching."

981. *California Health News* (*Hollywood, California*). 1935. Carque knew. 3(2):1. Jan. 25.
• ***Summary:*** "Fifty per cent of our foods are not good for us. Annually American spends ten billion dollars for food. Five billion of it is wasted money."

Note: This text appears in the lower right corner of the cover, and is surrounded by little stars. At the top center of the front page: "Carque Memorial Number."

982. Carque, Lillian. 1935. Character sketch of Otto Carque. *California Health News* (*Hollywood, California*) 3(2):7. Jan. 25.
• ***Summary:*** "Those who worked intimately with Otto Carque were at once impressed with his distinct simplicity of character, his humble bearing, typical of all true great men whose demeanors are always devoid of pride or arrogance, yet his personality radiated a charm that was singularly pleasing–an honesty and integrity that was truly genuine.

"Patience and self-control were part and parcel of the very depth of his soul. Never had he been known to utter an angry word, to speak without the utmost charity, mercy and consideration. This he termed conservation of vital force, ardently maintaining that a strenuous amount of nerve force is dissipated in fear, anger, hatred, jealousy and envy.

"An inherent faith in his ultimate victory over whatever obstacles impeded his progress in the difficult sphere of food reform–not even the greatest of upheavals could disturb his equilibrium. He stood there like a mighty mountain–poised and fearless, like a shining star out of the darkness of night and ignorance, holding up the torch of enlightenment. It mattered not how difficult the task–how cluttered and roughshod the path, he ventured forth unafraid, persisting in the life-duty he had deliberately chosen: offering for public consumption wholesome unadulterated foods.

"His vision and idealism left him unshaken, enabling him to be of greatest usefulness not only in his pure food merchandising activity, but in the realm of rational dietetics and practical food research. The various publications from his pen are monumental works, crystallizing a wealth of scientific information on food chemistry and nutrition, the culmination of a strenuous life of activity in his self-elected field.

"Detachment was another outstanding characteristic of Otto Carque–his work was performed in the spirit of duty, love and service regardless of reward, fame, fortune or glory–having yielded his energies wholeheartedly and unselfishly to the great tasks at hand. One of his ardent admirers stated with no intention of overestimating Otto Carque's accomplishments, that he was one of America's few really much-needed workers." Address: Wife of Otto Carque.

983. Finkel, Harry. 1935. In memory of Otto Carque. *California Health News* (*Hollywood, California*) 3(2):17. Jan. 25.
• ***Summary:*** A poem of seven stanzas in rhyming couplets. Address: N.D., D.C.

984. Hain Pure Food Store. 1935. Hain 100% pure: Fruit juices (Ad). *California Health News* (*Hollywood, California*) 3(2):3. Jan. 25.
• ***Summary:*** "Black cherry. Red raspberry. Strawberry. Blackberry. Loganberry. Pineapple. Prune. Pear. Apple. Concord grape.

"Pressed from fresh, mature fruit; packed under vacuum; utterly free from sugar, benzoate of soda, or preservatives of any kind; unboiled, uncolored–pure juices.

"Purchasable at most Health Food Stores, as well as at our own. Have you a copy of our Catalogue?" Address: 329 W. Third St. [Los Angeles, California]. Phone: MA. 2588.

985. Irvine, Clarke. 1935. Carque life had no embellishments: German-born French food scientist was like St. Francis in ideals. *California Health News* (*Hollywood, California*) 3(2):3. Jan. 25.
• ***Summary:*** "'To do good as long as I am alive.'

"That might be the motto of a modern order of altruists founded upon the life idealism of Otto Carque, because he admitted to intimates–of which I was one–that that was his ideal in life.

"Otto Carque lived it, yet he was a practical idealist, made a success in business. I spent several summers with this dear old chap. Everywhere we went homes and offices opened to him. He was greeted with open arms, his opinion was sought, his presence valued, his humor enjoyed, and his absence never gave opportunity of criticism or comment.

"He was buoyant, even to the end. At 60 he was just a big boy. Often we went sunbathing, and once in San Jose

© Copyright Soyinfo Center 2021

we had to steal our sun up on the roof of the 'Y' before sunbathing was popular–and permissible. So we trudged upstairs, swung out and climbed the fire escape to gain the coveted roof, where we drank in the sunlight.

"This man never cared anything much for himself. Yet he had all he wanted. His clothes were simple, usually well worn, and everything about him was plain and serviceable–in service to his fellow man. Carque was a Lincoln, a man with a vision, working to free the slaves of civilization. Embellishments on the humble Carque, friend of man, would have been as out of place as a silk hat on Jesus Christ!

"The days of observation at Carque's feet were days of character making for me; learning the lesson of service; finding laws of life that led me into health work, which pays little cash but large sums of understanding, sympathy.

"There was a light in the eyes of Mr. Carque that belonged to heaven; a glow from some plane far removed from this silly commercial one, and those who saw it shining knew their reward. I always introduced him in public with reference to his beaming face. Carque needed no reflector or lenses! He never even wore glasses. When he spoke before the Academy of Health last year, at the time we honored him for his quarter century in health work, he read quotations without glasses.

"He stressed self-control, which induces the simple, natural life. 'We should live close to the soil and go back to the land,' he would tell me.

"At that meeting he spoke on 'Foods in Relation to Health and Longevity,' citing how Mr. Busch, late brewer millionaire, killed himself, as do many rich men who die before their time. 'All premature deaths are caused by throwing the monkey-wrench of drugs, serums and wrong foods into the wheels of the human body,' he declared, in sketching the germ theory of Pasteur.

"Not until the principles of health, sunshine, fresh air and correct diet are taught and practiced in schools, will the present unsatisfactory social order change, he pointed out. These are the most important factors in building a new, better and happier race, he added. 'War is abnormal in man, due to too much meat and luxury, as Socrates said,' Carque quoted. 'The new society must be based on simplicity of eating and living. The land must be restored to the people.'

"Strangely, the mechanical age that Carque said we must eschew, killed him mercilessly. He always said that we must return to the land to survive. 'We can live to 100 years or more if we live rightly'; but city life killed him at only 68, and he was good for another 20 years of work, easily, and many years of retirement to his books and writings." Address: Secretary to Otto Carque, [Los Angeles, California].

986. Irvine, Clarke. 1935. Tomorrow. *California Health News* (*Hollywood, California*) 3(2):1. Jan. 25.
• ***Summary:*** "Death took a bow when Otto Carque died, but the dear old man is now the central figure and will never, never die!" Address: Editor and publisher [Hollywood, California].

987. Modern Health Products Supply Co. 1935. Revitalize "half sick" bodies with vegetable juice. The original, simplified, instant way! (Ad). *California Health News* (*Hollywood, California*) 3(2):13. Jan. 25.
• ***Summary:*** This is an ad for a hand-turned metal juicer, now named the "Health Mine Juice Extractor." Order it now and get a free copy of the *Vegetable Juice Cook Book*, by Bengamin Gayelord Hauser.

A photo shows the juicer mounted on a table. "Doctors and food scientists accept the fact that many physical disorders such as Rheumatism, Arthritis, Constipation, Colds, Anemia, Kidney and Gall Bladder trouble are caused by a deficiency of vital mineral salts and vitamines in the daily diet.

"Raw vegetable juices are very rich sources of these vital mineral salts and alkalinizing elements which the body requires. Instead of eating pecks of spinach or bunches of celery, you can extract the 'blood of the plant' with the aid of the new 'Health Mine' Juice Extractor."

Note 1. This is the earliest document seen (July 2021) concerning Gayelord Hauser in connection with Modern Health Products in Milwaukee.

Note 2. A short article on p. 15 of this issue notes that Hauser's "fruit and vegetable juice extractor" is now made in the USA [rather than in Europe], it "is a new production, distributed from Milwaukee by Modern Health Products, whose line he recommends. Its chief feature is simplicity, juice and pulp coming out the front without messiness or spilling. It was perfected after two years shopwork and trial of numerous juicers. It can't leak, is easily cleaned, and with it goes a free instruction and recipe book.

Note 3. This is the earliest English-language document seen (June 2006) that uses the term "Juice Extractor" in the name of or to refer to a juicer.

"Juice therapy and feeding were originated by Dr. Hauser when he gave the world potassium broth, liquid vegetables for re-vitalizing and chemicalizing the bloodstream." Also, Hauser has written another book titled *Here's How–to Be Healthy.* Address: 1428 North 24th Street, Milwaukee, Wisconsin.

991. Lovell, Philip M. 1935. Care of the body. *Los Angeles Times.* Feb. 10. p. K13-15.
• ***Summary:*** The section titled "Otto Carque" is his well-written obituary: "Orthodox medicine honors the men who have achieved greatness in its field: Pasteur, Metchnikoff, Koch, [Paul] Ehrlich.

"The field of natural therapy has its great pioneers. The last century produced Father Kneipp, Dr. Benedict Lust, and the late Dr. Harry Lindlahr, and several others–men who have fought, studied, and devoted every atom of their entire lives to the welfare of mankind.

"With these great men we must list our own beloved Otto Carque, who has gone on the journey which all of us must some day take. His name is known to practically every Care of the Body reader.

"Coming to Los Angeles nearly forty years ago, this French-named Alsatian [from Alsace-Lorraine, part of Germany from 1871 to 1918, after which it was returned to France by the Treaty of Versailles] was the first pioneer in the California pure food movement.

"Many knew him merely as a seller of health foods. Those who were more intimate with him–Harry Ellington Brook, myself, and scores of others who are doing research and investigation in the food movement–knew him as a great scientist, a thinker, an idealist, a lover of mankind.

"Otto Carque's name on food was virtually a warranty of its purity. He was the first to storm against the chemical pollution of foods–their adulteration with various vicious preservatives.

"He was a co-worker with great men, carrying on an active correspondence and joint endeavor with men of the stamp of the late the head of the Bureau of Chemistry of the nation [1901-1912], a man who has done perhaps as much as anyone in the world to better the food conditions of America.

"He had a keener knowledge of soils, of foods and their values, of ways and methods of maintaining good health through diet, than perhaps any other man in this country.

"In spite of his being nearly 70 years of age, one could find him doing his fourteen to sixteen hours' work each day, supervising, directing, and doing the manual labor incident to distribution of his foods which have reached nationwide circulation.

"He was the author of several extraordinarily fine books which have been read by scores of thousands.

"The sick and the well owe much to Otto Carque as a pioneer, as one unflinching in his zeal for their interests.

"He was in vigorous health to the moment of his fatal accident. His brain was clear; his mind as staunch of purpose as ever up to the time the carelessly driven automobile struck him.

"He was not driving when he was struck down. He was waiting for a street car on Santa Monica Boulevard. He lingered for five days with a crushed chest and died at the General Hospital.

"A pioneer of California has passed. A greater pioneer for the welfare of mankind has gone over the line.

"Someday we shall really know and understand Otto Carque for what he was–one of the nation's greatest champions for better health, pure food, correct scientific food research.

"Care of the Body, its readers, and its followers pause, thus, to do him this last homage."

Note 1. Dr. Harvey S. Wiley, chief chemist at USDA 1883-1912, was a pioneer in the pure food movement that began in the 1870s in America. He was instrumental in securing passage of the Food and Drug Act of 1906, and in its effective administration. He has been called the father of the FDA. Address: N.D. [Naturopathic Doctor].

992. Bower, Frank W. 1935. Re: Soy bean bread and advertising in book about dietetics. Letter to Mr. Bill Baker, Ojai, California, Feb. 26. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "Mr. Edward Higgins, the food distributor of Los Angeles, told me all about your advertising work as a baker, particularly about the soy bean bread. I had already heard of your national feats as a national man.

"I am writing a book on dietetics. The main feature of the book will be an elaborate food chart embracing over 1,000 foods and food combinations I am enclosing sample pages showing the legumes (beans) on the chart."

Describes how the book will be published and promoted. Ads cost $50 per page. "The first issue of the book will be 2,000 copies and will go through the health food stores of the State; to those who buy the health foods such as your bean bread." Address: B.A., Director, Dietetic Research Foundation, 451 W. Central Ave., Sierra Madre, California. Phone: 3231.

993. *Naturopath and Herald of Health* (*New York City*). 1935. Otto Carque [obituary]. 40(2):35. Feb.
• ***Summary:*** "In the passing of Otto Carque of Los Angeles, the health food movement loses one of its pioneers.

© Copyright Soyinfo Center 2021

"Late on the night of January 5th as he was leaving a health food store, he was struck by an automobile and dragged about 15 yards." He was taken to General Hospital, where he died on Jan. 10th. "Otto Carque was one of life's noblemen. Kind and considerate to all with whom he came in contact, no man was ever as genuinely and universally beloved as this aristocrat of our movement. He started making health foods long before the present generation of professional men and health food manufacturers were set out of their cradles."

"Otto Carque, unlike most men who devote their lives to business, was a scholar. His books were among the first to be written on foods and through the years enjoyed a wide circulation. He 'knew whereof he spoke' for they were the result of long and arduous research and experimentation.

"We knew and loved Otto Carque and we shall miss him very much. May his soul rest in peace."

994. *California Health News* (*Hollywood, California*). 1935. Memorial for Carque in N.Y. April 5. p. 12.
• ***Summary:*** "New York–A large memorial meeting was held here at Hotel Imperial, on March 21, under auspices of the League for Health Education, to Honor the late Otto Carque of Los Angeles as one of the outstanding leaders of the health movement.

"Guest speakers were Dr. John Maxwell, Chicago [Illinois], chairman; Dr. Benedict Lust, Ralph E. Sunderland, George E. Harter, president Defensive Diet League of America; Dr. Sidney E. Smith, Max Warmbrand, Samuel Rosenbloom, J.E. Sidimus, Vegetarian society" [of New York].

996. *California Health News* (*Hollywood, California*). 1935. Propose Otto Carque biography. April 19. p. 11.
• ***Summary:*** "John Stermer, who has a little ranch over in Hawaii, where he is living the natural life,... one time friend of Otto Carque, wrote an encouraging letter after the memorial for the late food chemist and friend of humanity. 'I wonder if a biography of Carque would have enough sales to justify printing? If so, you are he man to write it, Mr. Stermer suggested to Health News.

"'Most pioneers are men different from the ordinary run of humanity–hence 'character' is worth writing about.'

"'An incident: Carque used to catch the same street car to work every morning from 1605 Magnolia. He was sewing a button on his pants one morning and with his job only partly done, heard his car coming, caught it, and finished sewing on the button in the car!

"'That was Carque. A natural act to the natural minded, but excruciatingly disturbing to the formal minded.

"'Otto having nursed a swaddling infant (the sale of undenatured food) lived to see it become a healthy young giant, and similarly of drugless healing. But it was a shame that he was cheated of seeing the realization of his other dreams–the movement of agriculture to the tropics. He was 'the peasant scientist.' The future will respect that appellation instead of the derogatory sense in which it is now used.

"'He wrote me last year that it was the dream of his life to visit the South Seas–alas! he never lived to enjoy a much deserved trip to these lovely islands.'"

"Editor's Note–If everyone who knew or was in any way associated with Mr. Carque has any information, data, anecdotes, or stories pertaining to the life of this dear old man, please send them to the editor of Health News. It will be printed, and eventually a biography will be compiled, using this material with the utmost care and accuracy. Kindly send as early as possible so we can start this work, which should be completed to honor Mr. Carque's memory."

997. Crawford, Aird. 1935. San Francisco Bay and vicinity. *California Health News* (*Hollywood, California*). April 19. p. 10.
• ***Summary:*** The section titled "Health show success" states: "San Francisco–Over a thousand health fans attended the health show put on by the Vegetarian society, which cleared a profit while exhibitors had satisfactory sales. They plan a show for Civic auditorium next year. It lasted ten days, with Drs. Bowen, De Latorre, Sykes, Burke, and Murphy making regular talks. Music was by Fraternal fellowship orchestra. Exhibitors were: Malvitose, Pleiner's store, Dr. De Latorre products, Dr. Gould's, Fagley Supreme Cooker, Fraternal Fellowship Anti-Vivisection societies, and others."

Note: Next to the small article is a directory of health food stores in San Francisco Bay and Central California: San Francisco (5 stores), Oakland (2), San Jose (1), Santa Cruz (1).

998. *Frederick Post* (*Maryland*). 1935. Arrested for violation of District Act: Paul C. Bragg, formerly Y director of Frederick, held in $1,000 bond. April 26. p. 1.
• ***Summary:*** "As a capacity audience waited in the Masonic Temple in Washington [DC] Wednesday night to hear Paul C. Bragg lead them to health by revelation of South Sea secrets, he was being arrested in his dressing room. The charge placed against him is violation of the District of Columbia healing arts practice act."

© Copyright Soyinfo Center 2021

Bragg is well known in Frederick, Maryland, where he resided in 1919 while acting as physical director of the Y.M.C.A. "At the termination of his contract he departed for South Carolina and since that time has been reported variously as being in New York, California and the South Seas.

After being arraigned before judge Ralph Given in District Court Thursday, he waived his right to a jury trial. He was accompanied by his secretary, Miss June Day and his attorney, Herbert R. Grossman. His activities have been condemned by the American Medical Society, members of the District Medical Society and the Better Business Bureau in Washington, DC, and other cities.

"Bragg held a series of free lectures at the Washington auditorium starting March 22, and then a series of six special classes, for which $20 was charged. Between 350 and 400 attended the classes running from March 30 to April 4." The District government claims that the classes netted Bragg as much as $6,000 in a single week. The lectures and classes will be discontinued while the case is pending.

999. *Washington Post.* 1935. Arguments commence in Prof. Bragg trial. May 2. p. 30.

• ***Summary:*** Prof. Paul C. Bragg, health lecturer, has been charged with violating the District [of Columbia] healing arts practice act.

Prof. Bragg has testified that he does not attempt to cure or diagnose diseases; he only lectures on health, proper foods, and correct living.

Yesterday final arguments in the trial opened in Police Court and a motion to dismiss charges against Bragg was over-ruled by Judge Ralph Given.

Today the trial will go into its fifth day. Prosecutor Louis Whitestone and Defense Attorney Robert Grossman are expected to submit their cases to Judge Given.

1000. In the Superior Court of the State of California, in and for the County of Alameda: Complaint. Nettie C. Pendleton, Plaintiff vs. Harry J. Pendleton, Defendant. 1935. Alameda County, California. 7 p. May 6.

• ***Summary:*** The mother of Patricia Pendleton [later Patricia Pendleton Bragg] is filing for a divorce from Patricia's father. Patricia is about 6 years old (6 years and 7 days to be exact). Patricia's parents were married on 10 July 1928 [and have therefore been married 6 years, 9 months and 26 days]. Patricia's parents separated from each other on or about 10 November 1933, after they had been married for about 5 years and four months. At the time her parents separated, Patricia was 4 years, 6 months and 12 days old.

Section V lists is detail all community property belonging to Patricia's parents.

Section VI states that the couple has two children, the younger being Harry Pendleton Jr., born 31 June 1930.

Section VII lists the seven most important complaints / grievances of Patricia's mother against her father. In general she alleges that her husband "has willfully, wrongly, cruelly and inhumanely inflicted upon plaintiff, and still does... a course of great and grievous mental suffering and anguish." On numerous occasions he used violent language toward her and called her shameful names. He threatened "to throw her out the window and to do everything in the world to make life miserable for her." He constantly nagged her, found fault with her, and on numerous occasions ordered her from the house. In addition: "(e) The defendant, Harry C. Pendleton has for more than one year last past next immediately preceding the commencement of this action refused to contribute to the support and maintenance of plaintiff... [illegible] them with any money whatsoever for the necessities of life or of any money whatsoever.

"(f) That defendant, Harry C. Pendleton, refuses to meet current bills causing the gas, water, and milk services to be discontinued thus depriving plaintiff and said minor children of the necessities of life."

Section VIII describes the divorce settlement. The father earns about $400 a month. The mother has no money, means or funds with which to maintain and support herself and two minor children, or to pay the costs of this legal action. Therefore, the mother is awarded the sum of $100 each month (to be paid by the father) for ongoing maintenance and support, plus $25 for immediate costs of suit incurred and $500 to cover her legal fees.

Section IX. The mother "is a fit and proper person to have the care, custody and control of the minor children."

Part II is a second, separate, and distinct cause of action. The bonds of matrimony now existing are forever dissolved. The mother is awarded one half of all community property. Signed (signatures): The two attorneys for the plaintiff, incl. Edwin Wilcox. The plaintiff, Nettie C. Pendleton. The notary public, on 6 May 1935.

Note 1. The final judgment of divorce was issued on 8 Oct. 1935.

Note 2. Patricia later maintained in at least one interview that she had a very happy childhood.

Note 3. More about Patricia's father: 1900–A book by Harry C. Pendleton is published titled "The Exempt firemen of San Francisco: their unique and gallant record." Published in San Francisco by Commercial Publishing Co. 269 pages. Illustrated. As of April 2010, this book is owned by 15 California libraries. Note that this book was published six years *before* the San Francisco earthquake and fire of 1906. The firefighters were volunteers.

1911 Jan. 29–An article in the *Oakland Tribune* titled "Gambling in hotels" begins: "Chief of Police Seymour's crusade against gambling has brought to the surface and suppressed a number of games in the large hotels... Harry Pendleton's game at the St. Francis was one of these. Pendleton was a popular man about town who was supposed to play poker at his apartments at the St. Francis with his

© Copyright Soyinfo Center 2021

friends for diversion now and then." When manager James "Woods was informed by the police that Pendleton was charging a percentage from the players as a profit to himself, he promptly ordered the game stopped."

1921 Nov. 26–An article in the *Oakland Tribune* titled "Suit for divorce is begun by wife" states: "Mrs. Winnie Pendleton [Harry Pendleton's first known wife] of Piedmont has filed suit for divorce against H.C. Pendleton, charging that he remained out at night and on one occasion failed to attend his own birthday party after guests had been invited. The couple were married in 1911 and separated last year. There were no children." Address: Alameda County, California.

1001. *Frederick Post* (*Maryland*). 1935. Healer had no license, fined: P.C. Bragg, formerly of Frederick, pays $100 in Washington. May 17. p. 1.

• ***Summary:*** "'Professor' Paul C. Bragg, bronzed, curly-haired and now very much chagrined professor of South Sea health secrets, paid a $100 fine and packed his bags for California Wednesday after Police Court Judge Ralph Given found him guilty of practicing the healing arts without a license in Washington [DC].

"Arrested as he stepped onto the Masonic Temple stage last month, the self-styled teacher scowled and pouted through a week's trial in a court jammed with enthusiastic 'pupils.' But his flock was absent when the verdict was suddenly given after two weeks' advertisement."

The judge said Bragg had overstepped the bounds prescribed by the 1929 law. This was the first case to be prosecuted in Washington under the statute. Slightly dazed, Bragg said he had never intended to violate the law. He had distributed a questionnaire and recommended two products, Ok-Lax and Vitalier, as remedies for ills. He said he had lectured in almost every state in the USA during the past 18 months, and had never been in trouble before.

1002. *San Bernardino County Sun* (*The*) (*San Bernardino, California*). 1935. Company seeks to form corporation. June 27. p. 7, col. 8.

• ***Summary:*** "Articles of Incorporation of the Loma Linda Food Co. were filed with County Clerk Harry L. Allison yesterday. The company, a nonprofit organization, will manufacture health foods, it was said.

"Five of the directors are residents of Loma Linda and are E.H. Risley, H.H. Haines, Henry F. Meyer, H.B. Thomas and Otis A. Hudson. Other directors are I.J. Woodhouse, G.A. Roberts, F.R. Eastman, Percy T. Magan, G.H. Curtis, all of Los Angeles; Glenn Calkins, Glendale; E.H. Hackman, Riverside."

1003. Lager, Mildred. 1935. Food facts. Los Angeles, California: House of Better Living. 228 + 10 p. No index. 23 cm. [34 ref]

• ***Summary:*** Contents: 1. Purpose of food. 2. Classes of food. 3. Natural foods are best. 4. Acid-alkaline balance. 5. Minerals. 6. Vitamins. 7. Proteins. 8. Carbohydrates. 9. Fats. 10. Fruits. 11. Vegetables. 12. Beverages. 13. Better cooking. 14. Food combinations. 15. The mental side of health. 16. What is the "House of Better Living."

Pages 67-68 contain a very positive section on soy beans and foods made from them, including whole soybeans, "curd cheese, resembling cottage cheese [tofu], and soy bean milk... Other soy food products are soy butter [no description is given; this is probably soynut butter from T.A. Van Gundy's La Sierra Foods, but it could be margarine made from soy oil], soy loaf (combined with gluten), soy sandwich spread, soy bologna, soy oil, soy sauce, soy ready-to-serve breakfast foods, coffee substitute, as well as soy flour. Soy flour is yellow and fluffy, and can be used in all baking... Soy macaroni, noodles, spaghetti, bread, and pancake flour are also on the market. Soy beans are also sugar coated for candy and toasted as peanuts. They are a wonderful food for animals and have been used in that way in this country for years. Today the governments of Europe and America are devoting a great deal of attention to the soy bean as human food and the next few years will see an increased consumption, as well as many new soy products."

Page 75 contains a nutritional analysis of soy beans.

In the chapter on Acid-alkaline balance (p. 22-25), foods with the most acid ash are egg yolk and oysters, followed by eggs, most fish and meats. Foods with the most alkaline ash are lima beans, string beans, dried beans, spinach, raisins, figs, dates, and dried milk, followed by soy beans, soy bean tea, and most vegetables. The author believes that one should keep an alkaline balance in the body. Sleep is a great alkalinizer.

The subsection titled "Lima beans: states: "Dr. Sansum of Santa Barbara was instrumental in having lima bean flour made, and Bill Baker of Ojai, California pioneered this field, developing the original lima bean bread and lima bean pancake flour."

This is not a vegetarian book. Meat and dairy products are discussed at length, and their consumption is not discouraged. However this is the earliest book seen that uses the term "natural foods" prominently–in this case as a chapter title.

Also discusses (see index for page numbers): Acidophilus milk, alfalfa (alfalfa tea has alkaline ash, p. 35), almonds, almond oil, aluminum, avocado, bran, carob beans, chufas, cottonseed, cottonseed oil, garbanzas, kephir, lentils, lima beans, linseed, margarine / oleomargarine, olive oil, olives, palm oil, palm kernel oil, peanuts, peanut oil, rape seed oil, sago, sesame oil.

Note 1. This is the earliest document seen (Sept. 2009) concerning Mildred Lager and soy.

Note 2. This is the earliest document seen (Jan. 2014) that contains the term "soy food products."

© Copyright Soyinfo Center 2021

Note 3. This is the 2nd earliest document seen (July 2021) that mentions a food or drink product ("alfalfa tea") made from alfalfa. This is also the earliest English-language document seen (July 2021) that contains the term "alfalfa tea." It was used for its alkaline ash. Address: House of Better Living, 1207 West 6th St., Los Angeles, California. Phone: Mutual 2085.

1004. *California Health News* (*Hollywood, California*). 1935. Mrs. Carque carries on work of late husband. 3(15):1-2. Aug. 2.
• ***Summary:*** "Last January a woman motorist plowed over Otto Carque..." After the funeral, his wife decided firmly to carry on his work. "And Lillian Carque, New York girl, former advertising writer, and competent assistant to the beloved Otto, is still bravely carrying on at the spacious Carque plant, 1315 Maple, Los Angeles." She and her staff are determined to stand behind "every item bearing the famous Carque label which for 25 years has stood for pure, safe, undenatured natural foods.

"Mrs. Carque, in the six months that her husband has been gone, has worked night and day to grasp his end of the work, and declares that no one will ever comprehend the tremendous amount of toil and study that he accomplished, often working long into the night, and very early in the mornings. He did research work, financial matters, was main buyer, and supervised the production, while she attended to the business end."

"The Carque line is complete, with a large number of items, ice cream powders, an unfrozen ice cream bar, vegetable salt and seasonings, wholewheat pie flour, unsulphured fruits, nuts and nut butters, an improved clarified health honey. His last book 'Vital Facts about Foods' is still enjoying a worldwide sale.

"This firm is operating wholesale only, but a complete Carque line is available at Jones' Grain Mill, 322 South Hill, and of course at other health food stores everywhere.

"Mrs. Carque sums up her seven years' marriage to Otto Carque merely as 'an apprenticeship to give me the opportunity to carry on after his departure, hoping to perpetuate the hard pioneering work to maintain quality and purity in the nation's food supply.'

"We indeed salute Mrs. Carque!"

A large portrait photo shows Lillian Carque.

1005. *California Health News* (*Hollywood, California*). 1935. Where famous Carque foods were once made (Photo caption). 3(15):4. Aug. 2.
• ***Summary:*** The lower caption reads: "This is the old Hollywood plant of the Otto Carque company, at 729 Seward, (now the Alberty Foods building), taken about 1929. The late Mr. Carque is seen with Mrs. Carque at the right of the group behind the radiator of the company truck. Some of this staff are still with the firm."

Across the top of the two-story brick building is written "The Natural Foods Building." About 14 people are standing by the curb and a driver is inside the delivery truck, which has wooden spoke wheels and the word "Carque" legible on one side.

1006. *California Health News* (*Hollywood, California*). 1935. Soy bean bests meat by 3 to 1. 3(15):9. Aug. 2.
• ***Summary:*** "Dresden, Germany–Dr. Ragnar Berg, famed City hospital food scientist who wrote the *Dictionary of Foods* with Benjamin Gayelord Hauser, recently conducted fundamental researches on protein requirements, found that soy beans are a splendid source.

"In his paper he quoted Rose and McLeod who found that a human organism is able to store three times as much nitrogen from a soybean food as from meat. This food leaves the stomach in only 2 1/3 hours, while meat takes three to five hours. Unlike meat it is acid-reducing and does not overburden the stomach."

1007. *California Health News* (*Hollywood, California*). 1935. Carque plant supplies quarter million users. 3(15):8-9. Aug. 2.
• ***Summary:*** Photos show: (1) The exterior of the Carque Natural Foods plant, with employees standing in front of the building and parts of two cars at each side. (2) People working at a tables inside the plant, packaging foods.

The text below the photo reads: California fruits and food products that are used in every state and many foreign lands are put up in this modern factory of the Otto Carque Company, 1315 Maple avenue, Los Angeles, managed by Lillian Carque, widow of the late beloved Otto Carque, killed last January by an automobile.

This is the last picture made at the place while Mr. Carque lived. In the upper photo he stands with his wife by the door; below he is seen behind a loaded table at the right where he loved to work with his faithful staff, who have carried on his work with Mrs. Carque, seen at the extreme left checking orders for shipment to distant lands. Others are at work making Carque nut-butters, health candies and other pure, natural foods that have borne the Carque label for a quarter of a century, bringing fame to California. It was Otto Carque who developed and made popular the black mission fig of this state.

1008. Carque (Otto) Co. 1935. The symbol of trustworthy and unimpaired natural foods (Ad). *California Health News* (*Hollywood, California*) 3(15):16. Aug. 2.
• ***Summary:*** "California's natural foods pioneers." A large photo shows the full line of Carque products, about 37 in total. These include: Bottled olive oil. Black cherry juice. Grape Juice. Two samplers of fruits and nuts. Alfalfa flour. Wheatose. Fig cereal. Mint tea. The circular logo "Carque Natural Foods of California" appears in three places.

Note 1. This is the earliest document seen (July 2021) that gives the company name as Otto Carque Co.

Note: This is also the earliest English-language document seen (July 2021) that contains the term "alfalfa flour." It was probably used for its alkaline ash. Address: 1315 So. Maple Ave. (Wholesale Only), Los Angeles, California. Phone: PRospect 1097.

1009. *Los Angeles Times.* 1935. The dial. Aug. 2. p. A10.
• ***Summary:*** This is a schedule of radio programs in the Los Angeles area throughout the day. Mildred Lager has a program on KFAC from 7:45 to 8:00 a.m. Note: This is the earliest document seen (Feb. 2004) that mentions Lager's program. However she apparently started on KFAC in Jan. 1934.

1010. Carque Pure Food Co., Inc. 1935. Carque's pure almond butter: Nature's finest food (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 1(1):3. Sept. 11.

• ***Summary:*** "Carque's delicious nut butters make delightful salad dressings; give exquisite flavor to nut loaves; are excellent for creaming soups and cooked vegetables and a rare delight as a sandwich spread."

Note 1. An illustration shows the circular label of this product. No company name or address is given. This ad was published 8 month's after Otto Carque's death.

Note: Mildred, always an excellent businesswoman, has now started to use her newsletter to attract paid ads from manufacturers whose products she sells. This and all subsequent issues contain many such paid ads. Moreover, when she sees a new health food product (such as Ficgo, a coffee alternative) whose maker is a potential advertiser, she will praise that product in her newsletter, and before long an advertisement will usually appear (For Ficgo, see Jan. 1936, p. 2).

1011. Lager, Mildred. 1935. History of The House of Better Living. *House of Better Living* (*Newsletter, Los Angeles*) 1(1):1. Sept. 11.
• ***Summary:*** The House of Better Living will be two years old on 25 Oct. 1935. "It was started, and still is, owned and operated by Mildred Lager, whose sole purpose was to teach people about food and healthful cooking. Health is more than food, and that is why she called it *Better Living.* Miss Lager... started with free healthful cooking classes, then came radio..." [by Aug. 1935].

The House of Better Living "is not a health food store, it carries only natural foods minus the highly advertised "Health Food Products... Tune in to KFAC [radio] every Monday, Tuesday, Wednesday and Thursday A.M. at 7:45, and listen to Miss Lager. Come to the free educational class every Wednesday P.M. at 1:30. Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1012. Lager, Mildred. 1935. Healthful and different recipes. *House of Better Living* (*Newsletter, Los Angeles*) 1(1):1. Sept. 11.
• ***Summary:*** Gives 5 recipes using natural foods. "Soy or lima bean waffles may be made with Bill Baker Waffle Flour." Ice box dessert calls for "24 Cubbison Melba wafers, or Whole Wheat Vanilla Wafers, as made by the Grist Mill."

Melba toast dressing and bacon calls for "2 cups Cubbison's Melba toast crumbs." Address: 1207 West Sixth St., Los Angeles, California.

1013. Lager, Mildred. 1935. We carry: *House of Better Living* (*Newsletter, Los Angeles*) 1(1):3. Sept. 11.
• ***Summary:*** "One hundred per cent whole wheat cookies, crackers and bread. Have you tried Olson's 100% whole wheat raisin bran bread?

"We also have all the Soy Bean products, soy cookies, crackers, and Bill Baker's soy and lima bean bread.

"We carry a full line of all the Cubbison products, both in packages and bulk." Address: 1207 West Sixth St., Los Angeles, California.

1014. Lager, Mildred. 1935. Why natural foods are best. *House of Better Living* (*Newsletter, Los Angeles*) 1(1):2. Sept. 11.
• ***Summary:*** "Natural Foods, as Nature provided them, supply all our needs. All food is good. Use the proper amounts, properly prepared and combined.

"Natural foods contain what Nature intended they should contain. They may not be as good looking, keep as well, or be as palate tickling as devitalized foods, but are better from a health standpoint. Refined foods have part or all of the minerals removed, and minerals are what we need. Vitamins go hand in hand with minerals and if one is

© Copyright Soyinfo Center 2021

destroyed the other is also. Natural foods contain both the minerals and vitamins.

"Many minerals are found in the outer layers of foods, such as seeds, cereals, etc., and should not be removed. That is why brown rice, whole grains, 100% whole grain meals and flours are the best to use.

"Natural foods are 'live foods' and do not keep well. Bugs leave devitalized foods alone. For this reason it is best to buy small quantities as needed."

"Natural Foods do not have to be called Health Foods. To many it suggests sickness, diet, food fads, etc., and one does not have to be sick to use them. All natural foods are health foods." Address: 1207 West Sixth St., Los Angeles, California.

1015. Lager, Mildred. 1935. Healthful philosophy. *House of Better Living* (*Newsletter, Los Angeles*) 1(1):2. Sept. 11.
• ***Summary:*** "Let *Smiling Through* be your theme song." "Change your thoughts and you change your life."

"Soy beans are one of the most economical proteins."

"High alkaline ash foods: Lima beans, spinach, string beans, parsnips, potatoes, soy beans, celery, raisins, figs, dates, dried milk, almonds."

"Quality always pays. It is not what you pay but what you get for what you pay that counts." At the top of this column is a portrait photo of Mildred Lager.

Note: On page 4, col. 3, is a section about sesame oil. Address: 1207 West Sixth St., Los Angeles, California.

1016. *House of Better Living* (*Newsletter*). 1935-1940. Serial/periodical. Los Angeles, California: House of Better Living. Mildred Lager, editor. Monthly. Vol. 1, No. 1. 11 Sept. 1935 to Vol. 12, No. 59. Nov. 1940.
• ***Summary:*** See next page.The issues are numbered sequentially from 1 to 59. An original copy of each issue of this newsletter up to and including No. 36 (Dec. 1938) is owned by Soyinfo Center. Held in a 3-ring binder, they are preceded by Mildred Lager's personal 6-page handwritten index (by subject, in pencil, on lined paper) to important articles, recipes or information in all the issues. For example (using all those that mention soy plus a few others): Breads–Soy wheat germ muffins, [issue] #11, #14. Soy ginger muffins #19. Meats and dressing–Soy-vegetable hash, loaf, and patties #25. Natural foods #1. Proteins–Vegetable #3, #5. Pancakes–Soy and cornmeal #14. Soy beans–#22, #25, #29. Salads and dressing–Soy bean, celery, corn, carrot #21. Vegetables–Soy bean loaf #10. Soy beans, plain cooked #11.

After No. 36, Soyinfo Center owns only photocopies of No. 42 (June 1939), No. 46 (Oct. 1939), No. 49 (Jan. 1940), No. 53 (May 1940), and 59 (Nov. 1940).

In Oct. 1940 the address of the House of Better Living changed to 3477 West Sixth St. The phone no. changed to EXposition 8144. Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1017. *Los Angeles Times.* 1935. What's doing today. Sept. 20. p. 22.
• ***Summary:*** Clarke Irvine will speak at the California Academy of Health dinner-dance, at the Royal Palms Hotel, 360 South Westlake avenue, 7 p.m.

1018. **Product Name:** Bill Baker's Soy and Lima Bean Bread (Unsliced).
Manufacturer's Name: Baker (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1935 September.
New Product–Documentation: House of Better Living. 1935. 1(1):3. Sept. 11. "We carry:... We also have all the Soy Bean products, soy cookies, crackers, and Bill Baker's soy and lima bean bread." House of Better Living Catalog. 1936. March. p. 8. $0.16/loaf. Talk with Ben Kahan. 1983. Dec. 4. Kahan founded Kahan & Lessin, which was Bill Baker's first distributor. Baker pioneered soy flour in Los Angeles baked goods. The elder Vandercook ground the flour for him at El Molino Mills. The product was probably 16-20% soy flour and the rest high gluten unbleached white flour.

Note: This is the earliest document seen (July 2021) that mentions El Molino Mills in connection with soy.

1019. **Product Name:** Bill Baker's Prepared Soy Bean Pancake or Waffle Flour.
Manufacturer's Name: Baker (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1935 September.
New Product–Documentation: House of Better Living. 1935. Sept. 11. p. 1. House of Better Living. 1935. Oct. 11. p. 3. House of Better Living Catalog. 1936. March. p. 5. 2 lb. for $0.30.

Ad in Let's Live. 1942. Dec. 15. p. 9. "Also rice and taro cookies, taro or soybean waffle and pancake flour. At leading health food stores all over America."

1020. Davis, Adelle. 1935. Optimum health. Los Angeles, California: California Graphic Press. 247 p. Index. 20 cm. [235 ref]
• ***Summary:*** Contents: Part I: The joy of optimum health. 1. The joy of optimum health. 2. Building resistance. 3. Vitamin-A requirements. 4. Our changing diet. 5. The need of healthy nerves. 6. Healthy connective tissues. 7. Prevent tooth decay. 8. Calcium and phosphorus needs. 9. Sterility, pregnancy, and lactation. 10. Longevity. 11. Mineral needs. 12. Alkaline-ash and acid-ash foods. 13. Food classes. 14. Proper elimination. 15. Build a strong chain. 16. The goal of optimum health.

Part II: The fun of reducing. 17. The fun of reducing. 18. Preliminary reducing diet. 19. "I can't eat so much." 20. Rapid reduction. 21. Incentives for reducing. 22. Mental attitudes toward reducing. 23. Successful reducing. 24.

The House of

Better Living

Vol. I — Los Angeles, California, September 11, 1935 — No. 1

we go to press

in this our first appearance of a periodical, in which . . .

We hope to better acquaint you with the House of Better Living. How do you like it? If you do, we will continue making it a monthly publication that you can file with your recipes and menu sheets (please notice the punched holes for this purpose). In this publication we hope to give you notice of our activities, helpful ideas, recipes, etc. Any suggestion or requests that you have will be greatly appreciated. If you desire we can have an open forum, etc. It's another idea and let's see how it works out.

history of the house of better living

THE HOUSE OF BETTER LIVING is still an infant. It will be two years old October 25, and we suggest that you watch for that date. *The House of Better Living* is just the development of an idea, and many of you have watched its birth and growth. It was started, and still is, owned and operated by Mildred Lager, whose sole purpose was to teach people food and healthful cooking. Health is more than food, and that is why she called it *Better Living*. Miss Lager, who thoroughly understands her subject, started with free healthful cooking classes, then came radio, and so *The House of Better Living* has been one development after another. Today it is filling a real need, and has thousands of friends.

It is not a health food store, it carries only natural foods minus the highly advertised "Health Food Products." Miss Lager is very careful of what she indorses, and stresses food facts so everyone can judge for themselves.

Tune in to KFAC every Monday, Tuesday, Wednesday and Thursday A.M. at 7:45, and listen to Miss Lager. Come to the free educational class every Wednesday P.M. at 1:30. In October, Miss Lager will open her cooking classes for the year. Watch for further announcements on these.

The House of Better Living at the present time carries every type of natural food, reasonably priced, plus better kitchen ware, heavy pans of all kinds, ovenware, pottery, vegetable juicers, food choppers, etc., as well as the Gaffers & Sattler gas range and Leonard refrigerators. And now a beter book department. You are what you eat and think. *The House of Better Living* has both physical and mental food.

All this has been made possible through the cooperation of its hundreds of friends. If it has helped you, help share the burden of this educational institution. Tell your friends, come to *The House of Better Living* whenever you can, or telephone your order. Free deliveries are made with all $3.00 orders in Los Angeles, Glendale, Pasadena, and Beverly Hills. Five-dollar orders are shipped free one hundred and fifty miles from Los Angeles. Ask for the catalogue. *The House of Better Living* offers a real service—there is no other store like it. It tries to be all its name implies.

activities for september

September 4: "Body Building Menus." Mildred Lager.

●

September 11: "The Law of Power." Dr. Gilkerson.

●

September 18: "Adulteration of Foods." Prof. A. R. Beamon.

●

September 25: "Daily Doses of Mental Tonics." Mary Simpson of New Zealand.

●

October 2: "Food Fundamentals." Mildred Lager.

healthful and different recipes

whole wheat waffles

½ cup whole wheat pastry flour
1 teaspoon baking powder
½ cup cream 2 eggs pinch salt

Beat egg yolks, add cream, then flour, baking powder and salt. Beat until smooth. Fold in whites of eggs that have been beaten stiff, but not dry. Bake in ungreased waffle iron until golden brown all the way through. This will make three medium sized waffles.

Soy or lima bean waffles may be made with Bill Baker Waffle Flour.

buttermilk date ice cream

1 pint Knudsen's buttermilk
1 pkg. Vanilla Junket powder
¾ cup chopped dates, or
½ cup date sugar

This may be called a non-fattening ice cream, as no cream is added. The buttermilk and date is an especially good combination, as the acid of the buttermilk helps digest the date. Mix junket powder and buttermilk well, add dates or date sugar, and freeze.

olive oil honey dressing

½ cup olive oil ¼ cup lemon or grapefruit juice
¼ cup B-Z-B honey

Mix in electric mixer, or shake well until white in color and thoroughly emulsified. Keep in refrigerator. If oil separates, shake before using.

ice box dessert

1 pkg. strawberry Jell-well
½ cup whipping cream
24 Cubbison Melba wafers, or Whole Wheat Vanilla Wafers, as made by the Grist Mill

Dissolve Jell-well as usual and cool until it starts to congeal. Beat until frothy and add whipped cream. Place a layer in a glass loaf pan and let become firm. On top place eight cookies and cover with more beaten Jell-well and cream, another layer of cookies, etc., until three layers of each are used. Place in refrigerator for several hours, or until next day. Slice and serve topped with whipped cream and a sprinkling of Barker's Date Sugar.

melba toast dressing and bacon

2 cups Cubbison's Melba toast crumbs
1 cup chopped celery
2 tbsp. minced parsley
½ cup minced green ripe olives
½ cup minced mushrooms

Moisten with vegetable or mineral broth until it holds together. Season as desired. Place in buttered baking dish, cover with strips of bacon and bake in oven until bacon is crisp. If one does not wish to use bacon, nut butter, soy butter, or mashed avocado may be used. Serve as sauce over dressing.

© Copyright Soyinfo Center 2021

Understanding the scales. 25. A plea for slenderness.

Part III: The reward of gaining. 26. Which type are you? 27. Preparation. 28. The gaining diet. 29. The reward of gaining.

Part IV: Suggested menus.

Note 1. This is the earliest document seen (July 2021) concerning Adelle Davis and nutrition. It is also the earliest published book seen (July 2021) written by Adelle Davis. It contains much of the skeleton of what was to become *Let's Eat Right to Keep Fit.*

A brief biography: Adelle Davis was born in 1904. She studied dietetics and nutrition at the University of California at Berkeley. In 1938 she received her Masters (M.S.) degree in biochemistry from the University of Southern California (USC, a private university) medical school. Her early publications appeared both in England and the USA. She wrote many popular books, focusing on the need to get adequate amounts of vitamins and minerals. Her writings popularized foods such as yogurt, wheat germ, and Tiger's Milk. She practiced professional nutritional counseling for 35 years. She was one of the pioneers in the movement for healthier eating. She died of cancer in 1974 at age 70.

Note 2. At "Adelle Davis," Wikipedia (Aug. 2007) says: "In 1935 Stationers' Hall of London, England published Adelle's earliest writing, *Optimum Health,* and in 1939 published her second, *You Can Stay Well."* Address: Los Angeles, California.

1021. *House of Better Living* (*Newsletter, Los Angeles*). 1935. Food Facts, by Mildred Lager (Ad). 1(2):3. Oct. 11.
• ***Summary:*** "$2.00 per copy." On the same page is a small ad for "Bill Baker's Soy and Lima Bean Waffle Flour, Bread... Cookies."

On page 4 is a small ad for the "Grist Mill, 524 West Eighth Street. Health bakery and freshly ground whole grain products."

1022. Lager, Mildred. 1935. Healthful cooking classes: To reopen October sixteenth, every Wednesday at one-thirty. *House of Better Living* (*Newsletter, Los Angeles*) 1(2):1. Oct. 11.
• ***Summary:*** "There will be free classes open to the public Monday and Wednesday afternoons at 1:30 P.M., and Thursday evening at 8:00 P.M. The subject and guests of the next 3 classes are given.

Note: Mildred, always an excellent businesswoman, has now started to use her newsletter (page 1) to promote the cooking classes offered inside her store. Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1023. Lager, Mildred. 1935. K.F.A.C.–7:45 A.M. *House of Better Living* (*Newsletter, Los Angeles*) 1(2):1. Oct. 11.
• ***Summary:*** "Mildred Lager. Every Monday, Tuesday, Wednesday and Thursday." Tells the subject of each program and her guest for the month of October and for "Anniversary week" (Oct. 21-31). Subjects include: Food fundamentals. Herbs and their use, with Dr. P. Rotondi. Cooking class, lesson No. 1. Course on child diet, with Dr. Virginia Hoeppner.

Note 1. Mildred has now started to use her newsletter (center of page 1) to promote her radio program. This feature will continue in all subsequent newsletters.

Note 2. Over the coming years, Dr. Pietro Rotondi was the most frequent guest on her radio program. Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1024. Lager, Mildred. 1935. We are two years old. *House of Better Living* (*Newsletter, Los Angeles*) 1(2):3. Oct. 11.
• ***Summary:*** "October is a big month at the House of Better Living. It is the beginning of our year's work and it is also our anniversary month. Two years ago, October 25th, Miss Lager opened the House of Better Living. It was then an idea, today an institution.

Note: The house is owned and operated by Mildred Lager. Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1025. Live Food Vegetable Juicer Co. 1935. Build radiant health–with vegetable blood (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 1(2):1. Oct. 11.
• ***Summary:*** "Science has at last found an amazing new way to put the vegetable mineral salts and health-giving vitamins into the body! The greatest utensil of the age.

"Food specialists and doctors agree that fresh, raw vegetable juices are builders of rich, red, healthy blood. With this new Live Food Vegetable Juicer you can take a carrot, put in juicer, turn the handle, out comes the life-giving carrot juice."

An illustration shows the hand-turned juicer. Note: This company is owned by Paul C. Bragg. This ad appeared in almost every subsequent issue of this newsletter, until at least June 1939. Address: Box 428, Burbank, California; 126 Liberty St., New York, NY.

1026. *California Health News* (*Hollywood, California*). 1935. Famous Bill Baker foods carry hikers up (Photo caption). Oct. 18. p. 16.
• ***Summary:*** This photo shows a group of about 30 hikers–men and women. The lower caption reads: "Here is the 1935 Mt. Whitney climb of the California Academy of Health as they appeared after the difficult scaling of United States' highest mountain, 14,500 feet, on a diet chiefly of lima and soybean products of Bill Baker, nationally known Ojai valley producer, who furnished the good products to these hikers in order for them to make a test of the nourishing qualities... This annual climb was started by Skipper Clarke Irvine, who founded the Academy in 1933." The names of those who

© Copyright Soyinfo Center 2021

made the three-day trip are given. Incl. Dr. Pietro Rotondi.

1027. **Product Name:** Bill Baker's 100% Soy Bean Fruit Cookies.
Manufacturer's Name: Baker (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1935 October.
New Product–Documentation: House of Better Living. 1935. Oct. 11. p. 3. House of Better Living Catalog. 1936. March. p. 8.

1028. Bullock's. 1935. Presents Adelle Davis (Ad). *Los Angeles Times*. Nov. 4. p. A7.
• ***Summary:*** "Consulting nutritionist and well-known author of 'Optimum Health.' Miss Davis will autograph copies of this book as well as discuss its contents, with answers to problems of the underweight and the overweight and the use of food combinations."

"Tuesday, November 5. 2:30 P.M. Tenth floor assembly. No charge." Address: Broadway, Hill, Seventh [Los Angeles].

1029. Baker's (Bill) Lima Bean Products. 1935. Bill Baker's new Lima and Soy Bean Bread: Pancake and waffle mixture (Ad). *California Health News* (*Hollywood, California*). Dec. 20. p. 11.
• ***Summary:*** "Lima and Soy Bean Bread shipped to any part of the United States. At all health food stores and better markets in the West. San Francisco distributor: Ruth's Health Food Store, 134 Mason and 333 Sutter. Northwest distributor: Clara M. Brewster's Health House, 1621 Third ave., Seattle" [Washington].

This ad also appeared in the issue of 3 April 1936 (p. 9). Address: Ojai, California. Phone: AN. 18425.

1030. *California Health News* (*Hollywood, California*). 1935. Quarters modernized by El Molino Mills. Dec. 20. p. 10.
• ***Summary:*** "Indicative of expanding business, El Molino Mills, 5604 Valley boulevard, operated by E.A. Vandercook, renewed the lease for five years and is undergoing $1,000 worth of improvements."

Note: This is the earliest document seen (Sept. 2009) concerning El Molino Mills.

1031. *California Health News* (*Hollywood, California*). 1935. Thirteenth Bill Baker Xmas cake to White House. Dec. 20. p. 10-11.
• ***Summary:*** "Ojai- Expert bakers are putting finishing touches to the monster presidential cake that Bill Baker, famous lima and soy bean baker, is sending to the White House for the Roosevelt's Christmas Dinner. The entire decoration is being executed by the noted Mr. Baker himself, an artist in this work. He is also an author, having written a textbook on cake decoration.

"Bill Baker's famous World's Fair cake is now on exhibit in the lobby of the Los Angeles Times building, and has been viewed by thousands."

A large photo shows last year's cake. Atop the White House in the center is written: "Christmas Greetings to President and Mrs. Roosevelt from California." The cake itself is made from a mixture of rare California fruits.

1032. Carque, Otto. 1935. Raisins for health. *California Health News* (*Hollywood, California*). Dec. 20. p. 11.
• ***Summary:*** "This is a tiny text on nutrition. The moral of the raisin is: 'Do not be deceived by appearances.' The raisin is a wonder for its size; possibly no other popular fruit contains so much goodness in so small a space."

1033. Carque Natural Foods of California. 1935. Kar-Kay Hygienic Worcestershire Sauce (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 1(3):3. Nov/Dec.
• ***Summary:*** "Wholesome natural meatless fluids, including Kar-Kay (imitation) vinegar, along with quality spices and pure vegetables enter into its competition."

A circular logo with diagonal slash through the middle shows the company's name.

Note: This ad also appeared in the Jan. 1936 issue (p. 3).

1034. Kowan (Dr. M.H.). 1935. Vitamix (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 1(3):3. Nov/Dec.
• ***Summary:*** "A delicious concentrated Food Source, unusually high in vitamins B and E; also a good source of vitamin A, B, D, E and G." "Large 20-ounce can (five weeks supply), one dollar.

Note: This nutritious liquid is a completely different product than the electric kitchen appliance of the same name that first appeared several years later. Address: Noted health authority and lecturer.

1035. Lager, Mildred. 1935. Soy beans are now in the Big League... *House of Better Living* (*Newsletter, Los Angeles*) 1(3):4. Nov/Dec.
• ***Summary:*** "... on the Chicago Board of Trade. Iowa University is experimenting on recipes. We have been doing that right along. New soy products are toasted soy beans, called Beanuts."

1036. **Product Name:** Granose Rissol-nut: Savoury Nut Mix.
Manufacturer's Name: Granose Foods Ltd.
Manufacturer's Address: Stanborough Park, Watford, Herts., WD2 6JR, England.
Date of Introduction: 1935.
Ingredients: Cashew nuts, wholewheat flake, wheatmeal flour, rusk, onion, soya nuts, salt, herbs, spices.
How Stored: Shelf stable.

© Copyright Soyinfo Center 2021

New Product–Documentation: *The British Vegetarian.* 1960. Sept/Oct. p. 249. Granose produces Rissol-Nut in packets, and this can be quickly made up into savouries, roasts, and pasties.

Manufacturer's catalog. 1980. April. "A ground mixture which with the addition of water is ready for making into all types of rissoles, grills, roasts, and pasties."

Note: Pasty (plural = pasties) is a British term (pronounced like the word *nasty*) that refers to a small meat pie or turnover. The term, first used in the 14th century, is derived from the word *paste* meaning dough.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1935. But a note says "Not Applicable." This product does not contain any soy products and is still on the market. The ingredients are now peanuts, rusk, Wholewheat (wheat, sugar, salt, malt), wheat flour, salt, onions, herbs, spices. Label sent by Granose. 1990. July 11. Red, yellow, black, and white box. Soynuts are no longer an ingredient.

Note: This is the earliest known commercial soy product made by Granose Foods Ltd., which is presently (Dec. 2013) owned by the Haldane Foods Group Ltd.

1037. Bragg, Paul C. 1935. Paul C. Bragg's personal health food cook book and menus. Burbank, California: Published by the author. Printed by Aetna Printing Co., Los Angeles. 201 p. No index. 24 cm.

• ***Summary:*** The Introduction to Chapter 22, titled "Meat substitutes or main dishes" states (p. 112): "Variety is the spice of life... Many people can live a vigorous, active, healthful life on a strictly vegetable diet, particularly those who are not engaged in a hard mental occupation. Even then, vegetable proteins, such as soy beans and nuts, can be substituted for meat. To take the place of meat there are the vegetables rich in protein–peas, soy beans, lima beans, kidney beans, Mexican beans, and lentils, and there are on the market many meat substitutes made of nuts and grains. The Battle Creek Sanitarium [Michigan] product, 'Protose,' is available at most fancy grocers and health-food stores. 'Savita' is a seasoning which gives a delicious meat-like flavor to all vegetable cooking. 'Vegex' is a product similar to 'Savita,'...

"The vegetable diet is a very alkaline diet, and should be used three or four times a week by everyone. Vegetable foods are porous, furnish bulkage to the intestines, and enrich the body with valuable organic minerals that are very necessary to maintaining perfect health.

"Soy beans are a marvelous source of vegetable protein, and should be fed to the family several times a week, and they furnish a rich source of energy-building food. They can be soaked over night, and then baked in tomato sauce, with a small amount of onion and chopped mushrooms. The soy bean is a food that the American public has not yet cultivated." Surprisingly, neither this chapter nor this books contains any soy bean recipes! However Vegetable shop suey (p. 116) is served with Savita Gravy or Soy sauce.

Bragg urges his readers to eat "real, natural, live food" (including whole wheat bread–the staff of life) to eat simply with a small number of foods at each meal, only when hungry. Do not worry about combining foods. Avoid white sugar, coffee and tea, salt, seasonings and spices, aluminum cooking ware, alcohol, preservatives, dyes, and white flour. He believes that eating meat (rare and unfried), fish, and eggs are important for building perfect health. Note 1. The 1930 edition of this book contained no recipes using meat or dairy products.

Chapter 11 acknowledges the use of recipes and suggestions from several health food writers and men in the field of Natural Living: (1) Dr. John T. and Mrs. Vera Richter, the leaders of the Raw Food movement in the West. (2) Dr. Philip M. Lovell, distinguished editor of the most widely read health column in the world, the Care of the Body section of the Los Angeles Times [Sunday Magazine. Note 2. The section contained many fascinating ads]. (3) Dr. Henry Lindlahr, the great pioneer Nature Doctor. (4) Otto Carque, chemist, research worker and crusader in the fight for natural foods. (5) Fannie Merritt Farmer's *The Boston Cooking School Cook Book.*

The last three pages each contain a full-page ad for mail-order products available from Bragg at Box 428, Burbank, California: (1) Bragg Dextronized [sic, Dextrinized] (Toasted) Meal with Wheat Germ will keep your energy high and your weight right. 60 cents for a 2 lb. box. (2) "Drink health." An illustration shows a hand-turned Live Food Juicer. Also mentions a large new book titled *Health Cocktails,* by Paul C. Bragg, "nationally famous Health Lecturer." The book "is full of live juice treats." Send $5.95 for both, postpaid to Live Food Products Co., Box 428, Burbank, California. (3) O.K. Lax is a marvelous laxative for relief of constipation and cleansing agent for internal sanitation. 50 cents for one package. Address: P.O. Box 428, Burbank, California.

1038. International Food Science Foundation; Brooklyn Academy of Music. 1935. International Food Science Foundation presents a new series of free lectures by America's foremost food scientist and health educator Bengamin Gayelord Hauser:... (Leaflet). Brooklyn, New York. 1 p. Illust. (Portrait). 23 x 16 cm. *

• ***Summary:*** "... whose daily newspaper column on the subject of "Your food and you" has over one million readers!"

Note: Bengamin Gayelord Hauser was an American advocate and teacher of health foods. Address: Brooklyn, New York.

1039. Kloss, Jethro. 1935. Back to Eden. Takoma Park, DC: Published by the author. 189 p. Mimeographed. 28 cm.

© Copyright Soyinfo Center 2021

Staple-bound (not saddle stitched).

• ***Summary:*** This treasury of herbal lore and vegan cookbook (it uses no dairy products or eggs, replacing them with soy products) is one of the most creative and original sources of early soyfoods recipes, and one of the two earliest Seventh-day Adventist cookbook to contain many soyfood recipes (see also Frances L. Dittes' *Food for Life* published in the spring of 1935). The predecessor to the popular published edition of Back to Eden, it has a dark imitation leather cover and contains many Biblical passages. This book has no title page, copyright page, publication date, or table of contents. The first page (verso) states: "Send orders for 'Back to Eden' to the author, Jethro Kloss, Takoma Park, Washington, D.C., U.S.A., when you cannot secure it from dealers in your locality. Special Notice: This book is now being revised. Some things may be eliminated, and many new things added. I have a regular experimenting outfit, and I am experimenting all of the time. No doubt there will be many new recipes made from soy beans in the Revised book... This Revised edition will be printed in Regular Book Form. Just as this book is being closed up, another most excellent article has been perfected, a Soybean, Whole Wheat Noodle. Send all orders for this product to The Royal Cookie Co., Takoma Park, Washington, D.C... This book is now being copyrighted. All rights reserved."

Underneath the copyright notice, Doris Gardiner has written "Copyright Jethro Kloss 1935." She does not recall where she got that information. No publisher is listed. Note: Takoma Park is now in Maryland, 6 miles north of Washington, DC.

This book is largely about herbs and natural healing. It contains many Biblical quotes.

Soy-related recipes include: Unleavened bread (with soy bean meal, p. 94). Gems (with soy bean flour). Soy bean bread (5:1 whole wheat flour to boiled soy bean meal, p. 97). Soy bean buns or cinnamon rolls (with soybean meal and soybean milk, p. 98). Soy bean cheese (fermented, with raw peanut butter, soy bean milk, and tomato puree, p. 104). Nut cheese No. 1 and 2 (made with raw peanut butter, water, and salt, p. 105. Can be made from different nuts; tastes like cream cheese made from whole milk). Ice cream (made with soy bean milk, dextro sugar, corn starch, and crushed fruits to taste, p. 105). Malted nut cream. Nut milk (with raw peanut butter and Soothe-a-lac {made with cocoa fat}). Soy bean milk (p. 106). Buttermilk (made from soy bean milk, p. 106). Malted nuts (with raw peanut meal), non-dairy butters (with ground peanuts and cocoa fat, p. 107). Nut sauce (made from Vegetarian meat). Peanut butter No. 4. Nayonnaise (with peanut butter and vegetable oil, p. 108). Canned soy beans (using soybeans sprouted about half an inch, p. 111). Soy beans and rice (using sprouted soy beans, p. 112).

How to sprout soy beans, lentils, and grains (p. 112). "Cover 1 pint of soy beans with water and let stand over night. Pour off water. Keep them moist. Rewash daily and keep moist for approximately three days until well sprouted. Allow to stand until sprouts are about ½ inch long. Lentils do not take as long as soy beans.

"Sprouting of any bean or pea turns the protein into peptogen to a very great extent and the starch into dextrose or maltose and the sprouts are very high in vitamines,..."

Original meat #1 and #2 (using gluten and peanuts, p. 112). Granola #3 (with only whole wheat flour and soy bean flour, p. 116). Soybean coffee (p. 118). Note that Kloss has no recipes using whole dry soybeans in an unprocessed or unsprouted form.

"Loma Linda Food Company, Loma Linda, California, Manufacturer of Health Foods," has an ad on p. 189. They list their products, but no soy products are mentioned. Nature's Original Food Co. in Muirkirk, Maryland, is listed on pages 196 and 198. They make or sell strictly vegetarian pure health foods, incl. "Fine grade soy bean flour."

One interesting section is titled "Aluminum utensils for cooking purposes" (p. 80-84); Kloss strongly advises against their use, presenting much convincing but anecdotal evidence describing health problems that both he and other people have had after using aluminum cooking utensils. For example, Kloss bought a tea kettle which was constantly standing on the stove with some water in it. He would drink 2-3 cups of this water each morning, then some more about an hour before dinner. He developed terrible bowel trouble. He tried all kinds of remedies but nothing worked. The conditions grew steadily worse until finally he said to his wife, "Unless something helps me, I will surely die." One day he described his condition to a man, and the man said that the symptoms were similar to those that aluminum poison would cause. He began to research the subject by reading various books and found that "every one who had any practical experience in it condemned aluminum cooking utensils." Yet Kloss does not say that when he stopped using aluminum utensils his health problems disappeared. Kloss then includes a 3-page statement by Dr. Chas. T. Betts of Toledo, Ohio, on the dangers of using aluminum cooking utensils. Dr. Betts became very ill soon after his family began using aluminum cooking utensils. He too investigated the subject in depth and regained his health within 8 weeks after he stopped using aluminum cooking utensils. He has enjoyed good health for the past 17 years. While studying the subject in Washington, DC. he found that the U.S. government had made a thorough investigation of the matter from 1920 to 1925. The Federal Trade Commission Docket 540 contained more than 4,000 pages of closely typewritten testimony from 158 witnesses during the 5 years, after which an official report was made by Edward M. Averill. "Many of the witnesses above mentioned were professors, deans, biologists, and toxicologists from many colleges, some of which are the highest schools of learning in America." Averill's report noted. "The evidence in this record does not prove that they are harmless... It does prove that there

© Copyright Soyinfo Center 2021

are substantial grounds upon which to predicate an honest opinion that they are harmful."

Doris Gardiner notes (Oct. 1990) that "in the revised 1939 edition of Back to Eden, Jethro Kloss eliminated many Biblical texts. He didn't want to turn off anyone that was not religious. He wanted to help everyone." Kloss moved to Brooke, Virginia, in 1920. From there, in the early 1930s (by Sept. 1932), he and his family moved to Takoma Park. Address: Takoma Park, DC.

1040. Photograph of (left to right) Bill Baker, his wife, Clarke Irvine and two other people standing near his home at Lake Sherwood, California. 1935. Undated.
• ***Summary:*** Baker had this home built in the 1930s. A row of concrete steps runs up to the house on the right. Large clumps of pampas grass are on the left. Near the top of the photo, beside the house, an American flag flies at the top of a tall white flagpole.

This 8 by 10 inch glossy photo was sent to Soyfoods Center by Rose Boggs of Ojai, California.

Detail of Bill Baker.

Detail of Clark Irvine.

1041. Photograph related to Sophie Cubbison and the Cubbison Cracker Co. of Los Angeles. 1935. Undated.
• ***Summary:*** *See next page.* The following undated black-and-white photo was donated to Soyfoods Center by Leo Pearlstein of Lee and Associates in Los Angeles, a long-time friend of Sophie Cubbison:

A white delivery truck backed up to a loading dock, where 3 men are loading cases of Mrs. Cubbison's Melba Toast through the rear doors. The California license plate is dated 1935. On the side of the truck is printed "Cubbison's–Bakers of Melba Toast and Melbetts."

1042. Photographs related to Sophie Cubbison and the Cubbison Cracker Co. of Los Angeles. 1935. Undated.
• ***Summary:*** See page after next. The following undated black-and-white photos were donated to Soyfoods Center by Leo Pearlstein of Lee and Associates in Los Angeles, a long-time friend of Sophie Cubbison:

(1) Nine dark delivery trucks and drivers lined up in front of a brick-walled bakery. The trucks appear to be models from the mid-1930s. On the side of each truck is printed "Cubbison's–Bakers of Melba Toast and Melbetts."

of dry, grassy rolling hills. On the side of each is written "Cubbison's." In smaller letters: "Bakers of Melba toast, Cookies, Crackers."

1043. Battle Creek Food Co. 1935? Appetizing health food recipes and menus. Battle Creek, Michigan. 25 p. Undated. Illust. 15 x 17 cm.

• ***Summary:*** On the cover of this booklet is a 3-panel illustration of a family seated at the table enjoying a meal; the daughter is in the left panel, the wife and husband (with suit and necktie) in the center, and the young son (also in suit and tie) in the right panel. The booklet promotes and shows how to use the vegetarian food products made by Battle Creek Food Co.

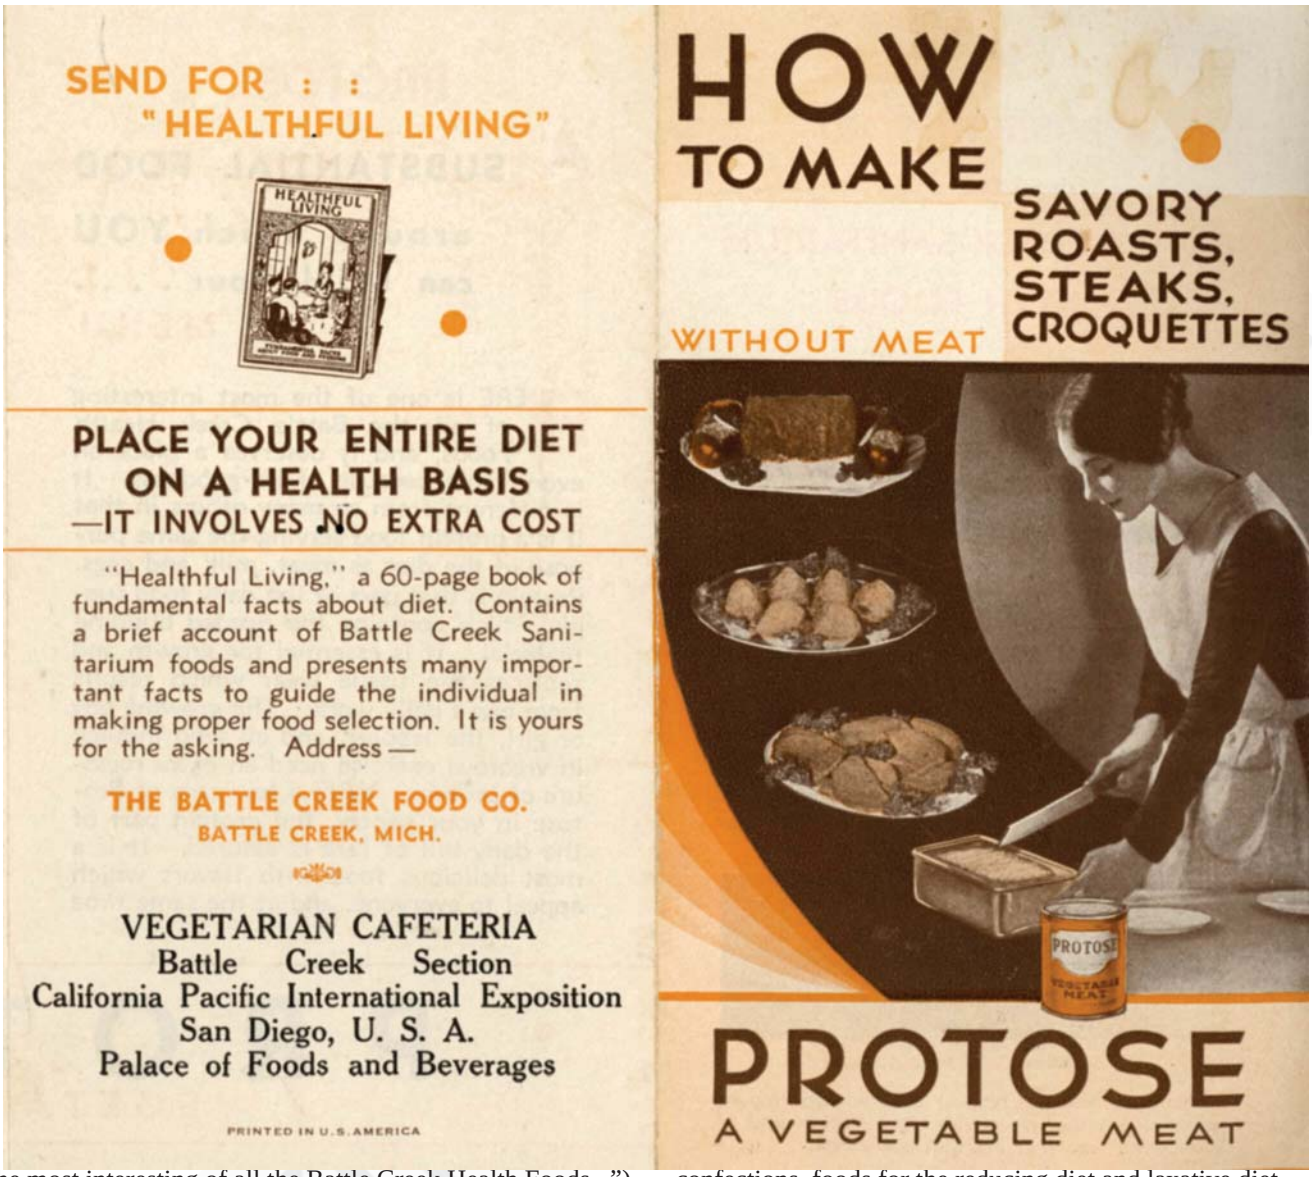
Contents: The story of Battle Creek Health Foods (and its free diet service). Where these recipes are triple tested (the company's modern test kitchen). Dinner menus and recipes (p. 4-7). Luncheon and tea menus and recipes (p. 8-11). Breakfast menus and recipes (p. 12-15). Reducing menus and recipes (p. 16-17). Wholesome diabetic foods (p. 18). Brawn-building menus and recipes (p. 19). A brief description of Battle Creek Health Foods (p. 20-21). Health candies (p. 22).

On almost every page of recipes is an illustration of one of the company's products in its container/package, and in a prepared dish, followed by a description of each product on p. 20-21. The only two soy-related products are "Soy Biscuits–Best bread for diabetics. Contains less than 2% starch but is rich in protein and strength-building elements. (Also furnished in the form of a meal)."

Other products are: Agar (made from Japanese sea-

© Copyright Soyinfo Center 2021

biscuit (40%, containing less than half the starch of ordinary bread; fine for diabetic patients). Gluten flour. Graham crackers. Health chocolates. Health koko. Kaffir tea (caffeine free). Lacto dextrin. Laxa (a biscuit with bran and agar). Malted nuts (increases the flow of milk in nursing mothers). Marmalades. Meltose (a malt sugar made from grains). Minute brew (A caffeine-free cereal beverage). No-fat (for use in place of butter). Nuttolene ("A nut meat product having the consistency of cream cheese. Makes healthful croquettes, cutlets, and stews"). Oatmeal wafers. Paralax with agar. Paramels. Peanut butter (made from steamed rather than roasted peanuts to make it easier to digest). Preserved figs. Protose ("The vegetable meat–makes savory sandwiches, salads, meat pies, and roasts. Rich in iron, lime and protein for body-building"). Psylla. Ripe olives. Savita ("A vegetable [yeast] extract with a rich, meaty flavor, excellent for soups and gravies, Rich in vitamins, and wonderful for blood-building"). Sal-Savita (A vegetable seasoning with a meat-like flavor). Savita-yeast (new yeast with a rich meaty flavor). Starchless bran. Toasted rice flakes. Tomato soup. Vegetable gelatin. Vegetable soup. Vitamet (A savory vegetable meat that is rich in Vitamin B and food iron). Vita wheat (creamy hot cereal). Whole wheat cream sticks. Whole wheat flour. Whole wheat wafers. ZO ("The vitamin breakfast food, ready to eat with cream and sugar. Made from whole wheat and barley and enriched with Savita... Supplies the daily vitamins and minerals"). Zwieback.



On page 23 is an ad for a 64-page booklet titled *Healthful Living: Fundamental Facts About Foods and Feeding.* Address: Battle Creek, Michigan.

weed). Almond butter. Bran biscuits. Cooked bran (from wheat). Bran gluten flakes (crispy toasted breakfast cereal). Branola (hot cereal). Fig and nut bromose (with malt honey). Brose (hot cereal with dates, figs or raisins, and cream). Sanitarium canned fruits and vegetables. Chocolate nut bar. Cooked whole wheat. Fig bran. Fig bran flakes. Food ferrin (supplies dietary iron from green vegetables). Fruit crackers. Gluten bread (Low in starch, shipped in air-tight cans, ready to eat. A healthful reducing food). Gluten

1044. Battle Creek Food Co. 1935? How to make savory roasts, steaks, croquettes without meat: Protose–A vegetable meat (Leaflet). Battle Creek, Michigan. 4 panels each side. Each panel: 16 x 8½ cm. Undated.

• ***Summary:*** See next 3 pages, Printed with brown and light orange on white. Contents: A brief history of Battle Creek Sanitarium Health Foods. Protose: A substantial food around which you can build your menu (2 panels; "Here is one of

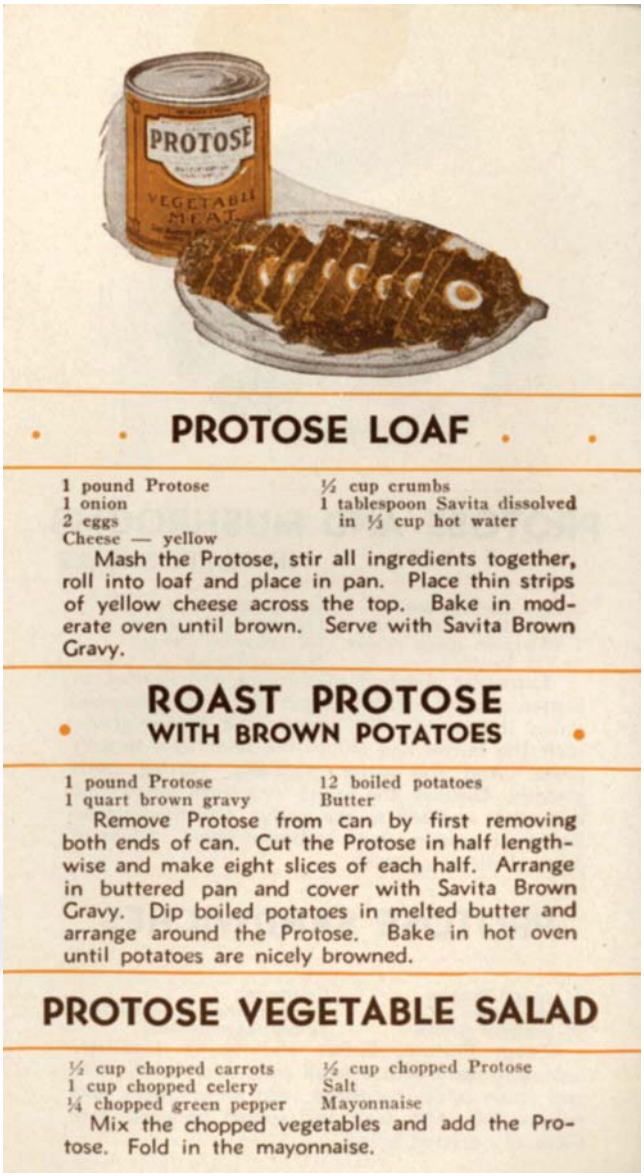
A BRIEF HISTORY
OF
BATTLE CREEK SANITARIUM
HEALTH FOODS



The Battle Creek Sanitarium

BATTLE CREEK SANITARIUM Health Foods were first made in 1889 for patients at the Battle Creek Sanitarium. Such satisfactory results were obtained that soon the outside demand made it advisable to stock them in leading grocery, drug, department and health food stores.

At present there are over 100 Battle Creek Health Foods, including several groups covering almost every phase of diet—tasty vegetable meats, whole grain cereals, health confections, foods for the reducing diet and laxative diet, others for blood building, with a large assortment for diabetic and other conditions.

The Battle Creek Food Company

Here are foods of highest quality supported by recognized authority and having a background of forty years' use that has met every test.

PROTOSE LOAF

1 pound Protose
1 onion
2 eggs
Cheese — yellow
½ cup crumbs
1 tablespoon Savita dissolved in ½ cup hot water

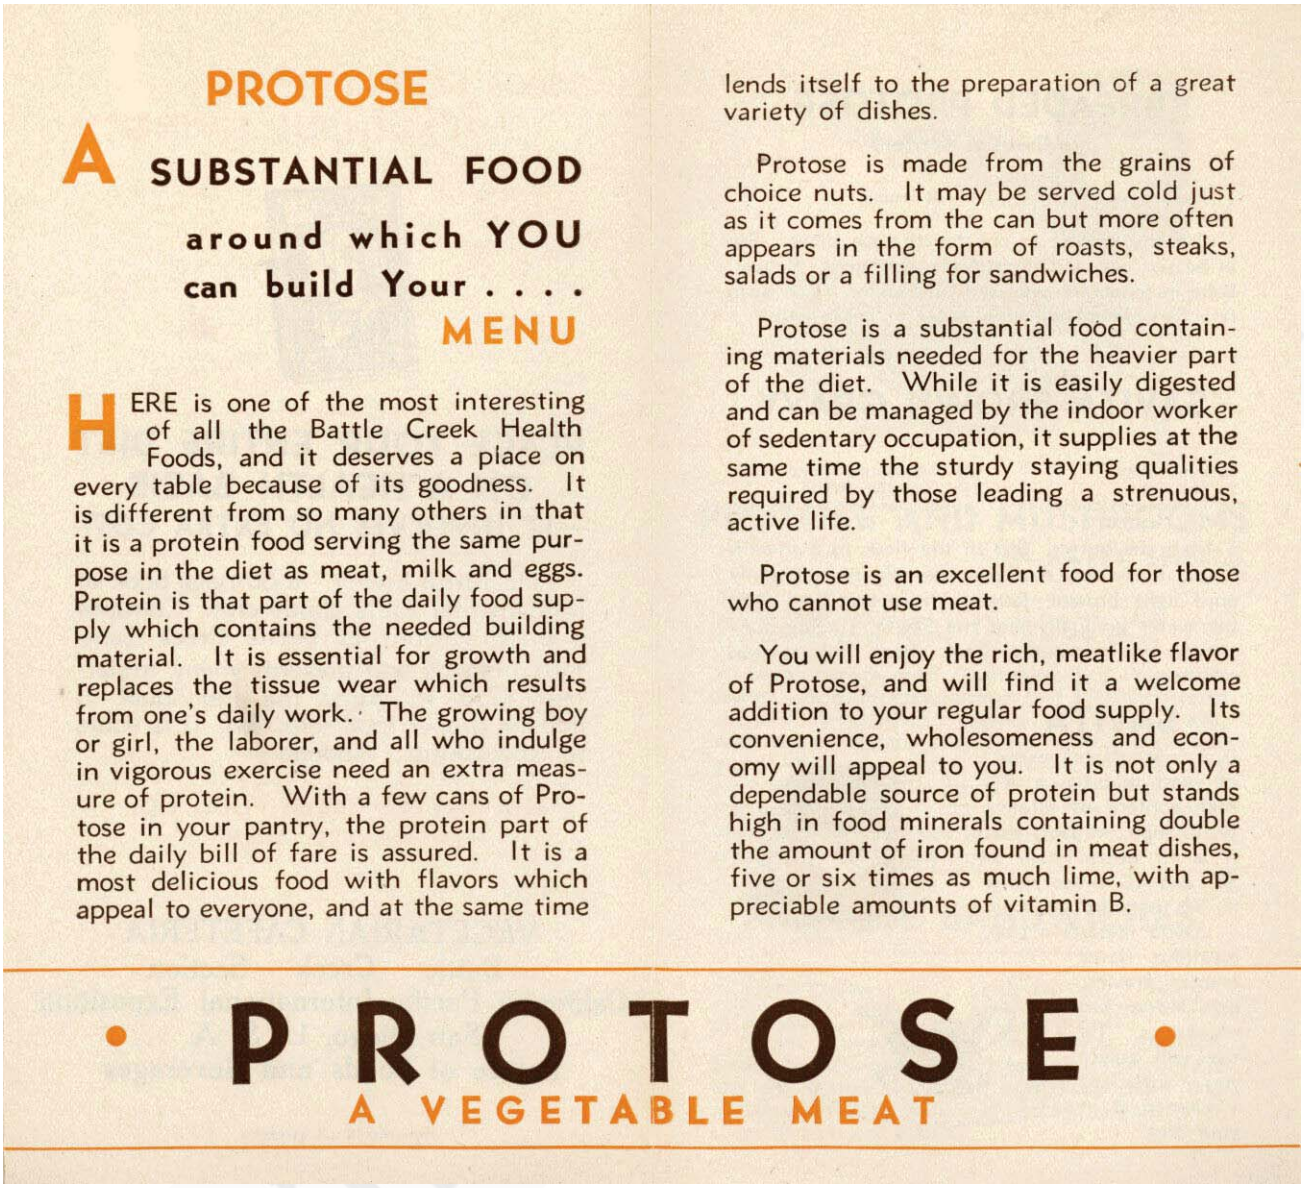
Mash the Protose, stir all ingredients together, roll into loaf and place in pan. Place thin strips of yellow cheese across the top. Bake in moderate oven until brown. Serve with Savita Brown Gravy.

ROAST PROTOSE
WITH BROWN POTATOES

1 pound Protose
1 quart brown gravy
12 boiled potatoes
Butter

Remove Protose from can by first removing both ends of can. Cut the Protose in half lengthwise and make eight slices of each half. Arrange in buttered pan and cover with Savita Brown Gravy. Dip boiled potatoes in melted butter and arrange around the Protose. Bake in hot oven until potatoes are nicely browned.

PROTOSE VEGETABLE SALAD



½ cup chopped carrots
1 cup chopped celery
¼ chopped green pepper
½ cup chopped Protose
Salt
Mayonnaise

Mix the chopped vegetables and add the Protose. Fold in the mayonnaise.

Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia. Phone: (03) 729-1738.
Date of Introduction: 1935?
Ingredients: 1995: Wholegrain wheat flour, barley flour, maize flour, oat flour, wheatgerm flour, wholegrain rye flour, whole soya flour (with oil and lecithin intact), and slippery elm.
Wt/Vol., Packaging, Price: Tin-plated steel can.
How Stored: Keep sealed. Store in a cool, dry, lightfree place.
New Product–Documentation: Ad in *Nature's Path to Health* (Melbourne, Australia). 1932. Oct. p. 21. "Good health by taking Vita Elm. Makes invalids strong. Children thrive on it. Invaluable to the athlete. Vita-Elm contains the germ of life of wheat, oats, barley, rye, and maize. [Note: Soy is not mentioned]. Abounding in all the valuable vitamines that give strength, energy and vitality. Delicious flavour. Nourishing. Nature's food. Obtainable at 342 St. Kilda Road, Melbourne, SC1."

Ad in Nature's Path to Health. 1935. May 1. Vita-Elm is now promoted as a "vitalizer" that can give "glorious health." Ad in Nature's Path to Health (Australia). 1937. Christmas. p. 36. "Natural health baby. Esmae Noelene Grimes. Aged four and a half months. Thrives on Vita Elm Dinner." A photo shows baby Esmae (the Roberts' granddaughter, aged 4½ months) sitting up and enjoying Vita Elm. Paul Smith notes (28 March 1995): "Esmae was reared on Vita Elm and Soy Compound and was using both at the time of the photo as her mother was experiencing difficulty in breastfeeding Esmae. As Esmae also later experienced difficulty in breastfeeding her own children, and resorted to

PROTOSE

A SUBSTANTIAL FOOD around which YOU can build Your . . . . MENU

HERE is one of the most interesting of all the Battle Creek Health Foods, and it deserves a place on every table because of its goodness. It is different from so many others in that it is a protein food serving the same purpose in the diet as meat, milk and eggs. Protein is that part of the daily food supply which contains the needed building material. It is essential for growth and replaces the tissue wear which results from one's daily work. The growing boy or girl, the laborer, and all who indulge in vigorous exercise need an extra measure of protein. With a few cans of Protose in your pantry, the protein part of the daily bill of fare is assured. It is a most delicious food with flavors which appeal to everyone, and at the same time lends itself to the preparation of a great variety of dishes.

Protose is made from the grains of choice nuts. It may be served cold just as it comes from the can but more often appears in the form of roasts, steaks, salads or a filling for sandwiches.

Protose is a substantial food containing materials needed for the heavier part of the diet. While it is easily digested and can be managed by the indoor worker of sedentary occupation, it supplies at the same time the sturdy staying qualities required by those leading a strenuous, active life.

Protose is an excellent food for those who cannot use meat.

You will enjoy the rich, meatlike flavor of Protose, and will find it a welcome addition to your regular food supply. Its convenience, wholesomeness and economy will appeal to you. It is not only a dependable source of protein but stands high in food minerals containing double the amount of iron found in meat dishes, five or six times as much lime, with appreciable amounts of vitamin B.

• PROTOSE •

A VEGETABLE MEAT

the same two remedies... Esmae and family still purchase Vita Elm and Soy Crunch directly from us."

Ad in Nature's Path to Health. 1940. July. p. 36. "Vita-Elm builds bonny boys and girls. To avoid malnutrition and the many ills that beset children, a fully fortified food must be provided... Protect them from winter colds and deficiency disease by daily use."

Information brochure: "'Vita Elm' was originally developed as a therapeutic product to assist invalids of all ages to recuperate. Bland, nutritious, sustaining and easily digestible it is an ideal way to encourage people recovering from surgery or suffering from hiatus hernia, ulcers or diarrhoea [diarrhea] back onto solid foods. It also forms a valuable addition to the diets of infants, toddlers and children of all ages. Slippery Elm has long been recognised for its soothing, gelling properties and its ability to gently coat the sensitive linings of the human digestive system." Serve as a porridge, and a hot or cold drink or thickshake.

Letter from Paul Smith. 1995. March 14. "Interestingly none of the advertisements for Vita Elm from the mid-1930s into the 1950s acknowledge the use of soy in this product. However the practise of adding soy flour to Vita Elm was well established when my father, Ron, went to work for F.G. Roberts early in 1948, and he believes soy was used by the mid-1930s. Admittedly, it is a minor ingredient." "Esmae believes the soy was added to Vita Elm in 1937, when Roberts first became interested in it."

Letter from Paul Smith. 1995. April 1. Vita Elm was the most heavily, longest and continuously promoted of all the Roberts products from its inception in Oct. 1932 until 1947, in almost every issue of the magazine. A 2-page table shows, for each issue, on what page the ad appears.

1046. *News-Pilot* (*San Pedro, California*). 1936. San Pedro Information Department: "Buy it in San Pedro" (Ad). Jan. 7. p. 2, cols. 7-8.
• ***Summary:*** "Health Foods–McDonald's Natural Food Shop–464 W. 6th.

"Let us help you with your dietary problems. Try Bill Baker's Soy & Lima Bean bread–practically non-starch. Our fruit juices and stewed fruits will give your breakfast added zest. Whatever your needs, see us."

1047. *California Health News* (*Hollywood, California*). 1936. Bragg's meal reaches film colony. 4(2):9. Jan. 24.
• ***Summary:*** A large photo shows Audrey Ferris, a Hollywood actress and one of many filmsters paying attention to her diet, learning about the new Bragg Meal. Paul "Bragg, famous American health lecturer, explains one of the delicious recipes for using his dextrinized cereal, which has a popularity all over the U.S. Bragg is now in Miami [Florida] lecturing."

1048. Bradford, Gardner. 1936. Our grand old names are vanishing! Historic family names linked with the infancy of the Golden State are disappearing... *Los Angeles Times.* Feb. 9. p. H16.
• ***Summary:*** The name "Lopez," which is Spanish, began in California with Ignacio, who came to San Diego with Portola and Fray Junipero Serra. He [and his wife] contributed ten daughters and eight sons to the Southland. "His youngest son, Claudio, became major domo of San Gabriel Mission. It was he who built El Molino (mill) in San Marino..."

Note: San Marino is a city in Los Angeles County, California, incorporated in 1912. The city was designed by its founders to be uniquely residential, with expansive properties surrounded by beautiful gardens, wide streets, and well maintained parkways. The city is located in the San Rafael Hills (Source: Wikipedia, Dec. 2014).

1049. *California Health News* (*Hollywood, California*). 1936. Attention Hollywood! Hansen's pure juices (Ad). 4(4):7. Feb. 21.
• ***Summary:*** "A new service for your convenience. Fresh, 100% pure vegetable juices–Delivery daily to your home or office." Address: Hollywood, California. Phone: HEmpstead 9110.

1050. *California Health News* (*Hollywood, California*). 1936. Film stars learn beauty secrets. 4(4):15. Feb. 21.
• ***Summary:*** A large photo shows Paul Bragg and actress Audrey Ferris standing behind a table with a juicer on it. The caption reads: "Just before Paul Bragg went to Miami [Florida] to lecture he put over the modern health message to Hollywood's screen colony. Result: many film notables now take their fresh carrot, celery and other juices to the studio. Instead of eating a heavy lunch, they drink it, and are able to do finer work–and look better. Here's entrancing Audrey Ferris, health movie girl, making Bragg a vegetable cocktail on his new electrified juicing machine which does away with cranking, and speeds up the process."

Note: This is the earliest English-language document seen (Junly 2021) that uses the word "juicing" or the term "electrified juicing machine" to refer to a electric juicer.

1051. *California Health News* (*Hollywood, California*). 1936. New machine for juicing. 4(4):8. Feb. 21.
• ***Summary:*** "Many leading dispensers of pure fruit and vegetable juices in Los Angeles and vicinity are using the newest machine offered by Hobart Manufacturing Co., 410 So. Los Angeles. This model handles all vegetables such as spinach, celery, carrot, beet, parsley, apple, eliminating need for extra equipment. The Hobart company, 18 years in Los Angeles, has made an extensive study of juices. In recent tests the latest models have run hours continuously without sign of protest."

Note: Unfortunately no photo or illustration of this machine is shown. However it sounds like an electric juicer.

1052. *California Health News* (*Hollywood, California*). 1936. Climbing juice trade demands new machine. 4(4):9. Feb. 21.
• ***Summary:*** "To meet the needs of a rapidly growing 'vegetable juice consciousness,' Modern Living Health Foods, 2611 W. 7th, owned by Mr. and Mrs. Dreibelbis, has installed a new press which exerts 14,000 pounds hydraulic pressure by hand. The new equipment was designed by Dreibelbis himself, who has a wide background in mechanical lines. It handles carrots, celery, spinach, parsley, apple and other fruit and vegetable juices."

Note: This is the earliest document seen (July 2021) describing a machine that uses hydraulic pressure to extract juice from vegetables.

1053. *California Health News* (*Hollywood, California*). 1936. Sexauer store moves: Serves health meals. 4(4):9. Feb. 21.
• ***Summary:*** "Santa Barbara–Moving across the street to 14 West Anapamu, Sexauer's Natural Food shop is in fine new quarters, is offering real health meals, served by Hoag and Baker. These people have served Montecito with vegetable juices for several months. Hoag became a health-minded vegetarian five years ago largely through the influence of Sexauer, vegetarian for 30 years, who is doing a fine work here in educating people to the health regime. Lectures are to be held here soon."

1054. *California Health News* (*Hollywood, California*). 1936. Pure juice habit hits Alaska town. 4(4):8. Feb. 21.
• ***Summary:*** "Juneau–The first power-driven vegetable juicer

© Copyright Soyinfo Center 2021

in the far north has been ordered for Health Foods Center, Second near Franklin, by Mrs. B.M. Kraft. The machine will come from the Hain Pure Food company, Los Angeles [California]. Vegetables are brought here by ship and then the juice extracted for health followers of this community."

1055. *New York Times.* 1936. Ocean travelers. Feb. 27. p. 16.
• ***Summary:*** "Arrivals today from Mediterranean ports on the Italian liner Conte Di Savoia include... Dr. Benjamin Gayelord Hauser,..."

1056. Hauser, Bengamin Gayelord. 1936. Foreword. *Horizon* (*Tempo Books, New York City*) 1(1):1. Feb.
• ***Summary:*** Hauser is the editor of *Horizon*, and this short article, located next to the table of contents in the first issue (Vol. 1, No. 1) states: "This first number of *Horizon* represents the fulfillment of a dream which has been in my mind since 1922, when I first began to teach America that 'living food makes living people.' Since that time, the seed which I planted has grown–even beyond my most extravagant expectations.

"In the past years there have come to me thousands of requests for a journal or magazine which would furnish a link between me and my students in every city in America. Thanks to this encouragement and support, I am now able to present *Horizon* to you.

"Since the editorial direction of *Horizon* will be entirely in my hands, I promise my readers that it will be free of all inconsistencies. I shall censor all material contained in our advertising columns and shall keep the editorial columns free of commercial influence. It is my one desire to present you with a résumé of all that is of interest and genuine value in the field of nutrition in its relation to health and beauty.

Since *Horizon* enters this field seeking no circulation records, and without any desire for financial profit, I know that this publication will live up to the implied promise of its name, keeping before its readers always the far horizons which can be reached only by those who know how to live intelligently and vitally."

He signs his name, Bengamin Gayelord Hauser.

On page 5 is a full page photo of this handsome young man, dressed in coat and tie, arms folded across his chest.

1057. Hollywood Health Cafeteria. 1936. A man digs his grave with his teeth (Ad). *Los Angeles Times.* March 15. p. 31.
• ***Summary:*** This large display ad shows a man in his grave in a graveyard digging it at one end with his huge mouth and teeth. "Good news! 'Where your health comes first.' Opens Monday noon, March 16th at 6225 Hollywood Blvd. (Pantages Theatre Bldg.–One block east of Vine). Modern health food store and health bakery in connection. Under the same management as the downtown Health Cafeteria, 6th St., between Spring and Broadway.

"Specializing in recipes and diets recommended by Dr. Philip M. Lovell. All the same delicious dishes, the same healthful Whole Wheat breads, pastries, pies–at the table and in the bakery. Diets for all purposes. A professional dietitian available for Free consultation.

"Free–opening day–only. To each diner, one box Trufood Chocolates... Open every day including Sundays."

Note: This cafeteria is an extension of the chain of health cafeterias started by Paul Bragg in Dec. 1926. Address: 6225 Hollywood Blvd. [Los Angeles].

1058. *Los Angeles Times.* 1936. Clubdom today. March 19. p. A6.
• ***Summary:*** "Lockwood P.T.A.–Business meeting 2 p.m.; speaker Miss Adelle Davis."

1059. **Product Name:** Bill Baker's Soy Toast (Melba Toast).
Manufacturer's Name: Baker (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1936 March.
New Product–Documentation: House of Better Living Catalog. 1936. March. p. 7. $0.30/lb. Melba toast, named after Nellie Melba (ca. 1925), refers to very thin bread toasted until crisp.

1060. *California Health News* (*Hollywood, California*). 1936. The Hollywood Health Cafeteria (Ad). March. *
• ***Summary:*** Six pages about this new restaurant at 6225 Hollywood Boulevard. It is based on diets and recipes by Philipp Lovell (DC–chiropractor). Beautiful girls to serve you. All their friends took out ads wishing good luck to the new restaurant. So everyone supported each other. The cafeteria took out an ad showing a guy biting into the lawn (like a lawn mower) with the caption "Man digs his grave with his teeth."

1061. Lager, Mildred. 1936. The House of Better Living Catalog. Los Angeles, California: Published by the author. March. 14 p. March. 28 cm. Second expanded edition, March 1938.
• ***Summary:*** See next 3 pages. On the front cover is a large illustration of the exterior of the House of Better Living, and a 4-stanza poem about the House by Mildred Lager. Below the poem we read: "Catalog. The most unusual store in Southern California. Owned and operated by Mildred Lager, food economist, author, and radio lecturer."

The first section, titled "The origin of the House of Better Living!" (p. 1) begins: "Is it fate? Often the handicaps and obstacles that we have to overcome lead us into our life work, help us to find ourselves. A few years ago a young school teacher was forced to give up her chosen profession because of arthritis deformans. It was a severe obstacle to overcome, but it was that experience that led Mildred Lager

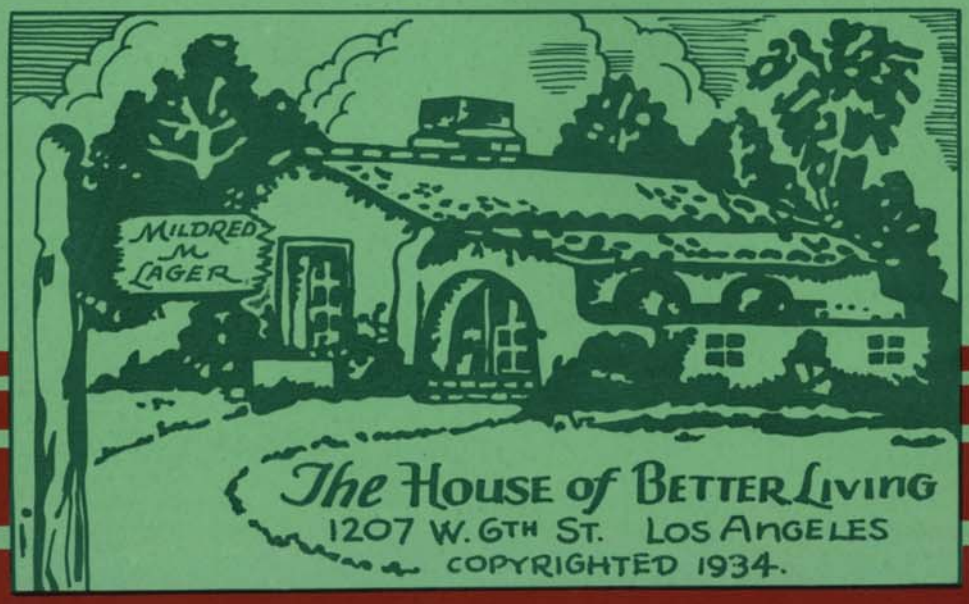
THE House OF Better Living

To some it's a house
To some just a store,
But many have found it
A little bit more.

Its shelves may be stocked
With things that you eat,
But it aims to have more
Than just physical meat.

Its aims are to teach
Of nature's great wealth,
Air — water — food — thought,
That really build Health.



Its motive is service,
Both helping and giving —
That's why it is called
House of Better Living.

—MILDRED LAGER.

CATALOG

The most unusual store in Southern California

Owned and Operated by MILDRED LAGER, *Food Economist*
Author and Radio Lecturer

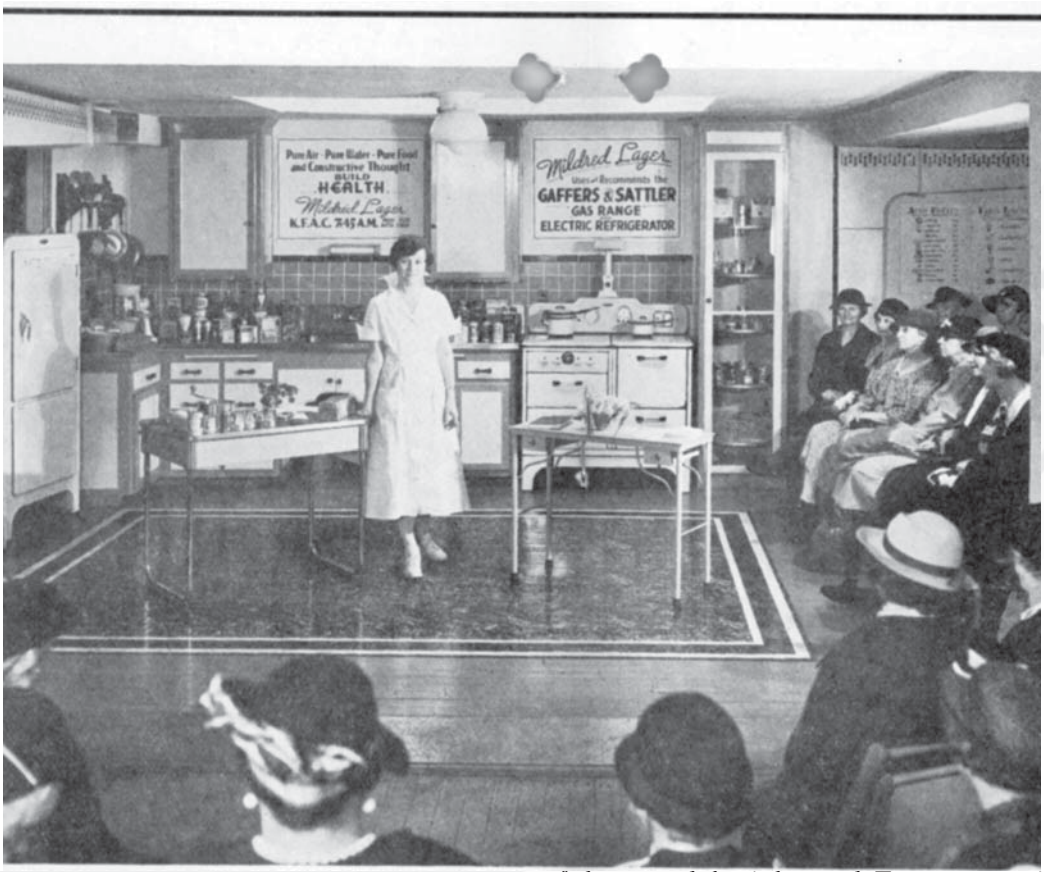
into the study of foods and their relation to health, and led to the founding of the House of Better Living. No one *has* gained recognition as rapidly as Miss Lager. In a little over two years she has won her place among the 'leaders,' has



received both national and international recognition, and has established the House of Better Living as an institution in Southern California... Her perfect radio voice reaches thousands who cannot attend her classes.

"Miss Lager is teaching the ounce of prevention, the health insurance that pays dividends in years of health and happiness. Her slogan is that Pure Air, Pure Water, Pure Food and Constructive Thought plus exercise and sunshine build health.

"The House of Better Living is more than a Health Food Store. It is a bureau of food information and a place and means where Miss Lager can conduct her classes free

HAIN

100% PURE FOODS

Hain Products are exactly what they purpose to be: healthful, uniform in quality, honestly dependable. Many others besides those named below. Catalog free on request. . . . . .

VEGE-JELL PUDDINGS

Made from pure, wholesome vegetable products. How much more healthful than animal-derived gelatine! Six different flavors to select from in these delicious puddings. Vege-Jell Desserts also, in six tasty flavors.

MAL-BA-NUTS

An appetizing concentrate of dextrinized Cashews and Almonds, flavored with maltose sugar. Mal-Ba-Nuts is in granulated form, like a fine meal. Rich in organic iron and other minerals. Easily digested.

POTASSIUM BROTH

No spices or condiments in this nourishing, delicious broth. Especially valuable because it helps compensate for the mineral deficiencies of ordinary foods, and restore alkaline balance.

COL-LAX

A natural, harmless and effective laxative—really a colon food. Ingredients: Powdered Psyllium, Powdered Agar, Lactose, in tested combination. Physicians and Patients alike report very satisfactory results from its use. Non-habit forming.

of charge–and *that* is her goal. Two years ago it seemed an impossibility–very few thought it would ever succeed. They did not know the sincerity and the spirit behind it... It is but two and a half years old. We cannot predict its future nor that of its charming founder–we can only wait and see, knowing that achievement and not time is the measure of success.–By one who has watched the growth from the start."

At the top of page 2 in large letters: "The House of Better Living offers you: 1. The best of natural foods at reasonable prices. 2. Free delivery of all $3.00 orders in Los Angeles. 3. Free cooking classes every Wednesday afternoon at 1:30. 4. Food classes Monday and Thursday afternoon at 1:30 (except during June, July and August). 5. Miss Lager's Radio talks every Monday, Tuesday, Wednesday and Thursday morning at 7:45 over KFAC."

Product categories and products mentioned include: Coffee substitutes (Soyco, Hollywood Cup, Breakfast Cup, Ficgo, Sipp). Broths (Vegebroth, Vegemineral Broth Concentrate, Hauser's Meatless Bouillon). Nut butters–Freshly ground (Soy Bean Butter, Almond butter, Cashew butter, peanut butter–dextrinized). Whole grain flour, meal, etc. (Soy Bean Flour, Bill Baker's Prepared Lima Bean Pancake or Waffle Flour, Bill Baker's Prepared Soy Bean Pancake or Waffle Flour {2 lb for $0.30}, whole wheat flour, wheat germ, bran, buckwheat flour, dextrinized flour, gluten flour, breakfast cereals–to cook {Cubbison's cracked

wheat}). Ready to serve cereals (Soy bean breakfast food, wheat germ). Macaroni, noodles, etc. (Soy bean macaroni, garbanza shells). Legumes (soy bean {imported}, garbanza peas, natural brown rice, sesame seeds). Melba toast, crackers, cookies, etc. (Bill Baker's Soy Toast {$0.30/lb}, Cubbison's Melba Toast, Cubbison's Melbetts, Soy bean gluten cracker, Cubbison's whole wheat crackers, Cubbison's Whole Wheat Dunkeretts, Cubbison's wheat soda cracker, Cubbison's honey wheat cookies, Cubbison's Melba cookies, Soy bean wafers, soy bean macaroons, Bill Baker's 100% Soy Bean Fruit Cookies {$0.18/dozen}, Bill Baker's 100% Lima Bean Fruit Cookies {$0.18/dozen}, Olson's soy bean bread, sliced {$0.12}, Bill Baker's soy bean bread–unsliced {$0.16}, Bill Baker's Lima Bean Bread, unsliced {$0.16}). Natural aids (Agar, flaxseed, psyllium, Burbank kelp, kelp, Green kelp, Santay sea greens). Oils (Soy bean oil, sesame oil, Lindsay Cold Pressed California Oil). Meat substitutes (11 products, 5 with "Soy" in the name, such as Soyatose). Soy bean products (25 products! Makers incl. La Sierra, Loma Linda, etc.).

The 27 different soy products are: La Sierra Soy Beans, plain or with tomato sauce; Loma Linda Soy Beans, plain or with Proteena; Soy Beans, imported; Soy Beans, roasted; Soy Bean Loaf (meat substitute); Soy Bean Bologna; Soy Bean Spread; Soy Bean Butter (like peanut butter); Loma Linda Soy Mince Sandwich Spread; Soy Bean Sauce; Soy Bean Milk; Soy Bean Oil; Soy Bean Noodles, Macaroni, and Spaghetti; Soyco (Soy Coffee); Soy Bean Breakfast Food; Soy Bean Sprouts; Soy Bean Flour; Bill Baker's Prepared Soy Bean Pancake or Waffle Flour; Bill Baker's Soy Bean Bread; Olson Soy Bread (sliced); Bill Baker's Soy Toast; Bill Baker's Soy Bean Fruit Cookies; Soy Bean Macaroons; Soy Bean Wafers; Soy Bean Gluten Crackers.

Photos show: (1) A portrait of Mildred Lager smiling (p. 1). (2) Mildred conducting a free cooking class in her kitchen at The House of Better Living. Many men and women, all wearing hats, are seated around the perimeter of the kitchen (p. 6-7). (3) Packages of various "Bill Baker's Soy & Lima Bean Products" including Lime Bean Wafers, Pancake Waffle & Biscuit Lima-Bean "Neat Flour," Lima Bean Toast, Pancake Waffle & Biscuit Soya-Bean "Neat Flour," Lima Bean Bread, and Soy Bean Bread" (p. 10).

A small ad (3½ by 2¼ inches, p. 6) by the Cubbison Cracker Co. (3417-19 Pasadena Ave., Los Angeles, California) states: "Dextrinized and whole wheat products: Melba Toast, Melbetts, Cracked Wheat, Whole Wheat Crackers and Cookies." Note 1. This is the earliest document seen (June 2004) concerning the work of Sophie Cubbison with soyfoods.

A ¼-page ad (p. 12) titled "Hain 100% pure foods," describes Vege-Jell Puddings, Mal-Ba-Nuts (a powdered beverage), Potassium broth, and Col-Lax (whose ingredients are: Powdered psyllium, Powdered agar, and lactose).

Note 2. This is the earliest document seen (Aug. 2015) that contains the term "Soy bean gluten" or the term "Soy bean gluten cracker." Address: 1207 West Sixth St., Los Angeles, California.

1062. Lager, Mildred. 1936. Be a friend to your future self. *House of Better Living* (*Newsletter, Los Angeles*) 2(6):1. March.

• ***Summary:*** "If every ailing person would overcome four conditions, they would feel 100% better, and in most cases, be well. The conditions are: Constipation, sluggish liver, acid and toxic system, fermentation and putrefaction of foods–all can be aided by food or diet."

"Proper food, properly combined, overcomes this condition. Food does not cure. Food merely gives nature what she needs... Nature cures."

Note: Calavo means "California avocado" (May 1936, p. 3).

1063. Lager, Mildred. 1936. Better recipes, properly combined: Vegetable proteins. *House of Better Living* (*Newsletter, Los Angeles*) 2(6):1. March.

• ***Summary:*** "Legumes such as peas, beans, soy beans, etc. are a good source of protein. Also nuts and some cereals. Legumes are a splendid food, ad popular during the Lenten season. Below is a list of their protein content:" A table shows: Soy beans 33 to 42%. Lentils 25.7%. Peas 24.6%. Beans 22.5%. Lima beans 18.1%. Garbanza (Chick pea) 13.0%.

"Some legumes are highly alkaline, as the lima bean, soy bean and garbanza."

1064. **Product Name:** Soyco (Coffee Substitute).
Manufacturer's Name: Unknown. Perhaps Carque.
Manufacturer's Address: Los Angeles, California?
Date of Introduction: 1936 March.
New Product–Documentation: House of Better Living Catalog. 1938. March. p. 4. Note: This product could be Soy-co, a coffee substitute introduced by La Sierra Industries in 1929, and still made by them in 1936.

Talk with Ben Kahan of Kahan & Lessin. 1988. Sept. 24. He thinks this product was made by Carque, pronounced kar-KAY. See sheet he sent.

1065. *California Health News* (*Hollywood, California*). 1936. Electric-driven juice machine stirs interest. April 3. p. 8.

• ***Summary:*** "The much-heralded Bragg electric juicer is one of the many popular demonstrations at Health Cafeteria, 217 W. 6th. This juicer is the same as the hand model except that the crank is turned by motor. The machine is one-quarter horsepower, on 110 volts. Members of the health foods department report much interest in the new juicer."

1066. *California Health News* (*Hollywood, California*).

© Copyright Soyinfo Center 2021

1936. Small ad brings old Carque books. April 3. p. 8.
• ***Summary:*** "Health News classified ads are result-getters! A small ad asking for out-of-print copies of the late Otto Carque's 'The Folly of Meat-Eating,' printed 32 years ago, brought three replies in a hurry.

"One copy came from Skipper Clarke Irvine of Santa Monica, another from Los Angeles, a third from Lewiston, Idaho. What the beloved Carque had to say about meat three decades ago is still true today. 'The health and welfare of nations depends on rational nutrition.' When people stop killing animals to eat meat 'then the shadows of disease, famine, murder and war will disappear from our planet,' the book intimates."

1067. *California Health News* (*Hollywood, California*).
1936. Mrs. Hauser says line finds larger market. April 3. p. 8.
• ***Summary:*** "In anticipation of an increased demand for alkaline foods, Harry W. Hempstead, owner of Mrs. Hauser's Food Products company, 4617 Melrose [Los Angeles], is putting a brand new dress on his "Soy" brand hot cake and waffle flour. The alkaline food henceforth will be packed in a blue and white container." The products contain "cereals, legumes, milk and carob to neutralize."

Note: Mrs. Hauser's Food Products company was unrelated to Gayelord Hauser, even though both were involved with health foods in Los Angeles in the 1930s and 1940s. We are unaware of any person named "Mrs. Hauser" who was active at this time, and in this place and field.

1068. *California Health News* (*Hollywood, California*).
1936. Raw food cook book now in 15th issue. April 3. p. 9.
• ***Summary:*** "Indicating an ever-widening interest in health foods, the 15th edition of Mrs. Richter's 'Cook-less Book' has just been issued it is announced at the Live Food Cafeteria, 325 W. Third [Los Angeles]. This little volume is internationally famous for its unfired soups, salads, drinks, natural desserts, etc. Many of the tempting dishes offered at the cafeteria are included.

"Since the two cafeterias of Hill street and West Third were combined, business has more than doubled, the Richters report. Lectures almost every night, banquets, and special events have made the cafe a unique gathering place for the health-minded students of the new age." Address: Ojai, California.

1069. *J. of the American Medical Association.* 1936. Bureau of investigation: "Prof." Paul Bragg again. Is Washington's loss Miami's gain? 106:1408. April 18.
• ***Summary:*** "For years it has been known that those sections of the country in which elderly people and invalids congregate have more than their share of quacks and faddists. For this reason southern Florida is beginning to challenge the eminence of other resorts for this doubtful honor. This winter Miami has been visited by the quack who calls himself 'Professor Paul C. Bragg.' Readers of The Journal may remember what has been published regarding Bragg, who was described as a 'food faddist and sexual rejuvenator.' Bragg is one of those ignoramuses with a flair for public speaking who confer on themselves ornate titles and give 'free lectures,' which are really come-on advertisements for the books, the nostrums and the so-called private courses that they have for sale."

Below this is a reproduction of one of Bragg's advertisements in a Miami newspaper. He will give five free lectures in the Baptist Auditorium at N.E. 5th St. and 1st Ave. in Miami. A photo shows him wearing a lab coat and examining a test tube.

"Bragg seems to have found Miami a lush field this winter, but toward the end of the season he began to talk of going back north. A Miami paper, however, in its issue of March 8 carried a display advertisement in which it was stated that 'Miami Demands More Free Health Lectures by Professor Paul C. Bragg, Nationally Famous Health Teacher.' The advertisement stated further that because of the hundreds of demands that Bragg should remain in Miami a few days longer he had 'canceled his lectures in Washington, D.C.,' and would give five more 'free lectures.'

"Bragg's cancellation of his lectures in Washington, D.C., may have been due to the fact that suckers were still biting in Miami; but it is quite as probable that his action was at least partly predicated on the fact that when he conducted his lectures in Washington a year ago he was charged with practicing the healing art without a license, found guilty and fined a hundred dollars. He violated the law of the District of Columbia by attempting to diagnose diseases, by prescribing a 'patent medicine' of his own devising and by attempting to relieve certain diseases. He is estimated to have taken about $7,000 out of Washington, for he charged $20 a person for a series of six so-called classes which some 350 persons attended. Observers from the office of the Commission on Licensure and from the District Medical Society attended Bragg's 'classes' and obtained enough evidence to bring action against him in the police courts."

1070. *Health Foods Retailing.* 1936-1987. Serial/periodical. Published originally by Lelord Kordel in San Francisco, then Chicago, then New York, for National Nutritional Foods Association (NNFA), then in New York, NY, by Syndicate Magazines, Inc. Frequency: Monthly.
• ***Summary:*** Letter from Mr. Lelord Kordel, publisher, to Bill Baker of Ojai, California. 1940. July 24. The letterhead shows that *Health Foods Retailing* is now published from 846 Russ Building, San Francisco, California.

Classified ad in *Let's Live.* 1945. Sept. p. 22. "Health Foods Retailing–Official trade publication, National Health Foods Assn. A newsy magazine for store owner, jobber and manufacturer. Circulates coast to coast. Don't miss it. Bi-monthly $1 year... 100 Stevens Ave., Mount Vernon, New

© Copyright Soyinfo Center 2021

York."

In Dec. 1976 (Vol. 20, No. 12). the title page showed that this was the "Official Magazine of the National Nutritional Foods Assn." Published by Syndicate Magazines, Inc., 6 East 43rd St., New York, NY 10017. Publishers: J.T. Schwartz and L.D. Solomon. Editor: Frank Murray.

As of Aug. 1980 (Vol. 44, No. 8), this magazine is published monthly, plus the 'Merchandising Handbook,' which is published at the beginning of each year. Copyright by Syndicate Magazines, Inc., 6 East 43rd St., New York, NY 10017. Tel. 212-949-0800. Controlled circulation postage paid at Miami, Florida 33142.

Murray, Frank; Tarr, Jon. 1984. *More than one slingshot: How the health food industry is changing America.* See p. 29, 53-54. *"Health Foods Retailing*, New York City, the oldest trade magazine in the health food industry, and the official magazine of NNFA, was started in April 1936 by Lelord Kordel." [Note: *California Health News*, started 3 years earlier in Jan. 1933 by Clarke Irvine, covered both consumer and trade topics]. "It was sold several years later to Jack T. Schwartz [of Syndicate Publications in New York. Schwartz was associated with Gayelord Hauser], who remained publisher until Feb. 1982, when he and his partner, L.D. Solomon, sold Syndicate Magazines, Inc. to Communication Channels, Inc. (CCI, Atlanta, Georgia), which, in turn is owned by Argus Press, a division of British Electric Traction Co., London, England. "The most recent editors of HFR have been Anthony Lord, now retired and living in Poughkeepsie, NY; Frank Murray, who is now Executive Editor; and Michael Spielman, the current editor. Joel Chriss and Paulo Colangelo are associate editors. Jack T. Schwartz lives in Rye, NY."

Talk with Frank Murray of New York. 1988. Sept. 26. Lelord Kordel (a man) now lives in Detroit. He started the magazine in San Francisco, then moved it to Chicago. Schwartz remained publisher until Feb. 1982. The magazine ceased publication in June 1987, in its 51st year. Back issues of *Health Foods Retailing* (which had a small format, like a large *Reader's Digest*) can be found at Communication Channels Co. in Atlanta, Georgia (Phone: 800-241-9834). He started to work with the magazine in 1963 in New York.

Talk with Howard Wainer of Whole Foods Communications Inc. 1992. Sept. 24. For years, prior to about 1982-83, *Health Foods Retailing* was the leading trade magazine in the health foods industry in terms of both circulation and advertising space. Then it was passed by *Health Foods Business.*

Library of Congress owns Oct. 1979 to June 1987. Some volumes are incomplete.

Talk with Frank Murray of New York. 2007. April 16. Does he have back issues of *Health Foods Retailing* or know where they can be found? "No. This is the worst tragedy that's ever happened to me. When I was in the New York office and *HFR* and *Better Nutrition* were sold, I, like an idiot, sent all of the bound volumes down to the Atlanta office. After Mr. Schwartz became ill, he sold the magazine to a group in Atlanta. Since then, the magazine has been sold at least twice. I've been trying to locate the bound volumes, but I'm afraid they have been lost or destroyed. Its the only history of the industry." About two years ago, Frank confirmed that the volumes he sent were still in Atlanta. Then he contacted a friend, Nicole Breshka, who is the editor of *Better Nutrition* and located in California. He asked her if she could follow up but he hasn't heard back from her. He is now very busy. Some volumes of the magazine (donated by Vic Boff, who died several years ago) are located at the University of Texas in Austin, but Frank is not sure if they have the older ones. Address: San Francisco, Chicago, New York.

1071. Health Book Service–Life Culture Center. 1936. Books on nature cure and natural living (Ad). *Naturopath and Herald of Health* (*New York City*) 41(4):129. April.
• ***Summary:*** A full-page ad with the bold banner title across the top. The books are divided into categories: Nature Cure. Diseases. Diet. Cooking. Hygiene. Child feeding. General books.

Note 1. This ad also appeared in the May 1936 issue (p. 161).

Note 2. The address is the same address as the Original Health Food Store. Address: 343 Lexington Ave., New York City.

1072. Lust (Benedict). 1936. Bound volumes of the Naturopath (Ad). *Naturopath and Herald of Health* (*New York City*) 41(4):127. April.
• ***Summary:*** "Every practitioner and every student in the field of Nature Cure should have a complete library of Bound Volumes of *Naturopath* magazine from 1902 to 1927, and 1934 and 1935. $10.00 per [bound] volume."

Note 1. From this ad we see clearly that this magazine was not published from 1928 to 1933. Note 2. This is the earliest document seen (Sept. 2007) showing Benedict Lust at 343 Lexington Ave., New York City. In Dec. 1936 (p. 381) the Original Health Food Store also appeared at this address. Address: Dr., 343 Lexington Ave., New York City.

1073. Ainsworth, Ed. 1936. Along El Camino Real. *Los Angeles Times.* June 21. p. A15.
• ***Summary:*** "Bill Baker, the baker of Ojai, has just moved in next door to Shirley Temple and Will Hays and Tarzan. Mr. Baker, as everybody ought to know, is the genius of the bakery who popularized lima and soya bean bread and has made a gigantic all-California fruit cake for the president of the United States each Christmas" for many years.

While he isn't old, Bill also isn't young, so he has decided to retire for a part of each week. He moved to a beautiful lake [Lake Sherwood, where many famous movies

© Copyright Soyinfo Center 2021

were filmed] and sort of commutes to his bakery in Ojai. He had owned a third of an acre of oak-covered hillside near the lake. "He had been pretty sick about a year ago" [i.e., in mid-1935], and he decided some vigorous outdoor work and rest would be helpful. Working as a laborer with a few carpenters, he built a lovely white house around a towering oak.

Note: This is the earliest document seen (March 2006) that mentions Bill Baker's home at Lake Sherwood (which is about 30 miles southeast of Ojai, near Thousand Oaks).

1074. *Naturopath and Herald of Health* (*New York City*). 1936. State news: Paul C. Bragg becomes grandfather. 41(6):177-78. June.

• ***Summary:*** From Health Research Bureau Bulletin: On 10 Feb. 1936 Paul C. Bragg's daughter, Polly Bragg-Sorrel, age 19, gave birth to a boy (weighing 7½ pounds) named Robert Paul Sorrell in Los Angeles, California. "This makes four generations of Braggs now living and all enjoying perfect health. This is a convincing proof of the wisdom of living on natural foods and keeping the body in an alkaline condition."

In large auditoriums where her father has lectured, Polly has appeared as "the perfect health girl" and she is known to thousands of people who try to live in accord with Nature's laws.

"In the summer of 1934, she won a prize at the International Culture Convention, held at Dansville, New York." Bernarr Macfadden, founder of *Physical Culture Magazine*, stated that "she was one of the finest specimens of womanhood he had ever seen."

1075. *Nature's Path to Health* (*Melbourne, Australia*). 1936. Soya Bean growing for the Australian garden. July 15. p. 35-36.

• ***Summary:*** Written by F.G. Roberts, pioneer of soyfoods and soybean cultivation in Australia. "Regarding the future of Soya Beans in Australia, the following may be quoted from an English contemporary: 'The seeds will soon be acclimatized to produce good crops in England. Besides proving a delightful new vegetable, the seeds saved should pay for all the trouble, and you will be able to say, "I grew them before the British farmer thought of doing so."'

"The two harvests that have since taken place have turned the above prophecy into accomplished facts.

"There appears to be no reason why every enthusiastic food reformer with a small garden should not try his, or her, hand at growing Soya Beans. The offering of acclimatized seeds, green, yellow, and brown, by the 'Pitman' Health Food Co., for the first time in their March, 1935, catalogue, resulted in their supplying a hundred packets within a few days, the demand continuing up to planting time, May 1st, when supplies were exhausted."

The soya bean should eventually provide "the farmer with an additional profitable crop for the oil crushers and a large number of other important purposes. The writer, who has made a hobby of gardening for more years than he cares to count, considers that his 1935 crop of soya beans is the first thing he has ever grown that has paid him financially...

"Four varieties were planted on May 1st, 1935, one row of black" (93 seeds) and five rows each of brown, green, and yellow (372 seeds each). Details of planting and growth are given. The whole patch was about 45 feet by 27 feet. On August 4th the different varieties were all healthy and of different heights: yellow 30-34 inches, green 12-18 inches, brown 20-24 inches, and black 18-24 inches. At the end of August the plants were all very strong but at different stages of flowering and bearing fruit. The black and brown varieties gave the best yields, increasing 56 fold and 50 fold in weight respectively. Green increased 35 fold and yellow 34 fold.

"The Soya Bean has been very successfully grown in Australia. There is a sample at 'Kalimna," Melbourne from Mrs. Drury's garden at Murrumbeena [a suburb in Melbourne, to the south east, in Victoria]. Others, too, have had equal success, which goes to show that Soya beans can be grown just as successfully in Australia in as Overseas. Remarkable success has also been obtained in England with the growing of the Soya Bean.

"As the Soya Bean is such a wonderful food, we feel sure it would be a very good food to encourage the growth of in Australia, therefore we will send to any subscriber a packet of beans on the receipt of 3d. in stamps to defray postage on the same–Editor."

Note 1. This is the earliest article on soybeans seen (July 2007) in *Nature's Path to Health.* Paul Smith of Soy Products of Australia (Pte.) Ltd. has examined issues dating back to Oct. 1932, and as late as Feb. 1950. The magazine was published by F.G. Roberts, a naturopath living in Melbourne.

Note 2. This is the earliest document seen (July 2007) concerning Soy Products of Australia Pty. Ltd. (Bayswater, Victoria, Australia), formerly F.G. Roberts Health Food Products (Melbourne).

Note 3. This is the earliest document seen (July 2007) concerning F.G. Roberts' and soybeans or soyfoods.

Note 4. This article was reprinted in the 1 Oct. 1938 issue of this magazine (p. 38-39).

1076. Anderson, Marion. 1936. Reminiscences of Otto Carque. *California Health News* (*Hollywood, California*) 4(14):2. July 17.

• ***Summary:*** "Mr. Carque possessed many winning ways. One little incident which occurred not so long before his death gives an insight into his character.

"He came into the office one morning to phone in an order, but he when dialed, buzz-buzz, came the busy signal. After a moment or two, he dialed again, but still busy. The third time found the line the same, and as Mr. Carque hung up the receiver again with an air of patient resignation, he

© Copyright Soyinfo Center 2021

just breathed a gentle sigh. He took it all so calmly that I felt compelled to remark, 'Mr. Carque, you seem just like a philosopher.' With his own mischievous smile, he shot back, 'Oh, but I am,' and proceeded for the fourth time to dial that pesky number and was finally successful in getting his party.

"That's the way he was always. Instead of fretting and fuming, slamming the receiver down and almost breaking the whole telephone like most of us would do in like circumstances, he was just calm and patient and finally obtained what he wanted without needlessly wasting any energy by getting into a temper.

"Another time the factory's stock of peaches was about all gone, so one of the employees went to Mr. Carque and told him rather excitedly that the peaches were almost all used and some more had better be ordered right away as they were badly needed. Mr. Carque calmly went on with what he was doing and said with a twinkle in his eye, 'Oh, don't worry about that. There are a lot of "peaches" up at 7th and Broadway,' (the bank)."

A portrait photo shows Otto Carque. Address: Secretary to Otto Carque, [Los Angeles, California].

1077. Austin, Marion. 1936. Carque surprised kids with play. *California Health News* (*Hollywood, California*) 4(14):16. July 17.
• ***Summary:*** "The forthcoming Otto Carque memorial birthday brings back memories of his gentle, almost childlike ways.

"I recall about 10 years ago when I was living in a health home of mine on a hill overlooking Silver Lake, that we decided to have a gathering of 'health nuts' one Saturday evening. I asked Mr. Carque to join us, and during the evening we played musical chairs. The youngsters thought that Mr. Carque wouldn't play because of his age, but they were mistaken for he was right there with bells on, and like everything else he did, he figured it out scientifically and won the game by being the last to get the last chair, and it was amusing to see his childlike glee over having won the game.

"He had such poise, such relaxation, such concentration. He was a dear, kindly soul and well earned a memorial for his many consistent good works and the example which he set."

1078. Baker's (Bill) Products. 1936. Bill Baker's products (Ad). *California Health News* (*Hollywood, California*) 4(14):16. July 17.
• ***Summary:*** A photo shows the front panel of about 14 packages of Bill Baker's brand products made with lima beans and / or soy beans. The legible ones are (from top to bottom, left to right): (1) California Lima Bean Wafers (made with lima bean flour and honey). (2) Original Pancake, Waffle & Biscuit: Lima Bean Wheat Flour. (3) Limabeen toast (4) Original Pancake, Waffle & Biscuit: Soya-Bean Wheat Flour. (5) Lima Bean Bread. (6) Soy Bean Bread.

San Diego distributor: Northpark Health Foods, 3915 30th St." Address: Ojai, California. Phone: AN 18425.

1079. *California Health News* (*Hollywood, California*). 1936. Carque birthday. 4(14):1. July 17.
• ***Summary:*** "The first annual observance Otto Carque's birthday on the Mount of Olives, Hollywood, was a signal event in the health world, to be reported in detail next issue. It was quite inspiring."

Note: At the top page 1 of this issue, in large bold capital letters: "Carque Birthday Number."

1080. *California Health News* (*Hollywood, California*). 1936. Rumors denied. 4(14):1. July 17.
• ***Summary:*** "Mrs. Lillian Carque who is carrying on the business of the late Otto Carque, requests *Health News* to deny reports that she is no longer head of the firm. She 'merely engaged services of management and marketing experts to assist her,' she declares."

1081. *California Health News* (*Hollywood, California*). 1936. Service was keynote of Carque character. 4(14):6. July 17.
• ***Summary:*** "From Los Gatos comes a tribute to the late food scientist, Carque, by Dr. A.J. Gerlach, old friend, who writes:

"'Otto Carque was all that a real gentleman of the highest type should be, in all truth. He was genuinely unselfish, tolerant, courteous, kind, sincere, honest, well informed, patient, pleasing, just, and interested in every good thing in the world that came to his attention. I never knew of a more even-dispositioned man. He was dependable in every way. He never saved himself in his desire to serve others in any capacity. No task was ever too humble for him to perform at any time for anyone.'"

1082. *California Health News* (*Hollywood, California*). 1936. Tilden sees Carque accident as murder. 4(14):15. July 17.
• ***Summary:*** "In a letter to Dr. J.A. Gerlach, Carque's intimate friend in Los Gatos, Dr. J.H. Tilden, famed Denver [Colorado] nature-curist said: 'Yours of Jan. 31 received conveying the very sad news of Otto Carque's murder, for that is exactly what it was. We are murdering people all over the U.S. by the thousands with automobiles. It is just terrible."

A small photo shows Otto Carque, dressed in a formal

two-piece suit and hat, standing by a stream. The caption reads. "Carque was a real hiker. Everyone who ever tramped with Otto Carque appreciated his profound love of nature and his always agreeable character. Here he is in an evergreen canyon by a running stream. About 1925." Address: Dr.

1083. *California Health News* (*Hollywood, California*). 1936. Otto Carque at 38 [in about 1908] (Photo caption). 4(14):16. July 17.
• ***Summary:*** These portrait photos show two different views of Carque. In both he has a large mustache. On the left, he is rather bald headed, with a bow tie, looking to the right. On the right, he is wearing a broad-brimmed hat and a coat and necktie, looking strait ahead. The lower caption reads: "Here are two unusual pictures of the late Otto Carque dug up from a box of scrapbooks by Dr. A.M. [Alice, N.D.] Reinhold of Pasadena, who believes it was taken about 1908 when the noted Carque was only about 38 and had recently come to this country from Europe. Dr. Reinhold has two others, taken when he was even younger but has not been able to find them, but promises to send them along if found.

"In these early days Carque was quite interested in agriculture and even then had ambitions to found a colony where people could grown their own fruits and vegetables and live an ideal life. Alas, he never saw his ambition realized but he was able to see the lives of thousands the world over changed due to his research and teachings."

1084. Carque (Otto) Co. 1936. The symbol of trustworthy natural foods (Ad). *California Health News* (*Hollywood, California*) 4(14):7. July 17.
• ***Summary:*** A logo at the top of the ad reads "Carque Natural Foods of California." At the bottom we read: "Carqué foods are good!" Address: 1315 Maple, Los Angeles [California].

1085. Carque, Lillian. 1936. Highlights on Carque teachings. *California Health News* (*Hollywood, California*) 4(14):7. July 17.
• ***Summary:*** An article about her husband, Otto Carque. "Otto Carque's interest in the food question developed early in life, when he recognized the inadequacy of prevailing methods of cultivating food products, intensified by their artificial and irrational preparation. For 30 years, both in Europe and America, he was a close student of the laws of diet and health.

"His activity in the food industry was a protest against man's foolish attempts to improve on nature–modern machinery that was constantly being devised to rob natural foods of their rugged strength by milling and refining, coupled with the use of adulterants and poisonous preservatives to disguise their inferior quality."

"Mr. Carque was likewise a profound student of the soil–and its relation to food and health. He believed that as all our food comes directly or indirectly from the soil, its chemical composition is a most important factor in the

© Copyright Soyinfo Center 2021

production of healthy vegetation."

A photo, taken by his friend H.F. Sexauer (of Santa Barbara's health food store), shows Otto Carque standing among tall plants. The caption reads: He inscribed it "'Among the century plants,' as he fully believed he would reach the 100 year mark. He will–in influence and spirit, but alas he was cut down at only 68 when in perfect health. If Carque's simple teachings were followed today the world would be ideal." Address: [Los Angeles, California].

1086. Clark's (Ruth) Health Cafe and Food Center. 1936. Featuring foods that supply the body-building elements (Ad). *California Health News* (*Hollywood, California*) 4(14):7. July 17.
• ***Summary:*** "Also health breads: Soy Carob Bean, Soy Garbanza, Soy Alfalfa, Soy Bean Plain, Vitamin E. Baked by Bruce McGill. 317 S. Broadway, Los Angeles."

"Tune in on Ruth Clark KEHE (formerly KTM) Mondays 4:15." A small portrait photo shows Ruth Clark. Address: 410 So. Hill St. [Los Angeles, California].

1087. Faulkner, James. 1936. Carque's little "black bag" symbol of future doctor. *California Health News* (*Hollywood, California*) 4(14):14. July 17.
• ***Summary:*** "When I came to California in 1920, Otto Carque was the first health food man I called on. I had heard of him back East and wanted to meet the man. As I remember, he, Richter and Van Houten, were about the only ones here dealing exclusively in health foods. What a contrast now!

It was Carque who helped to develop and popularize the black mission fig, and he, perhaps more than any other man in California is responsible for the place this wonderful food holds.

"Otto was industrious, honest and at work all hours of the day and night spreading health methods. I soon learned that whatever meeting I attended pertaining to health he was sure to show up, many times late. And always with him he carried a black bag, a symbol of a new order of physicians. It carried black figs, nuts and other health goodies. from his supply store, and health literature–instead of drugs and sharp knives. This bag served as his lunchbox too, which he often referred to when sitting under an overly long or dry lecture–and at times I too had the pleasure of sharing the goodies.

"To him this health food movement was a work of art–he lived and preached his ideal and it is such men as he who laid the foundation for the rapid progress we now see all over the country. I am glad to have known Otto Carque as a personal friend."

A photo shows Carque standing on the peak of Mt. Hollywood, which he often climbed (1,652 feet above sea level). "This shows it in the old days when the cross was there. He was a great outdoors lover."

Note: "Richter" refers to Dr. John T. Richter N.D., Al.D., who with his wife, Vera, came to Los Angeles in 1917 and started the first raw-food restaurant, named The Eutropheon. "Van Houton" refers to Van Houten's Health Food Store located (in Aug. 1923) at 323 So. Hill St., Los Angeles, California. Address: Dr.

• ***Summary:*** "Ready to serve–Needs no cooking. Made of whole wheat. Sweetened with honey. A warm weather cereal. At all better health food stores. 15¢ package." Address: 524 W. 8th St., Los Angeles, California. Phone: VAndike 6550.

1089. Irvine, Clarke. 1936. Carque, man of tomorrow. *California Health News* (*Hollywood, California*). 4(14):2. July 17.
• ***Summary:*** Several articles in this issue are dedicated to Otto Carque (1867-1935).

"It is said that they never fully appreciate a good man until after his death–mostly long afterwards.

"These heroes are 'men of tomorrow'; men whose lives are being or have been lived for the good of their fellow men; lonely souls down here among men whose hearts are with humanity, whose heads are in the clouds, whose lives are consecrated to making things better here and now.

"Such a man was my dear friend Otto Carque, whose birthday we celebrated Sunday in a simple outdoor rite that touched the heartstrings of those who knew and loved this simple old man whose career was so cruelly cut down by a callous woman motorist while he walked across in a so-called safety zone.

"Following that simple but impressive funeral of this generous man, which I had the honor to conduct, Nature's Path, published by Dr. Lust, old time friend of Carque, carried a noteworthy story by Dr. Harry Finkel, another intimate of the food scientist, who called him 'one of the world's greatest characters in the health movement, who bore no animosity to anyone' and who believed 'that knowledge is common property and is meant for the good of all.'

"That was Otto Carque, 'man of tomorrow,' who is starting to come into his own, although he has been gone from among us for a year and a half." Address: Hollywood, Los Angeles, California.

1090. Live Food Cafeteria. 1936. Health Ice Cream (Ad). *California Health News* (*Hollywood, California*) 4(14):6. July 17.
• ***Summary:*** "From soy bean milk, fresh fruit, honey. A refreshing food. We make it. Delicious salads from garden to you. Send for free literature and health hints."

Note: This ice cream was served in the Richter's raw-food cafeteria; we have no evidence that it was a commercial product, sold elsewhere. Address: 325 West Third St., Los

Angeles, California.

1091. Pae, Niel. 1936. Carque was a master. *California Health News* (*Hollywood, California*) 4(14):6. July 17.
• ***Summary:*** "It is lovely to remember Carque in the great open spaces for that was his world and country and to do good was his religion.

"Carque was a god. He was handicapped, as we are all, in different degrees. The greater the god the greater the handicap and Carque was unable to rise above his environment and never reached the possibilities which lay upon his very fingertips." Address: San Jose, California.

1092. Pae, Niel. 1936. Carque was always a big boy. *California Health News* (*Hollywood, California*) 4(14):11. July 17.
• ***Summary:*** "It may interest you to know that years ago I woke up one morning and found Otto Carque in bed with me!

"That's how we met and it changed my entire life from darkness to light, but through the pathway that was to first make me a pauper, then gradually to the richest man in the world, but not in dollars.

"I had been invited to spend the night at a home and Carque, to whom time didn't exist, drifted in after all had retired and climbed into bed with me. From that day to the last we were close friends. Many a night in my home where he often was a guest, I found him at one, two, yes three o'clock in the morning, writing his letters of advice to half the world without one cent of compensation, and at last would find him with his head upon the table, his big heart bleeding for humanity–misunderstood.

"He taught me patience and to blot anger from my life, and I know when he was taken from under that car, that ended his career, he had a smile and a kindly word for the girl who unconsciously removed a Living God from this stricken, sickly world."

A photo shows Otto Carque in 1925, looking very happy and walking down a flight of stairs at the Shultz home, San Jose. "He was well known among fruit ranches around San Jose where he bought tons of prunes, apricots, peaches." Address: Santa Cruz, California.

1093. Silver, Jack. 1936. Irvine to make Eastern tour for health promotion. *California Health News* (*Hollywood, California*) 4(14):1, 13. July 17.
• ***Summary:*** Clarke Irvine will address the national chiropractic convention in Indianapolis, Indiana, on Aug. 14. On the way, he plans to visit many friends and readers across America. He has invitations to visit the Battle Creek Sanitarium (in Michigan), Physical Culture Hotel, etc. The chiropractors first heard from Irvine last year at their national convention in Hollywood.

Note: A large portrait photo shows Clarke Irvine.

1094. Nye, Mary. 1936. Chat awhile with Mary [about Bill Baker of Ojai]. *Ventural County Star and the Ventura Daily Post and Weekly Democrat* (*Ventura, California*). July 18. p. 8, cols. 7-8.
• ***Summary:*** "The scrapbook–I must tell you about it–is intriguing. It has newspaper clippings, pictures, letters, and pastcards from the whole nation. All are full of praise. Mr Baker has kept it for years–treasuring the record of his consistent success. There is another book, not of clippings, but of photographs of cakes. You will smile at the first picture in the album which shows Bill Baker in 1906 standing beside the cake which won his first prize at the Philadelphia International exhibit thirty years ago."

"At Christmastide in 1933, Mr. Baker sent his first cake to President and Mrs. Roosevelt. It was a rare and beautiful thing, with 12 of the El Camino missions around it. By a surprising coincidence, the maker found out that the cake was still on exhibition in the private dining room three months after the holiday season."

1095. **Product Name:** Green Shelled Soy Beans (Canned).
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1936 July.
Wt/Vol., Packaging, Price: 19 oz can.
How Stored: Shelf stable.
New Product–Documentation: L.B. Breedlove. 1936. *Chicago J. of Commerce and La Salle Street Journal.* June 25. p. 14. "Soy bean–The magic plant. Article XI." "Battle Creek Food Factory, Battle Creek, Michigan: Green shelled soy beans (canned)."

Price List. 1937. Price List. 1940. Soy Beans, green. 19 oz. can. Distributed through health food stores. In tins.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 5. The company sells Green Soybeans in tins. Distributed through health food stores.

Note: This is the world's earliest known canned green vegetable soybean product.

1096. **Product Name:** Soy Milk (Canned). Condensed and Canned by 1940. Brand-named Soygal by April 1942.
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1936 July.
Wt/Vol., Packaging, Price: 10 oz can.
New Product–Documentation: L.B. Breedlove. 1936. *Chicago J. of Commerce and La Salle Street Journal.* June 25. p. 14. "Soy bean–The magic plant. Article XI." "Battle Creek Food Factory, Battle Creek, Michigan: Milk (canned)."

Price List. 1940. 10 oz. can.

Good Health (Battle Creek, Michigan). 1942. April. p. 52-53. "Cow's milk a common cause of allergy." Soybean milk, now available under the commercial name of Soygal, is "wholly free from the unpleasant taste of the soybean."

1097. **Product Name:** Thin Things (Wafers made with soy flour).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1936 July.
Ingredients: Whole soy bean flour and wheat flour.
How Stored: Shelf stable.
New Product–Documentation: Madison Survey. 1936. July 15. p. 114. A photo shows a package of Thin-Things.

Madison Health Messenger. 1938. Spring. Page 4. "Thin-Things. Madison's new soy wafer for salads, soups, etc., is now on the market. The dainty one-bite size and delicate flavor make it especially desirable for guest dinners and luncheons. Thin-Things are made of whole soy bean flour and choice wheat flour and they do not contain soda or baking powder of any kind. 2–5 oz. packages 25 cents."

Madison Health Messenger. 1940. 2(3):5.

1098. **Product Name:** Date Stix (Naturally sweet snack crackers made with soy flour).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1936 July.
Ingredients: Wheat flour, Kreme O'Soy Flour, dates, honey.
New Product–Documentation: Madison Survey. 1936. July 15. p. 115. Date Stix are mentioned.

Madison Survey. 1937. "The soy bean marches on." April 21. p. 59-60.

Madison Health Messenger. 1938. Spring. Page 4. "Date Stix. The wholesome blend of choice wheat flour, Kreme O'Soy Flour, dates, and honey combines several very nourishing foods into one irresistible delicacy. The flaky, appetizing biscuit holding the date filling makes Madison Date Stix and immediate for luncheons, dinners, parties, and school lunches. Children enjoy them with a glass of milk or crumbled in cream for dessert. When children ask for sweets, give them nature's best. 15 cents per package–6½ oz.

Madison Health Messenger. 1940. 2(3):5.

1099. **Product Name:** Fruit Stix (Soy flour biscuit filled with figs, raisins, and dates).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1936 July.
Ingredients: Soy flour, figs, raisins, dates.
How Stored: Shelf stable.
New Product–Documentation: Madison Survey. 1936. July 15. p. 115. Fruit Stix are mentioned.

Madison Survey. 1937. "The soy bean marches on." April 21. p. 59-60.

Madison Health Messenger. 1938. Spring, p. 4. "Fruit Stix. A soy flour biscuit filled with choice figs, raisins, and dates. 15 cents per package–6½ oz." Madison Health Messenger. 1940. 2(3):5.

1100. **Product Name:** Kreme O'Soy (sliced bread).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1936 July.
Ingredients: Wheat flour, water, soy flour, sugar, shortening, salt, yeast, malt...
New Product–Documentation: Madison Survey. 1936. July 15, p. 114-15. "Kreme O'Soy Bread."

Walter M. Kollmorgen. 1943. Tennessee Planner. Sept/Oct. p. 16-17. A photo shows a package of Kreme O'Soy, a sliced bread. The ingredients (though hard to read) appear to be: "Wheat flour, water, soy flour, sugar, shortening, salt, yeast, malt..."

1101. *California Health News* (*Hollywood, California*). 1936. Famous Bill Baker is real baker, author and genius. 4(15):1, 7. Aug. 7.
• ***Summary:*** Bill Baker is the most interviewed man in his field. Only recently Frank Kilbourne, Ojai's noted writer, said of him: "Baker began his career 48 years ago. Baking machinery, patent yeasts and food substitutes were practically unknown then He made the baking business his hobby, learning all branches from A to Z. He even wrote a

© Copyright Soyinfo Center 2021

book on baking and fancy cake decorating which has become a standard reference work for all bakers."

Further compliments were paid Baker by Ed Ainsworth in his column in the *Los Angeles Times* (21 June 1936, p. A15). Baker's friends know about his famous scrapbook, which displays his awards, ribbons, and certificates.

Photos show: (1) A portrait of Bill Baker. (2) His various products in their packages.

1102. Brewster, Clara M. 1936. The Soya bean: A four-star food. *Horizon* (*Tempo Books, New York City*) 1(3):9, 26-27. Aug.

• ***Summary:*** "Like the Fountain of Youth, the Perfect Food is a myth. There is, however, a well-nigh ideal substitute. It is 5,000 years old, yet fully appreciated only so recently that it can well be called the food of tomorrow. This food is the Soya bean–a four-star tiny seed, with one star for its exceptionally fine and healthful chemical composition, one star for its cheapness, one star for its taste, and the final star for its adaptability, which makes it a blessing to every health-minded housewife!

"In the Orient, the Soya bean takes the place of meat, eggs, milk, cheese, butter and wheat. Over its supply wars have been fought. On a diet of it entire races have been nourished and thrived. To approximately half the population of the world, it is food and drink day in and day out.

"And it is no wonder. An analysis of the chemical composition of the Soya bean shows that it is composed of 40% protein, 20% fat, and the rest is balanced carbohydrates and minerals. Also, research has shown that the Soya bean contains all the vitamins, both the fat-soluble and the water-soluble."

"The Soya bean is a complete vegetable protein containing all of the amino acids in assimilable form; one pound of Soya beans equals the protein value of two pounds of beef, which is much more expensive. Also, quite the opposite of meat, which is highly acid forming, the Soya bean is alkaline, possessing more than twenty times the alkalinity of cow's milk."

From Soya beans we can make Soya bean milk, oil, "a perfect substitute for lard and other kinds of indigestible shortening," a substitute for fresh butter (when the lard substitute is colored with a bit of carrot juice and seasoned with a little Nu-Vege-Sal), a delicious flour (good for use in pancakes, soups, etc.), toasted soya bean (which resemble peanuts in flavor and texture), coffee substitutes and chocolate substitutes (from toasted soya beans–alkaline in reaction and minus all harmful stimulants), toasted soya flour (which has a nut-like flavor), sprouted soya beans, green vegetable beans (picked when the plant is three quarters ripe; they are easy to shell after boiling in the pods for five minutes), tofu (one of the most popular foods made by the Chinese from soya beans, it is a cheese resembling our cottage cheese but pressed into cakes), the curds used to make soya cheese (use in salads or other recipes calling for cottage cheese).

"There are 250 varieties of soya beans. Recipes are given for: Soya beans a la Hauser (boiled [whole dry] soya beans, seasoned with Nu-Vege-Sal and made into a casserole). Raw soya bean salad (with sprouted soya beans). Soya milk. Clabbered soya milk ("The pulp [okara] strained out of the milk may be used in a multitude of ways..."). Mock oyster patties (with 1 cup soya pulp). Soya muffins (with 2 cups toasted Soya Flour). Soya waffles (with soya flour). Soya fiddle sticks (with soya flour, raw sugar, dates, and nuts). Soya flour fruit cake. Soya sand tarts (with soya flour).

Note 1. Nu-Vege-Sal ("Nutrofied salt") is made by Modern Health Products (Milwaukee, Wisconsin), which has a full-page ad in each issue and also makes Swiss Kriss (natural herbal laxative), Sym (formerly called "Slim"), Vitana (ripe banana food), Santay Swiss Teas, Santay Meatless Bouillon, Sea Greens ("sea vegetables" in tablet form), Sipp (drink instead of coffee), and Aydee Vitamin Tablets.

Note 2. This stylish, spiral bound, quarterly magazine, edited by Bengamin Gayelord Hauser, began publication in early 1936. It is published by Tempo Books (580 Fifth Ave., New York City), the publisher of Hauser's many books with titles like *Eat and Grow Beautiful, Food Science and Health, Harmonized Food Selection, New Health Cookery, Types and Temperaments, Dictionary of Foods, Child Feeding* (written for mothers), *Health Day* (*Gesundheitstag*), *Here's How To Be Healthy* (sensational "health cocktails"). Focusing on "Health, beauty, vitality," it emphasizes that all are related to a good diet. Hauser (whose full-page, dapper photo appears near the front of issue no. 1) "has been called into consultation by the world's most beautiful women, stars of the stage, screen and opera; and for the past two summers he has been Dietetic Director of Elizabeth Arden's exclusive 'Siesta' in Maine." Hauser appears to advocate a vegetarian diet (though he does not say so); he makes no mention of meat, fish or poultry in the text or recipes in the first four issues.

1103. Hauser, Bengamin Gayelord. 1936. A year passes. *Horizon* (*Tempo Books, New York City*) 1(3):8, 34. Aug.

• ***Summary:*** The great celebrity, international traveler, man-about-town, and self-promoter describes the highlights for him of 1936 and some of his plans for 1937. On 15 Dec. 1935 he sailed for Europe on the liner *Europa.* 1935 had been a "big" year. He had successfully completed another nation-wide tour, the manuscript of his new book, "Eat and Grow Beautiful," was in the hands of his publishers, the first issue of his own magazine, "Horizon," was in production, and his syndicated newspaper column, "Your food and you," was "proving to be a sensational success. He felt he had earned a vacation and now he resolved to leave all cares

© Copyright Soyinfo Center 2021

behind.

He spent late December in Germany enjoying Christmas and the snow [he did not mention Hitler], followed by a "series of whirlwind, colorful experiences, New Year's Eve in Prague [Czechoslovakia], a week in Budapest [Hungary], Vienna [Austria], Zurich [Switzerland], and finally Paris" [France]. Near Dresden he spent 10 days of rest and seclusion at a small sanitarium, indulging in a very rigid "house cleaning"–a diet of herb teas and fruit juices for 10 days. But he felt like a "million dollars" as he set sail for New York on an Italian liner.

His first lecture of the new season was in Philadelphia at the invitation of the Philadelphia Hauser Club. In Chicago, Illinois, thousands had to be turned away from his lectures because the Grand Ballroom of the Hotel Sherman seated only 2,000.

After addressing one-night "rallies" in Boston (Massachusetts), New York City, Philadelphia (Pennsylvania), and St. Louis (Missouri), he was anxious to return to "Sunrise Hill," the home he had purchased in Beverly Hills the year before–so he could see his bed of choice iris blooming. On May 28 he arrived home, where he was greeted by his cook, butler, and Mexican gardener. There followed a joyful summer with never a dull moment. His house became a "beehive of activity" with interior decorators, carpenters, and landscape gardeners hard at work. A new swimming pool was being created. Miss Katherine Hepburn was his neighbor. He lists his many visitors. Then his strenuous fall lecture series arrived, etc.

A photo shows Hauser writing at his desk.

1104. Modern Health Products, Inc. 1936. Group of foods and diet-accessories open new avenues to health! (Ad). *Horizon* (*Tempo Books, New York City*) 1(3):29. Aug.
• ***Summary:*** The top one-third of this full page ad shows photos of about 20 health products–including Staf, Nu-Vege-Sal (nutrofied food), Sym (formerly "Slim"), Santay Swiss Teas, Santay meatless bouillon, Correcol, Hauser potassium broth (improved), Vitana (the ripe banana food), Swiss Kriss (modern laxative), Sea greens (tablet form–"A valuable mixture of sea vegetables"), Nutro-link (the fortifying elements), Sipp (instead of coffee).

The bottom two-thirds contains a description of each product and an order form with prices (postpaid). Address: 1428 North 24th Street, Milwaukee, Wisconsin.

1105. Modern Health Products, Inc. 1936. Vegetables from the sea! Santay sea greens–a combination of three sea vegetables. *Horizon* (*Tempo Books, New York City*) 1(3):34. Aug.
• ***Summary:*** "In concentrated tablet form to help you overcome iodine deficiency. Protection against goitre. Normalizing the glandular and nervous system. Toning-up the body. Stimulating vital gland functions. Most of us suffer from some degree of iodine deficiency... Don't deprive your body of the precious minerals it needs... They are recommended by Bengamin Gayelord Hauser. 30 day supply $1.00." A photo shows a package of "Sea Greens."

Note: This is the earliest English-language document seen (June 2008) with the term "sea vegetables" or the term "vegetables from the sea" in the title. Address: 1428 North 24th Street, Milwaukee, Wisconsin.

1106. **Product Name:** Roberts Soy-Wheat Macaroni.
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 430 St. Kilda Road, Melbourne, S.C.2, Victoria, Australia.
Date of Introduction: 1936 August.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1936. Aug. 15. p. 8. "Look for the name on the packet. Health Brand (a logo illustration shows a stylized portrait of F.G. Roberts wearing a bow tie). 12 ozs. Nett. "Obtainable at all Health Centres." Note: It is not clear who manufactured this product, and where it was made.

Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1937. Sept/Oct. p. 34. "The perfectly balanced food. Made by and obtained at Roberts Health Services throughout the Commonwealth." Address: 40 Chapel St., St. Kilda. Same ad in Nov/Dec. 1937 issue, p. 14 and in the Christmas 1937 issue, p. 19 and 28. However on p. 28 we read: F.G. Roberts, N.D., D.O. [Doctor of Osteopathy], 430 St. Kilda Road, S.C.2.

Note: This is the earliest known commercial soy product made in Australia. In fact, F.G. Roberts Health Food Products, which made only vegetarian food products, launched the first twelve commercial soy products in Australia. The first soy product introduced by Sanitarium Health Food Co. in Australia was launched in 1954. It was named "Soya Beans in Tomato Sauce."

1107. Three small photographs of Mildred Lager (1936-1937). 1936.
• ***Summary:*** See next page. All three photos are black and white, each is 2½ by 3½ inches, and each is interesting more for what is written on the back than for the photo itself.

(1) Aug. 1936. Mildred in a white coat standing outside of Big Basin Inn.

(2) Aug. 1936. Mildred in a white coat and the same dress as in (1) sitting on a bench with a man wearing a coat and tie seated behind her.

(3) Mildred standing on a ship's deck, with many lei's (of flowers) hanging around her neck, probably on the way home from Hawaii in July 1937.

of Better Living (*Newsletter, Los Angeles*) 3(10):2. Sept.
• ***Summary:*** "... Melba Toast, Melbettes, Whole wheat crackers and cookies." Note 1. This is the earliest document seen (Feb. 2004) in which the spelling "Melbettes" appears; formerly they were called "Melbetts." Note 2. A similar ad appears in the June 1939 issue of this periodical (p. 4). Address: [Los Angeles, California].

1109. Lager, Mildred. 1936. New items. *House of Better Living* (*Newsletter, Los Angeles*) 3(10):3. Sept.
• ***Summary:*** "Dry Soy Milk, ready to mix with water. Soy Cocolette–soy milk cocoa not sweetened. Soy steel cut coffee. Soy milk prepared ice cream powder. Soy milk and soy milk chocolate bars. Soy milk and soy milk chocolate diabetic candy. Soy Gluten Noodles and wafers. Red Soy Beans–cook in 25 minutes when soaked over night... Soy bean oil."

On page 4 are recipes for Soy bean loaf (with 1 can Loma Linda Soy Beans) and Soy bean thousand island dressing (with Loma Linda soy mince spread). Address: 1207 West Sixth St., Los Angeles, California.

1110. Lager, Mildred. 1936. Two new booklets by Mildred Lager (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 3(10):1. Sept.
• ***Summary:*** Price 25¢ each–30¢ by mail. Including postage and sales tax. (1) Give nature a chance. (2) Menus and aids for the arthritic.

1111. Loma Linda Foods. 1936. Soy milk (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 3(10):4. Sept.
• ***Summary:*** "... with a pleasing taste, and full of nutrition, Soy Milk is one of several Loma Linda Soy Products." A logo, with "Loma Linda Foods" written on a black oval background, shows the company's name. Address: [California].

1112. **Product Name:** Glantone.
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40a Chapel St., St. Kilda, Melbourne, Victoria, Australia.
Date of Introduction: 1936 September.
Wt/Vol., Packaging, Price: Price: 2/6 (Postage extra).
How Stored: Shelf stable.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1936. Sept. 15, p. 15. "Glantone–'Gland-tone' means perfect health." The ad features a stylized face of F.G. Roberts. "The Health Food of a Nation. F.G. Roberts' Health Food Products. 40a Chapel Street, St. Kilda." Another ad for Glantone is found in the July/Aug. 1937 issue, p. 36.

Note: This product contained no soy. But note that it was apparently manufactured at 40a Chapel St., a factory that

© Copyright Soyinfo Center 2021

F.G. Roberts would later own.

1113. LeClerc, J.A. 1936. Partial list of manufacturers of soybean flour. Washington, DC: Food Research Div., Bureau of Chemistry and Soils, USDA. 1 p. Oct. 19. First ed, Oct. 1933. Unpublished manuscript.
• ***Summary:*** The following are listed: 1. Funk Brothers, Bloomington, Illinois. 2. A.E. Staley Manufacturing Co., Decatur, Illinois. 3. Shellabarger Grain Products Company, Decatur, Illinois. 4. Soya Millers, Inc., Seattle, Washington. 5. American Soya Products Corp., Evansville, Indiana. 6. Fearn Soya Food Products, 355 W. Ontario Street, Chicago, Illinois. 7. Allied Mills, Inc., Peoria, Illinois. 8. The Glidden Co., Union Trust Bldg., Cleveland, Ohio. 9. Archer-Daniels-Midland Company, Chicago, Illinois. 10. Madison Foods, Madison, Tennessee. 11. Battle Creek Food Factory, Battle Creek, Michigan. 12. Cereo Company, Tappan, New York. 13. LaSierra [La Sierra] Industries, Ontario, California. 14. MacDowell Brothers, Brookville [sic, Brockville], Ontario [Canada]. 15. The Dietetic Supply House, Inc., 1750 W. Van Buren St., Chicago, Illinois. 16. Hilkrest Health Products, 120 Carroll Ave., Takoma Park, Maryland. 17. The Wilbur-Gardner Company, Glendale, California. 18. General Soya Corp., 120 Broadway, New York, New York. 19. Soybean Products Company, 4900 W. Flournoy Street, Chicago, Illinois. 20. El Molino Mills, 5604 Valley Blvd., Los Angeles, California. 21. Mitchell Milling Co., 5613 Lexington Ave., Los Angeles, California.

Note: This is the earliest document seen (Sept. 2009) concerning El Molino Mills and soy. Address: Washington, DC.

1114. *California Health News* (*Hollywood, California*). 1936. Mildred Lager celebrates third year of teaching. 4(20):1, 12. Oct. 23.
• ***Summary:*** "On nature's eternal law of compensation: for every effort there is return, that in the give and take of the world, everyone receives his just reward, Mildred Lager has developed herself and her activities into an institution of national distinction. She is one of the few in the U.S. today who is giving a continuous large amount of health education through various means, all free. This is her idealistic goal."

Mildred is a natural teacher, having graduated from the Superior State Teachers' College of Wisconsin. She is the author of several books; the best known is *Food Facts.* She is the best known woman speaker on radio in Los Angeles, with her own show on KFAC (Monday to Thursday, 7:40 a.m.). "Thousands listen to her breakfast hour and start the day with her cheerful, healthful philosophy. She is teaching the 'ounce of prevention' to many... In Health News, her column has become a regular feature. She writes for many women's magazines... As a speaker she is continuously in demand for club, church and other meetings." She gives her free classes and carries on her work at The House of Better Living (1207 West Sixth)–which opened in 1933. Her slogan: "Pure air, pure water, pure food, constructive thought, plus exercise & sunshine build health." She started by having 2-3 free classes a week, conducting most of them herself. Later, she added guest speakers. "Today Miss Lager gives a cooking class every Wednesday, also a food class every Monday at 1:30 p.m." She now has a stone buhr mill, so that "all kinds of fresh wholegrain flours are available, also freshly ground nut butters."

"The House of Better Living has become a food prescription store. Doctors send patients here knowing they will not only get what they should have, but receive authentic advice on its preparation. Miss Lager's latest venture is a food class for doctors and nurses, meeting the second Thursday evening of each month.

"Miss Lager also edits an attractive healthful monthly which is distributed free at the House of Better Living. They also have an outstanding catalog. Because of her own trouble, arthritis, and her great interest in its cure, Miss Lager is organizing one of the first arthritic clubs in the U.S., also free of any charges, first meeting is Monday, Oct. 26, 1:30 p.m.

"In celebration of her third anniversary in this work, KFAC is conducting a program honoring Miss lager on the evening of Wednesday, Oct. 28. Recently Southern California Business, monthly of the L.A. chamber of commerce, described the House of Better Living as one of the outstanding institutions of the state."

A large, excellent portrait photo shows Mildred Lager. Address: Food Economist and Director, House of Better Living, 1207 West Sixth, Los Angeles.

1115. Lager, Mildred. 1936. Recipes. *House of Better Living* (*Newsletter, Los Angeles*) 3(11):1. Oct.
• ***Summary:*** Recipes for: Plain cooked red soy beans. Eggless soy wheat germ muffins (with soy pastry flour).

1116. Lust, Benedict. 1936. State news: New York. *Naturopath and Herald of Health* (*New York City*) 41(10):306-07. Oct.
• ***Summary:*** "Another visitor who graced our home and table during August [1936] was the well-known editor of the California Health News, of Hollywood, California, Mr. Clarke Irvine, known to his intimates as the 'skipper.' It was a genuine pleasure to have this interesting and charming man with us..."

"Mr. Irvine is an advocate of natural foods and a believer in strict vegetarianism. He has to his credit the formation of the California Academy of Health and the Health Food Dealers Association. He is dead set against smoking and was particularly disgusted with the manner in which restaurants and theatres in New York and elsewhere have their air polluted with the smoking of men and women."

© Copyright Soyinfo Center 2021

1117. Olson's. 1936. Use Olson's... (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 3(11):4. Oct.
• ***Summary:*** "... 100% whole wheat bread, plain or raisin. Sliced soy bean bread 12¢."

Note 1. It is not known whether the soy ingredient in this bread is soy flour or cooked whole soybeans that have been mashed or pureed.

Note 2. This small ad ran for many years. In the March 1937 issue the title was changed to "Better Breads... Olson's" and the bread name to "Sliced soy." The price was still 12 cents.

1118. *Naturopath and Herald of Health* (*New York City*). 1936. American Health Food Association: Anthony A. Berhalter, D.N.S. 41(11):333. Nov.
• ***Summary:*** "Thirty years ago [in 1907] Mr. Berhalter, now a nationally known health food manufacturer and dealer, started a health food factory and store in Chicago.

"It was a New Idea then to run a store that manufactured and made a specialty of natural, healthful foods. Much educational work had to be done but Mr. Berhalter, after having regained lost health through correct eating and living, became imbued with the true pioneer spirit, to spread this knowledge to the public and did not count the cost in time and effort to make his newly chosen field of effort a success.

"Others have followed in his footsteps, by starting similar stores and factories, until today there are literally thousands of health food factories and dealers throughout the United States.

"With this background of experience, knowledge and interest in the health food field, Mr. Berhalter is peculiarly fitted to head the American Health Food Association as Founder and President. He is fired with the ambition to unite all health food dealers and manufacturers, and all health minded laymen into one great and strong organization, so that they may share in a unified effort to hasten the common benefits to be derived.

"Mr. Berhalter invites all who are interested in the progress and growth of the health food field to join with each other, and with him, and in that way become a powerful and influential body of people for the benefit of the cause they love."

Note: This is the earliest document seen (July 2021) that mentions the American Health Food Association (later renamed the NNFA) or that proves it was founded in 1936. Other accounts have said incorrectly that the organization was founded in 1938 or 1937 (*One More Slingshot*, 1984, p. 11, 20).

1119. *Los Angeles Times.* 1936. Ojai baker will ship White House cake today. Dec. 13. p. B14.
• ***Summary:*** "Ojai, Dec. 12.–The latest masterpiece of W.C. (Bill) Baker, 'cake maker for Presidents,'" is ready to ship to President and Mrs. Roosevelt. Weighing about 100 pounds, and 72 inches in circumference, it features a replica of the White House made of sugar atop the single layer. A photo shows the cake.

1120. Baker's (Bill) Products. 1936. To everybody! A Merry Christmas and a happy prosperous new year (Ad). *California Health News* (*Hollywood, California*) 4(24):16. Dec. 18.
• ***Summary:*** A photo shows the front panel of about 12 of Bill Baker's products made with soy beans and / or lima beans. "At all health food stores and better markets in the West. For Los Angeles orders phone AN. 18425. San Francisco distributor: Ruth's Health Food Store, 333 Sutter. Northwest distributor: Clara M. Brewster's Health House, 1621 Third Ave., Seattle [Washington]. Portland distributor: Bio-Chemic Food Shop, East Portland [Oregon]. San Diego distributor: Northpark Health Foods, 3915 30th St." Address: Ojai, California. Phone: AN 18425.

1121. Lager, Mildred. 1936. Better natural foods (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 3(13):4. Dec.
• ***Summary:*** These natural foods are sold at the House of Better Living. "Stone ground flours: Wholewheat bread, Wholewheat pastry, also Soy–Lima–Rice–Gluten...

"All the better cereals: Whole and cracked wheat, Crushed and Scotch oats, Brown and wild rice, Wheat germ.

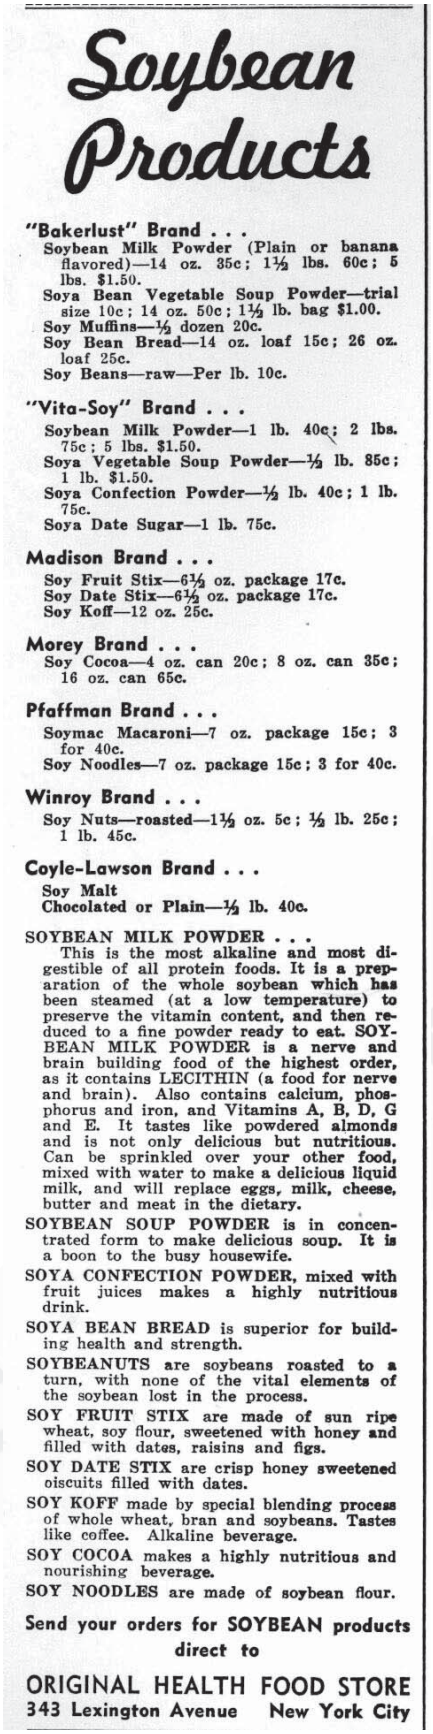
"Nuts and nut butters: Nuts–Shelled, blanched, or in shell, Nut butters–dextrinized. Peanut butter–Raw and toasted, Almond butter–cashed, Pecan and Soy butter."

1122. Original Health Food Store. 1936. Soybean products (Ad). *Naturopath and Herald of Health* (*New York City*) 41(12):381. Dec.
• ***Summary:*** Down the left side of this 4.75 by 5½ inch ad is a list of soybean products by brand a price is also given for each: "BakerLust" brand: Soybean milk powder, plain or banana flavored, 14 oz, 1½ lb, or 5 lb. Soya bean vegetable soup powder, trial size, 14 oz, 1½ lb bag. Soy muffins, ½ dozen. Soy bean bread, 14 oz or 26 oz loaf. Soy beans–raw, per lb.

"Vita-Soy" brand: Soybean milk powder, 1 lb, 2 lb, 5 lb. Soya bean vegetable soup powder, ½ lb or 1 lb. Soya confection powder, ½ lb or 1 lb. Soya date sugar, 1 lb.

Madison brand: Soy fruit stix, 6½ oz. Soy date stix, 6½ oz. Soy koff, 12 oz.

Morey brand: Soy cocoa, 4 oz, 8 oz, or 16 oz cans.



Pfaffman brand: Soymac macaroni, 7 oz package. Soy noodles, 7 oz package.

Winroy brand: Soy nuts–roasted, 1½ oz, 8 oz, or 16 oz.

Coyle-Lawson brand: Soy malt–chocolated or plain, ½ lb.

Down the right hand side, under the title "Products of the marvelous soybean," is a brief description of each type of product. The first item, and that with by far the longest description, is "soybean milk powder."

Soybean Products

"Bakerlust" Brand . . .
Soybean Milk Powder (Plain or banana flavored)—14 oz. 35c; 1½ lbs. 60c; 5 lbs. $1.50.
Soya Bean Vegetable Soup Powder—trial size 10c; 14 oz. 50c; 1½ lb. bag $1.00.
Soy Muffins—½ dozen 20c.
Soy Bean Bread—14 oz. loaf 15c; 26 oz. loaf 25c.
Soy Beans—raw—Per lb. 10c.

"Vita-Soy" Brand . . .
Soybean Milk Powder—1 lb. 40c; 2 lbs. 75c; 5 lbs. $1.50.
Soya Vegetable Soup Powder—½ lb. 85c; 1 lb. $1.50.
Soya Confection Powder—½ lb. 40c; 1 lb. 75c.
Soya Date Sugar—1 lb. 75c.

Madison Brand . . .
Soy Fruit Stix—6½ oz. package 17c.
Soy Date Stix—6½ oz. package 17c.
Soy Koff—12 oz. 25c.

Morey Brand . . .
Soy Cocoa—4 oz. can 20c; 8 oz. can 35c; 16 oz. can 65c.

Pfaffman Brand . . .
Soymac Macaroni—7 oz. package 15c; 3 for 40c.
Soy Noodles—7 oz. package 15c; 3 for 40c.

Winroy Brand . . .
Soy Nuts—roasted—1½ oz. 5c; ½ lb. 25c; 1 lb. 45c.

Coyle-Lawson Brand . . .
Soy Malt
Chocolated or Plain—½ lb. 40c.

SOYBEAN MILK POWDER . . . This is the most alkaline and most digestible of all protein foods. It is a preparation of the whole soybean which has been steamed (at a low temperature) to preserve the vitamin content, and then reduced to a fine powder ready to eat. SOYBEAN MILK POWDER is a nerve and brain building food of the highest order, as it contains LECITHIN (a food for nerve and brain). Also contains calcium, phosphorus and iron, and Vitamins A, B, D, G and E. It tastes like powdered almonds and is not only delicious but nutritious. Can be sprinkled over your other food, mixed with water to make a delicious liquid milk, and will replace eggs, milk, cheese, butter and meat in the dietary.

SOYBEAN SOUP POWDER is in concentrated form to make delicious soup. It is a boon to the busy housewife.

SOYA CONFECTION POWDER, mixed with fruit juices makes a highly nutritious drink.

SOYA BEAN BREAD is superior for building health and strength.

SOYBEANUTS are soybeans roasted to a turn, with none of the vital elements of the soybean lost in the process.

SOY FRUIT STIX are made of sun ripe wheat, soy flour, sweetened with honey and filled with dates, raisins and figs.

SOY DATE STIX are crisp honey sweetened oiscuits filled with dates.

SOY KOFF made by special blending process of whole wheat, bran and soybeans. Tastes like coffee. Alkaline beverage.

SOY COCOA makes a highly nutritious and nourishing beverage.

SOY NOODLES are made of soybean flour.

Send your orders for SOYBEAN products direct to

ORIGINAL HEALTH FOOD STORE
343 Lexington Avenue New York City

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the word "BakerLust." It appears to be used as a brand name only for soy products.

Note 2. Benedict Lust apparently owned this store (See ad in the Feb. 1937 issue, p. 64). His brother, Louis Lust, owned a bakery (established in 1903) at Corner 105th St. and Park Ave., New York City. He baked wholegrain breads and related baked goods. Louis used (and may have coined) the brand name "BakerLust" to refer to products he made or sold.

Note 3. This ad also appears (with the same content but in a different form) in the Jan. 1937 edition of this magazine (p. 27), and of *Nature's Path* (New York City) (p. 38). It appeared in the same form in the July 1937 (p. 224) issue. Address: 343 Lexington Ave., New York City.

1123. **Product Name:** Saucettes (Meatless Sausages).
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1936.
New Product–Documentation: Gray. 1936. All About the Soya Bean. p. 121.

1124. **Product Name:** Canned Whole Soybeans (With Mixed Vegetables).
Manufacturer's Name: Berhalter Food Stores.
Manufacturer's Address: 1423 N. Clark, Chicago, Illinois.
Date of Introduction: 1936.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: L.B. Breedlove. 1936. *Chicago J. of Commerce and La Salle Street Journal.* June 25. p. 14. "Soy bean–The magic plant. Article XI." "Berhalter Food Stores, Chicago, Illinois: Canned whole soybeans with mixed vegetables." International Inst. of Agriculture. 1936. Manufacturers of soy products. p. 205. "Conserves de sojas entieres, avec d'autres légumes en mélange."

1125. **Product Name:** Manchu Soybean Milk.
Manufacturer's Name: Eastern Health Food Stores Assoc.
Manufacturer's Address: Washington, DC.
Date of Introduction: 1936.
New Product–Documentation: Gray. 1936. All About the Soya Bean. p. 122. This is the 2nd earliest known commercial soyfood product made in Washington, DC.

1126. **Product Name:** Soy-Koff (Alkaline Coffee Substitute. Renamed Zoy-Koff in about 1939) [Regular, or Fine Grinds].
Manufacturer's Name: Madison Foods (Renamed Nutrition International Corp. in about 1965).
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1936.

• ***Summary:*** A comprehensive, early work on the soybean. Gray was a Scotch physician. Contents: 1. Introducing the soya bean. 2. The soya bean plant and its cultivation. 3. The soya bean as food: Dietetics, immature green beans, mature dried beans, soya bean coffee, soya bean chocolate, soya bean sprouts, soya bean milk, soya bean flour (incl. Berczeller flour, Soyvita bread made by Messrs. Wm. Beattie, Ltd., Glasgow), bean curd [tofu], soy (also called soya bean sauce, Chinese bean sauce, or shoyu), miso, fermented bean curd (p. 66-67). 4. Soya bean oil. 5. Soya bean trade. 6. The soya bean in agriculture.

Addenda: Soya bean products in the USA. Dieting and recipes. Statistics. India. Bibliography.

In the chapter on "Soya bean oil" we read (p. 75): "In England, the bean oil trade is carried on by the following firms:–The British Oil and Cake Mills Ltd., the ordinary shares of which are held by Lever Bros., Ltd., so that they are a branch of Unilever, Ltd.

"The Hull Oil Manufacturing Co., Ltd., Hull, now merged in the foregoing concern.

"The Premier Oil Extracting Mills, Ltd., Hull.

"Messrs. Wray Sanderson & Co., Hull.

"The Medina Refinery Ltd., Deptford, London.

"Messrs. J. Bibby & Sons Ltd., Liverpool.

"The Erith Oil Works Ltd., Erith" [Kent].

The first addendum, titled "Soybean products exhibited by the American Soybean Association" (at Washington, DC, p. 120-24) lists the following companies and each of the soy products that they manufacture: American Lecithin Corp. (Atlanta, Georgia), Archer-Daniels-Midland Co. (Milwaukee, Wisconsin), Armstrong Paint and Varnish Works (Chicago, Illinois), Battle Creek [Food] Factory (Battle Creek, Michigan), The Blanton Co. (St. Louis, Missouri), Cereo Co. (Tappan, New York), The Davies-Young Soap Co. (Dayton, Ohio), Detroit Graphite Co. (Detroit, Michigan), Eastern Health Food Stores Association (Washington, DC), Funk Brothers Seed Company (Bloomington, Illinois), Harshaw Essential Foods, Inc. (Cleveland, Ohio), Keystone Macaroni Mfg. Co. (Lebanon, Pennsylvania), Kloss, Jethro (Takoma Park, Maryland: Fresh [soybean] milk. Pumpkin pie [soybean milk and soybean flour]. Soybean cheese. Soybean bread [20% soybean flour]. Soybean buns. Soybean sprouts. Soybean cake), Laucks, I.F., Inc. (Bloomington, Illinois–home office, Seattle, Washington), Madison Food Company (Madison, Tennessee; Vigorost, Cheese [Tofu], Soybeans canned with Tomato, Soybeans canned plain, Dixie Fruit Crackers), Mead Johnson and Co. (Evansville, Indiana; Makes Sobee [Infant Formula]), Oriental Show-You Co. (Columbia City, Indiana), Paintcraft Co. (Galesburg, Illinois), Prince Macaroni Mfg. Co. (Boston, Massachusetts), Purina Mills (St. Louis, Missouri; makes Cresol disinfectant, Purina turkey and growing fattening chow, Purina lay chow, Purina egg chowder, Purina breeder egg chowder, Purina fitting chow, Purina rabbit chow, Purina chick Growena chow, Purina 34% cow chow, Purina chowder, Purina bulky cow chow, Purina 24% cow chow, Purina pig and hog chow, Protena all mash starting and growing food), Shellabarger Grain Products Company (Decatur, Illinois), Soyex Company, Inc. (Nutley, New Jersey), Staley Sales Corporation (Decatur, Illinois), The Stamford Rubber Supply Company (Stamford, Connecticut),

Dr. Roy Monier, President, Board of Managers, State Hospitals (Jefferson City, Missouri), United Drug Company (Boston, Massachusetts), Vi-tone Company (Hamilton, Canada), Woolsey Paint and Color Co., C.A. (Jersey City, New Jersey), Bureau of Chemistry and Soils, Department of Agriculture (Washington, D.C.). Page 120 adds: "The exhibit also contained some 200 soybean products, mostly foods, brought from the Orient by Mr. W.J. Morse, Senior Agronomist, Department of Agriculture, Washington, DC, U.S.A." Note 1. Morse and P.H. Dorsett were in East Asia from 1929 to 1931, when they collected many samples of soybeans and soyfoods.

In the second addendum, recipes, the author notes that soy flour is widely used in diabetic diets. Two leading firms who make soy flour in England and who also incorporate it in various products are: Soya Foods, Ltd., Rickmansworth, Herts, and Dietetic Foods Ltd. 124 Victoria St., London, S.W. 1. "The former specialize in Soyolk which is flour prepared on the principles laid down by Professor Berczeller; it is a mealy powder, fatty to the touch. The latter firm are the sole distributors in Great Britain of the well-known 'Heudebert' Dietetic Food products, a French concern which makes different kinds of diabetic breads." The following recipes are then given; * = Calls for Soyolk soy flour: Soybeans, southern style. Soybean salad. Roasted soybeans [like dry-roasted peanuts]. Soybean croquettes. Soybean soufflé. Stuffing for baked fish*. White sponge pudding*. Shortbread*. Madeira cake*. Soya soup à la Reine (uses Heudebert soya flour). Soya chocolate (with soya flour). Soya vegetable soup (with soya flour). Soya bean sprout salad.

Note 2. This is the earliest English-language document seen (Jan. 2013) that uses the term "soya bean sprouts" to refer to these sprouts. Address: M.D. (Scotch physician), C.B.E., England. Late medical officer to H.B.M. Legation, Peking, China. Lieut.-Colonel, Retired.

1131. Hagstotz, Gideon David. 1936. The Seventh-day Adventists in the British Isles, 1878-1933. Lincoln, Nebraska: Union College Press. 231 p. Index. 23 cm. [611 ref]

• ***Summary:*** Chapter 1 begins with a historical sketch of the early Seventh-day Adventist church in the United States, plus general organization, work and doctrine: 1831-1844–William Miller of Low Hampton, New York, delivers his famous prophetic lectures concerning Christ's return to earth in 1844 (based on Daniel 14 in the Bible). 1844–The "disappointment" when Christ fails to appear, and attempts to predict another date (based on Revelation 14:6-14). Ellen Harmon experiences her first "vision" at age 17. 1845 (about)–A new religious movement is started by Captain James Bates, James White, and Ellen G. White; they follow the Ten Commandments, start to keep the Sabbath on Saturday, and preach the word of God for the "cleansing of the sanctuary" in heaven.

1848 Oct. 30–Ellen Harmon and Elder James White (a Methodist) are married. 1849–A newspaper titled *Present Truth* is published in Middletown, Connecticut, largely under the aegis of James White. "Shortly after this time Mr. and Mrs. White moved their headquarters to Rochester, New York. 1855–They relocated in Battle Creek, Michigan, which later became the SDA denominational headquarters. 1860 Oct.–The name Seventh-day Adventists is adopted at a conference held in Battle Creek. 1863–There are now about 3,500 Seventh-day Adventists having about 125 churches. 1873–There are now about 5,875 Seventh-day Adventists. 1893–The number of the SDAs has increased to 37,404. 1903–The SDA denominational headquarters is moved to Washington, DC, from Battle Creek.

Chapter 2 is "Organization of the British Union Conference," and Chapter 10 is "Medical Work and Health Food Factory." A merged chronology follows: From 1878 "until 1 July 1902, when the British Union Conference came into existence, the General Conference of Seventh-day Adventists located at Battle Creek, Michigan, directly controlled the denominational mission program in the British Isles." The headquarters was in London.

1898–Definite denominational medical endeavors began when Dr. D.H. and Dr. Lauretta Kress arrived in England under the auspices of the General Conferences of SDAs.

1899–These physicians began to publish a magazine devoted to healthful living titled *Life and Health.* They also "started a small 'health home' in Dunedin, a country villa Meadville, near Redhill Surrey, which they reported full to capacity by November of the first year."

1899 (about, p. 146)–"The first venture at manufacturing health foods by the Seventh-day Adventists in England began in conjunction with the Sanitarium work of Dr. D.H. and Dr. Lauretta Kress near Redhill, Surrey. Here the International Health Association purchased Harley Mill, which it enlarged and called Salford Mill before starting production of health products. The management imported some of the machinery and purchased the remainder in England. The products resembled the noted Kellogg and Post health foods; in fact the association had procured the 'rights' to make Battle Creek foods in England.

"Early in 1900, just after the factory gave promise of developing into a profitable industry, fire destroyed the plant... With the undamaged machinery as a nucleus for a new start, the Association leased property in Birmingham [far to the northwest, between London and Manchester] the following November [1901] where it functioned as a stock holding company under British law. Unfavorable conditions in the form of high rent and improper location" led to "a financial loss of £1,500 at the end of the first year of operation." Thereafter "each year the plant showed a profit in spite of some competition created by substitutes for the commodities it produced."

© Copyright Soyinfo Center 2021

In the spring of 1900, Dr. and Mrs. Kress had to leave England. But before they left, Dr. A.B. Olsen and his wife, also a physician, had arrived in England to replace them. The first magazine was discontinued.

1901 Oct.–A new health journal, *Good Health*, appears on the market thanks to a gift of $300 from Dr. J.H. Kellogg and $400 worth of advance subscriptions. By Feb. 1902 this periodical had reached a circulation of 30,000. Note: It advocated a vegetarian diet.

1902 Aug.–During the Bank Holiday the SDA food factory's products were served as refreshments at the Salvation Army gathering at the London Country Athletic Grounds, Herne Hill; they were widely praised.

1903 March–Dr. Olsen completes the purchase of a small hydropathic institution in Caterham, Surrey, 18 miles south of London. The new property is named Caterham Sanitarium and Surrey Hills Hydropathic. The Sanitarium as soon thriving.

1906–A company named the Seventh-day Adventist Union Ltd. was created at the annual meeting to care for SDA property and transact all legal business with dispatch. "After some negotiations the company purchased an estate known as The Stanboroughs for £8,250. This property, located near Watford, England, about 15 miles northwest of London, included fifty-five acres, a large residence and stables all surrounded by timber. Here the British Union Conference located its publishing plant, food factory, college, and sanitarium." In Dec. 1906, when the Union Conference gained possession of the property, the denominational headquarters was moved to here from London, where it had been located since 1877.

1907 Oct.–The SDA food factory closes in Birmingham and starts to operate at Watford, 15 miles northwest of London. From 1907 to 1914 the SDA health food factory liquidated a deficit of $7,000 and indicated a yearly profit of $3,000 to $400.

1908 Dec. 31–Organizations owned by the British Union Conference include "The International Health Association Limited, The Good Health Association Ltd., and Stanborough Park Training College..." (p. 28).

1913–The International Health Association recorded a net profit of $3,930. Then came World War I and hard times, but business continue to improve.

1918–By the end of this year "the factory could no longer supply the demand, although operating on a twenty-four hour schedule with forty employees." Assets totaled $28,800 whereas liabilities were only $5,400.

1926–The International Health Association is renamed Granose Foods Ltd. By year's end the company had no more liabilities.

Note 1. Seventh-day Adventists appear to have been the first to make health foods in the UK, starting in 1899. In 1896 or 1897 a vegetarian restaurant opened in a new building on Corporation Street in Birmingham. James Henry Cook was appointed the manager. The landlord asked the consortium of businessmen funding the restaurant if they would like to use the whole seven story building and convert the upper five stories into a hotel. They agreed to do so. Thus, in the summer of 1898, the Pitman Vegetarian Hotel, the first Vegetarian Hotel in England, opened in Birmingham, again with James Henry Cook appointed manager. In about 1902, James Henry Cook opened a health food store either in the hotel or nearby, and some time after that he began to manufacture health foods in Birmingham. The manufacturing company was initially named the Pitman Health Food Co., but in about 1929 it was renamed Vitaland. Unfortunately the last two dates are not known. (See Ray Hill. 1998. *The Health Food Store* (p. 10-11). Also Kathleen Keleny. 1996. *The First Century of Health Foods*).

Note 2. This book is very well documented with 515 footnotes and 96 bibliographical references from both primary and secondary sources. Gideon David Hagstotz was born in 1896. Address: PhD.

Address: 1207 W. 6th St., Los Angeles.

1134. Richter, John T. 1936. Nature–The healer. As edited by Henry Winfred Splitter, M.A. (Univ. of Wisconsin). Los Angeles, California: Published by the authors. 433 + [6] p. Illust. Index. 21 cm.
• ***Summary:*** John T. Richter was born in 1864. He earned his Doctor of Chiropractic and Naturopathy in Minnesota, but he did not practice "since coming to California. The management of his restaurants and educational work connected with the live-food movement have demanded his entire time." This book is dedicated to "to humanity whom we serve."

Perhaps the most interesting part of this book is the Biography (on unnumbered pages at the front). "My father was a country physician of the conventional medical type. He also owned a drug store in the little North Dakota town of Fargo" in which I was raised. He wanted me to be a medical doctor, just as he was; but, as it happened I had worked as a young man, for nine years in his drug store, and had had plenty of experience in the compounding of inorganic and organic drugs. I had observed their effects on my father's patients. He decided to send me to the Rush Medical College in Chicago [Illinois], and he thought it was strange when I showed no desire to fulfill his wishes."

He did go to Chicago and earned some type of diploma from an unnamed "institute" that taught the "'movement-

© Copyright Soyinfo Center 2021

cure' in which the general theory and practice of vegetarianism of the cooked food type was incorporated.

When he returned home, his father, upon seeing his degree said it was "quack." John drove with his father on rounds to see his patients. Some 20-30 were incurable charity patients. John offered to take all these from his father. Soon he had cured them all. "Notice all that all these cures were accomplished under the Battle Creek system of diet–cooked food vegetarianism, with a considerable amount of green vegetables and fruits. The results I had obtained were marvelous."

"After having lived for 15 years largely on a cooked-food diet (no meat, of course). I noticed that something was physically wrong with me. My kidneys were not functioning properly. I seemed to lack recuperative energy." He often felt tired. He then read an article in a naturopathic magazine "describing how a certain Dr. Lust had been invited by Dr. George Drew of Chicago to partake of an uncooked food dinner." He decided to give the new diet a trial. "Dr. Drew came to Minneapolis to teach me as well as the class I had organized for him." After 9 months he felt much better. Tests showed his blood had changed from acid to alkaline. His weight, which began at 145 pounds, dwindled to 123, but eventually returned to 145 plus a little more. "For 25 years now I have lived according to this [raw food] system." He was in his late 40s when he started. "Today, at age 72 (I was born in 1864), I can do more work, can do it more accurately, than I could when I was 35."

This book consists of a number of health conditions / problems, foods, and stimulants, arranged in alphabetical order, and his advice concerning each. For example: Abscesses, acidity, adenoids, adhesions, alcohol, aluminum, anæmia, apoplexy, appendicitis, appetite, arthritis, asthma, auto-intoxication, bacteria and germs, etc. Other interesting sections include drugs and drug poisoning, eggs (forbidden), fasting, food–cooked, meat, milk, patent foods, philosophy of live food, sex, tobacco, vaccination, vegetable and olive oils, and vegetables and legumes.

He repeatedly advises people to "eat natural foods" and to live naturally. Richter was opposed to alcoholic beverages, coffee, cooked foods, dairy products, meat, salt, sugar, tobacco, and vaccination. He advocated conservation of bodily energy through continence–except for the purpose of reproduction. A full page portrait photo (frontispiece) shows John T. Richter.

Note 1. The index is largely useless, since it simply lists health conditions in alphabetical order.

Note 2. Despite the bibliography, this book contains relatively little information about John Richter's life. When and where did he earn his "Doctor of Chiropractic and Naturopathy"? How long did it take him to complete the course? When did he move to California (by 1917) and when did he start each of his living food Eutropheon restaurants there (by Sept. 1923)? When and where did he meet his wife (who was very active in his restaurants and educational work)? When and where were they married? Address: 2844 Avenel St., Los Angeles 26, California.

Address: M.D. Phone: INC.

1136. Irvine, Clarke. 1936? Health! With remedies and recipes: The book of the new race. Hollywood, California: Clarke Irvine. 78 p. Undated. No index. 18 cm. [1 ref]
• ***Summary:*** Filled with mostly wise and practical advice. On the title page of this 9th edition published in Hollywood we read: "Evolved from the author's original card 'Eleven Rules for Health,' published in 1924. First edition was three years in writing; printed in Auckland, New Zealand, 1927. In loving dedication to all little children; also to our dear mothers and fathers–they did the best they knew. No copyright; please credit. Published by the author in an effort to help suffering humanity." Facing the title page is a large portrait photo of "Skipper" Clarke Irvine. Above it: "Health is wealth." Below: "This book has helped you; buy another and pass it on."

Contents: Introduction. 1. Breathe. 2. Drink. 3. Sleep. 4. Eat (vegetarian natural foods, uncooked, in season, especially fresh fruits and juices). 5. Eliminate. 6. Exercise–work. 7. Play. 8. Think. 9. Improve. 10. Examine. 11. Love. Remedies. Recipes.

Concerning soy: "Soy bean milk is replacing animal milk" (p. 26). The last chapter, titled "Recipes," mentions" Soy milk (p. 75) recommended as a "nightcap" or drink before bedtime. Raw peanut butter (p. 76, 77). Garbanzas (p. 76). Soy or lima bread (p. 77). A liquefier helps to make delicious drinks (p. 77).

All editions are undated. An early edition is listed in the Jones Grain Mill Natural foods catalog, probably published in 1933 (p. 49). The 4th edition was the most recent on sale in Jan. 1937. The 7th edition was published in about 1945. The 9th edition is 78 pages and bears the extra subtitle "The book of the new race." It must have been published after Jan. 1935, the month that Otto Carque died (see p. 56).

Irvine, Clarke. 1964. Letter re: Irvine family genealogy to Myra, his only sister. May 5. He wrote "one little book which I've sold 10,000 on my own by mail,..."

Talk with Alice Marks Irvine, Clarke Irvine's wife. 2004. Feb. 23. Clarke wrote and began publishing this long before she met him, in 1941. It went into a 10th or 12th edition and was being sold during the 1940s and 1950s. One could probably determine when it was first published by looking through issues of *California Health News* from the 1930s. She does not have a copy. Address: Hollywood, California.

1137. Jones Grain Mill. 1936? Natural foods: Catalog, recipes, information. Los Angeles, California. 74 p. Undated. 22 cm.

• ***Summary:*** On the cover is a white mill behind a mill wheel (unrealistic) on a mill pond. Contents: Foreword. Health recipes: Cereals (incl. Soy bean or Mamenoke {Mamenoka, Mamenoko} breakfast cereal), breakfast cakes (incl. soy hot cakes with soy milk and Mamenoka flour, soy waffles, soy bean griddle cakes), desserts, breads (incl. soy bean flour gems, whole wheat bread), candies. Vital information: Vitamins and minerals essential to life.

Price list (prices are given for each item listed on pages 46-72): Alberty products, Alvita products, Battle Creek Sanitarium Health Foods [Michigan] (p. 47-48), beverages–coffee substitutes (Loma Linda Breakfast Cup, Soyco {soy bean coffee}, Javex {soy bean}, Carque's Soy Bean Coffee), books (by Dr. Benjamin Gayelord Hauser, Paul C. Bragg, Mrs. Alberty, Martin W. Pretorius, Otto Carque, Clark Irvine, Dr. Harry Finkel), Dr. Paul Bragg products, Jones Grain Mill Bakery (operated by Alberty Specialty Bakers), Burbank products, Carque's products, crackers and toast (Cubbison's bulk or packaged), honey, jams & jellies, juices (fruit & vegetable), KAL products, kelp products (products of the sea, incl. sea lettuce, dulse, Parkelp), Kovac products, Loma Linda Foods (Soy products: Soy beans–plain, tomato, or tomato and Proteena, Soy milk–8½ oz, No. 1, or No. 2, Soy Mince sandwich spread), macaroni & noodles (incl. soy bean macaroni, soy bean noodles), meat substitutes (incl. Simoein [Smoein], Soy loaf, Alfa Soy Spread, Soy Mince) McCollum products, maple syrup and candies, Martin Pretorius products, nuts and butters, Nature Ade products, Nutro Links (Santay, Swiss, Hauser), oils, olives, Radiance products, salts (vegetable, vegetized, and vegetablized), salad dressing and mayonnaise (made with lemon and vegetable oil), health sugars and sugar substitutes, seeds, soya bean products, teas.

The price list of "Soya bean products" (p. 72) reads as follows: "Breakfast Cereal with Carob Flour ([and soya beans] tastes like Grape Nuts), pkg., 25¢. Breakfast Cereal (prepared [with soya beans]), pkg., 25¢. Soya bean flakes, pkg., 30¢. Soya bean grits, pkg., 25¢. Soya bean bread, lb. loaf, 14¢. Soya bean melba toast, lb., 30¢. Soya bean wafers, lb., 40¢. Soya bean cookies (sweetened with dextrose), doz., 15¢. Soya bean coffee cakes (sweetened with honey), each, 5¢. Soya beans cooked: Soya beans (plain cooked), No. 2 can, 13¢. Imported soya beans from Manchuria, lb., 10¢. Pre-cooked soya beans (easily prepared in 30 minutes), lb., 15¢. Soya beans with tomatoes (ready to serve), No. 2 can, 15¢. Cooked soya beans with Proteena, No. 2 can, 15¢. Other soya bean products: Non-fattening [sic] soya bean oil (for all cooking purposes), pint, 40¢. Soya bean coffee, lb., 25¢. Soya bean flour, lb., 10¢; 3 lbs., 25¢. Dextrinized soya bean flour, lb., 15¢. Soya bean milk flour, lb., 60¢. Soya bean candy (with pure chocolate and Dextrose), lb., 50¢. Soya bean sandwich spread, 25¢. Soy sauce, 20¢. Soya bean loaf, No. 2 can, 25¢. Soya bean milk, No. 2 can, 15¢. Soya bean cheese (made from soya bean milk), lb., 30¢. Soya bean mince, 8-oz. can, 25¢. Soya bean spaghetti, lb., 25¢. Soya bean macaroni, lb., 25¢. Soya bean noodles, lb., 25¢. Soy beverage (Cocoalette), 10¢.

Ads include: Hollywood Cup (p. 20). Otto Carque Co. (Glendale, California, p. 30). Loma Linda Foods (p. 33, sells soy wafers, three styles of soy beans, liquid soy milk, soy mince). Vita-Pekan (p. 46, formula includes soya bean as a major ingredient). Alberty dried brewers yeast (p. 50). Kovac Laboratories (p. 67). Cubbison (p. 73, incl. Soya Toast, Soya Cookies, Soya Gluten Crackers).

Note 1. The is the earliest English-language document seen (Jan. 2019) that contains the term "Soya bean grits." Note 2. This catalog was probably published in 1933, since the company's location in Beverly Hills is not mentioned; it opened in 1934. Moreover, the book titled *Vital Facts about Foods,* by Otto Carque was first published in 1933. Address: 322 So. Hill St. and 504 So. Broadway. Both: Los Angeles, California.

1138. Kahan (Ben) Co. 1936? The staff of life (Leaflet). Los Angeles, California. 2 panels each side. Each panel: 16 x 8 cm. Undated.

• ***Summary:*** On the front panel, below the title, is a large photo of Bill Baker's Soy Bean Bread, in a clear wrapper.

A banner headline in a rectangle across the top of the inside 2 panels reads: "The family bread." Below that, reasons that father likes it, mother likes it, and the children like it. The text on panel 2 begins: "Bread being the staff of life and our most important food, always insist on getting the best–Bill Baker's Soya Bean Bread." It is nutritious, healthful, and tasty." Panel 3 notes that two other products are Bill Baker's Soya Bean Pancake and Waffle Flour, and Bill Baker's Soya Bean Toasts.

On the back panel is one photo of about 14 Bill Baker products. These include: Soya Bean Cereal, Soya and Lima Bean Cookies, and Assorted Soya and Soya Oatmeal Cookies. "Ask for folder–'What are Soya and Lima Bean Breads,' by W.C. Baker." Address: 2522 Folsom St., Los Angeles, California. Phone: ANgelus 19045.

1139. Ojai Bakery. 1936? What are soya and lima bean breads? (Brochure). Ojai, California. 8 p. Each page: 22 x 10 cm. Undated.

• ***Summary:*** On the front panel is a photo of about 14 of Bill Baker's packaged products, stacked neatly atop one another. They include: Bill Baker's Pancake Waffle-Biscuit Mix (with Soya Bean and Wheat Flour). Bill Baker's Soy Bean Bread. Panels 2-6 are text by W.C. Baker about the subject of the brochure; they include: (1) Table showing chemical analysis of Bill Baker's Soya Bean Bread as now being produced. (2) Chemical analysis of his lima bean bread. (3) Table showing percentage of base-forming and acid-forming elements in the

© Copyright Soyinfo Center 2021

lima bean bread. (4) Photo (taken in 1934) of four delivery trucks parked in front of Bill Baker's Ojai Bakery in Ojai, California.

On pages 6-8 are sections titled: "Bill Baker's Lima Bean Wafers and Lima Bean Toast." "Bill Baker's Biscuit-Waffle-Hotcake Mixture" ("Latest additions to the famous family are two 'quick biscuit' mixtures made from both soya and lima bean flours." Just add water to make delicious biscuits, muffins, hotcakes, or waffles). Table showing the acid-ash foods. The alkaline-ash foods (both from a booklet by Dr. W.D. Sansum of Santa Barbara).

At the bottom of the back panel: "Other non-acid products include: Bill Baker's Lima Bean Bread. Bill Baker's Lima Bean Hotcake-Biscuit-Waffle Mixture. Bill Baker's Soya Bean Cookies. Bill Baker's Lima Bean Wafers. Bill Baker's Lima Bean Toast. Bill Baker's Soya Bean Toast. Bill Baker's Delicious Soya Bean Cereal." Address: Ojai, California.

1140. Ojai Bakery. 1936? Bill Baker's soya bean products (Ad). Ojai, California. 9 x 6 cm. Undated.
• ***Summary:*** This undated ad from an unknown source features a photo of a wrapped loaf of Bill Baker's Soya Bean Bread at the top. Below the ad's title are listed the following products: "Bill Baker's Soya Bread. Bill Baker's Lima Bread. Bill Baker's Gluten Bread. Bill Baker's Soya Hotcake, Biscuit-Waffle Mixture. Bill Baker's Soya Fruit Bars. Bill Baker's Soya Toast. Bill Baker's Delicious Soya Cereal.

"A profitable, healthful line that will build repeat business for your store. Soya Products, Ojai Bakery." Address: Ojai, California.

1141. Carque (Otto) Co. 1937. The symbol of trustworthy & unimpaired natural foods (Ad). *California Health News* (*Hollywood, California*). Jan. 8. p. 15.
• ***Summary:*** "Carque's raw sugar and honey confections are deliciously wholesome. Safe for the kiddies. At all health food stores." On the circular logo is written: "Carque Natural Foods of California." Address: 4328 San Fernando Rd., Glendale, California. Phone: OMaha 34066.

1142. Carque, Lillian. 1937. Nutritional research. *California Health News* (*Hollywood, California*). Jan. 8. p. 15.
• ***Summary:*** "Natural foods are much more economical than unnatural ones–an important factor for one with a restricted budget.

"Those denatured and irrationally prepared foods rob us of 30% to 50% of organic salts and vitamins and make it necessary to consume much more to appease hunger than would be necessary if natural foods, rationally prepared, were consumed.

"These figures show tremendous unnecessary waste 'in the usual preparation of our daily foods. Of the total

expended,

"41% goes for meat, poultry, fish.

"15% for cereals, most of which are denatured and demineralized

"7% for refined sugar, refined sugar candies and ice cream.

"21% for milk and dairy products.

"5% for salt, spices, condiments, vinegar, etc.

"Only 4% goes for fruit (fresh, dried and canned); 3/4% for nuts and only 7% for vegetables (fresh and canned), most of which are badly prepared, making a total of not quite 12% only for nature's best foods.

"On soft drinks alone (mostly artificially sweetened and colored) we spend $250 millions. On drugs and patent medicines the American public spends $500 millions to expel from the body waste poisons generated from inappropriate foods. On drugs sold illegally like cocaine and opiates, $250 millions are spent.

"An insufficient intake of those alkaline elements found in fruits and vegetables renders it impossible for the body to neutralize fatigue and waste poisons. This causes craving for some stimulant to whip our declining vital forces into action. No intelligent person can maintain that the enormous consumption of meat, alcohol, coffee, tea, tobacco and other stimulants and cathartics indicates a true physiological requirement. As man learns to enjoy exquisite and inimitable flavors of natural foods, desire for stimulants, condiments and artificially prepared dishes to tempt the palate will vanish, and with it will go the appalling waste in appropriating funds for perverted needs and cravings.

"Not only does a simple, natural diet correct the evils of

© Copyright Soyinfo Center 2021

overeating and disease, but experience has shown that a meal composed of a few simple, natural and nutritious articles costs less money, requires much less labor to prepare and appeals to the highest sense of taste and enjoyment. There is another vast saving that makes the actual food cost most insignificant: that made in good health, higher efficiency, more capacity for doing things, longer life and keener enjoyment in living. Herein lies true economy–for Health is Wealth." Address: [Los Angeles, California].

LUST'S HEALTH FOOD BAKERY, Inc.
309-311 East 56th Street **New York City**

dealers are invited to ask for wholesale quotations. Write for the full and complete list of BakerLust products and prices."

Note 2. It seems possible, even likely, that Louis Lust (who owned this bakery), purchased soya beans, then milled and baked them himself to create the above line of six different soy products.

Note 3. The large logo near the top of the ad shows the outline of a baker, from the chest up, wearing a baker's hat, and holding out his right hand, in which is a sort of light wand that has taken the shape of the word "BakerLust." Address: 309-311 East 56th St., New York City.

1151. *Nature's Path* (*New York City*). 1937. New and old–Health products and services: The House of Hain. Jan. p. 28.
• ***Summary:*** "California can rightfully boast of having more health food stores, health resorts, sanitariums, practitioners and manufacturers or health food products to the square inch than any place in this country. Outstanding among them is the 'House of Hain,' known officially as Hain Pure Food Company of Los Angeles." Their "practical dietitians" have developed a line of tasty, nutritious foods including: Hain Potassium Broth, a concentrate of 14 vegetables. Mal-Ba-Nuts, a concentrate of dextrinized nuts and maltose sugar. Col-Lax, to promote normal elimination [and combat constipation]. Lactose-Dextrine, a colon food.

Readers interested in starting or building a health food business can get much free, valuable information by writing directly to Hain.

1152. *California Health News* (*Hollywood, California*). 1937. Dr. Pietro Rotondi (D.C.) (Ad). 5(4):6. Feb. 19.
• ***Summary:*** This tiny ad states: Hours 2 to 4 and by appointment. Residence calls: GR. 4492. Located 1 block north of Sunset near Van Ness. "Free health lectures. Monday. 8:00 pm." A small portrait photo shows Rotondi, doctor of chiropractic. Address: 5815 Harold Way, Hollywood, Los Angeles, California.

1153. *California Health News* (*Hollywood, California*). 1937. Bill Baker on trip. 5(4):9. Feb. 19.
• ***Summary:*** "Ojai, California.–Bill Baker, the famous soy and lima bean baking expert, has just returned from San Diego, LaJolla, El Centro, Palm Springs, and Los Angeles. He reports business increasingly rapidly everywhere."

1154. *California Health News* (*Hollywood, California*). 1937. Leading U.S. health food stores. Where to buy *Health News.* 5(4):19. Feb. 19.
• ***Summary:*** The first half of this directory is organized alphabetically by cities and neighborhoods in Southern California–especially the greater Los Angeles area. There is one store in each area unless otherwise noted: Alhambra, Arcadia, Beverly Hills, Burbank, Compon, Glendale (2), Hollywood (6), Huntington Park (2), Inglewood, La Jolla, Long Beach (5), Los Angeles (14), Monrovia, Newhall, Ontario, Pasadena (2), Pomona, Riverside, San Bernardino, San Diego (2), San Pedro, Santa Barbara, Santa Cruz, Santa Monica (2), Van Nuys, West Los Angeles.

Then there are listings for Central California: Fresno, San Francisco (4), Oakland (2), and San Jose (2). The last 40% of the ad gives the same information for other states.

Note: This is the earliest document seen (July 2021) that contains a real directory of health food stores and individuals in the United States.

1155. *California Health News* (*Hollywood, California*). 1937. Bragg students tramp in rains. 5(4):3. Feb. 19.
• ***Summary:*** "Braving last Sunday morning's rain like real healthers, over 100 from Paul Bragg's current Los Angeles class of some 600, climbed Mt. Hollywood. Many were in shorts, others with bare skins above the belt. Half went

© Copyright Soyinfo Center 2021

barefoot following Bragg and Irvine, who often hike minus shoes.

"Songs and yells punctuated the mist of the famous hilltop and all trotted down again to hear brief talks by Bragg, Irvine, and Dr. B. [Bernard] Jensen. It was a thrilling hike, everyone said, especially the newcomers."

Note: This is the earliest English-language document seen (July 2021) that contains the word "healthers," which refers to those acting so as to promote their own good health and physical fitness.

1156. Irvine, Clarke. 1937. Skipper Irvine enjoys old Boston, then turns homeward. *California Health News* (*Hollywood, California*) 5(4):3, 10. Feb. 19.
• ***Summary:*** After leaving Dansville, New York, he went to Boston on his "9,000 mile jaunt." He was impressed by the abundance of fruit grown in California. "The biggest kick on the trip was seeing the vast industry of Nature's Health centers, headed by Henry Rosenberger, with a huge warehouse at 716 Columbus; one cafe, just opened, and 15 other shops, all busy. They employ 200, have complete production plant and wholesale business... Young Henry is a genius; his father [Andrew Rosenberger], a clever business man."

A full-body photo shows Irvine, in coat and tie, standing in front of a tree. Address: Hollywood, Los Angeles, California.

1157. **Product Name:** Soy Bean Bread, and Soya-Bean Wheat Flour.
Manufacturer's Name: Baker's (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1937 February.
New Product–Documentation: Ad in *California Health News.* 1937. 5(4):16. Feb. 19. "Soy Bean Bread, Soya-Bean Wheat Flour, Lima Bean Wafers, Lima Bean Toast, Lima-Bean Wheat Flour." A large photo shows all of Bill Baker's products.

1158. Carqué, Lillian. 1937. Fruit juices at their best. *Nature's Path* (*New York City*). Feb. p. 46, 74-75.
• ***Summary:*** By fruit juices the author means unfermented and unsweetened pure fruit juices. Many of the fruit juice beverages of commerce are diluted with water and sweetened with white cane sugar. "Fruit juices preserve and increase the alkaline reserve in the blood stream;..."

A large illustration shows a lovely, long-haired maiden in flowing robes, with her left breast bare, standing on a grassy slope by a cornucopia of fruits and vegetables, holding its uplifted base with her right hand and a cluster of grapes in her outstretched left hand.

Note: Lillian is the widow of health food pioneer Otto Carqué, who died in an accident when an automobile struck him in Jan. 1935 in Los Angeles. Address: [Los Angeles, California].

1159. **Product Name:** Soya Flour.
Manufacturer's Name: El Molino Mills.
Manufacturer's Address: 5604 Valley Blvd., Los Angeles, California.
Date of Introduction: 1937 February.

© Copyright Soyinfo Center 2021

New Product–Documentation: Ad in California Health News. 1937. 5(4):4. Feb. 19. "Soya flour: Goessel process." Soybean Blue Book. 1947. p. 70. Same address. Flour and grits. Continuous listings until 1980.

Midwest Natural Foods Distributors, Inc. 1972. Catalog and price list. Nov. 1. Ann Arbor, Michigan. 58 p. See p. 14. "Soya Flour." 1 lb.

June Ranill. 1976. The El Molino Cookbook. p. 75. This product was sold in 1976 but was apparently discontinued by 1980.

Frank Murray. 1984. More than One Slingshot. p. 45. Edward Allen Vandercook began the Mill in 1926. An early product was El Molino Stone-Ground Whole Wheat Flour. In 1970 the company was acquired by Archon, Inc.

Whole Foods. 1991. Sept. p. 19. "El Molino purchased by holding Company." "El Molino, founded in 1929, is described as the oldest food company in the natural foods industry." It was sold by American Health Plus Corp. of Pearl River, New York, to a new holding company, El Molino Ltd.

1160. *Nature's Path* (*New York City*). 1937. Directory of health aids (Ad). Feb. p. 80.
• ***Summary:*** A full page ad. (1) Soya products: Soya Bean Milk Powder (Plain or banana flavored). Soya Bean Soup Powder (Soy-Veg). From: Lust's Health Food Bakery, Inc., 309-211 E. 56th St., New York City.

(2) Buy soybean milk powder in bulk. At new reduced prices. "Vitasoy" 25 lbs. @ 20¢ per lb–$5.00 100 lbs. @ 18¢ per lb–$18.00. From: Soya Health Products. North Main St., Spring Valley, New York.

"Natural treatments. Let Nature make you well. She can if you allow her to! Dr. Jesse Mercer Gehman. P.O. Box 1725. Paterson, New Jersey."

1161. *Nature's Path to Health* (*Melbourne, Australia*). 1937. Directory of health aids. Jan/Feb. p. 25.
• ***Summary:*** This is a directory of F.G. Roberts' health stores, services, and clinics in Melbourne, Ballarat, Geelong, Adelaide, Cessnock, Bundaberg, Newcastle, Sydney, Toowoomba, Brisbane, Rockhampton, and Maryborough. A nurse, osteopath, or "consulting practitioner" is in attendance at many locations.

Roberts describes his own work and headquarters as follows: "Victoria. Home of the Nature Cure Movement. 430 St. Kilda Rd., Melbourne. Phone: Win. 4206. Treatments in harmony with Nature. Curative Dietetics, Osteopathy, Chiropractic, Hydrotherapy, Spinal Diagnosis, Iridiagnosis, Urinalysis, Diathermy, and Blood Washing, etc. All the latest methods of natural treatment obtainable. Experienced and qualified nurses in attendance. Herbal Foods, Herbal Pills, and All Natural Remedies Obtainable. F.G. Roberts, N.D., Principal, assisted by G.M. [Gladys Maud] Roberts and Staff."

Also in Melbourne are located (1) the Elmsdale Guest House at 428 St. Kilda Road. "Under the personal supervision of Mr. and Mrs. F.G. Roberts." Phone: Win. 4606; (2) F.G.R.'s Health Food Products, 40a Chapel St., E. St. Kilda. (Note: In Aug/Sept. 1933 Mr. W.H. Willson, a nature cure dentist, had his offices at 40 Chapel St.); and (3) Joyce's Health and Dining Service, 300 Little Collins St.

Harold S. Grimes, N.D., is in attendance at the Sydney location. The Brisbane shop and clinic is "Now under F. E. Roberts, Jr., N.D., Supervisor, who cordially invites you to Free Consultations on all your Health Problems."

Examples of names of other organizations listed are: "Roberts Health Service Pty. Ltd." (Ballarat, Victoria). "Health Centre and Clinic" (Chessnock). "Natural Health Store" (Bundaberg, Queensland), "Health Food Store and Milk Bar" (East Street).

A similar but revised directory is published in the 1 Aug. 1938 issue of this magazine, p. 46. Address: Australia.

1162. Richter's Health Cafeteria. 1937. KFAC–Sunday 2:15 p.m. (Ad). *Los Angeles Times.* March 28. p. 8.
• ***Summary:*** "Free lecture. Tuesday, 8 p.m." Note 1. This lecture apparently can be heard live at Richter's Cafeteria and on KFAC radio. Note 2. This is the earliest document seen (July 2021) showing that the Richters had an enterprise at 325 West 3rd St. Note 3. A similar ad appeared in the April 11 issue of this newspaper (1937, p. C10); the lecture was also on Sunday, but at 1:15 p.m. Address: 325 West 3rd St., Los Angeles, California.

1163. Los Angeles Times. 1937. Commercial guide: To business and professional services (Ad). *Los Angeles Times.* April 16. p. A18.
• ***Summary:*** "Today's 'cream' listings of business opportunities:" Includes: "Health Food Cafe, good paying Bus." [Business].

Note: This is the earliest English-language document seen (March 2007) that contains the term "Health Food Cafe" (or "Health-Food Cafe").

1164. Los Angeles Times. 1937. Classified ad: Health Food Cafe. *Los Angeles Times.* April 25. p. B3, col. 6.
• ***Summary:*** "Doing $60 [per] day downtown, low rent, clears $200 month. Will teach business, for details see Mr. Engesser, Monday. 808 S. Hope."

1165. Lager, Mildred. 1937. Something new–delicious. *House of Better Living* (*Newsletter, Los Angeles*) 4(17):4. April.
• ***Summary:*** "No chocolate is added to real soy chocolate. The dark color is from the browning of the bean. We have soy cocolette as well as the soy candies. We also have new banana soy milk powder."

© Copyright Soyinfo Center 2021

1166. Loma Linda Food Company, Inc. 1937. Seven items of a quality line (Ad). *Health* (*Mountain View, California*) 4(4):25. April.
• ***Summary:*** The ad describes and a photo shows each package of Soy Mince Sandwich Spread, canned Soy Beans, Garbanzos, Syl-Dex Breakfast Wheat, Fruit Cereal, Date Sandwich, and Fruit Wafers. The company, which now makes 19 products (sold at health-food stores, markets, and groceries) is listed as "Loma Linda Food Company, Inc., Loma Linda, California." Address: Loma Linda, California.

1167. **Product Name:** Kreme O'Soy Flour (Whole Soy Flour).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1937 April.
New Product–Documentation: *Madison Survey.* 1937. "The soy bean marches on." April 21. p. 59-60.

Madison Health Messenger. 1939. Sold in 2 lb. or 5 lb. bags.

1168. Bragg (Paul C.). 1937. Health Science Church Inc. Presents Paul C. Bragg (Ad). *New York Times.* May 15. p. 24.
• ***Summary:*** "At Pythian Temple Auditorium, 135 West 70th Street. May 16, 17, 18, 19, 20, 21, 23, 24 at 8 P.M. under the auspices Health Science Church. Admission free."

Note 1. What was this church? Who established it? When? A digital search of the *Washington Post* from 1877 to 1992 (and then of ALL ProQuest Historical Newspapers) retrieves only two document in which the term "Health Science Church" appears. The other was 6 Feb. 1939 in Washington, DC (which see). Both were connected with Paul Bragg lectures.

Note 2. This ad appeared on the "Religious services" page of this newspaper under "Other services." Perhaps such "public service" listings / announcements were free or less expensive than regular commercial advertisements.

1169. Carqué, Lillian R. 1937. Romance of the sea and kelp. *Nature's Path* (*New York City*). May. p. 164, 180.
• ***Summary:*** Pacific Ocean kelp, *Macrocystis pyrifera,* is a rich source of minerals. A portrait photo shows Lillian Carque. Address: [Los Angeles, California].

1170. Lust's Health Food Bakery, Inc. 1937. Enjoy the greater joy of life and abundant health on these famous soya health foods: BakerLust–Original soya bean products (Ad). *Naturopath and Herald of Health* (*New York City*) 42(5):157. May.
• ***Summary:*** This 1/3 page ad is identical to that which first appeared in the Jan. 1937 issue of *Nature's Path* (New York City)–except that the large logo near the top of the ad has a horizontal bold black rectangle (1½ by 3½ inches) as background. On it, in white, is the outline of a baker, from the chest up, wearing a bakers hat, and holding out his right hand, in which is a sort of light wand that has taken the shape of the word "BakerLust." Address: 309-311 East 56th St., New York City.

1171. *Los Angeles Times.* 1937. Harmonica band will launch series today. June 9. p. 12.
• ***Summary:*** "Mildred Lager, food authority, author and radio personality," heard Monday through Thursday over KFAC at 7:45 p.m. [sic, a.m.], will leave for Hawaii on the Lurline, June 26.

1172. *Desert Sun of Palm Springs* (*California*). 1937. "The hermit of Palm Canyon"–William Pester. June 13.
• ***Summary:*** This is a long except from an article about Pester from an article by J.H. Dyer of Hoopeston (or Hoopston), Illinois, published in *Hoopston Chronicle.* It is one of the best biographies seen of William Pester.

Pester was born in Saxony, Germany, in 1885. He advocated the return to a simple life, close to nature, and a simple diet.

1173. Carver, G.W. 1937. Re: Peanut milk. Letter to Mrs. L.C. Barnes, 459 Marlborough Road, Yonkers, New York, June 21. 1 p. Typed, without signature (carbon copy).
• ***Summary:*** "Dear Madam: Peanut milk is not on the market and is not being manufactured. I suggest that you get in touch with the Nashville Agricultural Normal Institute, Madison College, Madison, Tennessee. They manufacture many kinds of health foods from soybeans including soybean milk, which is similar in many respects to peanut milk. They make an excellent product."

John Ferrell, who located this document, adds (Dec. 1992). "Carver seemed to like Madison College. I've noted maybe six letters much like this one to people who enquired about soybeans." Address: Director, Research and Experiment Station [Tuskegee, Alabama].

1174. **Product Name:** Bill Baker's Soy Cereal (Dextrinized, Ready to Eat). By March 1938 renamed Bill Baker's 100% Soya Cereal.
Manufacturer's Name: Baker's (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1937 June.
New Product–Documentation: Ad in *California Health News.* 1937. June 4. p. 23. "Bill Baker's new delicious Soy Cereal. Dextrinized. Ready to eat." "The wonderful new breakfast cereal dish prepared from 100% soya beans. Combines well with all foods. Energizing. Alkaline. A new companion for Bill Baker's famous Lima and Soy Bean Breads, Toast, Pancake and Waffle Mixture, etc. Shipped to any part of the U.S. At all health food stores and markets in the West." Logo: "Bill Baker's Lima Bean Products" inside

© Copyright Soyinfo Center 2021

the shape of a lima bean. "For Los Angeles orders phone AN. 18425. San Francisco distributor: Ruth's Health Food Store, 333 Sutter. Northwest distributor: Clara M. Brewster's Health House, 1621 Third Ave., Seattle [Washington]. Portland [Oregon] distributor: Brammert's Radiant Health Food Store, 811 S.W. 6th Ave. San Diego distributor: Northpark Health Foods, 3915 30th St."

House of Better Living Catalog. 1938. March. p. 16. 12 oz. pkg. for $0.28.

1175. *Nature's Path to Health* (*Melbourne, Australia*). 1937. F.G. Roberts Health Food Products. May/June. p. 20-22.
• ***Summary:*** On page 20, a full-page black-and-white photo shows the front of Roberts Health Service, a health food store at Geelong. There are many boxed and canned products in the two large front windows. On page 21 is a photo of the interior of the Geelong store. Paul Smith has photos of similar stores at Ballarat, Fremantle, and Toowoomba.

On page 22 a full-page photo shows a "View of our main factory and store." This is a fairly small but neat red brick factory, with delivery trucks parked at the side and front.

Note 1. This, factory was located at 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia. Roberts' original factory, it remained virtually unchanged until 1954.

The inside back cover of this issue states: "F.G. Roberts, N.D., F.S.D., Australia's leading naturopath. 430 St. Kilda Rd., Melbourne."

Note 2. Other issues of this magazine published in 1937 show health food stores that are part of the Roberts Health Service: Rockhampton (Jan/Feb. p. 19), Maryborough (March/April, p. 19), Newcastle "Health Academy" (March/April, p. 20). Address: Australia.

1176. List or manifest of in-bound passengers (citizens) for immigration officials at port of arrival. 1937.
• ***Summary:*** Name of passenger: Mildred Lager. Arrival date [in Los Angeles]: 17 July 1937. Age: 36. Birth date: abt 1901. Gender: Female. Ship name: Malolo. Port of Arrival: Los Angeles, California. Port of Departure: Honolulu, Hawaii.

Note: The Aug. 1937 issue of her *House of Better Living* (Newsletter, Los Angeles; p. 1) states that she just returned from a wonderful 10-day trip to the Hawaiian islands. "I studied the tropical foods first hand, saw them grown, learned what the University of Hawaii had to say about them, saw them picked, canned and gotten ready for shipment."

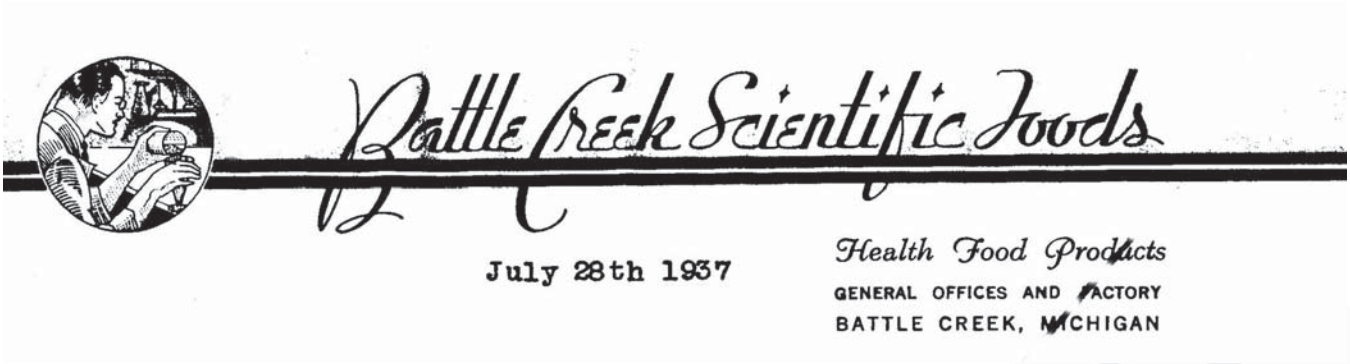
1177. *California Health News* (*Hollywood, California*). 1937. Carque sold. July 23. p. 9.
• ***Summary:*** "The Otto Carque Co., 4328 San Fernando Rd., Glendale, Calif., for some time poised near bankruptcy has been sold to the Confection Co., of California, operated by Drs. W.H. and D.H. Garrison (M.D.) and Wm. Ade who have been handling the major part of the products for some time. It will be known as the Carque Natural Foods division, to be supervised by the Lantz Corp., which has been in charge for some time. Mrs. Lillian Carque will act as publicity director. A new staff is already at work including Ed Eisenhart, manufacturer, Betty Burke, secretary, and Mary Chapman, bookkeeper. Gertrude Van Noord has taken an extended vacation. New telephone number is Omaha 35050."

1178. *California Health News* (*Hollywood, California*). 1937. Hain's first tour. July 23. p. 9.
• ***Summary:*** "New York, Philadelphia, Washington [DC], and Cleveland [Ohio] are giving warm welcomes to Harold Hain, touring the east. Many stores have sold his products for years and are now meeting him for the first time.

"'People everywhere are becoming more food conscious, eager for authentic diet knowledge,' he reports. A visit to Washington [state] and Oregon is planned before the return to the laboratory and warehouse in Los Angeles."

Note 1. This is the earliest publication seen (May 2019) that mentions Harold Hain.

Note 2. This is the earliest document seen (May 2006) showing that Hain is now selling this health food products nationwide.



1179. *California Health News* (*Hollywood, California*). 1937. See blue Hawaii. "Had a marvelous time." July 23. p. 9.
• ***Summary:*** "Singing the praises of Hawaii, Mildred Lager has just returned to her House of Better Living, 1207 W. Sixth, after a three-weeks trip."

"Her radio fame having preceded her, Miss Lager was invited to speak over KGU, NBC station where Skipper Irvine presented "Roaming in the South Seas" for two years... A delightful luncheon visit was with Mrs. Agnes B. Bonell, Battle Creek Health Food store, 183 S. King street, Honolulu... The trip to Hawaii was on the Lurline, return on the Malolo." A large portrait photo shows Mildred Lager.

1180. Sadacca, Albert V. 1937. Re: Health addicts in California. Offer to distribute Fearn products in middle west. Letter to Dr. Charles E. Fearn, Fearn Soya Foods Co., 355 West Ontario St., Chicago, Illinois, July 28. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "Dear Dr. Fearn: With much interest I digested your letter of July 27th. I do believe that it is a good move for you to go to California inasmuch as most of the health addicts are located there." The writer then offers to distribute Fearn products in Chicago and the "middle west," "either under our brand name or under our own."

Note: Battle Creek Scientific Foods is not connected in any way with Dr. John Harvey Kellogg or any other member of the Kellogg family. Across the bottom of the letterhead

© Copyright Soyinfo Center 2021

are printed six products made or distributed by the company, including one named "Soy-O." Address: Battle Creek Scientific Foods, Health Food Products, General Offices and Factory, Battle Creek, Michigan.

1181. Carqué, Lillian R. 1937. Sensible feeding of children. *Nature's Path* (*New York City*). July. p. 244, 264-65.
• ***Summary:*** "Pure roasted and unsalted Almond Butter, diluted with warm water to the consistency of milk," to which a little honey has been added, may occasionally take the place of animal milk. "Almond milk should be made fresh every day."

"In China and Japan, soy bean milk is frequently used in feeding infants and children in place of animal milk."

Note: This last sentence may possibly be true about China but it is not true of Japan. Address: [Los Angeles, California].

1182. Lager, Mildred. 1937. Recipes. *House of Better Living* (*Newsletter, Los Angeles*) 4(19):1. June/July.
• ***Summary:*** Includes a recipe for: Soy ginger muffins or bread (eggless, with soy flour and whole wheat pastry flour).

Note: In the Aug. 1937 issue (p. 1) is a recipe for "Soy bean salad."

1183. *Los Angeles Times.* 1937. Dietetic expert. Aug. 3. p. A12.
• ***Summary:*** "Adelle Davis, dietetic authority, will be heard on a new KFWB series starting today at 10 a.m." A large photo shows Adelle Davis. Note: She is strongly sanpaku, i.e., the whites of her eyes can be seen between the iris (the colored part of the eye surrounding the pupil) and lower lid as she gazes directly forward.

1184. *California Health News* (*Hollywood, California*). 1937. America's No. 1 Baker (Photo caption). Aug. 6. p. 2.
• ***Summary:*** This photo shows Bill Baker in a two-piece suit standing next to the front of an automobile and holding a copy of "Health News." The lower caption states: "Here's the man who bakes those wonderful soy and lima bean breads and whose new soy breakfast cereal is helping the healthwise to make a perfect start of every day: genial Bill Baker of Ojai on a visit to Hollywood in his new Graham" [an automobile made by Graham-Paige Motors Corp.].

1185. Hain Pure Food Co. 1937. Hain fruit juices: Pure–Natural (Ad). *California Health News* (*Hollywood, California*). Aug. 6. p. 3.
• ***Summary:*** "You may select from a great variety. In fact, 12 different kinds of delicious drinks that cool and quench. At the same time they fill the system with life-giving elements and principles.

"At our own store, 329 W. Third, Los Angeles, and other health food store and markets." Address: 602 Mateo St., Los Angeles, California.

1186. Kellogg, John Harvey. 1937. Re: The soybean is an excellent food. Soy products made by Battle Creek Food Company. Letter to Mr. Richard Haughton, Valley Mill Farm, Great Valley Mills, Paoli, Pennsylvania, Aug. 26. 3 p. Typed, with signature on letterhead.
• ***Summary:*** Mr. Haughton wrote Dr. Kellogg on Aug. 26 that "One of your patients at Battle Creek has advised me that we should look into Soy Bean as a food." It is said to be helpful for intestinal disorders.

Dr. Kellogg replies: "You have been correctly informed. The soybean is an exceedingly useful food and ought to be widely used. It is on the whole, I believe, the most remarkable and most useful of all food products...

"If you will address a letter to W.J. Morse, Bureau of Plant Introduction [sic, Plant Industry], U.S. Department of Agriculture, Washington D.C., you will obtain a large amount of literature about the soy bean which you will find very interesting.

"The Battle Creek Food Company makes a number of products from the soy bean, among which are soy gluten biscuit, which consists of equal parts of soy flour and wheat gluten. It is extremely toothsome and the most highly nourishing of all foodstuffs with which I am acquainted." Address: Florida.

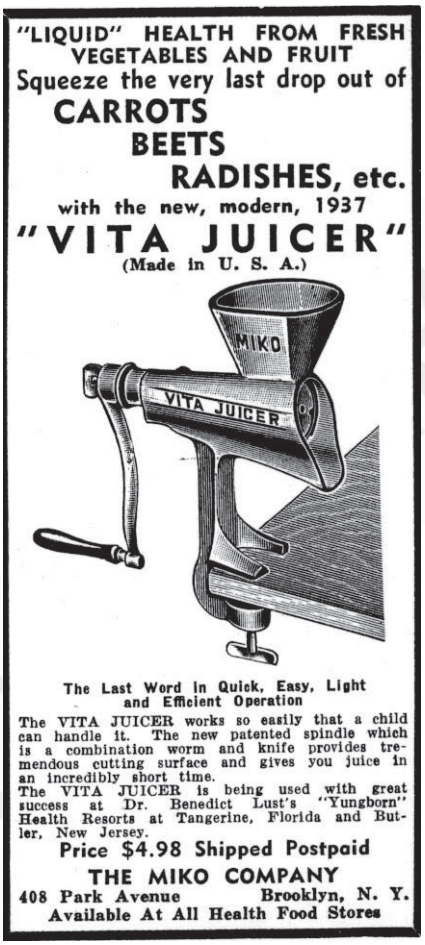
1187. Lager, Mildred. 1937. New radio program, KECA, 7:45 a.m. (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 4(20):1. Aug.

© Copyright Soyinfo Center 2021

• ***Summary:*** "Starting July 19 Miss Lager began broadcasting over station KECA at her regular time, 7:45 A.M. She will talk every Monday, Tuesday and Wednesday mornings. Tune in for these educational talks. KECA–1450 kilocycles..."

1188. *Los Angeles Times.* 1937. Smoking protested. Sept. 4. p. A8.
• ***Summary:*** Yesterday Clarke Irvine told the City Council that he has heard many protests concerning smoking in the new streamlined street cars; it is annoying non-smokers. The council referred Irvine's complaint to the Public Utilities Committee.

1189. Donnelly, Antoinette. 1937. 'Beauty Day' good plan for loveliness. *Chicago Daily Tribune.* Sept. 18. p. 15.
• ***Summary:*** This is a positive book review of *Eat and Grow Beautiful,* by Benjamin Hauser (publ. by Tempo). A key idea is to establish a "Beauty Day" for yourself once a week (on any day), to give your body some much-needed rest, at which time you also give the body a periodic inner cleaning.



"On your beauty day you confine your food to your favorite fruit juices and vegetable juices and your favorite fresh, crisp salads." If possible, become a lady of leisure and have someone serve you.

1190. *Health News* (*Hollywood, California*). 1937--. Serial/periodical. Clarke Irvine, Editor and Publisher. 4647 Russell Ave., Hollywood, California. Vol. 1, No. 1, Jan. 1933 (4 p.). Biweekly.
• ***Summary:*** Preceded by California Health News (Jan. 1933+). Starting with the issue of 17 Sept. 1937, the title was shortened to *Health News.* On 15 May 1942, it became *Let's Live.* Most issues (except all those for 1938) are still owned by *Let's Live* (Franklin Publications) in Los Angeles, California. Note: According to OCLC, not one library in the USA owns a single issue of this pioneering periodical. Address: Hollywood, Los Angeles, California.

1191. Lager, Mildred. 1937. New items [products] (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 6(21):3. Sept.
• ***Summary:*** "New candies, many of them soy. Chocolate coated raisins.

"Soy malted milk in almond, banana, chocolate, and mocha flavors. Two sizes–40¢ and 70¢."

1192. Miko Company (The). 1937. "Vita Juicer" (Ad). *Nature's Path* (*New York City*). Sept. p. 347.
• ***Summary:*** "'Liquid' health from fresh vegetables and fruit. Squeeze the very last drop out of Carrots, Beets, Radishes, etc. with the new, modern, 1937 "Vita Juicer" (Made in U.S.A.). The last word in quick, easy, light and efficient operation... The Vita Juicer is being used with great success at Dr. Benedict Lust's 'Yungborn' Health Resorts at Tangerine, Florida, and Butler, New Jersey. Price $4.98 shipped postpaid. Available at all health food stores." Address: 408 Park Ave., Brooklyn, New York.

1193. *Naturopath and Herald of Health* (*New York City*). 1937. We observe and comment: Health 'expert' jailed here; lacked license. 42(9):280. Sept.
• ***Summary:*** "Duluth News Tribune, July 15, 1937. Martin Pretorius, self-styled authority on corrective eating and body culture, who had been lecturing at the Hotel Duluth, was arrested last night by Duluth police on the charge of unlawfully practicing healing."

"In a pamphlet issued following free lectures, Pretorius promises to remedy numerous ailments by means of selftreatment courses for which fees are charged." Although he has no certificate in the basic sciences, he offered to cure ailments–which is illegal.

Note 1. There is a fine but apparently clear line between health education and teaching people how to heal themselves for a fee.

Note 2. Shortly after this arrest, Pretorius began to sell electric blenders in Los Angeles, California–a field that he pioneered.

© Copyright Soyinfo Center 2021

1194. Therapy, Ltd. 1937. We carry these four fine products (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 6(21):3. Sept.
• ***Summary:*** "Theradophilus: A condensed pure culture of Bacillus Acidophilus in Soy Bean Milk. For intestinal poisoning.

"Theradiet: A food supplement permitting safe reducing.

"Therabroth: A delicious uncooked vegetable concentrate–for broths, sandwich spread or as seasoning for soups and gravies.

"Therallium: A concentrated garlic and parsley tablet. Tasteless and odorless.

Note: Apparently only the first of these four contains soy. Address: Pasadena, California.

1195. *Los Angeles Times.* 1937. The dial. Oct. 12. p. 12.
• ***Summary:*** From 9 to 10 a.m. on KWFB radio station in Los Angeles, one can hear: "Dr. Reynolds, 9:15. Adelle Davis, 9:30. News, 9:45." Note: Adelle's show ran for 15 minutes. The listing for Nov. 9 (p. 10) says it was aired from 12:15 to 12:45. The listing for Nov. 23 (p. 14) says it was aired from 4 to 4:15 p.m. That is the last listing we can find in the L.A. Times; so apparently her program didn't last for long.

1196. Hain Pure Food Company. 1937. Hain health foods are attractive and appetizing as well as wholesome (Ad). *Nature's Path* (*New York City*). Oct. p. 377.
• ***Summary:*** "A complete line comprising 125 different items, all the utmost perfection in quality foods.

"Cal. [California] vegetable broths, seasonings and gelatines: Prepared from vegetables especially raised in the rich soil of California's Sunshine Valleys–Full of health-giving vitamins.

"Pure fruit juices: From choicest California fruits. Lightly pressed. No added sugar, preservatives or coloring. 12 kinds of fruit and berry flavors.

"Delicious meat substitutes: Protone, Nutone, Soytone or Soy Sandwich Spread. Prepared from nuts, protein of wheat and soy beans. Free from acid forming proteins.

"California pure honey: Unusual flavors–Orange blossom and mountain sage.

"Sea salts and hundreds of other good things to eat. Send today for new catalog, or ask your store for literature. The Hain logo reads "Hain 100% Pure" inside two circles and a fluted outer circle. This ad also appears in the November (p. 421) issue of this magazine.

Note: Protone, Soytone, and Nutone are made by Hollywood Foods, according to a June 1940 Rosenberg's catalog. Address: 602 Mateo St., Los Angeles, California.

1197. Lager, Mildred. 1937. Facts on soy beans. *House of Better Living* (*Newsletter, Los Angeles*) 6(22):2. Oct.

• ***Summary:*** "No food known to science has the protein value of soya bean. According to Dr. A.A. Horvath, of the University of Delaware, a recognized soy bean authority in this country, soy beans have the following qualities:

"1. The soy bean protein is similar in composition and nutritive value to the proteins of milk, meat and eggs, and is readily assimilated.

"2. The soy bean oil is assimilated to the extent of 95% to 100%.

"3. The soy bean is rich in phosphatides (lecithin and cephalin), averaging from 1.65% to 3.18%.

"4. The soy bean is rich in vitamins A, B, and E, and contains also a substantial amount of vitamins D and B-2.

"5. The soy bean ash is rich in phosphates and is strongly alkaline."

1198. **Product Name:** Soy-Burger. Renamed Soyburger or Soyburger Loaf in 1939 (Canned Meatless Loaf, Sandwich Spread, or Entree). Renamed Zoyburger in 1939.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1937 October.
Ingredients: Soybeans [actually okara], wheat gluten, raw

© Copyright Soyinfo Center 2021

peanut meal, tomato paste, vegetable seasonings.
Wt/Vol., Packaging, Price: No. 2 can, 20 oz.
How Stored: Shelf stable.
Nutrition: Protein 12.5%, fat 6.7%, carbohydrates 19.0%, ash 1.4%, calories 187/100 gm.
New Product–Documentation: *Chicago J. of Commerce.* 1937. "Ice cream, milk from soy beans: Tennessee scientists start new industry." Oct. 13. p. 9, col. 8. Having developed good milk, the group next "sought to compete with cattle as food producers in the form of beef. A product called soy-burger has been produced. It tastes like hamburger."

Madison Health Messenger. 1939. "Soyburger." Ad in House of Better Living. 1940. May. p. 4. "Soyburger."

Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1941. July. p. 273. "A treat without meat." Soyburger is one of five basic food products made and sold by Madison Foods.

Taylor. 1944. *Soy Cook Book.* p. 201.

Madison Health Messenger. V. 49-2. p. 5.

Madison Health Messenger. 1949. V. 49-3. p. 5. Zoyburger–excellent for sandwich spread, serve like steak with onions. Ingredients: soybeans, gluten, raw peanut meal, vegetable seasonings. 14 & 20 oz. cans."

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual.* 1st ed. p. 95. Zoyburger contains 20.90% protein, 3.10% fat, and 11.85% carbohydrate.

Letter from Sam Yoshimura. 1981. March 19. Okara was used in the Madison Zoyburger exclusively. The product consisted of wheat gluten, okara, tomato paste and seasonings. It was a canned, meat loaf type of product.

Note: This is the earliest known commercial vegetarian "burger" (with the word "Burger" or "Burgers" in the product name) made in the Western world.

1199. Siegmeister, Walter. 1937. Developing a business on the soybean. *Bean-Bag* (*The*) (*Lansing, Michigan*) 20(5):9, 15, 19. Oct.
• ***Summary:*** "About two years ago I first became interested in the soybean and began to study the various foods that could be made from this bean. I then commenced to send out to some friends some 'Soybean Powder,' processed from steamed soybeans, and having a delicious milky taste when eaten raw. So great was the demand for this, that we got our own containers and labels and started to pack it, and in a short time orders came from all over the country for our products both from stores and individuals.

"Since then we added a number of other products to our line, including a soup powder, a soybean-banana powder that makes a tasty drink, a soy butter, a soy coffee; a soy cereal; etc. The name of our firm is Soya Health Products, which is a mail order company situated at Spring Valley, New York. We also publish a magazine devoted to the soybean called 'Regeneration,' and we will gladly send a sample copy to anyone who writes us."

On page 15 (lower right) we read: "And from the Soya Health Products, Spring Valley, New York, we received samples of a lot of soybean products that really are superb. There is a soy bean milk, a soy breakfast food, roasted soybeans, and soy flour. Write this firm and see for yourself."

Then on page 19 (lower right) is the expected small advertisement: "Soybean milk powder. A protein substitute for meat, eggs and dairy products. 40¢ per lb.–$1.00 for 3 lbs. Free sample on request. Write for free sample copy of 'Regeneration.' The soybean magazine contains valuable information on the soybean and diet. $1 per year. Ask for price list on New Soybean Health Foods. Soya Health Products, Spring Valley, New York." Address: Dr., Soya Health Products, Spring Valley, New York.

1200. *Los Angeles Times.* 1937. Ojai baker to send president usual 100-pound Christmas cake. Nov. 9. p. A15.
• ***Summary:*** "Ventura, Nov. 8.–Bill Baker, Ojai's nationally famous craft baker, today announced he will send President Roosevelt a Christmas cake weighing 100 pounds and surmounted by a miniature replica of the Golden Gate Bridge"–the new bridge that everyone in California is talking about.

After the cake is displayed in Tulare and Oakland, California, a special messenger will accompany it to Washington, DC, where "Representative Alfred J. Elliott of Tulare will deliver it to the President."

1201. *Madison Survey* (*Madison, Tennessee*). 1937. Manufacture of foods. 19(42):167. Nov. 10.
• ***Summary:*** "Madison is giving a message of healthful living to the public, and in this program the food factory plays an important part. Among the products it is placing on the market are crackers of various composition; foods to use in place of meat, such as, Vigorost, Soy Cheese, Soybeans canned with Tomato; a beverage to take the place of coffee called Soy-Koff. Kreme O'Soy Milk, plain and chocolate, is also on the market in cans."

1202. Lager, Mildred. 1937. Start your day with Miss Lager's cheery philosophy: KFAC–8:45 A.M. *House of Better Living* (*Newsletter, Los Angeles*) 6(23):1. Nov.
• ***Summary:*** Mildred's morning radio program has returned to station KFAC but at a better time–8:45 A.M. instead of 7:45. Up until last month her program was on KECA at 7:45 A.M.

1203. **Product Name:** Kreme O'Soy Milk (called Kreme-O-Soy in 1947) [Plain, or Chocolate].
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1937 November.
Ingredients: Fall, 1948: Soybeans, soy oil, dextrose, calcium phosphate, sodium chloride.

© Copyright Soyinfo Center 2021

Wt/Vol., Packaging, Price: 15 oz, 19 oz, or 20 oz can.
How Stored: Shelf stable.
Nutrition: Protein 3.5%, fat 3.9%, carbohydrates 4.9%, ash 0.7%, calcium 0.34%, iron 4.4 mg/k.
New Product–Documentation: Madison Survey. 1937. Nov. 10. p. 167. "Kreme O'Soy Milk, plain and chocolate, is also on the market in cans."

Madison Health Messenger. 1938. "The only homogenized soymilk on the market to date."

Madison Health Messenger. 1948. Fall. p. 3. "A unique food developed." A black-and-white photo shows a can of Kreme O'Soy." A table compares the composition of Kreme O'Soy, human milk, and cow's milk. A list of ingredients is given on p. 4. Madison Health Messenger. 1949? V. 49-2. p. 5.

Shurtleff & Aoyagi. 1984. Soymilk Industry and Market. p. 25-26. "By May 1929 fresh soymilk and tofu were being served occasionally in the dining hall and sanitarium, and soymilk was used in place of water in some yeasted breads. Soymilk was first sold commercially in 1931 and canned in 1932. It became popular nationwide." Soybean Blue Book. 1947. p. 69. Sold in Chicago by Dietetic Supply House. Soybean Blue Book. 1950. p. 88. No brand name given. Soybean Blue Book. 1956. p. 100. "Kreme-O-Soy."

Note: This is earliest commercial soymilk product seen worldwide to be fortified with calcium. It is also the second earliest commercial soy product seen introduced by a Seventh-day Adventist company that contained chocolate.

1204. Food Chemistry Educational Institute. 1937. Pretorius says, "Its so new! So different! You won't believe your eyes." The Liquefier makes juice extracting obsolete (Ad). *Health News* (*Hollywood, California*) 5(23):5. Dec. 10.
• ***Summary:*** "Gone are the days of tedious juice extracting by hand. This extraordinary electric machine so completely liquefies vegetables and fruits that no pulp is left, making straining or squeezing unnecessary. All one has to do is to cut the fruits and vegetables into sections, put them into the liquefying jar, add a little water or fruit juice, turn on the machine and in a few minutes everything in the jar will be a liquid, ready to serve. For example, one may put a handful of almonds, one banana, a teaspoonful of honey and a little water into the liquefying jar–switch on the machine and in a few minutes you have a very nourishing thick banana-almond drink, or fill the jar with spinach leaves, add a little pineapple juice, run the machine for a minute or two and the most delicious spinach drink you have ever tasted will be the result.

"Now you not only get the juice as you do with a juice extractor, but you get everything (pulp as well as the juice) that nature originally organized into the fruit or vegetable for you."

Price: $20.75. Extra jars: $2.75 each.

"This new Liquefier is not to be confused with a Juice Extractor which merely extracts the juice and leaves much of the vitamins and minerals in the pulp, which is discarded." A large illustration shows the Liquefier, which looks very much like a modern blender.

Note 1. This is the earliest document seen (July 2021) concerning an electric blender–although the word "blender" is not used. In a careful search (July 2004) of *Health News*, looking backward from this issue, Chef Akasha Richmond is unable to find any earlier reference to an electric blender or liquefier under any name.

Note 2. A comparison of this illustration with two illustrations of the "Waring Mixer" from the year 1938, and with a photo published in *Better Homes and Gardens* (Feb. 1941, p. 41), shows clearly that this machine was made by Waring. So Pretorius apparently bought his machines from Fred Waring, renamed them, and sold them. This is the earliest image seen of a machine made by Waring.

Note 3. This is the earliest document seen (July 2021) that mentions the "Liquefier," an early brand of electric blender.

Note 4. This is the earliest English-language document seen (July 2021) that uses the verb "to liquefy" ("liquefies vegetables"), or the verb "to run" ("run the machine for a minute or two") in connection with an electric blender.

Note 5. Martin Pretorius is a health food authority in Los Angeles. Address: Box 1857, Hollywood [California].

1205. Hain's Pure Food Store. 1937. Xmas. shopping for the most appetizing and healthful foods will surely take you to Hain's (Ad). *Health News* (*Hollywood, California*) 5(23):5. Dec. 10.
• ***Summary:*** "An infinite variety of nuts, nut butters, fruit juices, dried fruits, home made fruit cakes, candies, and all other good things for the Christmas table or tree–and all 100% pure. Be sure to see our Special Packs and Gift Boxes of assorted good things to eat, trays, boxes and baskets. They make wonderfully original gifts, to be long remembered." Inside a circular logo is written "Hain 100% Pure." Address: 329 W. 3rd St. [Los Angeles, California].

1206. *Los Angeles Times.* 1937. Feminine favorites on dial (Photo caption). Dec. 13. p. 12.
• ***Summary:*** This portrait photo shows a youthful-looking Mildred Lager. The lower caption states that she invites you to "tune her House of Better Living today (KFAC–8:45 a.m.)."

1207. Nedvidek, T. Louise. 1937. The forty-first congress of the American Naturopathic Association. *Naturopath and Herald of Health* (*New York City*) 42(12):360-61. Dec.
• ***Summary:*** Continued from the November Naturopath: "Another outstanding feature of the musical session was the beautiful singing of Howard Berhalter, son of Dr. A.A. Berhalter. A Naturopathic Convention would not be

© Copyright Soyinfo Center 2021

complete without having Howard Behalter with us. Since he was a little boy it has been an outstanding fact that Howard Berhalter has honored us with his presence at all Conventions or Naturopathic gatherings that have taken place in Chicago, and it is a very interesting fact to notice the great progress he is making... we know he is headed for a great operatic career." Howard was recently married and introduced his charming wife. Address: Dr., Convention Manager.

1208. **Product Name:** Soy-Bev (Tea or Coffee Substitute).
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 48 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1937 December.
Ingredients: Incl. roasted and ground soybeans, chicory.
Wt/Vol., Packaging, Price: Canned.
New Product–Documentation: Ads in *Nature's Path to Health* (*Melbourne, Australia*). 1937. Nov/Dec. p. 15 and 27. "A Delicious Beverage to take the place of Tea or Coffee. Made from the best Soya Beans. An F.G.R's Health Food Product." The address is given as 48 Chapel St., St. Kilda, Melbourne. But it is not clear what kind of facility was located at this address.

Ad in *Nature's Path to Health.* 1937. Christmas issue. p. 34. "Soy-Bev. The national nightcap. A Delicious Beverage to take the place of Tea or Coffee. Invigorating. Health giving. Blood purifying. Fortifies the system. A sure thing against insomnia. Made by F.G. Roberts & Sons. In the Health Food Factory. 48 Chapel St., St. Kilda, Melbourne. At all Health Centres. The new health beverage that everybody is drinking." See also smaller ad on p. 19.

Ad in *Nature's Path to Health.* 1938. Aug. 1. p. 40. "Soy-Bev. The ideal night-cap. Why upset your system by taking tea or coffee?" Made at 48 Chapel St., St. Kilda, Melbourne. An illustration shows a man and woman seated in chairs by their fireplace each enjoying a cup of Soy-Bev. Below this is a steaming cup of Soy-Bev–which looks like coffee.

Ad in *Nature's Path to Health.* 1946. Aug/Sept. p. 23. "Your best moment. When the drink is Soy-Bev or Soya-Choc. These are the nicest drinks. Freshly made from the choicest soya beans in our modern factory, St. Kilda, Melbourne. In Hygienic ½ lb. and 1 lb. Tins at all Health Centres Throughout Australia." This ad also appeared in the April/May 1949 issue (p. 8) of this magazine.

Note from Paul Smith of Soy Products of Australia (Pte.) Ltd. 1995. March 14. Paul thinks Soy-Bev was first introduced in about 1936-36. It was made with roasted soybeans and chicory, The product was discontinued in 1973.

1209. **Product Name:** Soy Flakes.
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1937 December.
Ingredients: Soybeans.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1937. Nov/Dec. p. 15. "Cooking eliminated! Now we have–Soy Flakes. The greatest things ever placed before health reformers. Gives to busy housewives the best food product ready to use. Soy bean has been welcomed by all vegetarians. Worry of preparation, waste of gas, labour in preparing. Soy-flakes large flakes of specially-prepared soy beans." Another ad is found in the Christmas 1937 issue, p. 12.

Note: This is the 2nd earliest English-language product or document seen (June 2013) that contains the term "Soy Flakes."

1210. Barnard, W.G.; Barnard, W.G., Jr. 1937. Health via the carrot: How you feel tomorrow depends on what you eat today. Cleveland, Ohio: Natural Foods Institute. 40 p. *
• ***Summary:*** Note: Soyfoods Center has never been able to see a copy of this early edition, although the National Library of Medicine owns one copy. Fortunately, in 1970, Provoker Press (St. Catharines, Ontario, Canada) published a reprint edition with a several words missing from the title ("Health Via the Carrot and Other Vegetables," xiv + 144 p.), of which Soyfoods Center has a copy; please refer to it for details. Notice, however, that the 1970 edition has more than 3.5 times as many pages as the original 1937 edition.

This book mentions some interesting early terms: "A new machine called a liquefier propelled by electricity liquefies vegetables in from one to three minutes and marvelous Health-Cocktails can thus be prepared at least once each day for the entire family." Note: This liquefier (blender) would soon become known as the Vita-Mix or Vitamix, which Barnard's company would market. During the 1960s it was redesigned to be much more powerful than typical household blenders. Address: Cleveland, Ohio.

1211. Walker, Norman Wardhaugh; Pope, R.D. 1937. Raw vegetable juices: What's missing in your body? Rev. ed. Long Beach, California: Norwalk Laboratory. 68 p. *
• ***Summary:*** "Compiled under the direction of R.D. Pope." Note: Norwalk makes the Norwalk juicer. The author says that the most aggravated case of constipation can be overcome in a few days or a week by drinking raw spinach cocktails every day. Note: Norman Wardhaugh Walker was born in 1876. Address: M.D.

1212. *Diet Digest* (*Beverly Hills, California*). 1937-. Serial/periodical. Gayelord Hauser, Editor. Published at 9889 Santa Monica Blvd., Beverly Hills, California. Quarterly. No. 1.

© Copyright Soyinfo Center 2021

1937.
• ***Summary:*** Issue No. 1 appeared in 1937, probably late in the year. No. 9 of this quarterly was on sale in the spring of 1940, edited by "Bengamin Gayelord Hauser" (See ad in *Diet Digest*, p. 8). Starting with issue No. 27 (1947) the magazine began to be published in New York by Diet Digest Publication, Inc., 100 Stevens Ave., Mount Vernon, NY. Starting with issue No. 36 (1950) it began to be published at 15 West 44th St., New York, NY. Starting with issue No. 43 (1953) it began to be published at 7 West 44th St., New York, NY. Gayelord Hauser was still editor-in-chief.

Soyfoods Center has parts of No. 17 (dated 1943) to No. 19 (1944) and No. 26 (1946) to No. 44 (1953). Address: Beverly Hills, California.

1213. Postcards of William Pester of Palm Canyon (near Palm Springs, California). 1937? Palm Springs, California. Undated. 17 x 10 cm.
• ***Summary:*** There are two postcards: One the front of the first (#86-03-56) is a photo of William Pester seated on a stool, with long hair, a sleeveless shirt, and sandals, playing a slide guitar. On the front of the second are four photos of Pester.

The following in printed on the back of both in Spanish: The laws of nature are the laws of God. If you live in disaccord with them, you will have nothing but problems; and if you live in harmony with them, you will always have health.

Eat fresh fruits and vegetables, drink pure water, bathe in the sun and running water, and your health will always remain perfect. Meat, lard / fat, starch, salt, sugar, coffee, tea, alcohol, and tobacco are bad for your health. Address: Palm Springs, California.

1214. Lager, Mildred. 1938. Recipes. *House of Better Living* (*Newsletter, Los Angeles*) 7(25):1, 4. Jan.
• ***Summary:*** Includes recipes (p. 4) that all include quick-cooking cracked soy beans (Cook for 10 minutes). Soy sandwich spread (with cooked cracked soy beans; May be made into patties, broiled, and served as meat balls). Soy vegetable hash (baked). Soy vegetable loaf (baked).

Note: On the same page is an ad titled "Mildred Lager's quick cooking family," that includes Cracked soy beans. 1 lb package–18¢. 2 lb package–35¢. 5 lb bulk–80¢.

1215. *Los Angeles Times.* 1938. Divorce suits filed: Moore, Elizabeth against William M. Feb. 25. *
• ***Summary:*** The filing took place the previous day. Elizabeth's first husband was Paul Bragg.

1216. Osius, Frederick J. 1938. Disintegrating mixer for producing fluent substances. *U.S. Patent* 2,109,501. March 1. 5 p. Application filed 13 March 1937. 5 drawings.
• ***Summary:*** An "improved method and apparatus for disintegrating, mixing and aerating materials to produce palatable or beneficial drinks or the like." Current drink mixers "cannot be effectively utilized to produce a suitable mixture of ingredients such as fresh fruits and vegetables with each other or with fluent materials... in order to create a uniform and creamy fluent mixture." Prior "drink mixers may be classified as a relatively inexpensive and inefficient luxury." The top of this mixer is in the shape of a 4-leaf clover. Throughout the claims, this electric appliance is referred to as a "drink mixer."

Note 1, This is first and only patent for a blender ever issued to Fred Osius. He and Fred Waring, transformed it into the Waring Blendor, which first started to be sold (under the name Liquefier) in late 1937.

Note 2. This is the earliest English-language document seen (July 2021) that uses the verb "to disintegrate" ("for... disintegrating"), or the verb "to mix" ("for... mixing") in connection with an electric blender.

Note 3. This is the earliest English-language document seen (July 2021) that uses the word "disintegrating mixer" (as a generic term) to refer to an electric blender.

Note 4. A search for other patents issued to Frederick J. Osius shows the following (in chronological order): 1916 May 18–Improvements in electric motors. British Patent 191,515,792.

1917 Aug. 2. Improvements in machines for cutting or comminuting coffee and similar materials. British Patent 108,260.

1920 Jan. 6–Machine motor. U.S. Patent 1,327,209.

1920 Jan. 6–Sewing-machine motor. U.S. Patent 1,327,210.

1926 Aug. 3–Carpet sweeper. U.S. Patent 1,594,685 (Hamilton Beach Mfg. Co.).

1927 April 19–Vacuum cleaner. U.S. Patent 1,624,969 (Hamilton Beach Mfg. Co.). Address: Miami Beach, Florida.

1217. Hauser (Bengamin Gayelord). 1938. Three free lectures on how to live longer, look younger by Bengamin Gayelord Hauser (Ad). *Washington Post.* March 13. p. M15.
• ***Summary:*** "America's foremost diet advisor. Formerly dietetic director of Elizabeth Arden's 'Beauty Farm.' Beginning Tuesday at 8:15 P.M. Hauser brings hew help and new hope to every sick, ailing and discouraged man or woman!... You simply cannot afford to miss one of these lectures.

"Remember the dates, March 15th, 16th & 17th at 8:15 P.M. Masonic Temple. New York Ave. at 13th St. N.W." A portrait photo shows Hauser.

1218. *Los Angeles Times.* 1938. Drink raw vegetables, fruits & nuts! *Electric* Liquefier makes this wonder possible (Ad). March 28. p. 4.
• ***Summary:*** This tiny ad, containing no company name or address, states: "Best machine on the market. For Home

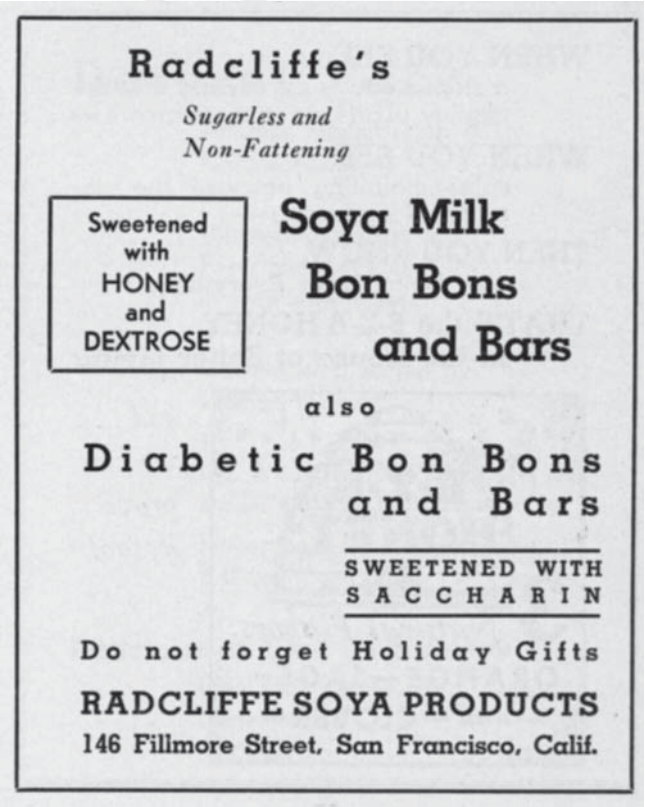
demonstration call CApitol 0983. Delivered $25."

1219. **Product Name:** Bill Baker's Soy-Fruit Slices.
Manufacturer's Name: Baker's (Bill) Products.
Manufacturer's Address: Ojai, California.
Date of Introduction: 1938 March.
New Product–Documentation: House of Better Living Catalog. 1938. March. p. 13. $0.18/dozen.

1220. **Product Name:** Cubbison's Soya Gluten Crackers.
Manufacturer's Name: Cubbison Cracker Co.
Manufacturer's Address: 3417-3419 Pasadena Ave., Los Angeles, California.
Date of Introduction: 1938 March.
New Product–Documentation: House of Better Living Catalog. 1938. March. p. 13. "Cubbison's Soy-Gluten Crackers, $0.35 lb." Taylor. 1944. Soy Cook Book. p. 201. Note: In May 1936 (according to the House of Better Living Catalog), Cubbison Cracker Co. was located at 3417-19 Pasadena Ave., Los Angeles, California. They were not yet using soy in their crackers. Taylor. 1944. The Soy Cook Book. p. 201. Soybean Blue Book. 1947. p. 71. "Crackers."

1221. **Product Name:** Cubbison's Soya Cookies. Renamed Cubbison's Wheat Soya Cookies by 1951.
Manufacturer's Name: Cubbison Cracker Co.
Manufacturer's Address: 3417-3419 Pasadena Ave., Los Angeles, California.
Date of Introduction: 1938 March.
New Product–Documentation: House of Better Living Catalog. 1938. March. p. 22. $0.30/lb.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 4. Soya Cookies contain 40% soya; have national distribution.

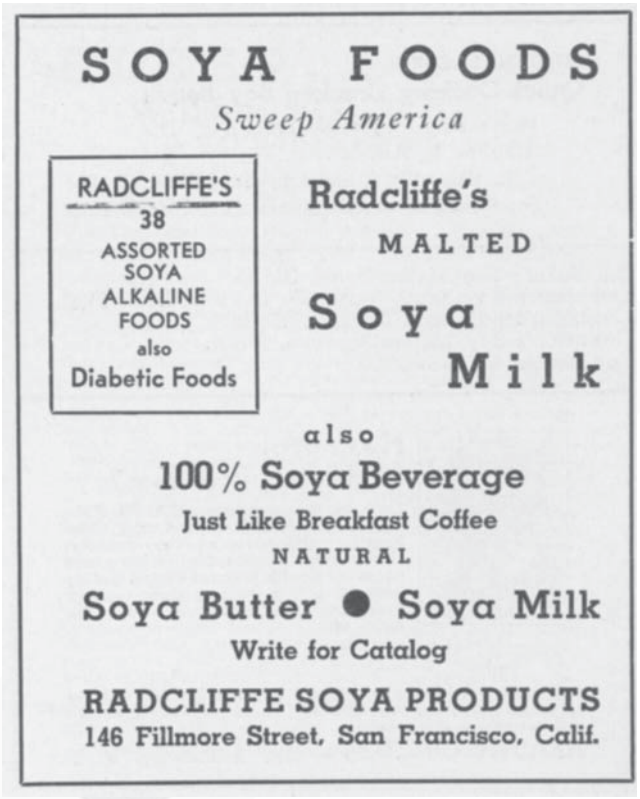


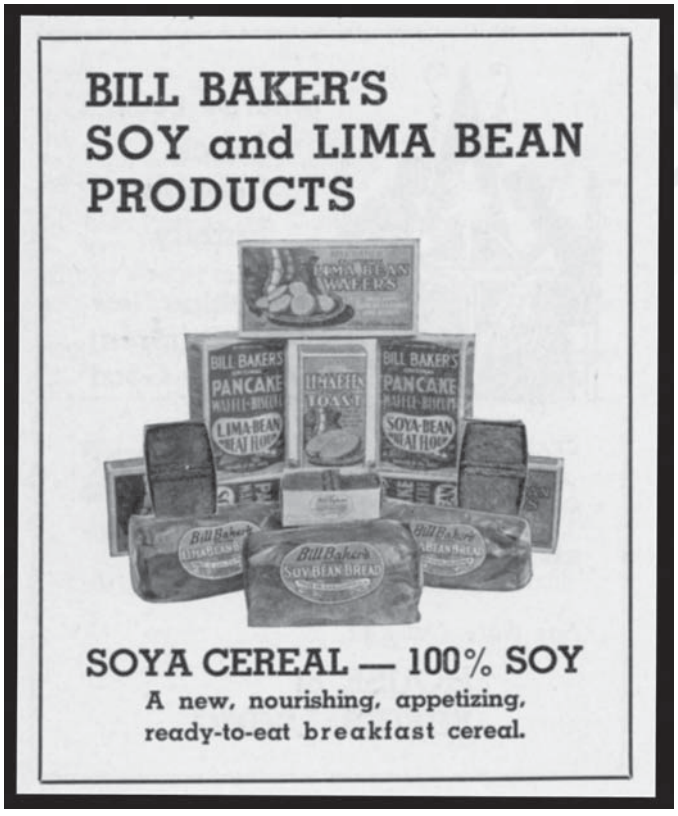
Taylor. 1944. Soy Cook Book. p. 201. Soybean Blue Book. 1947. p. 70. Same address. Also listed in 1955.

Soybean Digest. 1951 "Cubbison pushes soy on West Coast." July. p. 20, 22. The company's Wheat Soya Cookies are a blend of high protein wheat flour and soy flour, "the richest of all known foods in protein, with the exception of dried egg white. They are sweetened with honey."

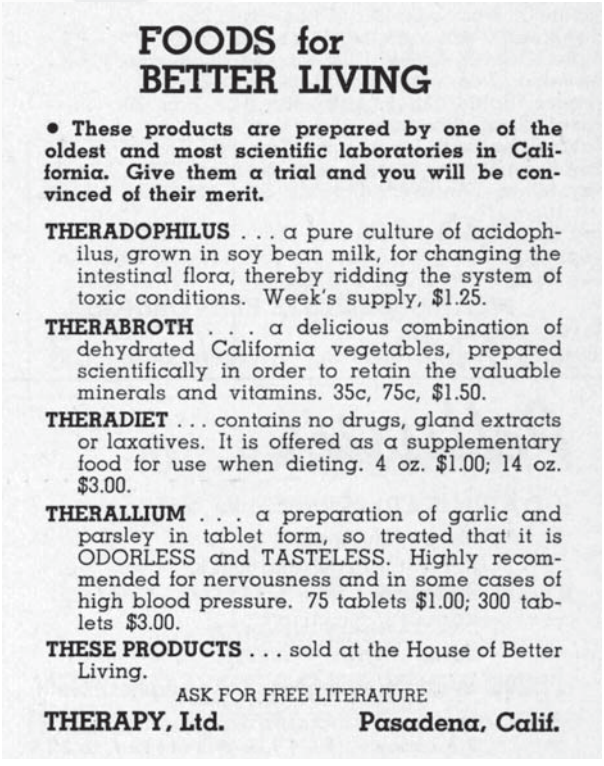
1222. Lager, Mildred. 1938. The House of Better Living Catalog: Finer natural foods. Los Angeles, California: Published by the author. 36 p. March. 23 x 10 cm.
• ***Summary:*** The single most important document showing the creative development of commercial soyfoods in California in the late 1930s. This catalog contains a large section on Diabetic Foods, consisting mostly of soyfoods, and an even larger section titled "Soy Bean Products."

The Foreword (p. 1) begins: "The House of Better Living is as unusual as its name. Its aim is to teach better living, and has made possible Mildred Lager's free





educational program by radio and class work. Become a member of our ever-growing family. Secure one of our creed cards–Realize life can be a game and not a battle, and if you give to the world the best you have, the best will come back to you.



"The House of Better Living has grown in four years from what was called a brain storm to an institution. It is outstanding, unique, and built on the ideals of sincerity

© Copyright Soyinfo Center 2021

and service. It is teaching the ounce of prevention–the health insurance that pays dividends in years of health and happiness. It carries for you, Finer Natural Foods, selected by Mildred Lager."

A full page of delivery and order information (p. 2) shows that Mildred was shipping foods (such as California nuts and fruits, fresh and dried) all over the United States.

© Copyright Soyinfo Center 2021

This catalog contains a total of 42 soyfood products, including 26 such products not found in the 1936 catalog. Soy (and other interesting) products are listed as follows (prices and weights are given for each): Beverages–Coffee substitutes: Radcliff's soy bean, Soy-Co. Other beverages: Dr. Fearn's Proteinized Cocoa, Radcliff's Malted Soya Milk, Radcliff's Soya Bean Cocolette, Soy-Malt (plain or chocolate). Sugars and syrups: Radcliff's Golden Soya Honey Spread (4-oz. glass). Natural sweets–Candies: Carque's health candies, bar, 5¢, Halvah bars, Sesame brittle, Soya candy sticks, 1¢ each, Soy milk "chocolate" bars, in Bavarian, cocoanut, mint, cherry, pineapple, and creme de mint flavors, Soy milk "chocolates," ½-lb. box or 1-lb. box, Soy chocolate, 1¢ square, ½-lb, 1 lb, 60¢, or bulk.

Desserts: Agar–Parfait mix, Agar–Hain Vege-Jell, Agar–Sanitarium vegetable gelatin. Diabetic foods: Gluten flour, Soy bean flour, 10¢ lb, Soy Bean Pancake and Waffle Flour (Bill Baker's Prepared; 2-lb. pkg. 30¢), Dr. Fearn's Soya Cereal, Dietetic Soyrina Cereal, Dr. Fearn's Soya-Date Breakfast Food, Battle Creek Dietetic Bran, Battle Creek toasted gluten bran flakes, Soy breakfast food, Cubbison's soy-gluten crackers, Soy-gluten wafers, Loma Linda soy bean wafers, Bill Baker's 100% soy-fruit slices, Bill Baker's soy bean bread, Olson's soy bread, Soy bean macaroni, spaghetti and noodles, Soy beans–imported, Soy beans–cracked, Soy beans–red, Soy beverages (without sweetening), Bill Baker's soy melba toast, Cubbison's soy melba toast.

Nut butters: Almond butter, Almond meal, Cashew butter, Peanut butter (dextrinized or raw), Pecan butter, Soy bean butter (lb or 8-oz. can). Whole grain flours, meals, etc.: Lima bean flour, Soy bean flour (1 lb, 3 lbs, or 10 lb), Soy bean pancake and waffle flour (Bill Baker's prepared), Soy bean pancake and waffle flour (Mrs. Hauser's), Whole wheat flour, wheat germ. Breakfast cereals (to be cooked): Mildred Lager's quick cooking cracked soybeans, Dr. Fearn's soya cereal, Dietetic Soyrina Cereal. Breakfast cereals (ready to eat): Battle Creek Zo, Dr. Fearn's soya-date breakfast food, Soya breakfast food, Bill Baker's 10% soya cereal. Melba toast, crackers, cookies: Cubbison's soy toast, Bill Baker's soy toast, Cubbison's Soy-Gluten crackers, Soy-gluten crackers, Loma Linda soy bean wafers, Cookies: Cubbison's soy cookies, Bill Baker's 100% soy fruit slices. Bread: Olson's soy bean bread (sliced loaf), Bill Baker's soy bean bread (unsliced loaf 16¢). Macaroni noodles: Soy bean macaroni, spaghetti and noodles. Legumes: Soy beans–imported, Soy beans–cracked, Soy beans–red. Meat substitutes: Nuteena (7 oz. can 15¢), Nut Meat, Nuttose (Battle Creek), Proteena, Protose, Soy bean butter (30¢ lb.), Soy mince sandwich spread, Soy bean spread, Soy bean ravioli (12¢ and 20¢ can).

Soy bean products (40 products; those mentioned above may be omitted here): Loma Linda soy beans (plain or tomato flavored, No. 1 can), Loma Linda soy beans with Proteena (No. 1 can), Dry soy beans (quick cooking red), Soy bean spread, Soya bean honey spread, Loma Linda soy mince sandwich spread, Soy bean sauce (5 oz for 18¢ or 2 oz bottle for 10¢), Soy bean oil (45¢ pint bottle), Soyco (Soy coffee), Soya bean milk powder, Milk of soya bean (6 oz or 12 oz can), Soy-Malt, Proteinized cocoa, Radcliff's 100% soya bean beverage (1 lb package), Cubbison's soy bean cookies, Cubbison soy-gluten crackers, La Sierra Soy breakfast cereal, Diamel Soyarina cereal, Diamel breakfast cereal. Salad dressings: Imitation Worcestershire sauce (Carque's, 5 oz bottle for 25¢). Powdered dry vegetables: Dulse, Dulse leaf, Irish moss, Kelp, Kelp–fancy, Sea lettuce (leaf or powdered), Soy-banana powder. Laxative foods: Agar, Psyllium, Swiss Kriss, Sym, Tam (laxative jam). Natural aids: Savita yeast tablets, Sesame seeds, Theradophilus (4 oz bottle 75¢, 8 oz bottle $1.25). Electric appliances: Electric juicers are not yet on the market. Index (p. 36).

There are ads for the following: Battle Creek Sanitarium Foods (p. 5; ask for literature). Ficgo coffee substitute (display ad, p. 6). Racliffe's Soya Products (p. 9, 21). Mildred Lager's quick cooking family (incl. cracked soy beans), Bill Baker's soy and lima bean products (photo display, p. 16). Therapy, Ltd.–Foods for Better Living (Theradophilus, soy bean milk, p. 19, 29).

A photo (p. 1) shows Mildred Lager.

Note. This is the earliest English-language document seen (Aug. 2013) that contains the term "soya bean beverage," which probably refers to powdered soya milk. Address: 1207 West Sixth St., Los Angeles, California.

1223. **Product Name:** Malted Soya Milk [Banana, Soya Mocha, Nut, or Choklateen].
Manufacturer's Name: Unknown. Perhaps Hain or Radcliffe's.
Manufacturer's Address: Los Angeles, California.
Date of Introduction: 1938 March.
Wt/Vol., Packaging, Price: 8 oz or 16 oz can.
New Product–Documentation: House of Better Living Catalog. 1938. March. p. 22. 8 oz. can for $0.40 or 16 oz. can for $0.70. Talk with Ben Kahan of Kahan & Lessin. 1988. Sept. 24. He thinks that Hain Pure Foods in Los Angeles may have made this. The company was first sold during World War II. They were one of the pioneer companies, founded by Harold Hain. They used to have retail stores as well as manufacturing, but they gave up the stores to concentrate on manufacturing. A very interesting company.

1224. *Evening Telegram* (*Superior, Wisconsin*). 1938. Superior girl success as manager of 'health store.' May 27. p. 4, col. 6.
• ***Summary:*** Mildred Lager, who left Superior after doctors gave her only a few years to live, is now manager of a health food store in Los Angeles, California, "supplying special

© Copyright Soyinfo Center 2021

nutritive aids to patients under doctor's care."

A graduate of Superior State Teachers' College, Miss Lager was active in college affairs and a member of Tau Alpha Chi sorority. She "became a saleslady in a shoe store in Superior soon after her graduation, then became a co-partner in the store when ill health forced her to quit.

"As a result of intensive study of foods and their value to health, she became a demonstrator for Dr. Frank McCoy, noted health specialist whose health talks appear daily in *The Evening Telegram* [this newspaper in Wisconsin] in the column, 'How to keep well.'

"Traveling throughout the United States appearing before large audiences of both men and women showing how health advocates prepare food, Miss Lager returned here six years ago [i.e., about 1932] to conduct a cooking school and institute at Concordia Lutheran Church. Large crowds attended.

"Four years ago, Miss Lager left the McCoy institute to go into business for herself, opening a health food store [named The House of Better Living, on 25 Oct. 1933] in Los Angeles, the largest of its kind in the United States.

"The store handles special canned foods for diabetics, imported flour and fruits, fruit juices and other products not in stock at the regular grocery store. Patients on special diets are sent to the store on advice of their physicians. A mother in Texas sends regularly for special almond milk, necessary for her child's health because it has an allergy to cow's milk.

"Two years ago Miss Lager went to Honolulu [Hawaii] to spend several months studying the pineapple industry and how the fruit affects health when used in the diet. She herself is strict in her own food desires.

"In connection with the store, Miss Lager conducts a cooking school once a week supplemented by talks by prominent food specialists, chiropractors, dieticians and doctors. A writer of note herself on nutrition, one of her articles was printed recently by a magazine in England.

"She conducts a 15-minute radio program [in Los Angeles] five times a week which is rated by critics as having one of the largest followings for a program of its kind on the west coast."

A portrait photo shows pretty Miss Mildred Lager.

Note: Frank McCoy's "health institute" was in Los Angeles, where he lived from roughly 1924 to 1931; he wrote a book on health and had a column in the *Los Angeles Times.*

1225. Lager, Mildred. 1938. New items. *House of Better Living* (*Newsletter, Los Angeles*) 7(29):3. May.
• ***Summary:*** Includes: Bulk soy candies. Cocoanut milk. Improved electric juicer. Small cans of soy bean ravioli.

1226. **Product Name:** Kreme O'Soy Crisps (Ready-to-Eat Breakfast Cereal. Renamed Wheatasoy in Jan. 1940).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1938 May.
Ingredients: Whole soy bean flour, whole wheat, malt.
Wt/Vol., Packaging, Price: 9 oz box.
How Stored: Shelf stable.
New Product–Documentation: Madison Health Messenger. 1938. Spring. Page 4. "Kreme O'Soy Crisps is a high quality breakfast cereal, ready to eat. The combination of whole soy bean flour, whole wheat, and malt presents a rich assortment of choice nutritional elements. A special malting and baking process makes it easy of digestion, which together with its being alkaline makes it a protective balanced breakfast food. 13 cents per package." A photo shows a young boy at the breakfast table (dressed in a white shirt and bow tie) eating "Breakfast Crisps."

Ad in *Nature's Path* (USA). 1939. Sept. p. 337. "Alkaline breakfast food: Kreme O'Soy Crisps." Madison Foods: "Devoted to the protection of your health."

Ad in *Nature's Path* (USA). 1940. Jan. p. 19. "Alkaline breakfast food: Wheatasoy (Formerly Kreme O'Soy Crisps)." "Malted-Dextrinized. Combines the nourishment of whole wheat, soybeans and malt." Madison Foods.

Taylor. 1944. Soy Cook Book. p. 201.

1227. Melick, Weldon. 1938. Self-supporting college. *Reader's Digest.* May. p. 105-08.
• ***Summary:*** About Madison College in Tennessee. "In 1904 the Nashville Agricultural Normal Institute at Madison, Tennessee, consisted of 11 students and some dilapidated farm buildings on 400 acres of worn land purchased with the last cent of its founders–Dr. E.A. Sutherland and four other teachers. In addition, however, it had one invaluable asset: Dr. Sutherland's idea that a college education should be made available to any boy or girl willing to work for it."

Today "Madison's curriculum includes 27 campus industries, run by the students to support the college and themselves... 15 years of research in food chemistry have resulted in new food products too useful to confine to campus menus.

"Hence, Madison Foods–an industry that is largely responsible for making the soy bean appetizing to Americans. The school's food chemists, experimenting with 200 varieties of soy beans, eliminated objectionable taste and produced savory breakfast foods, bread, coffee substitute, condensed milk, and meat substitutes which look and taste like beef but are even more nutritious and digestible. Vigorost, made from soy loaf after the milk is extracted [i.e. okara], is featured by a cafeteria chain in New York City. More than $60,000 worth of Madison's packaged and canned foods was sold in 27 states last year, and the Institute runs its own health-food cafeterias in Nashville and Louisville.

"Madison Foods have developed soy milk until it is now not only cheaper than cow's milk but, on the authority of the

© Copyright Soyinfo Center 2021

American Medical Association, better for babies. Observers have come from Africa, India, and other countries where milch cows are scarce, to study the methods of Madison's soy bean 'dairy.'...

"With twice as many applicants as can be provided for, Madison as a rule accepts only those who could not otherwise arrange for a college education."

Note 1. As a result of this article, the school received nearly 5,000 inquiries concerning the school plus a flood of student applications. The next year was the highest in the history of the College with a total of 450 college students enrolled.

Note 2. This is the earliest article on soy seen (Aug. 2002) in *Reader's Digest* magazine.

1228. Nelson, G.A. 1938. Re: Request to use Dr. Fearn's name on Vitona product labels. Letter to Dr. Charles E. Fearn, 355 West Ontario Street, Chicago, Illinois, June 11. 2 p. Typed, with signature on letterhead.
• ***Summary:*** "Since writing you yesterday, your letter of June 6 addressed to the Giloma Research Laboratories has been turned over to me, inasmuch as I have the general management and control co-jointly with Doctor Proctor of the Vitona Health Products Incorporated. Your letters are always interesting for it is plainly evident that you are thinking along parallel lines with us. We have gone over the products you have sent us with a great deal of interest. We are quite convinced that you are manufacturing something of outstanding merit..." Vitona plans to work closely with the Medical profession and to establish a foundation–the Charitable Clinical Institution.

"A short time ago, Dr. [Keller] Beeson of the American Soy Bean Association recommended to us that we employ Miss Dorothea Van Gundy to take charge of our Dietetic Department under the direction of our President, Dr. F. Earle Brown. Although Miss Van Gundy was employed as a Dietitian for the largest Health Food Restaurant in California, she has resigned from that position as of the 25th, this month, and is joining our organization at that time. Miss Van Gundy brings with her all that we could expect, in addition to having the happy faculty and ability of being able to lecture–to write–and to handle radio programs."

Mr. Nelson then suggests to Dr. Fearn that Vitona would like, "out of respect for the work you have heretofore done, to incorporate your name on the products which are of your manufacture. The name of our product will be overprinted on the label." Vitona has decided to change the name of its bread to "Vitona Soy" from "Ches-Nu-Soy" thereby side stepping "coined" names.

"In the case of your products, taking the infant food as an example, or the cereal, we would simply overprint on your label, in the space for the name of the item–'Dr. Charles E. Fearn's Infant Food,' or in the case of the 'Soy-O,' 'Dr. Charles E. Fearn's Soybean Cereal,'"... or "on the back of the package state something along the order of: 'This cereal is specially prepared for Vitona Health Products Incorporated by Doctor Charles E. Fearn." Address: Vitona Health Food Products Inc. of California, 527 West 7th, Los Angeles. Phone: Tucker 1317.

1229. *Los Angeles Times.* 1938. Interesting personalities around Los Angeles: Produce distributors. June 18. p. 5.
• ***Summary:*** Food specialist–Harold Hain. Southern California has become a Mecca of health-seekers. In 1926 Harold Hain opened a "retail pure food store at 320 West Third street." Today he is owner of the Hain Pure Food Company and owner of a modern plant (at 640 Mateo street), where he makes a complete line of more than 100 pure foods that are distributed internationally. His present line includes "products of only the very finest fruits and vegetables, juices, nut butters, syrups, cereals, desserts, soy foods and meat substitutes." Hain's newest product is a line of canned vegetable juices, which keep without refrigeration and are easily shipped.

A portrait photo shows Harold Hain.

1230. Nelson, G.A. 1938. Re: More problems with McBride. Letter to Dr. Charles E. Fearn, 355 West Ontario Street, Chicago, Illinois, July 18. 2 p. Typed, with signature on letterhead.
• ***Summary:*** Nelson thanks Dr. Fearn for the latter's letter of July 15. "Since last writing you I sent for McBride and had him come to the office. I suggested in talking to him over the phone, that he bring samples of the items that he was manufacturing, and you may believe me when I tell you that it was a very comprehensive Dr. C.E. Fearn line.

"I would like very much to send you samples of the things that he submitted, but I haven't had time as yet to go over the items with Mr. Fisher. I think what we will do is to take the envelope that contains what he submitted, and send you half of each sample. That will give you a pretty good idea of what he has been doing. Meanwhile Mr. Rhodes has already written him a letter, but he probably did not receive that until today.

"He denied absolutely, in his talk to me, that he was turning out any of your products at the present time... At the same time the catalogs of a great many of the retail distributors do have his material under your name as was evidenced by the clipping of The House of Better Living catalog which I sent you."

Mr. Rhodes, Vitona's regular attorney, will do this work for Dr. Fearn at no charge. "I doubt that McBride has the guts to resist a court action..."

"I note you have given me amounts that he bought, and that also I will turn over to Rhodes, but will not do so until such time as I can discuss the situation with him. In all probability tomorrow."

You [Dr. Fearn] "say that you found McBride unreliable.

© Copyright Soyinfo Center 2021

This is the same identical statement that he made about you. As a matter of fact, "I had two stenographers taking down every word he said while he was in the office, so everything he said is a matter of record in case there is ever a necessity of using it."

"He stated explicitly that you were unreliable, that you didn't know your business, and that your products were not worth a damn In making that statement I am quoting him Ver Batum. He also said that he thought that I had better sense than to be deluded by an old codger like you, who had nothing to offer except what he learned from other people.

"He more-over stated that you did not manufacture any of the merchandise you offer but bought it second hand and then distributed it."

"Rhodes will handle this thing in such a manner that there is no danger of bringing me into it, which will make it possible for this organization to keep our relationship with him, that way we will gain information as we desire it.

"Personally I would hate to trust him with a dime, even if the dime was made by Roosevelt and was only worth four cents.

"He took it upon himself to warn us of all the pitfalls and the hurdles and the brambles and the bushes and what have you, that we would either have to surmount or wallow through before we learned anything about this business. He told us that he had taught you all you knew about it, and that may be a good thing because through you we might be able to learn something ourselves.

"The picture that you have painted of the McBride situation is so obviously the existing one that it is extremely interesting. It is not a very pleasant topic for discussion, but it is one of those things that it is impossible to avoid. It is far better to face the facts as they exist at this time, than to wait until he might be placed in a position to use the things that we are attempting to do jointly, to the benefit of his own ulterior motives and devises.

It "is my opinion that he is extremely illiterate, unprincipled, unscrupulous, and a damned poor business man.

"I think that tells the story. Very truly yours... GAN:jp"

Note: How confusing! Vitona and Vitana in Los Angeles, and Viana in Chicago–all somehow working with and/or competing against one another. Address: Vitona Health Products Inc. of California, 527 West 7th, Los Angeles. Phone: Tucker 1317.

1231. Sanford's Cafeteria. 1938. "World's most unique cafeteria!" ... Say previewers and you'll agree! (Ad). *Los Angeles Times*. July 26. p. 4.

• ***Summary:*** This big ad announces the grand opening of a healthy cafeteria on Tuesday, July 26. "Fully air-conditioned. We acknowledge with gratitude the co-operation of the firms listed below:

Acidofilac–Radiance Products Co.

Bragg Meal & California Mint Tea–Live Food Products Co. [Paul Bragg].

Cocoanut Milk Powder & Cocolette–Radcliffe Products.

Cottage cheese & buttermilk–Knudsen Creamery Co.

Healthful Candies–Hassey Candy Co.

KAL–The calcium phosphorus food–Makers of KAL.

Mal-Ba-Nuts & vegetable juices–Hain Pure Food Co.

Nuteena, Syl-Dex & Savorex–Loma Linda Food Co.

Papaya & guava juice–Milo Frank.

Soy milk powder–Viana [Malcolm McBride].

Soy waffle flour & soy macaroni–Mrs. Hauser's Food Products Co.

Swiss Kriss, Vitana, Staf & Juicex [electric juicer]–Modern Health Products Co. [Gayelord Hauser].

Soyolate, The soy chocolate–Theo. Hollie Co.

Theradophilus & Theradiet–Therapy, Ltd.

Unsulphured figs & jumbo prunes–F.E. Hadley & Sons.

Virgin olive, peanut & soy bean oils–Solar Food Products Co.

Keep fit by eating right. Modern cooking insures digestibility ("Either whole wheat and soy bean flours, vegetable shortening in baked goods–no cheap artificial substitutes Whatever!"). "Outstanding features to help you keep fit:" Cafeteria, Dietetic food store, bakery (using "whole wheat and soy bean flours"), health bar ("An exclusive feature of Sanfords. Fresh fruit and vegetable juices squeezed right before your eyes and concocted into tantalizing non-alcoholic cocktails that will send you along with a new spring in your step and sparkle in your eye"). "All employees required to pass a physical examination. Open every day of the year, 7 a.m. to 8 p.m." "Cooking that's kind to your stomach."

Photos show: (1) The inside of the cafeteria with white tablecloths. (2) Thirteen waitresses in uniform. (3) Bar stools around the health bar. (4) The dietetic food store.

Note: This is the earliest document seen (July 2021) that mentions the Juicex, an early electric juicer. Address: 720 South Hill St. [Los Angeles, California].

1232. Lager, Mildred. 1938. Five years ago... *House of Better Living* (*Newsletter, Los Angeles*) 8(34):1. Oct.

• ***Summary:*** "... the House of Better Living first opened its doors to the public." "My aim was to teach and not merchandise, and to always make my classes free of charge."

"The House of Better Living aims to be far more than a food store–as a store it has a policy of quality, service, and fair prices. Its aims are to teach Better Living–to teach you to help yourself–to help you to realize that sensible living pays big dividends and is the secret of a healthier, happier, and more prosperous life." Recipes for October (p. 1) include: Soy bean loaf. Soy vegetable hash.

Sidebar: "Start your day with Mildred Lager's cheery philosophy. KFAC [radio]–8:45 A.M. Tuesday, Wednesday, Thursday, and Friday mornings." Address: 1207 West Sixth

St., Los Angeles, California. Phone: MUtual 2085.

1233. Lager, Mildred. 1938. Recipes. *House of Better Living* (*Newsletter, Los Angeles*) 8(34):1. Oct.
• ***Summary:*** Includes recipes for: Soy bean loaf (with 1 can soy beans), Soy vegetable broth (with 2 cups cooked cracked soy beans).

1234. **Product Name:** Soya Beans in Tomato (In glass jar. Canned by June 1940. Renamed The Versatile Soyabean in Tomato Sauce by 1953).
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1938 October.
Ingredients: Incl. soya beans, tomatoes.
Wt/Vol., Packaging, Price: 12 oz jar. Canned by June 1940.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1938. Oct. Half-page ad. "For your health's sake, eat Soya Beans in Tomato. The Protein food with the high Vitamin content, prepared under Hygienic conditions, hermetically sealed by F.G.R. Health Food Products (Registered), 40 Chapel Street, St. Kilda. Directions for use. Place jar in water and heat. To open, lever lid with coin. Obtainable from Roberts Health Centre, 284 Post Office Place, Melbourne, C.1. Phone: Central 3394." A photo shows the jar and label. At the bottom of the label is written: "Manufactured at 40a Chapel St., St. Kilda."

Ad in *Nature's Path to Health.* 1940. June. p. 26 "Just what you've waited for! Better health foods." An illustration (line drawing) shows the four canned products, with the Soy Bean & Tomato in the smallest can. Ad in NPH. 1940. July. p. 8. "Roberts' Better Nut Foods." An illustration (line drawing) shows the four canned products, with the Soy Bean & Tomato in the smallest can. Small ad in Aug. 1940 issue, p. 5. "Roberts' Soy Bean in Tomato." "Packed in a new style in tin in convenient sizes and sold at all Roberts' Health Food Shops throughout Australia."

Ad in *Nature's Path to Health.* 1940. Nov/Dec. p. 30. "Roberts' Soy Nut Recipes." Same line drawing as in July issue. "Supplies always available at the Roberts Health Food Shops Throughout Australia."

Letter (fax) from Paul Smith of Soy Products of Australia. 1995. March 14. From 1940 to 1954 these soybeans were contract canned outside the Roberts' plant. From 1954 to 1974 they were canned in house. The product had to be discontinued in 1974 due to falling sales, its high labor cost and low profitability, and the lack of capital to further automate the process. Long before 1954 the Sanitarium (Adventist) retail shops sold this product under the Roberts brand name. Sanitarium studied the product then introduced their own version of it as a logical extension of their extensive range of canned vegetarian "meat analog" type products. They had economies of scale which Soy Products of Australia lacked. As Sanitarium Sales increased, ours declined. Beans in Tomato were processed continuously from 1940 to 1974 by SPA and previously under the F.G. Roberts brand.

1235. **Product Name:** Roberts' Soy Nut Roast.
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1938 October.
Wt/Vol., Packaging, Price: Tin-plated steel can.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1938. Oct. Back cover (p. 50). A photo shows the label: "The ideal meat substitute. 10 ozs. Nett. Another Roberts 100% protective health food."

Note: The same page shows that Roberts also made a coconut ice cream named Robert's Cocoanut; it was apparently a non-dairy product.

1236. Hastings, Milo. 1938. A college that feeds itself. *Physical Culture.* Nov.
• ***Summary:*** About Madison College near Nashville, Tennessee. About 500 people now live on the campus, of which 300-350 are students. About 90% of the vegetables (including soybeans) consumed by all these people are grown by student labor. The college has its own mills for whole-grain products and its own bakery, "which also serves whole-wheat and soy-bean bread to over one hundred retail stores in the nearby city of Nashville."

"The address Madison College, Tennessee, has become familiar to patrons of health food stores as the place of origin of a distinctive line of products made from soy-beans." The reason for that grew out of an interesting combination of circumstances. First, the college was founded upon the idea that the "students should by their own labor produce as nearly as possible all their own food supply for a completely nourishing diet. Second: Madison College and Sanitarium are strictly vegetarian, and, as at the Battle Creek Sanitarium, the vegetarianism has been worked out as part of the school dietary as well as the sanitarium dietary. To students and patients alike the importance of proper food for the body is emphasized.

"Third: one phase of the work at Madison College has to do with the training of medical missionaries. That has not only brought to the teaching staff people who have had experience in the Orient, but has also brought students from those countries. (At present there are six Japanese and ten Chinese students.)

"Out of these circumstances came the development of a new line of foods which we may call the Americanization of

© Copyright Soyinfo Center 2021

the second most important food material in the Eastern world and the greatest of all vegetarian sources of protein–the soy-bean."

To Madison College, with its interest in perfecting a vegetarian diet, came Perry A. Webber, as professor of chemistry. He had taken his doctor's degree at Michigan State College after a fourteen years' residence in Japan. It was a happy combination of circumstances, and the American chemist, with his Japanese experience, set to work to Americanize the soy-bean as a source of human food.

"It also happened that one of Dr. Webber's Chinese friends, Philip S. Chen, was a fellow student of chemistry at Michigan State College, having come to America to study science. When he had completed his chemical work for a doctor's degree at Michigan, he entered Madison College as a special student to take up practice teaching in the Department of Chemistry under Dr. Webber. The two men, each with a knowledge of soy-beans as used in the Orient, now worked together as chemists in the American college.

"After two years of this cooperation Dr. Webber was called back to Japan to become the head of a school there. Dr. Chen then became the professor of Chemistry at Madison College and continued to work on soy-bean products."

Though Dr. Chen says soy-bean milk has been used in China for 3,000 years, the type made at Madison "is new because it is different and superior to the older forms of the Oriental product." It has been made "more acceptable to American tastes and to the more exacting demands of present-day nutritional science. This also applies to the substitutes for meat and the cheese products made from soy-beans, and to the use of soy-bean flour as an ingredient in bakery and cereal products. Today all this is of special interest to vegetarians and to those who follow the latest forms of health foods. These advances in food science will later become of far greater significance."

Dr. Frances L. Dittes, head of the Department of Nutrition, specializes in soybeans, "both in nutritional research and menu applications. Thus, the new food products developed from soy-beans, along of course with other vegetarian dishes, were worked out and tried out in the students' dining hall and also in the Madison Sanitarium. Patients cured at the sanitarium naturally wished to continue the use of the food products after returning home. This gave the nucleus of a health food manufacturing business.

"This, in turn, provided another campus industry for the work-your-way college, giving occupation for the students in which they could take an especial interest and pride, since the business grew out of the research work of the college and was closely tied in with both their agricultural and their health work."

Note: This article is reprinted near the back of the 1989 edition of *Madison–God's Beautiful Farm.*

1237. *Health and Life* (*London*). 1938. Recommended health food stores and restaurants [in Great Britain]. Nov. p. 362-64.
• ***Summary:*** Health food stores and restaurants are listed in 70 cities in the UK; they are listed alphabetically by city. The name and address of each is given. There are 25 listings in London alone, 2 in Belfast [Ireland], 3 in Bristol, 2 in Croyden, 4 in Glasgow [Scotland], 2 in Ipswich, 2 in Worthing, etc. The symbol "(R)" is used to designate restaurant. Most stores have the words "Health Food" in their name, but some have "Health Centre," "Health Store," "Pure Food," "Food Reform Depot," etc.

In Manchester, the Vegetarian Society store is at 39 Wilmslow Road, Rusholme. Also–"Coventry: 'Pitman' Health Food Stores, 6 City Arcades."

1238. **Product Name:** Soya Cream Cheese.
Manufacturer's Name: Wigmore Health Shop., Ltd.
Manufacturer's Address: 89 Wigmore St., London W.1, England.
Date of Introduction: 1938 November.
Wt/Vol., Packaging, Price: Box. Retails for 9 pence (11/38, London).
New Product–Documentation: *Health and Life* (London). 1938. Nov. p. 365, 363. "Recommended health and remedial foods." "Soya Cream Cheese (Wigmore Health Shop). Can be cut like cheese or spread like paste. Boxes 9d."

Note 1. This is the world's earliest known commercial soy-based cream cheese.

Note 2. This is the earliest English-language document seen (July 2021) that uses the term "Soya Cream Cheese" to refer to soy cream cheese.

Note 3. Note: This is the earliest English-language document seen (July 2021) that contains the term "Health Shop" (or "Health Shops," regardless of capitalization).

1239. *Los Angeles Times.* 1938. Bill Baker of Ojai prepares White House dinner dessert. Dec. 12. p. 25.
• ***Summary:*** "Ojai, Dec. 11.–Bill Baker of Ojai, who has been making Christmas cakes for presidents since the administration of Warren G. Harding [president 1921-1923], has another ready for shipment..." The 125-pound cake will have a replica of Treasure Island, site of the Golden Gate International Exposition, on top, with a garland of red roses surrounding it and the caption "Greetings to President and Mrs. Roosevelt." The presidential shield and Bay bridges will adorn the base. As in the past, it will be made entirely of California products and be sent by special messenger.

A photo (captioned "Christmas cake for president") shows Lavonne Carsner putting finishing touches on the cake. Behind her is an American flag across the wall.

This is the only document seen (July 2021) stating that Bill Baker first baked a Christmas cakes for President Harding. His obituary in this newspaper (1942 May 24, p. A3) says that he first baked a Christmas cake for Calvin Coolidge [president 1923-1929].

1240. Fiene, F.; Blumenthal, Saul. 1938. Handbook of food manufacture: A handbook of practical food information... New York, NY: Chemical Publishing Co. vi + 603 p. See p. 89. Index. 24 cm.

• ***Summary:*** This book contains many commercial scale formulas / recipes. Chapter 2, "Description of raw materials," includes brief descriptions of "corn oil (maize oil), cottonseed oil, arachis oil (also called peanut, ground nut, and earth nut oil), sesame oil (gingli oil, teel oil), soy bean oil, and rape oil" (p. 70-71).

Chapter 3, "Milk and milk products," includes subsections titled "Infants' milk, synthetic" (a recipe for a dry mix in which "Soya bean powder, 125 g." is the main ingredient), "Soya bean vegetable milk" and "Soya bean curd" (p. 89). Concerning the milk: "Soya bean meal after the oil is extracted or whole soya bean meal may be utilized quite as well as the whole bean. The milk can be used successfully in numerous preparations, such as breads and cakes, in creaming vegetables, in milk chocolate, and in custards. After separating the liquid from the solid material, the residue is still very rich in nutritive substances and can be dried and used for cattle feed or made into flour for human food."

Note 1. This is the earliest English-language document seen (Aug. 2013) that uses the term "Soya bean vegetable milk" to refer to soymilk.

Note 2. This is the earliest English-language document seen (Jan. 2019) that uses the term "soya bean meal" or the term "whole soya bean meal" to refer to whole soy flour.

Concerning the curd: "This curd, after being drained or pressed, represents bean curd of [sic, or] tofu, which is extensively eaten and forms the basis of numerous fermented, smoked, and dried cheeses in China and Japan... In many cities of the United States having a large oriental population fresh bean curd may be found in Chinese and Japanese markets."

Chapter 5, on canned foods, notes in the section titled "Dried beans" (p. 126) that "Soya" beans sold in cans.

Chapter 17, on "Bread" contains two formulas (p. 378-79) for "Soya bean flour bread," the first containing 260 lb. wheat flour, 65 lb. "Soya flour," etc., and the second containing 25 lb. "Whole soya flour," 25 lb "Whole wheat flour," etc. The straight dough method is used.

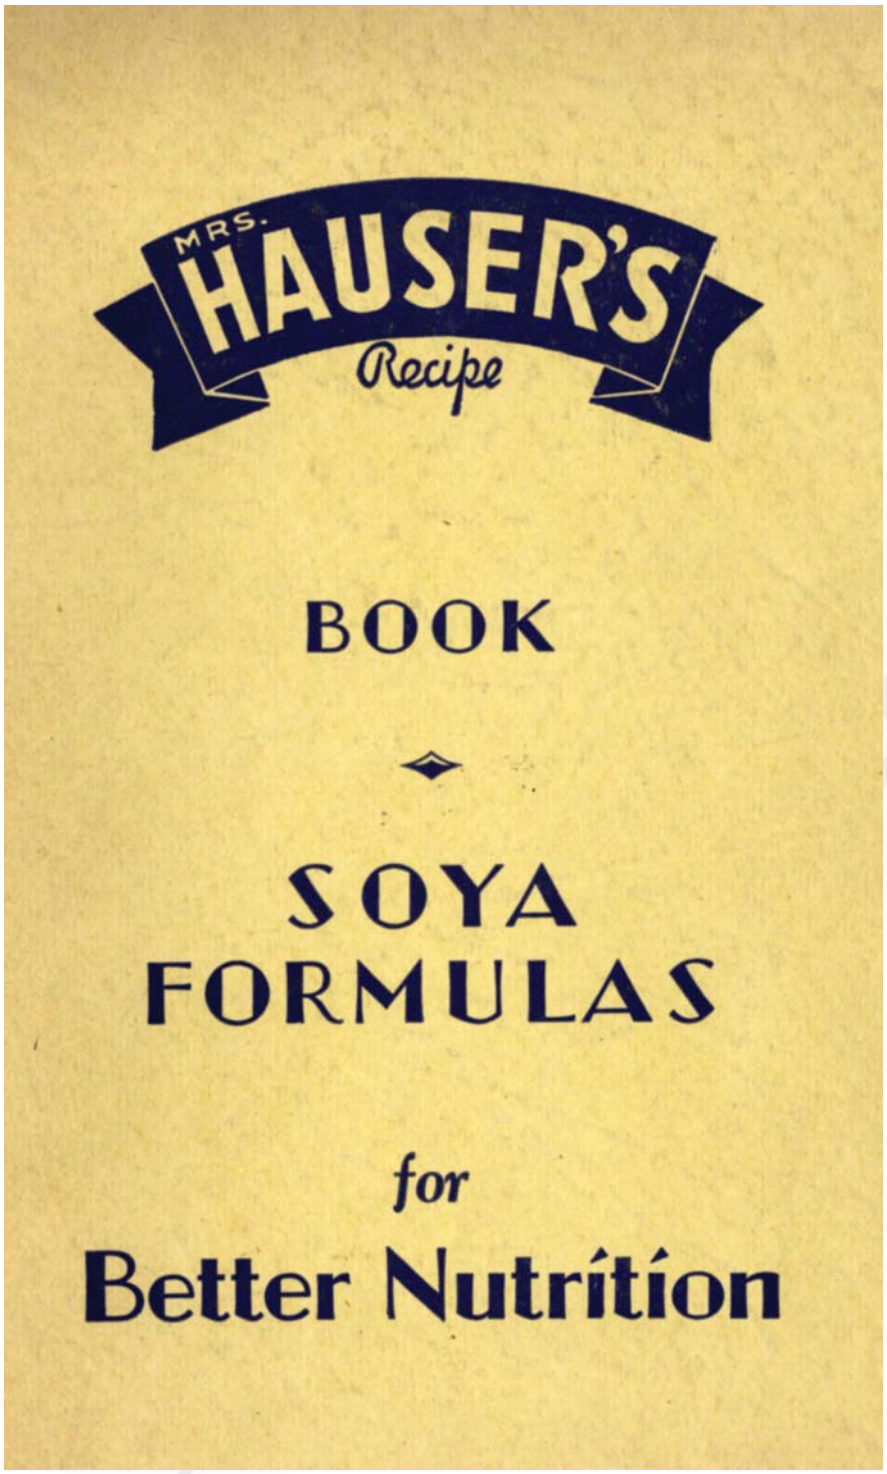
Chapter 23, titled "Health foods" begins (p. 445): "Natural and vitamin-laden health-building foods and drinks are essential for healthy muscles, nerves, glands, and for the growth and maintenance of a healthy, vigorous, and sound mind." The best diets are those containing plenty of fresh foods and juices. "Nuts and soya beans are good substitutes for meats, fish, eggs, and sea foods." A section in this chapter on the "Soy bean" begins (p. 447): "The soy bean is justly entitled to be called the king of the legumes. Not only because it is lowest in starch but also because, firstly, it is the most complete and best protein for both growing children and adults and, secondly, because of its unusually high mineral content being quite high in alkaline potassium, calcium, and magnesium... it is an alkaline food."

Formulas for health foods include (p. 454-55): "Health dry cereals" (six formulas, two if which contain "Soy bean middlings" [medium size soy grits, probably made by cracking whole soybeans]). Coffee substitutes and health drinks (three formulas, the 3rd containing only 75 oz. roasted whole wheat and 25 oz. roasted soy bean middlings). The next health-food subsection, titled "Flour, meals, etc." states (p. 455): "Soy bean flour, with or without a high percentage of fat, is used to make bread, biscuits, noodles, mayonnaise, candy, etc."

Chapter 24, "Acid-forming and alkali-forming foods," states: "When foods yielding an acid ash predominate in the diet, a condition of acidosis may result unless the resulting constituents are neutralized with alkaline ash foods."

Next come two lists: (1) "Acid-forming foods, starting with those foods having the least amount of acid-forming ash." The foods with the *most* acid-forming ash are: 1. White bread. 2. Cheese. 3. Meat, chicken. 4. Fish, haddock. 5. Meat, venison. 6. Meat, beef, lean. 7. Meat, veal.

(2) "Alkali-forming foods, starting with those foods having the least amount of alkali-forming ash." The foods with the *most* alkali-forming ash are: 1. Soy bean. 2. Olives. 3. Beans, lima, dried. 4. Linseed oil meal. 5. Spinach. 6. Raisins. 7. Beans, dried. 8. Almonds. Address: 1. PhD, Food Research Chemist; 2. B.S., Consulting Food Chemist and Director of Shirley Labs., New York City.



1241. Hauser, Bengamin Gayelord. 1938. Better eyes without glasses. New York, NY: Tempo Books, Inc. 80 p. Illust. 24 cm. *

• ***Summary:*** A British edition was published in 1941 (London: Faber & Faber).

1242. Hauser's (Mrs.) Food Products Co. 1938. Mrs. Hauser's recipe book: Soya formulas for better nutrition. Los Angeles, California. 32 p. 24 cm.

• ***Summary:*** The cover of this booklet is light blue on beige. Contents: The purpose of this book. The nutritional marvel– *Soy or Soya Beans "Soya max."* Soya Bean high lights. Analysis of Soya Bean Flour. Soy Bean facts. Soya briefs. Hot and cold food stuffs. Eat relaxing alkaline foods. Breathe correctly. Five day efficiency diet. The water we drink. Practical "low carbohydrate" diets. Soups. Drinks. Salad dressing. Bread–biscuits–muffins. Meat substitutes. Recipes to be used when preparing Mrs. Hauser's paste goods. Cakes. Cookies. A good breakfast for health. Desserts. Sandwiches. Miscellaneous (incl. Baked delight {with ground Soya Nuts}, Tofu or Soya Bean Cheese {made from soya milk curded with lemon juice or citric acid}). About vitamins: Vitamin A, B, C, D, E, G. Soya beans are a good source of

© Copyright Soyinfo Center 2021

vitamin G. Foods and their minerals. Soya beans are rich in copper, iron, phosphorus, and calcium. Food which are alkaline: Incl. soya beans.

The types of soyfoods called for in these recipes include: Mrs. Hauser's "Soy" Sauce. "Soy" Brand Elbow Macaroni (p. 18-19). "Soy" Brand Hot Cake and Waffle Flour. "Soy" Brand Macaroni. "Soy" Brand Noodles. "Soy" Brand Spaghetti. Soya bean flour (also called "Soya flour"–by far the most common ingredient called for). Soya bean mush (p. 25). Soya beans (canned or cooked). Soya milk. Soya nuts (p. 15-16). Soya oil.

The booklet ends with these words (p. 32): "A liberal use of the Soya Bean and Soya Bean Products in the average diet is a very distinct aid in the digestion of meats, poultry, fish, and, in fact, all animal foods. (Recipes of this nature will be given in future publications.)"

Note 1. Many of the recipes call for "Mrs. Hauser's Sea Salt." Note 2. Mrs. Hauser is apparently not related to Gayelord Hauser, who is also in the health foods business in Los Angeles. Address: 4617 Melrose Ave., Los Angeles, California.

1243. White, Ellen G. 1938. Counsels on diet and foods: A compilation from the writing of Ellen G. White by the Board of E.G. White Trustees. Takoma Park, DC: Review and Herald Publishing Assoc. 511 p. Index. 17 cm.

• ***Summary:*** The Foreword states: "Early in 1926 there was issued by the Loma Linda college press, a paper-bound volume entitled 'Testimony studies on diet and foods.' This was compiled by Dr. H.M. Walton from the writings of Mrs. E.G. White for use in the College of Medical Evangelists... The continued call for the book... justifies the issuance of this new and enlarged edition."

Quotations from previous writings by a founder of the Seventh-day Adventist faith are arranged by the following subjects: Reasons for reform. Diet and spirituality: The relation of diet to morals. Health reform and the third angel's message. The proper dietary: The original diet, the simple diet, the adequate diet, diet in various countries. Physiology of digestion. Improper eating a cause of disease. Overeating. Control of appetite. Regularity in eating: Number of meals, eating between meals. Fasting. Extremes in diet. Diet during pregnancy. Diet in childhood. Healthful cookery. Health foods and hygienic restaurants. Sanitarium dietary. Diet a rational remedy. Fruits, cereals, and vegetables: Fruits, grains, bread, vegetables. Desserts: Sugar, milk and sugar, pie, cake, pastry, puddings. Condiments, etc.: Spices and condiments,

© Copyright Soyinfo Center 2021

soda and baking powder, salt, pickles and vinegar. Fats: Butter, lard and grease, milk and cream, olives and olive oil. Proteins: Nuts and nut foods, eggs, cheese. Flesh meats (proteins continued): Progressive dietetic reform in Seventh-day Adventist institutions. Beverages: Water drinking, tea and coffee, cereal substitutes for tea and coffee, cider, fruit juice. Teaching health principles: Instruction to be given on health topics, how to present the principles of health reform, cooking schools. Appendix: Personal experience of Ellen G. White as a health reformer, a statement by James White relating to the teaching of health reform. General subject index.

Concerning the consumption of milk, dairy products, and eggs, Ellen G. White stated (year of quotation, number in book): "Fruits, grains, and vegetables, prepared in a simple way, free from spice and grease of all kinds, make, with milk or cream, the most healthful diet. They impart nourishment to the body, and give a power of endurance and a vigor of intellect that are not produced by a stimulating diet" (1890, #601).

"Some, in abstaining from milk, eggs, and butter, have failed to supply the system with proper nourishment, and as a consequence have become weak and unable to work. Thus health reform is brought into disrepute... The time will come when we may have to discard some of the articles of diet we now use, such as milk and cream and eggs; but it is not necessary to bring upon ourselves perplexity by premature and extreme restrictions. Wait until the circumstances demand it, and the Lord prepares the way for it" (1909, #602).

"Milk, eggs, and butter should not be classed with flesh meat. In some cases the use of eggs is beneficial. The time has not come to say that the use of milk and eggs should be wholly discarded. These are poor families whose diet consists largely of bread and milk...

"Let the diet reform be progressive. Let the people be taught how to prepare food without the use of milk or butter. Tell them that the time will soon come when there will be no safety in using eggs, milk, cream, or butter, because of wickedness among men" (1902, #603).

"If milk is to be used, it should be thoroughly sterilized; with this precaution, there is less danger of contracting disease from it" (1905, #607).

"We place no butter on our table. Our vegetables are generally cooked with milk or cream and made very palatable... We think a moderate amount of milk from a healthy cow is not objectionable" (1870, #611).

Concerning the idea that the strictest diet is not the best, especially for the poor, see White's letter of 1901, #612. She feels that all people should stop consuming flesh meats, tea and coffee, but that the subject of giving up milk, eggs, cream, and butter needs to be handled carefully, especially by poor families. "No extremes in health reform are to be advocated. The question of using milk and butter and eggs will work out its own problem."

"The health food business is in need of means and of the active cooperation of our people, that it may accomplish the work it ought to do. Its purpose is to supply the people with food which will take the place of flesh meat, and also milk and butter, which, on account of the diseases of cattle, are becoming more and more objectionable" (1900, #583).

"Large quantities of milk and sugar eaten together are injurious. They impart impurities to the system. Animals from which milk is obtained are not always healthy. They may be diseased... Could we know that animals were in perfect health, I would recommend that people eat flesh meats sooner than large quantities of milk and sugar" (1870, #533). Large amounts of milk and sugar "clog the system, irritate the digestive organs, and affect the brain" (1870, #534). "Especially harmful are the custards and puddings in which milk, eggs, and sugar are the chief ingredients" (1905, #536).

Concerning cheese (made by fermentation): "Cheese is still more objectionable [than butter]; it is wholly unfit for food" (1905, #633).

Concerning vegetarian restaurants: "In our cities interested workers will take hold of various lines of missionary effort. Hygienic restaurants will be established. But with what carefulness should this work be done! Those working in these restaurants should be constantly experimenting, that they may learn how to prepare palatable, healthful foods. Every hygienic restaurant should be a school for the workers connected with it. In the cities this line of work may be done on a much larger scale than in smaller places. But in every place where there is a church and a church school, instruction should be given in regard the preparation of simple health foods for the use of those who wish to live in accordance with the principles of health reform. And in all our missionary fields a similar work can be done (#412, 1900).

"Our Restaurants Stand for Principle: You will need to guard constantly against the introduction of this and that, which, though seemingly harmless, would lead to the sacrifice of principles that should ever be maintained in our restaurant work... We must not expect that those who all their life have indulged appetite will understand how to prepare food that will be at once wholesome, simple and appetizing. This is the science that every sanitarium and health restaurant is to teach...

If the patronage of our restaurants lessens because we refuse to depart from right principles, then let it lessen. We must keep the way of the Lord, through evil report as well as good report.

"I present these things to you in my letters to help you to cleave to the right and to discard that which we cannot bring into our sanitariums and restaurants without sacrificing principle (#413, 1902).

"Avoid Complex Combinations: In all the restaurants in

© Copyright Soyinfo Center 2021

our cities, there is danger that the combination of many foods in the dishes served shall be carried too far. The stomach suffers when so many kinds of food are placed in it at one meal. Simplicity is a part of health reform. There is danger that our work shall cease to merit the name which it has borne.

If we would work for the restoration of health, it is necessary to restrain the appetite, to eat slowly, and only a limited variety at one time. This instruction needs to be repeated frequently. It is not in harmony with the principles of health reform to have so many different dishes at one meal. We must never forget that it is the religious part of the work, the work of providing food for the soul, that is more essential than anything else.

"The Mission of Hygienic Restaurants: It was presented to me that we should not rest satisfied because we have a vegetarian restaurant in Brooklyn, but that others should be established in other sections of the city. The people living in one part of Greater New York do not know what is going on in other parts of that great city. Men and women who eat at the restaurants established in different places will become conscious of an improvement in health. Their confidence once gained, they will be more ready to accept God's special message of truth.

"Wherever medical missionary work is carried on in our large cities, cooking schools should be held; and wherever a strong educational missionary work is in progress, a hygienic restaurant of some sort should be established, which shall give a practical illustration of the proper selection and the healthful preparation of foods" (#416, 1902).

Other entries: Why use secondhand food? "The diet of the animals is vegetables and grains. Must the vegetables be animalized, must they be incorporated into the system of animals, before we get them? Must we obtain our vegetable diet by eating the flesh of dead creatures?" (1896, #703). Note: A revised edition was published in 1946.

Note: This is the earliest English-language document seen (July 2021) that contains the term "health restaurant" (or "health restaurants").

1244. Wrench, G.T. 1938. The wheel of health. London: The C.W. Daniel Co., Ltd. 147 p. Reprinted 1954 by Lee Foundation for Nutritional Research, Milwaukee, Wisconsin. [12+* ref]

• ***Summary:*** An English physician, Dr. Wrench apparently never visited the Hunzas; he wrote this book by reading the writings of those who did visit them. He focuses on the subject of health–rather than sickness–among the Hunzas, a tribe occupying the Kulu Valley, a small valley in Kashmir on the border between India and Tibet. He found them to be among the world's healthiest people, and much of his book examines the reasons for their good health and well-being. He concluded: "Diseases only attack those whose outer circumstances, particularly food, are faulty..."

Contents: Introduction. 1. The Hunza people. 2. A revolution in outlook. 3. The transference of experimental science. 4. The start. 5. Continuity and heredity. 6. Other whole-diet experiments. 7. Fragmentation. 8. The causation of disease. 9. The Hunza food and its cultivation. 10. Progress by recoil. 11. An entire experiment.

Page 141: The author lists twelve points, based on the Hunza way of life, that are essential to good health and physique. These include: Eat wholemeal [whole-wheat] bread and whole foods, eat sprouted grains and beans in the winter and spring, drink more fresh milk, eat green-leafed and root vegetables, and plenty of fruit, eat less meat.

Soya beans are mentioned on p. 145–but in speaking of China. Address: M.D. (London).

1245. Cook, James Henry. 1938? How to run a health food store successfully. Four Oaks, Warwickshire, England: Pitman Health Food Company. 181 p. Undated. 19 cm. *

1246. Photograph of two delivery trucks owned by the Ben Kahan Co., distributors. 1938? Undated.

• ***Summary:*** See next page. This is an undated black-and-white photo (8 by 10 inches) showing these two white delivery trucks, each of a different shape and model, parked in Southern California. On the front door of each truck is written: "Ben Kahan Co., Distributors. Phone AN-19045." On the back side panel of each truck, inside a dark shape like the cross section of a bean, is written: "Bill Bakers Soya Bean Bread." Two palm trees are in the background, behind the trucks.

1247. Photographs of Madison College in Madison, Tennessee. 1938? Undated.

• ***Summary:*** See next 3 pages. These black-and-white prints were sent to Soyfoods Center in 1983 by Ed Bisalski. Most are pasted onto heavy brown cardstock paper in a 3-ring scrapbook, which has a neat, handwritten description of each photo in black ink.

The photos are: (a) A display of Madison Foods featuring Soy-Koff ("coffee flavor without coffee effects, alkaline," 20 cents for 25 cups), Kreme O'Soy Milk ("a pure tasty vegetable milk," plain or chocolate, homogenized, 15 cents or 25 cents) and Kreme'O-Soy Crisps (ready-to-eat, malted soy crumbles, 13 cents or 2 for 25 cents).

(b) "Madison Foods college industry. Bread molding. specializing in the manufacture of soy bean foods–bread, crackers, cereals, flour, cheese, milk, coffee substitute, canned soy beans, meat substitutes. Sold in 48 states–Health Food Stores, Department stores, Specialty Grocers, etc."

(c) Madison Foods plant.

(d) The 400-acre farm provides for the stock [animals], for the college kitchen, sanitarium kitchen, and campus store. A female student in the "Soy bean patch."

1248. Waring Mixer Corporation. 1938? A new 'eye'-dea for completing every mixing job–with fascinating customer appeal and pleasing decorative beauty (leaflet). New York City, New York. 2 panels. Single sided. Each panel: 14 x 22 cm. Undated.

• ***Summary:*** This leaflet is meant to be folded in half like a "tent" display on a table, probably in a bar or restaurant. On one side is a description: "The Waring Mixer does a swell job on your 'regulars' in a new and fascinating and practical way... Imagine reducing whole rings of pineapple to a fluffy, creamy-smooth drink in a few seconds–It's swell with ice (cuts it to snow), a stimulant if you like and ready to serve with NO straining. Thousands of combinations with all kinds of fruit. Then there's the vegetable angle–puree if corn, celery, carrots, spinach, and all through the list. The limits of the Waring Mixer are truly inestimable."

On the other side are two illustrations of the Waring Mixer, one a side view, the other more from the top while it is blending. "The '4 in 1' container... no splashing. Modern design. Modern beauty. Modern performance." Address: 1697 Broadway, New York City.

1249. Hain Pure Foods. 1939. Canned vegetable juice (Ad). *Health News* (*Hollywood, California*). Jan. 27. *

• ***Summary:*** Mentions canned vegetable juice, vegetable cocktail. They must be using a juicer.

Talk with Akasha Richmond. 2004. June 9. Hubert Hansen is said to have started Hansen Juices in 1930.

1250. Bragg (Paul C.). 1939. If you want health, don't miss hearing Paul C. Bragg (Ad). *Washington Post.* Feb. 6. p. 3.

• ***Summary:*** "The man who can bring you health. 8 free health lectures. Learn how to be healthy, live longer and look younger. Feb. 8, 9, 10, 12, 13, 14, 15 & 16. At 8 P.M. Masonic Temple. 13th & New York Ave. N.W., Washington, DC.

"(Sponsored by Health Science Church)."

Note: This ad also appeared in the next day's issue of this newspaper (p. 2).

1251. *Health News* (*Hollywood, California*). 1939. Teaches soy flour use. 7(4):9. Feb. 24.

• ***Summary:*** "Inexpensive menus featuring soy flour have been Mildred Lager's topic at Wednesday afternoon cooking classes, House of Better Living, 1207 W. Sixth, L.A. Attendance has been large."

1252. *Health News* (*Hollywood, California*). 1939. Vegetaria success causes new policy. 7(4):9. Feb. 24.

• ***Summary:*** "Mounting business has made possible a policy change at Los Angeles' Downtown Vegetaria, 343 S. Hill, announces Proprietor Ben Lieberman.

"'Increased volume enables us to serve large portions at extremely low prices now,' he states."

A small ad on the same page shows that this is "A self-service Health dining room. All prices 5¢ to 7¢. Breakfast,

lunch, dinner."

1253. Carqué, Lillian R. 1939. Man alone is out of tune. *Naturopath and Herald of Health* (*New York City*) 44(2):41, 56-57. Feb.
• ***Summary:*** The "entire universe is built on the laws of music or rhythm, for that which is orderly, lawful, good, beautiful, natural and healthy vibrates in unison with the harmonies of the universe and is in alignment with the constructive principle of Nature." "Man alone is out of time."

Discusses the chemistry of white sugar and its very harmful effects on the body. Yet natural sugar cane juice appears to be a healthful food that maintains our vital force.

1254. *Western Baker.* 1939. Presented in honor of the baking industry of the state of California (Photo caption). 34(2):8. Feb.
• ***Summary:*** "The large crowd that attends the opening of the Golden Gate International Exposition on Treasure Island in San Francisco Bay, February 18, and every day thereafter, will see this beautiful cake baked and decorated by Bill Baker, Ojai, California, and presented in honor of the Baking Industry of the State of California. Occupying one of the outstanding positions in the Food Building, this beautiful cake will be seen by the several million who are expected to attend the Fair. The cake is 3½ feet high, 15 feet in circumference, and weighs 1000 pounds. Shown on the top is the San Francisco Bay Region in accurate scale; below are shown the California missions."

Note: Yerba Buena Island is the natural island through which the Bay Bridge now passes. Treasure Island is man-made, constructed around the northern side of Yerba Buena Island during the Great Depression by the New Deal-era WPA. Construction began in Feb. 1936 and was completed in Jan. 1939. It was built for the purpose of hosting the Golden Gate International Exposition to celebrate the engineering marvels achieved by the completion of both the Bay Bridge (Nov. 1936) and the Golden Gate Bridge (May 1937), as well as to acknowledge the ascendancy of California and San Francisco as an economic, political, and cultural force in the increasingly important Pacific region. The Golden Gate International Exposition (GGIE) opened in Feb. 1939. It reopened in May 1940 and eventually closed in Sept. 1940. Throughout this time, the island was adorned with exhibits and works of art and architecture. Its theme was "Pageant of the Pacific."

1255. *New York Times.* 1939. Sights to be seen: Wonders of the world today and preview of tomorrow await the fair visitor. March 5. p. XX3, col. 4.
• ***Summary:*** "Fifty million visitors are expected to attend the New York World's Fair between opening day, April 30, and closing day, Oct. 30." Covering 1,216 acres, the dazzling Fair city has been built in two years at a cost of almost $150 million.

"Florida will have its own pavilion." "In the building's patio will be a fruit juice bar where Florida products will be on sale."

Note: This is the earliest English-language document seen (July 2021) that contains the terms "juice bar," or "fruit juice bar."

1256. Modern Diet Products, Inc. 1939. Swiss Kriss: Herbal laxative (Ad). *Naturopath and Herald of Health* (*New York City*) 44(3):89. March.
• ***Summary:*** A 1/6 page ad. "Swiss Kriss contains: Peppermint leaves, dandelion leaves, licorice root, fennel seeds, senna leaves, caraway seeds, juniper berries, centuary, cyani flowers, parsley, anise seed, strawberry leaves, peach leaves. Free samples on request."

Note: Gayelord Hauser was a founder of this company. Address: 1428 N. 24th St., Milwaukee, Wisconsin.

1257. Sanfords Cafeteria. 1939. Eat for your health (Ad). *Los Angeles Times.* April 2. p. I22.
• ***Summary:*** This small ad states: "Perfect health cooking–all your old favorite foods–with a new taste thrill. Open daily 7 a.m. 'til 8 p.m. Sunday 12 noon 'til 8 p.m. Health food store. Whole wheat bakery. Health juice bar."

Note: This is the earliest document seen (July 2021) that contains the term "Health juice bar." Address: 720 South Hill

St., Los Angeles, California.

1258. *Madison Survey* (*Madison, Tennessee*). 1939. Madison College and Sanitarium. 21(8):29-30. April 19.
• ***Summary:*** This article, appeared in *The Old Hickory News* (15 Dec. 1938), published in the city across the Cumberland River. It features the leading institutions and business concerns at Madison, and begins with some early history of "The Ferguson Farm, old and worn, stretching along the west bank of the Cumberland River at the neck of Neely's Bend, across from and some 12 miles distant from The Hermitage, renowned home of the great Tennessee President of the United States [Andrew Jackson], and ten miles from the heart of Nashville, was nothing more or less than another homestead that had been handed down from father to son for a century–nothing more until it fell into the hands of a group of educators... In 1904 the institution was chartered as Nashville Agricultural Normal Institute." Today it has an enrollment of 350 to 400 students.

"The commercial world probably knows the institution [Madison College] best through the department designated as Madison Foods whose products are handled by health food stores, the health food sections of department stores, specialty grocery stores, delicatessens and restaurants scattered the country over, including such firms as Gimbel Brothers, Milwaukee [Wisconsin]; Cobb, Bates and Yerxa, Boston [Massachusetts]; Martindale's, Philadelphia [Pennsylvania]; and similar well known firms from Michigan to Miami.

"The exploitation of the soybean, a unique health food enterprise, has given wide publicity both foreign and domestic, that without a question places Madison Foods as the outstanding pioneer in the United States in the development of the soybean. Articles concerning this industry have appeared in the *Chicago Journal of Commerce, Food Industries, The Reader's Digest, New York Times, The Los Angeles Herald and Examiner* (*California*), *The Globe and Mail* (*Toronto*), *Physical Culture Magazine,* and many others.

"A concrete fireproof addition to Madison Foods plant is part of the 1939 development plan which is consistent with the growth of the business which has shown an increase of 500 percent in five years. Among the early pledges of Madison Foods, dating back nearly 30 years, was its slogan, 'Devoted to the protection of your health,' symbol of the ideals of the founders."

Madison Sanitarium and Hospital is a 100-bed medical institution having six resident physicians.

1259. Cubbisons. 1939. Cubbisons (Ad). *Los Angeles Times.* April 28. p. B21.
• ***Summary:*** This small ad states: Melba Toast–plain 12¢. Melbetts–white or whole wheat 12¢. Melba Zwieback–(white–whole wheat–cinnamon) 12½¢. Wheat soda crackers–box 09¢. Cookies–assorted varieties bag 10¢. Featured at Ralphs. Note: No address is given.

1260. Live Food Cafeteria. 1939. New book–*Nature the Healer,* by John T. Richter (Ad). *Los Angeles Times.* May 14. p. I22.
• ***Summary:*** "Since 1917." Address: 325 West 3rd St., Los Angeles, California. Phone: MAdison 4061.

1261. Hopper, Hedda. 1939. Screen: Hedda Hopper's Hollywood. *Los Angeles Times.* June 14. p. 12.
• ***Summary:*** Hedda's column begins: "Bengamin Gayelord Hauser, who made spinach fashionable on three continents, has captivated our Greta Garbo. Maybe she read his latest book, 'Eat and Grow Beautiful," which, goodness knows, she doesn't need." Hopper hears she has given up symphonies and Stokowski for Hauser and vegetable juices.

A portrait photo shows Hedda Hopper.

1262. *Newsweek.* 1939. Radio–81 melodious madcaps: Waring's Pennsylvanians reach new peak in 20-year climb. 13(25):40-41. June 19.
• ***Summary:*** Tells the story of Fred Waring's rise to musical success, starting in about 1919. Starting June 19, the 81-piece orchestra and glee club, under a two-year radio broadcasting contract with the Liggett & Myers Tobacco Co., will promote Chesterfield cigarettes five days a week. Fred Waring, a small, dark man with wavy hair and blue eyes, is married and the father of three. His Broadway offices, which occupy an entire floor in the theatrical district of New York City, also serve as the headquarters of two Waring side lines. One of these, "a hobby, has grown into a sizable business. It is the Waring Mixer, an electric churn that will turn you out an ice frappé while you look at it. He has already sold 60,000."

Note: This is the earliest document seen (July 2021) that mentions Fred Waring in connection with the electric blender, or that mentions his "Waring Mixer."

1263. El Molino Mills. 1939. Free! Be sure to ask at your health food store for leaflet–Diet–Soya flour as an admixture–reprint from "American Miller" (Ad). *Health News* (*Hollywood, California*) 7(12):7. June 23.
• ***Summary:*** "Do not miss this instructive article–it has information on Soya flour you cannot afford to miss! Soya flour is used by all leading bakers in Soya bread–nutritious, healthful, non-acid, non-fattening. One fifth to one fourth El Molino Soya Flour can be used in baking bread, cake and cookies, also soya milk, soya cheese, and soya candy. Get your soya recipes at your health food store." Address: 5604 Valley Blvd., Los Angeles, California.

1264. *Time magazine.* 1939. Radio: Fred Waring, Inc. June 26. p. 52-53.

© Copyright Soyinfo Center 2021

• ***Summary:*** Fred Waring, age 39, is a musical businessman, who studied architecture and engineering at Penn State [Pennsylvania State Univ.]. His main business, Fred Waring, Inc., has picked up two subsidiaries, including "a $250,000 venture in an electric drink and food mixer he thought up two years ago. The Waring mixer in its first year and a half sold 60,000, is still going strong." A photo shows Fred Waring with several of his band members.

Note: This article (which is based on a *Newsweek* article of June 19) implies that the Waring mixer was first sold commercially in about Jan. 1938.

Note: This is the earliest English-language document seen (July 2021) that uses the word "mixer" (as a generic term, "an electric drink and food mixer") to refer to an electric blender.

1265. *Los Angeles Times.* 1939. Lunch given new members. June 27. p. A7.
• ***Summary:*** Today's luncheon of the Soroptimist Club will honor new members, including Mildred Lager.

1266. Carqué, Lillian R. 1939. Are we multiplying morons? *Naturopath and Herald of Health* (*New York City*) 44(6):165, 184-87. June.
• ***Summary:*** "Eugenics, the science of breeding better men and women, maintains that if Luther Burbank could breed cactuses without thorns and persimmons without pucker, why can't we breed humans without diseases or criminal tendencies?" Discusses the pros and cons of eugenics.

1267. *House of Better Living* (*Newsletter, Los Angeles*). 1939. Olson's Germ'ako Bread (wheat germ). Something new! (Ad). 9(42):2. June.
• ***Summary:*** "Sliced 12¢ loaf. Makes delicious toast. We also carry the Olson 100% Whole Wheat Breads, Raisin Bran, Raisin Nut and Soy Breads."

1268. Robinson (J.W.) Co. 1939. J.W. Robinson Co. (Ad). *Los Angeles Times.* July 11. p. 11.
• ***Summary:*** In the lower left part of this full-page ad we read: "New! two clever aids for smart homemakers. Whiz-Mix–the electric mixer that whirls food into particles so fine they're liquid. Grand for drinks, desserts and making strained foods for infants–$13.95."

A small illustration shows the Whiz-Mix. The other aid is a Cafex Pyrex glass coffee maker. A similar ad appears in the 28 May 1940 issue of this newspaper (p. 11).

Note 1. This is the earliest English-language document seen (July 2021) that uses the verb "to whirl" ("whirls food into particles so fine") in connection with an electric blender.

Note 2. This is the earliest document seen (July 2021) that mentions the "Whiz-Mix," an early brand of electric blender. Address: Seventh Street at Grand Avenue [Los Angeles]. Phone: MUtual 0333.

1269. *Los Angeles Times.* 1939. Beau peep whispers. July 16. p. D2.
• ***Summary:*** Guests were in for a real surprise when they attended Juanita and Howard Elliott's party on Sunday afternoon. When they arrived at 5:00 "they found Howard enthroned behind a counter labeled 'Health Bar' and ladling forth only the most healthful of beverages. Even the town's highest fliers surrounded raw vegetable hors d'oeuvres and quarts of carrot, pineapple, or watercress juice."

A portrait photo shows Mrs. Howard Elliott.

1270. Bragg, Paul C. 1939. Paul C. Bragg wins right to lecture in Kansas City (Letter to the editor). *Naturopath and Herald of Health* (*New York City*) 44(7):219, 223. July.
• ***Summary:*** Bragg sent his manager, Mr. J.W. Dickensen, to Kansas City to prepare for his lecture series. They rented the biggest hall in town, the Ivanhoe Masonic Temple, and advertised using newspapers, radio, street-cars, etc. But when he went to get a City license, which is required for lectures in this city, he was "turned down cold." "But you know me and how I feel about this natural living." So Bragg decided to buck the city's powerful political machine, consisting of the white bread interests, the druggists, etc. He went to court and got a license, then enrolled a class of some people in Kansas City.

Speaking to Dr. Benedict Lust: "I thought this would be of special interest to you as you have made such a valiant fight all your life. I just wanted you to know that some of the younger fellows out in the field were making their fight also."

1271. *Health News* (*Hollywood, California*). 1939. National directory: Distributors, wholesalers. Rates upon request. Aug. 11. p. 8.

• ***Summary:*** "We are authorized dealers for: Battle Creek Food Co., Loma Linda Food Co., Seibert's, Hollywood, Carque.

"And many other standard brands of Health Foods.

We sell Bill Baker's genuine Soy Bean Bread and Pancake Flour.

"Fresh raw vegetable juice made every day.

"We co-operate with your doctor in your Diet Requirements. We help you to build and maintain perfect health by right eating.

"We will be glad to have you call at our store for Free Samples and Literature."

1280. Irvine, Clarke. 1939. Guest editorial: Health teaching bearing fruit. *Nature's Path* (*New York City*). Sept. p. 331.
• ***Summary:*** Irvine has watched with satisfaction for more than a decade as the child known as "Better Living" has been growing. Ideas such as "vitamines," diets, good foods, and care of the body are becoming more popular. "This is an excellent indication that our infant, the Health Movement, is getting out of its swaddling clothes; is preparing to take the nation by storm. for everywhere there is a seething, restless urge on the part of the long-suffering public, to arise, to eat, to live!" Hopefully those who suffer ill-health will "become enlightened and change their awful food habits..." Perhaps American will "lead the entire world out of its morass of dietary darkness..." A portrait photo shows Clarke Irvine. Address: Editor, "Health News," Hollywood, California.

1281. Lust's Health Food Bakery, Inc. 1939. Demand Baker-Lust pure natural–unroasted Almond Butter (Ad). *Nature's Path* (*New York City*). Sept. p. 359.
• ***Summary:*** "Demand the original Baker-Lust Almond Butter from your health food dealer or send for a liberal sample jar postpaid 35¢. All sizes: 4 oz., 10 oz. jars; 1 lb., 2 lbs., 10 lbs., cans at reduced prices." Address: 309 East 56th St., New York City, Neew York.

1282. **Product Name:** Malto-Soy Drink (Tea or Coffee Substitute).
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1939 September.
Ingredients: Incl. roasted and ground soybeans, chicory.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1939. Sept. p. 20 and Oct. p. 13. "Malto-Soy Drink. The improved natural drink. Replace your tea and coffee with Malto-Soy Drink, the 100% Protective Drink. There is no better drink for your morning cup than Malto-Soy Drink. Ladies enjoy it for their afternoon refresher drink. Combine Malto-Soy Drink with wholemeal bread, Glumatose and cream. You will be delighted with the result.–Never be without Malto-Soy Drink. Obtainable at all F.G. Roberts' Health Food Stores."

Ad in *Nature's Path to Health.* 1940. Feb. p. 44. This ad for Malto-Soy Drink now uses the illustration formerly used with Soy-Bev. An illustration (line drawing) shows a man and woman seated in chairs by their fireplace each enjoying a cup of Malto-Soy Drink. Below this is a steaming cup of

Malto-Soy Drink.

1283. **Product Name:** Soy Milk Compound (Renamed Soy Compound in 1981).
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1939 September.
Ingredients: Incl. soybeans, lactose.
Wt/Vol., Packaging, Price: Tin-plated steel can.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1939. Sept. p. 27 and Oct. p. 13. "Soy Milk Compound. Contains natural lecithin and amino acids. This milk compound is a hormone building food and therefore can be used by children and adults with most beneficial results. Soy-Milk Compound is highly recommended for infant feeding. For those who cannot use cow's milk Soy-Milk Compound proves eminently satisfactory. Use Soy-Milk Compound daily either with hot or cold milk. Drink Soy-Milk Compound and strengthen the brain by Lecithin contained in this Defensive Food. Obtainable at all F.G. Roberts' Health Food Stores. Addresses, Page 47." Same ad in the following 1940 issues: Feb. p. 38, March p. 30, April p. 16.

Information brochure sent by Paul Smith of Soy Products of Australia. 1995. March 10. "Soy Products of Australia Pty. Ltd. evolved from F.G. Roberts' interest in using soy as an alternative to milk in treating allergy problems, particularly in children. The soy component of Soy Compound [soy flour] was imported between the 1930s and 1950s. Since 1954 Roberts' soy flours and grits have been manufactured in Australia from Australian grow soybeans... Soy Compound was formulated in the early 1930s as a result of F.G. Roberts' combined interest in the work of Dr. Harry Willis Miller with soy milk and children in China, during the 1920s and 1930s, and in treating cow's milk allergy problems–eczema, colic, mucus and related infection problems–particularly in children... Lactose is used in Soy Compound because it is a valuable, naturally occurring, complex carbohydrate present in the milks of all suckling mammals from human beings to whales and dolphins."

Note from Paul Smith of Soy Products of Australia (Pte.) Ltd. 1995. March 14. Paul thinks Soy Milk Compound was first introduced in about 1933-34.

1284. Kahan, Ben. 1939. Re: Ben Kahan agrees to buy the route, merchandise, and equipment of Irving Kahan. Letter of agreement signed by Irving Kahan (seller) and Ben Kahan (buyer), Oct. 2. 1 p. Typed, with signature on letterhead.
• ***Summary:*** The letterhead of the Ben Kahan Co. states: "Distributors of Bill Bakers Soya Bean Products, Ayers & Held Quality Dried Fruits." The agreement begins: "I,

Irving Kahan, here after known as the seller agree to sell and convey? my route, merchandise, and equipment in consideration of $605.75... to Ben Kahan, hereinafter known as the buyer."

"2. Equipment shall consist of 1934 Dodge panel truck. 3. List of stores attached hereto. 4. Merchandise sold to consist of all merchandise on truck as of this date." Witness: M. Gerston.

Note: This is the earliest document seen (July 2021) concerning Ben Kahan or Kahan & Lessin Co. Address: 1940 Bailey Street, Los Angeles, California.

1285. *Los Angeles Times.* 1939. Tattletale. Oct. 8. p. D8.
• ***Summary:*** Frey Brown gave a dinner and dancing party not long ago at the Victor Hugo to honor June Preissner and her sister, Mrs. David Hopkins. "Other guests were Dr. [sic] Gaylord [sic, Gayelord] Hauser and Edna and John Torrence."

1286. *Health News* (*Hollywood, California*). 1939. Cooperation with doctors brings new recognition to Bill Baker. Oct. 13. p. 15.
• ***Summary:*** Bill Baker "has just won new recognition that indicates a surge of popularity for his products in Oakland and the Bay region [San Francisco Bay Area] generally. The Medical Association there has recognized his good work by admitting his advertisement into its restricted Medical Supplement of the *Oakland Tribune* Sept. 28.

"'When I started baking lima and soya bean breads 15 years ago, I was opposed on all sides and put in a class called food fakers,' says Baker commenting on the new honor. 'All these years I have worked with untiring effort to prove the value of the bean breads in the human diet. My sincerity has kept me producing the best quality and for this reason I have been able to hold up in business. Hundreds of cheap imitators have made inferior cheap breads with the result that they had to quit. Hundreds of unsolicited letters have come from grateful people all over the country telling me of benefits derived from my breads. Doctors and dietitians have been successfully using my products for years and praise my work... Medical recognition of soya and lima bean breads is expected to influence many to try them who hitherto have hesitated, and important health benefits are considered likely.'"

next to the front of his Graham automobile and holding a copy of *Health News.*

1287. Baker's (Bill) Products. 1939. Another triumph–A new zweiback toast (Ad). *California Health News* (*Hollywood, California*). Oct. 27. p. 16? or 13? or 12?
• ***Summary:*** A photo shows a loaf of Bill Baker's original Soy Bean Toast. Address: Ojai, California.

1288. Lager, Mildred. 1939. The march of progress. *House of Better Living* (*Newsletter, Los Angeles*) 10(46):1. Oct.
• ***Summary:*** "I was one of the speakers at the recent Health Food Dealers convention in Chicago [Illinois]. I went back there and had my eyes opened. We are apt to think that California ranks tops as to interest in the food field, but I think others are right up there with us. There is a tremendous interest all over the United States. The East Coast is wide awake–so is Washington, DC; the mid-west and even parts of the south." Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1289. Chapman, James. 1939. San Francisco Bay and central California. *Health News* (*Hollywood, California*) 7(22):6. Nov. 24.
• ***Summary:*** This half-page column contains many news shorts related to health foods in San Francisco, Oakland, Sacramento, Berkeley, etc. For example: "Denis enlarges building. Oakland, California.–John Denis, Jr., operating the Food Mill, with Charles, his father, 3033 Hopkins, is building an addition in the rear of their attractive establishment for warehouse, juicing machines, and cereal mills. Above will be an apartment. He reports splendid results with mimeoed bulletins. They have been five years on the street [i.e., since ca. 1934] and one year at this new location."

In the section are 4 ads: (1) Sunshine Health Food Store, 1345 Fillmore St., San Francisco. F.A. O'Marzu, proprietor. (2) Oakland Health Food Store, 1741 Telegraph, and San Francisco Health Food Store, 415 Sutter St. Wholewheat bakery. (3) Ruth's, 333 Sutter, San Francisco. Store, Health cocktail bar, cafeteria, bakery products, Write for free 64-page catalog. (4) Rosenberg's original health food store, 1120 Market St. (opposite 7th St.). Send for free 72-page catalog. Address: Correspondent, P.O. Box 1329, San Francisco.

1290. Chapman, James. 1939. Denis enlarges building. *Health News* (*Hollywood, California*) 7(22):6. Nov. 24.
• ***Summary:*** "Oakland, California–John Denis, Jr., operating the Food Mill, with Charles, his father, 3333 Hopkins, is building an addition in the rear of their attractive establishment for warehouse, juicing machines, and cereal mills. Above will be an apartment. He reports splendid results with mimeod [mimeographed] bulletins. They have been five years on the street, one year at this new location. Business is increasing steadily."

1291. *Health News* (*Hollywood, California*). 1939. Madison foods feast. 7(22):8. Nov. 24.
• ***Summary:*** "*Los Angeles*–E.M. Bisalski of Madison Foods [Tennessee] sponsored a big dinner for local dealers at Sanfords, November 14, featuring his company's products.

"The purpose was to introduce Milo Frank as California distributor of their foods.

"The turnout, large, enthusiastic, included about 100 dealers. The meal was delicious. Barney Edelman, Sanfords manager, was chairman.

"Bisalski praised local and national dealers' organizations, urged scientific food study, praised Edelman's cooperative attitude. Clarke Irvine, *Health News* publisher, and Mildred Lager, local dealers' president, also voiced optimism for progress through cooperation."

1292. *Health News* (*Hollywood, California*). 1939. Food dealers dine at Sanfords Dec. 1. 7(22):8. Nov. 24.
• ***Summary:*** "Los Angeles–Members of the local Health Food Dealers' Association plan a dinner at Sanfords cafeteria, 720 S. Hill, Friday, December 1, at 8 p.m., announces Mildred Lager, president. 'This will be purely a social, not business, gathering,' she states. 'There will be an excellent speaker with a message important to every dealer in Southern California.' The association is working on a twofold program: to educate the public through radio and food shows, and to train dealers to improve merchandising methods."

1293. Lager, Mildred. 1939. Better living: Agar, dulse, Irish moss. *Health News* (*Hollywood, California*). Nov. 24. p. 6.
• ***Summary:*** This small column is 5¼ column inches. Address: Teacher and Director, House of Better Living, 1207 W. 6th, Los Angeles.

1294. Natural Foods Institute. 1939. Know the joy of vigorous health: Vita-Mix, revolutionary new food liquefier (Ad). *Health News* (*Hollywood, California*). Nov. 24. p. 6.
• ***Summary:*** "Stop over-taxing your digestive organs and poisoning your system with the wrong foods. Be alive, vibrant, vigorous. Drop carrots, lettuce, spinach, celery, tomatoes peppers–all vegetables, into the quart-size bowl of the Vita-Mix and you'll actually be drinking these same vegetables in less than three minutes. Vita-Mix makes the finest drinks, soups and raw apple sauce in three minutes.

"Vita-Mix is powerful and fast. It mixes, chops, whips, liquefies. Stainless steel blades. Two-speed motor. Chrome plated base. Heavy clear glass bowl. Guaranteed for one year."

"Free: W.G. Barnard's 40p. book, 'Health Via the Carrot and Other Fruits and Vegetables' [published ca. 1939

by Natural Foods Institute, Cleveland, Ohio]. Explains the therapeutic value of fruits and vegetables in the care of constipation, arthritis, kidney trouble, ulcers, hyper-acidity, high and low blood pressure, sinus trouble and other diseases."

A photo shows the Vita-Mix and a lady drinking a glass of juice. Note 1. This is the earliest document seen (July 2021) that mentions the "Vita-Mix," an early brand of electric blender.

Note 3. This is the earliest English-language document seen (July 2021) that uses the verb "to chop" ("it... chops"), or the verb "to whip" ("it... whips") in connection with an electric blender. Address: 807-F St. Clair Ave., Cleveland, Ohio.

1295. May Company (The). 1939. Home-y gifts spread Christmas joy over years (Ad). *Los Angeles Times.* Nov. 30. p. 10.
• ***Summary:*** Near the bottom of this full-page ad is a small but clear illustration of an electric blender (it has no brand name) with this caption: "Pictured right–If you've heard Fred Waring over the radio you know all about this almost magic blender and liquefier. $19.95."

Note: This is the earliest document seen (July 2021) that mentions Fred Waring or that uses the word "blender" or the word "liquefier" (generically, without the first letter capitalized) in connection with an electric blender. Apparently Fred Waring promoted this blender by radio. In a careful comparison of this illustration with two illustrations of the "Waring Mixer" from the year 1938, all three appear to be identical in shape and design. Address: Broadway, Eighth and Hill, Wilshire at Fairfax [Los Angeles, California].

1296. Davis, Adelle. 1939. You can stay well. Los Angeles, California: Published by the author. 317 p. First printing, Nov. 1939. Index. 33 cm. [208 ref]
• ***Summary:*** One of her early books, written as a dialogue in storybook fashion, made her the Queen of the health food movement.

The 36 chapters are short, with scientific references at the end of most, and have titles such as "3. It can be done. 4. No women admitted. 5. As good as your food. 6. Extravagance. 7. Humility. 8. Misconceptions. 9. Don't keep them. 10. Dangerous. 11. Rhyme without reason." Soy is not mentioned.

Murray (1984, p. 20) notes: "But the biggest boom, and perhaps the most long lasting was the Adelle Davis books that brought people to the health food stores in droves for natural vitamins and supplements."

Note: Adelle Davis was the pen name of Mrs. George E. Leisey. Address: A.B., M.S., Consulting nutritionist, 2606 West Adams Gardens, Los Angeles, California.

1297. *Bakers' Helper* (*Chicago, Illinois*). 1939. "Bill" Baker is honored by fair officials. 72(897):1004. Dec. 9.
• ***Summary:*** The 1,000 lb fruit cake that Bill Baker baked and decorated, then donated to the Golden Gate Exposition in San Francisco "in honor of the baking industry" attracted great attention. On 29 Oct. 1939, the day the fair officially closed, "Mr. Baker was surprised to receive the handsome parchment scroll reproduced on this page, a beautiful color memorial signed by the President of the Fair.

The fruit cake was dismantled and cut and served to several thousand people on Thursday afternoon, Oct. 19. Many people saved parts of the decorations as souvenirs.

The handsome scroll contains illustrations of the Earth and sun, a skyscraper, the Golden Gate Bridge, and several sailing ships. The text on the scroll reads: "Bill Baker. 1939. A pageant of the Pacific. Golden Gate International Exposition on San Francisco Bay–on Treasure Island. In Appreciation of Your Generous Services to the Exposition. Lima and Soya Bean Bakery, Ojai, California."

1298. Parsons, Louella O. 1939. Close-ups and long-shots of the motion picture scene. *Washington Post.* Dec. 21. p. 12.
• ***Summary:*** Ran into Gaylord [sic, Gayelord] Hauser and Frey Brown. Wonder if Greta Garbo is coming on? "Hauser didn't mention her and neither did I, but I still say he gave her a diamond engagement ring."

1299. Gehman, Jesse Mercer. 1939. Health: The trend of national food producers' advertising. *Naturopath and Herald of Health* (*New York City*) 44(12):364, 374. Dec.
• ***Summary:*** It is gratifying to see that makers of top quality health foods are "beginning to put the health appeal first in their advertising." Such foods include lemons, oranges, and grapefruits.

1300. **Product Name:** Cheze-O-Soy (Seasoned Tofu. Sometimes Advertised as Soy Cheese, or spelled Chez-O-Soy or Ches-O-Zoy after 1953).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1939.
Ingredients: Coagulated soybean proteins, seasonings.
Wt/Vol., Packaging, Price: No. 2 can. 20 oz.
How Stored: Shelf stable.
Nutrition: Protein 26.7%, fat 10.8%, carbohydrates 0.12%, ash 0.71%, calories 204/100 gm.
New Product–Documentation: Ad in *House of Better Living.* 1940. May. p. 4. "Soy Cheese." Madison Health Messenger. V. 49-2. p. 5.

Madison Health Messenger. 1949. V. 49-2. p. 5. "Chese-O-Soy–a curd made from soybean milk, to be used in salads, sandwiches, spaghetti, etc. Ingredients: coagulated soybean proteins [tofu], seasonings. 14 & 20 oz. cans."

William C. Sandborn. 1953. *The History of Madison*

© Copyright Soyinfo Center 2021

College (PhD thesis, George Peabody College for Teachers, Tennessee). p. 124 states that Ches-O-Zoy is made at the Madison food factory.

Soybean Blue Book. 1954. p. 106. Spelled Chez-O-Soy from 1954 on. Address: Madison College, Tennessee. Also listed in 1965, but business name is now Nutrition International Corp, Box 415, Madison, TN 37115. Last listing was 1972. Letter from Sam Yoshimura. 1981. Feb. 20. Contained 26.7% protein.

Note: This is the earliest known seasoned or flavored tofu product sold in the Western world.

1301. **Product Name:** Not-Meat (Smooth-Textured Loaf for Meatless Entrees or Sandwiches or Salads).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1939.
Ingredients: Whole peanut meal, soy flour, seasonings.
Wt/Vol., Packaging, Price: No. 2 can. 20 oz. Also 14 oz.
How Stored: Shelf stable.
Nutrition: Protein 13.4%, fat 19.2%, carbohydrates 5.4%, ash 2.1%, calories 248/100 gm.
New Product–Documentation: Mildred Lager. 1940. *Madison Health Messenger* (Madison, Tennessee) 2(3):1-4. "Foods for summer health." Not-Meat is made with unroasted peanut meal and seasoning.

Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1941. July. p. 273. "A treat without meat." Not-Meat is one of five basic food products made and sold by Madison Foods.

Madison Health Messenger. 1949. V. 49-2. p. 5. "Not-Meat–a smooth-textured loaf for vegetable roasts, salads, sandwiches, etc. Ingredients: whole peanut meal, soy beans, and seasonings. 14 & 20 oz. cans."

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 161. Lists the ingredients in "Not-Meat (Nutrition International Corporation)." They are: Peanuts, processed soybeans, yeast extract, salt, hydrolyzed vegetable protein. Note: By 1971 Nutrition International Corp. had become part of Worthington Foods. The plant at Madison had been closed in Aug. 1970.

1302. **Product Name:** Stake-Lets (Meatless Meat Loaf in a Rich Meatlike Sauce) [Sliced, or Bite-Size].
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1939.
Ingredients: Gluten, soybeans, soy sauce, seasonings. In 1960 the ingredients were gluten, whole wheat, soy flour.
Wt/Vol., Packaging, Price: No. 2 can. 20 oz.
How Stored: Shelf stable.
Nutrition: Protein 18.2%, fat 4.3%, carbohydrates 2.1%, ash 0.5%, calories 120/100 gm.
New Product–Documentation: Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1941. July. p. 273. "A treat without meat." Stake-Lets is one of five basic food products made and sold by Madison Foods.

Madison Health Messenger. V. 49-2. p. 5. Taylor. 1944. The Soy Cook Book. p. 201.

Madison Health Messenger. 1949. V. 49-3. p. 2, 5. "A photo shows a front of the can's label. "Now you can get Stake-Lets in the 14, 20, and 30 ounce sizes.

"Madison Stake-Lets are tender and so meat-like you'll wonder how it is possible to make them so meaty in flavor without any animal products. And they are so easy to prepare. No fussing or waiting–just open the can, dip them in egg batter and crumbs or potato meal and brown in a well oiled pan. If you want gravy make this with the sauce remaining in the can the same as you would a brown beef gravy. If not, save the remaining sauce for soup flavoring.

"This Is the Original Gluten-Soy Stake-Let. A Complete Protein Food. Costs No More."

Page 5: "Stake-Lets–a combination of gluten and soybeans sliced in meatlike sauce. Ingredients: gluten, soybeans, soy sauce, seasonings. 14, 20 & 30 oz. cans."

Page 5: "Bite-Size Stake-Lets–gluten and soy bits in rich sauce simulating stewed bits of beef in rich gravy. A choice food. 20 oz. cans. A statement of ingredients, use and recipes is on each package and can of Madison Foods."

1303. **Product Name:** Proast (Meatless Gluten-Based Meatloaf).
Manufacturer's Name: Special Foods, Inc. Renamed Worthington Foods, Inc. in Dec. 1945.
Manufacturer's Address: Worthington, Ohio.
Date of Introduction: 1939.
Wt/Vol., Packaging, Price: 8 oz, 17 oz, and 30 oz can.
How Stored: Shelf stable.
New Product–Documentation: Wholesale price list. 1941. Oct. 1. 8 oz retails for $0.20 and 30 oz for $0.55. This dark gluten-based meatloaf analogue, made with wheat gluten, peanuts, and a little defatted soy grits or flakes, resembled Battle Creek's Protose.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual.* 1st ed. p. 95. Proast contains 25.40% protein, 8.88% fat, and 9.28% carbohydrate. *Chopletter* (Worthington Foods, Ohio). 1960. "What you should know about Worthington Foods." April, p. 3. The Kosher certification on 11 Worthington products has been in effect since 1 July 1959. These products are both Kosher and Pareve (neutral). Foods bearing the Kosher label include Proast.

Note: This is the earliest known food product made by Special Foods, Inc. It is also their earliest known products that uses wheat gluten as a major ingredient or soy (soy flour) as a minor ingredient.

1304. Baker, Charles H., Jr. 1939. The gentleman's companion. 2 vols. New York, New York: The Dairydale Press. Index. 25 cm.

• ***Summary:*** Vol. 1 is titled *Being an Exotic Cookery Book or around the World with a Knife, Fork and Spoon.* A section titled "Heaven's gift to the amateur chef–the Waring Mixer" (p. 8-11) begins: "The world is so full of indirect commercialism in these civilized days that many publishers of standing actually hesitate to mention a thing of merit by name, for fear of being thought a sponsor with a material interest in the item involved... We debated the question... and have decided to speak our own mind without fear. Certainly no one hesitates extolling genius in Alexander Graham Bell, Simeon Lake, or Dr. Alexis Carrell, for their telephones, submarines and antiseptics, and we fail to see why Mr. Fred Waring should be ignored in these pages when his contribution to food and drink preparation is just as vital in its own special way... Mr. Waring has always appeared to us a gentleman, a scholar, and probably the best golfer in modern musical circles... Mr. Waring proved himself a still more able citizen by pouncing on an invention designed primarily to agitate fluids and ice–with a nicely controlled violence and centripetal activity which does things in sixty seconds to a New Orleans Fizz which it took Mr. Ramos' six or eight active bartenders five or six minutes of progressive effort and fatigue to produce.

Vol. 2. Being an exotic drinking book.

"But what it was able to do to food was something we wager even its parent never dreamed of from the start. For reducing green groceries such as spinach, carrots, celery and the like, to health-giving pulps or vitamin drinks for the aged and young, it has nor peer. For purees or any fine blending it is a pearl beyond price.

"Wherever our antique English or French cookery books coyly say, 'Rub through sieve,' or 'Pound fine in a mortar,' we turn a superior shoulder and toss the whole assembly in the Waring Mixer, and presto, the job is done..." In recipes throughout this book, the Waring Mixer is referred to as *The Mixer* (e.g., in the recipe for Black Bean Soup, Barranquilla, Colombia, p. 36-37). "And those who read, mark, learn and inwardly digest its uses will call us thrice blessed for time and labour saved, entirely aside from any mechanical thoroughness in the job it does."

In vol. 2, titled *Being an Exotic Drinking Book...* the author pays homage to Fred Waring and his "Waring Mixer" because of drinks such as the "new style Daiquiri." "Just as in the volume on cookery, we again remind our readers that a decent electric mixer is just as necessary on any well-equipped bar these days as a horse in a stable. "As explained before, we do not even know Mr. Waring, but we like his music and his Mixer. It is fairly expensive but is assembled from as fine materials as man can make–to give hard professional service; to last." There will probably be imitative, cheaper electric mixers... For cooling Daiquiris, gin fizzes, making grenadine juice from pomegranates, for a dozen and one unexpected uses, we find this deft gadget indispensable." Again, in recipes, it is referred to simply as "The Mixer."

Note 1. None of the following words or terms appears in this book: "Blendor," "blendor," "blender," "Waring Blendor," "Waring Blender."

Note 2. There are two recipes for "Tiger's Milk," both dated from Peking, 1931, and a third dated from Bangkok, Siam, in 1932 (p. 129-31).

Note 3. This is the earliest English-language document seen (July 2021) that uses the verb "to blend" ("fine blending") or the noun "puree" (or "purees"–"For purees or any fine blending...") in connection with an electric blender ("the Waring Mixer"). Address: World traveler.

1305. *Federal Trade Commission Decisions: Findings, Orders, and Stipulations* (*USA, GPO*). 1939. 02087. Food products–Qualities, composition, and medical indorsements. Mildred Lager, an individual trading as House of Better Living... 26:1456-57.

• ***Summary:*** "... 1207 West Sixth St., Los Angeles, California, vendor-advertiser, was engaged in selling food products designated Vegeminerals and Oil of Garlic, and agreed in soliciting the sale of and selling said products in interstate commerce to cease and desist representing directly or otherwise:

"(a) That Vegeminerals constitute a dietary treatment for anemia, malnutrition, run-down condition, arthritis, nerve or blood disorders;

"(b) That Vegeminerals are 'new ideas in health';

"(c) That all the properties in 52 fruits and vegetables are found in Vegeminerals, or that Vegeminerals contain any number of vegetables or fruits in excess of those actually included in the formulas;

"(d) That the use of Vegeminerals #3 is an aid in the treatment of colitis or is a dependable remedy for constipation, or the best remedy for constipation, or that the okra contained therein 'will aid in "overcoming" constipation';

"(e) That the system cannot utilize vitamins unless they are taken with minerals;

"(f) That Vegeminerals supply 'ample' phosphorous metabolism;

"(g) That Oil of Garlic is the best aid for high blood pressure;

"(h) That doctors advise or prescribe Oil of Garlic Capsules to ward off colds;

"(i) That garlic is an intestinal antiseptic or normalizes the system, or is the latest discovery of science for this purpose;

"(j) That garlic is an excellent source of organic sulphur, or combats colon troubles, or that garlic is a competent treatment for arthritis;

"(k) That doctors are getting 'surprising results' with Oil of Garlic, or that doctors say one should use them for 'all colon troubles';

"(l) That Oil of Garlic will 'keep the colon the way it should be.' (March 28, 1938)."

1306. Hauser, Bengamin Gayelord. 1939. Hauser diet highlights. New York, NY: Tempo Books, Inc. 34 + [6] p. No index. 13 cm. *

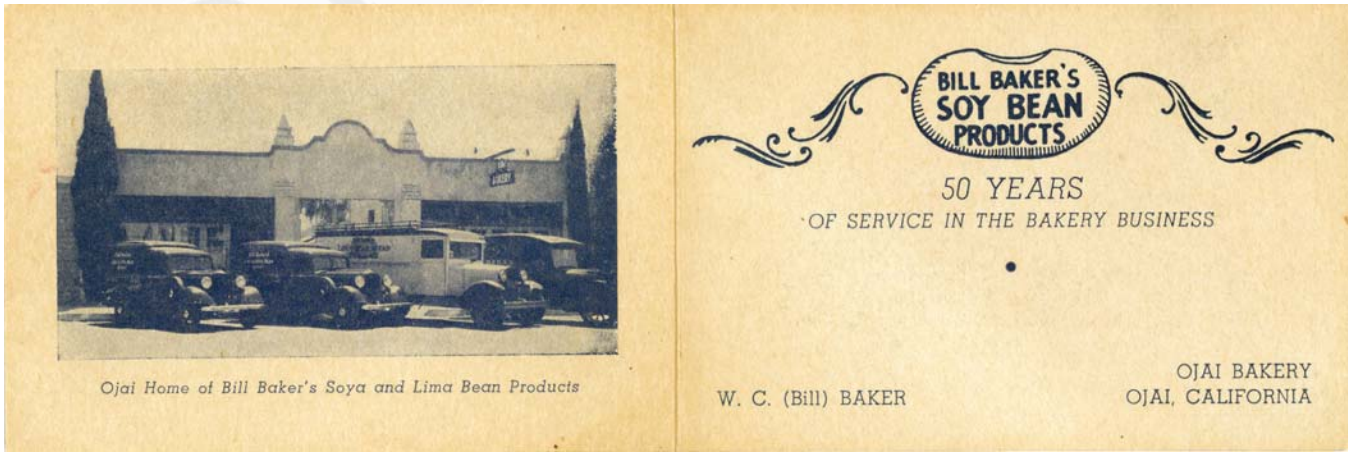
1307. Ojai Bakery. 1939? Bill Baker's Soy Bean Products (Business card). Ojai, California. 4 panels. Undated. Front and back. Each panel 6.5 x 9.5 cm.
• ***Summary:*** The front and back panels consist of two 1939 awards. The front is all fancy text and designs in beautiful gold and navy blue: "For Distinguished Service to the Baking Industry–W.C. "Bill" Baker, Ojai, California–is hereby declared an Honorary Life Member of the Retail Bakers Council of Northern California." Signed, A.B. Hughes, President. "March 7, 1939."

The back is largely an illustration showing a globe of the Earth and prominent San Francisco landmarks. On a meandering ribbon-like scroll we read: "Bill Baker–1939. A pageant of the Pacific. Golden Gate International Exposition on San Francisco Bay–on Treasure Island." On a square scroll in the lower left corner: "In appreciation of your generous service to the Exposition." On a horizontal scroll below the illustration: "Lima and Soya Bean Bakery, Ojai, California." The typeset caption below that: "Reproduction of a Scroll of Merit presented to the Ojai Bakery by the Golden Gate International Exposition, 1939."

The inside right panel shows the title (above) in bold letters inside a soybean, with symmetrical designs on both sides. Below that in large letters: "50 Years of Service in the Bakery Business." Across the bottom: W.C. (Bill) Baker. Ojai Bakery, Ojai, California. Note: This shows that he had been a baker since 1889.

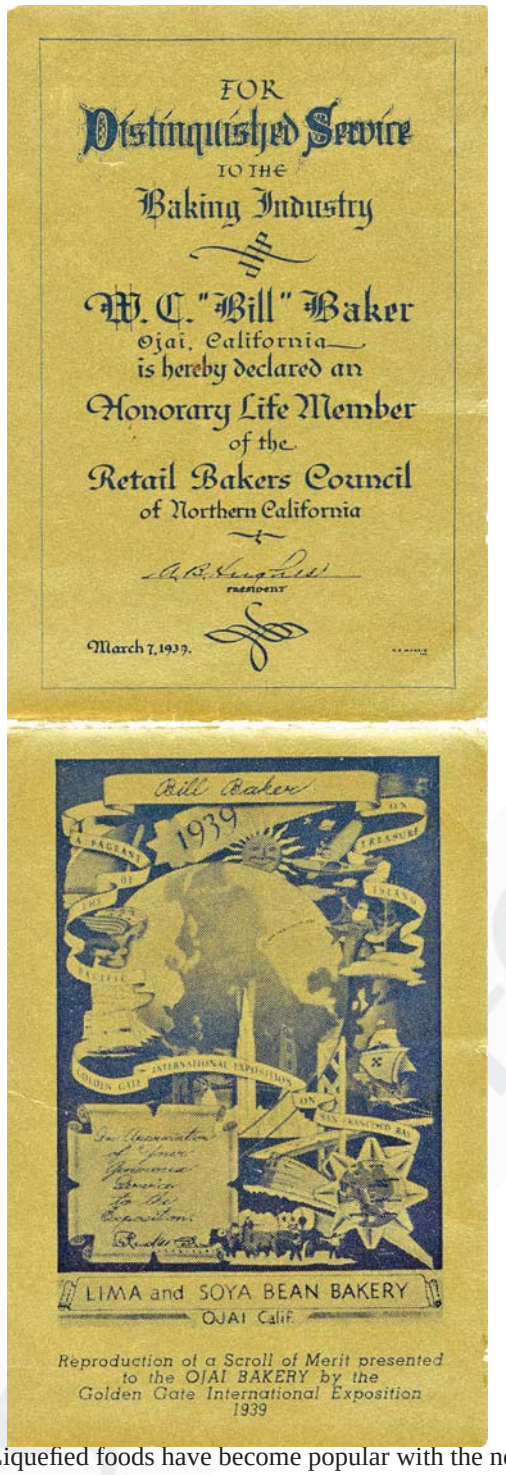
The inside left panel shows 4 delivery trucks parked in front of the Ojai Bakery. The caption reads: "Ojai home of Bill Baker's Soya and Lima Bean Products." Address: Ojai, California.

1308. Photograph of four delivery trucks owned by the Ben Kahan Co., distributors. 1939? Undated.
• ***Summary:*** This is a photocopy of an undated black-and-white photo (8 by 10 inches) showing these four delivery trucks parked outside a building that looks like a warehouse. On the side panel and door of each truck is the company name and phone number.



1309. Photograph of four delivery trucks owned by the Bill Baker of Ojai. 1939? Undated.
• ***Summary:*** This is a photocopy of an undated black-and-white photo (3 by 5 inches) showing these four delivery trucks parked outside a building with a tile roof. A driver is standing on the road next to each truck. On the side of the first truck is written: "Bill Baker's Soya Bean Bread."

1310. Ralphs Grocery Co. 1940. Nationally known products displayed in Ralphs mammoth free food show (Ad). *Los Angeles Times.* Jan. 26. p. B17.
• ***Summary:*** This full-page ad states across the top: "The following nationally known food products and manufacturers will be represented in the food show and demonstrations to be staged as a feature of the opening of Ralphs newest store at the corner of Exposition and Crenshaw Blvds..."



Includes: Battle Creek Health Foods... Cubbison's Cracker Co. Products... Ficgo [coffee substitute] Hollywood Cup Coffee... Loma Linda Foods Co. Address: [California].

1311. Lager, Mildred. 1940. Healthful philosophy. *House of Better Living* (*Newsletter, Los Angeles*) 11(49):2. Jan.
• ***Summary:*** New items include "Canned Soy Cheese. Soyburger. Full line of Madison Foods."

"We carry liquefiers at four different prices: $29.95, $19.95, $14.95 and "13.95." Contains a recipe for Carrot soy milk. Ingredients: 1 cup carrot juice, add 1 tbsp. soy flour or milk powder, 1 tsp honey or plain Joyana.

© Copyright Soyinfo Center 2021

"Liquefied foods have become popular with the new electric mixers. They are fine and a boon to the person with poor assimilation and digestion..." A number of combinations are given, all starting with fruit juice. "Soy flour or soy milk powder may be added to juice or broth for soy milk drinks." A portrait photo shows Mildred Lager.

Note 1. A section titled "Soyburgers" on p. 4 explains that the Soyburger and Canned Soy Cheese mentioned above are both made by Madison Foods of Tennessee. Separately, soy chocolate is mentioned.

Note 2. A small ad on p. 3 is for waffles: Soy wheat-wheat germ. Soy corn (contains no wheat). Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1312. **Product Name:** Wheatasoy (Ready-to-Eat Breakfast Cereal). Formerly Kreme O'Soy Crisps.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1940 January.
Ingredients: Incl. whole wheat, soybeans, malt.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Nature's Path* (USA). 1940. Jan. p. 19. "Alkaline breakfast food: Wheatasoy (Formerly Kreme O'Soy Crisps)." "Malted-Dextrinized. Combines the nourishment of whole wheat, soybeans and malt." "Madison Foods. Madison College, Tennessee. Devoted to the protection of your health."

1313. Madison Foods. 1940. Free! $1,000.00 in valuable prizes (Ad). *Madison Health Messenger* (*Madison, Tennessee*) 2(3A):2. Undated.
• ***Summary:*** See next page. This ½-page ad contains a photo that shows the front panel of each of 13 products made by Madison College; a brief description of each food is also given.

The text above the ad reads: "Contest closes at 12 midnight, February 15, 1940–and here are the famous Madison Health Foods approved by he Madison Messenger."

Those not mentioned in the previous issue are Wheatasoy (a breakfast cereal). Soyburger (new name for Soyburger Loaf). Stake-Lets (a gluten-soy loaf).

A price list, similar to but expanded from that in the last issue, appears on page 6. Address: Dep. HMH-1, Madison College, Tennessee.

1314. Madison Foods. 1940. Valuable prizes: 3 Veg-O-Mat juice extractors. Retail price $99.50 each (Ad). *Madison Health Messenger* (*Madison, Tennessee*) 2(3A):3. Undated.
• ***Summary:*** This is a ¼-page ad for an early electric juicer. "No more laborious hand-grinding–no more dribbles of juice and waste of good fruit and vegetables. The Veg-O-Mat puts an end to the unsanitary, wasteful, and tedious old methods of juice extraction by hand. The Veg-O-Mat, a midget in size but a giant in power, comes in one compact unit which is easy to clean and economical to use. It employs the most advanced process of juice extraction, it thoroughly triturates every cell and fibre of the vegetable, and then subjects the pulp to a pressure of many tons. This insures that the juice will contain the most valuable minerals and vitamins, those found only in the interior of the fibre.

"Guaranteed for one year; 8 inches by 14 inches; has a

He is age 61. He was born in Germany. this person at work for pay during the past week? Yes.

Margaret, his wife, age 59, was born in Ireland. She is not working.

1320. Brady, William. 1940. Here's to health! Remonstrance from a miller. *Los Angeles Times.* April 9. p. A7.
• ***Summary:*** A miller of fine whole wheat flour says Brady's advice that everyone should eat 4 ounces of wheat germ daily is impossible. Nobody who tried it would want to eat that much.

Brady then continues: "I am indebted to Adelle Davis, A.B., M.S., consulting nutritionist, for these practical suggestions as given in her books 'Optimal Health' and 'You Can Stay Well." He then quotes from the parts of these books that give many different suggestions for serving wheat germ. Adelle notes: "As soon as I told them that wheat germ was the cheapest source of the Vitamin B complex and that it increased pep, produced healthy appetites, normal digestion and steady nerves, Mr. Taylor went directly to the flour mill and bought a 60-pound sack. I think it cost him a about 4 cents a pound." Address: M.D. [Los Angeles].

1321. Parsons, Louella O. 1940. Close-ups and long-shots of the motion picture scene. *Washington Post.* April 15. p. 16.
• ***Summary:*** Ciro's was so packed after the Academy short preview "that even [Greta] Garbo had trouble getting a table when she appeared with Gaylord [sic, Gayelord] Hauser, Mrs. Harrison Williams and Frey Brown."

A small portrait photo shows Louella Parsons.

Note 1. Ciro's was a nightclub in West Hollywood, California, at 8433 Sunset Boulevard on the Sunset Strip, opened in January 1940 by entrepreneur William Wilkerson. It became a famous hangout for movie people of the 1940s, 1950s and early 1960s. It was one of "the" places to be seen and guaranteed being written about in the gossip columns of Hedda Hopper and Louella Parsons. Note 2. Frey Brown was Gayelord Hauser's close friend and companion.

1322. *Los Angeles Times.* 1940. World affairs talk scheduled. April 25. p. A9.
• ***Summary:*** "At the luncheon following [the talk of Dr. T. Walter Wallbank on the place of the Mediterranean in world affairs], Adelle Davis, author of 'You Can Stay Well,' will discuss 'Your Health Problems'" at the Friday Morning Club.

1323. Lager, Mildred. 1940. Summer foods for health. *Madison Health Messenger* (*Madison, Tennessee*) 2(3B):1-4. Undated.
• ***Summary:*** A large photo shows Miss Lager, next to a KFAC microphone. For 6½ years she has been broadcasting over the radio four times a week on station KFAC is Los Angeles. "She is the founder of the House of Better Living, and a tireless worker for better living. Her weekly free classes draw hundreds of people for instruction in healthful cookery and healthful living."

She writes that now is a good time "to cut down on rich foods and the acid-forming foods, using instead the alkaline-forming foods and the bulk foods for the natural eliminative effects... With a liberal intake of the alkaline-forming foods, one may be assured of the natural alkalizers which neutralize body acids and in this way assist in the protection of health... Acid wastes produce fatigue; alkaline-forming foods neutralize the acid wastes to restore the normal body tone and stamina.

"The summer diet must necessarily contain adequate complete proteins, for protein foods are necessary for cell repair and growth... A lack of protein may cause retarded growth, lack of vigor, and poor appetite... The vegetable proteins are nuts, soy beans, legumes, and in general they are

© Copyright Soyinfo Center 2021

found in all vegetables. The proteins of nuts and soy beans are classed as complete proteins and are therefore especially desirable. The animal proteins are acid-forming, whereas the vegetable proteins are alkaline-forming. Animal proteins are also more putrefactive than vegetable proteins. The soy bean and nuts can be used in a great many tasty ways."

Among the many recipes for summer the following include soyfoods: Cocktails–Soy milk and carrot ("Soy milk is a fine, alkaline, soft food. Excellent for those with sore conditions of the digestive tube)." Protein salads–Soy bean salad. Soy cheese [tofu] tomato salad. Mock shrimp salad (with Zoyburger). Entrees–Soy cheese cutlets. Zoyburger and mushroom sauce. Mock turkey legs (with Vigorost as the main ingredient). Broiled Vigorost with ripe olive sauce. Platter of cold cuts (Vigorost and Zoyburger). Hot Zoyburger sandwich. Stake-Lets (canned) for picnic dinner. Alkaline breakfast food–Wheatasoy. Alkaline beverage–Zoy-Koff (coffee substitute). Soy bean milk (Kreme O'Soy). Complete protein foods: Zoyburger, Vigorost, Stake-Lets, Not-Meat (made with unroasted peanut meal and seasoning), Soy Cheese, and Soy Beans. A brief description, nutritional analysis, and price is given for each product. "None of the Madison Foods contain animal products." A portrait photo shows Mildred Lager next to a KFAC radio microphone. The caption states that for 6½ years Miss Lager been broadcasting over the radio in Los Angeles. "She is the founder of the House for Better Living, and a tireless worker for better living. Her weekly free classes draw hundreds of people for instruction in healthful cookery and healthful living. Miss Lager is the author of *Food Facts.*"

Note 1. This is the earliest document seen (Oct. 2014) that mentions or gives a recipe for a soy-based meatless turkey. Vigorost, a meatless / vegetarian roast introduced by Madison Foods in 1932, used wheat gluten and tofu as its two main ingredients.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the word "Zoyburger," an early, popular vegetarian burger in the United States.

Although this issue is not dated, it contains the reprint a current article published in March 1940.

1324. Madison Foods. 1940. Price list [of products made by Madison Foods] (Ad). *Madison Health Messenger* (*Madison, Tennessee*) 2(3B):5. Undated.

• ***Summary:*** Breakfast cereal: Wheatasoy (9 oz).

Beverages: Zoy-Koff (No caffein [caffeine]; 12 oz.). Kreme O'Soy Milk (plain, liquid, 15 oz and 29 oz; chocolate, liquid, 29 oz). Crackers: Thin-Things ** (5 oz). Whole wheat wafers ** (5 oz). Bran wafers ** (6½ oz).

Canned protein foods (used in place of meat): Zoyburger (14 oz, 30 oz). Stake-Lets (14 oz, 30 oz). Not-Meat (5 oz, 14 oz, 30 oz). Vigorost (5 oz, 14 oz, 30 oz). Soy cheese [tofu] seasoned (5 oz, 14 oz, 30 oz). Soy Beans with Tomato (5 oz, 14 oz, 30 oz). Kreme O'Soys, plain (14 oz).

Flour: Kreme O'Soy Flour (2 lbs, 5 lbs).

Note 1. Asterisks in the printed list indicate that all products except Whole wheat wafers, bran wafers, and Not-Meat are "Soy Bean Foods." ** = Wheat germ added.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the word "Zoyburger" (or "Zoyburgers").

Although this issue is not dated, it contains the reprint of a current article published in March 1940.

1325. **Product Name:** Kreme O'Soys [Plain].
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1940 April.
Wt/Vol., Packaging, Price: 14 oz can. Retails (by mail order) for $0.15.
New Product–Documentation: Madison Health Messenger. 1940. 2(3):5. "Large jumbo hand-packed soy beans, a new variety in a special soy sauce, await your trail in Kreme O'Soys. So completely different are these extra-large delicious soy beans that you will be surprised with this new flavor and another new food."

1326. El Molino Mills. 1940. Soya flour: We grind wheat and corn on stone buhr mills (Ad). *Health News* (*Hollywood, California*) 8(10):9. May 24.

• ***Summary:*** "No bitter beany taste. Ask your health food store, or call CApitol 13813." Address: 5604 Valley Blvd., Los Angeles, California. Phone: CApitol 13813.

1327. Gian-Cursio, Christopher. 1940. Antiquarian nature cure: First health food store. *Health News* (*Hollywood, California*) 8(10):9. May 24; 8(12):16. June 28.

• ***Summary:*** The first U.S. health food store was opened in 1837. "The American Physiological Society of Boston was organized 103 years ago. The purpose was to teach the public the laws of health. Strictly for nature-cure, it emphasized vegetarian nutrition. More than 200 members followed its principles religiously.

"Early in 1837 they issued a notice that they wanted to procure foods of highest quality produced according to physiological principles. Farmers were invited to submit samples of products, to be scrutinized for possible use. The notice stressed that 'preference will be given to articles... raised on pure unadulterated soil... without aid of any artificial process by which they might become the procuring cause of diseases... Objection will also be made to articles raised on lands unfavorable to their reaching maturity before growth is checked by early frosts or cold weather.'

"Also in 1837, seeing the need of buying foodstuffs of high biological quality, they opened the world's first health food store called 'the Physiological Society's Provision Store,' with Nathaniel Perry, manager, in Fayette Court,

© Copyright Soyinfo Center 2021

Boston, Massachusetts.

"Baked foods from McShipley's bakery were featured. All baked goods were made from Graham flour. This was quite different from the wheat flour of that period. Ordinary wheat flour was stone ground but bolted. Sylvester Graham sought to remedy this by insisting on flour made from whole wheat.

"Also in 1837, George W. Light opened a health book shop for the sale of publications on health reform and vegetarianism. Success of the first, in Boston, led to his opening a second, in New York City, the Health Depository." Address: Dr., Rochester, New York.

1328. Bragg, Paul C. 1940. Not for sissies! Bragg foods are for people who want to tingle with the joy of living! (Ad). *Eat For Health* (*Rosenberg's, San Francisco*). Spring. Inside back cover.
• ***Summary:*** A full page ad. A photo shows 4 smiling people together in a swimming pool: Paul Bragg, his grandson Shocky (on his shoulders), his daughter, and his father [Robert R. Bragg]. A separate photo shows pretty Alice Everett, in a swim suit, about to throw a beach ball. A "perfect example of vibrant health," she "has eaten Bragg foods for years." There is a coupon for Bragg's famous monthly *Health Bulletin* (with "health secrets galore"), sent free of charge. Bragg's products include Bragg Meal (breakfast cereal made of 4 whole grains and wheat germ), California Mint Tea (caffeine free), and O.K. Lax (to relieve temporary constipation). Address: No. 1 Sunshine Orchard, Burbank, California.

1329. Cubbison's. 1940. New–Cubbison's Rice Polish Cookie (Ad). *Eat For Health* (*Rosenberg's, San Francisco*). Spring. p. 8.
• ***Summary:*** "51% rice bran. 49% entire wheat. Dextrose–No sugar. 6 oz. packages–5 lb. caddy bulk."

Cubbison also makes: "Wheat germ crackers. Vegetized crackers. Wheat germ toast. Soya melba toast." Address: [Los Angeles, California].

1330. *Eat For Health* (*Rosenberg's, San Francisco*). 1940. Here's an easy way to balance your diet. Spring. p. 2-5.
• ***Summary:*** A table (p. 4) titled "Essential foods for a balanced diet" gives a good summary. One should eat foods from four groups: Foods containing–(1) Body-building proteins: Cheeses, eggs, milk, nuts, whole-grain breads, flours, pasta, soy beans, dried peas, peanuts, dried peas [no meats, poultry, or fish]. (2) Body-heating fats. (3) Energy carbohydrates: Butter, cream, olive oil, honey, fruits, etc. (4) Regulatory substances: Whole grain cereals and their products (for cellulose or roughage), foods rich in vitamins and minerals like fruits and vegetables, and "all natural foods." Address: Rosenberg's Original Health Food Store, 1120 Market St., San Francisco, California. Phone: MArket 3033.

1331. Lager, Mildred. 1940. Healthful philosophy. *House of Better Living* (*Newsletter, Los Angeles*) 11(53):2. May.
• ***Summary:*** Begins with a cheery poem by an unknown author. A portrait photo shows Mildred Lager.

A display ad on this page shows a box of Ficgo coffee substitute, made by the California Ficgo Company, Los Angeles. "If coffee disagrees–stop! but do not break away from it abruptly, if it discomforts you. Use 'half Ficgo and half coffee' at the start and gradually get the Ficgo-drinking habit." Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

1332. Madison Foods. 1940. Satisfying meatless entrees (Ad). *House of Better Living* (*Newsletter, Los Angeles*) 11(53):4. May.
• ***Summary:*** "Soyburger. Stake-lets. Vigorost. Not-meat. Soy cheese [tofu]. These foods have been designed by a group of experts in the field of nutrition to adequately take the place of meat.

"Get a free copy of the *Madison Health Messenger,* for complete list of foods and recipes." Address: Madison College, Tennessee.

1333. **Product Name:** Roberts' Soy Nut Brawn, Soy Nut Cheese.
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1940 May.
Wt/Vol., Packaging, Price: Tin-plated steel can.
How Stored: Shelf stable.
New Product–Documentation: Article in *Nature's Path to Health* (*Melbourne, Australia*). 1940. May. Article in *Nature's Path to Health* (*Melbourne, Australia*). 1940. June. "Just what you have waited for! Better health foods." A large illustration (line drawing) shows the four canned products, with the Soy Nut Roast in the largest can (1 pound) and the Soy Bean & Tomato in the smallest. "Among the more recent additions to the many lines of food produced by F.G. Roberts is a line of Better Nut foods. Very shortly now this line of health foods will be available for the purchasers of Nut Foods in all the Roberts Health Food Shops, and later in other wide awake grocer shops."

Ad in *Nature's Path to Health.* 1940. July. p. 8. "Roberts' Better Nut Foods." The same line drawing described above is shown. The cheese, brawn, and roast are described briefly in non-specific terms. "Packed in three sizes: 16 oz., 8 oz., 4 oz." Ad in Aug. 1940 issue, p. 6. "Roberts' Better Nut Foods." A photo shows the cans. The same photo and a similar ad appeared in the May/June 1943 issue, p. 26, and the Oct/Nov. 1946 issue, p. 24. However

© Copyright Soyinfo Center 2021

in these last two issues, only Soy Nut Roast and Soy Nut Cheese are described in the ad text.

Ad in *Nature's Path to Health.* 1940. Nov/Dec. p. 30. "Roberts' Soy Nut Recipes." The same line drawing described above is shown. The following recipes are given: Quick cutlets (made with Soy Nut Roast). Tomato stew (made with Soy Nut Roast). Nutmeat mince (made with Soy Nut Roast). Roast soya nut cheese (made with Soya Nut Cheese, which is sold in ½-lb or 1-lb tins). "Supplies always available at the Roberts Health Food Shops Throughout Australia."

1334. Rosenberg's Original Health Food Store. 1940. Whole grain products from our bakery department (Ad). *Eat For Health* (*Rosenberg's, San Francisco*). Spring. Back cover.
• ***Summary:*** "Soy bean bread (low in starch)... 15¢

"Soy bean muffins... 25¢/doz." Note: This store and magazine are owned by Morris Rosenberg. Address: 1120 Market St., San Francisco, California. Phone: MArket 3033.

1335. Rosenberg's Original Health Food Store. 1940. Every home needs these two miracle working health aids: Juicex and Fletcherizer (Ad). *Eat For Health* (*Rosenberg's, San Francisco*). Spring. p. 1.
• ***Summary:*** Juicex is an electric juicer. "For extracting fresh, healthful vegetable and fruit juices... Juicex–the wonder machine–converts celery, carrots, spinach and other fruits and vegetables into pure, strained *juice!* A glass a minute. Just flip the switch, drop in the vegetables and the strained juice, ready to drink, flows immediately... AC or DC operation. 110 volts. Only one part to be cleaned. $49.50." Fletcherizer is an electric blender. "Liquidizes, mixes, chops... Stainless steel cutting blades, heavy glass bowl, 2-speed, extra powerful motor. White enamel base." "Juicex and Fletcherizer are the only products of their kind endorsed and recommended by Gayelord Hauser. Demonstrated at our store." Photos show each of the two electric kitchen appliances.

Note 1. This is the earliest English-language document seen (July 2021) that mentions a "Fletcherizer," an early brand of electric blender. A similar ad appears on the back of Rosenberg's 1940 "Catalog of Health Foods..."

Note 2. This is the earliest English-language document seen (July 2021) that uses the verb "to liquidize" ("Liquidizes") in connection with an electric blender. Address: 1120 Market St., San Francisco, California. Phone: MArket 3033.

1336. Parmelee-Dohrmann. 1940. Parmelee-Dohrmann (Ad). *Los Angeles Times.* June 10. p. A8.
• ***Summary:*** In the lower left quarter of this half-page ad we read: "Now you can drink your vegetables. Whiz-Mix Food Liquefier. Mixes and blends any liquids, fruits, vegetables, or meats with a speed that is amazing. Doctors recommend it for diet cases where liquids are needed. Ideal for making malted milks, or for bar use. See it demonstrated now. Priced complete: $13.95." A large illustration shows the electric Whiz-Mix.

Note: This is the 2nd earliest English-language document seen (July 2021) that uses the verb "to blend" ("Mixes and blends any liquids,...") in connection with an electric blender. Address: 510 West Seventh at Olive [Los Angeles, California]. Phone: TRinity 1331 or Zenith 2224.

1337. Hawaiian Taro Sales Co. 1940. Re: Poyo cookies. Letter to Mr. W.C. Baker, Ojai Bakery, Ojai, California, June 18. 1 p. Typed, without signature on letterhead.
• ***Summary:*** "When I write you the other day I forgot to mention that I had called on quite a number of doctors in Los Angeles and told them about both your new health bread and Soya cookies."

"They were all very much interested in the new bread and all requested that it be placed in the grocery department of the May Company." "I am glad to hear you are making further progress on the cookies... I am forwarding you in today's parcel post a 14 ounce tin of the cookies."

"I kept one bag of Soya cookies and took it with me to Berkeley. I had this bag stores in the back end of my car for three days [in the summer]. I noticed that these cookies were rather soft and had lost their crispness by the time I opened them in Berkeley. It may be that this new cellophane may be just the thing, not only for Poyo cookies but also for some of your other cookies." Note: In a rectangle at the top right of the letterhead: "Poyo products." They clearly contain taro, probably in place of wheat. Address: 2148 Fourth St., Berkeley, California. Phone: Ashberry 6900.

1338. *Bakers' Helper* (*Chicago, Illinois*). 1940. In appreciation–From one friend to another. 73(911):1245. June 22.
• ***Summary:*** Early this year Bill Baker, of the Ojai Bakery in California, "promised his friend, Walter Terry, of the Polly Ann Bakery, San Francisco, that he would make him a showpiece for the window of his new bakery." A photo shows the result, an elaborate and stunning cake topped by a church with spires–made out of sugar. It "took all of Mr. Baker's spare time for about four weeks to complete it." The church itself is 24 inches wide, 26 inches high, and illuminated with colored lights. Mr. Baker has a studio at his bakery which he uses only for decorating cakes. A smaller inset photo shows some of his decorating tools, as well as the photos which he used to guide him in decorating the cake.

1339. Stegner, Mabel. 1940. Let the blender do it for you! If you like cooking shortcuts in summer, use a liquefier-blender to whirl together superb soups, beverages and desserts. *New York Herald Tribune, This Week magazine.* June 23. p. 14-15.
• ***Summary:*** This article appears on the first page of the

© Copyright Soyinfo Center 2021

section titled "Herald Tribune Home Institute." The "new electric blenders, recently come on the market" enable you to make delicious dishes at home. "How does a blender work? A sturdy electric motor is housed in the metal base. The heat resistant glass container has a blending device built into the bottom of the container. Place the glass container on the base, switch on the electricity, and it blends, whips, creams, mixes, or liquefies. All of these processes take less than two minutes.

"For instance: place a few ounces of milk, fruit juice, tomato juice or any desired liquid in the food container. Add a banana, or strawberries, or pitted cherries, or diced vegetables. Place the container on the base, switch on the electricity and in less than a minute out comes a banana milk 'smoothie,' a fruit nectar, or a raw vegetable cocktail.

"Its only a step from fruit nectars to sherbets frozen in your mechanical refrigerator, from milk fruit 'smoothies' to ice cream mixtures with fruit blended to a velvety, non-crystallizable consistency."

Note: This is the earliest English-language document seen (July 2021) that contains the word "smoothie" or "smoothies" (spelled that way).

Recipes include: Pineapple carrot cocktail (with pineapple juice and crushed ice; no milk). Raspberry ice cream (with condensed milk and heavy cream). Hollandaise sauce (with 3 egg yolks and ½ cup butter). Shrimp mousse Photos show a [Waring] blender next to: (1) A table filled with blended "Garden-fresh vegetable or fruit cocktails." (2) A Raisin-grape pie. (3) Quick-frozen shrimps about to be blended into a mousse. (4) Raisin-grape pie. Address: B.S., Univ. of Wisconsin, Home Economics Consultant.

1340. Baker's (Bill) Products. 1940. Your health demands soya or lima bean bread (Ad). *Health News* (*Hollywood, California*) 8(12):16. June 28.
• ***Summary:*** "Prepared by the world's well known baker of Ojai, California. Try Bill Baker's special Soya and Lima Bean Mixtures for muffins or biscuits. All ready to make by simply adding required amount of water." Address: Ojai, California.

1341. **Product Name:** Nut Bars–Chocolate Covered.
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1940 June.
New Product–Documentation: Rosenberg's Original Health Food Store. 1940. Catalog of Health Foods... p. 18. "Battle Creek Health Products: Confections–Nut Bars–Chocolate Covered. $0.10."

On the back cover is an ad for the Juicex ("makes fresh, pure, undiluted vegetable juices"–$49.50. A photo shows this modern-looking electric juicer. Fruits and vegetables as pushed–using a wooden pusher–into a small hopper on top. The juice runs out of a spigot into a glass) and Fletcherizer [electric blender] ("The new 1940 model has all the latest improvements in construction and appearance. It liquidizes, whips, mixes, and chops..." $14.95). Across bottom of ad: "See these products demonstrated at our store."

Note: This 1940 date, plus other internal evidence, gives us a good estimate for the date of this undated catalog. Address: 1120 Market St., San Francisco, California. Phone: MArket 3033.

1350. Schudlich, Henry F. 1940. W.C. ("Bill") Baker's contribution to Ojai, California. *Bakers' Helper* (*Chicago, Illinois*) 74(912):26, 82. July 6.

• ***Summary:*** The author recently visited Bill Baker in Ojai, both to renew their friendship and "to get firsthand information on how he became interested in specializing in soya bean bread."

Bill Baker first made his mark as an outstanding cake baker, decorator, and conditor [confectioner, pastry cook]. Then he had the idea of making a specialty bread that could fill the needs of people who refrain from eating white bread–largely due to wheat allergy. His first venture was to develop a bread made from lima bean flour. "After much experimental work with lima bean flour a loaf was developed and marketed under the name of lima bean bread, which with intelligent merchandising effort did receive acceptance from a certain group of people."

He then began to look for a companion product. "When he learned that soya bean flour was a highly alkaline food, possessing an abundance of nutritive food value, his ambitions received a new impetus." He now hoped to "realize his long cherished ambition to produce a specialty bread still more suitable to that group of people who demanded something different form white bread for their diet." During preliminary experimentation, he discovered that "the high alkalinity in soya bean flour had a deleterious effect upon fermentation. After a great deal of research a method was discovered to overcome this.

"Success was finally achieved and a loaf developed with uniform grain, good volume, and symmetry, possessing a unique flavor. A survey was conducted to determine consumer acceptance and the results showed potential sales channels. The next step was to find out whether any government standards had been set up for this type of bread. It was found there were none and cooperation with the government for a ruling was necessary to avoid subsequent misunderstanding. All this entailed the loss of much time before the loaf could be marketed. Further marketing could not be confined to one area or community and it was exigent that dealers be found in other cities before production on a large scale would be justified.

"Mr. Baker met every obstacle that stood in the way of marketing his new product, and today he is reaping the benefits of his labors for he is enjoying a very lucrative business on his soya bean bread. His three oven shop is now used exclusively for the manufacture of lima bean and soya bean bread, several thousand loaves being made every day. While much of this bread is being shipped to jobbers and retailers, shipments going daily to most every State in the Union, to Alaska, and to the Hawaiian Islands, he maintains a number of trucks in the Los Angeles are to supply grocery and [health] food stores. Mr. Baker has done an outstanding job with a specialty bread and without question has made Ojai, California the 'Soya Bean Bread' capital of the country."

Photos show: (1) Baker's Ojai Bakery with 4 delivery trucks parked in front, facing toward the left. The former driveway under the arch is now closed in. Each bears this message to the public: "Bill Baker's Original Soya Bean Bread made in California. The oblong panel on each truck carries a reproduction of the parchment scroll presented to Mr. Baker at the close of the Golden Gate Exposition in 1939, 'In Appreciation for Your Generous Service to the Exposition.' The beautiful colored memorial was signed by the President of the Fair." (2-3) "Interior views in the Ojai Bakery, which Mr. Baker enlarged several months ago, closing in the driveway and putting in an extra 60-foot room. He added another reel oven of the same capacity as the former one."

1351. *Los Angeles Times.* 1940. Jimmy Fidler in Hollywood. July 15. p. A14.

• ***Summary:*** "Si Wills (Joan Davis' husband who should be doing big things on the screen himself) is netting a movie-star income from that liquefier which makes health-producing liquids out of whole foods."

1352. Kordel, Lelord. 1940. Re: Promotion in Health Foods Retailing. Letter to Mr. Bill Baker, Ojai, California, July 24. 1 p. Typed, with signature on letterhead.

• ***Summary:*** "This will acknowledge, with thanks, receipt of the mat to be used in the next issue of *Health Foods Retailing.*

"As soon as the new cookie is ready won't you please give me full details, as I want to give it a writeup." Address: Health Foods Retailing, 846 Russ Building, San Francisco, California.

1353. Cubbison Cracker Co. 1940. Cubbison's Soya Toast (Ad). *Health News* (*Hollywood, California*) 8(14):9. July 26.

• ***Summary:*** "Rich in muscle building protein–Low in fat-inducing carbohydrates. Non-acid–thoroughly dextrinized. Ideal for camping trips or picnics, keeps indefinitely. At your health food store."

1354. Gian-Cursio, Christopher. 1940. Antiquarian nature cure: A movie of health reform. *Health News* (*Hollywood, California*). July 26. p. 9.
• ***Summary:*** "Hollywood has produced many historical and biographical films that proved not only entertaining but also educational and inspirational. In the field of old nature-cure, abundant material awaits a producer who could create an interesting picture and disclose episodes and situations in American life unknown to moderns.

"Romance and adventure filled health reform 100 years ago. Lives of Sylvester Graham, William Alcott, Mary Gove and others held events so dramatic that I cannot help wishing that my birthday had been 100 years sooner.

"Powerful scenes would be those showing the riots against Sylvester Graham. In his writings and lectures, he denounced bread made from white flour and deleterious ingredients, urging the people to divorce themselves from bakers and eat only bread made at home from entire wheat, to assure purity and wholesomeness.

"Bakers were at first annoyed but as his influence grew and they were hit in the pocketbook, their resentment grew. Finally they made a plot to destroy him. The conspiracy resulted in the events that produced turmoil in staid old Boston early in 1837." Address: Dr., Rochester, New York.

1355. *Health News* (*Hollywood, California*). 1940. Soya toast carried by hikers, campers. 8(14):9. July 26.
• ***Summary:*** "Los Angeles–'Don't start for camp or on a picnic without a generous supply of Cubbison's Soya Toast!' Healthfolk off on vacations are packing this alkaline-reacting food because they know it can be depended upon for good nourishment and keeps indefinitely without spoiling or molding.

"'Rich in muscle-building protein, thoroughly dextrinized, non-acid, low in fat-inducing carbohydrates...'"

The Cubbison Cracker Co. is located at 3411 Pasadena Ave., Los Angeles.

1356. Madison Foods. 1940. Satisfying meatless entrees (Ad). *Madison Health Messenger* (*Madison, Tennessee*) 3(1):3. Undated.
• ***Summary:*** See next page. A full-page ad. Note: On page 5 of this issue are many "Requested recipes" that call for Madison Foods. Address: Madison College, Madison, Tennessee.

1357. Gian-Cursio, Christopher. 1940. Antiquarian nature cure: Early health products. *Health News* (*Hollywood, California*) 8(16):9. Aug. 23.
• ***Summary:*** "*Granula*, made from whole wheat flour, is believed to have been the first trade name of a health food. It was manufactured nearly 90 years ago by the nature-cure physician, Dr. James C. Jackson, Dansville, N.Y.

"An early coffee substitute, if not the first, to have a trade name was Soma, made from a combination of grains, also in Dansville.

"A few years after the civil war, health enthusiasts all over the country were able to secure supplies from the Health Food Company, New York City. This firm manufactured and sold dried Granulated Wheat (a fine Graham flour), White Wheat Gluten (free from starch and bran) and Pomarus [sic, Pomarius] (a fruit product, free from sugar and gelatin, and made into a dense jelly by evaporation of water).

"One of this store's popular products was Granulated Wheat Biscuit, made from whole wheat flour that had been reduced to fine powder by pounding." Address: Dr., Rochester, New York.

1358. *Health News* (*Hollywood, California*). 1940. Stickler for health food. 8(16):9. Aug. 23.
• ***Summary:*** "Los Angeles–Successful operation for 16 years is the proud record of Stickler's, 3615 S. Vermont, opened in 'pioneer days' by a woman of vision, Elizabeth Stickler. Her slogan, 'Eat to live, not live to eat,' is now used throughout the U.S. to promote health foods.

"Mrs. Stickler learned food values when making a 'miraculous comeback' from terrible suffering diagnosed as cancer, pernicious anemia and complications. She has held certificates from nutrition schools for 10 years, seven years from Battle Creek [Michigan].

"Mr. Stickler has long shared the work at the store. Their motto, 'Quality Rightly Priced,' holds customers perennially."

1359. Hayward, J.W. 1940. Soybean oil meal: Its current consumption. *Proceedings of the American Soybean Association* p. 21-23. 20th annual meeting. Held 18-20 Aug. at Dearborn, Michigan.
• ***Summary:*** The soybean arrived in America in 1804. During the past ten years the production of soybean oil meal as such has increased in the United States from about 39,000 tons to approximately 1,250,000 tons. Practically all of this production has been used as a feed for livestock and poultry.

For the past several years production of soy flour has held between 11,000 and 15,000 tons. "Before leaving this subject on food, I do wish to give credit to the increasing popularity of edible green soybeans, many specialty soybean products and special health foods, such as soy milk, etc."

Properly processed soybean oil meal is a better feed than raw uncooked soybeans. "In most cases, I think you will find that protein can be purchased cheaper in soybean oil meal than it can be supplied by feeding soybeans at market prices even though they were raised on your own farm." Several calculations are given to prove this point.

Note: This is the earliest English-language document seen (June 2009) that uses the term "edible green soybeans" to refer to green vegetable soybeans. Address: Chairman,

Satisfying MEATLESS ENTREES

A Madison FOOD

SO outstanding has been the development of Madison College and Madison Foods that *Reader's Digest*, the New York *Times*, Chicago *Journal of Commerce, Coronet, Physical Culture, Food Industries, Printers' Ink*, in all more than 400 newspapers and magazines in 37 countries, have published articles and pictures concerning the college and its products. In search of complete protein foods to take the place of meat, Madison College chemists sought to develop these foods from soy beans, peanuts, wheat gluten, and various vegetables. Thus the formulas of Zoyburger, Not-Meat, Vigorost, and Stake-lets have been designed by a group of experts in the field of nutrition to adequately take the place of meat.

Try This New Food

STAKE-LETS are the newest development of Madison Foods laboratories. Extensive experiments show that the combination of gluten and soy with a special meatlike sauce, an exclusive Madison formula, is superior in both flavor and texture to gluten itself. Already sliced in the can for your convenience with sauce. Dip in egg batter and crumb to serve as a Stake-let.

ZOYBURGER STEAK
with onions

Place half-inch slices of Zoyburger on well-greased pan, with desired amount of onions. Prepare to a medium brown on both sides. Salt to taste. Serve with onions as the meat portion of a dinner. Zoyburger Steak may be served without onions or by substituting mushroom sauce, Creole sauce, tomato sauce, gravy, etc. If a sauce is used, prepare it separately and place on top of Zoyburger Steak when served.

BROILED VIGOROST
with mushroom sauce

Cut Vigorost through center lengthwise, then crosswise, into half-inch slices. Arrange in greased baking pan. Put melted butter on top of each piece and broil until brown. When finished, arrange on serving platter, overlapping the slices. Garnish the edges with sliced tomatoes and crisp lettuce, and pour over the Broiled Vigorost a hot mushroom sauce. Serve with baked potatoes and garden peas. Zoyburger, Not-Meat, or Stake-lets may be used in this recipe in the place of Vigorost.

Fourteen - ounce can serves 5 with 2 pieces. 30-oz. can serves 8 with 2 large pieces.

BREADED CUTLETS — Dip half-inch slices of Not-Meat into beaten egg and crumb. Place a small chip of butter on each slice and salt. Prepare on top of stove or in oven in well-greased pan until brown. Serve with parsley garnish as the meat portion. Vigorost, Zoyburger, or Stake-lets may be used in the place of Not-Meat. Fourteen-ounce can makes 5 medium cutlets; 30-oz. can makes 8 large cutlets. Large cutlets may be sliced in two.

"Devoted to the protection of your HEALTH"

Madison Foods are available throughout the United States in stores specializing in natural foods.

Soybean Nutritional Research Council.

1360. Schmitt, R.P. 1940. The versatile soy bean: Food of a thousand uses. *Nature's Path to Health* (*Melbourne, Australia*). Aug. p. 5-6.
• ***Summary:*** "Before 1935, the soy bean was an insignificant factor in the health food store. Since then, however, its increase in popularity has been phenomenal, with the result that it is now one of the major sellers in the field. One reason for this growth is the soy bean's versatility: from it are produced flour, milk and cheese, bread, crackers, cereals, meat substitutes, candies and canned soybeans to be served as a vegetable. Almost no other item of food can claim such diversification of products. And the ways of preparing it are infinite..." It is also a good source of protein, vitamins, and minerals, and its low starch content makes it valuable in diabetic diets. It is easy to digest, "is not gas-forming, and does not encourage the growth of putrefactive bacteria in the intestinal tract, as do other high protein foods. On the contrary, it builds up acidophilus bacteria, which combat putrefaction in the digestive system.

"Then, too, it is alkaline in action: it has 20 times the alkalinity of cow's milk, and five times that of citrus fruits... Yet it one of the most economical foods." Address: Penna Soya Products [Williamsport, Pennsylvania], USA.

1361. Butler, H.A. 1940. Re: Selling of cookies via Southern Pacific Company outlets. Letter to Mr. G.J. Richenburg, Ojai, California, Sept. 25. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "The sample of cookies submitted by Mr. Baker of the Ojai Bakery is considered of good quality, but the only outlet we have for an item of this kind would be our news stands, soda fountains, etc. in 5¢ and 10¢ packages or bags.

"Will you please advise Mr. Baker accordingly, and if he is prepared to pack 5¢ and 10¢ packages will you please have him submit one or two samples... for our further consideration. Very truly yours."

At the bottom of the letterhead: "The West's greatest transportation system. All trains on Southern Pacific's four scenic routes are completely air conditioned." Address: Southern Pacific Co., Manager, Dining Car, Hotel, Restaurant and News Service Dep., 65 Market St., San Francisco, California.

1362. Gian-Cursio, Christopher. 1940. Antiquarian nature cure: First health restaurants. *Health News* (*Hollywood, California*) 8(18):6. Sept. 27.
• ***Summary:*** "The world's first health food restaurants were in conjunction with Graham boarding houses. Meals served there were exact in principles, would meet the approval of precise modern nature-curists. Animal products were taboo; only fruit and vegetable dishes were served.

"First health dinners became available in old New York about 1831 and in 1836 at 23 Brattle Street, Boston. in 1839, Rochester, N.Y., was the only other city in the U.S. with an establishment specializing in health cuisine.

"Bathing in early America was not only a luxury but a rarity–but not at Graham boarding houses. Every boarder was expected to abide by the rule: exercise and bathe before breakfast! The shower was a favorite; others preferred the hand bath. Another health rule was 'No person is entertained as a boarder who uses tobacco or intoxicating drink.'

"The great and near-great partook of health meals. A patron describes the table as 'bountifully furnished with Nature's luxuries, so cooked as to retain their natural excellences instead of being saturated with that repulsive extract from hog's meat called lard, or mingled with pepper and spice enough to burn its way through the stomach.'

"Altruism, not money profit, was the incentive for these health restaurateurs. Obstacles were great and only the urge to create a better humanity made them surmountable. (To be continued)." Address: Dr., Rochester, New York.

1363. Lindlahr, Victor H. 1940. You are what you eat. New York, NY: Natural Nutrition Society. 128 p. Sept. No index. 27 cm.
• ***Summary:*** Victor H. Lindlahr is the son of Dr. Henry Lindlahr, founder and head of the Lindlahr Sanitarium in Chicago, Illinois. Dr. Henry Lindlahr, "who first uttered the phrase, 'You are what you eat.'... and was one of a handful of pioneers who alone thought or knew much about diet in its relation to the prevention and cure of illness."

This book contains a wealth of interesting information on the history of nutrition. During 25 year "tenure of the Lindlahr Sanitarium, we used diet with excellent results in the treatment of more than 50,000 patients." In 1929 Victor shifted from sanitarium work to radio broadcasting. A major goal is to eat a balanced vegetarian diet. On page 43 are the "Ten Commandments of eating."

Contents of Part II: Vitamin tables. Vegetables and fruits highest in vitamins. Caloric value of vegetables and fruits. Mineral tables. Vegetables and fruits highest in minerals. Food classes. Pot liquors and fruit juices. Dry yellow soybeans are listed among the best sources of vitamins B-1, and E, and the single best source of vitamin G. They are a rich source of the minerals calcium, and an excellent source of protein. Green soybeans are an excellent source of vitamins A, B-1, and G, a good source of the minerals calcium, phosphorus, iron, and a good source of protein (p. 44-50).

In Part III, the section on vegetables contains a subsection on beans (p. 81-87), which includes "Soybeans, green-shell. Health factors: "Practically a 'life' staple in Oriental countries where meat is scarce. Protein in the diet supplied by soybeans; contain all essential amino-acid constituents of animal *proteins*, and, in some instances, have twice the quantity. Soybeans used to replace all various products of the cow: meat, milk, butter, and cheese.

© Copyright Soyinfo Center 2021

"Soybean milk similar in appearance and properties to animal milk. By certain processes, some of protein may be precipitated from it, forming a gray-white curd. This protein comparable to casein (the protein of animal milk); has been commercialized in form of powder which may be used in special feeding cases.

"Soybean oil more similar to butter in Vitamin A content than any other vegetable fat. Soybean flour or meal mixed with its proper constituents not only can be made into various types of bread and confections, but is today used in invalid and infant dietetics.

"Soybeans not so well known to Americans as they justly should be. Green-shell soybeans not readily available, although their cultivation is being encouraged.

"Excellent source of Vitamin A, especially the varieties that are deepest green in color. Also excellent source of Vitamins B-1 and G. Can be relied upon as a good source of essential minerals, calcium, phosphorus and iron.

"Alkaline-ash. Should not be used on soft diets unless puréed, as high in roughage. Comparatively high in calorie content, but only 6 to 12 per cent of their carbohydrate is available to the body. Starch makes up a very small part of total carbohydrate; hence soybeans may be used occasionally by reducers. Soybean meal is used in preparing breadstuffs sufficiently reduced in starch content to be used by diabetics." Also discusses: Selection and care. Preparation. Basic method of cooking. Similar information is given under "Soybeans, dried," which are better known in the USA than green-shell soybeans.

Chapter 2, titled "Different foods do different things," contains one of the many interesting stories about the history of nutrition. "Hippocrates believed and taught that all foods served the *same purpose,* all contained a basic nourishment which he called the 'universal aliment.' Some foods, he taught, had more of the universal aliment than others, but insofar as a choice of foods was concerned, the only necessity was to eat enough foods containing the universal aliment, and all would be well.

"For almost 2300 years, physicians and laymen believed implicitly in this idea... Hippocrates' theory was accepted blindly, even by top-ranking scientists, until little more than a century ago. The few chemists who began to question it then were afraid to oppose authority and state their misgivings. Even when undeniable proof was finally presented that there was more than one kind of nourishment in foods, the great majority of physicians and scientists were unwilling to depart from the idea of Hippocrates. Those who believed that different foods have different purposes were called fools, fanatics, faddists and worse!"

As recently as 30 years ago [1910] the universal aliment idea "was so 'respectable' that 'rebels' like my father, who challenged it, felt the full weight of scientific scorn.

"The first wedge was driven in Hippocrates' theory a little over 150 years ago. In the late 1700's, a brilliant French scientists named Antoine-Laurent Lavoisier proved that the food you eat is gently burned (oxidized) in your body with the help of oxygen contained in the air you breathe into your lungs. He proved that *certain parts* of foods provide the body heat. Lavoisier, and a colleague by the name of Pierre-Simon Laplace, even developed a method by which the heat-producing value of foods could be measured.

"Later, an American by the name of Ben Thomson devised a unit of measurement for the heat which food produces in the body. This unit was called a *calorie*–the very same calorie that overweight people have been reckoning with ever since."

"Once the important role played by food in creating body heat was understood, scientific circles began to talk of a food's value only in terms of its calorie content, its heat-producing potentialities. The calorie became a tyrant; it was to rule most physicians and dietitians until the War of 1914.

"Lard and butter, with approximately 250 calories per ounce, became premium foods. Carrots, spinach, onions and other vegetables which have a low calorie content, sank to uncharted depths in scientific esteem. Sugar (approximately 120 calories per ounce) was a 'wonderful' food; ready-to-eat cereals (120 calories per ounce) became the 'finest nourishment' anyone could partake of!"

On the inside back cover is a description of many "Food & Health Guides" by the Lindlahrs. The back cover shows that in March 1941 this book was the No. 3 best seller nationwide in the category "General non-fiction."

A portrait photo on the inside front cover shows Victor Lindlahr. For the past 10 years he has been a lecturer on health and nutrition, with a radio program broadcast by stations nationwide. He is also the author of: *The Guide to Balanced Health. Natural Way to Health. Eat and Reduce. Seven Day Reducing Diet. The Lindlahr Vitamin Cookbook. How to Win and Keep Health with Foods.* Address: Editor, Journal of Living, 1819 Broadway, New York City. President, National Nutrition Society, Inc., New York.

1364. Sprague, Paul E. 1940. Edible soy flour in 1940 (Continued–Document part III). *National Farm Chemurgic Council, Chemurgic Paper* [No. 49]. 15 p. Sept. [5 ref]
• ***Summary:*** (Continued): "(d) That it is realized in their army circles that the work they have been doing in regard to utilizing soy flour is not only important for the combat forces but is an example for civilian consumption thereof in times of peace.

"(e) Part of the shortage of fats in Germany arises from the fact that there, as everywhere else, a large part of the total consumption is not due to actual essential human nutritive requirements but instead to the factors of taste and technique in preparing the foods. They point out that the utilization of fats by even distribution is as effective as much larger quantities less evenly distributed. The fat in full soy flour is perfectly distributed and hence completely effective.

© Copyright Soyinfo Center 2021

Germany has for years been the largest European consumer of soybeans."

Note: This is the earliest English-language document seen (Jan. 2019) that uses the term "full soy flour."

"I am glad to report that through the work of our Soy Flour Association our own military authorities are engaged in a critical study of these possibilities and surely soy flour products should begin to take the place to which they are entitled in army and navy dietary. Among these are in hashes, stews, in bread and baked goods and in the concentrated soups, beverages and pellets for combat or invasion rations.

"It is obvious that there is a tremendously important place for these products in connection with the feeding of starving populations or in connection with group feeding problems that result from catastrophic situations that cause a breakdown in all ordinary means of transport and require that concentrated foods be used regardless of past habits. It only remains to get this fact imbedded in the public mind.

"Present Uses and Consumption: The consumption of edible soy flour and grits in the United States has remained around 25 million pounds annually for the past few years. This is equivalent to approximately 650,000 bushels of beans per year.

"The uses which have thus far been developed on a commercial scale for edible soy flour may be described as follows:

"A. In the Confectionary Industry: Soy flour is used here as a constituent of fudge, caramel, kisses, and crunch type candies, and is used in percentages of from 3 to 10%. The reason for its use lies in the fact that it aids in better emulsification of the fats used in the manufacture of candy and tends to prevent drying out of the finished candy.

"B. Dietary Foods: The specific nutritional characteristics described previously account for the wide variety of dietary foods built on soy flour. The low starch content makes it an ideal ingredient of food for diabetics, or for those allergic to starch, or those affected with the tendency toward acidosis that results from a wheat flour or a high starch ration. Certain types of infant foods are derived from soy flour for the same reasons. Countless brands of dietary and diabetic food flours are on the market at a wide range of special prices. Those interested in the use of soy flour for this purpose can secure details, sample recipes, both from publications of the Department of Agriculture and from the manufacturers and merchandisers of these health flours and health food combinations or from the Soy Flour Association.

"C. Brewing Industry: Considerable work has been done in demonstrating the effectiveness of soy flour as a foam stabilizer in the manufacture of beer. There are various technical and commercial aspects to this and the usage for this purpose has so far been quite limited.

"D. Baking Industry: (1) In sweet goods, cakes, pie dough, doughnuts, and so forth, soy flour is being used in various percentages running from 3 to 7%. The main purpose of this use is to produce baked goods having better distribution of the shortening used and also to retain freshness for a longer time due to slowing up of the drying out process which normally occurs in all goods of this type.

"2. Macaroni, noodles, and Spaghetti. Various percentages of soy flour are being used successfully in these items and the makers are generally favorable to its use under option or labeled standards.

"3. Bread and Rolls. A great deal of work has been done in the adaptation of soy flour to bread mixtures both with wheat flour and other components. A well risen bread can be made with as much as 20% soy flour mixed with wheat flour and such bread contains 40 more protein and 15% more of the salt free minerals than are found in the white wheat bread. Such bread is also characterized by a decrease in the carbohydrates of around 17%. Since soy flour contains 12 times as much calcium as wheat flour, the amount of calcium in 20% soy flour bread is more than 50% greater than it is in the standard white bread. Some time ago the Bureau of Chemistry, Department of Agriculture, found as a result of biological experiments that a soy breed containing 25 soy flour contained proteins and water soluble vitamins adequate for normal growth and that the protein from such bread was 2 to 3 times more digestible than that from ordinary white bread. Regardless of those facts however very little soy flour is used at this time in bread except in isolated spots and that which is used is employed primarily for the purpose of the moisture retaining effect that it imparts. Three to five percent in bread apparently is sufficient to make it possible to retain freshness in a loaf for one day longer than can be obtained without the admixture of soy flour. The reasons for failure of the baking industry to use more soy flour are considered to be economic and for lack of consumer acceptance or demand.

"4. Muffins, biscuits, griddle cakes, waffles. Soy flour is capable of admixture with wheat flour or other ingredients in goods of this kind over quite a range of quantity.

"Use in Meat Packing Industry:

"A. Sausage: Soy flour has found a substantial use in the manufacture of sausage. Its legitimate function in meat sausage has been to serve as a binding agent rather than as a filling agent or as a substitute for meat or as a means of cheapening the sausage due to its ability to increase the water content thereof.

"Since much of the controversy about soy flour usage in meat products centers around sausage, I will go into this subject briefly. Most sausage is prepared using some cereal substance as a binding agent. These substances may be corn flour, wheat flour, skim milk powder or tapioca flour, potato flour, etc. All sausage however does not contain an added binder. Sausage can be made without the use of binders if good lean meats together with bull meat emulsion are used. Because of the high cost of these cuts of meat, cheaper cuts

© Copyright Soyinfo Center 2021

of meat which have good nutritional value have to be used. In those cases it is necessary that a binder be incorporated so that the ground particles will keep in good shape so that when the product is chewed it does not crumble in the mouth. Binders tend to retain the moisture within the sausage and give a nice juicy appearance. Many sausage manufacturers claim the use of a binder means a cheaper product which has frequently been true because instead of using the proper cereals or soy flour as binding agents they have been used as fillers and they have been used excessively in several cases. This has produced antagonism and objection from a section of the meat packing industry. This will be discussed later in this paper.

"The members of the Soy Flour Association are today promoting the use of soy flour for sausage on the basis of a definite policy of not recommending it as a substitute for meat but rather to recommend it as a binder for use to the extent of 3% in the sausage, the same as is allowable in respect to the use of any other cereal or binding agent.

"B. Meat Loaves or Special Labeled Loaves: Soy flour is used in fair amounts in products similar to meat loaves and is also used to a certain extent in meat loaves and canned meat products, with proper labeling. The function performed in this use is that of an excellent binder similar to its function in sausage and of course it has a definite protein value.

"Under the regulations of the Bureau of Animal Industry, soy flour is not acceptable in loaves that are called meat loaves including those designations associated with a particular kind of meat such as veal loaf or pork loaf unless the addition of soy flour is plainly and conspicuously declared on the label in connection with the name of the product. Soy Flour may be used in other than meat loaves or so-called meat loaves without any declaration. This may include loaves that are stuffed in casings and properly labeled.

"C. Frankfurters and Bologna: Soy flour is adapted for use in frankfurters and bologna in the same way and for the same reason as it is adapted for use in other meat products. In Government inspected meat packing plants no soy flour may be used in any quantity whatsoever in products designated as frankfurters or bologna. This restriction greatly reduces the amount of soy flour that could be acceptably used in these product.

"D. Stews, Soups, Hash, Chili Con Carne: Soy flour finds an acceptable use and its use is permitted by the Bureau of Animal Industry in these products, and it may be used without label declaration therein provided the products are prepared with salt" (Continued). Address: Vice President, The Glidden Co., Cleveland, Ohio.

1365. Sprague, Paul E. 1940. Edible soy flour in 1940 (Continued–Document part VI). *National Farm Chemurgic Council, Chemurgic Paper* [No. 49]. 15 p. Sept. [5 ref]
• ***Summary:*** (Continued): "Without doubt these products have a great and important future in this country. The time factor, however, by which this further consumption can be realized is less clear. The short term prospects are easier to predict. Excluding regimentation of this country for war, it seems unlikely that any sudden large increase in soy flour usage will occur until the regulatory restrictions now existing are modified. Indeed the consumption may decline. If the new analytical methods are found adequate to permit soy flour usage or if the B.A.I. should for other reasons permit soy flour to be used to the same extent as cereals are admissible in sausage (that is up to 3½%) then there could be 15,000,000 to 30,000,000 additional pounds used in the meat packing industry–more than double the existing total volume. This increase should occur rapidly and would be at the expense of other cereal binders of lesser merit now used, and probably very little, if at all, at the expense of meat. 20,000,000 additional pounds of soy products would require about one-half million bushels of beans. In addition there should be steady increases of consumption right along resulting from the growing familiarity of the public through the utilization of soy flour containing baked goods and specialty food items of various types. These increases are to be expected without any retail distribution of packaged flour for domestic utilization, but solely through the baking industry and others making specialty foods. I am advised by concerns who have recently placed certain soy specialties on the market that they are meeting with favor.

"There is no general distribution of soy flour through retail channels at present except through the limited facilities of the health food stores and there at quite high prices. Many baking establishments have wholesale supplies. This is not because processors have not tried to develop such distribution. Several efforts have been made. These were not on a national scale and were unsuccessful principally because the merchandising problem involved was not clearly understood and the public not ready to accept the product.

"The long term future for soy flour and grits is therefore bound up with those controlling but unponderable factors that can cause changes in public acceptance and in habits of eating. A report made recently to the Soy Flour Association points out that an enormous volume of consumption is inevitable and is to be achieved by deliberate planning intended to overcome the disadvantage of a new product not well known in the United States and to overcome the objections of vested positions of other proteins in recognized food standards and to change in eating customs. It is necessary, too, that correction occur in the present popular conception that soybean products are adapted entirely for industrial rather than for food uses. It is a job of first magnitude to effect a change in the eating preferences and habits of the people or a regional group. Realization of this has properly restrained the industry from rushing ahead with large promotional expenditure lest they be found lost in a bottomless pit. Obviously, the first step to bring the product

© Copyright Soyinfo Center 2021

into its own is to push the understanding of its value and its proper use in the public mind. This corresponds to education and training. It is a part of the broad objective of better nutrition for the whole population. A cogent outline of what has to be done to obtain such results may be found in current nutritional literatures (2) and (3).

"Should our army authorities include soy bearing food items in the dietary of the men in the conscription and military training camps, the results may well be far reaching and greatly hasten the day when the promotion of packaged distribution of soy flour and grits to retail channels will be commercially feasible. Attainment of this objective would not only bring into use millions of bushels of soybeans, but would mean as great a single contribution of the proper nutrition of our people as can be visualized today. The Secretary of Agriculture has recently stated that '99% of the children of the United States have a heredity good enough to enable them to become productive workers and excellent citizens provided they are given the right food, education, and opportunity. Fundamental to this is food. 50% of our population do not get enough of the protective foods to enable them to enjoy full vigor and health. A large proportion of these do not get it because they cannot afford it. It is the duty of the farmers, the business man, the government, and labor to see that these people are better fed than their parents were.'

"Again I quote: 'In the past science has conferred on those people who have availed themselves of the knowledge of infectious diseases better health and longer life. Now and in the future science promises those who will take advantage of the newer knowledge of nutrition a larger stature, greater vigor, increased longevity, and a better level of cultural attainment. This is where the future of soy flour lies, and it is bright.'

"I hope these remarks will aid in promoting the proper understanding of soy flour and grits.

1366. Marx, Victor E. 1940. Re: Sample cookies received by *Bakers' Helper.* Letter to Mr. Bill Baker, The Ojai Bakery, Ojai, California, Oct. 1. 1 p. Typed, with signature on letterhead.

• ***Summary:*** "Your letter of September 22nd telling us of your latest invention and the sample cookies are at hand and have caused considerable flurry." He gave some of the cookies to the youngster next door who is "one of those unfortunates who likes cake, but still is allergic to some of the ingredients."

"We have had a photograph of the can and the cookies made and we are planning to run an article in *Bakers' Helper* about your latest work. I certainly admire your perseverance and ingenuity..."

At the top right of the letterhead: "The helpful magazine for bakers. Western Office: 530 West 6th St., Los Angeles." Address: Staff Chief & Editor, Bakers' Helper, 330 South Wells St., Chicago, Illinois. Phone: WAbash 5282.

1367. Gian-Cursio, Christopher. 1940. Antiquarian nature cure: First health restaurants (Concluded). *Health News* (*Hollywood, California*) 8(19):5. Oct. 11.

• ***Summary:*** "From the start, proprietors and patrons of health restaurants have been ridiculed by the ignorant and antagonistic. An early aggressor was the *New York Review.* An article in 1837 condemned proper eating as 'dietetic charlatanry,' stated, 'We think one of the rarest spectacles in the world must be a Graham boarding house at dinner hour. Along a table are seated some 30 lean-visaged, cadaverous disciples, eyeing each other askance, their looks lit up with a certain cannibal spirit... The gentlemen resemble busts cut in chalk or flint, the lady-boarders mummies preserved in saffron.' Modern health reformers are confronted with similar false denunciations.

"In rebuttal, a health reformer pictured an orthodox eating place of the 1830's: 'As dinner hour approaches, eager fainting gourmands gather toward the scene of operations, portly gentlemen with forms which might have shamed Falstaff, visages which should provoke the envy of a turkey-cock. Bloated apoplexy, trembling palsy, racking rheumatism, gout, delirium tremens, the thousand ministers of death, all are there selecting each his victim and goading him on to the indulgence which will render him a speedier and surer prey.'

"The pioneer health restaurants were too far ahead of their time. In less than 10 years they ceased to exist and, as far as is known, there was not another in the U.S. until the dawn of the 20th century. Today we are in the midst of a glorious revival. With splendid styling and magnificent appointments, health restaurants of 1940 are replicas of centers that helped to make the 1830's a great decade of health and medical reform." Address: Dr., Rochester, New York.

1368. Morris, Minnie A. 1940. Re: Item on Poyo Cookie in Oct. 12 issue of *Bakers' Helper.* Letter to Mr. W.C. Baker,

Ojai Bakery, Ojai, California, Oct. 11. 2 p. Typed, with signature on letterhead.
• ***Summary:*** On page 653. Address: Assoc. Editor, Bakers' Helper, 330 South Wells St., Chicago, Illinois. Phone: WAbash 5282.

1369. *Bakers' Helper* (*Chicago, Illinois*). 1940. W.C. ("Bill") Baker making another new product. 74(919):653. Oct. 12.
• ***Summary:*** During the days of World War I, Bill Baker won an award for developing a "wheatless" bread. However that loaf "was not strictly wheatless, because at that time the idea was just to conserve wheat, not to meet any needs of people allergic to cereal. Because of his experience in handling the production of materials other than wheat Mr. Baker has in the last few years been urged by doctors to attempt the development of a truly wheat-free bread for patients with certain allergies..." While experimenting, he realizes keenly that these baked products must also taste good.

He has experimented with sesame shortening, obtained from the Galen Drug Co., a wholesaler in Berkeley, California. Soon Galen's manager visited Bill Baker to discuss Galen's development of a cooky ["cookie"] made with taro flour from Hawaii. Baker agreed to experiment and is now producing at Ojai.

The dainty "Hawaiian Poyo Cookies," each 1½ inches in diameter, are sold in 8 oz tins with an Hawaiian design of sunset, palms, and the sea in 6 colors. "They are labeled 'A cookie for a purpose,'" which those with wheat allergies or the whole family can enjoy. "The ingredients are taro flour, sesame shortening, cane sugar, cane syrup, salt, with artificial flavor. The cans are labeled 'Made by Bill Baker–Original–Ojai, California,' with the note: Manufactured and marketed under license and supervision of Galen Company, Inc., Berkeley, California, pursuant to its exclusive formula and trademark 'Poyo.'" A photo shows the tin with several Poyo Cookies on a lace doily nearby.

1370. **Product Name:** Cubbison's Soy-B-Malt (Food Beverage).
Manufacturer's Name: Cubbison Cracker Co.
Manufacturer's Address: 3417-3419 Pasadena Ave., Los Angeles, California.
Date of Introduction: 1940 November.
New Product–Documentation: House of Better Living. 1940. Nov. p. 4. 8 oz. for $0.25. Listed under heading of "Salts" or seasonings; Taylor. 1944. Soy Cook Book. p. 201. This might be the product listed as "Soy-Malt (Plain or Chocolate), 8 oz pkg., $0.40. 1 lb pkg., $0.75" in the House of Better Living Catalog. 1938. p. 7.

1371. *House of Better Living* (*Newsletter, Los Angeles*). 1940. Zippy juicer for your health (Ad). 12(59):3. Nov.
• ***Summary:*** This handsome display ad shows an electric Zippy Juicer, round, with a stainless steel top. Juice is flowing out of a spigot on the left and an electric cord is going off to the right. "At last! Pure fresh fruit and vegetable juices in your home–made possible by a machine of splendid speed and efficiency!"

Note: The name and address of the juicer's manufacturer are not given. Text in the center column of this page states: "A silent effective machine with a 1/6 Horsepower General Electric motor, fully guaranteed for one year The Zippy sells for $49.50... Let us demonstrate it to you."

1372. Lager, Mildred. 1940. Healthful philosophy. *House of Better Living* (*Newsletter, Los Angeles*) 12(59):2. Nov.
• ***Summary:*** "Try our new soy noodle, artichoke noodles, soy noodle quick soup..." "If you cannot tolerate milk, why not try soy milk? It comes in cans and can be used as regular milk. The Madison soy milk is homogenized, thick and creamy, with lots of food value. Comes plain or chocolate flavor." A portrait photo shows Mildred Lager.

Across the bottom of the page: "We serve fruit and vegetable juices–5¢ and 10¢ a glass. Try carrot and cocoanut."

Note: With this issue, the House of Better Living has a new address (3477 West Sixth St., Los Angeles) and phone number (EXposition 8144). It is still owned and operated by Mildred Lager. Address: 3477 West Sixth St., Los Angeles, California. Phone: EXposition 8144.

1373. Lager, Mildred. 1940. New items not listed in our catalog. *House of Better Living* (*Newsletter, Los Angeles*) 12(59):4. Nov.
• ***Summary:*** Items are listed by category in 2 full-page columns. Bakery goods: Penna 100% soy cookies, pkg. 18¢ (Lemon, almond, vanilla and chocolate flavor). Soy orange drops, doz. 15¢. Bill Baker's 100% soy bean cookies, pkg. 10¢.

Breakfast foods: Soy grits, lb. 20¢.

Coffee substitutes: Brevy. Nuveco. Ficgo in bags, box 25¢. Soy Koff, regular or drip, pkg. 25¢. Kofy Sub, Dr. Jackson. Cassa Fistula Bean. Date sugar.

Figs: Black Mission. Kadota. Calimyrna.

Dulse tablets, Thompson. Cereophyl tablets or powder (powdered grass [like chlorophyll]).

Juices–unsweetened: Soy and carrot juice, 8-oz. 10¢; 16-oz. 15¢.

Kitchen equipment: Zippy juicer, $49.50. Juice-O-Mat, $3.29. Hollywood Liquifier, $24.75. Note 1. This is the earliest English-language document seen (July 2021) that uses the word "Liquifier" to refer to an electric blender, or that mentions the "Hollywood Liquifier," an early brand of electric blender, or that contains the word "Hollywood" in the name of an electric blender.

Meat substitutes: Vegelona, 10¢, 25¢ can. Yum, 10¢, 25¢, 50¢ can. Gluten steak, 17¢, 27¢ can. Note 2. This is the earliest English-language document seen (July 2021) that

© Copyright Soyinfo Center 2021

contains the term "Gluten steak."

Noodles: Pfaffman [Williamsport, Pennsylvania] soy noodles, pkg. 13¢; 2 for 25¢. Gluten noodles, pkg. 25¢. Peanut oil, unrefined.

Penna Soya Products: Toasted soy nuts, pkg. 5¢; ½-lb 20¢; 1-lb. 36¢. Tenderized soy bean, 1-lb pkg. 25¢. Rokusun soy bean, lima type, 1-lb. pkg. 25¢. Soya puffs, ½-lb. can 25¢. Soya malt, ½-lb. 23¢; 1-lb. 43¢. Soya cocoa malt, ½-lb. 23¢. Soya cocoanut, ½-lb. 23¢. Soya banana, ½-lb. 30¢. Soya milk powder, plain, 1-lb. can 25¢. Soya milk powder, sweetened, 1-lb. can 25¢. Soya roast, 15-oz. 25¢. Soya loaf, 15-oz. 25¢. Soya sauce, 4-oz. 12¢; 8-oz. 19¢; 16-oz. 35¢. Soya virgin oil, 4-oz. 15¢; 8-oz. 23¢; pint 37¢; quart 67¢; ½-gallon $1.05; gallon $1.95. Soya cookies, 100%, pkg. 18¢.

Salt: Bragg Sprinkle, can 50¢. Soy-B-Malt, Cubbison, 8-oz. 25¢.

1374. **Product Name:** Yum (Bologna-Like Canned Meatless Loaf with Tofu).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Madison College, Madison, Tennessee.
Date of Introduction: 1940 November.
Ingredients: Soybeans, gluten, soy cheese [tofu], whole peanut meal, seasonings.
Wt/Vol., Packaging, Price: No. 2 can. 20 oz.
How Stored: Shelf stable.
Nutrition: Protein 19.1%, fat 11.1%, carbohydrates 11.5%, ash 2.5%, calories 221/100 gm.
New Product–Documentation: Ad (2¼ by 3 inches) in *Nature's Path* (USA). 1940. Nov. p. 428. "Yum, a new food." "For years Madison Laboratories have been experimenting with this new food to make it very tasty and yet being ever careful not to season it to the point of limiting its appeal to those who like the very spicy foods... Compounded from wheat gluten, soy beans, nut meal and vegetable seasonings, this new food... is right on the front row of body-building protein foods." Gives two recipes: Yum meatless balls. Breaded Yum cutlet. "Free: the *Madison Health Messenger* with new health news, soy bean information, new recipes, charts, etc. Obtain from your health food store or write to: Madison Foods, Madison College, Tennessee."

Madison Health Messenger. V. 49-2. p. 5. Can be used hot or cold.

Madison Health Messenger. 1949. V. 49-3. p. 4-5. A photo shows the front of the can's label. "The convenient 14 oz. size Yum now available.

"Yum is the favorite with those that like seasoned full body meaty flavors with a zest. Here is a food that is compounded from nature's rich grains, legumes, and vegetables. It is not a by-product of scraps and cooking juices, but a scientifically constructed food that provides rich complete protein and plain good eating. Yum is economical and easy to prepare. It may be used as taken from the can, sliced as a cold cut, or braised slightly in a well oiled pan, or mixed with sauer kraut (diced), or mixed in salads (diced)."

"Yum is Flavor-Full. A Complete Protein Food. Economical."

Yum–a mild, bologna-like-flavored, meatless loaf, used hot or cold. Ingredients: soybeans, gluten, soy cheese, whole peanut meal, seasonings. 14 & 20 oz. cans."

Taylor. 1944. *The Soy Cook Book.* p. 201.

Seventh-day Adventist Dietetic Assoc. 1960. *Diet Manual.* 1st ed. p. 95. Yum contains 16.00% protein, 5.20% fat, and 11.26% carbohydrate. Not listed in the 1965 *Diet Manual.*

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 162. Lists the ingredients in "Yum (Madison)." The ingredients are now: Wheat protein [wheat gluten], processed soybean, peanuts, soya flour, rolled oats, soy sauce, vegetable oil, tomato puree, onions, yeast extract, salt, garlic, MSG, hydrolyzed vegetable protein, sage.

It's Your World Vegetarian Cookbook. 1973. Glendale, California: Seventh-Day Adventist Church. p. 118. This is a canned product resembling cold cuts, made from wheat [protein] soy, and peanuts. It can also be used in salads or sandwiches. Now made by Worthington Foods.

1375. Slavick's. 1940. Twelve months to pay starting February (Ad). *Los Angeles Times.* Dec. 9. p. 7.
• ***Summary:*** This large pre-Christmas display ad features many modern electric kitchen utensils, each illustrated. "Waring Blendor. Converts fruits and vegetables into a smooth liquid. Mixes drinks, eggs, or batters. $29.75."

Note: this is the earliest document seen (July 2021) that mentions the "Waring Blendor" (which looks very similar to today's basic design) or that uses the noun "Blendor" (or "Blendors") in the trade name of an electric blender. Address: 427 W. 7th, Los Angeles.

1376. **Product Name:** Soy Gluten Wafers (42% Soya).
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1940.
Wt/Vol., Packaging, Price: 3.5 oz.
How Stored: Shelf stable.
New Product–Documentation: Battle Creek Food Co. Price List. 1940. 3.5 oz. 42% soy. Distributed through health food stores.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 5. The company sells Soy Gluten Wafers, containing 42% soya (probably in the form of soy flour). Distributed through health food stores.

Taylor. 1944. Soy Cook Book. p. 200. "Savory crackers made with soy flour, low starch content." Soybean Blue Book. 1947. p. 70.

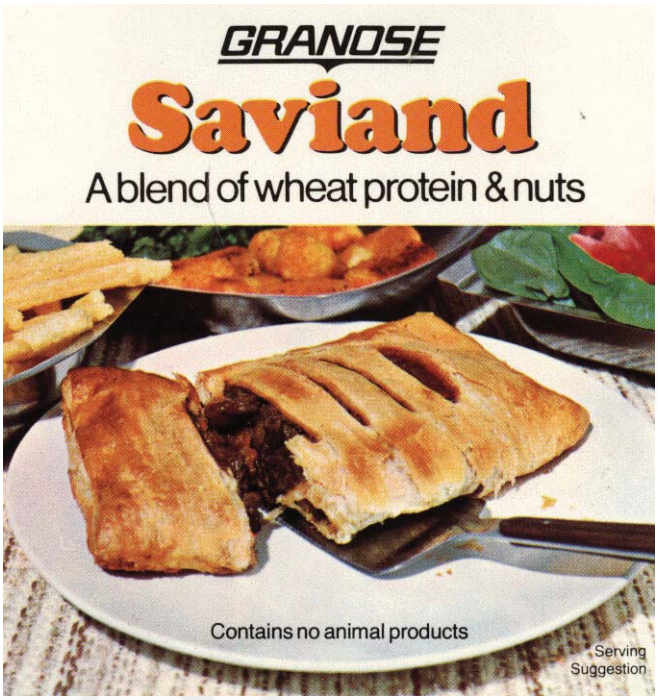
1377. **Product Name:** Soy Kee or Soykee (100% Soybean Roasted Coffee Substitute).
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1940.
New Product–Documentation: Price List. 1940. 16 oz.; Rosenberg's Original Health Food Store. 1940. Catalog of Health Foods... p. 18. "Battle Creek Health Products: Beverages–SoyKee $0.35." Miller. 1943. Distributed through health food stores.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 5. The company sells Soykee, made of 100% soya. Distributed through health food stores.

Taylor. 1944. Soy Cook Book. p. 200.

1378. **Product Name:** Soy Spread.
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1940.
Wt/Vol., Packaging, Price: 8 oz can.
New Product–Documentation: Price List. 1940. 8 oz. can.



1379. **Product Name:** Granose Protose (Formerly named Nutmeat).
Manufacturer's Name: Granose Foods Ltd.
Manufacturer's Address: Stanborough Park, Watford, Herts., WD2 6JR, England.
Date of Introduction: 1940.
Ingredients: Wheat protein, cashew nuts, peanuts, wheat flour, soya flour, yeast, salt, hydrolised vegetable protein.
New Product–Documentation: Manufacturer's catalog. 1980. April.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1940. It has been discontinued.

1380. **Product Name:** Granose Saviand (A Meatless Savoury).
Manufacturer's Name: Granose Foods Ltd.
Manufacturer's Address: Stanborough Park, Watford, Herts., WD2 6JR, England.
Date of Introduction: 1940.
Ingredients: Wheat protein, cashew nuts, soya flour, yeast, salt, hydrolised vegetable protein, onion, caramel.
Wt/Vol., Packaging, Price: 284 gm (10 oz) can.
New Product–Documentation: *The British Vegetarian.* 1960. Sept/Oct. p. 249. Granose produces Saviand, containing wheat gluten, ground nuts, yeast extract, onion, and caramel.

Manufacturer's catalog. 1980. April. "A product similar to Protose but with the addition of onion flavouring."

Form filled out and Label sent by Granose Foods Ltd.

1990. June 13. States that the product, made by Granose, was introduced in 1940. Label. 1990. 8.5 by 3.75 inches. Orange, black, and yellow on white. Two color illustrations of a Savoury (like a U.S. turnover, with a crust) on a plate with a spatula underneath it. "A blend of wheat protein and nuts. Contains no animal products. Saviand is a delicious savoury which is ready to serve either cold with salads or hot in pies, hot pots, etc. Slice or dice it. Ingredients: Wheat protein, water, peanuts, soya flour, yeast, salt, hydrolysed vegetable protein, onion powder, caramel. Dietary analysis upon request." This canned product is similar to Spam or Nuttolene. It is not sold in the pastry crust.

1381. Los Angeles City. 1940. Index to register of voters: Los Angeles City Precinct No. 998. Los Angeles, California. Los Angeles, California. 1 p.
• ***Summary:*** Under the letter "L" we read: "Lager, Miss Mildred M., 1901 West 2nd St., Merchant, R" [Republican].

Note: This is the earliest document seen (Sept. 2009) that shows Mildred Lager living at 1901 West 2nd St. We do not know where she lived before moving to this address. Perhaps she lived at her House of Better Living.

1382. Bragg, Paul C. 1940. The four generation health food cook book and menus. Los Angeles, California: Published by the author. Printed by Aetna Printing Co., Los Angeles. 169 p. Illust. No index. 24 cm.
• ***Summary:*** This book is especially interesting for the genealogical information and family photos it contains. Paul Bragg is now a grandfather [with two grandchildren], apparently unmarried, with three living children: Lorraine Bragg Stoddard, Polly Bragg, and Bobby Bragg. Lorraine

© Copyright Soyinfo Center 2021

has a son named Shocky. Paul's father, also apparently no longer married [to Carrie Chappius], is called "Daddy Bragg" and "Grand-daddy" Bragg; his true name [Robert E. Bragg] is not given. A nice portrait photo shows each of the family members separately; they all look healthy and happy. The cover photo shows Paul Bragg standing by a stove wearing a chef's white top hat and white clothing, and holding up a tasting spoon. The frontispiece is a half page photo showing Paul, his father, Lorraine, and Shocky seated, side by side on a wall, facing forward, each with arms around the back of the person setting next to him or her. The text states: Each of them displays the highest type of physical perfection in normal weight, abundance of energy, vitality, and absolute freedom from sickness." They attribute this perfection to their diet, but they "are not faddists."

Contents: Part I: Four generation menus. 1. Daddy Bragg's first generation menus: Everyday menus for the 'past middle age' group, high energy diet for the youthful maturate. 2. Paul Bragg's second generation menus: The gaining diet, the reducing diet, maintaining normal weight, supreme vitality diet. 3. Lorraine's third generation menu: The modern housewife's health and beauty menu. Polly's third generation menu. Bobby's third generation menus: The athlete's menu, the camper's menu. 4. Shocky's fourth generation menus: Baby's diet, children's foundation diet.

Part II: Important principles of modern health food cookery: Introduction, food combinations–are they necessary? (no), condiments (avoid vinegar, cayenne pepper, Worcestershire sauce), cooking utensils (avoid aluminum and tin), health cocktails (made of fruit or vegetable juices), should we drink liquids at meals? (fine if you wish), how to enjoy food, milk (important for its calcium), shortenings (some are OK, as from peanut oil, sesame seed oil, soybean oil, corn oil, etc.), salt (use in moderation, or use Sprinkle), white sugar (avoid), white flour (avoid), foods to avoid (long list, starting with alcoholic beverages, soft drinks, tea, coffee, tobacco, and drugs), the adequate diet (includes a serving of soybeans once a week, and 2 tablespoons of vegetable oil, such as soybean oil, daily), the importance of supplementary feeding (vitamin and mineral supplements plus orange juice and Tava–a drink rich in vitamins).

Part III: Recipes. 1. This is the way to prepare delicious, healthful soups. Chapter 10 is about meat substitutes, and calls frequently for Bragg Meal Wafers, Bragg Broth or Bevron, Bragg Meal cereal, etc. Chapter 11, which is about meats, begins: "Meats are one of the greatest energy building foods we have when properly prepared." Recipes call for steak, chicken liver, sweetbreads, veal kidney, boiled heart, scrambled brains, stewed tripe, roast beef, meat loaf, leg of lamb, roast chicken, roast turkey, etc.

The most important principle is (p. 25): "Eat food as close to Nature as you possible can. Keep it primitive." Brown rice is the best type of rice. Molasses must not contain sulphur dioxide. Honey is the best sweetener, followed by raw sugar or brown sugar. Raw milk is preferred. Avoid foods that contain "benzoate of soda or lye" [preservatives] or any other synthetic ingredient. Unsulphured dry fruits are the best. Use natural cheese, not processed. Avoid cured meats such as ham, bacon, corned beef, salami, bologna, or frankfurters. Buy whole grain flour and cereals. Avoid vinegar and baking soda. Try to save and eat the skins of vegetables, such as potatoes, carrots, beets, tomatoes, etc.

Note: Polly Bragg married a Mr. Sorrel and on 10 Feb. 1936 gave birth to a boy, Robert Paul Sorrel, in Los Angeles. Address: P.O. Box 428, Burbank, California.

1383. Carque, Otto. 1940. Vital facts about foods: A guide to health and longevity with 200 wholesome recipes and menus and 250 complete analyses of foods. 4th ed. Glendale, California: Natural Brands, Inc. 239 p. 23 cm. Revisions and supplements by Mrs. Lillian R. Carqué. [20+* ref]

• ***Summary:*** This manual of food reform discusses the importance of a simple vegetarian diet, fresh air, pure water, exercise, and rest. Also discusses acid and alkaline foods, the treatment of disease, and food preparation. The author lived 1867-1935.

The nutritional value of soy beans is discussed briefly on pages 113, 145, 153, 162, and 174. The section titled "The Soy Bean, a Remarkable Food" (p. 176-78) describes and discusses boiled soy beans, soy bean milk, tofu, soy sauce, and soy bean sprouts; recipes for Baked soy beans, Soy bean loaf, and Soy bean bread are given. The content of this section is slightly different from that of the 1933 edition.

A table (p. 221) gives the average chemical composition of various legumes, including soy beans.

Note: This enlarged 4th edition contains 239 pages, compared with 208 pages in the first 3 editions. The type for the entire book appears to have been reset. Address: Los Angeles.

1384. Davis, Adelle. 1940. Optimum nutrition. London. 247 p. *
Address: Los Angeles, California.

1385. Mariposa. 1940. Hollywood glamour cook book. Miami, Florida: Glamour Publications. Distributed by M. Barrows & Co. xviii + 427 p. Portrait. No index. 21 x 16 cm. [3 ref]

• ***Summary:*** The author presents herself as a glamour girl, who lives in Miami, Florida. She is "Your 'Mystic Pot, with herbs and spice. I charm your meals and make them nice." "Foreword: You must have wondered how the Movie Stars keep so glamorous, vivacious, young-looking and slender, they seem more like gods and goddesses than real people. No wonder they are fairly worshipped by the Movie Fans! This book will disclose to you the beauty secrets of the Movie Stars..." The key is a healthy diet and herbs.

Recommended foods: Whole wheat and soy bean spaghetti, La Choy Soy Sauce and La Choy Molasses Sauce, Soy bean crackers, goat's milk (not cow's milk), all seafoods, fish, poultry, rabbit, venison, lamb, frogs' legs. Foods to avoid: White bread, white flour, white sugar, white rice, spaghetti etc, made of white flour, beef, veal, pork, lard, suet, grease, sulphur dried fruits, table salt ("free running," iodized, but "bag salt" is OK), most soda fountain drinks, "pop" or any drink put up with carbonated water, gassed, dyed, or faked foods. Soy-related: "Legumes" include soy beans (p. xi). Soy honey bread (with soy bean flour and soy milk, p. 7). Soy honey rolls (p. 8). Soy corn sticks (with soy bean flour, p. 22). Soy vegetable flour sticks (p. 23). Soy waffles (p. 24). Soy [pie] crust (p. 35-36). Soy short cake (p. 52). To make soy bean milk and corn milk (from soy bean flour, p. 78-79). Soy milk and carrot juice (p. 79). Soy bean coffee (p. 83). Coffee substitutes (incl. soy, p. 85). Canapes d'amour (with soy bean bread, p. 102). To cook Soy Sea Shells or Soy Macaroni (p. 122). Soy kidney pie (p. 132). Soy macaroni or spaghetti (with soy or Savita Sauce, p. 200). Soy beans–highlights (p. 213-14). Soy baked beans (p. 214). Proteins (incl. soy, p. 386-87).

Also discusses: Garbanza pie crust (p. 36, 212). Electric vegetable juicer (p. 68). Importance of alkaline diet (p. 68-69, 238-39, 388-91). A table (p. 101), titled "Raw nut butters," lists 12 types: "Peanut, butternut, lychees, almond, pecans, pignolia nut, pistachio nut, paradise nut, cocoanut, hazelnut, beechnuts, cashew, walnut, chestnut, Brazil nut, and sesame tahini. Note: These butters are sold at the fancy grocer's or Health Food Stores." Note: This is the earliest English-language document seen (Aug. 2017) that mentions "tahini" or "sesame tahini"–a smooth paste of sesame seeds. According to *Webster's Dictionary,* the word "tahini" comes from the Turkish *tâhin* and was first used in English in about 1899.

Carrot peanut butter canape (p. 101). Mock liverwurst. Vegetarian dinner party (p. 287).

Glamour guide (p. 360-61). Planetary foods and menus (by astrological sign, p. 277-341). Tables showing the best food sources of various vitamins and minerals (p. 365-417).

In the chapter titled "Snacks and Beverages" is a recipe (p. 76-77) for a Date and goat's milk shake, which is "better than any soda treat" and which calls for use of an "electric blender." The recipe for "Orange honey nanny shake" (p. 77) states: "For a more frothy drink, whip with electric blender..." See recipe for soymilk made from soy flour. Recommends buying foods and herbs in health food stores.

In the section titled "Recognition and gratitude" (p. 392) near the end of the book, she thanks "Henry Lindlahr, M.D.," "Otto Carqué, Mausert, M.D.," and many other lesser-known people.

Talk with Chef Akasha Richmond. 2004. June 5. Akasha has been able to find out very little about the author of this book, who she thinks self-published it. Although she lives in Florida, she talks about "glamour girls" and Hollywood. Address: 1265 S.W. 11th St., Miami, Florida.

1386. Photographs of Clarke Irvine, founder, editor and publisher of *California Health News.* 1940. California.

• ***Summary:*** These three black-and-white photos were sent by Celeste Damron, Clarke Irvine's daughter. (a) Clarke in about 1910, a whole-body photo, dressed is a U.S. Navy sailor's uniform, leaning against a post. (b) Clarke in about 1940 dressed in a light suit and tie, wearing a small mustache with his hair parted in the middle.

(c) Clarke in about 1960, wearing a darker suit and tie, with his hair parted on the right, and a few gray hairs at his temples. (4) A photo of a typed letter dated May 5, 1964, to "Dear Myra." In it he attempts a brief genealogy his branch of the Irvine family (see separate record).

1387. Waring Corporation (The). 1940. Recipes to make your Waring-go-round. New York, NY: The Waring Corporation. 48 p. No index. 15 x 23 cm.

• ***Summary:*** See next page. Within its 47 pages of recipes, this booklet contains 12 early recipes for "Milk smoothees" [smoothies]–Apricot, chocolate mint, banana, marshmallow mint, peach, date, pineapple-mint, pineapple, peanut, prune, strawberry, and melon. Directions for all: "Place milk (1 cup) in the Container. Add other ingredients (e.g., 1 medium-size ripe banana). Add 1 cup of finely cracked ice to chill Smoothee. Put cover on Container. Turn on Waring and run until contents are thoroughly blended. One-half cup of ice

© Copyright Soyinfo Center 2021

cream added to any Smoothee makes a richer drink. Two marshmallows may be added instead of ice cream with favorable results. Yield: 1 pint."

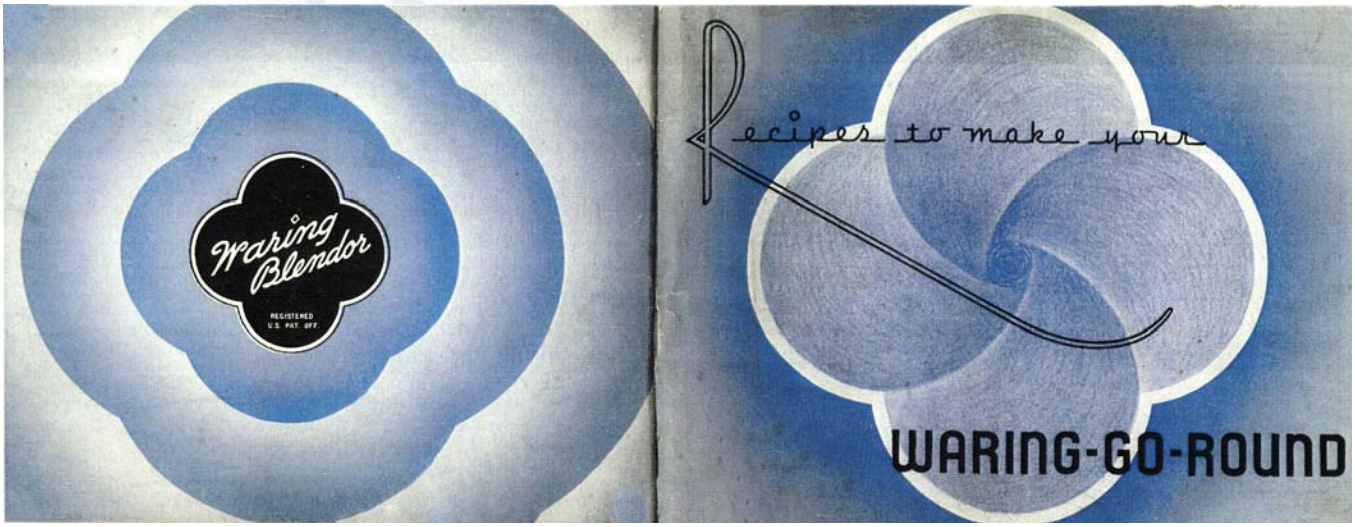
Contents: Beverages. First courses. Main courses and snacks. Relishes and jellades [sic]. Hot breads. Canapes and sandwich spreads. Salads and salad dressings. Cakes and cookies. Desserts. Special diets. Cocktails and party drinks (bar section). Lubricating and operating.

On the blue and white cover is an illustration showing how the four-leaf clover cross-sectional design causes the liquid contents to be drawn into the blade at the center. Page 2 states: "The Waring Blendor is produced in two models, the standard and the de luxe. The recipes in this booklet are for both models. The de luxe has a two-speed motor. Both have glass containers. On page 48 is one-year warranty. On the back cover is the product's registered trademark, the words "Waring Blendor" in a four-leaf clover perimeter.

Note 1. This is the earliest document seen (July 2021) that uses the word smoothee (spelled that way) to refer to a smooth, thick, refreshing beverage made in an electric blender. The basic ingredients for most seem to be milk, fruit, and finely cracked ice or ice cream. In two, the fruit is replaced by chocolate or peanut butter.

Note 2. This is the earliest English-language document seen (July 2021) that uses the verb "to run" ("run until contents are thoroughly blended") in connection with an electric blender. Note that it also uses the verb "to blend." Address: 1697 Broadway, New York, NY.

1388. Waring Products. 1940. 340 recipes for the new Waring Blendor. New York, NY: Waring Products Corp. 63 p. Illust. No index. 15 x 23 cm.



• ***Summary:*** This book is incorrectly cited using the words that appear on the cover rather than those on the title page, and using the string of copyright dates that appear at the bottom of the title page: "Copyright 1940, 1942, 1946, 1947.

The correct title for 1940 is: "Recipes to make your Waring-go-round." (48 p.).

The correct title for 1942 is: "Tested recipes: For hostess, mother, dietician. Waring Blendor." (64 p.).

This incorrect citation appeared in the *Oxford Encyclopedia of Food and Drink in America.* 2 vols. (2004), in the entry for "Blenders" (Vol. I, p. 104), by Meryl S. Rosofsky. Address: New York, NY.

1389. *Better Nutrition.* 1940--. Serial/periodical. Established by Jack Schwartz.

© Copyright Soyinfo Center 2021

• ***Summary:*** Murray, Frank; Tarr, Jon. 1984. *More than one slingshot: How the health food industry is changing America.* See p. 53-54. This magazine is now owned by Communication Channels, Inc. (CCI, Atlanta, Georgia), which, in turn, is owned by Argus Press, a division of British Electric Traction Co. of London, England. "*Better Nutrition* was started by Jack T. Schwartz in 1940 following service in World War II. Its most recent editors have been Dr. Maurice Shefferman; Anthony Lord... and Frank Murray, the current editor."

Talk with Helen Reiser, wife of Sam Reiser of Balanced Foods. 2006. April 10. This was a consumer magazine, 8½ by 11 inches in size, which was sold in bulk to health food stores, to be given free of charge to their consumers in order to educate them and inspire them to but that store's products. Many stores had their name, address, and phone number printed in large letters in a blank rectangle near the bottom of the magazine's cover.

1390. Ellis, Grace McIlrath. 1941. The Ellises meet the Blenders–and all hands applaud. *Better Homes and Gardens* 19(6):41, 88. Feb.

• ***Summary:*** Before she started researching them, the writer had a hunch that her family would like "one of today's new 'food blenders'... one of those whipping, chopping, liquefying whizzers." How about something that "will whiz up a vegetable or fruit health drink, pulverize a lemon peel, blend nut meats into a fruit drink, zip together a velvet gravy-thickening, or crumble a dozen crackers to crumbs–and do each job in less than a minute at the flip of a switch? Then you'll delight in a 'food blender.'

"Blenders are new in the family kitchen but old hands at lunch bar and soda fountain. A blender isn't a mixer substitute." It has "a sturdy motor housed in a metal base, with a covered glass container atop. At the bottom of the container are the whirring blades that do the business."

With a blender you can "swizz in a few chives or mushrooms." It "purées soaked dried fruits for whips..." "Let your own young fry mix their own Fruit Smoothies. They'll guzzle their milk–and love it." The Ellises hope you, too, will "soon be swizzing up delectable foods." Photos show: (1) Three kids around a Knapp-Monarch Liquidizer, each drinking from a glass through a straw. The caption: "Banana Smoothie! Oh Boy! Betty and Billy Ellis and Cousin Peggy mix their own!" Ingredients: Two and one-half cups milk, 2 big *ripe* bananas (yellow peel flecked with brown) and one tablespoon sugar." (2) Mr. Ellis with the "cheese spread he's just whizzed up" in a Waring Blendor. (3) Aunt Grace just zipped up a prune puree in her Universal Mixablend.

In the section titled "Teases appetites–boosts health" (p. 88) we read: "At home they're constant tempters for lazy appetites. Let your young fry mix their own Fruit Smoothies. They'll guzzle their milk–and love it."

Note 1. This is the 2nd earliest English-language document seen (July 2021) that contains the word "smoothie" (or "smoothies"–spelled that way).

Note 2. This is the earliest English-language document seen (July 2021) that uses the verb "to purée" ("purées soaked dried fruits"), or the verb "to swizz" ("swizz in a few chives" or "swizzing up delectable foods"), or the verb "to whiz" ("will whiz up a... drink" or "just whizzed up"), or the verb to zip ("zip together a velvet gravy thickening") ("Grace just zipped up a prune puree") in connection with an electric blender.

Note 3. This is the earliest English-language document seen (July 2021) that uses the word "Liquidizer" to refer to an electric blender (it is part of a brand name). It is also the earliest English-language document seen (July 2021) that mentions the Knapp-Monarch Liquidizer.

1391. *Soybean Digest.* 1941. Classified ad: Market Street. Feb. p. 12.

• ***Summary:*** This section contains two ads. (1) "Edible soybeans–Bansei and Aoda. Purity 99.5 percent. Germination 96 percent. No samples. No sales under two-bushel lots. Write 'Soybean Johnson, 1151 Claytonia Terrace, Richmond Heights, Missouri. Shipments from farm, northwestern Ohio."

(2) "Try our delicious all-purpose flour and vacuum packed soybean health foods. Judd Mill and Cannery, Asheville, North Carolina."

1392. Frank, Milo O. 1941. Just what is health food? *Health News* (*Hollywood, California*) 9(5):5, 9. March 14.

• ***Summary:*** "Two meanings are attached to 'health foods.' The wider includes all nutriment that the body can digest with benefit. The narrower refers to *selected products of high natural value* and to *supplements* prepared for specific purposes. But in every case, a real health food, is truly beneficial.

"On the distributor rests the duty of investigating every product to make certain that it meets this definition.

"Are you aware that the sugar problem is solved? The National Sugar Refining Co. has heard our demands and agrees that we must have what we want. Health shops are busy selling *Grans,* 'raw sugar at its best.' It's wholesome with natural cane juice..."

"Some firms have won such a reputation that the very *name* is a guarantee. One of these is the Pfaffman Co., Cleveland [Ohio]. They began in 1873 and in 1914 pioneered health foods. From the start, they catered to those demanding utmost purity, served hospitals and other institutions where nutritive values are important. No one really knows how good macaroni can be unless familiar with their Soymac brand made of the highest quality durum wheat to which whole soybean flour has been added. And everybody likes their 'Kwik Soup'–even the sternest dieticians!"

"Also outstanding in the health field are the famous

© Copyright Soyinfo Center 2021

Madison products from Madison, Tennessee, delicious new soy foods and meat substitutes that accomplish more than arguing to produce enthusiastic vegetarians." Address: 2027 Hillhurst Ave., Los Angeles, California.

1393. Hain. 1941. Delicious protein dishes in Lent (Ad). *Health News* (*Hollywood, California*) 9(5):5. March 14.
• ***Summary:*** "Each of Hain's delicious nut-meats contain almost twice the protein value of meat, without being acid-forming. Any or all of these will make Lenten dishes deliciously tempting and heartily nourishing for all appetites! Hain Protone, Soytone and Nutone, together with Soy Sandwich Spread and Hain Soy Beans, are the finest foods prepared! Nearly twice the protein value of meat is contained in these excellent foods and, unlike meat, they are not acid-forming. Hain's variety of Soy and Nut Meats offers you a never-tiring combination of rich protein foods.

"Look for the Hain label at all Health Food Stores. It's your Guarantee."

1394. *Health News* (*Hollywood, California*). 1941. As Hollywood dines, so dines the nation. 9(5):4. March 14.
• ***Summary:*** "Hollywood has been the film capital for decades. Then it made first [sic] for radio broadcasts. Aviation hereabouts is now tops. It's also recognized as leader in fashions, beauty and cosmetic sensations. But today it has swept to the top again, this dizzy, 9 o'clock town, for out of it has come the latest race, the race for health, physical fitness and good looks.

"Here emanate the latest tips on raw juices, health recipes, liquefiers, juicing machines, health cocktails, books, chemical gardens, research and new products. Film stars and executives read Health News, eat raw salads, drink raw juices, and get healthier and happier."

1395. *Health News* (*Hollywood, California*). 1941. Health food industry expands: Fresh opportunities opening. 9(5):1. March 14.
• ***Summary:*** "No sickness, no dramatic recovery, but straight thinking led genial Milo Frank into this work and prepared him for his current prominence as wholesale distributor for California, Arizona, New Mexico." At Cornell University, he studied agriculture, nutrition, and chemistry. Graduating in 1915, he entered the wholesale fruit business in New York City, then ultimately came to California as his firm's western representative. In 1937 he made the decision that began his new career. He recently finished a built-to-order warehouse at 2037 Hillhurst, Los Angels. A large portrait photo shows Milo Frank.

1396. Irvine, Clarke. 1941. Did you know? *Health News* (*Hollywood, California*) 9(5):5. March 14.
• ***Summary:*** This is a composite of illustrations / cartoons and accompanying information (some serious, some silly) in a box, with a large portrait illustration of "Skipper" Clarke Irvine, the writer. For example: "Editor of *Health News* [Irvine], when regaining his health, hiked from San Diego to L.A. [Los Angeles] eating only avocadoes–a six day grueling trip of 133 miles."

1397. Irvine, Clarke. 1941. Health! With remedies and recipes, by Clarke Irvine (Ad). *Health News* (*Hollywood, California*) 9(5):9. March 14.
• ***Summary:*** "A fine book for beginners in the health life; 5th edition. 50¢ at health shops or by mail from *Health News.*" A small portrait photo shows Clarke Irvine. Address: 1702-D N. Vermont, Hollywood, California.

1398. Soroyal Brands. 1941. Profitable lifetime business (Ad). *Health News* (*Hollywood, California*) 9(5):9. March 14.
• ***Summary:*** "Financially responsible distributor wanted representing Seroyal Brands, complete line Vitamin and Mineral Foods. Appoint subagents. Excellent opportunity. Seroyal Brands. Orinda, California." Address: Orinda, California.

© Copyright Soyinfo Center 2021

• ***Summary:*** "American health food history began over 100 years ago. In the 1830's, Sylvester Graham called for diet reform. Fearless amidst ridicule and even physical attacks, he exposed the evil of depleting whole grains to manufacture lifeless white flour products that 'keep.'

"Editors leaped to action. *Journal of Health* (1829-'33), *Moral Reformer* (1835-'37), *Library of Health* (1837-'42) and other predecessors of *Health News* began the work. A second reform wave in the 1870's brought *Science of Health* and *Herald of Health.*

"First health restaurants were in Graham boarding houses, according to Dr. Christopher Gian Cursio, nature-cure historian. Strict dietetic principles prevailed there and flesh foods, tobacco and alcohol were spurned. New York City had the first (1831), Boston [Massachusetts] the second (1836, at 23 Brattle St.), Rochester, N.Y., the third (1839).

"In 1850, James Jackson, M.D., began to manufacture the first health product with its own trade name, *Granula,* from wholewheat flour. Soon after this came his grain coffee substitute, *Soma,* precursor of the many food beverages now so popular.

"First of shops resembling today's was Health Food Company, New York City, in the 1870's, which manufactured and sold direct to consumers *granulated wheat* (fine, wholegrain flour) and *wholewheat gluten,* free from starch, also *Pomarus* [*sic, Pomarius*], a sugarless fruit product made into thick jelly by evaporation.

"In those days, health magazines carried ads for wholegrain crackers, Anger's wholewheat bread, health resorts.

"Although intelligent individuals saw the harm in processing foods, condemned the depletion of common staples, and applauded the Pure Food laws of 1906, the movement did not gain force until the world war [1914-1918]. Then Alfred Watterson McCann astounded physicians by curing the scurvy-suffering seamen on the German raider *Kronprinzessin Cecilie* at Newport News, Va. [Virginia], with orange juice. This was the first dramatic vitamin victory in the U.S. McCann's books and articles attracted nationwide attention and other progressives joined the fight to save 'starving America.'

"In the early 1920's, health foods stores began to become more important. At first some resembled a sanitarium, all white, with foods hidden away mysteriously on shelves or under glass. Others operated by humanitarians without business experience, looked like grocery museums, wild confusion. Little by little, sound commercial methods were introduced. Today health foods have become an established industry. Dealers have associations, trade organizations. Trained dieticians and other counselors assist in guiding patrons. The public recognizes the need for products containing natural nutritional values in tasty and high potency concentrations.

"Other healthguards are now on sale, selected cooking utensils, shredders, juicers, cosmetics, etc. Foods include vitamin and mineral concentrates, dried fruits, juices, wholegrains, ingenious vegetarian meat substitutes, herbs, goat milk and cheese, sweets from fruit and honey, etc. Today huge vitamin purchases by the U.S. government and federal efforts to improve public eating habits forecast a new expansion for health foods."

A tiny portrait photo shows Father Kneipp, of European water-cure fame.

1404. Grand Central Public Market. 1941. Dried apricots (Ad). *Los Angeles Times.* May 30. p. A7.
• ***Summary:*** "Liquefiers–ea. $13.95. Dependable Whiz-Mix machine. Fast and sturdy. Has power and utility. Ask for demonstration.

"Jones Grain Mill. 322 S. Hill Street. Telephone MIchigan 7473." Address: Between 1st and 4th sts. [Los Angeles, California].

1405. **Product Name:** Stakelets (Vegetarian Beefsteak).
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1941 May.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Los Angeles Times.* 1941. March 7. p. A6. During Lenten season enjoy: Madison Foods. Includes "Stakelets."

1406. *Health News* (*Hollywood, California*). 1941. Star makes juices (Photo caption). 9(11):9. June 6.
• ***Summary:*** This photo shows a female movie star dropping a piece of fruit into her Hollywood Liquefier (an early blender). The lower caption reads: "Lynn Bari, one of filmdom's famed ones, is a happy user of the Hollywood Liquefier which has found its way into so many homes of screen stars. They have found that liquefied foods beat any other form of 'pick-up' after a hard day's grind before the sound cameras."

1407. Hollywood Liquefier Sales. 1941. Many physicians say the Hollywood Liquefier is the master invention of the twentieth century and may well change the eating habits of the American people (Ad). *Health News* (*Hollywood, California*) 9(11):8. June 6.
• ***Summary:*** "Modern science tells us that vegetables and fruits contain essential minerals and vitamins necessary for the proper maintenance of the human system. Lack of minerals and the living vitamins lead to many conditions such as constipation and its attendant evils.

"The Hollywood Liquefier, with its tremendous speed of 25,000 R.P.M. thoroughly liquefies fruits, vegetables, meats and nuts, thereby supplying the body with all essential minerals, chemicals, vitamins and natural salts in easily

© Copyright Soyinfo Center 2021

digested and quickly assimilated form."

A small illustration shows the Liquefier [blender], with fruits and vegetables going into the top of the open glass jar. The base is tear-shaped, not round.

Note: Next to this ad is an article about Hollywood stars who use and like the Hollywood Liquefier, including Spencer Tracy, Tyrone Power, Shirley Temple, and Milton Berle. Address: 4156 Beverly Blvd., Hollywood, California. Phone: FE 2166 or 2167.

1408. Madison Foods. 1941. A treat without meat (Ad). *Nature's Path* (*New York City*). July. p. 273.
• ***Summary:*** "Steaming hot or cold, you may have delectable foods without using meat of any kind. From these five basic food [products]–Soyburger, Stake-Lets, Vigorost, Not-Meat, and Yum–dozen of tasty entrees may be served to the delight of the most fastidious guests. Duplicate your favorite meat dish... All five basic foods contain complete protein... All five of these foods are hermetically sealed in enameled cans. Prices range from 10¢ for a 5-ounce can to 50¢ for a 39-ounce can. Available at health food stores and health food departments.

"Free–new issue *Madison Health Messenger* with newest information about soy beans, recipes, etc. Copies available at health food stores." Address: Madison College, Tennessee.

1409. *New York Times.* 1941. Promotion urged for health foods: Eddy tells producers public must be educated on value of vitamin products. 'Enriched' bread is cited: Sales poor because buyers 'don't know what it's all about,' convention hears. Aug. 27. p. 33.
• ***Summary:*** The National Health Foods Association is holding its fourth annual convention at the Hotel McAlpin in New York City, before 500 manufacturers and retailers of health foods. The entire industry includes an estimated 50 manufacturers, whose plants specialize in turning out $75,000,000 a year worth of health foods, which are sold at more than 500 retail outlets.

Dr. Walter R. Eddy, Professor Emeritus of Physiological Chemistry at Columbia University, has been studying sales of a special "enriched bread," fortified with vitamins and minerals and enthusiastically sponsored by nutrition experts and doctors.

There were special exhibits of canned and fresh vegetable juices, dried fruits enriched with vitamins, dietetic candies, vitamin capsules, etc. The convention will conclude on Friday.

1410. *Oakland Tribune.* 1941. Last rites set for state pioneer: Salt industry leader succumbs in Contra Costa County. Sept. 2.
• ***Summary:*** Obituary for Ross W. Coward, who died last Friday [29 Aug.] at Concord, Contra Costa Co., California. Born in Oakland in 1875, his father was Hamilton Graham Coward. He is survived by a widow, Lucy Coward.

Note: Ross Coward was Patricia Pendleton Bragg's great-uncle on her mother Nettie's side. He was in partnership with his brother, Patricia's maternal grandfather (who, in the 1920s was referred to locally as "The West Coast Salt King"), in a solar salt reclaiming business in the Bay Area.

1411. Bragg (Paul C.). 1941. Washington! Look! Tonight at 8:00. Paul C. Bragg (Ad). *Washington Post.* Sept. 22. p. 22.
• ***Summary:*** "One of America's foremost nutritionists will tell you how little mistakes in eating can keep you from enjoying vibrant health. Learn how to eat your way to better Health. Absolutely free at 8 P.M. National Press Club Auditorium, 14th and F Sts. N.W., Washington, D.C."

1412. International Nutrition Laboratory. 1941. New items for the table: Soy products by Miller (Ad). *Soybean Digest.* Sept. p. 17.
• ***Summary:*** A 1/8 page ad. The three new soy products are: "Soy-A-Malt–A delicious wholesome soy-malted milk–a pure vegetable beverage containing all and more of the food qualities of milk."

"Canned Green Soybeans–Delicious creamed, buttered, or in soups and salads.

"Soyalac–Spray-dried Infant Food–the perfect formula for the newborn infant–especially fine for malnutrition and allergic conditions.

"Available in Health Food Stores everywhere or for further particulars regarding these Miller Soya Foods write International Nutrition Laboratory, Mount Vernon, Ohio."

Note: The meaning of the term "Canned Green Soybeans" is unclear. They were probably canned mature soybeans with green seed coats rather than canned green vegetable soybeans. Address: Mt. Vernon, Ohio.

1413. Ralphs Grocery Co. 1941. "68 years of progress." Celebrating the opening of Ralphs new store at 14049 Ventura Blvd. (corner Hazeltine) (Ad). *Los Angeles Times.* Oct. 25. p. 8.
• ***Summary:*** This full-page ad lists many products that will be on sale from Oct. 25th to 28. Part of the ad is for "Loma Linda. Ovensweet Ruskets, malted toasted whole wheat biscuit, 12-oz. pkg.–12¢. Ovensweet Kris-bits, 13-oz. pkg.–12½¢. Oven cooked wheat, 1-lb. Cello–12¢. 2-lb. Cello–20¢.

Another part is for "Cubbison's. Assorted toast, per pkg.–13¢. Vegetized wheat cookies, per pkg.–13¢. Assorted cookies, Honey macaroons, or Dunkerettes, per pkg.–8¢. Wheat soda crackers, per pkg.–9¢.

Also: "Ficgo coffee substitute. 1-lb. pkg. or Individual bags (25 to a pkg.)–each 25¢." Address: [California].

1414. *Business Week.* 1941. A point for soya: Millers cheered

© Copyright Soyinfo Center 2021

as their flour wins place in Army's new "para-ration" but price and supply problems persist. Nov. 1. p. 32, 36.
• ***Summary:*** The Army's new vest-pocket "para-ration, which contains 3,726 calories (see *Business Week*, 25 Oct. 1941, p. 24) has made the millers of soya flour happy. Exactly 975 of the calories in the compact super-diet are supplied by a new biscuit which contains soya flour, and to which the military has given the time-honored name of pemmican.

Note: Pemmican is a concentrated mixture of fat and protein used as a nutritious food. The word comes from the Cree word *pimîhkân*, which itself is derived from the word *pimî*, "fat, grease". It was invented by the native peoples of North America, by combining dried meat with berries and nuts (Source: Wikipedia, Nov. 2013).

"The soya millers, always looking for something to boost their product from the status of a health food to that of a grocery-store staple, think that this is just the recognition they have been waiting for."

Three manufacturers have been working on the biscuit: Loose-Wiles Biscuit Co., National Biscuit Co., and Miller-Parrot Co. of Terre Haute, Indiana.

The ingredients for one bakery batch are: 103 lb. wheat flour, 73 lb. whole-wheat flour, 100 lb. low-fat soya flour, 112 lb. whole eggs, 114 lb. shortening, 70 lb. fine-cut oatmeal, 32 lb. gelatine, 70 lb. dried skim milk, 24 lb. sugar, 12 lb. molasses, 3 lb. ammonium bicarbonate (used like baking soda {sodium bicarbonate} as a raising agent for flat baked goods), 3.75 lb. salt, and 9 oz. cinnamon.

In recent years, the total U.S. demand for soya flour has averaged about 25 million lb. a year. This year lend-lease for Britain is taking 3-4 million lb. every month, which is 150-200% of total previous output.

1415. Lust's Health Food Bakery. 1941. BakerLust–Sends you a hearty Christmas greeting, and a popular priced Christmas special offer (Ad). *Nature's Path* (*New York City*). Dec. p. 459.
• ***Summary:*** This ad (two-thirds page) lists various foods and their prices. Soyfoods include: ½ lb. Soynuts (Crisp-coated) $0.20. 2 pkgs. Soya cookies (a real alkaline sweet). $0.24. One 14 oz. box Soya milk powder $0.35. Address: 309-311 E. 56th St., New York, NY.

1416. Prehn's Health Food Store. 1941. Headquarters for soybean products (Ad). *Soybean Digest.* Dec. p. 12.
• ***Summary:*** "Let us supply you with Soybean Foodstuffs. Choose from such a wide variety as Dr. Miller, Dr. Fearn, Madison College, Soy Good, Battle Creek, Happy Hour, Penna Soy, Mother's Choice, Veta-Roni, Loma Linda, Bill Baker, Mrs. Hauser.

"Write for a Price List. We ship to 44 states. Why not let us ship to you... Located on the campus of the University of Illinois one block east of the Old Agriculture Building." Address: 700½ South Goodwin St., Urbana, Illinois. Phone: 6-1691.

1417. Gerlach, A.J. 1941. Re: Your valuable work and Rokusan soya nut. Letter to Mr. W.C. Baker, Ojai, California. 1 p. Typed, with signature on letterhead.
• ***Summary:*** "You are developing an interesting, intriguing and invaluable line of vital and healthful foods. Your work will never be forgotten by this age. You have made alkaline foods desirable and available for our people.

"I have been very much concerned with soya bean. The only soya that meets with my full approval now is the Rokusan soya nut. The analysis shows this one to have the highest alkaline content with the minimum of objectionable substances and the most desirable arrangement of alkaline salts according to my understanding of the subject. You know your beans... I have nothing for sale. I am after only the truth. Sometime please tryout this Manchurian Rokusan or Illini soy nut if you have not done so already. For flavor it has no equal.

"To date I have not received the sample soya puffs you wrote about some time ago."

Note: The elaborate letterhead states that the Defensive-Diet League of America, is an international organization, founded in May 1922 as "The Voice of health" and a "Professional clearing-house of dependable dietary information." The executive office is a 1409 North 27th St., Milwaukee, Wisconsin. The names of the 7 members of the executive council and 8 officers are given. Many have an M.D. degree, but there are also some chiropractic, osteopathic, and naturopathic doctors. Address: M.A., D.O., D.C., Professional Advisory Board, Defensive-Diet League of America, Route 1, Box 39, Los Gatos, California.

1427. *Health News* (*Hollywood, California*). 1942. Women voters boost soybean to win war. 10(8):1. April 30.
• ***Summary:*** Not politics but health foods are winning the attention of the New York City League of Women Voters. They have adopted the slogan "Know your soybeans" in a better nutrition drive.

"Would you eat beans for democracy?" ask league workers. From their headquarters at 151 East 50th street, they distribute soy recipes for soups, main dishes, casseroles, etc. "At Freedom Forums, they urge the use of soybeans for their morale vitamin (B-1).

"Health shops have long featured soy products in wide variety, highly favored for nutritive factors and alkaline reaction."

1428. *Health News* (*Hollywood, California*). 1942. Leading U.S. health food stores selling *Health News.* 10(8):10. April 30.
• ***Summary:*** This directory is organized alphabetically by state. Within each state, the entries are arranged alphabetically by city; for each is given the name of the store, its address and phone number. A bold dot before the city means that the store also serves health meals. The states are: Arizona (4 stores). Arkansas (1). California (66). Colorado (2). District of Columbia (1). Florida (2). Georgia (2). Hawaii (1). Illinois (10). Indiana (3). Iowa (1). Kansas (2). Michigan (10). Minnesota (2). Missouri (8). Nebraska (3) New Jersey (1). New York (18). Ohio (9). Oklahoma (1). Oregon (3). Pennsylvania (9). Texas (7). Utah (1). Washington state (11). Wisconsin (5).

Thus, the states with the most stores listed are: California (66). New York (18). Washington state (11). Michigan (10). Within California, there are 27 stores in the greater Los Angeles area (incl. Beverly Hills, Glendale, Hollywood, Huntington Park, Long Beach, Los Angeles, North Hollywood, Santa Monica, West Los Angeles), 7 in San Diego, 6 in San Francisco, and 1 in Berkeley.

Fifteen of the stores have the term "Natural Food(s)" in the store name; most of these are in California. Only one has the word "Vegetarian"–San Diego, California, Vegetarian Cafe & Bakery, 1125 6th St. Phone: Main 3159. Well-known stores include: House of Better Living, Los Angeles. Richter's Cafeteria, Los Angeles. The Food Mill in Oakland. Sexauer Natural Foods in Santa Barbara. Huni Health Products and Lust's Original Health Foods in New York City.

1429. *Health News* (*Hollywood, California*). 1942. Health foods please booming in San Diego. 10(8):11. April 30.
• ***Summary:*** Thriving shops in "Boom Town" (San Diego) include "Vegetarian Cafe, 1125 Sixth St. downtown" [Phone: Main 3159]. The shop has a fountain, cafeteria, and bakery.

1430. *Health News* (*Hollywood, California*). 1942. Health book reviews: Complete book of soy–*The Soybean Industry,* by A.A. Horvath. 10(8):7. April 30.
• ***Summary:*** "What a thrill to old timers who remember when the public knew soy only as a mysterious Chinese bean, and even the few U.S. producers thought of it merely as fodder. Here is revealed a giant young industry even now expanding to meet war needs.

"Dr. Horvath was *invited* to author this book."

"Since 1934 Dr. Horvath has been frequently quoted in *Health News* and has sent first hand fresh data to Clarke Irvine personally."

The price of this cloth [hardcover] book is $4 from the publisher.

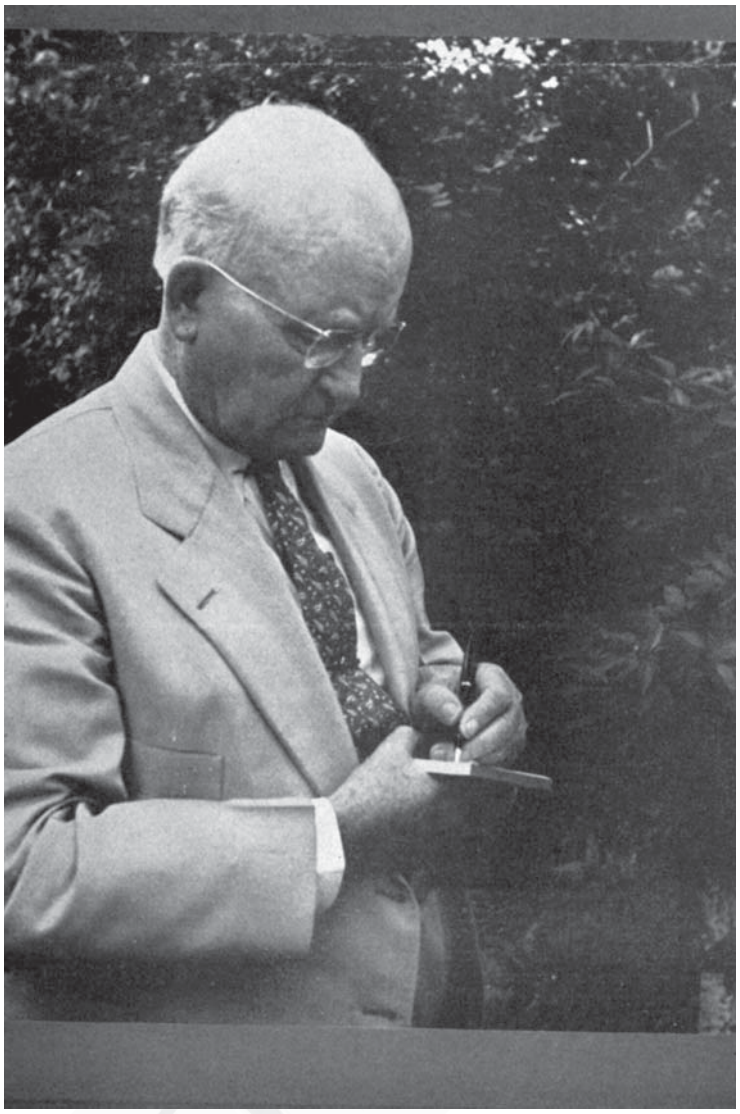
1431. Dies, Edward J. 1942. Americanizing soy foods (Document part). In: E.J. Dies. 1942. Soybeans: Gold from the Soil. New York, NY: The Macmillan Co. 122 p. See Chap. 13, p. 90-94. April. 21 cm.
• ***Summary:*** The soybean, used as a food, got off to a bad start during World War I. In those patriotic days of food substitutes, some misguided scientist ground whole soybeans into a flour and promoted its use as a replacement for wheat flour in bread. But the flavor was terrible and the flour got a bad reputation.

Later it was realized that the key to Americanizing soy flour was to remove its strong "beany" flavor. This was first achieved by removing the hulls then processing the dehulled soybeans with heat and steam to carry off the odors and leave the mild, nutty flavor of the flour intact. By 1926 soy flour was sold as a health food flour. By 1935 it was shown to be a truly acceptable product with a variety of food uses. The amount of soy flour made in the USA increased from about 25 million pounds a year before 1940 to about 100 million pounds in 1942–and growing.

Soy flour is used in a big way by Germany in its army rations and recipes–to extend the protein of meat and bread. German "field kitchens started into the war with more than two hundred soy recipes."

The British, understanding the value of soy flour, promptly requested it from Lend-Lease. "American meat packers provided sausage for the British army containing 20 percent soy flour or grits to increase the protein content in the can and prevent the loss of fats fried away."

Makers of soy flour in the United States include: (1) Allied Mills Inc., Chicago, Illinois. (2) Archer-Daniels-Midland Company, Minneapolis, Minnesota; (3) Central Soya, Inc., Fort Wayne, Indiana. (4) The Glidden Company, Chicago, Illinois. (5) I.F. Laucks, Inc., Portsmouth, Virginia. (6) Spencer Kellogg and Sons, Inc., Decatur, Illinois. (7) A.E. Staley Manufacturing Company, Decatur, Illinois.



Note 1. This is the earliest English-language document seen (Sept. 2011) with the term "soy foods" in the title; it is a book chapter.

Note 2. Most of these 7 companies are soybean crushers,

© Copyright Soyinfo Center 2021

and probably therefore make defatted soy flour for food use. Address: USA.

1432. *Madison Health Messenger* (*Madison, Tennessee*). 1942. Dr. E.A. Sutherland, Health Educator. Campmeeting '42. p. 1-2.

• ***Summary:*** An excellent biography of the President of Madison College, with a large portrait photo. He was a student at Battle Creek College in Michigan, where he "earned a large portion of his school expenses by canvassing [selling Christian books door to door] during the vacation periods and by other work he could pick up. His student days were in the era of denominational controversy over health reform, and students took sides. Keen in their study of the Spirit of prophecy, Sutherland and his friend and roommate, Percy T. Magan, persuaded the college matron to give the fleshless diet advocates a vegetarian table. Thus began a many-sided career in the field of health education.

Walla Walla College was founded as a Seventh-day Adventist college in the state of Washington–a first in the northwestern United States. Edward Sutherland, still a young man and newly married, was chosen to be president of this pioneer effort. As a health reformer, he saw that students at Walla Walla College were served a fleshless [vegetarian] diet.

In 1897 he became president of Battle Creek College. He became a leader in a country life movement, which at the turn of the century resulted in the transfer of Battle Creek College to a beautiful 300-acre fruit farm on the banks of the St. Joe River; it was rechristened Emmanuel Missionary College (EMC [in Berrien Springs, Michigan]). "Here, the health principles were taught by precept and practice."

Then Madison College was founded. "At Madison, another and important step came with the purchase of what had once been the conference-operated food factory at Edgefield Junction [formerly operated by Jethro Kloss]. The wrecked structure was rebuilt on Madison College campus, where, with meager facilities but with the pioneer spirit of former years and the faith of a Joshua, Dr. E.A. Sutherland and Mother Druillard set the pace for a health food manufacturing center that today [as Madison Foods] is distributing its products in the 48 states of the Union and some places across the sea.

"Madison Foods has carried on experimental work in its laboratories, especially with that rich, Oriental legume, the soybean, that has given Madison preeminence in its use as a successor of animal flesh.

"For fifty years, Dr. Sutherland has pioneered a many-sided work of health. He has ventured often into untried fields." "In the field of health, he is recognized by many as the one who, in God's hand, is responsible for the restoration of health. Through fifty years of unremitting service, he has come forth still sturdy in health, largely because of a consistent practice of the great principles he so strongly advocated and with a buoyancy of spirit that still serves to stimulate faith in many a faltering mind. To many who know him intimately, he is a fine example of the results of wholehearted commitment to the great principles of Christian education, with all that term implies, together with a simple personal acquaintance with the Saviour that makes it possible for him to say under all circumstances, 'We know that all things work together for good to them that love God.'"

1433. *Los Angeles Times.* 1942. Women in wartime. May 4. p. A7.

• ***Summary:*** "A class in nutrition, open to the public without previous registration, will start at Ebell of Los Angeles clubhouse at 2 p.m. tomorrow [Tuesday], closing at 4. The class will continue for 10 weeks. Miss Adelle Davis is the

© Copyright Soyinfo Center 2021

instructor, supplied by the Board of Education."

Note: Adelle is becoming busy; she also teaches a Red Cross nutrition class each Thursday evening from 5:30 to 7:30.

1434. *Los Angeles Times.* 1942. Death calls Bill Baker, famed maker of cakes: Ojai man hailed for development of health foods and artistic offerings to presidents. May 24. p. A3.

• ***Summary:*** "Ojai, May 23.–William C. (Bill) Baker, 69, of Ojai, internationally famous as an artistic pastry cook, died today in Foster Memorial Hospital, Ventura."

Funeral services will be at 2 p.m. Tuesday at the J.E. Barker Funeral Home in Ventura. He leaves his widow Helen, two brothers (Otto Koch of Morris Plains, New Jersey, and Christian Koch of Redondo Beach, California), and a sister (Marie Koch, of Philadelphia, Pennsylvania).

He and his Ojai bakery were known for health food products, which Baker first developed in 1925. He was the "originator of many well-known health foods, including lima-bean bread. Baker had attracted wide attention to this little valley town by baking Christmas cakes each year for three Presidents–Coolidge, Hoover, and Roosevelt." Each Christmas his huge fruit cakes were sent to the White House.

His skill as an artist and pastry chef won him employment in many fashionable hotels, including the Bellevue-Stratford in Philadelphia, the Waldorf-Astoria in New York City, the Arlington in Washington, DC, the St. Charles in New Orleans, Louisiana, and the Hotel Huntington in Pasadena, California.

In 1919 he came to Ventura "after winning first, second and sweepstakes prizes in a government-sponsored contest for the development of wheatless bread. On this project he collaborated with 64 other food experts and was Assistant Food Administrator for Southern California at the time. His wartime experiments led to development of lima-bean bread which brought him his widest fame."

His new bread made a new and good use of thousands of sacks of lima beans then being grown in Ventura county. It "quickly gained full endorsement as a health food and his business was extended to all the 48 States and Alaska and the Hawaiian Islands and many foreign countries.

"But the creation of sensational cake sculptures remained his hobby until his last illness. His masterpiece was the 1000-pound cake which he baked for and donated to the Golden Gate International Exposition in 1939. It was one of the wonders of the Exposition, where millions of persons saw it in the center of the Pure Foods Building."

1435. *Los Angeles Times.* 1942. Rites arranged for Bill Baker. May 26. p. 14.

• ***Summary:*** Ventura, May 25. "Ventura County will pay its final tribute to the man who made its lima beans famous in bread form..." Bill Baker died on 23 May 1942 and will be buried at Ivy Lawn Cemetery. Known across the USA as "Bill Baker, the Ojai Baker," he brought wide fame to his vocation and his adopted home town.

He was born William C. Kick [sic, Wilhelm Koch] on 4 May 1873 in Marburg, Germany. He developed many health foods, including bread from lima beans grown in Ventura County. Each year he sent huge Christmas cakes to Presidents Coolidge, Hoover, and Roosevelt.

"His 1,000-pound fruit cake occupied a center place in the pure foods display at the San Francisco Golden Gate Exposition and he sent another huge cake to the Chicago World's Fair."

Note 1. The Golden Gate International Exposition was held in 1939-1940 on Treasure Island, San Francisco. The Century of Progress Exposition was held in 1933-1934 in Chicago.

Note 2. Bill Baker seems to have been one of the many Germans interested in natural and health foods who emigrated to the Los Angeles area in the early 1900s.

Note 3. Ventura and Ojai are both in Ventura County, just northeast of Los Angeles County. Venture is on the coast and Ojai is about 12 miles inland, near the edge of Los Padres National Forest.

1436. *Los Angeles Times.* 1942. Final tribute paid to famed baker: Rites held for man who baked presidents' cakes. May 27. p. 26.

• ***Summary:*** "Ventura, May 26. In a chapel filled with flowers sent from many parts of the United States, funeral services were conducted this afternoon for William C. (Bill) Baker, whose Christmas cakes were welcome annual gifts for three Presidents." Mr. Baker, who died Saturday, was also known throughout the country for the development of healthy foods.

The simple Episcopalian service was read by Dean S.R. Hammond, followed by burial at the near-by Ivy Lawn Cemetery. The chapel of the J.E. Barker Funeral Home was filled and overflowing. Friends came from several places: (1) The Lake Sherwood area, where Baker often spent his vacations among prominent Southern Californians. (2) Ventura and Ojai, where everyone knew him as "Bill Baker, the Ojai baker."

1437. *Ojai* (*The*). 1942. County mourns passing of Ojai business figure [Bill Baker]. May 29. p. 5. Friday.

• ***Summary:*** "A large company of friends from this county [Ventura], Santa Barbara, and Los Angeles gathered at the Barker chapel in Ventura Tuesday afternoon when the Very Reverend S.R. Hammond of St. Paul's Episcopal church conducted last rites for W.C. ('Bill') Baker, long a noted figure in the baking industry in America."

"Mr. Baker was born May 4, 1873 in Marburg, Germany, and came to this country alone at the age of 16, inspired with the ideals of democracy."

© Copyright Soyinfo Center 2021

"As a child he had shown exceptional talent as a sculptor and a career as an artist was mapped out for him. Then changes in the family affairs upset all plans and when he came to the United States he made his livelihood at the baking trade. Here his exceptional ability rapidly took him to the fore. He was employed in the catering departments of some of America's finest hotels." These are listed.

He experimented with wheatless breads. "Later on request of medical men in Santa Barbara he developed a successful bread from lima beans, as an anti-acid bread and one suitable for diabetics. This product and his later experiments with soy bean bread, equally successful, spread his fame around the world and for years an unending stream of health products had gone forth from his Ojai plant..."

"As a hobby he ornamented beautiful cakes for his friends and many a Los Angeles and Ventura county wedding boasted his handiwork as the chief ornament of the reception refreshment table. Later he took to making huge cakes as Christmas gifts for U.S. presidents... He was commissioned to make cakes for fairs and festivals in many places. His most ambitious creation was the he San Francisco Golden Gate Exposition 1000-pound fruitcake" [1939].

His survivors are listed. His brother, Otto Koch, is critically ill at his home in Morris Plains, New Jersey. His sister, Sister Marie, has for many years been the Lutheran deaconess at the Lutheran hospital in Philadelphia, Pennsylvania; she came west for the funeral.

Note 1. This is the earliest document seen (July 2021) about Bill Baker in the local Ojai newspaper. Note 2. Other obituaries say that he came to this country with his parents.

1438. **Product Name:** Cubbison's Soyettes (Crackers).
Manufacturer's Name: Cubbison Cracker Co.
Manufacturer's Address: 3417-3419 Pasadena Ave., Los Angeles, California.
Date of Introduction: 1942 May.
New Product–Documentation: Natural Brands. 1942. Spring Catalog. 5 lb carton for $1.10.

USDA War Food Administration, Food Distribution Administration. Grain Products Branch. 1943. Dec. "Soya products distribution." p. 4. Soyettes (crackers) contain 30% soya; have national distribution.

1439. *Let's Live.* 1942-. Serial/periodical. Clarke Irvine, Editor and Publisher. 4657 Hollywood Blvd., Hollywood, California. Vol. 1, No. 1, 15 May 1942. Biweekly, then weekly from early 1942.
• ***Summary:*** Preceded by *Health News,* whose title from Jan. 1931 until Sept. 1937 was *California Health News. A National Journal of Better Living. Health News* changed its title to *Let's Live* on 15 May 1942. The publisher and editor remained Clarke Irvine. In Aug. 1988 *Let's Live* celebrated its 55th anniversary. Let's Live (444 North Larchmont Blvd., Los Angeles, California 90004. Phone 213-469-3901) has bound volumes from 1933.

Masthead of *Let's Live.* 1944. March. p. 2. "Published by Clarke Irvine. Since 1933 at 4657 Hollywood Boulevard, Hollywood 27, (Los Angeles), Calif., monthly on the 1st, (deadline 5th of preceding month). Subscriptions $1 a year, Canada and foreign $2. Phone NOrmandy 9017... No Copyright; any matter may be reprinted but kindly give credit. Advertising rates upon application. None accepted for drugs, liquor, tobacco."

This magazine was sold by Clarke and Alice Irvine to Godfrey Thomas in about Feb. 1949. The last issue published by the Irvines was the Feb. 1949 issue, which (along with the Jan. 1949 issue) was the half the typical height and width, and with many fewer pages. The March 1949 issue was full size and was titled *Godfrey's Let's Live*–the word "Godfrey's" remaining in the title for many years.

The Sept. 1953 masthead of Godfrey's *Let's Live:* Godfrey Thomas, publisher. Kay K. Thomas, editor. Editorial and business office, 1133 N. Vermont Ave., (Hollywood) Los Angeles 29, Calif. Phone: NOrmandy 3-2121. Published monthly on the first by Godfrey Thomas Publishing Co. Subscriptions: $2.00 per year in advance (USA); $3.50 for two years. Thomas wrote a regular editorial which contained his small portrait photo. He was tall, stately, retired, balding, and wore glasses. Godfrey Thomas was publisher from 1949 to 1958. He was succeeded by his wife, Kay. In Aug. 1961 the address was still 1133 N. Vermont Ave., (Hollywood), Los Angeles 29, California.

Murray, Frank; Tarr, Jon. 1984. *More than one slingshot: How the health food industry is changing America.* See p. 55. *"Let's Live*, based in Los Angeles, was started in 1933 [as *California Health News*]. Mrs. W.J. Basset is publisher; Peggy MacDonald, associate publisher; John DeDominic, general manager and art director; and Keith Stepro, managing editor."

As of Nov. 2003 *Let's Live* is published by Franklin Publications in Santa Monica, California. Phone: 310-445-7504. They still have all back issues. For many years (starting on 20 April 1934), Mildred Lager wrote a column titled "Food Facts," which she later compiled into a book. Every year Clark Irvine would host a big healthy Christmas dinner at a Methodist church. Sometimes there would be a Christmas issue printed with green ink and red ads. During World War II the magazine contained fewer pages, was printed on newsprint, and with no color. By the 1960s it became less interesting as most of the ads were about protein powders and vitamins. By the 1990s it was mainly about food supplements and the implicit message was: Buy food supplements for good health and long life.

Talk with Beth Salmon. 2003. Nov. 20. They print more than a million copies of each issue. Many of these are mailed to health-minded people who have a GNC Gold Card. Address: Hollywood, Los Angeles, California.

1440. *Bakers' Helper* (*Chicago, Illinois*). 1942. W.C. "Bill" Baker passes away. 77(962):999. June 6.
• ***Summary:*** This obituary begins: "With the passing of William C. (Bill) Baker, Ojai, California, the baking industry on the West Coast loses on of its most colorful figures. As a contributor to *Bakers' Helper* for about twenty years, his articles on Cake Decorating in Practice, which appeared regularly for many years, and other contributions added to the recognition and fame he gained throughout the country through his versatile ability. Mr. Baker passed away on Saturday, May 23, in the Foster Memorial Hospital in Ventura, where he had gone about two weeks before for treatment. Though he had been in poor health for some time he was apparently improving when he became a victim of poison oak poisoning while working in his garden."

Born in Germany, he came to this country as a youth and first worked as a pastry cook. California had no more zealous citizen than Bill Baker. During World War I he served the country in the Food Administration and in 1918 won first prize California's wheatless bread contest. His principal achievements were "probably the development of lima and soya bean bakery products."

In the mid-1920s, he moved his business and home from Ventura (where he operated 2 bakeries) to Ojai. At both places his barbecues were famous. "About two years later, September 1927, he opened a new modern shop and store designed and built in accordance with his ideals of what a retail bakery should be like. In November, 1928, he added a special shop for the production of his lima bean bread and wafers and the demand for these products grew steadily until he devoted practically all of his bakery production to them..."

"Cake decorating proved an enjoyable outlet for Mr. Baker's artistic abilities and he followed it as both hobby and specialty. At Ojai he had a special room for this work... which brought him a wide reputation... A number of his elaborately decorated cakes have represented California at local, State, and even international expositions, notably those at Chicago [Illinois] in 1933 and 1934; the latter had complete reproductions, made to scale, of twelve of the Missions."

"Mr. Baker was always thoughtful of others and in all his activities constructive as well as original." He did not compete with others in the baking industry. "This was typical of his spirit toward his fellow members of the baking industry as well as toward humanity in general and no doubt accounted for most of the popularity he gained and the many fast friends he made in all of his contacts in business and social life."

A photo shows Bill Baker.

1441. *Let's Live.* 1942. Bill Baker's passing ends unique career. June 15. p. 15.
• ***Summary:*** This good obituary begins: "Ojai, California.–This valley mourns its most famous citizen, Bill Baker, originator of the alkaline soy bread... The famous alkaline loaves, staple in health shops, credited with helping to restore health and save life, will continue to be produced by his widow and staff in the factory he built here."

"In March, 1939, The Bakers' Council of Northern California presented a scroll of honor on his half century of success in the industry, and made him a life member.

"A big, hearty, sociable man, Bill Baker overcame illness in 1935 by vigorous outdoor work on his grounds at Lake Sherwood where he was neighbor to Will Hays, Edgar Rice Burroughs and Shirley Temple.

"His alkaline loaves have the distinction of being the first bread to be flown to users by air express. (The world has lost a fine man and a very good friend.–Editor)."

A portrait photo shows Bill Baker. The caption: "His memory honored and beloved, his long job well done, Bill Baker still served humanity through his products."

1442. *Madison Survey* (*Madison, Tennessee*). 1942. For several months the Food Factory remodeling project has been under way... 34(4):52. July 8.
• ***Summary:*** "... supervised by Professor William Sandborn, head of the Industrial Arts Department. Another sixty days should conclude this work, which means that the Factory has been enlarged and in many ways brought up to date to meet growing business demands." Note: Actually, a practically new structure was built.

1443. USDA Bureau of Plant Industry. Div. of Forage Crops and Diseases. 1942. Firms manufacturing or handling soybean food products. Washington, DC. 3 p. July. Mimeographed unpublished manuscript.
• ***Summary:*** The companies are listed alphabetically by state, and within state by city. Numbered codes after each company, keyed to a list of 35 soyfood types in the back, explain which foods are made by each company. Unfortunately, it is not clear from this list which companies are manufacturers and which are "handlers" (retailers or distributors).

California: Arlington (Loma Linda Foods), Berkeley (Golden Gate Food Products Co.), Glendale (Hygenic [Hygienic?] Food Co.), Los Angeles (El Molino Mills, Mrs. Hauser's Soya Foods Co. {4617 Melrose Ave.}, Kevo Co., Klein Soup Co.), San Francisco (Radcliffe Soya Products {146 Fillmore St.}), Santa Cruz (Daglish Health Food Service). Delaware: Milton (Draper Canning Co.). Illinois: Bloomington (Funk Bros. Seed Co.), Chicago (Allied Mills, Armour & Co., Dewey Food Products Inc., Dietetic Supply House, Durkee Famous Foods, Fearn Soya Foods Co. {355 W. Ontario St.}, Glidden Co., Great China Foods Co., Griffith Laboratories {1415 W. 37th St.; handles soy flour and grits}, John F. Jelke Co., Soybean Products Co. {210 N. Carpenter St.}, Swift & Co.), Decatur (Spencer Kellogg and Sons, A.E. Staley Manufacturing Co.), Elgin (B.S.

Pearsall Butter Co.), Urbana (Prehn's Health Food Store). Indiana: Columbia City (Oriental Show-You Co.), Decatur (Central Soya Co.), Indianapolis (Standard Margarine Co.). Iowa: Des Moines (Soy Products Co.). Maryland: Baltimore (J.H. Filbert, Inc., The Wm. Schluderberg–T.J. Kurdle Co.), Takoma Park (Hillcrest Health Products Co.). Massachusetts: Boston (Prince Macaroni Co.), Newton Centre (W.L. Cummings & Co.). Michigan: Battle Creek (Battle Creek Food Co.), Detroit (Shedd Products Co.). Minnesota: Minneapolis (Archer-Daniels-Midland Co.). Missouri: Kansas City (Harrow-Taylor Butter Co.), St. Louis (Blanton Co.). New Jersey: Vineland (George A. Mitchell). New York: Brooklyn (Agash Refining Corp., Cosmo Packing Co., Soy-Malt Co. {234-A Marion St.}), Elmhurst, Long Island (American Lecithin Co.), Glandale, Long Island (Beskor, Inc. Note: As of May 1997 there is no place named "Glandale"–or "Glendale"–on Long Island), New York City (Barrett & Eastwood, Borden Company, Enco Chemical Corporation, Franklin Mills Co., National Biscuit Co., Soya Corporation of America {Rockefeller Plaza}, Stein, Hall & Co.), Rochester (Vegetable Products Co.). North Carolina: Asheville (Judd's Health Foods), Lexington (Vitro Nu Foods Corp.). Ohio: Cincinnati (The Churngold Corp., Miami Butterine Co.), Circleville (Winoor Canning Co.), Cleveland (Barton Nut & Candy Co., Pfaffman Egg & Noodle Co.), Columbus (Capital City Products Co.), Greenville (O'Brien Milling Co.), Mount Vernon (International Nutrition Laboratory [Dr. Harry Miller]), Worthington (Special Foods, Inc.). Pennsylvania: Paoli (Great Valley Mills), Philadelphia (J.S. Ivins' Son, Inc., C.F. Simonin & Sons, Tastee Soy Foods), Williamsport (Penna Soya Products Co.). Tennessee: Madison College (Madison Foods). Wisconsin: Hortonville (Fox Valley Canning Co.), Oostburg (Oostburg Canning Co.), Owen (Owen Canning Co.).

The soy food types are: "1. Albumin or protein. 2. Beans–baked. 3. Beans–canned green. 4. Beans–roasted. 5. Breakfast foods. 6. Butter–soy. 7. Candies. 8. Chips or meats. 9. Chocolate. 10. Chocolate and other beverages. 11. Coffee substitute. 12. Crackers, wafers, cookies, puddings, etc. 13. Curd or cheese. 14. Diabetic foods. 15. Flakes. 16. Flavorings. 17. Flour. 18. Flour–prepared. 19. Grits. 20. Health foods. 21. Ice cream powder. 22. Infant foods. 23. Lecithin. 24. Macaroni products. 25. Malted products. 26. Meat-like products. 27. Milk. 28. Molasses–bean. 29. Oil. 30. Puffs. 31. Sauce. 32. Shortening. 33. Soups. 34. Soybeans. 35. Spreads–sandwich. 36. Toast."

Note: This is the earliest document seen (Dec. 2015) that mentions Griffith Laboratories. Address: Washington, DC.

1444. *J. of the American Medical Association.* 1942. Bureau of Investigation: Stipulations. Agreements between Federal Trade Commission and promoters of various products. 119(18):1522-23. Aug. 29.

• ***Summary:*** "The following items are abstracts of stipulations in which promoters of 'patent medicines,' or medical devices have agreed with the Federal Trade Commission to discontinue certain misrepresentations in their advertising. These stipulations differ from the 'Cease and Desist Orders' of the Commission in that such orders definitely direct the discontinuance of misrepresentations. The abstracts that follow are presented primarily to illustrate the effects of the provisions of the Wheeler-Lea Amendment to the Federal Trade Commission Act on the promotion of such products."

"Bragg's Grass Tablets.–This product is put out under the trade style Live Food Products Company, Burbank, California, by a Paul C. Bragg who has posed as a health specialist, food expert and some other things. Bragg represented that the preparation is rich in vitamin A, will prevent sickness, promote health and stimulate activity. In October 1941 the Federal Trade Commission accepted a stipulation from him in which he agreed that he would discontinue these misrepresentations and also cease implying in his advertising that his product has any dietary value other than as a supplemental source of vitamin A to the extent of the number of International Units that it contains."

1445. **Product Name:** Bragg Soya Shred Soup Mix.
Manufacturer's Name: Live Food Products Co.
Manufacturer's Address: 33 E. Magnolia Blvd., Burbank, California.
Date of Introduction: 1942 August.
New Product–Documentation: Catalog of Copyright Entries. Part 4. Works of Art, Etc. New Series By Library of Congress. Copyright Office.

1446. Davis, Adelle. 1942. Vitality through planned nutrition. New York, NY: The Macmillan Co. xii + 524 p. Sept. Illust. Index. 22 cm.

• ***Summary:*** This book is written for young people. Soybeans and their nutritional value are discussed throughout. "Dedicated to the high-school student who appreciates both the immediate and the future values of full health."

Of the 23 amino acids, all but 10 can be made by the body. These ten are called "essential amino acids" and must be obtained from food. Protein foods "containing all ten of the essential amino acids in generous amounts are called complete proteins, or proteins of high biologic value." "The proteins of eggs and milk have the highest value." The proteins in glandular meats (liver, kidney, etc.) rank second in value. "Proteins from nuts, soybeans, wheat, especially wheat germ, and cottonseed flour and meal are complete proteins" (p. 58-59).

"Proteins and vegetarianism. Many thousands of people in the world, particularly the Eskimos, Laplanders, and nomad tribes, eat little or no proteins from vegetable sources. Other thousands eat only vegetable proteins, because of poverty or religious scruples, such as the millions of people

© Copyright Soyinfo Center 2021

in India and China. Races which have a high animal-protein intake appear to have excellent physiques and virility and a capacity for endurance which far surpasses the energy and physiques of those eating only vegetable proteins.

"When the complete proteins of wheat, soybean, cottonseed, peanuts, and other nuts are eaten, and the diet is planned with utmost care, it is possible to supply the body with sufficient amounts of the essential amino acids. Some of the world's leading athletes have been vegetarians. If milk and eggs are generously added to an otherwise vegetarian diet, it can be made adequate in proteins though it is likely to be deficient in iron. There is no argument against a person's being a vegetarian, except that unless he is trained in nutrition, he is likely to become an unhealthy vegetarian." (p. 67, 71).

Many vegetable proteins, such as those in soybeans and other legumes, are not well digested unless heated (p. 69). Boys age 13-15 require 85 gm/day of protein, increasing to 100 gm/day for boys age 16-20. Adult women need 60 gm/day and adult men need 70 gm/day (p. 70).

Soybeans (and soy flour) are a good source of B-complex vitamins, including thiamin (p. 160), niacin (p. 186-87), pyridoxin [pyrodoxine] (incl. soybean oil; p. 193), pantothenic acid (p. 194). Since vitamins of the B complex cannot be stored in the body, "the daily diet must be carefully planned if full health is to be maintained." "Buy only wheat breads and cereals with 100 per cent whole grain marked on the labels. Use wheat-germ breads... and soybean bread whenever possible." Also blackstrap molasses and brewers' yeast. "Use soybeans, baked or in a loaf or patties, as meat substitutes... Cultivate a taste for liver, brain, kidney, heart and sweetbreads and use them more frequently than other types of meat (p. 208-09).

"Salted peanuts and roasted soybeans are ideal candy substitutes which build rather than destroy health. Both are excellent sources of vitamins of the B complex" (p. 210).

Wheat germ is the richest natural source of vitamin E, which is "also found in cottonseed oil, corn oil, sesame oil, soybean oil, and peanut oil" (p. 286-87). There are at least three forms of vitamin E, which are called the vitamin-E complex: alpha-, beta, and gamma-tocopherol. "Alpha-tocopherol is the most active and has been made in the laboratory."

Calcium: "Many Oriental races obtain their calcium principally from soybeans and soybean curds [tofu], which form a staple food."

Note: This is the earliest English-language document seen (April 2013) that uses the term "soybean curds" to refer to tofu.

Bones are used as a major source of calcium by Eskimos, Africans, and (formerly) American Indians. Adults should consume at least 750 mg/day of calcium, the amount found in 3 glasses of milk (p. 312-15). "Another vegetable which is rich in calcium is the soybean, a food all too little used in America. Soybean flour is fourteen times richer in calcium than refined wheat flour, and baked soybeans are many times richer in calcium than baked navy beans. Every person should learn to enjoy this highly nutritious food and make it an important part of his diet." (p. 319).

In Chapter 29, The functions of the blood" (p. 328-30), Davis discusses the effect of acid and alkali, but in a much different way than former health food advocates. She does not advocate alkaline foods, but shows how the body keeps its fluids near neutrality, or very slightly alkaline. "Soybeans are extremely rich in iron, of which 80 per cent reaches the blood. In a mixed diet as a whole, only about 50 per cent of the iron in foods is available" (p. 340).

Iodine is necessary to prevent goiter. "Since early times, the eating of seaweed has been known to affect goiter favorably" (p. 350). Salt (sodium chloride) is essential to good health. In very hot weather and dry air, so much can be lost through perspiration that death results. "Death due to salt deficiency occurred during the first years of work at Boulder Dam... In milder forms, a lack of salt causes heat cramps or heat stroke," which is "accompanied by nausea, dizziness, general exhaustion, and muscular cramps in the legs, back, and abdomen. Without salt, the more water drunk, the worse the condition becomes." "During very hot weather salty foods such as salted peanuts, popcorn, or soybeans, salty cheeses, or potato chips should be kept near the drinking water" (p. 367).

The section titled "Your body's requirements" (p. 386-89) lists 8 food groups or foods that are the best sources of required nutrients. These include: "7. One serving of meat, fowl, fish, eggs, or a meat substitute such as baked navy beans or soybeans,..."

"Dried fruits should be the main candy substitute... Other health-building candy substitutes are unsweetened chocolate, salted peanuts or soybeans, chocolate-covered peanuts, and cracker jack made with black molasses" (p. 400-01).

A table (p. 484-85) gives the nutritional composition of soybeans: (1) dried, cooked; (2) dried, uncooked. Address: A.B., M.S., consulting nutritionist, Los Angeles, California.

1447. *Madison Health Messenger* (*Madison, Tennessee*). 1942. Soy bean exhibit at National Health Foods Convention. 4(4):3. Undated.

• ***Summary:*** "'The World of Tomorrow in Soybeans' was the theme of the Madison Foods exhibit at the National Health Foods Convention in New York City. A picture of this very beautiful exhibit is shown at the bottom of this page.

"Many new varieties of soybeans were shown to health food dealers from all over the United States, who saw for the first time at the National Health Foods Convention a comprehensive exhibit of various soybean products. There were small black soybeans, brown soybeans, green soybeans, yellow soybeans, of various sizes, shapes, and varieties.

© Copyright Soyinfo Center 2021

There were breakfast foods ready-to-eat and cooked. Other items in the exhibit consisted of soy flour, various kinds of soy oil, soy hydrogenated shortening, soy lecithin, stock feed, poultry feed, dog and cat foods; canned soybeans plain, canned soybeans in tomato sauce, meat substitutes, soy cheese, soy milk, soy albumin, soy bread, soy muffins, soy toast, soy coffee substitute, soy macaroni, soy noodles, soy sauce, linoleum, and plastics.

The exhibit was finished in an automobile lacquer with a photographic smear of soybeans covering the entire front of the exhibit around the display of sample bottles of various soybean products on the right wing of the exhibit, and the Madison Foods products on the left wing of the exhibit, the soybean smear was finished in a sepia tone to approximate the natural color of the soybean, and the lettering on the top of the exhibit was cut-out wood, raised letters, finished in automobile lacquer. It was one of the most outstanding exhibits ever shown at a National Health Foods Convention from the standpoint of its educational value as well as its artistic layout and beautiful finish. Visitors to the exhibit were profuse in their commendatory comments of the exhibit, and E.M. Bisalski, Manager of Madison Foods, and Ulma Doyle Register, Chemist, were busy receiving visitors to the exhibit, who came from all parts of the forty-eight states to attend the National Health Foods Association Convention, Hotel McAlpin, New York City, August 26-29.

"Next year the convention will be held in Los Angeles, California, at approximately the same time."

1448. Prehn's Health Food Store. 1942. Announces the new firm of Prehn-Cochrun Health Food Store (Ad). *Soybean Digest.* Sept. p. 22.
• ***Summary:*** New store is located at 504 South Neil St., Champaign, Illinois. "The home of the University of Illinois, right in the heart of the Soybean Belt. For September we feature: 5 lbs. Superior Soy Flour 79¢ (A rich source of the anti-gray hair factor). Write for a complete price list of health foods." "We are in business for your health." Address: 504 S. Neil St., Champaign, Illinois. Phone: 5929.

1449. Levinson, A.A. 1942. Soybean products in food manufacture. *Soybean Digest.* Nov. p. 4-5, 11.
• ***Summary:*** Discusses the history of commercial soy flour in the USA. The first products, made by grinding whole soybeans, had a "highly roasted or burnt flavor... This flour had a moderately high percentage of hulls, was coarsely ground, and was quite dark in color. This flour was first purchased by the health food stores, to be mixed in with other preparations, and was also sold direct to the consumer."

Next came low-fat soy flours; attempts to sell them to the baking industry were not very successful, except for full-fat flours used in bread (at levels of 15-25%) sold in health food stores. Also discusses use of soy in sweet goods, pork sausages, canned dog food, macaroni, concentrated soups

(for Lend-Lease),

When "canned dog foods were first put on the market they were labeled as being fit for human consumption." Soy protein products are not mentioned. Address: The Glidden Co., Soya Products Div., Chicago, Illinois.

1450. Poplawski, Stephen J. 1942. Food and beverage mixer. *U.S. Patent* 2,304,476. Dec. 8. 5 p. Application filed 24 June 1940. 6 drawings.
• ***Summary:*** Note the word "food" in the title. This is Poplawski's first real blender. It looks like a modern blender and its basic structure and function are those of a blender. But Fred Osius had patented the blender by 1938. "This invention relates to improvements in food and beverage mixers of the type wherein the food or beverage to be mixed is placed in a container having an agitator therein adapted to be driven from an electric motor housed within the base of the machine upon which the container is removably set."

"A further object of this invention is to provide a container having a glass side wall and a metal bottom which is screwed onto the lower end of the side wall." In the glass container is "preferably square in cross section and provided with a circular neck at its lower end. The neck has threads formed thereon similar to those on conventional fruit jars. In the container are "agitator blades." "A rubber gasket between the [lower] edge of the neck and the adjacent wall of the bottom insures a liquid tight connection." "Ribs in the side walls of the glass sleeve [container] cooperate with its square cross-sectional shape to improve the mixing action... A removable cover is provided. Address: Racine, Wisconsin.

1451. *SoyaScan Notes.* 1942. Stephen J. Poplawski and the invention of the electric kitchen blender (Overview). Dec. 8. Compiled by William Shurtleff of Soyfoods Center.
• ***Summary:*** A search for patents issued to Stephen J. Poplawski prior to 1943 shows the following (in chronological order): 1923 Dec. 27–Motor-driven mixer. U.S. Patent 1,475,197 (Gilchrist Co.)

1924 Jan. 15–Beverage mixer. U.S. Patent 1,480,914 (Arnold Electric Co.)

1924 Jan. 15–Drink mixer. U.S. Patent 1,480,915 (Arnold Electric Co.)

1924 March 17–Drink mixer. U.S. Patent 1,529,830 (Arnold Electric Co.). Russell A. Blish is lead inventor.

1928 May 15–Drink mixer. U.S. Patent 1,669,689 (Arnold Electric Co.). Russell A. Blish is lead inventor.

1930 June 17–Drink mixer. U.S. Patent 1,765,095 (Arnold Electric Co.)

1932 March 15–Fruit juice extractor. U.S. Patent 1,849,112 (Hamilton Beach Mfg. Co.).

1933 Sept. 19–Mixing cup. U.S. Patent 1,927,184.

1933 Nov. 7.–Drink mixer. U.S. Patent 1,934,445.

1935 April 16.–Drink mixer. U.S. Patent 1,997,873.

1942 Dec. 8.–Food and beverage mixer. U.S. Patent 2,304,476.

1452. Baker's (Bill) Products. 1942. Super Soya Bread: Triple rich in vitamin B-1 (Ad). *Let's Live.* Dec. 15. p. 9.
• ***Summary:*** This 4½ by 2-inch ad states: "For your war worker and family! It's easier to smile to work, school, wherever duty calls when the lunch kit includes America's original... Pure, wholesome, alkaline. Not artificially fortified. Also rice and taro cookies, taro or soybean waffle and pancake flour. At leading health food stores all over America." An illustration shows a smiling worker walking with his lunch box in one hand.

This ad also appeared in the following issues of this magazine: July 1943, p. 14 (illustration of a baseball runner reaching first base). Jan. 1944, p. 14 (illustration of a baker with top hat holding a loaf). March 1946, p. 29 (illustration of a boy, girl, and dog running together). Address: Ojai, California.

Ad in *Let's Live.* 1945. Sept. p. 7. "Everyone can keep fit and full of pep with Bill Baker's wonderful Super Soya Bread."

1457. *Nature's Path* (*New York City*). 1942. 50th anniversary [of Benedict Lust in the USA]. Dec. p. 478.
• ***Summary:*** "Fifty years ago on November 17 [1892] a young immigrant stepped ashore on the Battery in New York from a fast steamer that had brought him from Liverpool. He was not blessed with worldly riches, but determined to carve himself a career and to become worthy of his newly adopted country." His goal was to spread the teachings of Father Kneipp in the New World. "Today his magazines, his books, his Original Health Food Store (the first in this country), his school of Naturopathy, his two health resorts in Butler, New Jersey, and Tangerine, Florida, are the framework for his educational work... We wish to express our appreciation for the privilege of working for him, and pray that he may be preserved in good health for many more years." Signed: "The editorial staff and employees of Dr. Benedict Lust."

1458. Schmidt, Frances M. 1942. Edible soybeans (Ad). *Nature's Path* (*New York City*). Dec. p. 476.
• ***Summary:*** "... Are a protein food and can be substituted in your diet for meat. They are full of vitamins, minerals, and flavor. New crop, Bansei variety. 10 lbs. for $1.25, not postpaid. 30 recipes included.

Note: On the same page is an ad for "Baker Lust natural unroasted Peanut Butter" from Lust's Health Food Bakery, Inc., 309-311 E. 56th St., New York, NY. Address: Plainfield, Illinois.

1459. *Soybean Digest.* 1942. A soybean casserole: Some recipes from a new book on beans. Soybeans... and people. Dec. p. 8.
• ***Summary:*** "The following recipes are taken from *Soy Bean Recipes* [2nd ed.], a 48-page booklet by Mildred Lager of the House of Better Living, 3477 West Sixth St., Los Angeles, California, that gives more than 150 ways to use soybeans as meat, milk, cheese, or bread. The booklet is well worth the 55¢ by mail asked for it.

"Miss Lager, who has been talking soy foods over Radio Station KFAC for eight years, writes, 'At the present time [during World War II] I am teaching nutrition at the American Women's Volunteer Service and you can be sure that soybeans will be given their proper place in the diet. I am not a vegetarian, a food faddist or a soybean nut of any kind, but I do believe that the soybean belongs in our present nutritional program from the economy standpoint.'"

Contains recipes for: Omelet (with 2 cups mashed or sieved soybeans and 4 eggs). Soy fudge (with 1 cup soybean flour). Soy pie crust (with ½ cup soy flour). Soy wheat muffins (with 1 cup soy flour). Soybean casserole (#1 & 2, each with 2 cups cracked cooked soybeans). Photos show: A portrait of Mildred Lager. A soybean casserole (Courtesy Illinois State Bureau of Home Economics). Address: Los Angeles, California.

1460. U.S. Department of War. 1942. World War II draft registration card for Anthony Albert Berhalter. Washington, DC.
• ***Summary:*** This government record shows: Registration card (Men born on or after April 28, 1877 and on or before February 16, 1897).

Serial No.: 4390. Name in full (Print): Anthony Albert Berhalter. Place of residence (Print): 1423 N. Clark St., Chicago, Cook County, Illinois. Mailing address: Same.

Telephone: Del 8913. Age in years: 63. Place of birth: Ellenberg, Germany. Date of birth: October 30, 1878. Name and address of person who will always know your address: Cosmopolitan Bank (Mr. Darmsteadt). Employer's name and address: (?). Place of employment or business: Health Food Store & Bakery, 1423 N. Clark St.

I affirm that I have verified above answers and that they are true [signature]: Anthony A. Berhalter.

control. The master accellerator–Breathing. Streamline figures through exercise. Seek the sub for life. How vitamins keep you healthy. The relation of minerals to health. Foods. The plus high "E.Q." [Energy Quota] diet (incl. vitamins, minerals, and chlorophyll). The importance of the rhythm breakfast. The adequate diet. Eating to defeat illness and premature old age. How to break bad habits (e.g., the alcohol habit). How to have a healthy head of hair. Can we discard our glasses. The care of the feet. Bathing. Prenatal feeding. Reducing. Gaining weight.

Disease. Rupture and hernia. Nervousness. Swollen ankles and abdominal swelling. Biliousness. Building blood for anemia. Diabetes. The climacteric or menopause. Prostatitis and male menopause. Cataract. Tuberculosis. Heart trouble. Gall bladder trouble. Kidney trouble. Liver trouble. Rheumatism, sciatica and neuritis. Goiter and thyroid trouble. Hardening of the arteries. Sleep and insomnia. Colitis and ulcers. Skin disease. Arthritis. High blood pressure. Low blood pressure. Sinusitis, asthma, hay fever, chronic catarrh, deafness and colds. Varicose veins, piles and hemorrhoids. Tranquility of mind.

Foods rich in iron include soybeans (p. 115). Good foods include "fresh green soy beans," "dried soy beans" (p. 120-21), and meats, fish, cheese, milk, whole grains and whole-grain products (p. 131-35). An adequate diet includes a serving of soy beans once a week (p. 147). People who are underweight should consume plenty of dried legumes; "lentils peas, Lima beans, garbanzos, and soy beans should be used" (p. 192).

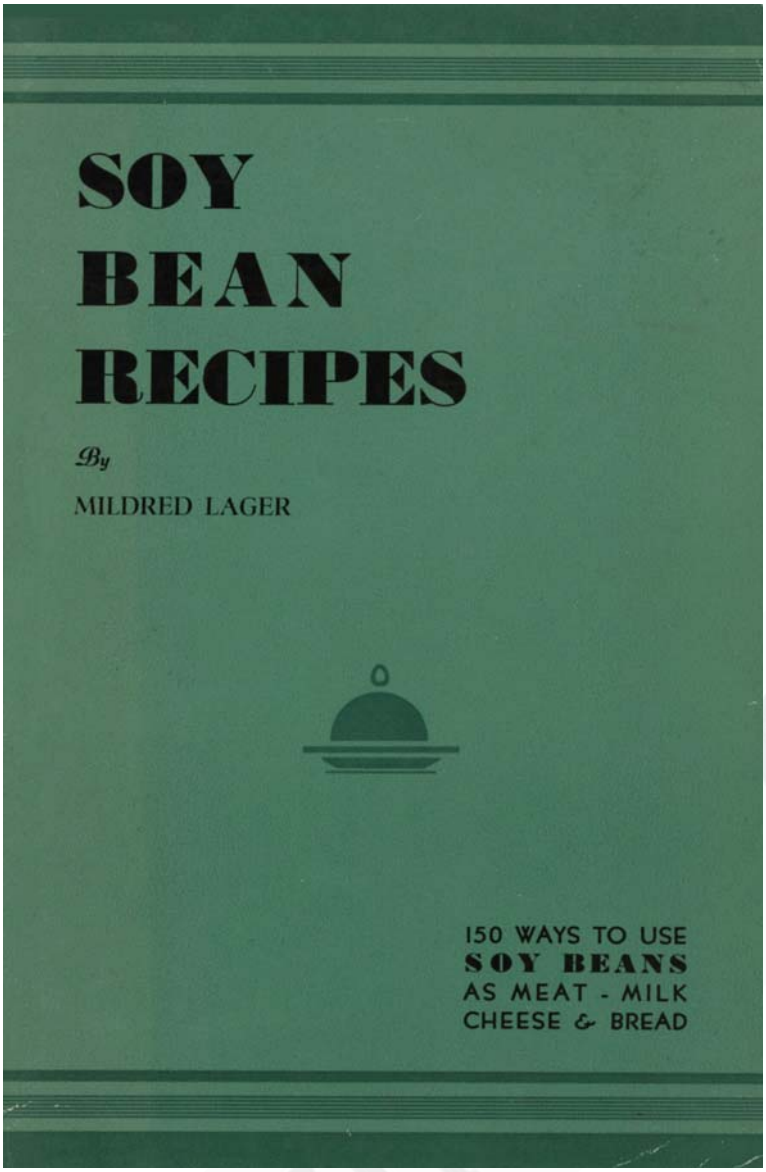
• ***Summary:*** See also next page. Contents: History of the soy bean. Food value. Analysis. Comparison with other legumes. Ash analysis. Soy beans in low starch diet. Alkaline in ash. Recipes: Green beans. Dry beans. Meat substitutes. Soy milk. Soy cheese. Soy butter [soynut butter]. Salads. Salad dressings. Soy spreads. Soy cereal. Soy macaroni, spaghetti and noodles. Soy bread and muffins. Waffles and pancakes. Cakes and cookies. Candies. Beverages. Toasted soy beans. Bean sprouts.



"Alkaline in ash: Soy beans have one great advantage over many proteins especially the meat proteins, in that they are alkaline in their chemical reaction or ash. This applies to the soy bean itself and to the other 100% soy bean products. The alkalinity will naturally be less in products where soy beans are mixed with acid ash foods."

A small portrait photo (p. 1) shows Ms. Lager and notes: "I want to acknowledge the aid received from Madison College, Tennessee; Loma Linda Food Company, El Molino Mills, Penna Soya Products Company, and from the many friends who gave me suggestions and recipes." Address: 3477 West 6th St., Los Angeles, California.

1466. Waring Corporation. 1942. Tested recipes: For hostess, mother, dietician. Waring Blendor. New York, NY: Waring Corp. 64 p. No index. 15 x 23 cm.
• ***Summary:*** On the color cover: "340 recipes for the new Waring Blendor"–plus an illustration of a Waring Blendor and 7 dishes made with it.
Within its 64 pages, this book contains the same 6 recipes and directions for "Milk smoothees" [smoothies] (p. 5) as found in the 1940 ed., except that the plum smoothee has replaced the date smoothee. However, this book contains a new section of "Recipes for children" (p. 52-63), by Mabel Stegner, Home Economist. There (p. 53) we find a page titled "Children's milk smoothies" which contains 14 recipes: Apricot, banana, cantaloup [cantaloupe], carrot. liver, peach, peanut, pineapple, Postum, prune, spinach, strawberry, tomato, and yellow turnip. The directions do not include the addition of ice or ice cream. Note that 4 of these recipes use vegetables instead of fruit, and one uses meat (liver, with chocolate malted milk to mask the flavor).

On the inside front cover is a photo of a Waring Blendor, at the beginning of a 2-page section titled "Instructions for operating your new Waring Blendor." The one-year warranty in the last page is the same. Address: 1697 Broadway, New York, NY.

1470. *Los Angeles Times.* 1943. Obituary: Edesse Irvine. May 19. p. 18.
• ***Summary:*** Edesse was the widow of Clare B. Irvine, who died several years ago [sic, in 1928]. Clare was employed by *The Times* from 1904 to 1924 as correspondent in the Santa Monica Bay area. Mrs. Irvine, who died Monday, is survived by two children, both of Santa Monica: Clarke Irvine (a son), and Mrs. Myra LaGuardia [probably Myra C. Guardia].

Talk with Alice Marks Irvine, Clarke Irvine's wife. 2004. Feb. 23. Myra was Clarke's only sister. Her first marriage was to Mr. Guardia; they had one son, Bobby Guardia, a detective in Reno, Nevada. She may have changed this from "Guardia" to "LaGuardia." He second marriage was to Mr. "Kirk" Kirkendall.

1471. Sansum, W.D. 1943. Re: Bill Baker's statements in promotional brochures. Letter to Mrs. Helen Baker, Ojai, California, June 18. 1 p. Typed, without signature on letterhead (carbon copy).
• ***Summary:*** "Your husband's folders or advertising were never submitted to me... He made a number of statements which I am sure were not scientifically correct.

"His chemical analysis shows the soya bean products do have an alkaline ash. Whether this has any value in the treatment of any type of diseased condition remains yet to be proven.

"There is no reason to assume that it has any effect whatsoever on the stomach acidity. We have definitely proven here that the reaction of the blood cannot be changed by any type of dietary procedure. The blood is never acid. Hence, any statement about counteracting blood acidity is erroneous.

"I therefore feel that the criticisms made by the Federal Trade Commission in Washington [DC] are just. It seems to me that you can say safely say that soya bean bread and products have an alkaline ash but any claims about their use in the treatment of any body condition have not as yet been proven. My kindest regards. Very sincerely yours," Address: M.D., Chief of Staff, The Sansum Clinic, 317 West Pueblo St., Santa Barbara, California.

1472. House of Better Living. 1943. Beat the meat shortage: *150 Ways to Use Soybeans as Meat, Milk, Cheese and Bread,* by Mildred Lager (Ad). *Nature's Path* (*New York City*). June. p. 237.
• ***Summary:*** This book sells for $0.55 by mail. Address: 3477 West 6th St., Los Angeles, California.

1473. Madison Foods. 1943. Zoy-Koff: Coffee flavor without coffee after-effects (Ad). *Nature's Path* (*New York City*). June. p. 227.
• ***Summary:*** A similar ad appeared in the Feb. 1944 (p. 66) issue of this magazine. Address: Madison College, Tennessee.

1474. **Product Name:** Soya-Choc. Introduced in Jan. 1940 as Soya Choc-Malt.
Manufacturer's Name: Roberts (F.G.) Health Food Products.
Manufacturer's Address: 40 Chapel St., St. Kilda (a beach-side suburb of Melbourne), Victoria, Australia.
Date of Introduction: 1943 June.
Ingredients: Incl. water, soybeans.
Wt/Vol., Packaging, Price: Tin-plated steel can.
New Product–Documentation: Ad in *Nature's Path to Health* (*Melbourne, Australia*). 1943. May/June, p. 15. "Your best moment. When the drink is Soy-Bev or Soya-Choc. These are the nicest drinks. Freshly made from the choicest soya beans in our modern factory, St. Kilda, Melbourne. In Hygienic ½ lb. and 1 lb. Tins at all Health Centres Throughout Australia." An illustration shows a man and woman seated in chairs by their fireplace each enjoying a cup of Soy-Bev or Soya-Choc. Below this is a steaming cup of the hot beverage. This ad also appeared in the Feb/March 1946 issue (p. 25), the Aug/Sept. 1946 issue (p. 23), and the April/May 1949 issue (p. 8) of this magazine.

Note from Paul Smith of Soy Products of Australia (Pte.) Ltd. 1995. March 14. Soya-Choc = Soy Compound with added cocoa. Soya-Choc = Soya Choc-Malt of 1940. Paul thinks Soya-Choc was first introduced in about 1933 or 1934.

1475. Morehouse, P.B. 1943. Re: Bill Baker's statements in promotional brochures. Letter to Mrs. Helen Baker, Ojai, California, July 5. 1 p. Typed, without signature on letterhead (carbon copy).
• ***Summary:*** "It is requested that you please advise me whether any advertising agency prepared or participated in the preparation of the two booklets entitled '4 Reasons' and

'What are Soya and Lima Bean Breads?'

"Also, it has not been made clear to me whether Mr. Baker operated his business as a sole proprietorship or whether you and he were partners in the enterprise, and it will be appreciated if you will advise me as to that question. Very truly yours,... Cc: William Francis Ireland."

Note: This letter was probably written on July 5, but the date is a little unclear on this carbon copy. Address: Director, Federal Fair Trade Commission [Washington, DC].

1476. Ireland, Wm. Francis. 1943. Re: Concern about letter from Federal Fair Trade Commission. Letter to Mrs. Helen Baker, Ojai Bakery, Ojai, California, July 12. 2 p. Typed, with signature on letterhead.

• ***Summary:*** "I received a copy of a letter from P.B. Morehouse of the Federal Fair Trade Commission, a copy of which is herein enclosed."

"If you have any information, whether Bill [Baker] had any advertising agency participating in the preparation of the two booklets mentioned in the 2. paragraph, please inform him directly or forward the information to me and I will send it on." He asks whether she was a partner in the business or whether Bill operated it as a sole proprietorship.

"I have been able to keep Bill out of trouble for a long time and believe you do not need to worry about the matter but please, see me before making any direct answer to Mr. Morehouse."

In a P.S. he answers Helen's inquiry about the U.S. Food and Drug Administration picking up samples in the bakery, and says it may be a routine procedure. Address: Secretary-Manager, Associated Bakers of Southern California, 325-6-7-8 Coulter Bldg., 213 South Broadway, Los Angeles, California. Phone: MUtual 5925.

1477. Holt, Jane. 1943. News of food: New products made from soy beans include a flour, cooking oil and bread. *New York Times.* July 29. p. 22.

• ***Summary:*** The soy bean has been called the "vegetable meat" because its protein is of such excellent quality.

The first food produced, named Soysage, is made by the Imperial Brands Company of Chicago. It comes in the form of a yellow flour that contains soy flour, peanut flour, cottonseed flour, wheat bran, wheat germ, dehydrated onion, and spices. A dry mix, it is designed to be used as a substitute for sausage. The New York Times kitchen developed (and printed) its own recipe for making the Soysage in place of the one on the package. It may also be used for breading cutlets, and two tablespoons can be added to a basic recipe for muffins or other quick breads, or to pancakes or waffles, to improve the nutritive value. It sells for about $0.50 a package that is said to make 35 one-ounce patties. It is sold at Lust's Health Food Store, 343 Lexington Ave., and at Kubie's Health Food Shop, 136 East 57th Street.

The 2nd product is a golden-brown loaf of bread sold under the trade name of Vita-Soya, which contains soy bean flour, and which made its debut in June at a luncheon given by Governor and Mrs. Thomas E. Dewey under the sponsorship of the New York State Emergency Food Commission. G.P. Wuest, who is both a chemist and a baker, spent about six months developing this bread, which contains about 20% soy flour. He reported that the chief difficulty lay in blending the soy flour, which is too low in gluten to provide a well-leavened loaf when used alone, with wheat flour, which has plenty of gluten. "The bread is firm, fine-grained and yellow-beige in color." Because of the high fat content of the soy flour it is said to stay fresh for at least a week. The maker claims that it contains 40% more protein that regular white bread and much less starch. It costs $0.20 a loaf and is undeniably "filling."

The 3rd item is Royal Cook, a blend of soy, corn and cottonseed oils.

1478. Paddleford, Clementine. 1943. Meet the soy! Try the new tasty products of this versatile, nutritious bean. *Los Angeles Times.* Sept. 5. p. G18.

• ***Summary:*** "This mighty little bean, the soy, is on its way to changing the food habits of the nation. The grocery store of the future will be crammed with soy foods. Soy items are moving out of the food-fad class, out of the health stores into regular grocery channels to play an important role in everyday dining."

The soybean "is a near-perfect food" which for 5,000 years has been the "staff of life" in the Orient."

"Dry soys can be made to sprout into a new 'miracle' food containing large quantities of nutritious proteins plus Vitamin C." Anyone can grow soy sprouts at home in a kitchen flower pot. They will be ready to harvest in 4 days. It's a Victory so rich in Vitamin C and protein that nutritionists at Cornell University say the sprouts can substitute for meat, fresh vegetables, and even citrus juice.

A sprout garden requires neither sunshine nor soil; sprouts need water and prefer darkness. When the "soy sprout" is 2 inches long, much of the bean itself still remains. Both the sprout and the bean are cooked and eaten together. Cook for 10-20 minutes, just long enough to remove the raw taste. They are nice sautéed or when steamed and served with a sour sauce or with chow mein.

Note: Clementine Paddleford was a very important and influential food writer, who wrote syndicated articles. She was the food editor of the *New York Herald Tribune* and *This Week* magazine. Born and raised in Kansas, she lived most of her professional life in New York City.

This article also appeared on Sept. 5 in the *Atlanta Constitution* (p. 18).

1479. Rhoades, E.L. 1943. Soybean protein as related to national nutrition and agricultural economics. *National Farm Chemurgic Council, Chemurgic Paper* No. 266. 3 p. Sept.

© Copyright Soyinfo Center 2021

29.

• ***Summary:*** Presented "at the Fourth Mid-American Chemurgic Conference, Cincinnati, Ohio, September 29, 1943.

"The national emergency, with its problems of adequate protein nutrition, has brought forth a large volume of the Hollywood type of glorification of the super-colossal miracle bean of the Orient. Its natural and unquestioned nutritional properties has made it a subject for much editorial romancing that might lead us to believe that we are going to quit using food proteins to which we are accustomed and shift the nation entirely onto the consumption of soybeans, and there has been some indication that diets in the future might be made entirely of soybeans from soup to nuts.

"The nation is undoubtedly going to continue getting its protein supply largely from meat, wheat, eggs, cheese, milk, and the other old standards in the future as we have in the past. However, there is a definite place and a definite need for soybean protein as well as soybean oil in the American diet in the future. Forsaking all flights of fancy, let us review some of the present solid, substantial indications of the future of this food item.

"The first chapter of the story of soybean food in the United States was begun in 1943, when more than 75,000,000 people in the United States consumed some small quantity of soybean protein in their various foods. What had come before in previous years was more in the nature of a prologue and preface to the story.

"This first chapter may have been a surprise or disappointment to some of the people who thought we were going to wake up some day or some month to find a large number of people living on soybean protein. There has been no such crashing climax or episode in the first chapter, and there probably will be none in the chapters that extend on into the future. The food manufacturers of the United States have quietly been adding during the past year small percentages of concentrated soybean protein in the form of soy flour or otherwise, to a large variety of foods. Their primary purpose has been to use this protein to supplement and activate the incomplete proteins, such as cereal proteins, without substantially changing the identity of the food, but merely with some improvement in palatability, flavor, and texture. It has been difficult during the past year for anyone normally purchasing doughnuts, bread, pies and other bakery products, soups, meat loaf, candy, and many other prepared foods, to avoid consuming some soybean protein to their own nutritional advantage. In this development, the tonnage so consumed has probably been vastly overestimated, while the number of people consuming this food and the nutritional benefits derived from it have probably been vastly underestimated. More people during the last year have learned to prepare dry soybeans by pressure cooking and other methods. More green vegetable types have been grown and consumed. More have been canned; more people have purchased soy flour and soy grits from grocery stores in which they are beginning to become available to the public. Substantial offerings of these products to the retail trade will be made during the months of October and November, and public consumption of these items is expected to increase substantially during the winter.

"It is a problem for either the housewife or the food manufacturer to introduce any new item into their recipes or their formulae. There is evidence that the housewives are doing this rather effectively. Great numbers of food manufacturers have been experimenting very carefully with this item, and large numbers of them are now adding it for technical improvement, as well as nutritional improvement of various products. In so doing, they are contributing much to better protein nutrition in the future.

"In addition to the technical problems of adding soy flour as a new ingredient to foods, food manufacturers have run into some difficulties in connection with official standards of the Food and Drug Administration that have not yet made adequate and proper allowance for new ideas in the improvement of foods, but find it most convenient to stick to the practices of the past without readily admitting any valuable ingredients for the improvement of foods. This, in some cases, results in suppressing improvement in food quality rather than protecting the nutritional quality of foods. Perhaps this is due, in part, to the fact that much of the food use of soybeans in this country in the past was limited to diabetic foods and other health food lines. There is showing up a tendency on the part of the Food and Drug Administration to make it difficult for food manufacturers to place this valuable protein in some foods unless enough of it is put in to please the diabetic or the food faddist, but not be acceptable to the manufacturer of foods for the general public. We have no doubt that this tendency will be corrected as nutritional information is more fully taken into account.

"Looking into the future, we see soybean protein performing three basic functions: (1) adding a nutritional protein plus to a national diet that has not always been adequate in quantity or quality of proteins: (2) providing a flexible protein supply that will insure adequate protein nutrition in any type of emergency, and (3) providing an exportable protein for the American farmer.

"Leading nutritional authorities have always recognized a lack of adequate protein nutrition either in terms of quantity or quality in large sections of the public, particularly those of lower purchasing power. Our experience with the boys in the United States armed forces is giving a spectacular demonstration of the effects of better protein nutrition. While all of the difference is not traceable to protein improvement, the fact that the protein consumption for great numbers of these boys has been practically doubled since they entered the Army brings home to the public the actual value of better protein nutrition in the future, with more protein to provide better bodies, better health, more vigor and effectiveness

© Copyright Soyinfo Center 2021

in working, and a generally happier population, without supplanting or replacing any of the proteins used in the past. The American public could well use an additional 5 grams or even 10 grams of soy protein per day to promote maximum health and vitality.

"Since a relatively small percentage of the soybean crop is all that would need be diverted from other uses to food uses, the reservoir of soybean protein in the future will stand as a flexible protection against emergencies of any type, such as our present war emergency and those that arise out of droughts, those that arise for the individual as a result of his loss of a job, or any condition of general depression when purchasing power is extremely low for many.

"In the soybean crop, the American farmer will, in the future, have an export market for protein food to help him to further diversify his farming and make for a more stable agriculture. The American farmer has not been able to export proteins for a number of years. It has been a long time since we exported beef. We have not been able to export pork to any great extent in recent years. Such products, when produced under American costs, cannot be generally purchased in normal times by the low purchasing power of world markets in general.

"We now have a highly nutritious protein food that can be produced with tractors and combines, and as a nonperishable protein concentrate, may practically flit about the world on low transportation costs, in small stowage space, and sell even in the low purchasing power parts of the world at a favorable price. This should result permanently in the diversion of some American acreage from what have been surplus crops in the past, which we have been obliged to pay farmers not to produce. Soybean processors of the United States seem to be outstripping the rest of the world in the quality of food that they are making from the soybean. This will give the American farmer a distinct advantage in maintaining and promoting the foreign market for this low cost protein food.

"The improvement of soybean foods, discarding the bitterness of flavor, but retaining all the protein, mineral, and vitamin nutrition is another great triumph of chemistry, which I am glad to present to the Farm Chemurgic Council as a further achievement of chemistry in solving at the same time, some of our nutritional and some of our agricultural economic problems." Address: Secretary, Soy Flour Assoc., Chicago, Illinois.

1480. *Dr. Shelton's Hygienic Review* (*San Antonio, Texas*). 1943. The health food store. 5(1):14-15. Sept.
• ***Summary:*** The American Physiological Society was founded in Boston, Massachusetts, in 1837 by a group that had started to meet in late 1836. As stated in its constitution, the Society's purpose was "to acquire and diffuse a knowledge of the laws of life, and the means of promoting human health and longevity." The official organ of the society was *The Graham Journal of health and Longevity*, a weekly. Its first issue was dated 4 April 1837.

The strictness of the dietary laws down by Graham and Dr. William A. Alcott made it difficult for the members to obtain supplies of good food, which were to be vegetable foods [vegan; no animal products], grown on good soil without the use of manure or fertilizers.

In 1837, to help supply such food, the Society opened a store known as the "Physiological Society's Provision Store." In the issue of Sept. 26, it is first mentioned in the Graham Journal, which states: "The provisions in this store are mostly vegetable, and such as a best calculated to preserve health and longevity, and are selected with great care from the best the market affords, and consists of wheat, Indian corn, rye and oatmeal, or otherwise prepared for hominy, mush, gruel, etc. Also rice, peas, beans, tapioca, sago, sugars and molasses, garden vegetables, the best of fruits, milk, and a good supply of coarse wheaten or dyspepsia bread and crackers from Mr. Shipley's bakery, etc.

"Graham flour constantly on hand."

The writer [Shelton] observes: "That was the first advertisement of the world's first health food store. It appeared more than a hundred years ago and, when contrasted with the ads of health food stores of today, is remarkable for more than its modesty."

It was established to meet a specific need: that of supplying wholesome natural foods that could not be obtained in regular grocery stores and bakeries. When health food stores were established in various parts of the nation, they seem to have had the same goal. [Otto] "Carque supplied the people with sundried fruits. [Anthony] Berhalter and others made it possible for them to get genuine whole wheat flour, whole wheat bread, whole or brown rice, whole corn meal, and other whole natural foods." Since men did not get rich on this kind of business, only those with high ideals went into it.

All but a few of today's health food stores are very different. Few have resisted the temptations of commercialism. They resemble drug stores.

1481. Hauser, Gayelord. 1943. Delicious and nutritious food for the duration. *Diet Digest* (*Beverly Hills, California*) No. 17. p. 40-41, 62.
• ***Summary:*** Recipes include: Delicious baked soya beans. Soya bean loaf. Soya butter (toast whole soya beans then grind very fine. Add soya oil and a pinch of salt until the consistency of peanut butter). Soya and peanut butter patties. Soya sprouts. Soya bean milk. Soya wheat germ waffles (with soya flour). Wheat germ soya muffins (with soya flour).

The article ends: "Note: For the duration it will be wise for you to go to your health food store and secure several pounds of wholewheat germ, wholewheat pastry flour, and soya flour (preferably toasted)." Plus several supplements sold by Hauser's Modern Products in Milwaukee, Wisconsin.

Health Foods Retailing–Official trade publication of the National Health Foods Association. A newsy magazine for store owners, jobbers, and manufacturers. Bi-monthly. Circulated coast to coast. $1.00 per year. Health Foods Retailing, 100 Stevens Ave., Mount Vernon, New York.

"*Nature's Path*, established 1896 by Dr. Benedict Lust. America's pioneer magazine devoted to Natural Living and Nature Cure." "10 cents a copy, $1.00 a year. Canadian and foreign, $1.50. Send orders to Dr. Benedict Lust, Dept. C., Lexington Ave., New York City."

Note: This is the earliest document seen (April 2007) that mentions the National Health Foods Association–which later became the NNFA.

1484. *Let's Live.* 1943. Classified: Get acquainted with health folk (Ad). Sept. p. 23.
• ***Summary:*** "Join our group of modern, health-minded young and old (with young minds, bodies) and enjoy new friendships by mail or in your area. Health Pals, founded in 1935 by Clarke Irvine has flourished and grown all over U.S. Confidential list with name, address, description, hobbies, etc., published regularly; service only $1 yearly. Send today, increase your fun in life, lots of service boys now on list, cheer them up and receive wonderful letters from them all over. Health Pals, 4657 Hollywood Blvd., Hollywood, 27, California."

Talk with Alice Marks Irvine, Clarke Irvine's wife. 2004. Feb. 23. Clarke, like a matchmaker, wanted to bring together like-minded people interested in health. If a person sent in their personal information plus $1, Clarke would add it to the list and send out the updated list once a year to all contributors.

1485. **Product Name:** Kreme O'Soy Butter Muffins.
Manufacturer's Name: Madison Foods.
Manufacturer's Address: Nashville Agricultural Normal Institute, Madison, Tennessee.
Date of Introduction: 1943 October.
Ingredients: Incl. Wheat flour, water, soy flour, sugar.
New Product–Documentation: Walter M. Kollmorgen. 1943. Tennessee Planner. Sept/Oct. p. 17. A photo shows a package labeled "Kreme O'Soy Butter Muffins: A New Taste Thrill."

1486. Marks, Alice. 1943. Soybeans for your family's good health! *Let's Live.* Oct. p. 8.
• ***Summary:*** "This small nutritional wonder comes into its own and is now famous. It is hard to believe that so many vitamins and minerals can be stored inside its little jacket, and these mites are destined to play a dramatic role in the American diet. They not only rival meat in nutritive value but are an excellent source of high quality protein with a sufficient supply of amino-acids for growth purposes and can, therefore, take the place of animal proteins. This marvel bean also has enough iron and copper for building good blood cells and healthy bones.

"Sprouts from these wonders of nature are being used more and more in place of the ordinary bean sprout."

Recipes include: Soybean waffles with mapeline syrup (incl. ½ cup soy flour). Scrambled eggs with sprouted soybeans.

1487. Woodward, Patricia. 1943. Attitudes toward the use of soybeans as food (Continued–Document part II). Washington, DC: Committee on Food Habits, National Research Council, National Academy of Sciences. 11 p. Oct. Mimeographed unpublished manuscript. [2 ref]
• ***Summary:*** (Continued): "The essays and interviews furnish a number of clues indicating the kinds of information people would like to have about soybeans, and the ways in which they might accept them most readily. For example, the reasons given by the respondents who were enthusiastic about the beans–if not mere taste reactions–have suggested some of the attributes which are associated positively with soybeans, particularly if there is no negative counterpart of these favorable reactions. If there is, the negative statements indicate that this particular characteristic is controversial,

© Copyright Soyinfo Center 2021

one to which some people react both favorably and others unfavorably, or that it is one concerning which further education is necessary.

"In addition to these positive and negative reactions, however, there were many others–in fact, the largest number of the responses fell into this category–which indicated uncertainty, indecision, or what we have called ambivalence, meaning a confused emotional attitude in which the person expresses reservations or qualifications of either a positive or negative attitude, (such as 'They might be all right if they are good for you,' or 'I wouldn't eat them unless it becomes necessary'), or combined a positive and a negative attitude in the same statement. These statements have been particularly useful in determining some of the obstacles which stand in the way of complete acceptance of soybeans, and also show what sort of education and information is most needed. All three types of attitudes have been classified so that those related to one characteristic of soybeans (such as 'cheapness') can be considered together.

"A. Considerations in an Educational Program

"1. The most frequently mentioned attribute of soybeans was their nutritional value, expressed in both general terms–as 'healthy.' 'nourishing,' 'good for you,' 'good food,' 'will improve the diet'–and specific terms–as 'contains lots of vitamins,' 'lots of proteins,' 'as much protein as steak,' 'high fat content,' etc. This same general quality was mentioned in the ambivalent responses in conditions under which the soybean would be accepted, such as 'if nutritious,' 'if good for you,' 'if it's what it's cracked us to be,' 'if it has vitamins,' 'if it contains proteins,' etc: It is particularly interesting that this is one of the few categories of responses in which no mention of nutritional value in a negative sense was made. A few misconceptions appeared, such as that soybeans are starchy like other beans, and consequently undesirable, or have 'lots of spice in it,' but no one said they were not nourishing, or that they do not have any useful food value.

"The lack of any negative statement about the nutritive value of soybeans, and the mention of this characteristic in both positive and ambivalent statements suggests that this is one of the first points on which the public would like to have further information about soybeans. People are willing to accept them if they are nutritious. This attitude is one indication of the present-day emphasis upon essential food elements, vitamins, etc, and provides good evidence that a well-rounded educational campaign composed of scientific facts about the nutrients in soybeans would do much to promote their acceptability,

"However, caution must be observed, and the facts should not be over-emphasized. In our culture, we are likely to place in separate categories in our thinking the foods that are 'good for one' and the foods that are 'good to eat.' The first are nourishing; the second are pleasurable. In general, we prefer the taste of the second group of foods more than the first. If a great deal of emphasis is placed upon the nourishing qualities of a certain food, it is mentally categorized as 'good for you,' with the resultant interpretation that it cannot be expected to taste very good. This is aptly illustrated by the comment of one of our respondents, who said, 'Anything that tastes that bad must be good for you.' Other reactions to an over-emphasis on the 'healthful qualities' of soybeans are the following: 'Perhaps another reason for my distaste for them may be caused by the fact that they are often used as a health food:' 'The only thing I have heard about them was from health-conscious fanatics and I have never put much stock in their opinions.' These indicate the danger in placing too much stress upon the nutritional aspects of soybeans.

"2. Another factor closely related to the first one is the tremendous prestige of the scientist at the present time. Some respondents said they would 'accept any food O.K.'d by the doctors. Others said they would eat soybeans 'if O.K.'d by the doctors, by the scientists,' or 'if the food authority proves them wholesome.' There were no negative statements given to contradict this suggestion. Taken together with point #1, this means that the statements as to the nutritional values of soybeans should be made by recognized authorities, and by a number of them, as different people look to different authorities for sanction.

"3. The need for an educational campaign was expressed in other ways, chiefly in ambivalent comments, such as 'if publicity is given to the product,' 'if recipes are furnished,' or 'if people know how to prepare them.' Suggestions that the people need to be educated to use them, that soybeans should be 'talked about in the papers,' and 'by important people,' that 'a campaign is necessary to get the public to understand that soy is good for you,' and that there should be 'an active advertising campaign.' The only negative comment related to these ideas, namely, 'People don't know much about it,' Also pointed out the need for further information. These remarks furnish additional evidence that soybeans are strange and unfamiliar, and that the greatest need is to provide the public with accurate and detailed information concerning them. Specific information and recipes are necessary, and a new food cannot be included in the diet pattern until the housewife is familiar with ways of preparing it.

"4. The *newness* of soybeans, a characteristic which is unavoidable, should not in itself be emphasized. except as they are described as a new development or new varieties, etc., thereby linking the newness with scientific progress. Our respondents reacted both ways, saying 'People like to try new things,' and 'People don't like to try new things.' Some were not interested in trying them because they had never heard of them as part of the American diet. (See point #6 below.)

"5. The idea of newness is undoubtedly related to the idea that such a food as soybeans is very unusual and uncommonly used, so that the individual using it may feel

© Copyright Soyinfo Center 2021

he is regarded as 'different' by his neighbors. A number of the respondents expressed unwillingness to be 'that different,' saying, for example, 'It isn't popular enough.' Others used ambivalent ways of expressing their attitudes, 'If everybody eats it,' 'Once people start using it,' 'If everyone else does,' 'If it becomes popular,' etc. These are indications that conformity is generally prized in our culture; one doesn't want to be considered 'different,' as this often carries the connotation of being peculiar. 'Keeping up with the Jones,' not appearing different from the members of one's community, are important forces in regard to food habits, as well as to other areas of behavior. Consequently, any program introducing such a completely new food must present it as a food to be used by most people, one which will fit into anyone's diet, for if the food appeals only to a few, it is not so likely even to remain a real part of their diet (8). One way of handling this is to point out that soybeans have already been accepted by a great many people. The increased sales records of the products such as the salted 'nuts' could be used to emphasize this point.

Footnote 8: "The reader may immediately think of foods which are used fairly regularly only by people in one area of the country, or by a limited number of people throughout the country. This may be because of local custom, in which case the individual is conforming to the customs of his particular neighborhood, which matters most of all to him, or it may be that the food is class-typed, that is, used by the members of a certain socio-economic group, in which case the individual is again behaving as his group does, and even if separated from them geographically, may still consider himself a member of this group and pride himself more on remaining like then than in adopting the customs of his new neighbors. The food faddists are an exception to this general interpretation, as their motivation in the choice of food is quite different, but they need not concern us here as they are a relatively small group in this country." (Continued). Address: Committee on Food Habits, National Research Council.

1494. Holt, Jane. 1944. News of food: Experts point out many advantages of adding soy beans to American diet. *New York Times.* Feb. 16. p. 20.
• ***Summary:*** Soy is a bean, and for many people "beans symbolize all that is humdrum in cookery." This may be one reason that some people have given soy beans a cool reception. As they struggle for recognition (with not much success), soy beans must confront the "natural suspicion with which people regard new foods and the resistance they show to efforts to 'reform' their eating habits." Another problem "may be the indifferent quality of some of the soy products that have been offered at retail and that have prejudiced customers."

"These explanations of why the bean is not more popular despite Federal and State campaigns urging its greater use were advanced yesterday by speakers at a luncheon given under the joint auspices of the New York State Emergency Food Commission and the Neighborhood Luncheon Club." The meeting took place at the Hotel Wellington, which has been exhibiting various soy products this week. Those now available in New York City stores include oil, flour, grits, sauce, etc.

Miss Adeline Hoffman, a nutritionist on the staff of the commission, gave an address in praise of soy beans; "she

© Copyright Soyinfo Center 2021

reminded her audience that they were an admirable stand-in for meat," and gave numerous reasons why.

Pre-cooked, canned whole soybeans are very convenient for the woman who doesn't like to spend much time in the kitchen. They can be "served cold in a salad or hot with seasonings, or they may be enhanced with a tomato sauce" or transformed into other dishes. One such product, sold under the trade name of "Miller" in a tin weighing 1 lb. 4 ounces, is available at Gimbels for 25 cents.

Another interesting and tasty product is soy macaroni, which is sold at Health Food Distributors, 123 East 34th St. A 7-ounce cellophane bag sells for 15 cents.

For more information on soy cookery and recipes, write to the commission's offices, 247 Park Ave., New York City 17.

Note: This is the earliest document seen (Sept. 2009) that discusses the slow acceptance of soy food products during World War II.

1495. **Product Name:** Battle Creek Soy Beans (Tender Casein?).
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1944 February.
Wt/Vol., Packaging, Price: Can.
New Product–Documentation: Florence Paine. 1944. House Beautiful. Feb. p. 86. "I was skeptical about soy beans." Photo of a can and its label. Last word in subtitle is not clearly legible. The can appears white with black print and no illustrations.

1496. Madison Foods. 1944. Zoy-Koff: Restful sleep with Zoy-Koff's zestful flavor (Ad). *Nature's Path* (*New York City*). Feb. p. 66.
• ***Summary:*** "Prepare Zoy-Koff as you would coffee. Two grinds–Regular and fine. Available at health-food stores and specialty groceries. Devoted to the protection of your health." A photo shows the "new flavor-fresh package." A small illustration shows a woman sleeping soundly in bed. Address: Madison College, Tennessee.

1497. Paine, Florence. 1944. I was skeptical about soy beans. *House Beautiful* 86:33, 88, 97, 101, 104. Feb.
• ***Summary:*** The first page contains a large photo of a housewife standing by a table filled with commercial soy products including Soy-B-Prep, Battle Creek soy beans, Arcadia soya puffs, Golden wheat-soy mix for griddle cakes and waffles, Walker's soya sauce, Me-T-Soy extender, and Vivasoy (a high protein soya product). All are available from Kubie's Health Shop in New York City.

The article describes how to sprout soybeans at home and contains recipes for: Chopped bean sprouts with beef. Baked soy beans. Soybean perfection salad (with soybean sprouts). Tangy soy bean soup. Soya nut bread (with soy flour). Meatless chop suey (with soy sauce).

The author was originally turned off to soy after eating a "Soy Bean Loaf" at a vegetarian restaurant. "My shifting from soy-bean avoider to booster began last summer after attending a luncheon given [in New York] by Governor Dewey at which soy beans were fed to a critical and skeptical group in salads, souffles, bread, and as vegetables. The dishes really were delicious, and I could hardly wait to get home and do some experimenting myself. I have been trying them out ever since on my family and friends. I'll let you in on a secret, though. At first I made the mistake of telling my guests what they were being served. In nine cases out of ten they were anti-soy beans because of some previous experience, and so were antagonistic right away and I could seldom change their opinion. So I changed my tactics. I now wait until I get a favorable verdict before I make my announcement. The new system works like a charm."

1499. Yami Yogurt Products Co. 1944. This young girl will probably live to be 100–why? Yogurt (Ad). *Life and Health* 59(3):29. March.
• ***Summary:*** "Not because she's Bulgarian; but because (being Bulgarian) she is sure to make Yogurt an important part of her daily diet.

"Authentic statistics show, that in the Balkans, 1,500 people out of every million live to be 100. In Central and Western Europe only 9 in a million reach this great age. In our own America the figure is still smaller.

"What's the secret? Metchnikoff, the Great Russian microbiologist, attributed this longevity to the daily use of yogurt.

"Years of research convinced him that this cultured milk-food–eaten regularly and adequately–introduces into the gastro-intestinal tract certain 'friendly' lactic acid organisms. These counteract the putrefactive process in the intestines and thus retard the break-down of vital organs which inevitably spells premature old age.

"It is now possible for you to secure a Yogurt culture that is genuine and fool-proof–and that will enable you to make Genuine Bulgarian Yogurt in your own home. This culture is prepared by scientists in the world-famous Rosell Bacteriological Institute at the Trappist Monastery in Canada. You simply add the culture to ordinary raw or pasteurized milk and follow our A B C directions.

"Leading health-food stores are being stocked with this Yogurt as rapidly as possible; but if your dealer is not yet supplied, mail the quick-action coupon below.

An illustration or photo shows a huge 5-story building. Above it is written: "The Rosell Institute in Canada where our Genuine Yogurt Culture is made."

"For the attached $1.80 send me postpaid, direct from the laboratory, enough culture to make my own Yogurt for a month." Address: (Dep. H) 2412 West 7th St., Los Angeles, 5, California.

• ***Summary:*** During World War I, the Allied blockade of 1917 cut off imports into Denmark. On a diet largely of whole grain and bran bread, barley porridge, potatoes, greens, and dairy products, the Danish people survived the war with improved health and lowered mortality rates. The author praises whole wheat flour and is highly critical of refined white flour and white bread which (even if enriched) have been deprived of much of their nutritive value. Address: Div. of Poultry Husbandry, College of Agriculture, Univ. of California, Berkeley.

1502. Striegel, Joseph R. 1944. Unpolished rice. *Nature's Path* (*New York City*). June. p. 234.
• ***Summary:*** From Let's Live: Christiaan Eijkman (1858-1930), a Dutch physician and pathologist in Java during the early 1890s, "noticed that chickens confined in a yard where they had nothing to eat but polished rice sickened and died from a disease similar to beriberi. Other chickens which had the run of the grounds and so followed a more varied diet, remained healthy."

Based on these observations, Eijkman designed an experiment in which he cooped up two groups of chickens and fed one group polished rice and the other unpolished rice. The result was just as he had predicted. He then applied the results to the hundreds inmates of the beriberi hospital; he fed them all unpolished rice and they recovered.

Note: Eijkman's experiments led to the discovery of vitamins. Together with Sir Frederick Hopkins, he was awarded the 1929 Nobel Prize for Physiology or Medicine. Address: Cpl. [Corporal].

1503. Gehman, Jesse Mercer. 1944. Health–Man's natural state. *Nature's Path* (*New York City*). Aug. p. 285, 305, 311.

• ***Summary:*** Good health should be the result of proper living. Yet civilization has taught us to satisfy appetite, rather than hunger, to eat and drink when we are not hungry or thirsty, it has confined us indoors away from fresh air, has taught us indulgence and over-indulgence, has taught us to ride rather than walk.

Civilization is a mixed blessing in terms of our good health. We all live unnatural lives, eat unnatural foods, and

© Copyright Soyinfo Center 2021

die of unnatural diseases. Address: Dr.

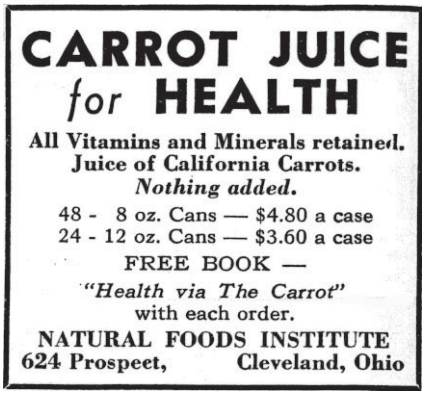
Only Butler's Soya Butter can fill the above specific need. Butler's Soya Butter is available only to Health Food Stores and other outlets catering to those whose diet requires specialty foods." Photos show cans of each of these five Butler products: Butler's Soya Cheese [tofu]. Butler's Vegeburger. Butler's Soya Nut-Loaf. Butler's Vegetarian Chops. Butler's Soya-Butter.

Note: This is the earliest English-language document seen (Nov. 2014) that uses the word "Vegeburger" to refer to a meatless / vegetarian burger. Address: Cedar Lake, Michigan.

1505. Lust's Health Foods. 1944. Lust–the oldest name in health foods does it again! "Balanced Blend" all-in-one tablets, of vitamins and minerals (Ad). *Naturopath and Herald of Health* (*New York City*) 49(9):273. Sept.
• ***Summary:*** Just four tablets a day give you the following: Lists the exact amount of 7 vitamins and 4 minerals. Note: This seems to be an early one-a-day multiple supplement. Address: 143-40 Oak Ave., Flushing, New York.

1506. *Chicago Daily Tribune.* 1944. Chicagoland weddings. Oct. 8. p. F2.
• ***Summary:*** "Marilee A. Miles, daughter of Mrs. Mark A. Miles, 919 Carmen av., to Sgt. Howard A. Berhalter, son of Mr. and Mrs. Anthony Berhalter, 1423 N. Clark st., on Aug. 26. Mrs. Berhalter attended the Art institute and was graduated from Northwestern university. She is living in Detroit [Michigan], where she is employed in government work, while her husband is stationed in Fort Benning, Georgia."

1507. **Product Name:** Battle Creek Steaks, Battle Creek Skallops, and Meatless Wieners.
Manufacturer's Name: Battle Creek Food Co.
Manufacturer's Address: Battle Creek, Michigan.
Date of Introduction: 1944 October.
Ingredients: Skallops in 1971: Wheat protein [wheat gluten], water, salt.
New Product–Documentation: These three meat alternatives, introduced during the early 1940s, were made from varying combinations of nuts (mainly peanuts), wheat gluten, and natural flavorings. None of them contained any soya. Worthington Foods, Inc. 1960. Oct. 15. "Battle Creek Food Company, authorized dealer price list." "Vegetable Skallops" and "Vegetable Steaks, regular or small cuts" are listed. Note: This is the earliest commercial meat alternative seen which has a name clearly indicating that it is an alternative to fish, shellfish, or other seafood products.



Richard W. Schwarz. 1970. John Harvey Kellogg, M.D. p. 122. "The doctor's interest in new vegetarian meatlike protein foods continued active until shortly before his death. Among some of the more popular creations later developed in his laboratories were Protose, Battle Creek Steaks, and Battle Creek Skallops. Various combinations of nuts and wheat gluten composed the principal ingredients in the imitation meats."

Seventh-day Adventist Dietetic Assoc. 1971. *Diet Manual, Utilizing a Vegetarian Diet Plan.* 3rd ed. p. 162. Lists the ingredients in "Skallops (Battle Creek–by Worthington)."

Letters from Charles R. MacIvor or Hendersonville, North Carolina. 1981. March 4 and April 28. Battle Creek Steaks and Battle Creek Skallops were launched sometime before 15 Oct. 1944, as they were listed in the 1944 dealer retail price list. Neither of these products contained any soya.

Talk with Allan Buller of Worthington Foods. 1994. July 14. Battle Creek Steaks was mainly a gluten product, which was part of the product line that Worthington took over in 1960.

1508. Natural Foods Institute. 1944. Carrot juice for health (Ad). *Nature's Path* (*New York City*). Oct. p. 394.

• ***Summary:*** A small (2¼ inch square) ad. "All vitamins and minerals retained. Juice of California carrots. Nothing added.

"48–8 oz. cans–$4.80 a case. 24–12 oz. cans–$3.60 a case. Free book–'Health Via the Carrot' with each order."

Note: This company was a pioneer in the electric kitchen blender industry. Their blender was eventually re-named "Vita-Mix." Address: 624 Prospect, Cleveland, Ohio.

1509. Williamson, Maydene. 1944. The health food store from the doctor's viewpoint. *Nature's Path* (*New York City*). Nov. p. 413.

health food stores, but modern medicine "would like to have the name 'health food store' abolished as misleading, claiming that 'all foods are health foods.'" A portrait photo shows Maydene Williamson.

Note: A large ad (p. 426 of this issue) shows that Maydene Williamson is one of three women chiropractors who own "The Natural Health Clinic, Inc., 2915 West Grand Boulevard, Detroit, Michigan. Phone: Trinity 2-3555." Address: Sc.D., D.C. [Detroit, Michigan].

1510. *Chicago Daily Tribune.* 1944. Death notices. Dec. 18. p. 14.
• ***Summary:*** "Berhalter–Catherine Berhalter, Dec. 10, of 1423 N. Clark street, beloved wife of Anthony A. Berhalter, mother of Sgt. Howard R. Berhalter, U.S.A. overseas. Services at chapel, 1253-55 N. Clark street, Tuesday, Dec. 19, at 2 p.m. Interment private."

1511. Loosli, J.K. comp. 1944. Manufacturers and distributors of soybean products (Brochure). In: New York State Emergency Food Commission. 1944. Leaflet No. 40. Dec. 4 p. on unnumbered pages.
• ***Summary:*** The names and addresses, of sources most readily available to the New York State trade, appear under the following headings: Soy flour, grits and flakes: Manufacturers, wholesale distributors. Flour mixes for pancakes, muffins, etc. Dry soybeans: For cooking, for sprouting. Canned soybeans. Sprouted soybeans (LaChoy Food Products, Inc., Archbold, Ohio. Most Chinese restaurants).

Note: This is the earliest document seen (Jan. 2013) stating the LaChoy Food Products sells sprouted soybeans.

Macaroni, spaghetti, noodles (The Pfaffman Co., 6919 Lorain Ave., Cleveland, Ohio). Beverages. Bakery products: Soy bread, Soy cookies, crackers, wafers, etc. (Incl. Cubbison Cracker Co., 3407 Pasadena Ave., Los Angeles, California. Tom Soya Foods, Inc., P.O. Drawer 510, Williamsport, Pennsylvania). Breakfast cereals (Soyawheat, Soyawheat Co., Red Wing, Minnesota. Tom Soya Puffs and Exploded Soybeans, Tom Soya Foods, etc.).

Soybean curd [tofu] (International Nutrition Laboratory, P.O. Box 326, Mt. Vernon, Ohio). Meat-like products (The Battle Creek Food Co., Battle Creek, Michigan. Madison Foods, Madison College, Tennessee. Natural Health Products, 143 W. 41st St., New York, New York). Soups. Soy nuts (Dewey Food Products, Inc., 2251-3 N. Knox Ave., Chicago, Illinois. La Choy Food Products, Inc., Archbold, Ohio. Soybean Products Co., 9025 Monroe, Chicago, Illinois. Tom Soya Foods, Inc., etc. Vegetable Products Co., Rochester, New York). Spreads. Address: Vice-Chairman, Soybean Committee, Cornell Univ., New York.

1512. Macfadden, Bernarr. 1944. Hidden treasures in health foods–Constipation. *Nature's Path* (*New York City*). Dec. p. 449.
• ***Summary:*** "This country is becoming health conscious... Usually this much prized treasure has no value until we lose it." Constipation is one of the worst enemies of good health. The number of Health Food Stores has increased dramatically during the last year or two. An illustration shows Bernarr Macfadden.

1513. *American Naturopath: The National Naturopathic Journal.* 1944-1964? Serial/periodical. Published in Hollywood, California. *
• ***Summary:*** Description based on Vol. 15, no. 6 (Sept. 1959).

1514. **Product Name:** Bragg Wheat Soya Noodle Soup Mix.
Manufacturer's Name: Live Food Products Co.
Manufacturer's Address: 33 E. Magnolia Blvd., Burbank, California.
Date of Introduction: 1944.
New Product–Documentation: Taylor. 1944. The Soy Cook Book. p. 199. "Dehydrated soup packed with wheat soy noodles and capsule of real chicken fat–5 servings."

1515. Hauser, Bengamin Gayelord. 1944. Diet does it. New York, NY: Coward-McCann, Inc. 248 p. Index. 20 cm. Rev. ed. 1951 (117 p., 28 cm), and 1952.
• ***Summary:*** In the preface, the author states that for 20 years he has been a pioneer in the field of scientific eating. The author does not advocate a vegetarian diet, but he does recommend use of soya beans, and consumption of plenty of vitamins and whole (unrefined) grains. For example, at the start of chapter 3 titled "Normal Nutritional Regime" is a section on "Proteins Come First." It says: "Protein foods are of two kinds, spoken of as first class and second class proteins. The first class proteins keep the body in excellent repair. Such proteins are found in egg yolk, cheese, milk, yogurt, and glandular meats such as liver, kidney, brain, and sweetbreads. The muscle meats which we eat as roasts, chops, and steaks are also first class proteins but are less valuable to the body than glandular meats. A few vegetable foods contain first class protein: soya beans, nuts, wheat, especially wheat germ..." An active man should eat 75 gm of protein daily to maintain buoyant health. Half of the amount should be supplied from animal protein. "Recent studies have revealed that about 60% of the people in America obtain too little protein to build full health. With the higher costs of eggs, fish, and meat, protein deficiencies of a more severe nature may be expected. For that reason you should acquaint yourself with 'the honorable soya bean' or the 'meat without bones' as it is called in the Orient. Prepared correctly as directed in the 'New Health Cookery,' Chapter 20 [sic, 21, of this book], soya beans can be delicious and fortunately contain first class protein."

© Copyright Soyinfo Center 2021

Cooked soya beans are a good source of vitamin B-1 (p. 32). "Buy only whole wheat or soya bean macaroni, spaghetti, and noodles which are sold at stores specializing on health-building foods. Use brown rice rather than the white variety. Eat soya beans, baked, in "meat" loaves and patties" (p. 34).

Soy-related recipes include: Cream of soya soup (with cooked soya beans, p. 217). Soya nut croquettes (with baked soya beans mashed, p. 224). Soya bean loaf (p. 224). Soya and peanut butter patties (with cooked soya beans, p. 224). Delicious soya muffins (with soya flour, p. 228). Soya cream waffles (with soya flour, p. 229). Soya nut waffles (p. 229). Delicious soya cake (with soya flour, p. 229). Soya cookies (with soya flour, p. 230). Whole soya flour pie crust (p. 232; with "½ cup whole wheat flour and 1½ cups soya flour" etc.). Soya bean sprouts (homemade, p. 234; "They are also often used with soya bean curd and vegetables in chop suey."). Soya bean milk (homemade, p. 235). Address: Beverly Hills, California.

1516. Hughes, Dorothy. 1944. Let's sing songs of California. Los Angeles, California: Kenneth Miles. 1 score (24 p.). Illust (colored). 31 cm. *

• ***Summary:*** Ten songs written for youth. Mentions Clarke Irvine and Paul Bragg.

Talk with Alice Marks Irvine, Clarke Irvine's wife. 2004. Feb. 23. Clarke wrote a song titled "Sing an anthem for love, not for hate." It was a catchy little tune. Nothing came of it–except this.

1517. Los Angeles City. 1944. Index to register of voters: Los Angeles City Precinct No. 998. Los Angeles, California. Los Angeles, California. 1 p.

• ***Summary:*** Under the letter "L" we read:

"Lager, Gustaf, 1901 West 2nd St., Retired, R [Republican].

"Lager, Mrs. Hilda M., 1901 West 2nd St., Housewife, R [Republican].

"Lager, Miss Mildred M., 1901 West 2nd St., Merchant, R" [Republican].

1518. McCarrison, Robert. 1944. Nutrition and national health: Being the Cantor Lectures delivered before the Royal Society of Arts, 1936. London: Faber & Faber. 75 p. Illust. Index. 23 cm. [12 ref]

• ***Summary:*** Contents: I. Food, nutrition, and health: The cell, food, nutrition, health, the experimental method in research on nutrition, food and physical efficiency (comparison of diets of various peoples of India), freedom of well-fed animals from disease, a good diet and a bad one, food and peptic ulcer, experimental beri-beri and 'stone,' variety of disease in improperly fed animals.

II. Relation of certain food essentials to structure and function of the body: Oxygen and water, proteins, mineral salts–calcium, phosphorus, iron, iodine; the vitamins–A, B-1, B-2, C, D, vitamins in general.

III. National health and nutrition: Deficiency diseases in India, diet and incidence of disease, partial degrees of vitamin insufficiency, national ill health, the death-rate and national health, effects of improved diets, chief faults of British diets, prevention of disease by diet, maternal mortality, building an A1 nation, education, conclusion. Index. The section titled "Food and physical efficiency" (p. 18-24) is largely a comparison of the diets of various peoples / races of India. Those in the northwest region of the Punjab (Maharatta, Sikh, Pathan, Hunza) consume good diets and are of fine physique. As we move "down the Gangetic plain to the coast of Bengal, there is a gradual fall in the stature, bodyweight, stamina, and efficiency of the people." The strong races of northwest India eat whole wheat as their main food, followed by milk and milk products, dhal (pulse, legumes), and vegetables and fruit. The weaker races of Bengal and Madras eat white rice, little milk or milk products, and not many fresh vegetables or fruits. White rats fed the diets of each race ended up looking like that race.

The section on "Proteins" (p. 32-33) states: "Much greater use should also be made of the better class vegetable proteins, such as those of soya bean, legumes, and nuts, and much less of the flesh of animals."

On p. 67 we read: "A notable attempt has been made in Bombay to improve the diet of the common people... This has been achieved by inclusion in it of whole cereal grains, dried skim milk, soya bean, ground-nut, pulses and green-leaf vegetables."

Sir Robert McCarrison made a thorough study of the Hunza people and spent considerable time performing various experiments with their soil and food. He stated elsewhere: "These people [the Hunzakuts] are unsurpassed by any Indian race in perfection of physique. They are long-lived, vigorous in youth and age, capable of great endurance, and enjoy a remarkable freedom from disease in general."

Note 1. A full-text search of the HathiTrust library shows the following number of different spellings (Sept. 2013): Hunzakut 134 total (122 in English). Hunzakuts 284 total (266 in English). Hunzukut 72 total (62 in English). Hunzukuts 252 total (210 in English).

McCarrison, a northern Ireland physician and nutritionist was made a Companion of the Indian Empire (C.I.E.) in 1923, received a knighthood in July 1933, and was appointed as Honourable Physician to the King in 1935. Address: Major-General, Sir, C.I.E. [Companion of the Indian Empire], M.D., D.Sc., LL.D., F.R.C.P., Formerly Director of Research on Nutrition, India.

1519. White, Julius Gilbert. 1944. Abundant health: Expounding the Learn-how-to-be-well system of daily living. 4th ed. Madison College, Tennessee: Published by the author. xix + 437 p. Illust. 24 cm. [21+ ref]

© Copyright Soyinfo Center 2021

• ***Summary:*** The maintenance of physical and mental health can be achieved through a vegetarian diet and wholesome living. Interesting sections include: Meat not necessary (p. 150-52; 13 quotes from authorities). Denmark's food experiment under Dr. Hindhede during World War I (p. 152-53). Sixteen reasons for vegetarianism (p. 153-). The animal kingdom a reservoir for disease (p. 165-). Note that Madison College is a Seventh-day Adventist college and sanitarium.

Soya is discussed on the following pages: Soybeans and soybean products as a replacement for meat (p. 151-52). One section titled "The Soybean: The Wonder Food" (p. 345-59) discusses many aspects of soybeans and how to use soybeans: In baking. In general cooking. As beans. As beans ready-cooked. As meat. As milk (gives 3 recipes for making soybean milk and ways for using "the pulp left after making milk"). As cream. As cheese ("A very satisfactory soybean cheese is now available in the health food stores. It has a texture something like cottage cheese..."). As butter. As oil. As home-made soy butter (made from 4 tablespoons each soy flour and water, 1 cup of oil, a little salt and butter color if desired). As home-made soy mayonnaise (based on the above home-made soy butter). As soy acidophilus milk (also often called soy buttermilk). As greens (soy sprouts). As soy sauce. As coffee. As substitute for egg white.

On page 389 begins a long treatise on the safety of aluminum in connection with cooking and foods, a subject which is causing much debate. Address: Madison, Tennessee.

1520. Gotham, Lucille J. 1944? Allergy to certain foods. *Madison Health Messenger* (*Madison, Tennessee*) 6(1):1-2. Undated.
• ***Summary:*** A reader writes to ask: "I am on a diet eliminating wheat, milk, and eggs. What products and foods can I substitute for them while I am experimenting?" The author answers: "Milk is the hardest problem. Through the years nut milks and soy milks have been developed, and they may be used in cooking in place of cow's milk, with satisfying results for almost everyone. They are also very nutritious. The soy milks are liquid or dry... If you make your own nut or soy milk you had better ask your physician about the advisability of adding some dicalcium phosphate with viosterol and some vitamin A. These additions will not change the flavor noticeably, and they will safeguard your health.

"You will like soy cheese in place of real cheese. Health food stores have these special foods." The following recipes are then given: Nut milk (almonds make the best milk). Soy milk (made from soy flour). Plantation cocktail (with soy milk). Creamy soup (with soy milk and Savita [a product made from brewer's yeast]). Soybean apple crisp (with soy flour). Soy cookies (with soy flour). Creamy rice pudding (with soybean milk). Soy piecrust (with soy flour). Corn soy mush (with soy flour). Mayonnaise (with soy flour). Address: Dietitian.

1521. *Oakland Tribune.* 1945. Junior Forum Concert ushers entertained at garden tea (Photo). Jan. 28. p. 33.
• ***Summary:*** A large photo shows three smiling young ladies seated on a bench, including Patricia Pendleton at about age 16. The caption reads: "Admiring the terraced Italian gardens at the home of Mrs. Horace O. Lanza, in El Cerrito, Piedmont, where they were guests at tea this week are: left, Miss Patricia Pendleton, Miss Janice Dayton Froehlich and Miss Mary Kay Lawson."

Note: In Paul Bragg's Last Will and Testament (Jan. 1958) he stated that Patricia Pendleton was his adopted daughter.

1522. **Product Name:** Pitman Nutmeats [Soya, Savoury, and Nuto Cream].
Manufacturer's Name: Pitman Health Foods Ltd.
Manufacturer's Address: Vitaland, Four Oaks, Sutton Coldfield, England.
Date of Introduction: 1945 April.
Wt/Vol., Packaging, Price: Hermetically sealed tin. Retails for £1/- to £1/11 (4/45, England).
How Stored: Shelf stable.
New Product–Documentation: Ad (half page) in *Vegetarian Messenger and Health Review* (*Manchester, England*). 1945. April. Opposite inside front cover. "Pitman Nutmeats are still available to all who enjoy a tasty and palatable dish. In three varieties: Soya, Savoury, and Nuto Cream. Ask your Health Food Store for these grand foods." Note: It is not clear whether these are soynuts, or tree nuts seasoned with soy sauce. And it is not clear what Nuto Cream is made of.

Ad in Vegetarian Messenger. 1946. Nob. p. iii. "Pitman Nutmeats" The Soya is £1/1 per tin.

1523. Shippey, Lee. 1945. Leeside. *Los Angeles Times.* June 22. p. A4.
• ***Summary:*** The section titled "She knows beans" is about Mildred Lager (who has been a cooking authority for more than 8 years) and her new book "The Useful Soybean." She says the "red points" are unnecessary if we use soybeans, and that they provide protein for more than half the world's population.

1524. *Soybean Digest.* 1945. "The Useful Soybean"... Health stores introduced it to the public. July. p. 14-15.
• ***Summary:*** This very favorable review of Mildred Lager's book titled *The Useful Soybean,* which contains 350 recipes, says of Miss Lager: "The author conducts a health food store in Hollywood, has had her own [radio] program on the air, is past president of the Health Food Dealers of Southern California and past vice president of the National Dietary Association... The author, who says that soybeans originally were 'thrust upon' her, has her own dietary philosophy.

© Copyright Soyinfo Center 2021

She gives little comfort to a public currently trying to solve all dietary problems by taking a few food pills daily. She says, 'Synthetic vitamins and minerals will never equal the intricate combinations of natural foods... We must go back to the use of more natural, unrefined foods with their known and unknown vitamins. We must replenish our soils and strive to produce foods that contain what nature intended them to contain.'"

1525. *Madison Survey* (*Madison, Tennessee*). 1945. Madison health foods. 27(16):63. Aug. 29.
• ***Summary:*** "A letter written some weeks ago from Addis Ababa, Ethiopia, by Mrs. Della Hansen, housekeeper in the Emperor's palace, addressed to Madison Foods, says:

"'His Majesty, the Emperor of Ethiopia, has seen your advertisement in *Life and Health,* and has asked me to write requesting a sample of each of your products.'

"Samples of Zoyburger, Yum, Vigorost, Soy Cheese [tofu], Stakelets, Not Meat, and Soy Koff were sent to the Emperor via the Ethiopian minister in Washington [DC].

"Never before in the history of the food manufacturing department of Madison has there been such evident interest in foods that meet the protein needs of the family dietary."

Note: This is the earliest document seen (March 2021) concerning soybean products (canned meatlike products from Madison Foods) in Ethiopia. This document contains the earliest date seen for soybean products in Ethiopia (1945); soybeans as such had not yet been reported by that date.

1526. *New York Times.* 1945. Obituaries: Dr. Lust, advocate of water healing. Sept. 6. p. 25.
• ***Summary:*** "Butler, New Jersey, Sept. 5–Dr. Benedict Lust, who founded the American Naturopathic Association in 1896 and has been its president ever since, died here last night in his sanitarium of a heart attack." He has lived in the USA since 1892 and was a naturalized citizen. His office in New York was at 343 Lexington Ave.

He established one of the first health-food stores in New York City on East 58th St.

Members of the American Naturopathic Association do not believe in drug treatments, vaccination, vivisection [dissection of live animals], or drug treatments.

He is survived by two brothers, Louis Lust of Flushing, Long Island, owner of the Lust Health Food Bakery at 311 East 56th Street, New York, and Leo Lust of Butler.

Note: This article is a special to the New York Times. Address: Butler, New Jersey.

Note: Clarke Irvine inserted this ad in his own publication for a friend. He never owned a health food store.

1534. *Let's Live.* 1945. Hollywood Cup: In place of coffee (Ad). Sept. p. 6.
• ***Summary:*** This small (2 by 3 inch) display ad states: "The perfect food drink–nutritious and flavorful. No caffein [caffeine]. Made of California barley, figs and bran–skillfully roasted. Wholesome & palatable." An illustration shows a cup of coffee.

Note: The name and address of the manufacturer are not given. By 1950 the product was made by Cubbison.

1535. *Let's Live.* 1945. Prize-winning dogs (Photo caption). Sept. p. 17.
• ***Summary:*** This photo shows Clarke Irvine holding a hammer using the toes of his left foot. The lower caption reads: "A few years ago Skipper Irvine on a lecture tour was examined by a group of chiropractors who voted his feet the most perfect on a white male in the U.S.A."

1536. *Let's Live.* 1945. Health food wholesalers (Ad). Sept. p. 18.
• ***Summary:*** Gives the name, address, and phone number of 11 such distributors. One in Chicago, Illinois; 2 in Detroit, Michigan; 1 each in Rochester and New York City, New York; and the rest in California, mostly in Los Angeles. Includes The Landstrom Co. (San Francisco), and Carque Natural Brands in South Pasadena.

Note: This is the earliest document seen (March 2006) that mentions The Landstrom Co., a health-food distributor in San Francisco.

1537. Marks, Alice. 1945. School day specials. *Let's Live.* Sept. p. 6.
• ***Summary:*** This column begins: "Better foods make better students." "Pack kiddies' lunch box with sandwiches using soy, lima, and wholegrain breads." On cold days try "hot vegebroth or soup" in a thermos bottle. Concludes with 3 recipes. A small portrait photo shows Miss Marks.

1538. Myco Biological Laboratories. 1945. A wonderful food drink–Almon-O (Ad). *Let's Live.* Sept. p. 17.
• ***Summary:*** This 4½ by 2 inch ad states: "The all-year, all-round nourishing product, rich in almonds. Once you drink Almon-O you will always like it. Ask for it at your health food store." Address: 2075 North Fair Oaks Ave., Pasadena 3, California.

1539. *Madison Survey* (*Madison, Tennessee*). 1945. Food-manufacturing industry. 27(19):76. Oct. 17.
• ***Summary:*** "Again Madison Foods has made a carload shipment of nearly 65,000 pounds to the Pacific Coast, to distributors in Los Angeles [California] and Seattle [Washington]. This car contained Zoy Koff, the cereal drink, 350 cases of Kreme O'Soy Milk, and 1,350 cases of the protein foods-Vigorost, Yum, Zoyburger, Not Meat, Stakelets, and Soy Cheese."

"It is now an established fact that we are not dependant on flesh foods for the protein content of the daily rations." After discussing an article about soybeans in *Reader's Digest* titled "How we can help feed Europe's hungry" (Sept. 1945, p. 50-52), the *Madison Survey* concludes: "Madison is fortunate at such a time as this to be able to manufacture and market products that are helping in the solution of the greatest food problem the world has known."

1540. *Vegetarian Messenger and Health Review* (*Manchester, England*). 1945. Health foods, natural remedies, vegetarian footwear, etc. Oct. p. 204.
• ***Summary:*** This is a directory of stores where these products may be purchased. The Imperial Stores and Health Centre, 14 & 15 High Street, High Wycombe, Bucks, carries various vegetarian health foods, including "Soya Nut Meats 1/3, and Soya Flour 5d/lb."

1541. *Record Eagle* (*Traverse City, Michigan*). 1945. Smoothie home mixer... $9.95. Dec. 19. p. 2. *

1542. *Soybean Digest.* 1945. Grits and flakes... from the world of soy: House of Better Living in Los Angeles sold by Mildred Lager. Dec. p. 24.
• ***Summary:*** "House of Better Living, health food store in Los Angeles, which had been owned and operated by Mildred Lager for 14 years [since 25 Oct. 1933], has been sold to Victor and Marvin Lemon. Miss Lager, who is the author of *The Useful Soybean*, announces that she will continue to teach and write."

1543. Lager, Mildred. 1945. The useful soybean: A plus factor in modern living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. Illust. General index. Index of recipes. 22 cm.
• ***Summary:*** One of the most important and innovative books on soyfoods ever written. Contents: Preface. 1. Agriculture's Cinderella: America discovers the soybean, our wonder beans, soy as a food in the United States, soy in rehabilitation food programs, soybeans as an emergency crop, soybean terminology. 2. World-wide use of soybeans: A real antique, monarch of Manchuria, soybeans in mechanized

© Copyright Soyinfo Center 2021

warfare–Germany, soybeans in other countries (USSR, Italy, Spain, Belgium, Holland, Norway, Denmark, Sweden, Great Britain, Canada), soybeans in Lend-Lease and United States Agricultural Marketing Administration, Food for Greece, soybeans and the Mexican Indian, soybeans in Hawaii (Mr. C.G. Lennox). 3. Soybeans and industry: The versatile soy, uses of soybean in industry, soybean paint (from soy oil, incl. Duco finishing), soybean protein (used in making plywood, plastics, water paints, paper sizing, leather finishes, and insecticide sprays), Henry Ford and soybeans, soybean glue (I.F. Laucks and the firms he has licensed turn out some 30,000 tons of soybean glue annually), rubber substitute (Norepol), paper industry (Glidden), plastics, soy-cotton helmets, firefighting compounds, lecithin, fertilizers. 4. Nutritional nuggets: Food value of soybeans and soy products (vegetable or edible types of soybeans, protein, fat & carbohydrate, minerals, vitamins, lecithin, alkaline ash, economy, exaggerated claims), principal uses of soybeans and soy products (meat substitutes, meat enrichers, fortifying foods with soy flour). 5. From soup to nuts: Green beans, dry beans, frozen beans, roasted soybeans, sprouted soybeans, the cow of China–soy milk, the meat without a bone–tofu or soy cheese, the little giant among protein foods–soy flour, soy grits, puffed grits, soy oil, miscellaneous soy products (soy butter [soynut butter, p. 99-100], sandwich spreads, malts, coffee substitutes, soy sauce, soy albumen–a new product, greatly improved during the past two years, is now used to "replace egg albumen in candy manufacture" [as in marshmallows]).

Note 1. This is the second earliest document seen (Aug. 2002) in which the soybean is called the "cow of China."

Note 2. This is the earliest English-language document seen (Dec. 2015) that uses the term "soy albumen" (or "soy albumens") to refer to isolated soy protein as a product.

6. The blazed trail: Introduction (history and pioneers), our tardy acceptance, food pioneers (health-food stores, Dr. W.D. Sansum of Santa Barbara and soy bread, allergy studies, vegetarians, Seventh-day Adventist food companies, meatlike products, Madison College of Tennessee, Loma Linda Food Co., the International Nutrition Laboratory and Dr. H.W. Miller, special dietary concerns and diabetic diets), establishing soybeans in the kitchen (The Edison Institute and Henry Ford, the USDA and the U.S. Bureau of Home Economics, the Agricultural Marketing Administration, U.S. railroads, the Soy Products Division of the Glidden Co., the Soy Flour Association). 7. The challenge of nutrition: The dangers of hidden hungers, nutrition and health, corrective nutrition, starch-restricted diets, meatless diets, allergy diets, bland diets, building diets, reducing diets, acidophilus culture, lecithin. 8. Our wonder crop: Jack and the beanstalk, early history, new varieties, aids to the industry (Regional Soybean Industrial Products Laboratory, American railroads, American Soybean Association, Fouts Brothers of Indiana, *Soybean Digest* and George Strayer in Hudson, Iowa, Soy Flour Association with Edward Kahl as first president, Soya Kitchen in Chicago (Illinois) opened in Jan. 1943, National Soybean Processors Assoc., National Farm Chemurgic Council), educational program, restrictive regulations. 9. Soybeans and the farmer: Varieties, sources of information, seeding and inoculating, harvesting, grading, soybean diseases, crop rotation, damaged beans. 10. Tomorrow: Acreage and production, soybeans on the farm, soybeans in nutrition, postwar industrial uses, future improvements. 11. A few suggestions for better living: Kitchen diplomacy, personal opinions, soybeans for everyone. Recipes: Green soybeans, dry soybeans, sprouted soybeans, roasted or toasted soybeans, meat-substitute dishes, soy-enriched meat dishes, soy noodles, macaroni, spaghetti, sauces and gravies, soups, salads, dressings, soy spreads, soy milk, tofu or soy cheese, soy butter, soy cereals, soy desserts, soy candies, soy beverages, soy-flour recipes, bread and muffins, pancakes and waffles, soy gluten recipes, baking-powder biscuits, pastry, cookies and doughnuts, cakes.

Contains recipes for "Soy milk molasses shake (p. 238). Soy puddings. Soy ice cream (p. 250; "Soy milk may be used in place of regular milk in ice-cream recipes... adding whipped cream"). Soy fruit ice cream. Soy chocolate dessert (Eggless) (p. 250-51). Soy shake "(p. 254, made in a "liquefier or mixer").

The story of Allied aid to Greece [p. 24-26] is one of the great mercy stories of World War II. Starting in March 1942, as many Greeks were starving, the first mercy ship sailed to Greece with food and medicine. Up to Nov. 1943, the United States through Lend-Lease sent 82 million pounds of food to Greece. A number of these foods (including soup powders, stew mixes, and spaghetti) were based on soy flour and grits, and specifically developed to suit Greek tastes.

Concerning Henry Ford (p. 35-38), his "first experiments were made in a laboratory in connection with the Edison Institute in 1930. In these experiments, several tons of wheat were used, also several thousand bushels of carrots; sunflower seeds, which have a high oil content; cabbages; onions; and cornstalks. It was not until December, 1931, after a long series of experiments with the soybean, that Mr. Ford and his chemists felt that they were at last approaching a solution to the problem of finding a basic farm material from which the ordinary farmer could develop a commercially profitable product."

Note 3. This is the earliest published English-language document seen (Sept. 2013) that uses the term "Soy ice cream" (p. 250).

Note 4. This is the earliest document seen (July 2007, one of two) that uses the word "Cinderella" in connection with the soybean. The author, however, does not elaborate on this idea.

Note 5. This is the earliest English-language document seen (Jan. 2019) that contains the term "soy-flour"–however it is used as an adjective. Address: Southern California.

1544. Lager, Mildred. 1945. America discovers the soybean (Document part). In: Mildred Lager. 1945. The Useful Soybean: A Plus Factor in Modern Living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 1-3.

• ***Summary:*** "The soybean is a bean with a past, present, and future–a vital present and a tremendous future. Yet, the average American knows very little about it; in fact, he hardly knows what it looks like. He has not been interested in a bean raised for cattle food, hay, or soil improvement. He has never dreamed that one day the humble soybean would be classed as one of the five great protein foods, and that its bodybuilding and life-sustaining powers would be recognized along with those of meat, milk, eggs, and cheese. Neither has he realized that soybeans could be made into flour, flakes, grits, and a host of other products that can be added to everyday foods without his being aware of their presence.

"The soybean came to this country as a stray immigrant about 1804. It took us over a hundred years to realize its value. Up to twenty-five years ago, soy pioneers who saw commercial, industrial, and nutritional possibilities in the beans were classed as fanatics. As far as the general public was concerned, the Chinese bean did not register at all. Even growers saw it only as a hay crop, a cattle food, or a soil improver. Industrial uses were merely dim possibilities, and its nutritional merits were left entirely to food-minded individuals and the so-called 'food cranks.'

"The First World War gave soy its first real chance. Fats and oils are precious in wartime and, because the soybean contains 18% or more of oil that can be used for industrial and edible purposes, it became important as an oil crop. The result was that soybean oil entered the American kitchen as a refined oil for salad dressings and shortenings. During the First World War, we also became aware of the nutritional value of the bean for army rations and as a human food, but nothing further was done about it at the time. Bill Baker, of Ojai, California, one of the early pioneers of soy bread, used to say, 'The First World War discovered the value of the soybean and the Second World War will put it where it belongs.'

"Nutritionally the Second World War put the soybean in its rightful place. It is no longer considered a diet food, a fad, or a substitute, but it is now a food that can stand on its own merits. The global conflict had thrust soy into our diet, and soy will leave a lasting imprint."

"We are going to meet soy in every form imaginable–as a dry bean or a tender sprout, and in everything from appetizers to chocolate sodas. We might expect soybeans in soy bread, soy cereal, or crackers, but hardly in lunch meats, pretzels, ice cream, candy, or chocolate. Yet chances are it will be there in some form or other, and we shall never know the difference in taste." Address: Southern California.

1545. Lager, Mildred. 1945. Soybeans in Hawaii (Document part). In: Mildred Lager. 1945. The Useful Soybean: A Plus Factor in Modern Living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 27-29.

• ***Summary:*** "The food situation in Hawaii, since it has become the front line in a war zone, opens up new territory for the soybean to conquer. The Hawaiian Islands are now faced with the necessity of increased home food production to make their population more self-sustaining."

"Hawaii must select crops that can be grown, and of these she must pick those that contain the necessary nutriment to meet the present emergency. The soybean can fulfill these requirements and ranks as a food crop for wartime Hawaii."

"C.G. Lennox, in a discussion of the edible soybean in Hawaii says: 'The edible soybean assumes a position of prominence as a source of substitutes for animal proteins and oils in Hawaii's program of self sustenance.

"'The high protein content of the green shelled beans, quickness in developing a crop, freedom from serious insects, pests, and diseases, and cheapness of planting, cultivating, and harvesting in terms of man-days per ton of green beans, all contribute to the value of the soybean as an emergency food crop.

"'Success with the year-round production of soybeans in Hawaii hinges principally upon the correct choice of varieties for planting in the different seasons; secondly, upon sufficient fertilization with nitrogen and phosphorus.'"

"Edible soybeans are not new in Hawaii. They have been experimentally grown since 1908 but have never been a food crop of the Islands. Growing conditions in Hawaii are suitable for year-round production of most vegetable crops but not of the soybean. It is a plant whose time of flowering responds to the length rather than the temperature of the day. Mr. Lennox gives the following explanation of why it has not so far been grown successfully the entire year:

"'The soybean is one of a large group of plants which flowers under the stimulus of a long period of darkness. Although the day length of the shortest day in Hawaii is only two and one-half hours shorter than the longest day this is quite sufficient to have a profound effect on the soybean. During the summer season the plants come into flower in exactly the same length of time as recorded on the mainland, but as the days shorten the flowering commences sooner. Nearly all the flower bloom at the same time on the soybean plant and if the flowering is initiated before a full-sized plant has developed, the number of flowers is proportionately reduced. The reduction in number of pods per plant results in a reduced yield per acre. It is this stimulus of the short day resulting in small crops that has retarded the interest in soybeans as a vegetable crop for Hawaii.'" Address: Southern California.

1546. Lager, Mildred. 1945. Madison College (Document part). In: Mildred Lager. 1945. The Useful Soybean: A Plus Factor in Modern Living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 106-07.
• ***Summary:*** "There are several large and small Seventh-day Adventist food concerns in this country that manufacture a complete supply of soy products, most of which are cooked and ready to use.

"As pioneers, all these Adventist concerns have done considerable research on soybeans, and most of them employ chemists who have had firsthand experience with the beans in China. These men know the food value of the bean, what it has meant nutritionally elsewhere, and they strive to perfect formulas for well-balanced and complete vegetable protein foods to take the place of meat. Most of these concerns also manufacture soy milk, fortified to equal dairy milk in food value. Their meatlike products at first were for the use of their own people, their hospitals and institutions; but demands for vegetable protein have brought them into health-food stores and food specialty shops. Sales on these products have been steadily increasing with a rapid rise in the last 3 years, climaxed by meat and cheese rationing..."

"Perhaps the best known of the pioneer institutions is Madison College, Tennessee. It is doing an outstanding job in maintaining a self-supporting college and a sanitarium and in developing a complete line of soy products that are being sold on an international scale. Madison's curriculum includes 27 campus industries run by the students to support the college and themselves. A 900-acre college farm is operated entirely by student labor and is also self-supporting. The student canning factory was started when the college was in its infancy, almost forty years ago; and several years of research in food chemistry have resulted in many new products built around the soybean. Madison College is largely responsible for making soybeans appetizing. They have developed a soy milk that has received world recognition; observers have come from Africa, India, and other countries where milch cows are scarce, to study the methods of Madison's soybean dairy. They also make soy cheese [tofu] and several meat substitutes, as well as a soybean beverage. These foods are now well distributed over the United States and some foreign countries, including South Africa."

Note. This is the earliest English-language document seen (Aug. 2013) that uses the term "soybean beverage" to refer to soy milk. Address: Southern California.

1547. Lager, Mildred. 1945. Bill Baker of Ojai, California (Document part). In: Mildred Lager. 1945. The Useful Soybean: A Plus Factor in Modern Living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 91-92
• ***Summary:*** The section on "Soy flour" states (p. 91-92): "Soy bread is the best known and the most widely used of all soy-flour products, and it is sold in many grocery stores; but even so, its use so far has been more or less restricted to certain areas, and it has been consumed only in small quantities. A small amount of soy bread has been on the market ever since the making of soy flour.

"Bill Baker of Ojai, California, famous for his sugar artistry and his 'White House cakes' (he sent the President an elaborately decorated fruitcake every Christmas for many years), was one of the early pioneers in soy bread, and his efforts have done much to establish it in the American diet. About fifteen years ago [i.e., ca. 1930] Mr. Baker started making a few loaves of soybean bread for special diet cases. The results convinced him of its nutritional value, and he set out to make a loaf that would have universal appeal. Today his establishment devotes its entire time to the making of soy- and lima-bean products and ships them to all major cities of the West. Even now, the bread is shipped as far east as Chicago; before the war it was sent as far as New York, Hawaii, and Alaska. Bill Baker bread contains more soy flour than the average loaf of soy bread, and its only sweetening is honey.

"Bill Baker and his devotion to soy products have put the little city of Ojai, Calif., on the map. He had first to perfect his formula and then to convince doctors, grocers, and the general public of its merit. It is one of the ironies of fate that Bill Baker could not live to see the fulfillment of his prophecies."

Note: He died in May 1942. Address: Southern California.

1548. Lager, Mildred. 1945. Nutritional nuggets: Alkaline ash (Document part). In: Mildred Lager. 1945. The Useful Soybean: A Plus Factor in Modern Living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. 61-62.
• ***Summary:*** "Last, but not least by any means on the nutritional side, is the fact that soybeans are alkaline in their ash, being rich in potassium and other alkaline-bearing salts. This reason alone has gained them much favor. Since the majority of our protein foods are acid in ash, the alkaline soybean provides a welcome balance. Its alkaline ash has made it extremely valuable in corrective and special diets as an aid in relieving acidosis. Also, soybeans have often been suggested in place of such animal proteins as meat, fish, and eggs for the same reason. Soybeans are the only complete protein that are highly alkaline in its ash." Address: Southern California.

1549. Lager, Mildred. 1945. Preface (Document part). In: Mildred Lager. 1945. The Useful Soybean: A Plus Factor in Modern Living. New York and London: McGraw-Hill Book Company, Inc. xii + 295 p. See p. vii-ix.
• ***Summary:*** "We of the occidental world are just discovering that soybeans are indeed nuggets of gold in our modern

© Copyright Soyinfo Center 2021

civilization. During the last twenty-five years [i.e., since 1920], they have mushroomed from an almost unknown forage crop to one of our most important cash crops, vital to the fields of agriculture, commerce, nutrition, and industry. Nutritionally soybeans have become a vital food for a world at war and a postwar world at peace. Industrially they are a challenge to the chemists' flasks and test tubes; for more than two hundred commercial products have been made from the little beans. Hence soybeans and soybean products are indeed destined to be a vital plus factor in our world of tomorrow.

"Food has always been my hobby. When Fate, that unseen hand that sometimes guides us to our rightful groove in life, gave me firsthand experience with the miracles of proper diet, teaching fundamental facts on nutrition became my goal. I have tried to pass on the message of better eating via the platform, the printed page, and the radio, and for the last dozen years have enjoyed the unusual opportunity of occupying a vantage point on a busy crossroad of nutrition. I have seen, too, the value of soybeans in the so-called 'corrective regime,' and it has convinced me of their rightful place in the average diet.

"I experimented with soy as a food, secured special soy products for special diets, made up recipes, and in my classes taught the cooking of soybeans when they were practically unknown, when soy was eaten because it was soy and regardless of taste or palatability. In 1942, when soybeans became prominent as a war emergency food, a collection of these recipes was published under the title of '150 Ways to Use Soybeans.'"

"Because my main interest in soybeans and soy products is nutritional, the purpose of this book is to help bridge the gap from the unusual to the usual. I have tried to present the story of Asia's ancient food in a true, authentic manner–to give credit where credit is due. I am not a vegetarian, not affiliated with any organization or group advocating a meatless diet. I believe that proper nutrition and common-sense living are man's best medicine."

"I want to acknowledge the material, encouragement, and help that I have received from the men and women of medicine, research, industry, and business as well as homemakers and friends. I am especially grateful to

1553. Lager, Mildred. 1946. The meat without a bone. *Soybean Digest.* April. p. 22.

• ***Summary:*** "To anyone interested in unusual foods soy cheese is indeed fascinating. While it will never become popular in this country it is worth knowing about and trying at least once.

"Soy cheese or curd is known to the Chinese as tofu and it has been aptly described by them as 'the meat without a bone.'... The bean curd or soy cheese is the coagulated casein of the soybean and is made from soy milk very much as we make cottage cheese. The result is a white, very soft, watery substance, that can be pressed into a cake or soft cube. It is an easily digested food, fairly high in protein, and can be used as a meat, egg, or fish substitute, as a cheese, or as a topping or dessert.

"Every Oriental settlement has its tofu factory or factories which supply the restaurants and markets with fresh cheese. The methods used in some of them are very crude and primitive but the result is an excellent cake of cheese. There is an interesting little place in the heart of new Chinatown in Los Angeles run by two old Chinese who claim no knowledge of English, and can't be bothered with curious visitors. They did, however, allow me to watch from a distance. A large size coffee mill run by a little motor ground the beans. The curds were cooked in a clean wash tub and the cakes were pressed between two boards held down by a wooden bar which was attached to the wall at one end and weighted at the other end with a pail of sand. Naturally their output was limited but their product was excellent. Here was the old world working in the midst of the new making an ancient food that was yet new and novel."

Describes how to make tofu at home (vaguely), how to store it, basic preparatory techniques, and serving suggestions. It is delicious as a dessert "Some ingenious cooks even use it for cheese cake." Canned tofu is more in demand than fresh because it is more widely available. "Canned it is known as soy cheese, soy food or soy curd and the taste, texture and moisture varies with the different brands."

"Soy cheese will never become popular in this country. A certain amount will always be used, however, by the vegetarian, especially by those who do not use any animal products whatsoever [i.e., vegans], and by those who have developed a taste for it. It is an unusual food that does not appeal to everyone. It is becoming more and more popular in corrective nutrition because it often fills a need in the special diet.

"'The meat without a bone' is one of the interesting variations of the versatile bean. This ancient food is gaining a toe hold in our American diet and is filling a dietary need for many persons."

A photo shows a woman in a Korean market selling cakes of tofu on a round woven bamboo tray. Address: Author of "The Useful Soybean" [California].

1554. *New York Times.* 1946. Mrs. Eula McClary, publicist, was 60. Sept. 14. p. 5.

• ***Summary:*** "Mrs. Eula McClary, former newspaper writer and one of the first woman publicists, died Wednesday at her home in Washington, D.C." at age 60.

She led a campaign during World War I to make the nation "calorie conscious." In Jan. 1917, as a press agent for the Life Extension Institute, she went to Washington, DC, to try to "interest President Woodrow Wilson in the campaign for 'cheaper but substantial meals.'" She proposed breakfasts

© Copyright Soyinfo Center 2021

that would cost 7 cents, lunches 8 cents and dinners 10 cents.

She had won great favor for the new idea of "calorie content" and was said to have exacted a promise from the president "to proclaim a national health food day during which no one would spend more than 25 cents for food. The indifference of the White House, especially that of the culinary staff, is said to have prevented the acceptance of her idea."

1555. Taylor, S.; Farrington, W.M. 1946. Annual report of the Vegetarian Society for the year ended 31 August, 1946. *Vegetarian Messenger and Health Review* (*Manchester, England*). Dec. p. 238-45.
• ***Summary:*** Contents: Introduction. Vegetarians and rationing. Obituaries. Annual meetings and May meetings. Affiliated societies (names of the 23 are given). Lectures presented. Literature published. Vegetarian Messenger and Health Review (now in its 98th year). Health food store. Financial statements of The Vegetarian Society (of the U.K.). The future.

The Society's expenses were £5,536. Of these, the main ones were for salaries and wages (£1,616), and printing of Vegetarian Messenger (£843). Cash in bank was £1,065. Address: 1. Chairman; 2. Hon. Secretary.

1556. Bergeron, Trader Vic. 1946. Trader Vic's book of food and drink. New York, NY: Doubleday & Co. 272 p. Illust. Index. 20 cm.
• ***Summary:*** The only soyfood mentioned in this books is soy sauce. "Soya sauce, which was once eyed distrustfully and termed 'bug juice' by the uninformed, is now accepted on familiar terms and we are even beginning to appreciate its usefulness in our own kitchens" (p. 157).

The recipe for Chicken livers with water chestnuts (p. 183) concludes: "For added flavor, dip the livers first in soya sauce." The next recipe, Chicken livers in egg batter (p. 183-84), begins: "Cut chicken or duck livers in small strips, dip them first in soya sauce and then in a very light..."

The chapter on "Barbecuing" contains the most information on recipes using soya sauce (p. 237-41): "A word about soya sauce before we proceed. The use of this little-known ingredient in cooking introduces an indescribable flavor that cannot be equaled. It gives a beautiful brown glaze to all meats and makes the fat crisp and appetizing. Most people associate soya sauce with the little jugs on the tables in Chinese restaurants; it is vulgarly called 'bug juice' by the uninitiated. It belongs in the kitchen right along with your other seasonings and as you experiment with it you'll find yourself using it as often as you would salt and pepper. Try basting a leg of lamb with it–the flavor and color are superb. Lamb chops, too, whether you fry, broil, or barbecue them, are improved by the use of soya sauce" (p. 237).

"Steak Hawaiian: This recipe illustrates perfectly the value of cooking with soya sauce. You'll find the steak has color and an indescribable flavor, and the fat has a crisp brownness that can't be achieved in any other method of cooking." The steak is marinated on both sides for about 15 minutes total in a mixture of finely minced garlic and ½ to 1 cup of soya sauce. Then it is barbecued, fried, or broiled.

"Barbecued squab [young domestic pigeon]: Brush whole squabs inside and out with soya sauce and barbecue" for 20-25 minutes. Or roast for about the same time. If desired, the "squab may be basted occasionally with a mixture of soya sauce and melted butter while cooking."

Barbecued lamb, first marinated in a mixture that contains 6 tablespoons soya sauce. Javanese Saté calls for "4 teaspoons Saté spice," which is sold in Jars at Trader Vic's Trading Store, 6500 San Pablo Ave., Oakland, California. Note: It probably contains soya sauce. Saté is an Indonesian / Malay word.

Barbecued shrimp: "Peel large gulf shrimp; dip them in soya sauce..." Smoked oysters: "Dip oysters in soya sauce," skewer, then barbecue. Barbecued chicken livers: "Dip in soya sauce, skewer on wire, and barbecue..."

A recipe for Trader Vic's daiquiri (p. 92-93) states: "This drink should be made in a Waring type mixer with one large handful of fine ice, and no more than three should be made at one time."

Note 1. This is the earliest document seen (May 2010) concerning soy ingredients used in Indonesian-style recipes, food products, or dishes outside of Indonesia.

Note 2. In this book Trader Vic shows his love of rum and of swearwords. Address: Oakland, California.

1557. Davis, Adelle. 1946. You can stay well (Condensed ed.). Chicago, Illinois: Graphic Arts Research Foundation. Frederick H. Bartz, director. 90 p. No index. 22 cm.
• ***Summary:*** Cover title: "Tells the amazing relationship between food and health. Endorsed by many top scientists and physicians. Your food as it affects insomnia, arthritis, eye disorders, goiter, neuritis, tuberculosis, virility, indigestion, fatigue, heart disorders, and most other conditions." This book is written in an informal, conversational format. A table of nutritional composition has entries for soy bean flour (p. 66), cooked dried soybeans, and uncooked dried soybeans (p. 78).

According to the Foreword to the condensed version, this book has been temporarily out of print. Note: The reasons for this are not clear, but it may well have been because of World War II. It is less clear why she and/or the publisher issued a condensed edition. The original unabridged edition, published by the author in 1939, was 317 pages in length. The 17th printing of the condensed edition was Jan. 1959. Address: A.B., M.S., Consulting nutritionist.

1558. Hauser, Gayelord. 1946. The Gayelord Hauser cook book: Good food, good health, good looks. New York, NY:

Coward-McCann, Inc. viii + 312 p. Illust. 21 cm.
• ***Summary:*** This is a health food (but not a vegetarian) cookbook; it uses meats, poultry, and fish. Soy-related recipes include: Soya tomato soup (with soya flour, p. 48). Soya soup (with soya flour and soy sauce, p. 49). Soya cheese sticks (with soya grits, p. 111). Roasted soybeans (p. 115; p. 114 notes that the soybean is a first-class protein food). Cranberry soya pudding (p. with soya flour, p. 154). Caramel soya custard (with soya milk, p. 163). Rice pudding (with soya milk, p. 164). Soya ice cream (with soya milk and agar-agar, p. 167).

In the chapter on baked goods, p. 179 shows that soya flour is rich in protein, vitamin B-1, riboflavin, and niacin. And pages 180-81 give a detailed discussion of the benefits of soya flour and how to use it. Page 182 discusses gluten flour. Recipes include: Whole-wheat soya bread (p. 183). Soya nut waffles (p. 186). Soya muffins (p. 188). Steamed soya bread (p. 189). Four nutritious sandwich spreads with ½ cup soya flour (p. 191). Delicious soya cake (p. 193-94). Quick service cake (p. 195-96). Soya-flour pie crust (p. 197). Soya cookies (p. 204). Soya sand tarts (p. 206).

Fletcherizer (p. 221, a type of electric blender). Fletcherized drinks: Cream of soya milk (with soya flour, p. 222), vege-nut milk (with soya flour), almond-, pecan-, walnut-, filbert-, or cashew milk. Cream of soybean soup (p. 224).

In the chapter titled "Yogurt, brewer's yeast, and other special foods" is a long section on soybeans and gluten (p. 237-42) including basic information on soybean oil, soya flour and grits, soy flakes, soy meats (split or coarsely ground soybeans), soybeans as a vegetable [fresh-green soybeans], soybean milk, and soybean curd or tofu. Instructions are given for making soybean sprouts at home. Recipes include: Boiled soybean sprouts. Fried soybean sprouts. Green soybeans. Baked soybeans. Soybean milk. Soybean parsley croquettes. Soybean nut croquettes. Vanilla soya ice cream. Homemade gluten dough. Gluten steaks or chops. Address: Beverly Hills, California.

1559. Walker, Norman Wardhaugh; Pope, R.D. 1946. Raw vegetable juices: What's missing in your body? Rev. ed. Anaheim, California: Norwalk Laboratory. 117 p. 21 cm. A 1947 ed. was published in St. George, Utah, by Norwalk Press (127 p.). *
• ***Summary:*** "Compiled under the direction of R.D. Pope." Note: Norwalk makes the Norwalk juicer. The author says that the most aggravated case of constipation can be overcome in a few days or a week by drinking raw spinach cocktails every day. Note: Norman Wardhaugh Walker was born in 1876. Address: M.D.

1560. Two photographs of Mildred Lager and Ed Jones (Photograph). 1946? Undated.
• ***Summary:*** See also next page. Both photos are black and white, and taken in Los Angeles, California–probably in 1946, the year that Mildred and Ed Jones were married.

(1) Mildred and her husband, Ed Jones, full body view, standing together in a driveway.

(2) Mildred and her husband, Ed Jones, from the waist up. On the back is written in pencil "59936 Hwd. 24." Note: The meaning of this note is unclear. Does "Hwd." stand for "Hollywood," or should it be "Hwy." for "Highway"?

Sent to Soyfoods Center in May 1981 by Dr. & Mrs. George L. Bower of Redding, California. Lois Bower was Mildred's stepdaughter.

1561. *Herald of Health and Naturopath* (*San Francisco & Washington, DC*). 1947-1957. Serial/periodical.
• ***Summary:*** The National College of Natural Medicine (NCNM, Portland, Oregon) owns most of these issues. From Jan. 1947 (Vol. 52, No. 1) to April 1957 (Vol. 62, No. 4) are not bound. The publisher was the Herald of Health Publishing Company, most likely started by Benedict Lust (1872-1945).

1562. *Soybean Blue Book.* 1947. Manufacturers and handlers of soy foods. p. 69-73.
• ***Summary:*** Arranged alphabetically by product category: Beverages; Breakfast Foods; Soy Butter (probably like margarine; the only source is Daglish Health Foods in Santa Cruz, California); Canned Green Soybeans (Note: These are probably canned mature green vegetable type soybeans. In the 1948 Bluebook this section is titled "Canners of Green Vegetable Soybeans." List compiled from 1947 edition of *Canners' Directory,* published by the National Canners Association); Coffee Substitutes; Cookies, Crackers, Toasts and Wafers; Soybeans for Cooking and Sprouting; Soy Flour, Flakes and Grits; Soy Flour Mixes; Soy Food Consultant (Donald S. Payne); Health Food Stores, Supply Houses; Lecithin; Macaroni, Spaghetti, Noodles; Meat Substitutes; Soy Milk; Sprouts; Roasted Soybeans or Nuts; Sausage Binders; Salad and Cooking Oils, Shortening; Soy Sauce; Toppings [Whip]; Whipping Agents.

1563. Safeway. 1947. Eat plenty of fresh fruit! (Ad). *Los Angeles Times.* June 18. p. 6.
• ***Summary:*** This is a large ad for many products on sale at Safeway. In the section on "Tea, crackers and toast" we read: "Cubbison Toast. Vegetized. 7-oz. pkg. 17¢. Cubbison Soya Toast. 7-oz. pkg. 17¢." Address: [California].

1564. Pacific Appliance Stores. 1947. $40.00 on a brand new washing machine (Ad). *Los Angeles Times.* June 24. p. 4.
• ***Summary:*** This ad features many modern electric kitchen utensils, including "Waring Blenders."

Note: This is the earliest document seen (July 2006) that mentions "Waring Blenders" (spelled that way) or that uses the noun "Blender" (or "Blenders") in the trade name of an electric blender. Address: 6032 Wilshire Blvd. [Los Angeles]. Phone: YOrk 6224.

1565. Allen, Mark. 1947. Soybeans: The miracle food. *Diet Digest* (*Beverly Hills, California*) No. 27. p. 21-22, 38. [1 ref]
• ***Summary:*** "Reprinted by special permission of Syndicate Publications, Inc."

1566. Ware's (New Rochelle). 1947. Display ad: Ware's introduces–the first time anywhere! Champion Juicer $9.95. *New York Times.* July 13. p. 28.
• ***Summary:*** "The new Champion is truly the finest juicer we have ever had the opportunity to sell–with an outstanding combination of features that makes its price unusually modest. It is built to last a lifetime.

"It extracts every bit of juice, clear and sweet with no rind taste, in a single stroke!"

Note: It is hand turned, not electric, and is designed for use only with citrus fruits–oranges, lemons, grapefruits. A photo shows the juicer.

1567. Brady, William. 1947. Here's to health: Italian teeth and American nutrition. *Los Angeles Times.* Aug. 13. p. A7.
• ***Summary:*** Italian children have much fewer dental caries (cavities) than children in Yankeeland. Part of the reason is probably due to diet and to sugar consumption. "Naturally the one cook book in my library–*Let's Cook It Right,* by Adelle Davis, gives numerous suggestions for using wheat and wheat germ... the author is a recognized authority on nutrition as well as a culinary scientist." Address: M.D. [Los Angeles].

1568. Cubbison's Cracker Co. 1947. Cubbison's Zwieback Wheat Toast: Reduce and love it (Ad). *Los Angeles Times.* Oct. 31. p. A6.
• ***Summary:*** "Cubbison's Zwieback Wheat Toast is not only delicious to crunch but (without butter) it is recommended by doctors and is on famous "reducing plan" diet lists. If you enjoy a dainty thin toast buy it in the form of Cubbison's Wheat Melbettes."

"Cubbison's Zwieback and Melbettes are not 'reducing toasts.' They are a delicious treat."

"At all grocers. Toast of the nation. Cubbison's marvelous improvement on Nature's 'Staff of Life'" Address: [California].

1569. *Washington Post.* 1947. Paul Bragg's Health Cookbook (Knopf, $3). Dec. 3. p. 2.
• ***Summary:*** "Runs the whole gamut of recipes from basic dishes to delicacies with special emphasis on health." Note: This tiny block of text looks like a filler, but it could be an advertisement.

1570. Blumenthal, Saul. 1947. Food products. Brooklyn, New York: Chemical Publishing Co., Inc. ix + 986 p. See p. 134-35, 335-36, 378-85. Index. 23 cm. [soy ref]
• ***Summary:*** The following soy products are discussed: Soy milk (p. 134). Soy curd (bean curd or tofu, p. 134-35). Fried soybeans (p. 335-36). Health foods (p. 337).

Concerning fried soybeans, this is the earliest document seen (Dec. 2012) that discusses this subject scientifically and in some depth, since most similar products had previously been dry roasted. (For exceptions see Stoddard 1917, Parsons 1939, and Hale 1941). "The fried soybean is a

© Copyright Soyinfo Center 2021

pleasing nut-like confection, which will prove a product of sufficient interest to many lovers of nut meats." The best soybean for fried food purposes is Illini; other good varieties are Rokusun, Mammoth Yellow, Dixi, Easy Cook [Easycook], and Hahto. By writing the National Soybean Oil Manufacturers Association, Box 388, Taylorville, Illinois [Note: This Association may have been affiliated with the Allied Mills soybean crushing plant in Taylorville; it was probably not affiliated with NSPA], all information on the bean and sources of supply can be acquired.

"Before frying the soybean, it should be washed in water to remove particles of dirt that may be adhering. In order to obtain a good product with a nut-like texture, the bean is allowed to swell by soaking in boiling water for a period of 10 minutes. The water is drained off and the beans are cooled and fried. The beans are then placed in a proper wire basket, with 5 pounds of fat, previously heated to 370 to 380ºF. The addition of the bean to the fat will cause a drop in temperature to about 340 to 355ºF, at which point most of the frying takes place. Temperature control is important since frying at high temperatures produces a bean with a scorched flavor, while frying at too low temperatures produces a product with a beany instead of a nutty flavor. After frying, the beans are drained, salted and cooled in the same manner as other fried nut meats.

The section titled "Health Foods" states: "Nuts and soybeans are good substitutes for meats, fish, eggs and sea foods. Pistachio nuts are non-acid-forming and are rich in organic salts and vitamins... Their high percentage of alkaline minerals makes them an alkaline-yielding food."

Acidophilus milk (from dairy milk) is discussed on pages 130-32, and Kefir (from dairy milk) on pages 132-33. Address: Food Technologist and Consultant, Shirley Laboratories, New York, NY.
